Joseph Coates	88	90
John Radcliffe	92
William J. Dunn	93
James J. Troy	94
Walter C. Furlong	94

Second Hearing, October 31, 1913.

For Petitioner.	Direct.	Cross.	Re-direct.	Re-cross.
John Keyes	102	103
Isaac Coburn	105	106
John Flynn	108
William Dunleavy	110
Michael J. O'Rourke	112
John Kane	115	116
John C. Veenstra	118
Edward Acorn	120

Third Hearing, November 14, 1913.

For Petitioner.	Direct.	Cross.	Re-direct.	Re-cross.
Andrew F. McBride	135	140
Samuel V. S. Muzzy.....	140	145	147	148
William Wieda	151, 157
James E. Taylor	153	155

Fourth Hearing, December 4, 1913.

For Erie Railroad Co.	Direct.	Cross.	Re-direct.	Re-cross.
A. L. Sorensen	178, 198	197, 201 203	201, 203 203, 209	205, 210
Francis M. Graff	212
Charles Pfitzner	228	230
William H. Willis	231
R. H. Corson	235
Martin Quick	236
George H. Palmer	244

Fifth Hearing, December 5, 1913.

For Erie Railroad Co.	Direct.	Cross.	Re-direct.	Re-cross.
William Brameld	258	292
Robert Hoppen, Jr.	296
J. E. Bailey	305
James C. Patterson	308	315

Sixth Hearing, December 11, 1913.

For Erie Railroad Co.	Direct.	Cross.	Re-direct.	Re-cross.
William McGill	325
William H. Levi	327
Peter Doremus	330	332

Seventh Hearing, December 26, 1913.

For Erie Railroad Co.	Direct.	Cross.	Re-direct.	Re-cross.
A. L. Sorensen	336	337
James Burke	338	341	342	343
H. W. McGrath	343
For Switch Owners				
Daniel O'Connell	350	354
Charles Agnew	357	360
A. A. Beckman	364	368
R. J. Stell	370	374
Elmer E. Hassan	375	377
James Wilson, Jr.	381
Jacob Meyer	384
William Kearns	388
William Elliott, Jr.	390	391
Robert H. Smith	392	394

Eighth Hearing, January 9, 1914.

For Erie Railroad Co.	Direct.	Cross.	Re-direct.	Re-cross.
W. H. Brameld	396
W. H. Willis	397
George R. Wheeler	444	453
For Switch Owners				
Frank Vance	399	403	406
William M. Decker	407	411	415
Henry M. Post	420	422	424
George P. Carroll	426	429
Frederick G. Hopper	434	440	443

Ninth Hearing, January 29, 1914.

For Erie Railroad Co.	Direct.	Cross.	Re-direct.	Re-cross.
W. M. Dawley	456
George W. Auchenback	462, 470

Tenth Hearing, May 21, 1914.

For Petitioner.	Direct.	Cross.	Re-direct.	Re-cross.
Henry Ryon	475
H. J. Harder	503	504

Eleventh Hearing, July 9, 1914.

For Respondent.	Direct.	Cross.	Further direct.	Re-cross.
W. H. Brameld	508	526	528
Robert Falconer	535

Twelfth Hearing, July 13, 1914.

For Respondent.	Direct.	Cross.	Further direct.	Further cross.
W. H. Brameld	541	547	552	554
For Petitioner.				
Henry Ryon	556	558
For Property Owners.				
William Elliott, Jr.	560	562
Abraham A. Beekman	564	565
Frank Vance	568	570
Jacob Meyer	571
Joseph Agnew	581	582

(No witnesses in Hearing 12-A.)

Thirteenth Hearing, October 16, 1914.

For Public Service Ry. Co.	Direct.	Cross.	Re-direct.	Re-cross.
L. D. H. Gilmour	589
W. L. Bartholomew	597	604

Fourteenth Hearing, October 23, 1914.

(No witnesses.)

Fifteenth Hearing, October 29, 1914.

For P. S. R. Co.	Direct.	Cross.	Re-direct.	Re-cross.
R. George	613	616	620	623
For Respondent.				
W. H. Brameld	628	631
D. E. Minard	633
Charles P. Crawford	633	691

Sixteenth Hearing, November 2, 1914.

For Respondent.	Direct.	Cross.	Re-direct.	Re-cross.
Charles P. Crawford	699	706
F. B. Lincoln	707	733

Seventeenth Hearing, November 4, 1914.

For Respondent.	Direct.	Cross.	Re-direct.	Re-cross.
Robert C. Falconer	747	783

Eighteenth Hearing, February 5, 1915.

For Petitioner.	Direct.	Cross.	Re-direct.	Re-cross.
H. J. Harder	818	819
For Respondent.				
Robert C. Falconer	829	837

FILED
OCT 4 1920

JAMES D. WATKINS,
Clerk

Supreme Court of the United States

OCTOBER TERM, 1920.

Nos. 33 and 34.

ERIE RAILROAD COMPANY,

Plaintiff in Error,

vs.

BOARD OF PUBLIC UTILITY COMMISSIONERS, CITY OF PATERSON and BOARD OF FINANCE of said City,

Defendants in Error.

Case No. 1.

(*Re Order,*
April 20, 1915.)

ERIE RAILROAD COMPANY,

Plaintiff in Error,

vs.

BOARD OF PUBLIC UTILITY COMMISSIONERS, CITY OF PATERSON and BOARD OF FINANCE of said City,

Defendants in Error.

Case No. 2.

(*Re Order,*
July 9, 1915.)

IN ERROR TO THE COURT OF ERRORS AND APPEALS OF THE
STATE OF NEW JERSEY.

Brief in Behalf of Plaintiff in Error.

GILBERT COLLINS,
GEORGE S. HOBART,
GEORGE F. BROWNELL,
CHARLES E. HUGHES,
Counsel for Plaintiff in Error.

INDEX.

	PAGE
(1) STATEMENT OF THE CASE.	1
(2) SPECIFICATION OF ERRORS.	5
(3) BRIEF OF THE ARGUMENT.	11
Preliminary Statement.	11

PAGE

CHAPTER ONE.

Objections to the Order.

I.

THE ORDER IMPOSES A BURDEN UPON THE INTERSTATE TRAFFIC OF THE PLAINTIFF IN ERROR AND INTERFERES WITH AND IMPAIRS ITS ABILITY TO PERFORM ITS DUTY AS AN INTERSTATE CARRIER OF FREIGHT AND PASSENGERS.....

28

II.

THE ORDER WAS UNREASONABLE AND ARBITRARY AND THEREFORE VIOLATES THE DUE PROCESS CLAUSE BECAUSE THE EVIDENCE SHOWS WITHOUT DISPUTE THAT THE PLAINTIFF-IN-ERROR DID NOT HAVE SUFFICIENT FUNDS OR ANY MEANS OF PROCURING SAME FOR THE PURPOSE OF MEETING THE COST OF COMPLYING WITH THE ORDER.....

47

III.

THE ORDER WAS UNREASONABLE AND ARBITRARY AND THEREFORE VIOLATES THE DUE PROCESS CLAUSE BECAUSE THE PLAINTIFF-IN-ERROR WAS NOT GIVEN THE ALTERNATIVE OF REDUCING

OR ELIMINATING THE ALLEGED DANGER TO PUBLIC SAFETY AND THE ALLEGED IMPAIRMENT TO PUBLIC TRAVEL BY DECREASING THE NUMBER OF TRAIN MOVEMENTS OR BY ABANDONING THE RAILROAD	91
---	----

IV.

IN SO FAR AS THE ORDER REQUIRES THE PLAINTIFF IN ERROR TO MAKE CERTAIN CHANGES IN THE PROPERTIES OF THE PUBLIC SERVICE RAILWAY COMPANY, AND IN SO FAR AS IT LIMITS THE PROPORTION OF THE EXPENSE TO BE PAID BY THE STREET RAILWAY COMPANY TO CERTAIN OF THE CROSSINGS TO BE ELIMINATED, THE ORDER VIOLATES THE DUE PROCESS CLAUSE, FOR THE REASON THAT IT TAKES THE PROPERTY OF THE PLAINTIFF IN ERROR FOR THE USE OF SAID STREET RAILWAY COMPANY 111

V.

IN SO FAR AS THE SAID ORDER AFFECTS THE SIDE TRACKS INDICATED ON THE PLAN ATTACHED THERETO, IT IMPAIRS THE OBLIGATION OF THE CONTRACTS BETWEEN THE PLAINTIFF IN ERROR AND THE RESPECTIVE OWNERS OR LESSEES OF SAID SIDE TRACKS; IF THE ORDER IS CONSTRUED TO REQUIRE THE PLAINTIFF IN ERROR TO RELOCATE OR RECONSTRUCT SAID SIDE TRACKS (EITHER ON OR OFF ITS RIGHT OF WAY), AT ITS OWN EXPENSE, THEN IT FURTHER OPERATES TO DEPRIVE THE PLAINTIFF IN ERROR OF ITS PROPERTY, WITHOUT DUE PROCESS OF LAW, WHILE ON THE OTHER HAND, IF NOT SO CONSTRUED, IT DEPRIVES THE OWNERS OR LESSEES OF SAID SIDE TRACKS OF THEIR PROPERTY WITHOUT DUE PROCESS OF LAW..... 119

CHAPTER TWO.

Objections to the Statute.

VI.

THE STATUTE, AS CONSTRUED BY THE STATE COURTS, VIOLATES THE FOURTEENTH AMENDMENT: (A) BECAUSE IT TAKES THE PROPERTY OF THE PLAINTIFF IN ERROR AS THE LESSEE OF THE PATERSON & HUDSON RIVER RAILROAD CO., AND OF THE PATERSON & RAMAPO RAILROAD CO. FOR THE PRIVATE USE AND BENEFIT OF SAID TWO COMPANIES; (B) BECAUSE THE COST OF COMPLYING WITH THE ORDER WILL GREATLY EXCEED THE VALUE OF THE INTEREST OF THE PLAINTIFF IN ERROR IN THE PROPERTY OF SAID TWO COMPANIES, WITHOUT ANY COMPENSATING ADVANTAGE TO THE PLAINTIFF IN ERROR, AND WILL MAKE ITS INVESTMENT IN SAID COMPANIES INCAPABLE OF EARNING A FAIR AND REASONABLE RETURN UPON THE AMOUNT OF ITS INVESTMENT THEREIN; (C) BECAUSE IT DEPRIVES THE PLAINTIFF IN ERROR OF THE EQUAL PROTECTION OF THE LAWS. 140

VII.

THE STATUTE, AS CONSTRUED BY THE STATE COURTS, VIOLATES THE CONTRACT CLAUSE OF THE CONSTITUTION, IN THAT IT IMPAIRS THE OBLIGATION OF THE CONTRACTS BETWEEN THE PLAINTIFF IN ERROR AND THE PATERSON & HUDSON RIVER R. R. CO. AND THE PATERSON & RAMAPO R. R. CO..... 167

VIII.

THE STATUTE, AS CONSTRUED BY THE STATE COURTS, VIOLATES THE CONTRACT CLAUSE OF THE CONSTITUTION, IN THAT IT IMPAIRS THE OBLIGATION OF THE CONTRACTS BETWEEN THE STATE OF NEW JERSEY AND THE PATERSON & HUDSON RIVER R. R. CO. AND THE PATERSON & RAMAPO R. R. CO. TO WHOSE

RIGHTS THE PLAINTIFF IN ERROR HAS SUCCEEDED, BY IMPOSING A GREATER DUTY, WITH RESPECT TO THE CONSTRUCTION AND MAINTENANCE OF GRADE CROSSINGS, THAN WAS IMPOSED UPON SAID TWO COMPANIES.....	169
--	-----

IX.

THE STATUTE VIOLATES THE CONTRACT CLAUSE AND THE DUE PROCESS CLAUSE IN THAT IT IMPAIRS THE OBLIGATION OF THE CONTRACTS BETWEEN THE PLAINTIFF IN ERROR AND THE PUBLIC SERVICE RAILWAY COMPANY, BY ALTERING THEIR RESPECTIVE RIGHTS AND DUTIES AS FIXED BY SAID CONTRACTS, AND IN THAT IT FIXES A MAXIMUM PROPORTION TO BE PAID BY THE SAID PUBLIC SERVICE RAILWAY COMPANY, WITHOUT REGARD TO THE TERMS OF THE SAID CONTRACT, AND WITHOUT REGARD TO THE PROPORTION OF THE DANGER OR IMPEDIMENT CREATED BY THE PUBLIC SERVICE RAILWAY COMPANY.....	213
--	-----

X.

THE STATUTE VIOLATES THE FOURTEENTH AMENDMENT IN THAT IT IS AN UNREASONABLE EXERCISE OF THE POLICE POWER.	224
--	-----

CHAPTER THREE.

Conclusion.

XI.

IF, FOR ANY OF THE FOREGOING REASONS, ANY PART OF THE STATUTE UPON WHICH THE ORDER UNDER REVIEW IS BASED IS INVALID, THEN THE ENTIRE STATUTE MUST FALL; IF, HOWEVER, THE STATUTE IS VALID, BUT, NEVERTHELESS ANY PART OF THE ORDER UNDER REVIEW IS INVALID, THEN THE ENTIRE ORDER MUST BE SET ASIDE.....	289
---	-----

XII.

THE JUDGMENT OF THE SUPREME COURT OF THE STATE OF NEW JERSEY AFFIRMING THE ORDER OF THE BOARD OF PUBLIC UTILITY COMMISSIONERS, UNDER REVIEW, AND THE JUDGMENT OF THE COURT OF ERRORS AND APPEALS OF THE STATE OF NEW JERSEY AFFIRMING THE JUDGMENT OF THE SUPREME COURT OF THE STATE OF NEW JERSEY SHOULD BE REVERSED, WITH DIRECTIONS TO THE STATE COURTS TO SET ASIDE THE ENTIRE ORDER.....	298
---	-----

APPENDIX A.

REPORT OF BOARD OF RAILROAD COMMISSIONERS AND OF THE HIGHWAY COMMISSION OF MASSACHUSETTS TO THE LEGISLATURE OF THAT STATE.....	299
--	-----

APPENDIX B.

SUMMARY OF THE STATUTES IN STATES OTHER THAN NEW JERSEY ON SUBJECT OF ELIMINATION OF RAILROAD GRADE CROSSINGS	305
---	-----

Supreme Court of the United States

OCTOBER TERM, 1920.

ERIE RAILROAD COMPANY,
Plaintiff in Error,

vs.

BOARD OF PUBLIC UTILITY COMMISSION-
ERS, CITY OF PATERSON and BOARD
OF FINANCE of said City,
Defendants in Error.

Case No. 1.

(*Re Order,*
April 20, 1915.)

ERIE RAILROAD COMPANY,
Plaintiff in Error,

vs.

BOARD OF PUBLIC UTILITY COMMISSION-
ERS, CITY OF PATERSON and BOARD
OF FINANCE of said City,
Defendants in Error.

Case No. 2.

(*Re Order,*
July 9, 1915.)

IN ERROR TO THE COURT OF ERRORS AND APPEALS OF THE
STATE OF NEW JERSEY.

BRIEF IN BEHALF OF PLAINTIFF IN ERROR.

(1.)

STATEMENT OF THE CASE.

There are two writs of error of the above title, and for convenience they have been respectively designated in the record as case No. 1 and case No. 2; the first writ was sued out to review a judgment of the Court of Errors and Appeals of the state of New Jersey affirming a judg-

ment of the Supreme Court of said state which had sustained an order of the Board of Public Utility Commissioners of said state, dated April 20, 1915, directing the plaintiff in error to elevate certain main line tracks and side tracks used by it in the city of Paterson, New Jersey, for the purpose of eliminating fifteen highway crossings at grade in said city. The Supreme Court of the state of New Jersey allowed a writ of certiorari on June 16, 1915, for the purpose of reviewing said order, and, after hearing, sustained the same. For the opinion see 89 N. J. L. 57, 98 Atl. 13. An appeal was then taken by the railroad company to the Court of Errors and Appeals of the state of New Jersey. The latter court affirmed the judgment of the said Supreme Court, without further opinion, the vote in favor of said affirmance being 7 to 5 (see 90 N. J. L. 672, 103 Atl. 1052).

The second writ of error, designated as case No. 2, was sued out to review a judgment of the Court of Errors and Appeals of the state of New Jersey affirming a judgment of the Supreme Court of said state, which sustained an order of said Board of Public Utility Commissioners, dated July 9, 1915, whereby said board had denied the petition of the plaintiff in error for a rehearing of the first mentioned order of April 20, 1915. The denial of said petition for rehearing was likewise brought before the Supreme Court of the state of New Jersey for review, the writ of certiorari being allowed July 22, 1915. This writ was argued with the first-mentioned writ, reviewing the order of April 20, 1915; the Supreme Court of the state affirmed said order of July 9, 1915, and its judgment was thereafter sustained by the Court of Errors and Appeals by the same vote which had sustained the order and judgment in case No. 1. (See 90 N. J. L. 673, 103 Atl. 1052.)

The said order of the Board of Public Utility Commissioners of April 20, 1915, affected the rights and property of many other companies and individuals in the city of Paterson, and several of these brought separate proceedings by writ of certiorari to review the same in so far as it affected their several rights. The parties who obtained such separate writs were: Public Service Railway Company, Passaic Water Company, Western Union Telegraph Company, D. Fullerton & Company, Meyer & De Vogel, Fuller's Express Company and Morris & Company. The said order of the board was affirmed as to each of these several prosecutors of said writs of certiorari; and thereafter each of them took an appeal to the Court of Errors and Appeals of the state of New Jersey (except Fuller's Express Company, which had gone into bankruptcy subsequently to the decision of the New Jersey Supreme Court and prior to the hearing of the appeal in the Court of Errors and Appeals). The judgment of the New Jersey Supreme Court was affirmed in each case by the Court of Errors and Appeals, on the opinion below, the vote in said court being 7 to 5, the same as in the two cases wherein the Erie R. R. was the appellant.

We subjoin the following table showing the reports of the several cases in the New Jersey courts:

	N. J. Supreme Court	Court of Errors and Appeals
Erie R. R. (No. 1)	89 N.J.L. 57, 98 Atl.	12 90 N.J.L. 672, 103 Atl. 1052
Erie R. R. (No. 2)	89 N.J.L. 57, 98 Atl.	12 90 N.J.L. 672, 103 Atl. 1052
Public Service Ry. Co.	89 N.J.L. 34, 98 Atl.	28 90 N.J.L. 712, 103 Atl. 1054
Passaic Water Co.	90 N.J.L. 714, 103 Atl. 1053	90 N.J.L. 715, 103 Atl. 1053
West'n Union Tel. Co.	90 N.J.L. 729, 103 Atl. 1055	90 N.J.L. 729, 103 Atl. 1055
D. Fullerton & Co.	90 N.J.L. 677, 103 Atl. 1051	90 N.J.L. 678, 103 Atl. 1052
Meyer & DeVogel		
Fuller's Express Co.	90 N.J.L. 694, 103 Atl. 1053	90 N.J.L. 695, 103 Atl. 1053
Morris & Co.		

There are also two other railroad companies whose rights are affected by the orders under review. These are known as the Paterson and Hudson River Railroad

Company and the Paterson and Ramapo Railroad Company. They were organized many years ago under special charters granted by the state of New Jersey and are still the owners in fee of the larger part of the right-of-way in the city of Paterson where the tracks are ordered to be elevated. These companies were given leave to intervene in the certiorari proceedings instituted by the Erie Railroad Company and, we understand, will present a brief in support of their claim that the expense of elevation is not chargeable, in whole or in part, to them or either of them.

After the affirmance by the New Jersey Court of Errors and Appeals of the several judgments relating to parties other than the Erie Railroad Company, each of them (except Fuller's Express Co.) took a separate writ of error to this Court and each of them will present separate briefs; the present brief is limited to the writs of error sued out by the Erie Railroad Company from the said judgments sustaining the said orders of April 20, 1915, and July 9, 1915.

The records in all of the cases have for convenience been printed together. They consist of five volumes with a separate volume of the various maps that were offered as exhibits.

The fundamental question involved in whether the Court of Errors and Appeals of the state of New Jersey, in affirming the judgment of the Supreme Court of said state sustaining said orders or either of them has deprived the plaintiff in error of any of the rights secured to it by the Federal Constitution or by the Fourteenth Amendment thereto.

(2.)

SPECIFICATION OF ERRORS.

(In the following specifications we have, for the sake of convenience and brevity, combined the assignments of error in Case No. 1—re original order of April 20, 1915—and the assignments of error in Case No. 2—re order of July 9, 1915—as the latter grows out of and is incidental to the former. References are to assignments in Case No. 1, except where otherwise noted.)

The Court of Errors and Appeals of the state of New Jersey erred in holding that the orders, and each of them, made by the Board of Public Utility Commissioners of said state, dated, respectively, April 20th, 1915, and July 9th, 1915, and the statute of said state whereon the same are based did not violate the rights of the plaintiff-in-error, secured to it by the Constitution of the United States, and the several amendments thereto, and in not holding that the said orders, or one or the other of them, or that the said statute, did violate such rights or some one or more of them, in the following particulars:

THE ORDER.**I.**

Because said order imposes a burden upon the interstate traffic of the plaintiff-in-error, and interferes with, and impairs its ability to perform its duty as an interstate carrier of freight and commerce, contrary to the provisions of Article I, Section VIII, paragraph 3, of the Federal Constitution.

Assignments Nos.

- 8 (p. 2363);
- 18 (g) (p. 2369);
- 33 (p. 2380);
- 34 (pp. 2381-5);
- 8 (Case No. 2, p. 2405).

II.

Because the evidence shows, without dispute, that the plaintiff-in-error did not have sufficient funds, or any means of procuring same for the purpose of meeting the cost of complying with said order; and, under these circumstances, the action of the Board of Public Utility Commissioners, in ordering the elimination of the grade crossings in question, was unreasonable and arbitrary, and thereby the plaintiff-in-error was deprived of its property without due process of law, contrary to the provisions of the Fourteenth Amendment to the Federal Constitution.

Assignments Nos.

- 4 (p. 2362);
- 16 (p. 2367);
- 32 (p. 2380);
- 4 and 5 (Case No. 2, p. 2405).

III.

Because the evidence shows that said order is unreasonable and arbitrary in that the plaintiff-in-error is not given the alternative of decreasing or eliminating the alleged danger to public safety and the alleged impairment to public travel by decreasing the number of train movements or abandoning the railroad, and therefore the plaintiff-in-error is deprived of its property without due

process of law, contrary to the provisions of the Fourteenth Amendment to the Federal Constitution.

Assignments Nos.

- 4 (p. 2362);
- 12 (p. 2365);
- 13 (p. 2366);
- 14 (p. 2366);
- 17 (p. 2368);
- 14 (Case No. 2, p. 2407).

IV.

Because said order requires the plaintiff-in-error to make certain changes in the properties of the Public Service Railway Company, and limits the proportion of the expense to be paid by said street railway company to a certain number of the crossings ordered to be eliminated, without reference to the total cost of the elimination of all the crossings, and thereby takes the property of the plaintiff-in-error for the use of said street railway company, and thereby violates the due process clause of the Fourteenth Amendment.

Assignments Nos.

- 4 (p. 2362);
- 21 (p. 2371);
- 31 (p. 2379).

V.

Because, in so far as the said order affects the side tracks indicated on the plan attached thereto, it impairs the obligation of the contracts between the plaintiff-in-error and the respective owners or lessees of said side tracks; if the order is construed to require the plaintiff-

in-error to relocate or reconstruct said side tracks (either on or off its right of way), at its own expense, then it further operates to deprive the plaintiff-in-error of its property, without due process of law, while, on the other hand, if not so construed, it deprives the owners or lessees of said side tracks of their property without due process of law.

Assignments Nos.

- 4 (p. 2363);
- 18 (e), (d), (e), (f), (pp. 2368-9);
- 20 (pp. 2370-1);
- 30 (d), (p. 2378);
- 34 (pp. 2381-5);
- 35 (p. 2385);
- 36 (p. 2387).

THE STATUTE.

VL

Because said statute, as construed by the state courts, takes the property of the plaintiff-in-error, as lessee of the Paterson & Hudson River Railroad Company, and the Paterson & Ramapo Railroad Company, for the private use and benefit of said two companies, and because the cost of complying with said order will make the investment of the plaintiff-in-error in said companies incapable of earning a fair and reasonable return, and thereby takes the property of the plaintiff-in-error without due process of law, and deprives the plaintiff-in-error of the equal protection of the laws, contrary to the provisions of the Fourteenth Amendment to the Federal Constitution.

Assignments Nos.

- 4 (p. 2362);
- 5 (p. 2362);
- 12 (p. 2365);
- 13 (p. 2366);
- 14 (p. 2366);
- 15 (p. 2367);
- 4, 5 and 6 (Case No. 2, p. 2405).

VII.

Because said statute impairs the obligation of the contracts between the plaintiff-in-error and the Paterson & Hudson River Railroad Company, and the Paterson & Ramapo Railroad Company, contrary to the provisions of Article I, Section X, paragraph 1 of the Federal Constitution.

Assignments Nos.

- 30 (e), (p. 2378);
- 6 (Case No. 2, p. 2405).

VIII.

Because said statute impairs the obligation of the contracts between the state of New Jersey, and the plaintiff-in-error, as the successor in interest of the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company, by imposing a greater duty, with respect to the construction and maintenance of grade crossings, then was imposed upon said two companies, contrary to the provisions of Article I, Section X, paragraph 1 of the Federal Constitution.

Assignments Nos.

- 9 (p. 2364);
- 26 (p. 2377);
- 27 (p. 2377);
- 28 (p. 2377);
- 30 (b), (p. 2378);
- 6 (Case No. 2, p. 2405).

IX.

Because said statute impairs the obligation of the contracts between the plaintiff-in-error and the Public Service Railway Company, by altering their respective rights and duties, as fixed by said contracts, contrary to the provisions of Article I, Section X, paragraph 1 of the Federal Constitution.

Assignments Nos.

- 30 (c), (p. 2378);
- 31 (p. 2379).

X.

Because said statute is an unreasonable exercise of the police power and thereby deprives the plaintiff-in-error of its property without due process of law, contrary to the provisions of the Fourteenth Amendment to the Federal Constitution.

Assignments Nos.

- 4 (p. 2362);
- 10 (p. 2364);
- 11 (p. 2365);
- 22 (pp. 2373-4);
- 23 (pp. 2375-6);
- 25 (p. 2376);
- 29 (p. 2378).

(3.)

BRIEF OF THE ARGUMENT.*Preliminary Statement.*

Before taking up in detail the various legal questions it will be helpful to state the terms of the order of the Board of Public Utility Commissioners of which the plaintiff in error complains, and the terms of the statute upon which the order is based, as well as an outline of the facts giving rise to the proceedings under review. The statute is known as Chapter 57 of the New Jersey Laws of 1913 (page 91). It is in the form of a supplement to the act providing for the creation of the Board of Public Utility Commissioners of the state of New Jersey; and, with its title, reads as follows:

A supplement to an act entitled "An act concerning public utilities; to create a Board of Public Utility Commissioners and to prescribe its duties and powers," approved April twenty-first, one thousand nine hundred and eleven.

BE IT ENACTED *by the Senate and General Assembly of the State of New Jersey:*

1. Whenever a public highway and a railroad cross each other at the same level and it shall appear to the board that such crossing is dangerous to public safety, or that the public travel on such highway is impeded thereby, the Board of Public Utility Commissioners may order the company operating such railroad, within such time as said board may fix, to alter such crossing according to plans to be approved by said board, by substituting therefor a crossing not at the grade of such public highway either by carrying such public highway under or over such railroad, or by reconstructing such railroad under or over such public highway,

or by vacating, relocating or changing the lines, width, direction or location of such highway and the opening of a new highway in the place of the one ordered vacated.

2. The entire expense of such alterations, changes, relocation or opening, including damages to adjacent property, shall be paid by such railroad, unless a street railway uses such crossing, in which event the board may order not exceeding ten per centum of such expense directly chargeable to the crossing used by the street railway company, to be paid by the company operating such street railway and the balance to be paid by the company operating such railroad.

3. The expense of removing, relaying or relocating any municipal water or sewer pipes or other municipal pipes, conduits or subways, shall be borne by the municipality owning the same and also the expense of paving, curbing and flagging the highway constructed as the result of the change of grade.

4. Where the order of said board shall require changes in, or the removal of the property or constructions of any telegraph, telephone, gas, electric lighting, power, water, oil, pipe lines or other company or corporation, co-partnership or individual, they shall, at their own expense, move or change the grade or location of their property or constructions in conformity with the order of said board. They shall be deemed parties in interest and shall be given notice of hearing and an opportunity to be heard.

5. The board or body having charge of the finances of any municipality wherein any such crossing exists, may present to the Board of Public Utility Commissioners a petition in writing setting forth the facts upon which relief under this act is sought, or upon the petition of any railroad company whose tracks cross or are crossed at grade, or said Board of Public Utility Commissioners

may, of its own motion, proceed with respect to any such crossing; whereupon said Board of Public Utility Commissioners shall fix a time and place for a hearing before it and shall give such notice thereof as it shall deem reasonable to the municipality and corporations, co-partnership or individuals interested therein and after such hearing, shall determine or order what, if any, alterations to or changes in or connected with such crossing and public highway shall be made.

6. All the powers, supervision, regulation of, jurisdiction and control over public utilities granted by the act to which this is a supplement, are hereby vested in the Board of Public Utility Commissioners and courts of this state as may be necessary to carry the provisions of this act into effect.

7. This act shall take effect immediately.

Approved, March 12, 1913.

At the time of the enactment of this statute, the plaintiff-in-error, a railroad corporation of the state of New York, having its eastern terminal at Jersey City in the state of New Jersey, and its western terminals at Buffalo and Chicago, ran some of its freight and passenger trains over the railroad tracks of two railroad companies, organized many years ago by special charters from the state of New Jersey, and known as the Paterson and Hudson River Railroad Company, and the Paterson & Ramapo Railroad Company. This operation was under the terms of certain leases, as hereinafter set forth in detail. Part of the railroad of each lessor company is located in the city of Paterson, the total length of the main line through that city being nearly four miles. All the main line railroad tracks which are ordered to be elevated are on the property of one or the other of these two companies.

The tracks of the Paterson & Hudson River R. R. Co. enter the city of Paterson at the southerly boundary

thereof; the first street crossed by them is known as Crooks avenue, which is the boundary line between the city of Paterson and the adjoining municipality, known as the township of Acquackanonk. This street crosses the tracks at grade; but was not included in the application for elimination. After passing Crooks avenue the railroad continues in a general northerly direction for a distance of about 4500 feet to Madison avenue, which is the first street involved in this proceeding. Between Crooks avenue and Madison avenue a street known as Gould avenue is open across the tracks. This is located about 2500 feet north of Crooks avenue. It is not included in the present proceeding. There are several other streets between Crooks avenue and Madison avenue, on the easterly side of the tracks, all of which streets are open up to the railroad right of way but none of them crosses the tracks (see Key Map of city, Ex. P. 1, at page 1 of Vol. VI. Map of Lot Numbers, Ex. P. 40, at page 16 of Vol. VI; and plan attached to order under review, at page 57 of Vol. VI).

After crossing Madison avenue the tracks continue in a general northerly direction for a distance of over half a mile before reaching the next crossing—the one known as Straight street—which is the second street involved in this proceeding. Between Madison avenue and Straight street there are six streets, to wit, Elizabeth, Hemlock, Mallard, Lynn, Ivy and Leroy, on the westerly side of the tracks; and four streets, to wit, East Nineteenth, Lewis, Martin and Gray, on the easterly side of the tracks, all of which extend either to the right of way or to a street running parallel with the right of way, but none of which crosses the railroad tracks (see Key Map of city, Ex. P. 1, and Map of Lot Numbers, Ex. P. 40).

The next crossing to the north of Straight street is Clay street, about 100 feet distant; the next street, one block or about 400 feet to the north, is Taylor street, where no crossing exists at the present time (although by the order under review the plaintiff in error was directed to construct at that point an undergrade crossing); next is Cedar street, which is about 500 feet north of Taylor street. There is a grade crossing at Cedar street at the present time but under the board's order this crossing is to be closed.

Next is Oak street, which is shut off from access to the railroad tracks by a large factory, and is not involved in this proceeding.

The next street is Essex, which is distant about 800 feet from Cedar street. At this point an *undergrade* crossing already exists. No reference was made to this street in the city's petition, although the board's order directs that the present undergrade crossing be widened and altered in certain respects.

The next street to the north which approaches or crosses the tracks is Market street, which is nearly 1000 feet north of Essex street. A street known as Park avenue begins on the easterly side of the tracks near the point where Market street crosses the tracks, and the city's maps showing this crossing are accordingly designated as "Market street and Park avenue," although the crossing in question is commonly called the Market street crossing.

Proceeding to the north from the Market street crossing there are five grade crossings, to wit, Ellison, Van Houten, Broadway, Fair and Hamilton avenues—each crossing being separated from the other by a city block. All of these streets are included in the city's petition.

Proceeding to the north after passing Hamilton avenue the next street included in the petition is the one called Lafayette street, which is over 2000 feet to the north of Hamilton avenue.

Between Hamilton avenue and Lafayette street are four streets, to wit, Godwin, Tyler, Lawrence and Montgomery, which extend to, but do not cross, the railroad tracks. None of them is referred to in the city's petition. There are also two existing *undergrade* crossings, to wit, Governor street, a distance of about 750 feet to the north of Hamilton avenue, and Fulton street, a distance of about 500 feet to the north of Governor street. Neither of these last two streets was included in the city's petition, although by the board's order they are required to be widened and altered in certain respects.

Proceeding to the north beyond Lafayette street there are four crossings, to wit, Franklin, Keen, Warren and River (the last named including also Putnam), each crossing being a distance of one block, or about 250 feet, from the crossing next south thereof. All of these streets are included in the present proceeding. But the board's order requires the existing crossing at Franklin street to be closed and a *new undergrade* crossing to be constructed at Montgomery street—which latter street does not at the present time cross the tracks.

The last crossing included in the city's petition is the one known as the River and Putnam street crossing. Proceeding to the north beyond this crossing, for a distance of about 2500 feet, we come to the next and last grade crossing within the city limits, that known as Fifth avenue. After passing Fifth avenue the railroad tracks continue in a northerly direction for a distance of about 500 feet to the Passaic river, which marks the northern boundary of the city at that point. The tracks

cross the river on a bridge and thence proceed to the north to Suffern, N. Y., a distance of about sixteen miles above Paterson.

That part of the railroad which extends from Jersey City to a point at or near the Market street station in Paterson was constructed and is owned by the Paterson & Hudson River R. R. Co., and that part which extends north from the Market street station to Suffern, N. Y., was constructed and is owned by the Paterson & Ramapo R. R. Co. Beyond Suffern, and extending thence to Buffalo, Chicago and other points, the tracks were constructed and are owned either by the plaintiff in error, or by other companies which are either operated or controlled by it.

In accordance with Section 5 of the above statute, the Board of Finance of the city of Paterson filed a petition with the Board of Public Utility Commissioners, wherein the city prayed for the elimination of 15 crossings, which were designated in the petition as follows:

- A. Madison avenue.
 - B. Clay and Straight streets (two crossings).
 - C. Cedar Street.
 - D. Market street and Park avenue (one crossing).
 - E. Ellison street.
 - F. Van Houten street.
 - G. Broadway.
 - H. Fair street.
 - I. Hamilton avenue.
 - J. Lafayette street.
 - K. Franklin street.
 - L. Keen street.
 - M. Warren street.
 - N. River and Putnam streets (one crossing).
- (Vol. IV, p. 1637.)

The city claimed in its petition that it was not practicable to change the grade of said highways or any of them so as to carry the same under or over the railroad; asserting "the said highways are all in the center of a thickly populated city and all contain large numbers of buildings which would be ruined or destroyed by any such change of grade"; and prayed that the crossings be altered by depressing the tracks of the railroad so that the same would pass under the highways, or in case such a plan should be impracticable that the railroad should be elevated to pass over said highways. (Pars. 18 and 19; Vol. IV., p. 1660).

After the filing of this petition, several hearings were heard before the Board of Public Utility Commissioners, with the result that on April 20th, 1915, the board directed the plaintiff in error to eliminate the crossings at grade according to a certain plan therefor annexed to the board's order and made a part thereof. This order reads as follows:

STATE OF NEW JERSEY.
BOARD OF PUBLIC UTILITY
COMMISSIONERS.

IN THE MATTER OF THE APPLICATION
OF THE CITY OF PATERSON FOR
ALTERATION OF GRADE CROSSINGS
ON THE LINE OF THE ERIE RAIL-
ROAD.

Order.

The Board of Finance of the city of Paterson, a municipality of this state, having presented to, and filed with, the Board of Public Utility Commissioners, a petition in writing, and an amendment to

said petition, likewise in writing, praying that, by virtue of the powers conferred by an Act of the Legislature of this state, entitled, "A Supplement to an Act concerning Public Utilities; to create a Board of Public Utility Commissioners, and to prescribe its duties and powers, approved April 21, 1911," which supplement was approved March 12, 1913, and which constitutes Chapter 57 of the Laws of 1913, the Board order the alteration of the crossing of Madison avenue, Clay and Straight streets (two crossings), Cedar street, Market street and Park avenue (one crossing), Ellison street, Van Houten street, Broadway, Fair street, Hamilton avenue, Lafayette street, Franklin street, Keen street, Warren street, River and Putnam streets (one crossing), each of which streets and highways is a public highway in said city of Paterson, where the same cross at the same level the railroad of the Erie Railroad Company, in said city of Paterson "according to plans to be approved by said Board by substituting for each of such crossings a crossing not at the grade of such public highways either by carrying such public highway under or over such railroad or by reconstructing such railroad under or over such public highway or by vacating, relocating or changing the lines, width, direction or location of such highway, and the opening of a new highway in place of the one or ones ordered vacated," and which petition set forth the facts upon which relief under said statute was sought, and the Board having fixed a time and place for a hearing before it upon said petition, and having given notice thereof to the said municipality, the Erie Railroad Company, the Paterson and Ramapo Railroad Company, the President and Board of Directors of the Paterson and Hudson River Railroad Company, and all corporations, co-partnerships and individuals interested, all in accordance with the provisions of said act, and the said Erie Railroad Company having filed its answer to said petition, which answer was later

amended, and the Paterson and Ramapo Railroad Company, the President and Board of Directors of the Paterson and Hudson River Railroad Company, Passaic Water Company, Western Union Telegraph Company, National Silk Dyeing Company, Fullers' Express Company, the Herman Company, John Agnew Company, James Wilson & Sons (Inc.), P. S. Van Kirk Company, Henry M. Post, Paterson Brewing and Malting Company, Public Service Electric Company, Public Service Gas Company, Public Service Railway Company, D. Fullerton & Company, Meyer & DeVogel, Leslie Elliott & Co., Samuel Smith & Sons Company, Morris & Company, McNab & Harlin Manufacturing Company, New York Telephone Company, and Paterson, Passaic & Suburban Telephone Company having likewise filed answers, and all of the parties in interest who appeared having been duly heard, the Board of Public Utility Commissioners filed a report of its findings and determinations on January 11th, 1915, which report is made part of this order by reference thereto herein, and it

Now appearing to said Board that the Board of Finance of the city of Paterson is the board or body having charge of the finances of said municipality, and that said Madison avenue (Clay street, Straight street), Cedar street, Market Street, Park avenue, Ellison street, Van Houten street, Broadway, Fair street, Hamilton avenue, Lafayette street, Franklin street, Keen street, Warren street, River street and Putnam street is each a public highway; and that the said public highways, and each of them, and the railroad of the Erie Railroad Company in said city cross each other at the same level, and that such crossings are, and each of them is, dangerous to public safety and that the public travel on such highways, and each of them is impeded thereby and that the said Erie Railroad Company is operating said railroad, and that said crossings, and each of them, should be altered according to a plan and profile approved by the

Board, and such a plan and profile having been prepared.

Now, therefore, it is on this twentieth day of April, nineteen hundred and fifteen, ORDERED, and the said Board of Public Utility Commissioners by virtue of the power and authority vested in it by the aforesaid act, does hereby ORDER the Erie Railroad Company to alter such crossings, and each of them, according to the plan therefor annexed to and made part hereof, entitled, "State of New Jersey Board of Public Utility Commissioners Division of Bridges and Grade Crossings Plan for Elimination of grade crossings on main line of Erie Railroad from Madison avenue to River street, Paterson, N. J. Based on surveys made by the city of Paterson, H. J. Harder, Eng'r. Scale, 1 in.=50 ft. January, 1915, approved Chas. A. Mead, Chief Inspector Div. of Bridges and Grade Crossings," and profile of same also annexed to and made part hereof, entitled, "State of New Jersey Board of Public Utility Commissioners Division of Bridges and Grade Crossings. Profile for Elimination of Grade Crossings on Main Line of Erie Railroad from Madison avenue to River street, Paterson, N. J. Based on surveys made by the city of Paterson, H. J. Harder, Eng'r. Scales: Hor. 1"=100' Vert. 1"=4'. January, 1915, drawn by J. L. Vogel, approved Chas. A. Mead, Chief Inspector Div. of Bridges & Grade Crossings," which said plan and profile are hereby approved; by substituting therefor crossings not at the grade of the public highways known as Madison avenue, Straight street, Clay street, Market street and Park avenue, Ellison street, Van Houten street, Broadway, Fair street, Hamilton avenue, Lafayette street, Keen street, Warren street, Putnam and River streets; by changing the lines, width and direction thereof and carrying so much thereof as so changed under the said railroad, except in the case of Madison avenue, which is carried over the railroad, according to and as shown on said plan and profile for

said purpose, and by vacating the remaining parts of said highways within the lines of the right of way of said railroad company, and further by vacating the part of Madison avenue lying west of the railroad which is included between the right of way line of the railroad and the line of the relocated Madison avenue; by substituting for the existing crossings at Cedar street a crossing under the railroad at Taylor street and for the existing crossing at Franklin street a crossing under the railroad at Montgomery street and also by widening and altering the existing highways known as Essex street, Governor street and Fulton street, adjusting the structures spanning them to the proposed grade or grades (which said new highways shall be located, and of the width, length and direction and carried over or under the said railroad where so indicated); by reconstructing said railroad and highways and by performing all other work required according to and as shown on the said plan and profile.

Any telegraph, telephone, gas, electric, lighting, water, oil, pipe line or other company, or corporation, co-partnership or individual whose property or construction it may be necessary to change or remove to carry said plant and this order into effect, shall change or remove the same, according to said plan.

AND IT IS FURTHER ORDERED, that the said Erie Railroad Company and the city of Paterson, and Public Service Railway Company, Public Service Gas Company, Public Service Electric Company, Passaic Water Company, New York Telephone Company, Paterson, Passaic and Suburban Telephone Company and Western Union Telegraph Company, and all other parties to this proceeding, and each and every of them proceed with due diligence to the execution of this order, and comply with all of the requirements thereof and the duties imposed upon them thereby, and by the said act under which this order is made, and the laws of

this state, and that to that end, they and each of them exercise in good faith, all of the powers conferred upon them and each or any of them by the laws of this state.

AND IT IS FURTHER ORDERED, that the said Erie Railroad Company begin the actual work of construction required in the performance and execution of this order on or before the first day of August, nineteen hundred and sixteen, and continuously carry on the same thereafter and perform and fully comply with the directions and requirements of this order, and complete all of the work required to be done, within eight years from the date hereof, and that in the continuous prosecution of said work it takes up in the order named the division thereof in said profile marked and designated "A," "B," "C" and "D"; the work required in connection with Section "A" thereof to be begun on or before August 1st, 1916, and to be completed within four years and three months from the date hereof; the work required in connection with Section "B" to be begun within four years and three months from the date hereof and completed within five years and six months from the date hereof; the work required in connection with Section "C" to be begun within five years and six months from the date hereof and completed within seven years and three months from the date hereof; and the work in connection with Section "D" to be begun within seven years and three months and completed within eight years from the date hereof.

And it appearing to the Board that the street railway operated by Public Service Railway Company uses the said crossings at (1) Park avenue and Market street, (2) Broadway and (3) River street, the Board in accordance with the power and authority vested in it by said act further ORDERS the Public Service Railway Company to pay ten per centum of the expenses of the alterations, changes, relocating and opening, required by this

order, including damages to adjacent property, directly chargeable to the crossings, and each of them, so used by the said street railway operated by it.

And the said Erie Railroad Company and said Public Service Railway Company are ordered to keep specific and complete records of the expenses directly chargeable to the crossings, and each of them, so used by said street railway of said Public Service Railway Company and leave is hereby given to said companies or either of them, to make application to the Board for further order in the event that they cannot agree upon the amount of such expenses so directly chargeable to said crossings used by the street railway operated by said Public Service Railway, or any of them.

This order shall take effect May 20th, 1915.

Dated April 20th, 1915.

BOARD OF PUBLIC UTILITY
COMMISSIONERS,

By

(Signed) RALPH W. E. DONGES,
President.

(SEAL)

Attest:

(Signed) ALFRED N. BARBER,
Secretary.

(See Vo. IV, p. 1787.)

The estimated cost of the work as ordered is the sum of \$2,948,218.68. See report of board (Vol. IV., p. 1765). This does not include damages to adjacent property, which under said Chapter 57, Laws of 1913, must be paid by the plaintiff in error. The amount of such damages, due to changing the grades of streets, was estimated at \$168,500; and the amount due to the revision of buildings and sidings, outside the railroad right of way, at \$131,922. (pp. 1323-4.)

The plaintiff in error's share of this total cost of over \$3,000,000 is as follows:

Section A—Market street to Lafayette street.	\$1,442,719.30
Section B—Keen, Warren and River streets..	418,260.78
Section C—Straight street to Market street..	572,319.51
Section D—Madison avenue	104,278.02

\$2,537,577.61

(See Ex. R-103, Vol. II., p. 1324, and summary thereof at p. 1326; Ex. R-104, at p. 1327.)

But the foregoing figures do not represent the total amount to be paid by the railroad, as they do not include certain other items which must also be paid by the railroad, namely, the cost of street work, amounting to the sum of \$54,160.79. There must also be added the cost of reconstruction of sidings, leads, etc., amounting to the sum of \$131,922. See Exhibit R-102, at page 1324. But as the work is ordered to be done in sections, the actual cost of reconstruction of the sidings, etc., will be slightly in excess of that amount, namely, \$136,922. This figure is obtained by adding the items in Exhibit R-103, at page 1325, entitled "Industries off R. of Way." The total cost, therefore, to the plaintiff in error is as follows:

General Construction Work.....	\$2,537,577.61
Street Work Chargeable to Railroad.....	54,160.79
Reconstruction of Sidetracks.....	136,922.00

Total\$2,728,660.40

The above estimate includes a guess as to the amount of property damage under the item of street damages. (See Exhibit R-103, pp. 1324, 5.) But it is impossible to tell how much more the property damage may be. In view of the fact that under the order the street grades are

changed in some cases for a distance of nearly 500 feet outside the right of way, it is certain that the property damage will be much in excess of this preliminary estimate.

Moreover, in a work of this magnitude there are bound to be many unforeseen emergencies and difficulties; and, extending as it does over a period of several years, there will probably be a very considerable increase in the estimated cost of labor and material—indeed, such increase has already been observed since the promulgation of the order in April, 1915. In view of the general increase in the cost of labor and material since that time, it is probable that the total cost would be not less than \$5,000,000.

The private properties that may be affected by the proposed changes in the grades of the streets and the railroad tracks, covering an area of about 400 feet on each side of the railroad, are valued at nearly \$10,000,000, as shown by the testimony of the chief clerk of the tax receiver (Vol. I, p. 120; Exhibit P. 42, Vol. II, pp. 864-904). A compilation of these valuations taken from the eighty-five separate sheets giving the details thereof, and included in said Exhibit P. 42, shows the total of these valuations to be as follows (in round figures):

Land	\$3,800,000
Buildings	6,000,000
<hr/>	
Total	\$9,800,000

None of the numerous property owners whose names appear in this exhibit received any notice of the proceedings except in the case of a comparatively few persons or corporations who happened to be the owners of, or otherwise interested in, certain side tracks, and who, as such side track owners, were brought in as parties after the proceedings had been started.

Under said Chapter 57, as construed by the board in the order under review, the entire expense of the change of grade of the above mentioned fifteen crossings, including damages to adjacent property, must be paid by the plaintiff in error, except that at three crossings, to wit, (1) Park avenue and Market street, (2) Broadway, and (3) River street, the board ordered the Public Service Railway Company, in accordance with said Chapter 57, to pay ten per cent. of said expenses and damages "directly chargeable" to the said three crossings.

After the filing of the report of the board and before the making of the order under review, the plaintiff in error filed a petition for *further* hearing, wherein it requested the Board to take further testimony upon certain matters set forth in said petition (Vol. IV., p. 1772). On the same date upon which the order under review was made the board filed a report refusing to take any further testimony and denying the petition (Vol. IV., p. 1793).

After the order under review was made, the plaintiff-in-error, under date of June 15, 1915, filed a petition for re-hearing in which it submitted an alternative and much less expensive plan for the elimination of the alleged danger to public safety and the alleged impediment to public travel at the more important of the several highways included in the proceedings (Vol. IV, p. 1885).

Pending the board's decision on said petition for rehearing the plaintiff-in-error obtained the writ of certiorari in Case No. 1, with stay, as the time limit within which such writ might be allowed, as provided by Section 38 of the act concerning public utilities (Chapter 195, Laws of 1911), was about to expire. Thereafter, on July 9, 1915, the board denied the petition for re-hearing (Vol. IV., p. 1919). The proceedings thereunder are the subject of

the second writ of certiorari allowed on July 22, 1915, and known herein as Case No. 2.

The plaintiff in error will urge before this Court that the statute upon which said order was based is invalid, and that, even if the statute is not invalid, nevertheless, certain parts of the order violate its constitutional rights. We will first consider the question of whether the order is valid as against the constitutional objections urged by the plaintiff in error; and will then consider whether the statute itself is valid as against such objections or any of them.

CHAPTER ONE.

Objections to the Order.

I.

The order imposes a burden upon the interstate traffic of the plaintiff in error and interferes with and impairs its ability to perform its duty as an interstate carrier of freight and passengers.

The police power which is resident in the states may be exercised upon interstate railroads, but not in such a way as to unlawfully interfere with interstate commerce (Vol. 2, Elliott on Railroads, Section 667). In the present case we submit that the order under review is invalid because,

(a) It requires changes in the location or grade of switches, sidetracks, leads, bridges, yards, structures and other facilities and properties, which are used by the plaintiff-in-error in the furtherance of its interstate business.

(b) It arbitrarily compels the plaintiff-in-error to raise and expend moneys for the purpose of complying with said order, which said moneys should otherwise be available for and would be used by it in the making of changes and improvements which are essential for the purpose of enabling the plaintiff-in-error to carry on its interstate business.

(a)

The changes required in the several leads, switches and side tracks, which, under the order, must be destroyed or relocated and reconstructed, are set forth in detail in Assignment of Error No. 34, at pages 2381-5 of Vol. V. We claim that this part of the order violates the Federal Constitution, by reason of the fact that the necessary effect thereof is to interfere with interstate commerce. The total cost of making these changes in the side tracks, as required by the order, is about \$250,000 (see Exhibit Erie 28, Vol. IV, p. 2254; testimony, p. 1980). The effect of the order upon the side tracks is described in detail in the testimony of Mr. Brameld (pp. 1966-1981). See also Exhibit Erie 27, as printed in Vol. VI, at pp. 51-6.

So far as relates to these side tracks the execution of the board's order requires the entire destruction of several of them without any provision for the reconstruction or relocation thereof, and in the case of other sidings the board's order likewise requires the destruction of the sidings and suggests the reconstruction thereof at different grades and locations. If the order be construed to require such cost to be paid by the side-track owners, it is of course invalid, as these owners are not public utilities; on the other hand, if it requires the cost to be paid by the plaintiff-in-error the order is equally invalid, because the plaintiff-in-error is not legally bound

to pay such expense, and an order requiring it so to do takes its property for the benefit of other persons or corporations, and therefore deprives it of its property without due process and without just compensation. See authorities cited in Point V. It therefore follows that neither the railroad nor the siding owners can be compelled to reconstruct and relocate the several sidings. The necessary result is that the sidings or the connections thereof with the main line tracks are destroyed and no one can be compelled to restore them. It follows that the destruction of these sidings interferes with the interstate commerce of the plaintiff-in-error, and for that reason we submit is in violation of the Federal Constitution.

In *McNeill v. Southern Ry. Co.*, 202 U. S., 543, 50 L. Ed., 1142, it was held that an order of the Commission of the State of North Carolina requiring a railroad company to deliver cars from another state to the consignee on a private siding beyond its own right of way, was a burden upon interstate commerce, and for that reason was void. This Court said:

"Without at all questioning the right of the State of North Carolina in the exercise of its police authority to confer upon an administrative agency the power to make any reasonable regulations concerning the place, manner and time of delivery of merchandise moving in the channels of interstate commerce, it is certain that any regulation of such subject made by the state or under its authority which directly burdens interstate commerce is a regulation of such commerce and repugnant to the Constitution of the United States. *Houston & Texas Central Ry. Co. v. Mayes*, 201 U. S. 321; *American Steel & Wire Co. v. Speed*, 192 U. S. 500."

Referring to the case of *Central Stock Yards Co. v. Louisville & Nashville R. R. Co.*, 118 Fed., 113, the Court further said:

"The direct burden and resulting regulation of interstate commerce operated by an alleged assertion of state authority similar in character to the one here involved was passed upon by the Circuit Court of Appeals for the Sixth Circuit in *Central Stock Yards Co. v. Louisville & Nashville R. R. Co.*, 118 Fed. Rep. 113. The court in that case was called upon to determine whether certain laws of Kentucky imposed a direct burden upon interstate commerce and were a regulation of such commerce, upon the assumption that those laws compelled a common carrier engaged in interstate commerce transportation to deliver cars of live stock moving in the channels of interstate commerce at a particular place beyond its own line different from the general place of delivery established by the railway company. In pointing out that if the legislation in question was entitled to the construction claimed for it, it would amount to a state regulation of interstate commerce, it was aptly and tersely said (p. 120):

"It is thoroughly well settled that a state may not regulate interstate commerce, using the terms in the sense of intercourse and the interchange of traffic between the states. In the case at bar we think the relief sought pertains to the transportation and delivery of interstate freight. It is not the means of making a physical connection with other railroads that is aimed at, but it is sought to compel the cars and freight received from one state to be delivered to another at a particular place and in a particular way. If the Kentucky constitution could be given any such construction, it would follow it could regulate interstate commerce. This it cannot do."

If an order of administrative body which requires a railroad to deliver cars on a private siding is an interference with interstate commerce, *a fortiori* is there such an interference when the order of the board requires the physical destruction of the sidings or the connections thereof (some on and some off the right of way) upon which interstate traffic is delivered and received.

(b)

The order also operates as a regulation of interstate commerce because the great cost of carrying out the same impairs the ability of the plaintiff-in-error to perform its public duty as a common carrier of interstate traffic. It may be that ordinary expenses that are incidental to the exercise of the state's police power cannot be said to interfere with interstate commerce, yet in the present case the expense is so great and the conditions are so unusual that we submit that the order is unreasonable and arbitrary because it will cripple the financial resources of the plaintiff-in-error to such an extent as to seriously impair its ability to function as an interstate carrier by preventing it from making improvements that are essential to its continued operation as such carrier.

The railroad system of the plaintiff-in-error covers a total mileage of 2,257. (See annual report, Ex. R. 123, p. 1348.) The tracks run through the states of New York, New Jersey, Pennsylvania, Ohio, Indiana and Illinois. By far the larger proportion of the company's operations is of an interstate character.

On the filing of the board's report of January 11, 1915, from which it appeared that board had decided to make an order requiring the elimination of crossings at an expense of approximately \$3,000,000, the plaintiff-in-error

immediately filed a petition for further hearing, in which it asked the board, among other things, to again consider whether the proposed order would impose a burden upon the interstate traffic of the plaintiff-in-error and interfere with its ability to perform its duty as an interstate carrier.

In this petition (dated Feb., 1915) it called attention to the following facts:

1. That during the next twelve months it was absolutely necessary for safety in the operation of the railroad to expend the sum of \$1,094,825, the estimated cost for repairs to bridges. (See Par. 9 of Petition, p. 1779; Schedule B thereto attached, p. 1785); that it would be impossible to divert funds from such work for the purpose of carrying out the proposed order, and the failure to do this work might result in serious accident and loss of life.

2. That the sum of upwards of \$12,000,000 should be expended at once upon improvements of its railroad property for the purpose of enabling it to render safe, adequate and proper service in the transportation of interstate commerce and that the proposed order would impose a burden upon such interstate traffic and impair its ability to perform its duty as an interstate carrier, for the reason that moneys which would otherwise be available for the purpose of making these necessary improvements would have to be diverted from such purposes to the extent of the cost of eliminating the crossings, and would to that extent prevent the plaintiff-in-error from making such necessary changes and improvements. (See par. 10, p. 1780; Schedule C, p. 1785.)

The board declined to give any further hearing on this point. (See *report* of April 20, 1915, pp. 1793-5.)

Prior to the filing of the board's report of January 11, 1915, and the presentation of the said petition for further hearing, some testimony was submitted to the board showing the financial condition of the plaintiff-in-error and the effect upon its interstate commerce of the making of any such order as was demanded by the city.

Mr. Lincoln, general superintendent of the company, testified that he had made an investigation of the necessary improvements from the standpoint of safety. He pointed out that the first consideration was the construction of a double track and that the largest share of available funds that could be secured had been devoted to that purpose for a number of years, and that the plaintiff-in-error had "under way or authorized" double track construction which would require a further expenditure of \$7,000,000 (p. 712). The witness pointed out that there were two important reasons for the necessity of double track construction; the first was the protection of the traveling public, the second was the increased earning capacity (p. 712, l. 30, to p. 713, l. 20).

Next to the construction of double track he said the next important large item is the construction of additional tracks between Jersey City and Suffern, as there is a very dense passenger traffic handled over the same tracks on which freight is moved. Additional tracks should be constructed in the commuting territory so that the freight service can be taken off the passenger tracks. The cost of this construction between Jersey City and Suffern amounts to \$3,500,000, a total expenditure for track work of \$10,500,000 (p. 713, l. 30, to p. 714, l. 20). This money was not available at that time, as the company had not income sufficient to justify a loan for such purpose (p. 714, l. 30).

The next important item is for automatic block signals. The amount now required for such improvement is \$500,000 (p. 715, ll. 10-30).

The next item of expense for safety, which has to be made in order to comply with the law, is the application of safety appliances to operating equipment. The time limit thereon was July 1, 1916 (later extended to July 1, 1917). The original amount for that work was \$1,750,000. The company still had to spend \$1,354,741 for the purpose before July 1, 1917, or the equipment could not be used. This work is proceeding all the time (pp. 715, 716).

The next item of large importance is the construction of a passenger terminal at Jersey City. At the present time an average of 55,000 people per day is handled at Jersey City. That terminal serves a population of from 750,000 to 1,000,000 within forty miles of Jersey City, and as an element of safety and convenience there must be a new terminal. This involves an expenditure of \$7,000,000. It also involves very large other expense by reason of the necessity of removing the shops and engine terminals from Jersey City and the rebuilding thereof at a point west of the Bergen Tunnel, at what is called Croxton Yard. The estimate for such shop and yard facilities at that point calls for an expenditure of \$3,500,000 (p. 717, l. 20, to p. 718, l. 20). In other words, the total cost of making the necessary changes in the terminal facilities at Jersey City will be not less than \$10,500,000 (p. 719, l. 25).

The next important item is the installation of steel underframes on passenger cars to take the place of the present wooden cars. This work has been started and the estimated cost to complete it is \$741,000 (p. 719, ll. 30-40).

Other items that have to be met in order to comply with the law are the extra cost of the full crew law, amounting to about \$275,000 a year (p. 720, l. 10), and the increased cost of payroll due to the arbitration awards, amounting to \$2,744,688 per year (p. 721, ll. 20-30). These last two items, of course, do not deal with the question of improvements in the physical properties, but nevertheless have to be considered because the payments are compulsory.

There was a further increase by another award, amounting to \$400,000 a year (p. 722, l. 10).

Another item of increase on payroll is under the hours of service law, which averages about \$140,000 a year (p. 723, l. 10).

Taxes have increased from \$900,000 in 1904 to \$1,800,000 in 1914 (p. 723, l. 15).

The average increase in the cost of the maintenance of way is \$500,000 a year, that is, the cost of such maintenance, if the property were kept at a certain average level of efficiency, would be \$7,000,000 a year, but in order to raise the standard by increasing the weight of rails, improvements of bridges, providing better ballasts, etc., this average increases at the rate of \$500,000 per year (p. 723, l. 30 to p. 724, l. 10).

This item, averaging \$7,000,000 for maintenance of way, has recently been postponed to a large extent because of lack of funds—although this work cannot be put off indefinitely and much of it would have to be done within a year from that date (p. 724, l. 5).

The next item is the maintenance of equipment. The normal charge for this is \$11,000,000 a year. This charge is increasing on account of the safety appliance act and steel underframes. Much of the repair work has had to be deferred for lack of funds, with the result that about

10½ per cent. of the total equipment was in bad order on August 1st. After that date, it was absolutely necessary to make repairs and the shop forces were therefore increased and the percentage of bad order cars reduced to 4½ per cent. (p. 726).

The expenditures for freight equipment will average \$2,500,000 a year for the next ten years (pp. 728, 729).

As compared with an expenditure of \$3,000,000 for the elimination of grade crossings in Paterson, the foregoing expenses are "of far more importance both as safety measures and from the standpoint of affording better facilities for operation and increased earnings" (p. 730, ll. 30-40).

During the previous five years the company had spent about \$35,000,000 on construction of double track, renewals of bridges and new equipment. The sum of \$22,000,000 additional has been authorized and \$8,000,000 of that has been spent (p. 732, ll. 1-40).

The testimony of Mr. Falconer, chief engineer, shows in detail the amount expended by the company for the past ten years, in the making of necessary improvements and the estimate of the cost of expenditures, which are required to be made within five years. The total amount spent from 1906 to 1914 for "additions and betterments" is \$55,727,039 (p. 750; Exhibit R. 128, p. 1379). The estimate of expenditures for the next five years is given in detail in the testimony of Mr. Falconer and is summarized in Exhibit R. 129 at pp. 1380-2, and Exhibit R. 130 at pp. 1383-8; Exhibit R. 131 at pp. 1388-1393).

Mr. Falconer described in detail the order of importance of these several items. His first series of items is the completion of the double track and grade reduction; and of this the most important single item is the

completion of the double track from Lomax to Griffith, which will cost \$2,051,000 (p. 753-4).

Mr. Falconer then described the necessity and the advantage of certain other double track work and reduction of grades (pp. 755-762). The total cost of these items is \$7,806,000 (p. 762, l. 15, Exhibit R. 129, p. 1379).

On the question of the necessity and importance of making these improvements, so far as it affects the handling of interstate business, the witness said:

“Q What is your view of their importance with regard to the ability of the railroad company to adequately handle its interstate business?

“A They are of prime importance to enable the railroad company to handle its interstate business. The business of the railroad company is very largely interstate and all of these improvements, every single one of them, and the terminal improvements, are all necessary to aid in handling interstate business.

“Q In your judgment, if the railroad company was required at this time to spend three millions or more for the elimination of grade crossings in Paterson, would its ability to handle the improvement, its duty with regard to interstate business be impaired?

“A In my opinion it would. In my opinion that three million or whatever it is, should be expended in making some improvement that would enable the railroad to earn a greater income and it might thereby be enabled to set aside sums to carry out work which is not non-income producing. The elimination of grade crossings in Paterson or any other city produces no income, adequate, when compared to the expenditure. The saving in expenses is a very small fraction of one per cent. of the cost of the elimination, as a rule, and it would be so in Paterson. In other words, if the Paterson elimination is undertaken, the company will be burdened by fixed charges equal

to the interest on the cost of construction and will save practically nothing in operating expenses, whereas if this same amount of money is expended at a point where operating expenses are reduced, such a grade reduction or additional tracks where they are necessary, the saving in operating expenses will help to pay for such improvements at a later time. The credit of the company is impaired by expenditures which do not improve, which do not increase its revenue. The credit of the company is improved by expenditures which do increase its revenue and the company, as I see it, cannot make expenditures of such magnitude as the Paterson grade crossing elimination without borrowing money."

The next series of items is for "necessary terminal improvements" (pp. 764-8). The cost of these amounts to \$14,866,000. (See p. 1380.)

Other items are for additional tracks and grade reductions amounting to \$12,632,000, and improvements at division points amounting to \$1,293,000. (See p. 1380; also p. 772.)

In addition to the foregoing items, the witness stated that the renewal of or the repairs to certain bridges as shown on Exhibit R. 129 was "absolutely necessary." This item amounts to \$3,457,458 (p. 1381).

The witness also gave the details of the expenditures required for automatic signals. This amounts to \$669,700 (p. 775, ll. 20-40; Exhibit R. 129, p. 1381).

The witness also prepared a list showing the cost of the elimination of grade crossings, either ordered or pending in New Jersey and other states; the former amounts to the sum of \$3,317,000, the latter to \$3,767,000, including an estimate of \$3,000,000 for the Paterson crossings (pp. 1381-2), the last named being included because of the order now under review.

Prior to the filing of the board's report of January 11, 1915, and the presentation of the said petition for further hearing, some testimony was submitted to the board showing the financial condition of the plaintiff-in-error and the effect upon its interstate commerce of the making of any such order as was demanded by the city.

Mr. Lincoln, general superintendent of the company, testified that he had made an investigation of the necessary improvements from the standpoint of safety. He pointed out that the first consideration was the construction of a double track and that the largest share of available funds that could be secured had been devoted to that purpose for a number of years, and that the plaintiff-in-error had "under way or authorized" double track construction which would require a further expenditure of \$7,000,000 (p. 712). The witness pointed out that there were two important reasons for the necessity of double track construction; the first was the protection of the traveling public, the second was the increased earning capacity (p. 712, l. 30, to p. 713, l. 20).

Next to the construction of double track he said the next important large item is the construction of additional tracks between Jersey City and Suffern, as there is a very dense passenger traffic handled over the same tracks on which freight is moved. Additional tracks should be constructed in the commuting territory so that the freight service can be taken off the passenger tracks. The cost of this construction between Jersey City and Suffern amounts to \$3,500,000, a total expenditure for track work of \$10,500,000 (p. 713, l. 30, to p. 714, l. 20). This money was not available at that time, as the company had not income sufficient to justify a loan for such purpose (p. 714, l. 30).

The next important item is for automatic block signals. The amount now required for such improvement is \$500,000 (p. 715, ll. 10-30).

The next item of expense for safety, which has to be made in order to comply with the law, is the application of safety appliances to operating equipment. The time limit thereon was July 1, 1916 (later extended to July 1, 1917). The original amount for that work was \$1,750,000. The company still had to spend \$1,354,741 for the purpose before July 1, 1917, or the equipment could not be used. This work is proceeding all the time (pp. 715, 716).

The next item of large importance is the construction of a passenger terminal at Jersey City. At the present time an average of 55,000 people per day is handled at Jersey City. That terminal serves a population of from 750,000 to 1,000,000 within forty miles of Jersey City, and as an element of safety and convenience there must be a new terminal. This involves an expenditure of \$7,000,000. It also involves very large other expense by reason of the necessity of removing the shops and engine terminals from Jersey City and the rebuilding thereof at a point west of the Bergen Tunnel, at what is called Croxton Yard. The estimate for such shop and yard facilities at that point calls for an expenditure of \$3,500,000 (p. 717, l. 20, to p. 718, l. 20). In other words, the total cost of making the necessary changes in the terminal facilities at Jersey City will be not less than \$10,500,000 (p. 719, l. 25).

The next important item is the installation of steel underframes on passenger cars to take the place of the present wooden cars. This work has been started and the estimated cost to complete it is \$741,000 (p. 719, ll. 30-40).

The witness testified that all of the items on these lists, with the exception of the two groups for elimination of grade crossings, either directly or indirectly, facilitate the handling of interstate business (p. 781, l. 30). He further said:

"I wish to say, however, that this list contains in the main, items which are very important to the handling of interstate business and most of them have a direct bearing on the handling of such business and not an indirect or a far-fetched one. For instance, our grade reduction, our double tracking, strengthening our bridges, increase of our intermediate terminals, increase of the terminals at the ends of the railroads, terminal facilities, are very important to interstate business."

The foregoing testimony was not disputed. It shows conclusively that the order under review will interfere with interstate commerce by diverting from other improvements a large sum of money, which would otherwise be used to make or to complete such improvements.

Since the foregoing testimony was given other laws have added substantial burdens upon the plaintiff-in-error. Thus, under the Federal Act of March 4, 1915, inspection is required to be made of all parts of the locomotives, such as driving wheels, etc., in addition to the inspection required by the act of 1911, which was limited to inspection of boilers. Pursuant to this new law the Interstate Commerce Commission has promulgated an order, under date of June 6, 1916, and effective January 1, 1917, requiring certain kinds of headlights to be installed and maintained—at largely increased expense; and also requiring changes in the kinds and number of lights on switch engines—also at increased expense.

The so-called Eight Hour Law of Congress, recently held constitutional, adds very materially to the operating expenses of the plaintiff-in-error.

We submit that the same principle should apply as laid down in the case of *Kansas City Southern Ry. Co. v. Kaw Valley District*, 233 U. S., 75, 58 L. Ed., 857. In that case the district sought to compel two railroad companies to raise to a higher level certain bridges across the Kansas River. The defendants-in-error claimed that this work would require a change of the grades of the streets for the approaches to the bridges, that the city of Kansas City had not given any consent to raise them, that the work as ordered would interfere with interstate commerce, that the district had made no provision to compensate the owners of private property, who would be damaged by the change of grade of the streets, that the damage to the defendants would be a large sum, and that the plan had not been approved by the Secretary of War. The Supreme Court of Kansas issued peremptory writs of mandamus. This judgment was reversed by this Court, which said:

"The decisions also show that a state cannot avoid the operation of this rule by simply invoking the convenient apologies of the police power. It repeatedly has been said or implied that a direct interference with commerce among the states could not be justified in this way. 'The state can do nothing which will directly burden or impede the interstate traffic of the company, or impair the usefulness of its facilities for such traffic.' *Illinois Central R. R. Co. v. Illinois*, 163 U. S. 142, 154. *Austin v. Tennessee*, 179, U. S. 343, 349. *Atlantic Coast Line R. R. Co. v. Wharton*, 207 U. S. 328, 334. To destroy the bridges across which these railroad lines necessarily pass is at least as direct an interference with such commerce as to prohibit

the importation of cattle or oleomargarine, or the export of natural gas. *Hannibal & St. Joseph R. R. Co. v. Husen*, 95 U. S. 465. *Schollenberger v. Pennsylvania*, 171 U. S. 1. *West v. Kansas Natural Gas Co.*, 221 U. S. 229, 262. Furthermore in the present case it is not pretended that local welfare needs the removal of the defendants' bridges at the expense of the dominant requirements of commerce with other states, but merely that it would be helped by raising them. The fact that the court cannot order them to be raised does not justify a judgment that they be destroyed even in the avowed expectation that what it wants but cannot command is all that will come to pass."

The evidence in the present case shows beyond reasonable controversy that obedience to the order under review will seriously "impair the usefulness of the plaintiff-in-error's facilities for interstate traffic." The destruction of the means by which such traffic may be facilitated is an interference therewith to the same extent as if the property used for that purpose were physically destroyed—in fact, in the present case a very considerable portion of the property of the plaintiff-in-error used for interstate commerce must be actually destroyed in order to comply with the board's order.

A recent case is *Chicago B. & Q. R. Co. v. Railroad Commission of Wisconsin*, 237 U. S., 220, 59 L. Ed., 926, where this Court reversed an order of the said railroad commission requiring a railroad company to stop two passenger trains a day at a certain station. The Court summarized the legal rules as follows:

"In reviewing the decision we may start with certain principles as established: (1) It is competent for a state to require adequate local facilities, even to the stoppage of interstate trains or the re-arrangement of their schedules. (2) Such facili-

ties existing—that is, the local conditions being adequately met—the obligation of the railroad is performed, and the stoppage of interstate trains becomes an improper and illegal interference with interstate commerce. (3) And this, whether the interference be directly by the legislature or by its command through the orders of an administrative body. (4) The fact of local facilities this Court may determine, such fact being necessarily involved in the determination of the Federal question whether an order concerning an interstate train does or does not directly regulate interstate commerce, by imposing an arbitrary requirement.”

A similar question was considered in *Mississippi Railroad Commission v. Mobile & O. R. Co.*, 244 U. S., 388, 61 L. Ed., 1216, where this Court affirmed a decree of the United States District Court enjoining the enforcement of orders of the state commission requiring a railroad to restore certain passenger trains. The Court said (italics ours):

“But while the scope of this power of regulation over carries is very great and comprehensive, the property which is invested in the railways of the country is, nevertheless, under the protection of the fundamental guarantees of the Constitution and is entitled to as full protection of the law as any other private property devoted to a public use, and it cannot be taken from its owners without just compensation or without due process of law. (Citing cases.) The power of regulation, if it is exercised in such an arbitrary or unreasonable manner as to prevent the company from obtaining *a fair return upon the property invested in the public service, passes beyond lawful bounds and is void*, because repugnant to the due process of law provision of the Fourteenth Amendment to the Constitution of the United States.” (Citing cases.)

These rules are not in any way affected by the recent decision of this Court in *Denver & Rio Grande R. Co. v. City and County of Denver*, 250 U. S. 241, 63 L. Ed. 958.

In that case, the Court held that there was no constitutional interference with interstate commerce by an ordinance which directed a railroad company to remove a connecting track from a certain street crossing, it appearing that the expense was small and that there were other convenient means of moving cars to and from its track beyond said crossing. The conclusion was reached upon the ground that there was no discrimination against interstate commerce and that the removal of the connecting track would not impede the movement of said commerce in the regular course, and would affect it only incidentally and indirectly. That case is very different from the present one, where the evidence shows that if the plaintiff-in-error is required to meet this enormous expense in the city of Paterson, there will be a direct interference with the interstate commerce carried on by it. The same principle should be applied as in the *Mississippi R. Com. v. Mobile & O. R. case, supra*, as it clearly appears that obedience to the order will prevent the plaintiff-in-error "from obtaining a fair return upon the property invested in the public service."

The New Jersey Supreme Court discussed this point in its opinion, but concluded that the question of whether or not police regulations constitute an unlawful interference with interstate commerce was for the ultimate decision of the *highest* Federal court, but declined to pass upon the question, in the first instance. The question is, therefore, now presented to this Court, and we respectfully submit that for the reasons heretofore urged, the necessary effect of the order under review, is to create

a burden upon and an interference with interstate commerce, and, under these circumstances, the order should be declared invalid, even if the statute itself is sound, as against this objection.

There was no real occasion or necessity for imposing such an enormous burden upon the company in the present case. Under the statute upon which the order is based, the city might well have selected any one of the crossings, rather than combining fifteen of them in a single proceeding. It was urged before the state courts that, under the terms of the statute, only one crossing could be considered in any one proceeding, but as the state courts have construed the statute otherwise, that question cannot be considered in this Court. But, it is important to observe that there is nothing in the statute which *requires* all of the fifteen crossings to be considered in a single proceeding. The effect of such construction might be even more disastrous than it is in the present case—for example, if fifteen crossings in a single city may be considered in one proceeding, there is no reason why all of the crossings within the limits of a municipality should not be considered—indeed, there is no logical stopping place fixed by the boundary line of any municipality; we might as well include all of the grade crossings in the entire state upon any particular railroad; and it is difficult to suggest any logical reason why even the state boundary should be taken as the limit, other than the limitation of the jurisdiction of a state commission.

According to the report of the Board of Public Utility Commissioners of the state of New Jersey, for the year 1913 (page 9) there are no less than 2,500 grade crossings in that state, of which 256 are on the line of the plaintiff-in-error (see Transcript, page 282, ll. 10-40).

According to the testimony of Mr. Brameld, the average cost of the elimination of a grade crossing is \$55,000 (p. 289, l. 38). On this basis, the cost to the plaintiff-in-error of eliminating its grade crossings in the state of New Jersey would be over fifteen millions, without regard to the large increase in cost of materials since this original estimate was made.

This illustrates the claim that there was no occasion whatever for the Board of Public Utility Commissioners to impose this enormous burden upon the plaintiff-in-error; and even if the statute, as construed by the state courts of New Jersey permits more than one crossing to be included in a single proceeding, nevertheless, there is nothing in the present case which makes it necessary for fifteen crossings to be included in a single proceeding, at a cost of three million dollars, or more. This is shown by the very terms of the order itself, which directs the plaintiff-in-error to perform the work in four sections or divisions—the work on one to begin immediately after the completion of the work in the preceding section. The city's own engineers subdivided the work into sections and advised that it was practicable to do the work in one section without affecting the crossings in any other section; but instead of constructing the crossings one at a time, or at most—two or three or four, as the case might be—or those that may fairly be said to be associated with one another, as an engineering proposition—the board arbitrarily required all of them to be eliminated in one and the same order.

We do not ask this Court to review the supposed discretion of the board to include more than one crossing in the same order, but we do insist that under the *undisputed testimony* the necessary effect of an order which requires several millions to be spent within the limits

of a single municipality, covering about two miles of main line track, is a direct interference with and a burden upon the interstate commerce of the plaintiff in error. There are over 2,200 miles of railroad tracks which it is necessary for the plaintiff in error to maintain in an operating condition; and to appropriate a large part of the money which might be, and ought to be, used for that purpose and pour it into a single town—to the detriment of all the rest of the system, is a direct burden upon the interstate commerce of the plaintiff-in-error; and indeed, it is even more than that, because the inevitable result is to prevent the plaintiff-in-error from carrying on its interstate traffic, as it would have no money left with which to maintain the rest of its system even if it had enough money in the first instance (which the proof shows it had not) to pay the cost of eliminating the crossings in Paterson.

II.

The order was unreasonable and arbitrary and therefore violates the due process clause because the evidence shows without dispute that the plaintiff-in-error did not have sufficient funds or any means of procuring same for the purpose of meeting the cost of complying with the order.

The legislature may, of course, prescribe a standard, by which the action of an administrative board is to be governed, but when it undertakes to commit to such board certain powers which are dependent upon the existence of certain facts, the statute must itself prescribe some standard upon which the action of such board is made to depend. In the absence of such a prescription in the statute such a board cannot undertake to make

its action dependent upon the existence of a standard selected by itself. The case is different from a rate case, where the question is whether the rate is reasonable. There is a standard by which that question can be determined, namely, common usage, as illustrated by the interest laws, the ordinary experience of mankind, as illustrated by the average return on investments, and the decisions of the courts determining what is or should be a reasonable return on such investments.

It is clearly impossible to lay down any hard and fast rule or set of rules by which it may be determined whether or not a crossing is "dangerous," and hence there is no standard upon which the action of the board in any particular case must be based. It is equally impossible to lay down any rule by which the question of whether public travel is "impeded" may be determined—unless the word "impeded" is held to be applicable only to permanent obstructions and not merely to delays or hindrances to public travel caused by the passage of trains.

But even if it is possible to spell out from the statute a standard upon which the action of the board may be based, the fact still remains that the board is not *required* to take action, but in such event *may* order the elimination of the crossing.

The statute provides, in Section 1, that

"Whenever a public highway and a railway cross each other at the same level and it shall appear to the board that such crossing is dangerous to public safety, or that the public travel on such highway is impeded thereby, the board *may* order the company operating such railroad to alter the crossing," etc.

The statute confers on the board arbitrary power to order or to refuse to order the alteration of a grade

crossing, even though it may find the jurisdictional facts on which the right to make such order under the statute depends. It might well be that the board could constitutionally be delegated power to determine whether or not certain facts exist, but when such facts have been found, this statute leaves it to the board to decide arbitrarily whether or not it will or will not make an order for the alteration of the crossing.

There is no provision in the statute under consideration which requires that the orders of the commission must be lawful and reasonable, as there are in many other similar statutes. See, for example, the case of *Commission v. Toledo, etc. R. Co.*, 107 N. E. 774, Pub. Util. Reports 1915-B, p. 879, dealing with the question of the power of the Public Service Commission of Illinois to enforce a statute requiring the erection and maintenance of depots. Under the New Jersey statute the Board of Public Utility Commissioners *after* a finding of the existence of the jurisdictional facts as to danger to public safety and impediment to public travel, has arbitrary power in one case to order a company to spend millions, and in another case where the crossings may be equally dangerous to refuse to order the alteration of the crossings. An illustration of this principle is found in the case of *State v. Great Northern R. Co.*, 111 N. W. 289 (Minn.), where it was held that a statute was unconstitutional as a delegation of legislative power which authorized a railroad commission in its judgment to allow an increase of capital stock for such purposes and on such terms as it might deem advisable, or in its discretion to refuse it.

Furthermore, there is no standard fixed with regard to the proportion of the expense to be borne by a street

railway company, as the board *may*, but is not required to, order not exceeding 10 per cent. to be paid by the street railway company.

The opinion of the New Jersey Supreme Court is not clear as to whether the statute is to be construed as permissive or as mandatory, after the board has found the jurisdictional facts as to danger to public safety, or as to impediment to public travel. From one part of the opinion, it might be inferred that the state courts thought the statute was permissive; from another part, that it was mandatory. Referring to the argument on this subject, the New Jersey Supreme Court said:

“The obvious answer to this point of the prosecutor is the fact that the prosecutor was required by the order to make the alterations and changes in the grades, so as to it, the statute is mandatory, and if the facts before the board justify the order, it is not arbitrary. The prosecutor is not concerned with what might be ordered to be done by some one else by the Board of Public Utility Commissioners.

There is a line of authorities, however, which hold that ‘may’ in a statute means must or shall. Thus, in England, in the case of *King v. Harlow*, 2 Salk 609, it was said that the word ‘may’ in a statute shall be taken to be mandatory, where the thing to be done, is for the sake of justice, or for the public good. So, Chancellor Kent, in the case of *Newburgh Turnpike Co. v. Miller*, 5 Johns., Ch. 113, said, in respect to statutes, the rule of construction seems to be that the word ‘may’ means must or shall, only in cases where the public interests and rights are concerned, and where the public or third persons have a claim, *de jure*, that the power shall be exercised. These cases were cited with approval by our courts, in the cases of *Davidson v. Davidson*, 17 N. J. L. 171; *Seiple v. Borough of Elizabeth*, 27 *ib.* 410; *Atlantic City Water Works Co. v. Road*, 50 *ib.* 672. So, there is a line of au-

thorities which hold, that the agencies of government do not act automatically. It is necessary to vest in its officers certain general powers, with a discretion in the governmental agents, as to their exercises. It would be as impractical as it is undesirable, to attempt to formulate in advance, a set of hard and fast rules, by which every conceivable public act should be governed. In order to accomplish the ends of local government, it has been found expedient to create various boards and commissions, which are charged with the duty of supervising, directing, and controlling particular subjects. It has been held, that the granting of such power by the legislature was not a grant of either legislative or judicial power. *People v. Roth*, 249 Ill. 532. For other illustrative cases see, in re Connecticut Co., 94 Atl. 992 (Conn.). In *Matter of New York Elevated R. R. Co.*, 70 N. Y. 327; *Trustees of Saratoga Springs v. Saratoga Gas, &c. Co.*, 191 *ib.* 123; *Alton & C. R. R. Co. v. Vandalia, &c. R. R. Co.*, 268 Ill. 68. (Vol. V, pp. 2278-2279.)

We respectfully submit that what the court calls an "obvious answer" to the point is not obvious at all. The opinion does not meet the point as to whether or not the statute gives the Board of Public Utility Commissioners arbitrary power to order or not to order the elimination of a grade crossing, after a finding of the preliminary fact or facts. So far as not being concerned as to what might be ordered to be done by "some one else," the plaintiff-in-error is very much concerned, if the statute be so construed as to authorize the board to order the plaintiff-in-error to do certain work for the purpose of eliminating grade crossings, and to decline to order "some one else" to do like work in substantially similar circumstances. If that is the proper construction of the statute, it is apparent that the plaintiff-in-error is deprived of the equal protection of the laws, for the reason

that it is obliged to use its money and property for the purpose of eliminating grade crossings, whereas, other railroad companies, similarly situated, might not be required so to do; and in considering the question of the constitutionality of a statute, the question depends upon not what *is* done, under such statute, but what might or could be done thereunder. The question of constitutionality must be determined according to the terms of the statute, and is not dependent upon the action or non-action of the officials authorized to proceed thereunder.

Montana Co. v. St. Louis Mining Co., 152 U. S. 160, 38 L. Ed.;

Security Trust Co. v. Lexington, 203 U. S. 323, 51 L. Ed. 204;

Georgia Ry. Co. v. Wright, 207 U. S. 126, 52 L. Ed. 134;

Ex Parte Christensen, 43 Fed. 243;

Grainger v. Douglas Park Club, 148 Fed. 513.

On the other hand, if the authority of the board, under the statute, is not discretionary, and the word "may", as used in section 1 thereof, means "must," then so much the worse for the statute; under such circumstances, the board has no power to consider any facts other than danger to public safety and impediment to public travel, and, therefore, it cannot take into consideration at all the question of whether the elimination of the crossing or crossings would result in any compensating advantage to the railroad or to the public, and cannot consider the financial ability of the railroad to do the work required by the order. In other words, there is no limit to the arbitrary power conferred upon the board, and the statute might as well have stated that *every* grade crossing must be eliminated, as every crossing, in the very nature of

things, is to some extent dangerous to public safety and to some extent impedes public travel.

We submit that these are not reasonable standards upon which the action of an administrative body is to be based, and that if this be the proper construction of the statute, then it deprives the plaintiff-in-error of its property without due process of law, and, in this respect, violates the Fourteenth Amendment.

But, as the opinion of the New Jersey Supreme Court on this subject is ambiguous, and we cannot foresee what construction will be adopted by this Court, it is necessary to give consideration to the question of whether the statute is *permissive*; if it is permissive, then, as we have above shown, it violates another provision of the Fourteenth Amendment, in that it deprives the plaintiff-in-error of the equal protection of the laws; but, if the view of the state courts, that this plaintiff-in-error is not concerned about the construction of the statute on this point, is correct, we further submit that the evidence in the present record shows that the action of the board was unreasonable and arbitrary, because it appears, without dispute that the plaintiff-in-error did not have the financial ability to comply with the order under review, and hence, if we assume, for the purpose of argument, that the statute is valid, as against the objections stated above, the question still remains whether the present *order* can be sustained. In the present case we have a situation where it is literally impossible, because of financial conditions, for the plaintiff-in-error to comply with the order of said board.

We therefore urge that the order in the present case should be set aside, for the reason that the evidence shows, *without dispute*, that the plaintiff-in-error does not have and will not have sufficient funds for the purpose of meeting the enormous cost of complying

with the order; but if the plaintiff-in-error does not obey, then under the statute it is subject to a penalty of \$100 per day for every day during which the default continues and may also be proceeded against by mandamus or injunction; or by suit in equity; and thereby, if it still refuses, put itself in contempt of court; and any person who knowingly and willfully does or causes others to do, or advises or instructs the officers of any public utility to do any act forbidden or prohibited by the act, is guilty of a misdemeanor; and likewise any person who knowingly and willfully neglects, or fails to do, or causes others to neglect or fail, or advises any officer of any public utility to neglect or fail to do, is guilty of a misdemeanor; and the public utility itself which neglects or fails to do any act required to be done by the statute is also guilty of a misdemeanor. (See Sec. 33 to 36, Chap. 195 P. L. 1911.) The plaintiff in error and its officers must therefore choose between the jail and the poorhouse, as the evidence shows that it is impossible for the plaintiff-in-error to obey the order.

The board, in the report of January 11th, 1915, said on the subject of the company's finances:

"In considering this matter the board has been mindful of the claim of the Erie Railroad Company that it is not now financially able to make the expenditure necessary to do the work. The testimony discloses that the company contemplates spending larger sums than would be required for this purpose, in doing work that in the judgment of the board, is not so immediately necessary. It seems to the board that some of the money intended to be used for other purposes might more appropriately be used in this work, should it be found necessary to divert it. Nor does the testimony satisfy us that the company will not be able to secure the necessary funds" (p. 1756, line 30, and p. 1757, line 3).

It would appear from this that the view of the board was, that the company had under consideration and was *intending to expend for other purposes* larger sums than would be required to carry out the board's order; and it would also appear that the board was of the opinion that it had the right to usurp the functions of the company's directors, by determining for them which of several improvements was most *immediately necessary*, and in what manner the little money that the company had for use on its entire line might be most *appropriately* used. But the legislature has not yet abolished the method of control of a railroad corporation prescribed by the general railroad law and by other general laws, namely, honest management by directors acting according to their best judgment.

The suggestion in the board's report that the company *contemplated* spending larger sums in some other work were so serious a misunderstanding of the company's attitude that immediately on the filing of this report, and before the making of any order thereon, the company considered it its duty to file a petition for a further hearing, in which it called attention (*inter alia*) to the fact that the board had apparently mistaken its *desire* to make needed improvements for its ability to secure or expend the sums required therefor; and that the company did not, at the time of the filing of the petition nor at the time of the giving of the testimony, contemplate the spending of larger sums than would be required for the elimination of the crossings, nor indeed any considerable sums in making other improvements, for the reason that it did not have, nor could it obtain, the necessary funds, or any considerable part thereof, beyond what it actually required for the continuation of

safe operation on its railroad; that, as shown by the evidence, its net income available for improvements during the fiscal year ending June 30th, 1914, was only \$662,295.87, being the entire *net* income, less such amounts as were required by the terms of the mortgages and other obligations to be devoted to sinking and other funds. The petition then showed that during the six months ending December 31st, 1914, the company had already been required to expend, principally in the interest of safe operation, over \$600,000, that it was under legal obligation to spend large sums for improvements under existing contracts or orders of the courts, that certain expenditures were also required immediately in order to maintain safe operation, that it had no capital funds outside of its income to devote to these purposes, except the proceeds of an obligation heretofore issued, amounting to \$300,000, all of which was already required to be devoted to a particular work in the course of construction under order of the public authorities, and that it had no additional capital obligations available over and above what was required for the payment of obligations that were about to mature.

The petition then set forth in considerable detail the financial situation of the company (see pp. 1777 to 1783.) Various schedules attached to the petition gave a list of the sums which the company was obliged to expend; schedule "A" (p. 1784) gave a list of the work required to be done, either under existing contracts, statutes or orders of the courts; the total cost of this work was the sum of \$4,042,700. If that work were not performed then the company would lay itself open to suits for breach of contract and to proceedings by way of indictment or contempt for failure to comply with

the provisions of the statutes of other states or the orders of administrative bodies in other states, particularly in New York and Pennsylvania.

Schedule "B" (p. 1785) gave a list of the work which was absolutely necessary for the purpose of operating safety, covering a period of one year only, from February 4th, 1915; these items made a total of \$1,094,825. This covered repairs and renewals of bridges which were put in the list as *absolutely necessary* for the obvious reason that if the work was not performed there would be danger of serious catastrophies, any one of which might cause far more injury to life and limb than all the grade crossings in Paterson since the railroad was first built.

Schedule "C" (p. 1785) gave a list of a large number of improvements, aggregating a total of \$12,091,200, all of which needed to be expended *at once* for the purpose of enabling the company to render proper service.

If the board had had any doubt before the filing of this petition as to the needs of the company and its purpose to spend money in doing work that, in the judgment of the board, was not so *immediately* necessary, the facts set forth in this petition should have removed it. The petition was read before the board on February 5th, 1915 (p. 796, *et seq.*), and on April 20, 1915, the board filed its report denying the prayer to submit further testimony on this and certain other points specified in the petition (p. 1795, lines 10 to 15). It is hard to imagine what further or stronger testimony could be produced to "satisfy" the board that the company would not be able to secure the necessary funds to eliminate the Paterson crossings. There were items amounting to over \$4,000,000 which had to be paid under previous contracts or orders; items aggregating over \$1,000,000 which had to be paid in order to make operation safe, and

items aggregating over \$12,000,000, the expenditure of which was necessary at once in order to perform proper service; yet the board brushed aside these facts as of no importance compared with the *immediate* "necessity" of eliminating grade crossings, some of which had been in existence for at least sixty years and other for probably eighty years. The board did not even consider these representations of sufficient importance to justify a few days' or a few weeks' delay in the presentation of testimony in support thereof—although at the time the petition was read before the board counsel for the company stated that the company was prepared on the very day the petition was read to offer testimony in support thereof, and that if there was any matter in the petition on which the board desired testimony the company was prepared to proceed at any time or place (p. 840, line 25; p. 842, line 35).

Let us now examine some of the testimony which failed to "satisfy" the board that the company was not financially able to make the necessary expenditure, and could not secure the necessary funds.

We will first look at the company's annual report to its stockholders for the fiscal year ending June 30th, 1914.

The net income for that year was..... \$1,422,975.20

From that amount the following appropriations were made:

To sinking and other reserve

funds required by the terms

of its mortgage..... \$760,709.33

Additions and betterments.... 502,742.77

1,263,452.10

Balance credited to Profit and	
Loss Account	\$ 159,523.10
(pp. 1369 to 1370.)	

There were direct entries to the Profit and Loss account which resulted in a net debit of\$ 229,806.49
 (Page 1371) so that the company's surplus was actually reduced during the year by the sum of\$ 70,283.39
 (See Annual Report, 1914.)

The net income of \$1,422,975.20 for the year ending June 30th, 1914, compares with the net income for the year ending June 30th, 1913, of \$8,105,675.23, or a decrease of \$6,682,700.00 in 1914 as compared with 1913. (See Exhibit R-113, p. 1337.)

Exhibit R-113 further shows that the appropriations of income for additions and betterments for 1913 and 1914, were as follows:

1913	\$ 657,587.93
1914	502,742.77

Excess of 1913 over 1914.....	\$ 154,845.16
-------------------------------	---------------

But even in 1913 the amount appropriated or additions and betterments was not above the average. (p. 638.)

It is, therefore, evident that if the company had maintained the same appropriations for additions and betterments in 1914 as in 1913 (which the officers testified was a desirable thing to do, if possible,) the surplus in 1914 would have been the practically negligible amount of \$4,677.94 (p. 637).

The credit balance of \$159,523.10, transferred from Income Account to Profit and Loss in 1914, compares with \$6,682,568.31 in 1913. It should be stated that in

1913 the railroad company received as dividend from the Pennsylvania Coal Company the sum of \$2,450,000.00, as against \$500,000.00 (Exhibit R-126, p. 1377), in 1914, but even after allowing for the difference in the dividends received from that company, the decrease in the net income of 1914 was over \$4,500,000.

The principal cause of decline in net income in 1914 appears as follows:

Operating revenue decreased	\$1,663,784.22
Operating expenses and taxes increased....	2,077,247.00

Operating income decreased	\$3,741,031.22
----------------------------------	----------------

The income statement for the two months ending August 31st, 1914 and 1913, shows that the surplus carried to Profit and Loss account was \$140,021.03 in 1914, whereas for the corresponding period in 1913 it was \$312,968.76; the decrease, however, is largely accounted for by appropriations for needed improvements in property investments. The net income shows a very slight increase for these two months in 1914, as compared with 1913.

Operating Income (which is usually the best test of a carriers' prosperity or adversity,) decreased in 1914 \$46,231.41, as compared with the very poor showing of 1913. (Exhibit R-114, p. 1338 to 1341.)

It is true that during the two months ending August 31st, 1914, the company's statement shows a surplus of \$140,021.03 (p. 1341), but the testimony of Mr. Lincoln shows that this is due to the fact that the maintenance and operating expenses were cut to the lowest limit, and that it represented merely what was held back from repairs and improvements that were absolutely essential,

but that were necessarily postponed because of the financial conditions (pp. 724, 725).

The testimony of Mr. Lincoln further shows that the average annual increase of expenses for right of way and structural expenses, in order to keep up with demands for heavier rails, stronger bridges, better ballast and other improvements necessary for convenience and safety, was the sum of not less than \$500,000 (p. 724). The mere fact that this amount of money may not have been spent for this purpose in any one year, therefore, does not show that it was not necessary to spend it, but it was merely a postponement of expenses that must be met sometime, somehow, somewhere, if the company is to continue to carry out its functions as a carrier of freight and passengers.

On the basis of the surplus account for the year 1914 the elimination of these crossings would take the company's total surplus for a period of 25 years, and in the meantime nothing could be spent for improvements beyond the bare necessities of maintenance of present conditions, and even that would be problematical.

The matter of safety at grade crossings depends not upon the railroad but upon the highway travel; it is most unreasonable to require the company to expend for the protection of travelers who can protect themselves immense amounts of money that should be devoted to the protection of the passengers traveling on the railroad and whose safety depends absolutely upon the management and operation of the railroad. The report of 1914 (Exhibit R. 123, p. 1352) shows that during that year the total number of passengers carried was 27,628,242. If, under such a showing as is presented in this report, any board of directors had

voluntarily undertaken to do what the Board of Public Utility Commissioners has ordered the company to do, such directors would deserve to be indicted for conspiracy against the traveling public.

The further suggestion is made in the board's report that the company might in some way be able to borrow the funds, as, they say, the testimony does not satisfy them that the company will not be able to *secure* them. This is a remarkable statement in the face of the undisputed evidence as to the existing and presently maturing obligations of the company. We start with a capital stock on which no dividends have been paid for many years, and a large bonded indebtedness, interest on which must be paid or the company becomes bankrupt. The figures are as follows:

CAPITAL STOCK.

Description	Authorized	Issued
1st Preferred 4%.....	\$48,000,000	\$47,892,400
2d Preferred 4%.....	16,000,000	16,000,000
Common	153,000,000	112,378,900
Totals	\$217,000,000	\$176,271,300

MORTGAGES, BONDED AND SECURED DEBT.

Mortgage Bonds	\$166,110,900.00
Collateral Trust Bonds.....	65,749,500.00
Equipment Trust Obligations.....	17,217,457.45
Miscellaneous Funded Obligations.....	1,103,065.63

Total \$250,180,923.08

(See annual report, Exhibit R. 123. Also Exhibits R. 118, 119, 120.)

While, of course, the company is under no obligation to pay dividends on its stock, the interest on these bonds and other obligations must be maintained or disaster follows.

MORTGAGE BONDS.

	Issued	Maturing
Prior Lien Bonds.....	\$35,000,000.00	1996
General Lien Bonds.....	51,724,000.00	1996
Convertible Bonds	32,000,000.00	1953
Miscellaneous Bonds	47,386,900.00*	
Collateral Trust Bonds.....	65,749,500.00	1914-1951
Equipment Trust		
Obligations	17,217,457.45**	
Miscellaneous Funded		
Obligations	1,103,065.63†	

*Varying Dates from 1916-1982.

**Semi-annual payments from 1914-1924.

†Part each year.

(See Exhibit R. 123, pp. 1372 and 1373 for details of Mortgage Bonds and Collateral Trust Bonds.) Also Exhibit R. 118, 119, 120.

But the most important considerations, from the standpoint of the company's immediate financial necessities, are the obligations which the company was bound to meet within the next three years; these are shown in detail on certain exhibits as follows:

Exhibit R. 115 (p. 1342)—

Obligations Oct. 14, 1914, to

June 30, 1915.....\$18,831,939

Exhibit R. 116 (p. 1343)—

Obligations during year ending

June 30, 1916..... 11,241,438

Exhibit R. 117 (p. 1344)—

Obligations during year ending

June 30, 1917\$16,079,491

Total\$45,155,913

A majority of these items are for Equipment Trusts which are not subject to renewal (p. 651). Some of the other items might be renewed if the credit of the company is maintained. The difficulty in renewing a few million dollars in the month of October, 1914, is shown by the testimony of Mr. Crawford. These obligations must be met or renewed in some way. The company had under consideration the question of a new general refunding mortgage, as explained by Mr. Crawford (p. 675), the purpose of which is "To refund all of these underlying securities as they come due, including these equipment trust obligations or a percentage of them."

If the Board of Public Utility Commissioners deemed it such a simple matter for a railroad company to borrow fresh money, or even to renew old obligations, we respectfully invite the attention of the Court to Exhibit Erie 15, printed in volume 4, from pages 1947 to 2042, containing a summary of 29 equipment trust leases, agreements, conditional sales, collateral trust notes, etc.—all of which have required the most careful and exacting negotiations and attention on the part of the officers and directors of the company.

It is obvious that the duty of the officers and directors is to look to the future as well as to the present; it was in the fulfillment of this duty that they prepared a list of expenditures which they deemed necessary for the company to make within the next five years. This is shown in detail in Exhibit R. 129, p. 1379. It is explained

in memorandum prepared by the company's engineer. Exhibit R. 130 and R. 131, pp. 1383 to 1393.

Mr. Falconer, Superintendent of Construction with the duties of chief engineer, testified that from 1906 to 1914 inclusive the railroad company had spent for the general improvement of its road amounts aggregating \$55,727,-039.00 (see Exhibit R. 128 at p. 1379), and that it had a list of improvements that the company hoped to carry out during the next five years (Exhibit R. 129, p. 1379, introduced at p. 752), to which he referred as follows:

"A We have spent a great deal of money to secure a double track railroad. The double tracking is not completed. We have spent a great deal of money to reduce grades; the grade reduction is not complete. When the double tracking and grade reduction are completed they will enable the railroad to handle a much heavier volume of traffic than it has in the past or than it does now, and will necessitate large improvements to our terminal facilities, not only division terminals, intermediate points on the road, but to our terminals at the ends of the railroad. The most important things aside from safety seem to be the completion of the double tracking and the completion of the grade reduction and the increase in the capacity of the terminals. The order in which—

Q Just let me ask right there—is there in your judgment, an element of safety in those things you have mentioned, terminal improvements and grade reductions and double tracking?

A Yes. There is a very large element of safety in double tracking and in grade revision. In terminal improvements, such of the terminal improvements as have to do with the handling of passenger business is an element of safety."

After this he testified to the detailed items of this list and described them in the order of the importance

attached to these items by the board of directors of the railroad company (p. 752 *et seq.*).

This program called for an expenditure during the next five years of \$47,808,158. The order of importance in which these expenditures should be made is fully explained by Mr. Falconer (pp. 762 and 763). There may, of course, be room for a difference of opinion as to the comparative importance of some of the items on these exhibits, but there is no room for debate as to the items for double tracking, grade reduction and necessary terminal improvements; these two items alone amount to over \$20,000,000. (See pp. 1379, 1380.) The improvement of facilities at division points, amounting to \$1,293,000, is also an important item; and the improvements of terminal facilities, including the Jersey City station, is equally necessary. The cost of such improvements amounts to nearly \$15,000,000 (p. 1380).

The items of bridges and buildings, for automatic signals and interlocking, aggregate over \$4,000,000, and are of great importance to the safety of the travelling public, far more so than the elimination of grade crossings (pp. 787, 788).

Practically all of the items of expenditures from 1906 to 1914, as shown on Exhibit R. 128, are for improvements outside of the state of New Jersey and none of them is for improvements on the leased lines in the city of Paterson, except such incidental items as were necessary to keep that part of the railroad in proper operating condition.

The five-year program, as indicated on Exhibit R. 129, calls for a number of improvements in the state of New Jersey, but none of them is within the city of Paterson, with the exception of the expenditure which was directed by the order which is under review in this case. The estimate of three million dollars (\$3,000,000) for the cost of

complying with this order is included in the total program, not because it has been approved or authorized by the board of directors, but because it was commanded by the Board of Public Utility Commissioners. Leaving out of consideration this and other like items (see page 1382) it will be seen that the five-year program, as prepared in the year 1914, called for an expenditure of about forty-four millions of dollars—all of which, in the judgment of the board of directors and of the officers of the railroad company, were more important than the elimination of grade crossings. It is, perhaps, needless to say that this program has not been completed, or even well started, for the reason that the unforeseen conditions arising out of the War have necessarily postponed many improvements which it would have been desirable to make.

It may be said that many of these improvements were to be made outside of the state of New Jersey, but that is beside the point. The question is not what the company can afford to spend in New Jersey, but what it can afford to spend in New Jersey when consideration is given to the demands of the railroad system as a whole. The total mileage of the system is 2,257 miles, one-half of which is double-tracked. (See report of 1914, p. 1348.) It passes through the states of New Jersey, New York, Pennsylvania, Ohio, Indiana and Illinois. It is impossible to divide up one part of the road as belonging exclusively to New Jersey, another to New York, and another to some other state; the entire system must be treated as a whole; not only by its officers and directors, but also by the commissions of the states through which it operates. No one would undertake to say that the Erie system should be divided up according to where the tracks happen to cross the state lines, and each separate piece operated with reference

to the interests peculiar and local to any one particular state. Yet it sometimes seems as if there was a rivalry between the various state commissions as to which one could compel the company to pay the most within the borders of its particular state.

We have endeavored to summarize the important financial considerations which we submit justified the company in taking the position that it would be bad business judgment, if indeed it were possible, to spend the money required by the order under review, for the purpose of eliminating the crossings in Paterson. We submit that the evidence shows (and there was no dispute whatever on this point) that the company did not have the money on hand or in prospect to meet the expenditure demanded by this order, or any considerable part thereof. We therefore urge that the action of the board was unreasonable and arbitrary, because it appeared that the plaintiff-in-error did not have the financial ability either to pay for the expense of the change of grade or to borrow the money necessary therefor—if indeed it is the duty of a railroad to *borrow* money for the purpose of complying with such an order.

In the present case testimony showing the financial condition of the company was not only offered in the main case, but when it seemed to the plaintiff-in-error that the board had either misunderstood or disregarded this testimony, the matter was brought to their attention again, but with stronger emphasis in the petition for further hearing which, as has been above stated, the board declined.

The undisputed evidence shows that from the financial standpoint it was impossible for the company to comply with the board's order; and yet notwithstanding the absence of any evidence to the contrary, the board re-

fused to put its conclusion upon the evidence, but arbitrarily decided that in *its* "judgment" any work other than the elimination of the grade crossings in Paterson was not "so immediately necessary."

The financial condition shown by the foregoing testimony did not develop shortly prior to the hearing before the board, but was the culmination of a depression that had been steadily growing worse for several years past. This is shown in striking form by Exhibit R. 44, which is a table showing the operating income expressed in mills per traffic unit for a period of ten years from 1903 to 1913, as follows:

1903	2.77
1910	2.30
1913	2.03
average 1903-1907	2.33
" 1908-1912	2.04

(See Volume II, p. 1105.)

It will be seen that the operating income as expressed in this unit has decreased from 2.77 in 1903 to 2.03 in 1913; and in the latter year the income was less than the average for either of the preceding five year periods.

The operating income, as expressed in mills per traffic unit, is usually considered as the best test of financial conditions. Another exhibit gives the result of the company's operations based upon the percentage of return on the property devoted to railroad purposes. (See Exhibit R. 1, p. 931, 3.) By referring to same it will be seen that the percentage of such return decreased from 2.22 in the year 1903 to 1.13 in 1913, and the latter percentage was the lowest of any year for the last ten years except that in the year 1908 there was a deficit; in 1905 the percentage was 1.12; in 1909, 78; in 1912, 64.

If 6 per cent. be considered as a fair average return on property devoted to public use, what shall be said of a return of but little more than one per cent.?

In the case of *Willcox v. Consolidated Gas Company*, 212 U. S., 19; 53 L. Ed., 382, the Court said:

"The court below regarded it as the most favorably situated gas business in America, and added that all gas business is inherently subject to many of the vicissitudes of manufacturing. Under the circumstances, the court held that a rate which would permit a return of six per cent. would be enough to avoid the charge of confiscation, and for the reason that a return of such an amount was the return ordinarily sought and obtained on investments of that degree of safety in the city of New York.

Taking all facts into consideration, we concur with the court below on this question, and think complainant is entitled to six per cent. on the fair value of its property devoted to the public use." (See p. 49.)

The conditions as to the net income were, in a large part, the result of the many unusual and unnecessary expenses required by reason of recent legislation. Thus, the extra cost to the plaintiff-in-error by reason of the so-called "full crew laws" in the states of Indiana, Ohio, Pennsylvania, New Jersey and New York, from the time when each of these laws went into effect to December 1, 1913, was the sum of \$281,049.68. (Exhibit R. 5, p. 937.)

The annual expense of this law in the states of New Jersey, New York and Pennsylvania amount to \$277,000 (Ex. R. 125, p. 1376); and if we include Ohio and Indiana, the total annual cost is about \$300,000. (See Ex. R. 5, p. 937.)

Another very important item of increased expense was the increase in wages as the result of the awards of arbi-

trators. The summary of these shows that the *annual* increase amounted to the sum of \$692,194.53 (Ex. R. 14, p. 50).

In addition to the foregoing expenses the requirements for improvements in traveling and terminal facilities and the increases in the cost of supplies have added greatly to the operating expenses. The following are illustrations:

Betterment of Conditions and Safety, 1910-1913,	\$52,944,628.94
(Exhibit R-2, p. 934.)	

Station improvements ordered by Com-
missions to October 31, 1913:

Improvement:	Expended:	To be expended:
\$62,483.93	\$59,644.64	\$2,838.29
(Exhibit R. 3, p. 935.)		

Principal capital expenditures made in New Jersey for 1911-1913,	\$5,919,461.00
(Exhibit R. 6, p. 938.)	

Statement of Additions and Betterments authorized to
October 31, 1913, and Unexpended Balances
to September 30, 1913:

Amount Authorized,	\$35,899,102.59
Chargeable to:	

Additions & Betterments	Expenses	Individuals & Companies
\$31,550,492.60	\$3,550,061.55	\$798,548.54

Unexpended Balances:

Additions & Betterments	Expenses	Individuals & Companies
\$13,849,700.81	\$2,585,086.04	\$653,443.39

Appropriations Exceeded,	\$544,144.23
(Exhibit R-7, p. 939.)	

The fact that the railroad has not been financially able to live up to its improvement program (as shown in Exhibit R-7) is illustrated by the fact that some of these improvements were authorized as long ago as February 20, 1896; one on August 3, 1910, and on more than half of the divisions some authorizations are as old as 1911 (Ex. R-8, p. 940), and the same may be said of the authorizations for general improvements.

The increase in the cost of fuel and ties alone showed an increase in 1913 over 1910 of \$545,591. (Exhibit R. 10, p. 946.)

An approximate estimate of cost of construction expenditures which should be made within the next five years amounts to \$47,808,158 (Exhibit R-129, p. 1379).

It may be urged that the plaintiff-in-error had a prospect of some increase in income by reason of a recent decision of the Interstate Commerce Commission in the so-called five per cent. rate case, referred to in the present record. An estimate of the amount of the increased revenue by reason thereof was made by the Auditor of Freight Accounts, under date of Oct. 30, 1914, from which it appears that the best guess that could be made on that subject showed a probable increase in revenue of \$71,393.81 per year, based on the company's freight traffic in the territory known as the central freight association territory, to which the increase applied (see p. 679, ll. 20-40; Ex. R. 121, p. 1345).

It may also be urged that the plaintiff-in-error had a prospect of an increase in revenue on account of an advance in the price of mileage books. The best guess on that subject is that the increase would amount to \$48,842.64, based on the number of books issued for the year ended June 30, 1914. This estimate, however, was based on the assumption that the same number of books would

be sold as in that year and leaves out of consideration the probability that because of the increase in price a number of people might change the form of transportation used by them. (See p. 702, ll. 1-40; Ex. R. 127, p. 1378.)

If the hope of the plaintiff-in-error as to the increased revenue from these two sources should be realized, and if the guesses should prove to be true, the result would be an additional revenue of about \$120,000 per year, which is \$60,000 per year less than the legal interest on the estimated cost (exclusive of property damage) of complying with the board's order.

The indifference of the Board of Public Utility Commissioners of the state of New Jersey to the question of the financial feasibility of obeying the board's order was in striking contrast with the attitude of the commissioners of other states.

Thus, the Public Service Commission of the state of New York on December 2, 1914, entered an order in the matter of the complaint of the Cattaraugus Board of Trade against the Erie Railroad Company, asking for a new passenger and freight station. The amount involved was less than \$15,000. The commission concluded that:

"Better station facilities for both passenger and freight are imperatively demanded; but it does not seem to be the opportune time to make an order which will require the expenditure of a large sum of money on the part of the Erie Railroad Company, for it is a matter of common knowledge that at the present time the financial and business conditions of the country require the practice on the part of the railroads of the utmost conservation and economy, and in all proper cases it is the duty of this commission to assist."

The case of *Selectmen of St. Johnsbury against Boston and Maine Railroad Company*, before the Vermont Public Service Commission, was a petition for the elimination of two grade crossings; the commission expressed the opinion that the crossings in question were dangerous and should at *some time* be eliminated. We quote:

"At the hearing it was represented and shown by the Boston and Maine Railroad, that because of the financial condition of said corporation, and the pending plans for the reorganization of said corporation, it would be an excessive financial burden to undertake to eliminate these crossings at the present time. This was not controverted or questioned by the petitioners. * * * In view of the financial situation of the Boston & Maine Railroad as above indicated we believe that the work of elimination should be postponed until said company is in better financial circumstances."

(See Public Utilities Reports, 1915 A, p. 641.)

In a grade crossing case before the Public Service Commission of Maryland, decided December 16, 1912, the commission directed the installation of an electric bell at a railroad crossing, saying:

"The broad policy of the state, acquiesced in, we believe by railroad companies generally, is that where it is practicable and does not lay upon the company an unreasonable burden of expense, grade crossings ought to be eliminated, and when overhead or undergrade crossings cannot be had, as in this case, we conceive it to be the duty of the commission to see that such protection be given to the public as is reasonably practicable."

Public Service Comm. of Md. Reports, 1912.

In a dispute between the City of Danbury, Conn., the N. Y. N. H. & H. R. R. Company and the Danbury & Bethel Street Railway Company as to the type and size of a bridge to be built, the Public Utilities Commission

ordered the railroad to pay 11/24ths, the city 8/24ths, and the street railroad 5/24ths of the cost of the bridge carrying White street over the railroad tracks.

"In view of the existing law requiring railroad companies to maintain whatever type and construction of bridge may be authorized, some consideration should be given in the apportionment of expense to the increasing use of said bridge by the City and Electric Railway Co."

Report of the Public Utility Commrs. of Connecticut, 1912, p. XLVII.

Counsel for the defendants will no doubt urge that in a matter which, as they claim, affects the public safety, the question of expense should not be considered either by the board in making its order or by the court in reviewing such order. The same argument was made before the Board of Railroad Commissioners of the state of Iowa in a proceeding wherein the city of Des Moines undertook to compel the construction of a viaduct at a certain street. The evidence showed that the total cost of the work would be \$139,000, of which \$89,000 was chargeable to a railroad company. It appeared that 6 per cent. interest on such amount would be greater than the entire gross earnings per year of the railroad company from all the freight hauled over the line of railroad on which the crossing was located. The Iowa board held that under the claim made by the city it would be necessary to order the alteration of a grade crossing in every application that might be made to it. They said:

"We cannot accept this as the intention of the legislature. There must be some reasonable, legitimate relation between the expense and the danger removed by a proposed viaduct. We must give consideration to the subject of expense. The commission must consider the whole situation in the state, and use its judgment, bearing in mind all of

the important factors, in determining the necessity for viaducts, from time to time."

The commission continues:

"The expense of a proposed overhead crossing, or public improvements of that character, in its relation to the benefit resulting therefrom has been unquestionably, one important factor considered by the courts in determining the necessity for such an improvement."

After referring to the cost of the work and the comparison thereof with the amount of traffic, the commission continues:

"As a transportation company, pure and simple, aside from other investments of the parties in interest, it would pay the Des Moines Terminal Company to tear up their tracks, rather than build the proposed viaduct. Property has some rights as well as the public."

.

"We find, in view of all the evidence adduced before the board, that the said viaduct, proposed by the city, is at an expense entirely out of proportion with the hazard sought to be removed; and that there is no necessity for the said viaduct, as proposed. If this expense can be very largely reduced, a different situation will present itself."

(See Report of Board for 1913, p. 43.)

The foregoing decision of the Board of Railroad Commissioners of the state of Iowa is of particular interest because that board considered it part of its duty to consider questions of law as well as questions of fact; and one of the questions of law decided by the commissioners was whether or not they had the right to take into consideration the large expense of the proposed improvement as one of the important factors in deciding whether or not the improvement was necessary for public safety.

There are several cases in which the courts have given consideration to the question of whether or not a public utility has the financial ability to carry out a desired public improvement.

In the case of *Erie Railroad Company v. Board of Public Utility Commissioners* (not reported, decided April, 1915), involving the board's order for improvements in station facilities at Little Falls, the New Jersey Supreme Court said with reference to financial conditions (italics ours):

"The important argument urged upon the court at the hearing of this cause was that on account of general and fundamental changes in economical and financial conditions, the company was in no condition at the present time to go to the expense of building this new station, and that it had been compelled to withhold improvements projected all along its line amounting to many millions of dollars. *This argument might and probably would have had much force if it had been made prior to the determination of the Board of Utilities that a new station should be erected or even with reasonable promptness after that determination.* In such case the board, no doubt, would have given the matter due consideration, but when it is considered the decision requiring the erection of a new station was made on September 29, 1913, that the plans were submitted on October 28, and that the company then gave no intimation of any inability to carry out the improvements but merely set June 30, 1914, as the time required to complete the work and had done nothing when in March the commission asked for a report of progress, the argument now made seems to us, and probably seemed to the commission when it was offered, as one that ought not to be considered in view of the circumstances of the case."

In *Houston, etc., Ry. Co. v. City of Dallas*, 98 Tex., 396, 84 S. W., 648, the question involved was the validity of

an ordinance requiring railroad companies to make their tracks conform to the grade of streets. We quote as follows from the opinion (*italics ours*):

"The proper construction of the crossing and grading of the street thereat would, in a manner specified, throw the surface water collecting in the streets, and heretofore passing along the gutters in other directions upon the roadbed, making it a channel or sluiceway for the rain and storm waters, and rendering it unstable, insecure and dangerous to life and property; the only means of preventing which would be the construction by respondent of a sewer, of the character designated in the answer, 2 miles in length, at a cost of \$60,000."

.

"Much less can we know that the difference in the advantages of the two characters of crossings will be so great in favor of those contended for by plaintiff as to justify the imposition of such a burden upon respondent as the allegations show will result from the making of the change. If it be true that there is to be no benefit to the public from the proposed change, or a benefit which is inconsiderable when compared with the detriment to be suffered by the respondent, who will say that it is just and reasonable to subject respondent to such expense and loss as is averred? The petition itself so couples together its allegations of danger with those of mere convenience as to leave it doubtful how far the consideration of each has weighed in determining the city's action. While the convenience of the public in the use of the streets is generally to be considered and promoted, it may well be that in particular instances it should not be allowed to outweigh in the adoption of such measures as that under consideration, *a great and disproportionate injury to be inflicted on private interests in advancing it*. When it is found that a proposed action is to be fraught with such consequences as those averred in the answer, *a public*

exigency correspondingly great and urgent should be required in its support. In considering this phase of the case at present, we can only treat all of the relevant facts well pleaded as true, and announce our opinion that they are sufficient to show the ordinance relied on to be unreasonable and arbitrary in its operation against respondent, and to entitle it to a hearing on the evidence."

In *Northern Central Railway Company's Appeal*, 103 Pa., 621, one railroad company attempted to enjoin another from crossing the former's tracks at grade. The question involved was whether under the facts an overhead crossing was "reasonably practicable." It appeared that an overhead crossing would cost from \$300,000 to \$600,000 more than a grade crossing. The court approved the finding of the Master before whom the testimony was taken as follows:

"In view of the greatly increased cost of an overhead crossing, the damages to private property, the destruction, to some extent, of an entire street, the increase of the distance of a twenty-eight feet to the mile grade, the difficulty of having freight and passenger depots, the impossibility of making switches or sidings for the accommodation of factories or other business within the borough limits, except the southeasterly part, and there only by a spur siding, all these, taken together with other facts already found, I am of the opinion, and so find, that an overhead crossing is not reasonably practicable."

It will be seen that in this case the court gave consideration to the question of the differences in expense as a factor to be considered in determining the method of making a public improvement, involving public safety.

In *Pennsylvania, Schuylkill Valley R. Co. v. Philadelphia & Reading R. Co.*, 160 Pa., 227, a similar question arose as to the crossing of one railroad track by that of

another company. The decision of the lower court, permitting the grade crossing, was affirmed. The decision had been put on the ground of the heavy cost of construction of a crossing then at grade. We quote as follows:

"It is safe to conclude that for a permanent overhead crossing, good and substantial, of sufficient length to permit additional trackage for both roads, with gradual approaches and easy curves, so as to be safely and conveniently used with ordinary engines, including incidental damages to be paid to third parties, an outlay of at least \$60,000 would be rendered necessary. The superintendent of the Pennsylvania Schuylkill Valley Railroad Company testifies that, if compelled to cross overhead, in view of the expense and the uncertainty of an adequate return from the enterprise, the company would abandon it, and in this he is sustained by a number of other witnesses. Under all the facts and circumstances of the case it would not be reasonably practicable to avoid a grade crossing in this case."

In *Cleveland, etc., Ry. Co. v. Street Public Utilities Commission*, 273 Ill., 210, 112 N. E., 689, an order of the commission requiring the separation of the grades of a street and of a railroad track was sustained when it appeared that the entire cost of making the change amount to only about \$46,000. The court said, however (*italics ours*):

"While the financial condition of the railway company is a matter which *should be also considered* in this class of cases, the showing made by the railway company upon this question falls far short of convincing us that the imposition of this expense upon the railway company will result in any hardship to the company."

In the case of *Connecticut Co. v. Town of Stamford*, 110 Atl. 554, the Supreme Court of Errors of Connecticut set aside an order of the commission of that state requiring a street railway to relocate its track upon a certain street in the town of Stamford at a cost of about \$28,000 besides a further charge of about \$76,000 for paving the tracks when relocated. Testimony was offered as to the operating expenses and other financial details, and it was shown that the railway had operated its system at a loss for the last preceding fiscal year and that it was in debt to the state for taxes and was under duty to expend \$1,500,000 for paving improvements upon the order of other municipal authorities. In reaching the conclusion that the order should be set aside the court said:

"Under these circumstances, we think it ought to clearly appear that the public need is urgent before so serious a burden is imposed upon the public service corporation.

"In this case the order is in its nature confiscatory and must be held unreasonable until it clearly appears that the public welfare urgently requires this relocation of plaintiff's track.

"Looking at the public interest to serve so far as this record develops, and at the excessive expense entailed by the order, and at the serious financial condition which confronts the plaintiff, we can reach no conclusion other than that the order of relocation is an unreasonable one under the circumstances of this case."

The importance of considering the question of the expense of an improvement as compared with the supposed resulting benefit has also been pointed out by this Court in the case of *Chicago & N. W. R. Co. v. Ochs*, 249 U. S. 416, 63 L. Ed. 679. In that case the Court had occasion to consider whether a railroad company could be compelled to pay the expense of altering and extending a side-track leading from the main line to an adjacent plant.

The action of the Railroad Commission of the state of Minnesota in directing such construction was affirmed on the ground that under the law of the state such sidetrack was not merely a private siding, but was also for the use of the general public; and on the further ground that the new construction was reasonable because of the growth of the plant and its increase in shipments. Another point which the Court emphasized was that the cost was apportioned between the railroad and the owner of the plant. The estimated cost of the work in dispute was about \$2,300. The Court laid down the following principles:

"Of course, the expense is an important element to be considered in determining whether the requirement is within the bounds of reasonable regulation or is essentially arbitrary, but it is not the only one. The nature and volume of the business to be affected, the revenue to be derived from it, the character of the facility required, the need for it and the advantage to be realized by shippers and the public, are also to be considered. Tested by these criteria we think the order in question is not arbitrary, but reasonable."

The foregoing authorities show that the element of expense is an important one for consideration in determining the question whether an order of the public utility board violates the Due Process clause; if the expense is found to be unreasonable under the circumstances of the particular case that fact will usually suffice to demonstrate that the order is arbitrary. For example, in the *Ochs* case, *supra*, this Court said:

"Of course, the expense is an important element to be considered in determining whether the requirement is within the bounds of reasonable regulation or is essentially arbitrary."

Other decisions by this and other courts to the same effect, in addition to those hereinbefore cited, will be found at pages 124, 125. The point has been raised most frequently in cases involving the construction or relocation of sidetracks, but the same principle would apply to any order of a board or commission which involves substantial expense by the public utility. An illustration of the application of the principle to the relocation of a street railway track is found in the case of *Connecticut Co. v. Town of Stamford, supra*.

In *Chicago etc. Ry. Co. v. City of Minneapolis*, 238 Fed. 384, the same principle was applied by the U. S. District Court in Minnesota to a case involving the validity of an ordinance providing for the elimination of certain railroad grade crossings. The ordinance required the depression of the railroad tracks at a cost of over \$5,000,000 and suit was brought by the railroad company to restrain its enforcement. The ordinance was set aside on the ground, among others, that it required the depression of the tracks of a certain crossing at a cost of over \$1,000,000, whereas, under the evidence, the tracks might be elevated at that street at a cost of about \$400,000, including the expense of adjusting the plant of a certain industry to the new elevation. The court held that so far as that crossing was concerned, the ordinance was unnecessary, unreasonable and arbitrary to such an extent as to deprive the railroad company of property without due process of law, and that because the ordinance was invalid in that particular respect, the entire ordinance would be enjoined.

In the state courts counsel for defendants-in-error cited as their principal authority on this point the case of *Health Department of the City of New York v. Rector, etc., of Trinity Church*, 145 N. Y. 32; 27 L. R. A. 710;

39 N. E. 833. This case is strong authority for the plaintiff in error, as will appear from the following quotations from the opinion:

"If the expense to the individual under such circumstances would amount to a very large and unreasonable sum, that fact would be a most material one in deciding whether the method or means adopted for the attainment of the main object were or were not an unreasonable demand upon the individual for the benefit of the public. Of this, the courts must, within proper limits, be the judges."

• • • • •

"These exactions must be regarded as legal so long as they bear equally upon all members of the same class, and their cost does not exceed what may be termed one of the conditions on which individual property is held. It must not be an unreasonable exaction, either with reference to its nature or its cost."

In their brief in the state courts counsel for defendants-in-error criticized the foregoing argument as to financial conditions in certain respects and it may therefore be wise to anticipate such criticism.

Thus they pointed out an apparent discrepancy between certain statements which were offered in evidence by the plaintiff-in-error for the purpose of showing its operating revenue and operating income, saying that the figures for operating revenue as given in Exhibit R-1 do not correspond to the figures in Exhibit R-123. This difference is easily explained. The figures in Exhibit R. 1 were testified to by Mr. Sorensen, who said that they include "outside or auxiliary operation" (p. 179, ll. 1-20). The figures in Exhibit R-123 include only the Erie system proper, omitting certain auxiliary companies, the stock whereof is owned by the Erie Railroad, but which are separately operated. This is made clear

by the testimony of Mr. Crawford, who, in referring to Exhibit R-113 (the figures whereof are the same as the corresponding items for R-123) includes the Erie Railroad Company and a company known as the Chicago & Erie R. R., but does not include the New York, Susquehanna & Western R. R., Wilkesbarre & Eastern R. R., New Jersey & New York R. R., and the Bath & Hammondsport R. R. Company (pp. 636, 7). See Exhibit R-113, at pp. 1335-7, and Exhibit R-123, pp. 1349-50. This also explains the difference in the figures of operating income for the year 1913 as they are given in Exhibit R-1 as compared with the figures in Exhibit R-123.

Counsel also criticized the testimony showing the percentage of return on the property owned by the railroad company, saying that it assumes without proof that the property of the company is worth a certain amount. The valuations in question are based upon the figures of the reorganized company at the time of the formation of the present Erie Company in 1895, plus the amounts expended from year to year for additions and betterments. It is true that there has been no "physical valuation" of the company, if by that is meant an estimate by experts of the present value of each specific item of property. But the figures upon which the return was estimated have been recognized as substantially accurate in all of the company's operations, in the issuing of stocks and bonds, in the presentation of evidence before the Interstate Commerce Commission and other commissions for the purpose of determining reasonable rates. There was no attempt on the part of the city to prove that the total valuation or any part thereof was inaccurate.

Counsel also criticized the evidence as to the percentage of return. This criticism results from con-

founding bondholders with stockholders. The real owners of the company are the stockholders; the bondholders are merely creditors. The "return" of an investment in any particular business is the amount which the real owners thereof receive when the books are balanced at the end of the year. If an individual or a company borrows money for the purpose of carrying on a business and is able to earn from the business only enough to pay interest on the money borrowed he would not claim that there was any "return" from that business. If a company earns only enough to pay interest on its bonds, it is of very little value as a going concern, and under such circumstances there is in fact no "return" at all. Even if it were true, as may be asserted by counsel, that in the year 1913 the "capital stock" earned very nearly 3 per cent., that would still be less than half of what this Court has said is a reasonable return. But, of course, the truth of the fact of the matter is that the "capital stock" did not earn "nearly 3 per cent."; it in fact earned only the percentage which is stated on Exhibit R-1. The fallacy of defendants in error's argument on this point may be illustrated by supposing the case of a company with a very small capital stock, say \$1,000 and with a very large bonded indebtedness, say \$1,000,000. According to this argument, if that company earned enough to pay interest on its bonded indebtedness (say at 5 per cent.) then it would be receiving a "return" of \$50,000 on a capital stock of \$1,000. That would be at the rate of 5,000 per cent. on its capital stock, although as a matter of fact the stockholders in such case would not receive a single penny.

Counsel also argued that the net income for the year 1913 was greater than the sum of \$5,112,707, as appears

under the item "Net Income from Railroad Operating Investments" in Exhibit R-1 at p. 933; and that in fact for that year plaintiff in error had "other income," and in that connection they call attention to Exhibit R-113, which shows a net income of \$8,105,675.23. The difference in these figures is accounted for in the same way as the difference between the total operating revenue. The smaller figure is the net income (after paying interest) for the entire system, including the four auxiliary companies above named, which are separately operated, while the latter figure is limited to the Erie Railroad and the Chicago & Erie Railroad only.

Counsel also said that the "greatest stress" is laid upon the result of operations during the year 1914. What other year would counsel have the company select? The petition was not filed until late in the year 1913; the plaintiff in error had nothing to do with filing it, and if the city was unwise enough to attempt to compel this enormous expenditure at a time when the finances of the company were not able to bear it, that fact does not change the financial conditions. The evidence of the company covered its latest operations up to the time of the conclusion of the hearing. The board of directors of the company cannot anticipate the result of future operations, and in considering a work of this magnitude they must of necessity recognize existing conditions, and are not justified in discounting the future.

Counsel also said that even in the bad conditions of 1914 the company made additions and betterments to its property and equipment, aggregating \$14,475,703.33. This is true, but only a small part of this expenditure was made from *income* received during that year; the same exhibit (R-123) shows that during the same year the total amount of equipment trusts created that year

was the sum of \$6,233,948.94 (see p. 1359). This is included in the \$14,475,703.33.

Exhibit R-123 also shows that various notes and securities were issued during the year ending June 30, 1914. See pages 1360-1365. Exhibit R-115 shows some of the equipment trusts above mentioned, and also shows that in April, 1912, "collateral notes" were issued maturing in April, 1915, to the amount of \$10,000,000. A large portion of the proceeds of these notes were used for additions and betterments (see pp. 659, 660). It does not appear just how much of the proceeds of these notes was spent for additions and betterments for the year 1915, but the annual report (Exhibit R-123) shows that during that year the amount appropriated from *income* was the sum of only \$502,742.77 (p. 1357).

Counsel also said that it "may be" there should be some deductions from the item of "other income" in Exhibit R-112 (p. 1336). The evidence shows that a large proportion of this item is in the form of dividends from Pennsylvania Coal Company, and of course there must be deducted the interest on the collateral bonds of that company as well as the appropriations made to the sinking fund for the purpose of paying off those bonds.

In their argument, counsel for defendants assumed that the income should *all* be used for additions and betterments, overlooking entirely the claims of patient stockholders. But even if this assumption is correct, the city is demanding, and the Board of Public Utility Commissioners has ordered, that the company must disregard the requirements of all the other parts of its system between New York and Chicago, aggregating nearly 2,300 miles, for the purpose of improving a short stretch of track of less than two miles in a single city—

and that, too, without regard to the requirements of other public authorities, and without consideration of the pressing needs for other improvements, and without reference to the constantly increasing exactions of both state and Federal laws and regulations, and without reference to the company's obligations to carry on its operations as an interstate carrier of freight and passengers.

Counsel also said that it seems to be the practice of the company to pay for improvements out of current cash and charge the same to capital account, thereby increasing the surplus until such time as the company is reimbursed from the sale of bonds. It is quite true that it has been the practice of the company to pay for improvements out of current cash—the reason for so doing being that it had no other source from which to pay for the improvements. The evidence shows that for several years past it has not been able to dispose of its bonds; therefore if the improvements were to be made at all they had to be paid for out of current income. The evidence further shows, however, that a considerable part of the improvements has been paid for out of the proceeds of notes which have been issued from time to time; and so far as equipment is concerned the cost of that has been met by the creation of equipment trusts. For details of these, see Exhibit Erie-15, pp. 2042-2246.

In discussing the evidence as to the financial condition of the plaintiff-in-error, the New Jersey Supreme Court said:

“It is further urged that if the court should hold the statute valid, still the order in the present case should be set aside for the reason that it is insisted the evidence shows without dispute, that the prosecutor (plaintiff-in-error) has not, and in all rea-

sonable probability will not, have sufficient funds for the purpose of meeting the cost of complying with the order. The determination of this question is one of fact, in the first instance, devolving upon the Board of Public Utility Commissioners. The board had before it the financial history of the Erie Railroad Company, its indebtedness, its income and many other details bearing upon the finances of the company, and from this evidence, the board found adversely to the prosecutor, the Erie Railroad Company. After a careful reading of the voluminous testimony on this point, we are unable to say that the board's determination is without sufficient facts to support its conclusion." Vol. V, p. 2279, l. 35 to p. 2280, l. 18.

In reaching this conclusion we submit that both the board and the reviewing court failed to observe that the testimony of the plaintiff-in-error on this point was in no way impeached or contradicted by the defendants-in-error—indeed, they offered no evidence whatever on the subject, although given full opportunity to do so. But even if there was any dispute in the evidence, or even if there was room for a fair difference of opinion as to the inferences to be drawn therefrom, this Court will nevertheless examine the testimony so far as may be necessary to determine the questions of law raised by the plaintiff-in-error. It is well settled by a series of recent decisions that in a case of this kind the court will examine the evidence, not for the purpose of deciding disputed questions of fact, if there is any such dispute, but for the purpose of determining whether what purports to be a finding upon questions of fact is so involved with and dependent upon questions of law as to be in substance and effect a decision of the latter.

Kansas City S. R. Co. v. C. H. Albers Commission Co., 223 U. S. 573, 56 L. Ed. 556;

Cedar Rapids Gas Light Co. v. Cedar Rapids, 223 U. S. 655, 56 L. Ed. 594;

Washington ex rel Oregon R. & N. Co. v. Fairchild, 224 U. S. 510, 56 L. Ed. 863;

Southern P. Co. v. Schuyler, 227 U. S. 601, 57 L. Ed. 662;

Norfolk & W. R. Co. v. Conley, 236 U. S. 605, 59 L. Ed. 745;

Grosbeck v. Duluth, etc., R. Co., 250 U. S. 607, 63 L. Ed. 1167.

We therefore submit that a consideration of the testimony as hereinbefore analyzed demonstrates that the plaintiff-in-error did not have sufficient funds or any means of procuring same for the purpose of meeting the cost of complying with the order under review, and for this reason the order was so unreasonable and arbitrary as to amount to a violation of the due process clause.

III.

The order was unreasonable and arbitrary and therefore violates the due process clause because the plaintiff-in-error was not given the alternative of reducing or eliminating the alleged danger to public safety and the alleged impairment to public travel by decreasing the number of train movements or by abandoning the railroad.

The question of whether or not the *statute* upon which the order is based is an unreasonable exercise of the police power is discussed under Chapter II. But, whatever may be the conclusion of the Court in respect to the statute, we submit that the order itself, in the form in which it was made by the Board of Public Utility

Commissioners, is an unreasonable exercise of the power which is attempted to be given to the board by the statute. Assuming that this Court will not review the conclusion of the board that all of the crossings in question are dangerous to public safety and that public travel thereon is impeded within the meaning of the statute upon which the order is based, the question still remains whether the board should have exercised its discretion by commanding the plaintiff in error to eliminate the crossings by changing the grades thereof.

Involved in this is the further question of whether the statute itself, in order to be sustained as a constitutional exercise of the police power, should not have some provision whereby the board might be empowered to decrease or eliminate the danger to public safety and the impediment to public travel by some means other than the alteration of the crossings themselves.

In the present case the plaintiff in error is required to spend an enormous sum without any compensating advantage in the way of increased receipts or decreased expenses; it is required to spend such sum in the improvement of properties belonging to other companies or individuals; and the sum thus expended nearly equals the total value of the very properties upon a *small part* of which the money must be spent.

Under such circumstances we submit that the board should have refused to make an order directing the elimination of the crossings (see Point II), or it should at least have given the plaintiff-in-error the alternative of decreasing or removing the danger and the impediment by reducing the number of train movements over the crossings; or if need be, by abandoning the operation of the railroad at and over such crossings; and if it be said that under the statute the board has no jurisdiction to permit such

an alternative, then we submit that the statute itself is invalid as an unreasonable exercise of the police power.

After the filing of the report wherein the board concluded that all of the crossings were dangerous to public safety and impeded public travel, the plaintiff in error filed a petition for a further hearing in which it asked that if the board concluded that an order must be made for the elimination of the grade crossings, that then the board give consideration to the question of whether the danger to public safety and the impediment to public travel could not be removed by reducing the number of train movements over the crossings or some of them, in accordance with the plans which the plaintiff in error professed itself willing to submit (p. 1772).

The board denied this petition without even offering the plaintiff in error an opportunity to be heard thereon, except to permit the same to be read before the board. It declined to permit any testimony to be offered on the plaintiff in error's prayer that the board consider reducing the number of train movements, saying:

"As to the reduction of train movements, the company was offered every opportunity to furnish such proof, if it had any, and did not avail itself of such opportunity. In addition, the offer on this score was so indefinite that it does not appear reasonable to delay the proceeding for the purpose." (See Report of board, filed April 20, 1915, Vol. IV, p. 1793.)

We submit that this ruling was arbitrary and unreasonable and that the plaintiff in error should at least have been given an opportunity to present evidence on this subject before the board denied the prayer of this petition. It may be conceded that the reduction of train movements was proposed only as a last resort, but the

plaintiff in error had no means of telling in advance of the board's report what the board's conclusions would be as to the necessity for the elimination of the crossings. But when the board's report was filed requiring the plaintiff in error to eliminate all the crossings at an expense of \$3,000,000 (exclusive of property damage), the question at once arose whether the alleged dangers and impediments could not be substantially reduced, or even entirely removed, by the comparatively simple and inexpensive expedient of reducing the train movements. It is obvious from the report of the board filed January 11, 1915, that in the board's opinion one of the important elements in the danger to public safety and the impediment to public travel was the number of train movements over the several crossings. It is obvious that such element of danger and impediment could be readily removed by decreasing, or, if necessary, abandoning train movements over the crossings. No previous opportunity to furnish such proof had been offered to the company for the reason that up to the time of the filing of the report of January 11, 1915, such question had not been raised by the city or the board either in the petition of the city for the elimination of the crossings or in any of the proceedings taken before the board on said petition.

As to the criticism of the board that the company's offer on this point was "indefinite," we submit that the petition for further hearing was amply sufficient to fairly present the matter to the board. Paragraph 12 thereof recites that the conclusions of the board (referring to the report of January 11, 1915) are predicated upon the finding that a large number of freight trains, passenger trains and drill engines pass daily over the crossings, thereby endangering public safety and impeding public

travel; and that inasmuch as the plaintiff in error could not assume the cost which would be imposed upon it by an order requiring it to eliminate the grade crossings, the plaintiff in error urged that "if the board concludes that under existing circumstances such an order must be made, an opportunity should be given to present plans whereby the number of train or engine movements or the manner of the same or both, over said crossings may be changed so as to remove the danger and impediment to public travel" (Vol. IV., p. 1782). What more could be said in such a petition? Is it necessary that detailed plans and schedules be presented in *the petition*? It would obviously be supererogatory on the part of plaintiff-in-error to undertake the preparation of such details until and unless the board first signified its willingness to give some consideration thereto.

On the same date that this petition for further hearing was denied, the board made the order which is now under review. Thereafter, the plaintiff in error, conceiving it to be its duty to its stockholders and creditors to exercise every possible means to avert the catastrophe threatened by such order, filed a petition for a rehearing, in which it sought to meet the criticism of the board that its previous petition was "indefinite." This petition was also denied, the report of the board thereon being dated July 9, 1915. The proceedings with respect thereto are the subject of a separate certiorari; the return to which is for convenience included in the record of the proceedings relative to the board's order of April 20, 1915. This is known as Case No. 2.

In this petition for rehearing the railroad submitted a detailed plan, with accompanying maps, wherein it proposed that the alleged dangers and impediments at

the crossings beginning at Market street and extending northerly to and including River street, be removed by the construction of a connection between the Erie Railroad Company and the tracks of the New York, Susquehanna & Western Railroad Company at Market street and Straight street, thereby entirely eliminating the Market street grade crossings of the Erie Railroad (and incidentally a grade crossing at Straight street of the N. Y. S. & W. R. R.) by elevating the tracks of the two railroads and slightly depressing the grade of the streets and by closing Ellison street. The plan further contemplated the abandonment of the existing Susquehanna station at Straight street and the consolidation thereof with the Market street station of the Erie Railroad, which latter station was to be raised and reconstructed. The plan involved the construction of a track connecting the Paterson City branch of the main line of the Susquehanna R. R. near the present Broadway, Paterson, station of that company and the construction of a connecting track between the Susquehanna Company and the Erie Company at Hawthorne.

By means of these connections it was proposed to have westbound Erie trains pass from the main line at Market street over the present Paterson City branch of the Susquehanna Company and the main line of the latter company returning to the tracks of the Erie Company at Hawthorne; and to have eastbound Erie trains pass from the tracks of the Erie Company at Hawthorne to the tracks of the Susquehanna Company and thence over the Paterson City branch to the main line of the Erie Company at Market street. It was also proposed to run trains from Jersey City to Market street via the Erie Company and to run them to Jersey City via the Susquehanna Company and *vice versa*, thus making a continuous direct forward movement.

As a part of the plan it was proposed to reduce the passenger train movements over the tracks of the Erie Company north of Market street to not more than seven per day—and even these could be removed if desired. The advantages of the proposed changes, from the standpoint of improvement in the passenger train service, were set forth in detail in the petition, and it was shown that by means of such operation the switching work at Market street and to the north thereof would be greatly decreased, certainly over 50 per cent. The proposed plan, it was shown, would also avoid any interference with private side tracks except two or three between Van Houten street and Market street. The plaintiff in error in the petition proffered itself as willing to undertake this construction and to make the necessary changes in the operation of its trains and to begin work thereunder not later than the date specified by the board in the order of April 20, 1915, and to complete the same within the time limited by said order for the completion of the section of the work therein designated as section "A" (Vol. IV, p. 1879 *et seq.*).

After the filing of this petition the board fixed a date for taking testimony thereon and the same was taken on June 28, 1915. The proposed plan was explained in detail to the board by the general manager of the plaintiff in error. The principal ground of objection that was suggested in argument was that the plan might make additional train movements over the tracks of another company, to wit, N. Y. S. & W. R. R. Co., and thereby increase the danger at certain grade crossings on the line of that company. Another objection was that the connection between the Erie and the Susquehanna tracks near the Broadway station of the Susquehanna Company would create another grade crossing at

the street known as Broadway. It is quite true that the number of train movements on the Susquehanna would be increased—indeed, it is difficult to figure out any scheme by which train service can be improved without increasing the number of train movements, but it was admitted that the existing crossings on the line of the Susquehanna Company did not have as much traffic as the crossings on the line of the Erie Company which it was sought to have eliminated. There was also another objection to the closing of the existing crossing at Ellison street, but this was not very seriously pressed. At this hearing the city, by its counsel, went so far as to say that it was willing to agree with the company to adopt this plan, provided the proposed crossings at Ellison place, Eighteenth street and Broadway could be eliminated (p. 1919).

Whether or not the city would be willing to agree to such a plan is beside the point, because of course it was the duty of the board to pass on the merits of such a proposition without regard to whether it pleased or displeased the interested parties.

Certain arguments against this plan were urged in the state courts by counsel for defendants and it is proper to anticipate such arguments. Thus counsel asserted that the board had no authority to order any plan which simply "reduced" the danger or the impediment to public travel. This overlooks the fact that the petition for rehearing did not propose to reduce but to *remove* the danger (Vol. IV., p. 1881, l. 18).

It was further argued that the plan submitted by the company for the diversion of certain trains to the Susquehanna railroad only transferred the danger from one set of crossings to another. This is hardly a fair criticism of the plan, in view of the fact that the plan

proposed to eliminate the crossing at Market street, where admittedly the railroad and the highway traffic is the heaviest. It would also eliminate an existing grade crossing at Straight street on the line of the Susquehanna railroad. The plan also contemplated the closing of Ellison street, and, therefore, the elimination of the existing grade crossing at that point.

Counsel for the city also criticized this plan because they said it would materially reduce the train service over all crossings west of Market street. That is true—indeed, that is one of the principal *advantages* of the plan. But such reduction of train service west of Market street would not impair the train service for that part of the city, because the patrons of the railroad from that section of the city could board trains at the present Riverside station of the Susquehanna railroad, which is not very far from the present River street station of the plaintiff in error (See Vol. IV., p. 1889, l. 2). Furthermore, the Riverside station would be relocated so far as necessary for the purpose of serving that territory (Vol. IV, p. 1890, l. 1).

Counsel also criticised this plan because it would increase the number of train movements over existing grade crossings on the line of the Susquehanna railroad. That is true, but counsel fail to suggest how it is possible to give better train service without increasing the number of train movements. However that may be, the crossings in that part of the city, through which the Susquehanna railroad passes, are not used as much as the crossings on the Erie line in question in the present proceeding (Vol. IV., p. 1913).

Counsel also claimed that "a serious objection" to the consideration of the plan was the fact that the Susquehanna railroad did not join in the petition nor appear

at the hearing thereof. But if the rehearing had been granted, then, of course, the Susquehanna could readily have been made a party and given an opportunity to be heard thereon.

We submit that the action of the board in denying the plaintiff in error's petition for rehearing was unreasonable and arbitrary. The plan proposed in this petition would successfully solve the problem of grade crossings at Market street and at all the other crossings north of said street, to and including River street; in addition, it would greatly improve the passenger train service at Paterson and would not interfere to any material extent with the existing side tracks. It would also enable the service to the side tracks located north of Market street to be greatly improved, as the switching could be done without the present interference by the movement of passenger trains. There was no testimony offered to contradict that given by the general manager of the company, but the board entirely disregarded this testimony and rejected the plan.

We submit that such action of the board was erroneous and that the plaintiff in error's application should have been granted, as it appeared by the undisputed testimony that it was feasible and practicable to remove the danger, if any, to public safety and the impediment, if any, to public travel at the several highway crossings by adopting the plan proposed by the plaintiff in error in its said petition in lieu of the plan required by the order under review.

Furthermore, under such conditions the plaintiff in error should at least be given the alternative of abandoning the railroad, and if the statute upon which the order is based does not give such option to the plaintiff in error then the statute itself is unreasonable and invalid.

While it is the general rule that where a railroad has been constructed and put in operation, the company has no right to abandon the enterprise or cease to operate, this rule does not go to the extent of requiring the continuance of operation in cases where such operation cannot be continued save at a loss, unless a statute expressly so provides. This was so ruled in the case of *Jack v. Williams*, 113 Fed. Rep. 823 (Cir. Ct. So. Car.), affirmed 145 Fed. 281. The opinion of the court below reviews the various cases on this subject and we quote therefrom as follows:

"A railroad is in a sense a public concern. To its construction and operation the action of the sovereign is needed. If a corporation is created, the franchise to be a corporation can be given only by the sovereign. Its franchise as a common carrier for hire of passengers and freight comes from the sovereign. Its right to exercise the right of eminent domain can come only from the sovereign. And, as its road is in a sense a highway, the sovereign grants that also. The consideration for these acts of the sovereign is the utility of the enterprise to the public. To be thus useful to the public, the road must be kept up in such a condition that life and property both must be made as safe as practicable. The rates of transportation of persons and freight must be reasonable. And the reasonable number of trains must be kept up, depending upon the circumstances surrounding the railway. Whilst thus serving the public, however, no corporation or private person is obliged to continue the service without a reasonable remuneration. No one can be compelled to serve the public for nothing. Private property of no kind, including railroad property, can be used for public purposes without compensation. *Smyth v. Ames*, 169 U. S. 467, 18 Sup. Ct. 418, 42 L. Ed. 819; *Road Co. v. Sandford*, 164 U. S. 578, 17 Sup. Ct. 198, 41

L. Ed. 560; *Chicago, M. & St. P. R. Co. v. Minnesota*, 134 U. S. 418, 10 Sup. Ct. 462, 33 L. Ed. 970; *Railway Co. v. Smith*, 173 U. S. 684, 19 Sup. Ct. 565, 43 L. Ed. 858. All these cases determine that a railroad company, in the full enjoyment and use and capacity to use its franchises, cannot be compelled to exercise its franchises without reasonable remuneration. *A fortiori* a railroad corporation, or a person owning a railroad, cannot be compelled to operate that road, not only without remuneration, but at a loss. And this not by any means because such corporation or person is insolvent. If a citizen has the wealth of the Rothschilds, he cannot be compelled to use a dollar of his wealth for public purposes without compensation. What, then, is a person to do who becomes possessed of wholly unproductive railroad property? Sell it? But in the case at bar several distinct efforts to sell had been made, and made in vain. No bid whatever had been made except by these purchasers. The public—even that portion of the public on the line of the road—could not be induced to make a bid on it. Repair it and put it in condition? But experience had shown that even when it was a new road, requiring no expense for repairs, it barely paid operating expenses. Could the state or the public, in the face of the Fourteenth Amendment, compel such an expenditure, involving certain loss? Evidence has been introduced of persons who are of the opinion that the road would pay. Can such testimony override the result of actual experience? It appears also in evidence that, notwithstanding the existence of this road, dealers in cotton and farmers preferred to carry their cotton to market in wagons, rather than ship it by rail. The difference of cost must have been small. But, small as it was, the people about the road evidently estimate the general advantage of the road at a sum smaller. Under these circumstances, what other course could have been pur-

sued? The roadbed was in such a condition that it could not be operated. The expenses attending its repair held out no hope of remuneration. The purchasers had lost the privilege of incorporation and retention of the franchise. They owned the property. Was it to be kept idle and useless, or could they dismantle it?

This question is somewhat of novel impression at least, there is no decision exactly on all fours with it. The leading case on this subject is *Kansas v. Dodge City M. & T. R. Co.* (Kan.), 36 Pac., 755, 24 L. R. A., 564, and this clearly resembles the case at bar. In that case a mandamus was refused. This is the headnote:

'Where a railroad company owning a short line railroad, 26 miles only, is wholly insolvent, and such company has no cars or engines with which to operate it, and no funds or property to be applied to the payment of expenses of the company or the road, and the road has been abandoned for several months, and the road cannot be operated except at a great loss by any corporation or person, not taking into account the repairs of the road and the taxes thereon, the Supreme Court, having discretion in the granting of a writ of mandamus, will not compel by a peremptory writ the railway company to replace or put in repair its track, a part of which has been torn up, as such an order would be futile and of no public benefit.'

The facts of that case show that the road had been sold, and that a private person had bought it, and had sold to another person, who had removed the rails. Among other things the Court says:

'The order prayed for should only be issued in the interest of the public. If the track is replaced there is no reasonable probability that the road will be or can be operated. If a railway will not pay its mere operating expenses,

the public has very little interest in the operation of the road or in its being kept in repair.'

* * * The question is incidentally touched upon in *Railroad Co. v. Dustin*, 142 U. S. 499, 12 Sup. Ct., 285, 35 L. Ed., 1095, and there the Court says:

'If as in *Railroad Co. v. Hall*, 91 U. S. 343, 23 L. Ed. 428, the charter of a railroad corporation expressly required it to maintain its railroad as a continuous line, it may be compelled to do so by mandamus. So, if the charter requires the corporation to construct its road and to run its cars to a certain point on tide water (was held to be the case in *State v. Hartford & N. H. R. Co.*, 29 Conn. 538) and if it has so constructed its road and used it for years, it may be compelled to continue to do so. And mandamus will lie to compel a corporation to build a bridge in accordance with an express requirement of statute. *New Orleans, M. & T. R. Co. v. Mississippi*, 112 U. S. 12, 5 Sup. Ct. 19, 28 L. Ed. 619; *Peo. v. Boston & A. R. Co.*, 70 N. Y. 569. But if the charter of a railroad corporation simply authorizes the corporation, without requiring it, to construct and maintain a railroad to a certain point, it has been held that it cannot be compelled by mandamus to complete or maintain its road to that point, when it would not be remunerative. *Railway Co. v. The Queen*, 1 El. & Bl. 858; *Railway Co. v. Southern Minnesota R. Co.*, 18 Minn. 40 (Gil. 21). In *Sec. Com. v. Fitchburg R. Co.*, 12 Gray, 180, mandamus was refused to compel the running of passenger trains over a branch road on which this had been discontinued, after running them for a time, because they were unprofitable. The question is not as to the existence of the duty, but as to its extent and qualifications. The duty of a railroad company is not more than to meet the public wants. If trains run at reasonable

and moderate fares, and cannot be supported, it is because they are not needed.'

The text writer Morawetz also says:

'The duty of a railroad company to operate its road requires it merely to meet the public wants and exigencies. If there is not sufficient traffic over a particular line of road to pay for the expense of running trains, this is sufficient evidence that the public do not require it to be kept in operation. In such case the company may cease operating the road unless this be contrary to the express terms of the charter.' (Mor. Priv. Corp., Sec. 1119.)

This is sustained in *Ohio & M. R. Co. v. People* (Ill.), 11 N. E. 350.

In *Coe v. Columbus, P. & I. R. R.* (Ohio), 75 Am. Rep. 524, the Court says:

'If we are at liberty to suggest on what the legislature very probably relied for the continued operation of a railroad, once constructed, we should say it was the interest of the owners. If it can be operated profitably, the interest of those concerned will rarely, if ever, fail to keep it in operation so as to subserve the public use. If it cannot, we know of no mode by which the state can compel those by whom it was constructed to operate it at a loss, and certainly there is no mode provided by which it can be operated at the risk of the state.'

The same rule was adopted in the case of *State of Iowa v. Old Colony Trust Co.*, 215 Fed. 307, where the Circuit Court of Appeals for the 8th Circuit affirmed a decree directing the receiver of a certain railroad to abandon the same. The Court said:

'A railroad corporation is in an important sense a public corporation. It is dependent upon the public for its franchises to exist and carry on business, and in consideration of these franchises it assumes and must perform certain duties and

obligations for the benefit of the public. Among them, as a general rule, is the duty of maintaining its entire line of road in a reasonably safe and operative condition and for a fair consideration to carry passengers and freight over it at all reasonable times whenever requested to do so. These propositions are elemental and lay down a general rule which cannot be gainsaid or denied. But there are some conditions which necessarily excuse full compliance with the requirements of these rules, and in our opinion, the present case affords a striking example of such conditions. Here is a case where the line sought to be abandoned is not only not self-supporting, but its continued operation jeopardizes the successful operation of the entire system of which it is merely a part. Moreover, its continued operation in its present condition is dangerous to life and property and there is no money or financial ability to improve its condition. Not only so, but there is little public necessity for its continued operation, whereas, there is a great public necessity for the continued operation of the balance of the system."

In *Northern Pacific Ry. Co. v. Washington*, 143 U. S. 492, 35 L. Ed. 1092, this Court reversed a judgment of the Territory of Washington, ordering a railroad company to erect and maintain a certain station and to stop its trains there. In the course of its opinion the Court said:

"But if the charter of a railroad corporation simply authorized the corporation, without requiring it, to construct and maintain a railroad to a certain point, it has been held that it cannot be compelled by mandamus to complete or to maintain its road to that point when it would not be remunerative. *York & N. M. R. Co. v. Reg.* 1 El. & Bl. 858; *Great Western R. Co. v. Reg.* 1 El. & Bl. 874; *Com. v. Fitchburg R. Co.*, 12 Gray 180; *State v. Southern Minnesota R. Co.*, 18 Minn. 40."

Other cases to the same effect are:

Amesbury v. Citizens Electric Ry., 199 Mass., 394.

Sherwood v. Atlantic & D. R. Co., 94 Va. 291, 26 S. E. 943.

Re Strayhorn, Philadelphia & R. R. Co. v. Public Service Commission, 67 Pa. Super. Ct. 604.

Re Denver, Boulder & Western R. R. Co., P. N. Reports 1919 F, 9. (Opinion of Colorado P. N. Commission.)

Bellefonte Central R. R. v. Public Service Commission. P. U. Reports, 1919 F, 67. (Opinion of Pennsylvania Public Service Commission.)

In *Mississippi R. Commission v. Mobile & O. R. Co.*, 244 U. S. 388, 61 L. Ed. 1216, a decree of the U. S. District Court enjoining the enforcement of certain orders of the state commission was affirmed. It directed the railroad to restore to service certain passenger trains, the continued operation of which the evidence showed would have involved a substantial loss to the company. It was held that the orders were arbitrary and unreasonable, because they prevented the company from obtaining a fair return upon the property invested by it in the public service. We submit that the principle of this decision can be logically extended, and on a proper showing, should be extended to a case where it appears that the continued operation of a certain part of a railroad system will result in a heavy financial loss, or will prevent a company from realizing a proper return upon its investment; and that, therefore, the plaintiff in error, in the present case, should have been permitted to decrease the number of train movements or, if not, to abandon that part of the railroad where this enormous expense was ordered to be incurred.

An analogous case is *Chicago &c., R. Co. v. City of Minneapolis*, 238 Fed. 384, wherein the U. S. District Court in Minnesota enjoined the enforcement of an ordinance requiring the abolition of certain grade crossings. The ordinance applied to several separate and distinct crossings. As to one of them it was shown that the cost of complying with the ordinance was about \$600,000 more than the cost of eliminating the crossing by another plan that was proposed by the railroad. The court held that under this evidence, the ordinance, so far as that particular crossing was concerned, was "unnecessary, unreasonable and arbitrary" to such an extent as to deprive the railroad company of its property without due process of the law.

The claim that a railroad may not be compelled to continue the operation of trains at a financial loss is not met by the provisions of Section 86 of the General Railroad Act of 1903 of the state of New Jersey, which provides for the appointment of a receiver by the Chancellor if the company neglects to run daily trains on any part of its road for the space of ten days. Operation by such a receiver would not be operation by the company. In such a contingency, can it be supposed that the Chancellor would order the receiver to continue an unprofitable operation?

It may be urged that the Board of Public Utility Commissioners, under Section 17 of the act concerning public utilities (which provides that the board shall have power to require every public utility "to comply with the laws of this state . . . and to conform to the duties imposed upon it thereby or by the provisions of its own charter . . . to furnish safe, adequate and proper service and to keep and maintain its property and equipment in such condition as to

enable it to do so") could compel the continuance of operation, but it seems obvious that the board is not sufficiently omnipotent to compel a railroad company, or any other public utility, to continue business at a loss. Section 20 of the act concerning public utilities provides that no railroad shall abandon any railroad station without the approval of the board, but there is nothing therein which prohibits the abandonment of the railroad.

But if it should be concluded that the company has no legal power to abandon the railroad no matter how great the financial loss may be, it should at least be given the alternative of decreasing the alleged danger and impediment by decreasing the number of train movements, especially when it proposes a reasonable and practicable scheme therefor which would greatly improve the train service to and from Paterson and would result in a saving of at least half (and probably more) of the great burden imposed upon it by the order under review.

In discussing the foregoing argument the New Jersey Supreme Court said:

"Insofar as this reason challenges the discretion exercised by the board in making its order, we are not concerned with it in this part of our opinion."

In reaching this conclusion we respectfully submit that the court seems to have overlooked the claim of the plaintiff in error that even if the board did have "discretion" to make the order under review (as well as discretion to refuse to permit the removal of the alleged danger and impediment by decreasing the number of train movements, or if necessary by abandoning the railroad), such discretion was improperly exercised and that the ruling of the board on the subject was arbitrary and unreasonable.

The New Jersey Supreme Court also said (*italics ours*):

"The decrease in the number of train movements was a matter primarily under the control of the prosecutor, and hence required no statutory permission; if by such decrease the danger and congestion at the crossings were in fact eliminated or reduced to a negligible point that fact would doubtlessly be recognized by the board and dealt with accordingly. *It was for the prosecutor to make that fact appear* and its failure to do so involved no constitutional infirmity in the statute."

(Vol. IV, p. 2291, l. 35, to p. 2292, l. 2.)

What more could the plaintiff in error do to make the facts "appear" than was done when testimony was taken on the plaintiff in error's application for rehearing? As shown above, the plaintiff in error submitted detailed plans and maps, with a full explanation by its operating officials of the effect of the proposed changes. It is difficult to surmise what more the plaintiff in error could do, except possibly, to actually abandon that part of the railroad which passes over the crossings or to actually reduce the train movements at those points. Can it be said that it was necessary for the plaintiff in error to do either of these things before the board (or the court) was under any obligation to consider these proposed methods of eliminating the alleged danger and impediment? If train movements over these crossings were discontinued for a single day, the result in all probability would be an immediate application for a receivership under Sec. 86 of the General Railroad Law.

The plaintiff in error could not reasonably be required to do more than it actually did, namely, to show by testimony (which was *undisputed*) the probable effect of its proposals.

We submit that the refusal to permit the plaintiff in error to decrease or eliminate the "danger" and "impediment" in the manner proposed by it was arbitrary, unreasonably oppressive, and under the circumstances of this case was a violation of the due process clause.

IV.

In so far as the order requires the plaintiff in error to make certain changes in the properties of the Public Service Railway Company and in so far as it limits the proportion of the expense to be paid by the Street Railway Company to certain of the crossings to be eliminated, the order violates the due process clause for the reason that it takes the property of the plaintiff-in-error for the use of said Street Railway Company.

At three of the crossings involved in the proceeding, namely, (1) Park avenue and Market street, (2) Broadway, and (3) River and Putnam streets, the tracks of a street railway company known as Public Service Railway Company pass over the railroad tracks. The order under review, after reciting that the railway company uses these three crossings, continues as follows:

"The board, in accordance with the power and authority vested in it by said act, further orders the Public Service Railway Company to pay ten per centum of the expenses of the alterations, changes, relocating and opening required by this order, including damages to adjacent property, directly chargeable to the crossings and each of them, so used by the said street railway operated by it" (p. 1792, l. 10).

The order further directs that the plaintiff in error and the said railway company keep specific and complete

records of the expense directly chargeable to those crossings, and leave was given to apply to the board for further order in the event they could not agree upon the amount of such expenses. This part of the order was based upon section 2 of the statute of 1913, which provided that the entire expense be paid by the railroad unless a street railway uses the crossing, in which event the board may order not exceeding ten per centum of the expenses "directly chargeable to the crossing used by the street railway" to be paid by the company operating the same.

Another paragraph of the order directs that any telegraph * * * or other company or corporation, co-partnership or individual whose property or construction it may be necessary to change or remove, to change or remove the same according to the said plan. A further paragraph directs that the Public Service Railway Company (together with the plaintiff in error and certain other companies specifically named) "proceed with due diligence to the execution of this order" (p. 1791, ll. 1-18).

The plan shows that at the crossing of Market street and Park avenue a double line of trolley tracks approaches the railroad tracks from the southerly side of the right of way (Compass points according to railroad usage—Jersey City being east). A third track leads off from one of the trolley tracks at a point about 100 feet from the railroad tracks, and extends across the railroad tracks in a northerly direction, and thence as a single track through Market street, while the double line of trolley tracks, after crossing the railroad tracks, continues northerly as a double track along Park avenue. At the crossing of the railroad tracks there are three trolley tracks. The plan shows that the grade of Market

street on the southerly side is to be lowered, beginning at a point 90 feet from the present railroad tracks—the grade being one per cent.; on the northerly side of the railroad tracks the grades of Market street and Park avenue are lowered, beginning at a point about 200 feet northerly from the railroad tracks, on Market street, and at a point 250 feet northerly on Park avenue—the grade on Market street being 4 per cent. and on Park avenue 4.5 per cent.

At Broadway there is a double line of trolley tracks. The plan shows that the grade of the street is to be changed on the southerly side of the railroad tracks beginning at a point about 90 feet from the railroad tracks and passing thereunder on a 0.5 per cent. grade. On the northerly side the grade of street is to be changed beginning about 325 feet from railroad tracks, and passing under on a 5.0 per cent. grade.

At the crossing of River and Putnam streets there is a single line of trolley tracks passing over the railroad tracks at an acute angle. The plan and profile show that the grade of River street on the southerly side of the tracks is changed from the existing one and one-half per cent. grade to a level grade, beginning about 200 feet from nearest rail on present center line of street. On the northerly side of River street the grade is changed to a 5 per cent. grade, beginning at a point about 340 feet from the tracks. The plan calls for a change in the alignment of the trolley tracks as they pass over the crossing. By reason of these changes it will, of course, become necessary to reconstruct and relay the trolley tracks to correspond to the new grades. A summary of the necessary changes at these three crossings is given in Exhibit P. S. R. 1 (Vol. 2, pp. 1394-5), as follows:

1. Park avenue and Market street: Railroad tracks to be elevated 15 feet; street to be depressed 3 feet; total cost of changing trolley tracks (1895 feet) \$18,-816.12.

2. Broadway: Railroad tracks to be elevated the same as at Park avenue and Market street, and street to be depressed the same; total cost of changing trolley tracks (1379 feet), \$14,830.80.

3. River and Putnam streets: Railroad tracks to be elevated 14 feet; street depressed about 3 feet; total cost of changing trolley tracks (940 feet), \$8,659.

The details of these estimates are shown in Exhibit P. S. R. 2 (pp. 1403 to 1411). This exhibit shows that changes are required in the wires, rods, ballast, poles, feeders, derails and various other properties of the trolley company as specified in the estimate.

The order requires the Public Service Railway Company to pay 10 per cent. of the expense of the alterations required by the order which are "directly chargeable to the crossings and each of them *so used by the street railway operated by it*" (p. 1792, l. 10).

The objection to this part of the order is that it limits the expense of the cost of alterations to only three of fifteen crossings, notwithstanding the fact that, according to the conclusion reached by the state courts, it is necessary for all of the crossings to be considered in one general scheme of elimination. The order should have required the Public Service Railway Company to pay 10 per cent. of the entire cost; without such a direction, the plaintiff in error is required to spend more than a fair proportion at the other crossings. This objection does not involve the claims that in any event the limit of expenses so fixed by the statute is unreasonable and arbitrary, and that such limit impairs the

obligation of the contract between the plaintiff in error and the street railway company, as those matters will be discussed when we consider objections to the statute itself; but the present claim is that the effect of the order is to require the plaintiff in error to expend money at other crossings which are necessarily involved with the three crossings where the street railway company has tracks, and that, therefore, so far as relates to these other crossings, the plaintiff in error is required to spend its money for the benefit of the street railway company.

In the board's report of January 11, 1915, no reference was made to the percentum of expense to be paid by the trolley company. In its petition for further hearing presented after the filing of this report and before the making of the order under review, the plaintiff in error called attention to this omission and asked that a hearing be granted for the purpose of considering (*inter alia*):

“(e) Whether in any order made in this proceeding the Public Service Railway Company should not be chargeable with ten per cent. of the *total cost* of eliminating *all* of the crossings involved in said plan or scheme adopted by the board, in addition to all cost and expense legally chargeable to said Public Service Railway Company under section 4 of said statute.”

No hearing was given to the plaintiff in error on this point, but on the date of the making of the order under review the board filed a “report” denying this petition.

The order requires the railway to pay 10 per centum of the expenses “directly chargeable” to only three of the fifteen crossings ordered to be liminated; and yet in its report of January 11, 1915, the board said: “From the beginning to the conclusion of the hearings there was

no intimation from any one that a change at a particular crossing only should be considered. We will therefore deal with the proceeding as involving the adoption of one comprehensive plan or scheme covering all of the crossings" (Vol. 4, p. 1756).

If the board is correct in its conclusion that *all* of the crossings must be considered in any general plan for the elimination of any of them, then we submit that the trolley company should be chargeable with 10 per cent. of the entire cost rather than 10 per cent. of such part of the cost (to be ascertained by some method not suggested by the board nor by any party to this proceeding) as is directly chargeable to the three particular crossings. How is it possible to determine what proportion, if any, of the expense of eliminating the crossing, for example, at Ellison street, the next street north of Market street, is "chargeable" to the expense of eliminating Market street; and yet according to the board one crossing cannot be eliminated without at the same time eliminating the other. How is it possible to make similar determinations at the various other crossings, every one of which the board claims is involved in the elimination of the crossings at Market street, Broadway and River street. Where shall the dividing line be drawn? If it is not possible to draw any dividing line, then why should not the petitioner's request have been granted that the street railway company be ordered to pay 10 per cent. of the entire cost—at the very least the board should have given the plaintiff in error a hearing on this subject when its attention was called to the matter in the petition above mentioned. We submit that the refusal to grant such petition was arbitrary and unreasonable, and that the order of the board limiting the amount to be paid by the trolley company to

- * the expense directly chargeable to three crossings only, when according to the board's own report all of the crossings must be considered together, was equally arbitrary and unreasonable.

The case in this respect is somewhat similar to *Railroad and Warehouse Commission v. Litchfield, etc., Ry. Co.*, 108 N. E. 347, where an order of the commission, changing the terms under which the street railway was permitted to cross the tracks of a steam railroad, was set aside as unlawful and unreasonable on the ground that the order did not provide for a fair apportionment of the cost of protection.

In discussing this feature of the order, the New Jersey Supreme Court said (*italics ours*):

"The contention that the order is invalid in that it requires the prosecutor to do the physical work of removing and changing the property of the Public Service Railway Company is not well founded in fact. The order does not require the prosecutor to do that. It requires the Public Service Railway Company to change and remove such of its property and construction as is necessary to carry into effect the order, and further directs that both the prosecutor and the Public Service Railway Company keep specific and complete records of the expenses directly chargeable to the crossings, and each of them, so used by such street railway company. The order directs the Public Service Railway Company to pay 10 per centum of the expenses of the changes required by the order directly chargeable to the crossings used by it. This was the maximum amount allowed by the statute, and, of course, the prosecutor cannot complain that it was *so limited*" (p. 2283, ll. 10-30).

The obvious answer to this conclusion of the New Jersey Supreme Court is that, so far as affects the payment to be made by the trolley company, the order by

its terms as limited to the expenses "directly chargeable to the crossings, and each of them, so used by the said street railway company operated by it" (p. 1792, l. 15). The reference was to the three crossings, known as (1) Park avenue and Market street, (2) Broadway, and (3) River street. But, according to the views of the board and the opinion of the state courts, *all* of the crossings were properly considered in one proceeding because they were so related to one another that the consideration of the one "necessarily involved the consideration of the other" as a practical engineering problem (p. 2270, l. 30). If, therefore, all of the crossings are thus related one to the other, it follows that the percentage to be paid by the Public Service Railway Company should not be limited to three specific crossings, but should be a per centum of the entire cost.

The order in its present form by thus limiting the proportion of the expense to be paid by the Public Service Railway Company, necessarily imposes a greater burden of expense upon the plaintiff-in-error, and to the extent of such greater burden, takes the property of the plaintiff-in-error without compensation for the benefit of said street railway company.

V.

In so far as the order affects the side tracks indicated on the plan attached thereto, it impairs the obligation of the contracts between the plaintiff-in-error and the respective owners or lessees of said side tracks; if the order is construed to require the plaintiff-in-error to relocate or reconstruct said side tracks (either on or off its right of way), at its own expense, then it further operates to deprive the plaintiff-in-error of its property, without due process of law, while, on the other hand, if not so construed, it deprives the owners or lessees of said side tracks of their property, without due process of law.

By the statute of the state of New Jersey, by virtue of which the order under review was made by the Board of Public Utility Commissioners, the board is authorized, when certain conditions are found to exist, to order the company operating said railroad "to alter such crossing *according to plans* to be approved by said board." (See Section 1 of the statute, as quoted, *supra*, in "Preliminary Statement.")

Before the order of April 20th, 1915, was made, the board filed a report, dated January 11, 1915 (Vol. IV, p. 1748 *et seq.*). When the order was made, this report was included as a part thereof by reference (p. 1788, ll. 35-40). In this report, the board decided that the plan to be approved should be that generally outlined in Plan No. 2 of the city of Paterson, as modified in the respect hereinbefore referred to.

In discussing the plan submitted to the city, the report of the board says (*italics ours*):

"With Section D modified according to the Erie Railroad, no switch owners east of Newark Branch Junction would be affected, neither would the Newark Branch be affected. It appears, from

present plans, five industries would be left without any switch connections, and two industries would be moved to a new location with switching facilities equal to the ones they now enjoy. Alterations *will have to be made* in connections to 31 industries by Plan No. 1, and 26 by Plan No. 2, some apparently resulting advantageously and others not so much to their advantage; and 20 on Plan No. 1 and 25 on Plan No. 2 will have no change in their present accommodations. At present one has no siding" (p. 1764, ll. 20-38).

The board apparently intended to have somebody make the changes in the side tracks, indicated on what is described in their report as "Plan No. 2," as their report shows that the cost of this work is included in the board's report as a part of the total cost of the work of eliminating the crossings. (See city's estimate and details of same, Exhibit P. 55, Vol. II, pp. 919-931; railroad estimate of same items, Exhibits R. 101 and R. 102, Vol. IV, pp. 1305-1322; board's report as to cost, Vol. IV, p. 1765, ll. 5-15, and Schedules C and D attached to report, pp. 1770-1.)

When we examine the order, we find that it directs the plaintiff-in-error to alter the crossings "according to the plan therefor annexed to and made part hereof, entitled . . . and profile of same, also annexed to and made part hereof, entitled . . . which said plan and profile are hereby approved." The order further directs the plaintiff-in-error to alter the crossings "by reconstructing said railroad and highways and by performing all other work required according to and as shown on said plan and profile.

The order then proceeds as follows:

"Any telegraph, telephone, gas, electric, lighting, water, oil, pipe line or other company or corporation, co-partnership or individual whose property or construction it may be necessary to change or

remove to carry said plan and this order into effect shall change or remove the same, according to said plan.

"It is further ordered that the said Erie Railroad Company . . . and all other parties to this proceeding and each and every of them, proceed with due diligence to the execution of this order, and comply with all the requirements thereof and the duties imposed upon them thereby, and by the said act under which this order is made, and the laws of this state."

By reference to the plan annexed to the order, it will be seen that numerous changes are indicated in the switches and side tracks and the leads by which the same are connected with the main line tracks. Some of these are indicated as destroyed in whole or in part, and others are relocated and reconstructed. (See reproduction of the plan, at pp. 51 to 56 in Vol. VI, with notations thereon in red, indicating changes in sidings, etc.)

The plaintiff-in-error, in the discussion of the case before the state courts, assumed that the changes in the switches, side tracks and leads were to be made by it, as indicated on the plan which was expressly made a part of the order, and argued that that part of the order was invalid for the reason that the necessary effect thereof was to take its property for private use; or for public use, without compensation, in violation of the due process clause of the Fourteenth Amendment. But the opinion of the Supreme Court of the State of New Jersey (afterwards adopted by the Court of Errors and Appeals), notwithstanding the plain language in the order, held that the railroad was not required to make changes in the private sidings. The Supreme Court said:

"Point VIII (of the brief filed in said court) is that the order of the board is invalid in so

far as it requires the prosecutor to make changes in switches, side tracks, leads, bridges, yards, structures and other facilities and property of the prosecutor and of other companies, co-partnerships or individuals.

We think in this respect the order properly interpreted is justified by the statute properly construed. The statute authorizes the board, in a proper case, to order the railroad to alter grade crossings according to plans to be approved by the board, by substituting therefor crossings not at grade, either by carrying the highway under or over the railroad, or by reconstructing the railroad under or over the highway, or by vacating, relocating or changing the lines, width, direction or location of the highway and the opening of a new highway in the place of the one vacated, and this includes the power to order such changes in the property and facilities of the railroad company as are fairly incidental to, or rendered necessary by, the alteration of the crossings" (quoting from the order).

"It, therefore, appears, we think, that the order is confined in its direction to the company to the alteration of the crossings in question by changing the highways and by reconstructing the railroad and by performing such work as is required thereby. It does not require the railroad company to make changes in private sidings, and the like, not its property, and not within the limits of its right of way. The closing words of the order 'and by performing all other work required according to and as shown on said plan and profile' do not affect this conclusion as to the scope of the order. These general words follow specific provisions of the order and under an elementary rule of construction are limited thereby. Further, they refer back to the introductory general mandate of the order requiring the company to 'alter said crossings and each of them' and are limited thereby.

Neither does the order require the owners of such private sidings to reconstruct them. The plan which accompanies the order simply *suggests* to such owners a method by which their property may be conformed to the new conditions so as to admit of a continuance of the siding facilities theretofore enjoyed. The order only requires others than the railroad company to make such changes in, and removals of their property and constructions as are necessary to carry the order and plan into effect. In this it accords with Section 4 of the statute. Since the mandate of the order to the railroad company is limited to requiring the changing of highways and reconstruction of the railroad, the changes in, or removal of, such private sidings cannot be said to be necessary to carry the order to the railroad into effect. Of course, the plan does indicate a way in which, in part, existing siding facilities may be continued after the ordered changes in the highways and the ordered reconstruction of the railroad are made. It is appropriate that it should do so, for in the adoption of a plan, the effect thereof on existing industrial facilities should be taken into account, and this factor should also be taken into consideration in determining whether the plan adopted is reasonable or unreasonable.

As we have pointed out, in so far as the order directs the prosecutor to make changes in its own side tracks, and the like, it was within the power conferred by the statute if such changes were fairly incidental to the changes of grade of the main line tracks. We think that such ordered changes were of that character" (Vol. V, p. 2280).

Referring specifically to the changes indicated on the plan with reference to the buildings of Fuller's Express Company and Morris & Co. the court said:

"Point X (of the brief filed therein) is that the order is invalid in so far as it requires the prose-

cutor to construct structures upon its lands for the use of Fuller's Express Company and Morris & Co., in substitution for the structures now occupied by them as lessees and which will be rendered useless by the elimination work.

It is true that the plan adopted by the board has indicated upon it suggested possible locations upon the lands of the railroad company of substituted structures for these private companies, but it does not require the *railroad company* to provide such locations or to erect such structures, since neither the existing structures nor the suggested structures constitute *any part of the railroad*. This matter is sufficiently discussed under Point VIII" (Vol. V, p. 2285).

The details of the changes in the side tracks, leads and switches, as indicated on the plan attached to the order, are given in Reason 72 (Vol. IV, p. 1847 *et seq.*) and are repeated in Assignment of Error No. 34 (Vol. V, p. 2381). If these changes are required to be done by the plaintiff-in-error, at its own expense, the result would be a clear violation of the Fourteenth Amendment, by depriving the plaintiff-in-error of its property without due process of law.

Fanning v. Osborn, 102 N. Y. 441;

Swift v. Delaware, etc. R. R. Co., 66 N. J. Eq. 34.

It will be observed that the opinion of the Supreme Court of New Jersey does not refer specifically to the changes in the sidings outside of the right of way of the plaintiff-in-error; if the plaintiff-in-error could not be constitutionally required to make such changes on its right of way, *a fortiori*, the changes could not be required off the right of way; and we assume that it will be argued and perhaps conceded, by the defendants-in-error, that the order under review, as construed by the state courts,

does not require the plaintiff-in-error to make these changes—whether they be on or off the right of way; and, if that be the proper construction of the order, then, of course, the plaintiff-in-error is not in a position to complain that its constitutional rights have been infringed in this respect. But another and very important question still remains, and that is whether the constitutional rights of the siding owners (or such of them as are complaining thereof) have been violated by the cutting off of their side tracks, without compensation, and without provision for the reconstruction thereof. Of course, this is a matter which does not directly concern this plaintiff-in-error, and it will be dealt with by counsel for such owners as have raised the point by appropriate proceedings in the state courts and by writ of error to this Court.

Assuming that the order, as construed by the state courts, does not require the reconstruction of the said side tracks or leads, the further question still remains—whether the order impairs the contracts between the plaintiff-in-error and the several siding owners, within the meaning of the Contract Clause of the Constitution. Such an order is a “law” of the state within the meaning of the Constitution. *Grand Trunk Ry. Co. v. Railroad Commission of Indiana*, 221 U. S. 400, 55 L. Ed. 786.

Probably the most striking examples of impairment of contracts are those between the plaintiff-in-error and Fuller’s Express Company and Morris & Co., respectively. The effect of the order upon the property of Fuller’s Express Company was described by the general manager (pp. 426 to 433). The lease of that company is printed in full at page 2018, Vol. IV (Erie 10). The effect of the order upon the property of Morris & Co. was described by the local manager (pp. 364 to 369). The lease is printed at page 2026, Vol. IV. (Erie 11).

According to the plan and profile attached to the order, the present buildings and facilities of these two companies are to be destroyed, and new buildings and facilities are to be provided for each of them in other parts of the city. At the present time, the building used by the express company is located on the westerly side of the railroad tracks and extends southerly from near the southerly side of Ellison street. There is a sidetrack leading to this building which is used by the express company for its business. According to the plan of the board a new building is to be constructed for the use of the express company at a point indicated on the plan on the southerly side of Market street and on the westerly side of the tracks. This new building is to be substantially in the present location of the Market street station, and will occupy land the title to which is in the Paterson & Hudson River R. R. See Map, Exhibit R-16, Sheet No. 8.

At the present time the building used by Morris & Company is located on the northerly side of Market street and the westerly side of the tracks; it is practically in the location which the plan orders for the construction of the *new* Market street station. The proposed new location for Morris & Company, as shown on sheet No. 3 of the plan, is on the easterly side of Railroad avenue between Greene street and Slater street on a plot of ground nearly 100 feet distant from the right of way. This is on property of the plaintiff-in-error, on which there are located at the present time several sidetracks and leads which form part of plaintiff-in-error's main freight yard in the city of Paterson.

The cost of the construction of the new building and facilities for the express company is the sum of \$12,000, and for Morris & Company is the sum of \$40,000. (Testimony of Mr. Bramheld, p. 1956; Ex. Erie 18, p. 2247.)

The general manager of the express company said that the business of his company was to handle express and fast freight between New York and Jersey City, Paterson and Passaic. The building which is now used is leased from the Erie Company. Between 20 and 25 carloads are received each day. There is a side track about 300 feet long between the main-line tracks and the express building; the building itself is about 200 feet long and 15 or 20 feet wide (p. 426). The land and building are owned by the railroad and are leased to the express company (see Ex. Erie 10, p. 2018). The lease provides that in case the railroad shall deem it necessary or convenient to provide the express company with facilities at points in Paterson or Jersey City other than those assigned to that service by the terms of the lease, the railroad may assign other locations suitable for handling the traffic of the express company, and the express company agrees, at its own expense, to vacate the premises theretofore assigned and to transfer its business to such other place as may be so assigned.

The lease further provides that if the railroad, at the request of the express company, shall place or deliver cars at any other points than the freight house at Jersey City and Paterson, assigned to the express company business in accordance with the lease, then the express company is to pay the railroad company a switching charge for such service in addition to the other payments. The express company agrees to pay to the railroad an amount equal to 30 per cent. of the gross revenue, which amount shall not in any event be less than \$35,000 per annum.

The lease was made for a period of one year from January 24, 1908, and thereafter until terminated by

either party giving to the other one year's notice of intention to cancel the same.

The building occupied by Morris & Company is on the property of and is owned by the plaintiff-in-error. Morris & Company, however, rebuilt the inside of the building and constructed a new platform and storage room (p. 368, ll. 10-15).

The business of this company in Paterson amounts to \$1,500,000 a year (p. 565, l. 20).

The agreement between the railroad and this company is dated May 14, 1910, and leases certain lands and a part of a building of the railroad located on the northerly side of Market street for the term of one year from February 1, 1910, and thereafter until terminated on sixty days' notice by either party. (Ex. Erie 11, p. 2026.)

The lease provides for a payment of \$1,000 per year as rent. The lessee agrees to keep the buildings in as good condition and repair as at the beginning of the lease and to put on such additions and repairs as it itself may require.

There has been no request to the railroad company on the part of either of these companies to change the location of the sidetracks and switch connections now used by them, and there has been no complaint that the present facilities are inadequate or improper; on the contrary, both of these companies appeared in this proceeding and objected most strenuously to the proposed changes so far as it affected them (see pp. 364-368; 426-433; 564-568).

The proposed site for the express company is already in use by the plaintiff-in-error or for its Market street station, and the proposed site of Morris

& Company is already in use as part of a freight yard. Hence both of the locations which the board assumes to be desirable for these two companies are already devoted to other public uses and the railroad company cannot be compelled to devote them to any other use, whether public or private. *New York, etc., R. R. Co. v. Paterson*, 61 N. J. L., 408.

Moreover, some of the land on the proposed new locations was conveyed or condemned for railroad purposes only; and if no longer used for such purposes, would of course revert to the original grantors or their successors in interest. See, for example, deed from Society of Establishing Useful Manufactures to Paterson & Ramapo R. R. Co., Vol. II., pp. 1037-8; deed from Colt to Paterson & Ramapo R. R. Co., p. 1041; condemnation of Paterson & Ramapo R. R. v. Cooke, p. 1043.

So far as concerns the proposed site for the express company the title thereto is not in the plaintiff-in-error, but in the Paterson & Hudson River R. R.; and even if the plaintiff-in-error could be compelled to devote its own land to the use required by this part of the order it is difficult to see on what theory it could be required to devote to that purpose land, the title to which is in another company and in which the plaintiff-in-error has only a leasehold interest. The order does not direct the Paterson & Hudson River R. R. to devote this part of its property to the use of the express company; and it may well be that if the Market street station is abandoned, the Paterson & Hudson River R. R. (or the plaintiff-in-error, if it has the right so to do under the terms of the lease with that company), might desire to use that land for some other purpose.

It is obvious that the proposed location for Morris & Co. in the centre of a freight yard is not as desirable as

its present location near Market street—which is in the centre of the city. No provision is made for access to the new location nor for the construction of side tracks or any of the other facilities that such company would require in order to continue to handle its business.

According to the plan attached to the order the new building for Fuller's Express Company is about 250 feet long and about 20 feet wide. The new building for Morris & Company is to be about 150 feet long by about 40 feet wide. On what theory does the board assume that the dimensions of these buildings are suitable for the purposes of their respective business? If they are not large enough, these two companies might reasonably complain; and if they are too large, the plaintiff-in-error might reasonably complain because it is obliged to construct buildings larger than are necessary for the purposes for which they are to be used.

It will be seen that under the order, the existing contracts between the plaintiff-in-error and Fuller's Express Company are cancelled without the notice provided therein, and the plaintiff-in-error is thereby deprived of the benefit of the payment of the rents provided for therein, without any compensating advantage, by reason thereof—indeed, the order does even more than this, because it compels the plaintiff in error to devote some of its own property to the private use and benefit of these two companies, notwithstanding the fact that there is no provision in either contract which can possibly be construed to require such action on the part of the railroad company.

So far as Fuller's Express Company is concerned, there is a further objection that this company in its contract specifically agreed that if any other location was required where it should carry on its business, then that company, *at its own expense*, would vacate the

leased premises and transfer its business to such other place (p. 2020, l. 15).

Furthermore, the order requires the permanent devotion of certain of the property of the plaintiff in error to the use of the Express Company and of Morris & Co., respectively, and does not even provide for the termination of their supposed rights in said property of the plaintiff in error by notice (as is now permitted by their respective leases), or otherwise. The direct result, therefore, is notwithstanding the provision of these contracts, the plaintiff in error is compelled to turn over to the use of these two companies certain of its property which is now used for other purposes, and does not even provide for the payment of any rent for the use of said property of the plaintiff in error, nor does it otherwise fix any of the terms upon which these two companies are permitted to occupy the said property.

In addition to Fuller's Express Company and Morris & Co., the order requires the destruction of certain other side tracks, or at least deprives the same of any connection with the main line, and we claim that the order, therefore, impairs the obligation of the contracts between the plaintiff-in-error and the owners or lessees of said side tracks.

While the state in the exercise of the police power may in some cases impair the obligation of contracts this rule is subject to the qualification that the police power must be *reasonably* exercised, and to the further qualification that it must appear that the destruction of, or changes in, the property are *necessary* in order to the proper exercise of police power.

In the present case both of these elements are lacking: it is neither reasonable nor necessary that these side

tracks be destroyed or reconstructed for the purpose of eliminating grade crossings on the main line. Entirely aside from the question of whether the Board of Public Utility Commissioners under the statute of 1913 has any power to order any changes in the railroad property other than the main line tracks, the evidence in the present case shows that that part of the order which relates to side tracks is unreasonable and unnecessary; and it, therefore, follows that the Court can and should consider the question of whether that part of the order impairs the obligations of existing contracts.

The contracts between the plaintiff-in-error and the switch owners appear in the record as Exhibits R. 50 to R. 73, pp. 1117-1203; also Exhibits Erie 10 and 11, pp. 2018-2026. The side tracks and connections therewith of some of these switch owners are not affected by the proposed order, and they may, therefore, be left out of consideration. Those who are affected are as follows:

Commercial Lumber Company, Ex. R. 51 (p. 1121.)

The siding leading to this company is destroyed and another siding is constructed in a different location. The order also requires the construction of a bridge across Taylor street for the purpose of carrying the new siding.

The agreement shows that the railroad company and the switch owners are each part owners of this siding; a portion of the land whereon the siding is constructed being owned by the switch owner. The cost of the construction is to be paid by the switch owner. The switch owner also agrees to pay the railroad the cost of all labor and material used in *repairing or maintaining* the side track and extensions.

David G. Rodgers, Exhibit R. 52 (p. 1125).

This siding is destroyed and no provision is made for the reconstruction thereof. The agreement shows that

it is located in part on the property of the railroad, and in part on the property of the switch owner.

P. S. Van Kirk, Exhibit R. 53 (p. 1128).

The plan requires the destruction of this siding and the construction of a new one in a different location off the right-of-way of the railroad. Under the agreement the switch owner agrees to pay the cost of the construction of the siding, and also the cost of *repairing and maintaining* the same.

A. H. Smith, Exhibit R. 54 (p. 1132).

The order requires that the present siding be destroyed and that the new siding be constructed at a different location and grade. The agreement provides that the switch owner shall pay the cost of the construction, and also the cost of *repairing and maintaining*.

Armstrong's Sons Company, Exhibit R. 55 (p. 1135).

The present siding is destroyed and a new one constructed about 17 feet above the present grade. The order also requires the construction of a bridge across Montgomery street on which the siding is carried. The agreement provides that the switch owner shall pay the cost of the construction and of *repairing and maintaining*.

Public Service Gas Company, Exhibit R. 56 (p. 1139).

The order requires the total destruction of the two sidings and the construction of a new siding in a different location. The agreement provides that the switch owner pay the cost of the construction and of *repairing and maintaining*.

Swift & Company, Exhibit R. 58 (p. 1147).

The leads and connections by which this siding is reached are destroyed. The agreement provides that the switch owner construct at its own expense that portion

of the siding track outside of the right of way—the railroad to construct at its own expense that portion within its right-of-way. The switch owner agrees to pay the cost of *repairing and maintaining*.

Ashley & Bailey Co., Exhibit R. 59 (p. 1151).

The leads and connections by which this siding is reached are destroyed. Under the agreement the switch owner furnishes the right of way outside of the railroad property and pays the cost of construction and also the cost of *repairing and maintaining*. The switch owner also agrees to build and maintain a trestle under a portion of the side track.

National Silk Dyeing Co., Exhibit R. 60 (p. 1154).

The leads and connections are destroyed. Agreement with the switch owner has the usual provision that the switch owner will pay the cost of construction and of *repairing and maintaining*.

Hygeia Ice Co., Exhibit R. 68 (p. 1185).

The lead by which this siding is reached is destroyed and a new and longer lead is required to be constructed. Switch owner agrees to do all the grading and furnish certain material and pay for labor. The material remains the property of the railroad.

Auger & Simon Co., Exhibit R. 70 (p. 1192).

The leads and connections by which the siding is reached are destroyed. The agreement has the usual provision that the switch owner shall pay the cost of construction; the railroad company agrees to keep the siding in repair and the switch owner agrees to pay on demand the market value of the material and labor.

Swift & Company, Exhibit R. 58 (p. 1147).

The leads and connections by which this siding is reached are destroyed. The agreement provides that the

switch owner construct at its own expense that portion of the siding track outside of the right-of-way—the railroad to construct at its expense that portion within its right-of-way. The switch owner agrees to pay the cost of *repairing and maintaining*.

Ashley & Bailey Co., Exhibit R. 39 (p. 1151).

The leads and connections by which this siding is reached are destroyed. Under the agreement the switch owner furnishes the right of way outside of the railroad property and pays the cost of construction and also the cost of *repairing and maintaining*. The switch owner also agrees to build and maintain a trestle under a portion of the side track.

National Silk Dyeing Co., Exhibit R. 60 (p. 1154).

The leads and connections are destroyed. Agreement with the switch owner has the usual provision that the switch owner will pay the cost of construction and of *repairing and maintaining*.

Hygeia Ice Co., Exhibit R. 68 (p. 1185).

The lead by which this siding is reached is destroyed and a new and longer lead is required to be constructed. Switch owner agrees to do all the grading and furnish certain material and pay for labor. The material remains the property of the railroad.

Auger & Simon Co., Exhibit R. 70 (p. 1192).

The leads and connections by which the siding is reached are destroyed. The agreement has the usual provision that the switch owner shall pay the cost of construction; the railroad company agrees to keep the siding in repair and the switch owner agrees to pay on demand the market value of the material and labor.

Paterson Consolidated Ice Co., Exhibit R. 71 (p. 1195).

The lead by which the siding is reached is destroyed.

Agreement provides that the switch owner shall pay the cost of *repairing and maintaining*.

It will be seen that the order requires in some cases the destruction of the siding; in other cases it requires the railroad to rebuild same. Such a result clearly impairs the contracts between the plaintiff-in-error and the various switch owners; it deprives the plaintiff-in-error of the benefit of having the sidings remain in use (as well as takes its property without compensation) and it compels the plaintiff-in-error to build other sidings for the benefit of such switch owners contrary to the provisions of these agreements, which require the *switch owners* to "repair and maintain" the sidings, so that from either standpoint the rights of the plaintiff-in-error in these contracts are violated and impaired.

The case is not like that where there is a custom to construct and maintain side tracks for the benefit of industries that may adjoin the main line tracks. Here we have express written agreements. In this respect, the case is very different from that of *Armour v. N. Y. C. & R. Co.*, 103 Atl., 1031, which held that the company for whose use the side track had been constructed could not restrain its removal under a statute authorizing the elimination of the grade crossings across which the track had been located. It appeared that the side track was part of the railroad system and that the delivery service which it had performed by means thereof, could be performed by the use of another track at the new location of the main line and that, therefore, there was no discontinuance of the freight service of the company that had formerly used the side track in its original location. It also appeared that there was no contract between the company which used the side track and the railroad company.

The present case is more like that of *American Malleables Co. v. Bloomfield*, 83 N. J. L., 728; 85 Atl., 167. In that case the company owned the land upon which its plant was located, abutting on a certain street which ran between the railroad and the company's plant, and enjoyed the use of a switch or industrial siding from the main line of the railroad across the street at grade to its lands. The town of Bloomfield passed a resolution providing for an agreement with certain railroads to eliminate grade crossings under the provisions of a state law of New Jersey, providing for the elimination thereof by contract between the railroad and the municipality, this agreement being supplementary to one that had already been authorized by ordinance. The plan called for the elevation of the tracks and required the vacation of the street wherein the side track was located and the substitution of an elevated siding to leave the main line and thence to be carried on abutments to the lands of the company. The resolution was set aside on the ground that it affected the property rights of the company that had the use of the said track and that it had received no notice of the changes made by this resolution in the original contract for the elimination of grade crossings. The Court of Errors and Appeals of New Jersey said:

"To permit the blotting out of the rights of the prosecutor, in this summary way, would be equivalent to appropriating property without compensation and without due process of law."

The principle of this decision should apply not only to the owner of a private siding, but also to a railroad company, in a case where the evidence shows that the railroad is either the owner of or has a property right in the side track which is altered or destroyed by virtue of

an order providing for the elimination of grade crossings on the main line.

It will be urged by the defendants-in-error that even though the order does impair the several contracts above recited, nevertheless the order is valid if it is found to be a reasonable exercise of the police power. We do not question the general rule that in the *reasonable* exercise of the police power contracts may be impaired or even cancelled. As the question of whether the order is a reasonable exercise of such power involves the further question of whether the statute itself is a reasonable exercise of such power, we have discussed this point in the second part of the brief where we consider the validity of the statute as distinguished from the order. (See Point X.) If the Court reaches the conclusion that either the statute or the order is an unreasonable exercise of the police power, then the order, in so far as it affects the sidetracks indicated on the plan attached hereto and hereinbefore described, is invalid for the reason that under the undisputed testimony the necessary effect of the order is to impair the obligation of the said contracts between the plaintiff-in-error and the several siding owners.

Furthermore, in dealing with the question of the effect of the order upon the sidetracks and the contract relations between the owners or lessees thereof and the plaintiff-in-error, the Court should also consider the point that if the order be construed to require the plaintiff-in-error to reconstruct or relocate the sidetracks in the manner indicated on the plan attached to and supposed to be a part of the order, then it obviously takes the property of the plaintiff-in-error for private use; or for public use, without compensation, and thereby violates the rights secured to the plaintiff-in-error under the Fourteenth Amendment. If, however, the order does not require the plain-

tiff-in-error to do this work (and, presumably, the construction of the state courts in that regard will be adopted by this Court), then the practical result is that either the siding owners themselves must relocate or reconstruct their respective sidetracks, or nobody will reconstruct them; and in either event, the said owners or lessees are deprived of *their* property in violation of such amendment.

CHAPTER TWO.

Objections to the Statute.

VI.

The statute, as construed by the state courts, violates the Fourteenth Amendment: (a) Because it takes the property of the plaintiff-in-error as the lessee of the Paterson & Hudson River Railroad Co. and of The Paterson & Ramapo Railroad Co., for the private use and benefit of said two companies; (b) Because the cost of complying with the order will greatly exceed the value of the interest of the plaintiff in error in the property of said two companies, without any compensating advantage to the plaintiff in error and will make its investment in said properties incapable of earning a fair and reasonable return upon the amount of its investment therein; (c) Because it deprives the plaintiff in error of the equal protection of the laws.

It is recited in the order that the several highways are each a public highway and that the said public highways and each of them "and the railroad of the Erie Railroad Company cross each other at the same level, and that

* * * * the said Erie Railroad is operating such railroad" (Vol. IV, 1789, l. 15). It was claimed by the plaintiff-in-error at the hearings before the Board of Public Utility Commissioners, and afterwards in the argument before the state courts, that the railroad in question was not operated by it within the meaning of the statute upon which the order was based, and that the statute should be construed to apply to the companies which, *in law*, were charged with the duty of operating the railroads which crossed the several highways in question.

The plaintiff in error is not the owner of the tracks which cross the several highways. All it does is to run some of its freight and passenger trains on the tracks and across the highways, in accordance with the terms of the leases given to its predecessor by the Paterson & Hudson River R. R. Co. and the Paterson & Ramapo R. R. Co.

The land upon which the main line tracks are built and over which plaintiff in error runs trains through the city of Paterson is owned in part by one of said companies and in part by the other of said companies. The title to this land was acquired by them in part by deed and in part by condemnation proceedings, (See Exhibit R-15, pp. 1036-1056); and is still owned by them.

The portion of the right of way owned respectively by said companies is shown in detail on the property map known as Exhibit R-16, consisting of seven blue prints with the general title "Lands owned or controlled by the Erie Railroad Co., Main Line, city of Paterson, N. J.," the several sheets being numbered 5 to 11 inclusive.

Sheet No. 5 shows the right of way, beginning at the city line in the centre of Crooks avenue and extending northerly to Michigan avenue. This is owned by Paterson & Hudson River R. R. Co.

Sheet No. 6 shows the right of way from Michigan avenue northerly to Madison avenue. This is also owned by Paterson & Hudson River R. R. Co.

Sheet No. 7, from Madison avenue northerly to Clay street, shows the right of way is owned by Paterson & Hudson River R. R. Co., except that a short distance southerly from Clay street the title to a portion of the right of way (designated in red) is in Paterson & Ramapo R. R. Co. The title to the freight yard adjoining the right of way on the easterly side is in the Erie Land & Improvement Co.

Sheet No. 8, from Clay street northerly to Market street, shows that the title to one-half of the right of way is in Paterson & Hudson River R. R. Co. and the title to the other half is in Paterson & Ramapo R. R. Co. The Paterson & Hudson River R. R. Co. also has title to the Market street depot and various side tracks in the vicinity thereof. The plaintiff in error has title to certain lands adjoining the right of way on which are constructed various freight tracks and a freight house (designated in purple).

Sheet No. 9, from Market street northerly to Fulton street, shows title to the right of way is in Paterson & Ramapo R. R. Co. The plaintiff in error has title to a tract of land adjoining the right of way (designated in purple).

Sheet No. 10, from Fulton street northerly to Lowe street, shows title in Paterson & Ramapo R. R. Co. The plaintiff in error has title to some lands on either side of the right of way (designated in purple).

Sheet No. 11, from Lowe street northerly to the Passaic River (which marks the city limits) shows title in the Paterson & Ramapo R. R. Co. The plaintiff in error

has title to some lands on either side of the right of way (designated in purple).

This abstract of title and the property map were described in detail by the Assistant General Tax Agent of the plaintiff in error (Vol. I, pp. 244-8.) Beginning at the south they show that the title is as follows at the several streets involved in this proceeding:

Name of Street	Title in
"A"—Madison Avenue.....	Paterson & Hudson River
"B"—Clay & Straight streets	{ Paterson & Hudson River Paterson & Ramapo
"C"—Cedar streets.	{ Paterson & Hudson River Paterson & Ramapo, Erie R. R.
"D"—Market St. & Park Ave.....	Paterson & Ramapo
"E"—Ellison street.....	{ Paterson & Ramapo Erie R. R.
"F"—Van Houten street.....	Paterson & Ramapo
"G"—Broadway	"
"H"—Fair street.....	"
"I"—Hamilton avenue.....	"
"J"—Lafayette street.....	"
"K"—Franklin street.....	"
"L"—Keen street.....	"
"M"—Warren street.....	"
"N"—River & Putnam streets....	{ Paterson & Ramapo Erie R. R.

Exhibit R. 15 contains copies of the charters and other laws affecting the Paterson & Hudson River R. R. Co. and the Paterson & Ramapo R. R. Co.; also the leases, agreements, etc., by virtue of which the plaintiff in error now runs over the railroads of these two companies.

The Paterson & Hudson River R. R. Co. was organized by act of January 21, 1831 (P. L. 1831, p. 24). For copy of charter, see Volume II, pp. 958-971.

Under section 7 of this charter the company was authorized to survey, lay out and construct a railroad, or lateral roads, "not exceeding sixty-six feet wide, with as many sets of tracks and rails as they may deem necessary," from one or more suitable place or places in Paterson to Weehawken, and thence to any other suitable place or places on the Hudson River, opposite the city of New York.

Under section 10 the company was to place on the railroad "all machine, engines, wagons, carriages and vehicles for the transportation of persons, or any species of property thereon that they may think reasonable, expedient and right"; and was further authorized to demand and receive tolls for the transportation of persons and property at certain rates, not exceeding a specified sum per mile.

Under section 14, the railroad was declared to be a highway, "for the passage of any railroad carriage thereon, with passengers or property, upon payment of the tolls prescribed by this act."

The Paterson & Ramapo R. R. Co. was authorized by act of March 10th, 1841 (P. L. 1841, p. 97. For copy of charter see Vol. 2, pages 1005-1018). Under section 7 it was authorized to survey, lay out and construct a railroad from a suitable place in or near Paterson to some suitable point or points in or near the division line between the township of Franklin, in the county of Bergen, and the state of New York, and locate and form said railroad, not exceeding sixty-six feet in width, with as many sets of tracks and rails as they may deem necessary.

Under section 12, the company was given power to construct passages or bridges and to place on the railroad, machines, engines, wagons and carriages for the transportation of persons and property.

Under section 21 the company was authorized to demand and receive certain tolls for the transportation of persons and property, and under section 16 the railroad was declared free for the passage of any railroad carriage thereon with passengers or property, upon payment of the prescribed tolls.

Both railroads were also given power to condemn lands.

These two railroads, on September 9th, 1852, were leased to a company called "Union Railroad Company," the last named in turn assigning the lease to the New York & Erie Railroad Company, and thereafter by various assignments, foreclosures and sales, the plaintiff in error, under the name of Erie Railroad Company, on November 4, 1895, acquired title to all the properties, rights, etc., of its several predecessors, including the leases made in 1852 by the Paterson & Hudson River Railroad Co. and the Paterson & Ramapo R. R. Co. to the Union Railroad Company.

The New York & Erie Railroad Co. was a corporation organized in the year 1832 under the laws of the state of New York. The assignment of Union Railroad Co. to New York & Erie Railroad Co. was ratified by an act of legislature of the state of New Jersey approved March 14, 1853 (pp. 977-9).

This statute recites that the New York & Erie R. R. Co. is in possession of the Paterson & Hudson River R. R. Co. and the Paterson & Ramapo R. R. Co. under certain leases and contracts and is carrying on the busi-

ness of said roads under said leases and contracts, and that the New York & Erie R. R. Co. "being a foreign corporation," and any other corporation or individual using said roads or either of them, and transacting the business of the same, ought to be liable for damages done in operating said roads as fully as the said companies are by their charters now liable, and to effect "that purpose" all doubts as to authority of said companies to make such leases and contracts ought to be removed; and whereas all persons having claims ought to be enabled to prosecute said foreign corporation in the courts of this state: therefore,

Be it enacted, etc.

Then follows a section declaring the New York & Erie R. R. Co. and any other corporation or individuals using the aforesaid roads or either of them to be liable for all claims for debts, etc., arising from the running or operating of said railroads, and carrying freight and passengers on the same as fully as the said Paterson & Hudson River R. R. Co. and Paterson & Ramapo R. R. Co. are now liable by the laws of this state.

Sections II and III provide for the service and the return of process.

Section IV enacts as follows:

"That the power and authority of the said Paterson and Hudson River Railroad Company and the Paterson & Ramapo Railroad Company, to make such leases and contracts is hereby declared and affirmed, and the said leases and contracts are hereby declared legal and valid; provided, that said leases and contracts shall not be held to grant any power, privilege or right, not granted to said companies respectively by their charters, and the supplements thereto."

Section V enacts that the legislature may at any time alter, amend or repeal this act. (See pages 977-9.)

Each of the two charters of these companies above referred to requires the company to construct and keep in repair good and sufficient bridges or passages over and under the said railroad where any public or other road shall cross the same, etc.

It will be observed that the avowed purposes of the act of 1853 were: First, to make the New York & Erie R. R. Co. liable for claims for debts, etc., as fully as the two original companies; Second, to ratify the leases and contracts made by the two original companies to the New York & Erie R. R. Co. There is nothing in the statute which either expressly or impliedly relieves the original companies of their duty to the public imposed upon each of them by their respective charters.

It was urged by the plaintiff in error in the state courts, that the statutes under which it was authorized to run trains over these tracks, do not expressly provide that the lessor companies should be discharged from their public duties by reason of the leases, and that in the absence of any such express provisions, these duties still rest upon the respective lessors, citing:

Ryerson v. Morris Canal Company, 71 N. J. L. 381.

Hayes v. Northern Pacific Railroad Co., 74 Fed. Rep. 279.

Morris Canal Company v. State Board, 76 N. J. L. 627. Affirmed by this Court, 239 U. S. 126, 60 L. Ed. 177.

Rochester Railway Co. v. City of Rochester, 205 U. S. 236, 51 L. Ed. 784.

Braslin v. Somerville Railroad Co., 145 Mass. 64.

Driscoll v. Norwich, 65 Conn. 230.

Singleton v. Southwestern Railroad Co., 70 Ga. 464.

Balsy v. St. Louis Railroad Co., 119 Ill. 68.

Whitney v. Atlantic & St. Lawrence R. Co., 44 Me. 362.

Wabash, St. Louis & Pacific Railroad Co. v. Paton, 106 Ill. 534.

Central Railway v. Morris, 68 Texas 49.

Chollette v. Omaha & R. Valley Railroad Co., 26 Neb. 159.

Fisher v. Baltimore & O. C. O. R. Co., 3 Ohio N. P. 283.

The state courts overruled this point on the ground that the "dangerous conditions" were the result of the "operation" of the railroad by the plaintiff in error. (See opinion of Supreme Court, Vol. V, pages 2275-8.) The statute has, therefore, been construed to apply to the plaintiff in error as the *operator* of the railroad, and such construction having been adopted by the highest court in the state, will, we assume, be accepted by this Court.

Under this construction, the plaintiff in error now urges that the statute violates the due process clause of the Fourteenth Amendment because:

(a) It takes the property of the plaintiff in error for the private use and benefit of the two lessor companies; and

(b) Because the cost of complying with the order would greatly exceed the interest of the plaintiff in error in the property of said two companies and will make its investment therein incapable of earning a fair and reasonable return.

The charter of the Paterson & Hudson River Railroad Company has no limit for the period of the corporate existence of the company, but section 17 provides that at any time after the expiration of 50 years from the completion of the road the legislature may cause an appraisement to be made; and the value thereof is to be reported to the legislature in one year after the appointment of appraisers and thereupon "The state shall have the privilege for three years of taking said road upon the payment to the company of the amount of the said report within one year after electing to take said road . . . and the whole property and interest of said road, and the appendages thereof, shall be vested in the state of New Jersey upon payment of the amount so reported to the said company." It is further provided that it shall be the duty of the president of the company to lay before the legislature under oath on request a full and fair statement of the costs of the road and of the receipts and disbursements of the company, "provided always, that the aforesaid valuation shall be made without reference to the receipts or disbursements of the company, or advance of the stock, and the said valuation shall in no case exceed the *first* costs of the said railroad with the lands and appendages thereof" (pp. 969, 970).

A supplement to the charter passed February 27, 1835, repeals so much of the 17th section as authorized the legislature to cause an appraisement to be made at any time after the expiration of fifty years from the completion of said road; and enacts that the legislature may cause such appraisement to be made at any time after the expiration of fifty years from the 4th day of July, 1836 (pp. 973, 974).

An act approved February 21, 1856, authorized the New York & Erie Railroad Company to purchase and hold lands and to complete and finish the railroad of the Paterson & Hudson River Railroad Company. This gives the New York & Erie Railroad Company power to proceed in their own name to construct the railroad from any point in the railroad of the Paterson & Hudson River Railroad to any point on the Hudson river opposite the city of New York, according to the provisions of the act incorporating said Paterson & Hudson River Railroad and the several supplements thereto. Section 3 of this act provides that for the purpose of enabling the state to take the said railroad upon an appraisement of its value at any time after July 4, 1886, "the continuation of said railroad and its depots and appendages, constructed, purchased and acquired by virtue of the provisions of this act, shall be considered part of the road of the Paterson & Hudson River Railroad Company, and may and shall be taken by the state at the same time and in the same manner as the state may take the road of said company," except that the lands and appendages acquired or purchased by the New York & Erie Railroad Company shall be appraised separately from the residue and the value thereof paid to New York & Erie Railroad Company (p. 982).

The lease from the Paterson & Hudson River Railroad Company to the Union Railroad provides for a yearly rental of \$45,600. The lessee also agrees that they and their successors or assigns "will bear and pay to the state of New Jersey for taxes that may be laid by the authority of the said state on the parties of the first part or their property such amount of money annually as shall be equivalent to one-half of one per cent.

on the capital stock of six hundred thousand dollars of the parties of the first part."

The charter of the Paterson & Ramapo Railroad Company is also without limit as to the period of the corporate existence. Section 19 thereof has a provision similar to that in the charter of the Paterson & Hudson River Railroad Company providing that at any time after the expiration of fifty years from the completion of the road the legislature may cause an appraisement to be made, and the state shall then have the privilege for three years of taking the road upon payment of the amount of the report, and the whole property and interest shall then be vested in the state, "and the said valuation shall in no case exceed the first cost of the said railroad with the lands and appendages thereof" (pp. 1915-16).

By lease dated September 9, 1852, the Paterson & Hudson River Railroad Company leased all the railroad and appurtenances to Union Railroad Company, to have and to hold "from and including the fifteenth day of September, one thousand eight hundred and fifty-two, for and during the existence and continuance of the charter of the parties of the first part, and the legal existence of the said The President and Directors of the Paterson & Hudson River Railroad Company, by virtue and in pursuance of the act of incorporation of the legislature of the state of New Jersey, passed January 21, 1831, and all other acts of said legislature relating thereto" (p. 988). The parties of the second part agreed to keep and maintain the railroad in as good repair as it was at the date of the demise; and further agreed to keep and maintain and run the railroad and other premises in such manner, order and condition as the said parties of the

first part are bound to keep and maintain and run the same by the charter and supplements thereto (p. 992).

It was further agreed that if at the termination of the demise and on the "cessation of the interest of the parties of the second part" it should appear that there was any depreciation of the premises by the use or neglect thereof that the same should be appraised by three arbitrators and the value or amount of such depreciation should be paid and discharged by the parties of the second part. It was further agreed that if "any erections or improvements" should, during the said term, be made on the premises or pertaining thereto the same should at the termination of the term and the "cessation of the interest" of the parties of the second part be valued by arbitrators, and the party of the first part should pay and discharge the amount so valued to the parties of the second part or their assigns.

The Paterson & Ramapo Railroad Company also leased its railroad to the Union Railroad Company on September 9, 1852. The terms thereof were substantially the same as in the lease of the Paterson & Hudson River Railroad Company of the same date. The lessee agreed to pay a yearly rent of \$26,500; and further agreed "to bear and discharge all the taxes that may be imposed on them, the parties of the first part, or on their property and estate by the legislature of New Jersey, during the continuance of the demise or demises in this instrument made or agreed to be made." It was further agreed "that if during the existence of the lease or leases, made or to be made, to the parties of the second part, they the said last named parties shall make or construct any buildings or additions to the road herein mentioned, whereby additional taxes shall be charged or levied on

said road, then the parties of the second part shall bear and discharge the additional taxes" (p. 1030).

On September 10, 1852, these two leases were assigned by the Union Railroad Company to New York & Erie Railroad Company (p. 1031 and following). The assignment was from and including September 15, 1852, for and during the existence and continuance of the charter of the Union Railroad Company and the legal existence of said company (p. 1033). By sundry conveyances, foreclosures and assignments as set forth in detail in Exhibit R. 15, Abstract of Title—(p. 950 and following) all the rights, property and franchises of the above named companies on November 14, 1895, became vested in the plaintiff in error.

It will be seen from the forgoing summary of the various statutes and leases by virtue of which the plaintiff in error runs trains through Paterson over the tracks of the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company that the legal title to the railroad property over which these trains pass remains in the original companies. If the plaintiff in error, the assignee or successor in interest of the leases made to Union Railroad Company by the two original companies, is obliged to expend the sum of three million dollars and upwards in the improvement of the properties of said two companies, the question at once arises whether such a forced expenditure takes the property of the plaintiff in error for the private benefit of said two companies. These companies under their respective leases (which have been duly authorized or ratified by the legislature) may be relieved from the obligation of running trains during the term of the lease, but under the order they are also relieved from the

burden of altering the crossings or even from making any financial contribution for that purpose; they are not even included as joint obligees, although the plaintiff in error requested that if any order were made it be made against these two companies and the plaintiff in error jointly, so that the question of the apportionment of the cost of eliminating the crossings might be determined by appropriate proceedings. As the landlord of the plaintiff in error, and as the owner of the real estate upon which the improvements required by the order are to be made they may sit back and receive the full benefit thereof in the vastly increased value of their property without the expenditure of one penny.

Suppose that the existing leases should in some way be terminated. There are several references therein to the possible termination thereof, and hence such a contingency was evidently in the contemplation of the parties thereto at the time the leases were executed. To mention some of the ways in which the leases might be terminated; suppose the lessee refused to pay the rent thereunder, or suppose the lessee, either under some existing or future law, should obtain permission to abandon the running of its trains on the ground that the income derived therefrom was not sufficient to give it a reasonable return upon the amount of the investment required to be made by this order. Again, suppose the plaintiff in error refused to pay the taxes as required by the terms of the lease; under the provisions of sections 14 and 15 of the Railroad Tax Act of 1884, as amended in 1888 (Comp. Stat. of New Jersey, 1910, p. 5271, Secs. 458-9), where any tax remains unpaid for ten days, judgment for the amount thereof shall be entered in the Supreme Court after due notice and the attorney general must then apply for an order to issue execution to a master in chancery, and the

latter is required to sell the franchise, real estate, rolling stock and property of the company and the estate and interest of any mortgagees for the purpose of making the amount due on such judgment. Such a sale would effectively end the leases.

It is true that under one of the sections of the respective leases of the original railroads to the Union Railroad, there is a provision that if "any erections or improvements" shall be made during the term of the lease the same shall be valued by arbitrators and the railroad shall pay and discharge the amount so valued. It is at least doubtful whether this provision would apply to a change in the grade of the tracks resulting from the alteration of grade crossings, but whether so or not, it would be ridiculous to expect that either railroad would be financially able to pay to the plaintiff in error the amount expended on its property. If we assume that the expression "erections or improvements" in the two leases is applicable to the reconstruction of railroad grades, made under compulsion, pursuant to an order of the kind under review, the fact still remains that the theoretical right of the plaintiff in error to recover from the original companies on the termination of the leases is of little practical importance for the obvious reason that neither of the underlying companies has resources sufficient to meet the cost of the construction required by the order. Suppose that by operation of law or by some action on the part of the state, or on the part of either or both of the parties to the respective leases the term thereof should be terminated. Under the leases the plaintiff in error then looks to the original companies for reimbursement. But in such a case how would it be paid? The only income of the Paterson & Hudson River R. R. is the yearly rental of \$45,600 specified in the lease from that company to

Union Railroad Company (see Exhibit R. 15, p. 988). The only income of the Paterson & Ramapo R. R. is the yearly rental of \$26,500 specified in the lease from that company to Union Railroad Company (see Exhibit R. 15, p. 1026). It is quite obvious that an attempt on the part of the plaintiff in error to collect from the two original companies the cost of the work required by the order under review would bankrupt said companies; and hence the plaintiff in error has no practicable method of obtaining reimbursement from these companies, on the expiration of leases, for the amount required to be expended by it for the reconstruction of the tracks, even if under the terms of the leases it would be entitled to such reimbursement.

It is quite apparent that the improvements required to be made by the plaintiff in error would add immensely to the value of the property both of the Paterson & Hudson River Railroad and the Paterson & Ramapo Railroad without any advantage or return to the plaintiff in error. This is the taking of property from one person for the benefit of another on a gigantic scale.

But if it be claimed that under the statute as thus construed the plaintiff in error is required to make this vast expenditure for public use rather than for the private benefit of the two original companies, still the statute is objectionable because such construction takes the property of the plaintiff in error without just compensation. It will be seen by reference to the above charters and leases that the state of New Jersey has the right to take over the properties of both of the old companies -- in the case of the Paterson & Hudson River Railroad at any time after July 4, 1886, and in the case of the Paterson & Ramapo Railroad at any time after the expiration of fifty years from the completion of

the road—which time has long since elapsed. But both of these charters further provide that if the state takes over the property the valuation to be paid by the state shall in no case exceed the *first cost* of the railroad with the lands and appendages thereof. The state would therefore have the right to take over the properties of the two old companies with all the interest of the plaintiff in error therein without reimbursement to the plaintiff in error for the great sum required to be spent by it under this order. The statute therefore not only deprives the plaintiff in error of its property without *just* compensation, but deprives it without *any* compensation. If it be said that the plaintiff-in-error is entitled to receive the value of the “first cost,” the point still remains that the first cost of the entire railroad of each of the two original companies—in the one case extending from Paterson to the Hudson river and in the other from Paterson to Suffern—could not by any possibility equal the amount required to be spent by the plaintiff in error in Paterson; and the first cost in Paterson, as distinguished from the other sections of the railroad of the original companies would be comparatively small. This is shown by the fact that under the original charter of the Paterson & Hudson River Railroad the total capital stock was only \$250,000, with permission to increase the same to \$500,000 (pp. 988-9). By act of March 3, 1837, that company was given permission to increase its capital stock the further sum of \$200,000. There is no provision for a bond issue except under the act of January 18, 1844, which permits bonds to be issued in the sum of \$100,000. It is safe to say that the first cost did not exceed the total amount of the issue of bonds and stocks.

As to the Paterson & Ramapo Railroad Company the original charter provides for a capital stock of \$400,000

(p. 1066). By act of February 9, 1858, it was allowed to issue bonds in the sum of \$100,000. This act recites that the company has heretofore issued bonds amounting in the aggregate to \$100,000. The total bond and stock issue of this company therefore does not exceed \$600,000, and all the stock and all the bonds of both companies together covering *all* of their respective railroads amount to less than half of the amount required to be spent by the plaintiff in error. On this point the New Jersey Supreme Court says:

“Such permanent erections or improvements and the moneys thereon expended are not, therefore, taken for the private use of the lessors in the sense contemplated by the constitution; upon the contrary, such improvements are to be used and enjoyed by the lessee during its term, and if taken at all by the lessor are to be paid for at their value, which may be greatly in excess of their cost” (p. 2288, ll. 25-30).

This assumes that the lessors have the means whereby to pay the value of these improvements in the event of a termination of the respective leases. As shown above, such an assumption is without any foundation in fact, as the actual cost of doing the work required by the order under review not only exceeds the value of the property of the respective lessors in Paterson but nearly equals the *total* value of their property. (See Ex. R-17, p. 1056; Ex. R-18, p. 1057; R-19, p. 1059.) The argument might be sound if there was any reasonable relation whatever between the actual cost of the improvements and the ability of the original lessors to pay for same. But when the difference is so vast as to make it obvious that by no possibility could the lessors make such payment, then we submit the reasoning fails.

The facts bring this feature of the case within the principle of the decision of this Court in *Myles Salt Co. v. Board of Commissioners*, 239 U. S. 478, 60 L. Ed. 392, which held that a drainage statute which, as construed and administered by the state, imposed an assessment for drainage charges upon land which did not itself receive any actual benefit from the assessment, violated the due process clause in that the said statute took the property of one for the benefit of another and thereby imposed a burden without any compensating advantage. The Court said:

"The case, therefore, is within the limitation of the power of the state as laid down in *Houck v. Little River Drainage Dist.*, *supra*, which cites *Norwood v. Baker*, 172 U. S. 269, 43 L. Ed. 443, 19 Sup. Ct. Rep. 187, and retains its principle. It has not the features which determined *French v. Barber Asphalt Paving Co.*, 181 U. S. 324, 45 L. Ed. 879, 21 Sup. Ct. Rep. 625, and the cases which have followed that case, and *Phillip Wagner v. Leser* (239 U. S. 207, ante, 230, 36 Sup. Ct. Rep. 66), decided coincidentally with *Houck v. Little River Drainage Dist.* and cited in the latter.

"It is to be remembered that a drainage district has the special purpose of the improvement of particular property, and when it is so formed to include property which is not and cannot be benefited directly or indirectly, including it only that it may pay for the benefit to other property, there is an abuse of power and an act of confiscation. *Phillip Wagner v. Leser*, *supra*. We are not dealing with motives alone, but as well with their resultant action; we are not dealing with disputable grounds of discretion or disputable degrees of benefit, but with an exercise of power determined by considerations not of the improvement of plaintiff's property, but solely of the improvement of the property of others—power, therefore, arbi-

trarily exerted, imposing a burden without a compensating advantage of any kind."

Again, the statute violates the Fourteenth Amendment because the cost of complying with the order made by virtue thereof will greatly exceed the value of the interest of the plaintiff in error in the property of the Paterson and Hudson River Railroad Company and Paterson & Ramapo Railroad Company and will make its investment incapable of earning a fair and reasonable return upon such investment. The board in its report calls attention to the testimony offered by the plaintiff in error, that at the present time it expends \$14,736.87 for the wages of employees and \$2,101.59 for the cost of maintenance of the several grade crossings each year. (Vol. 4, p. 1754, ll. 1-10; Schedule "A" attached to board's report, pp. 1766-7); the board then says that this sum is the interest at five per cent. upon approximately \$350,000 (p. 1754, l. 8). Apparently the inference that the board desires to draw from this statement is that the elimination of the crossings amounts to a saving to the plaintiff in error of the sum of \$350,000. But the trouble with any such inference is that the plaintiff in error does not get the \$350,000; on the contrary, it is obliged to expend the sum of \$3,000,000 and upwards, which, at five per cent., amounts to the sum of \$150,000 a year, or nearly ten times the present annual cost of protecting and maintaining the crossings. This suggestion of the board also overlooks the fact that even if the grade crossings are eliminated there will be an annual charge against the railroad for repairs and maintenance of the bridges and abutments at the several crossings. There will also be an annual charge for the proper maintenance of the roadway and sidewalks within the limits of the right of way. These items will probably considerably exceed the sum

now expended for the wages of employes and for the maintenance of the several crossings at grade. There might be some force in this suggestion of the board if any compensating advantage would be obtained by the plaintiff in error in the way of increased income by reason of the changes of grade, but there is not a particle of evidence to suggest that there will be any such increase; on the contrary, the evidence indicates that there will probably be a very decided decrease in operating income due to the destruction of a large number of sidetracks and the consequent inability to handle freight to and from such sidetracks. A reconstruction of the kind required by the order is very different from original construction, and in the very nature of things, cannot be expected to result in any advantage to the plaintiff-in-error except the comparatively trifling saving of the cost of present protection and maintenance.

Not only is there no compensating advantage to the plaintiff in error by reason of the execution of this order but the great cost thereof so greatly exceeds the value of its interest in the Paterson & Hudson River Railroad and Paterson & Ramapo Railroad that it amounts to confiscation. The ordinary increased expenses, due to the necessity of providing protection at crossings as traffic increases, are incidental to the right of a railroad company to cross at grade; and we do not claim that the imposition of such expenses in any sense deprives the company of its property without due process or amounts to a confiscation of its property. But the present case is entirely different; according to the terms of the lease of the Paterson & Hudson River Railroad, the annual value of that lease is \$45,600 (p. 988), which at five per cent. would be \$930,000; the annual value of the lease of the Paterson & Ramapo Railroad is \$26,500 (p. 1026), which

at five per cent. would be \$530,000, or the two together would be \$1,460,000. But that represents the total value of both railroads and not merely the small portions thereof located within the limits of the crossings included in this proceeding. The cost to the plaintiff in error of carrying out this order, it will therefore be seen, is more than double the capitalized value of leases covering the entire railroads of the two original companies.

The assessed valuation of the properties of the Paterson & Hudson River Railroad, for the year 1912, between the city line and the terminus of that road near Market street, a distance of 1.978 miles, is \$593,290, of the Paterson & Ramapo Railroad from the northerly terminus of the Paterson & Hudson River Railroad near Market street to the city line, a distance of 1.647 miles, is \$495,474—a total of \$1,088,764—which is only a little more than one-third of the cost (without regard to property damage) to the plaintiff in error of complying with the order (See Ex. R-17, p. 1056). For convenience these valuations were taken within the city limits, although the particular portions of the property which are included within the limits of the crossings to be eliminated are somewhat less than the total length of the railroad lines as given in those valuations.

The *total* valuation of the "physical elements" in New Jersey of the Paterson & Hudson River Railroad, according to the affidavit of Mr. Hansel, the expert appointed to re-value railroad property in New Jersey under Chapter 307 of the Laws of 1910, is \$2,888,603 (Ex. R-18, p. 1057); and the total valuation of all the "physical elements" in the state of New Jersey of the Paterson & Ramapo Railroad, according to Mr. Hansel, is the sum of \$1,836,688 (Ex. R-19, p. 1059).

The assessed valuations by the State Board of Assessors for the year 1913 are slightly less than the figures of Mr. Hansel (See Ex. R-20, p. 1061). In this connection it is interesting to observe that the total capital stock and bonded indebtedness of the Paterson & Hudson River Railroad, as authorized by the legislature, is the sum of \$800,000 (See pp. 958, 959, 974, 976), and the total capital stock and bonded indebtedness of the Paterson & Hudson River Railroad is \$600,000 (See pp. 1006, 1025 and 1024). It will be seen that the cost to the plaintiff in error is approximately two-thirds the total value of all the property of both of the two original companies; if we add to the estimated cost of doing the work (which is nearly \$3,000,000) the property damage, which, under the statute, the plaintiff in error is also required to pay, it is probable that the total amount thus imposed upon the plaintiff in error will equal, if not exceed, the total value of all the property of both companies in the entire state.

The case in this respect is the converse of the ordinary rate case, where the rate depends upon and is adjusted to the value of the property. In the present case the expenditure required of the plaintiff in error is so greatly in excess of any possible income that might be derived from an increase in the rates over that part of the plaintiff in error's line which is affected by the change of grade that the same principle should apply as in a case where it is attempted to reduce a rate below what would bring a fair return upon the investment. Here the result of the order is to increase the investment of the plaintiff in error to such an extent that it is impossible to derive any reasonable return therefrom.

Even if there was any possibility of obtaining a reasonable return upon the cost of this improvement, that would

not effect the injustice to which the plaintiff-in-error is subject, by virtue of the construction of the statute which was adopted by the state courts. As the plaintiff-in-error is not the *owner* of the land whereon this costly improvement is ordered to be made, it is not in a position to capitalize the cost thereof, as, obviously, it could not borrow the necessary money merely on the security of a leasehold interest; and, hence, if the work is done at all by the lessee company it must be paid for out of current earnings—if there should happen to be any available for that purpose.

The plaintiff in error further urges that the statute deprives it of the equal protection of the laws, in violation of the Fourteenth Amendment. As we have above pointed out, the plaintiff-in-error argued in the state courts that the *legal* duty of operating trains over the railroad tracks in the city of Paterson still remains in the two underlying companies, notwithstanding the leases, by virtue of which the plaintiff in error runs trains over such tracks. But a different construction was adopted by the state courts, and the result thereof is that all sole expense is charged to the plaintiff in error, as the *operating* company, within the meaning of the statute, and the two underlying companies are not required to pay any part of such expense. The result, therefore, is that the real owners of the property pay nothing, and the plaintiff in error pays all—notwithstanding the fact that the improvement for which the plaintiff in error is obliged to pay does not result in any substantial advantage to it, but it merely enables it to continue to run trains on that part of its system. For all practical purposes the plaintiff in error can carry on its business in and through the city of Paterson under existing conditions, and without elevating its tracks as required by the order;

but the work undoubtedly adds very much to the value of the property, even though such value may not equal the actual cost thereof, considered purely from the standpoint of increased operating efficiency.

The plaintiff in error carries on its business in the state of New Jersey in accordance with the provisions of Chapter II, New Jersey Laws of 1898, page 23. Section 2 thereof reads as follows:

"After such approval and confirmation any railroad corporation duly created under the laws of the state in which the greater part of the mortgaged premises are situated and which shall have acquired or become possessed of the greater part of said mortgaged premises, may acquire, hold, possess, and operate the part of the mortgaged premises with their appurtenances, in this state, and the other property and rights covered by said mortgage, and shall have and possess all the rights, powers, privileges and franchises (subject to the duties and obligations attached thereto) theretofore possessed, in this state by the corporation executing the mortgage resulting in such judgment or decree of sale, and also all such as now or hereafter may be conferred upon railroad corporations organized under the general laws of this state."

Under this statute, the plaintiff in error has the same rights as any other railroad corporation doing business in the state of New Jersey. But, under the grade crossing statute, as construed by the state courts of New Jersey, the Paterson & Hudson River R. R. and the Paterson & Ramapo R. R. have the right to continue as railroad corporations, with the legal duty, *so far as the public is concerned*, of running trains, but are, nevertheless, not required to contribute one cent to an improvement which is designed to facilitate train operations. The *duty* to operate still rests upon the two underlying

companies; the mere fact that they have executed leases to some other company whereby the latter undertakes to perform that duty for them, does not relieve the original companies from their performance of such duty—it certainly does not have such effect in the absence of an express provision in the statute authorizing the lease, whereby the lessor company is *discharged* from such duty. All that the plaintiff in error does is to run trains as the *agent* of the original companies.

There is no valid reason for a distinction between a lessor and a lessee company which would reasonably justify the imposition of the entire cost of changes of grade upon the lessee company, without any contribution whatever from the lessor company; indeed, if any distinction is to be made between the lessor and lessee company it would seem that the cost should be imposed upon the lessor company, because it is the owner in fee of the property upon which the improvement is made, and, as such, would be in a position to capitalize the cost thereof and issue securities in payment therefor, whereas, the lessee company would be obliged to devote its current earnings to that purpose.

In the case of *New York & New England R. Co. v. Bristol*, 151 U. S. 556, 38 L. Ed. 269, the court held that a statute making certain provisions for the elimination of grade crossings did not deny the railroad the equal protection of the law, but this conclusion was based upon the premise that the statute in question made regulations which were "*applicable to all railroad corporations alike*"; and it may be observed that the statute in question in that case provided that the expense charged against the company was to be paid by the company "*owning or operating the road which crosses the highway.*"

The result, therefore, of the construction of the statute which has been adopted by the state courts of New Jersey is that the plaintiff in error is denied the equal protection of the laws of the state of New Jersey, in that it is compelled to pay an enormous sum in order that it may be in a position to continue to run its trains over that part of the leased lines which are located in the city of Paterson, whereas, neither of the owners of such lines is obliged to make any contribution whatever, notwithstanding the fact that such owners still owe to the public the duty of running such trains and still hold title to the land upon which the improvement is made.

VII.

The statute, as construed by the state courts, violates the contract clause of the constitution in that it impairs the obligation of the contracts between the plaintiff in error and the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company.

The relations between the plaintiff in error and the Paterson & Hudson River R. R. and the Paterson & Ramapo R. R. have been detailed at length under Point VI, wherein we attempted to show that the grade crossing statute of New Jersey violated the Fourteenth Amendment in certain respects.

We now make the further claim that the statute impairs the obligation of the contracts between the plaintiff in error and the Paterson & Hudson River R. R. and the Paterson & Ramapo R. R. in that the New Jersey statute having been construed to relieve the lessor company of the duty of constructing and maintaining highway crossings (notwithstanding the fact that the original charters of said companies expressly placed such duties upon

them) and to impose such duty upon the plaintiff in error as the operating company, the result is that the statute places upon the plaintiff in error more burdensome duties than the leases themselves require; because, such leases, when read in conjunction with the confirmatory act of 1853 (*supra*) still leave upon the respective lessor companies the duty of constructing crossings—whether they be at grade, above grade, or under grade.

Furthermore, under the terms of the leases, the plaintiff in error as the successor of the original lessee, is entitled to continue to use the railroad lines of the Paterson & Hudson River Railroad and the Paterson & Ramapo Railroad, in accordance with the terms of the original leases, to wit, by paying certain rental therefor. But, under the statute, the plaintiff in error cannot continue to have the benefits and advantages of the said leases without spending three million dollars or upwards for the improvement of the property of the two underlying companies, the real owners thereof. It is not necessary to this argument to hold that a railroad can postpone indefinitely the reasonable exercise of the police power with reference to the elimination of highway grade crossings, merely by leasing its property to some other company. That is not the point in question. We do not mean to assert that the state cannot exercise its police power in a reasonable way, but the difficulty with the statute under consideration (as construed by the state courts) is that it imposes upon the lessee company the expense of eliminating the crossings, whereas it should have imposed such expense upon the actual owners of the property. The necessary effect of such construction is to impair the obligation of the contracts as expressed in said leases.

VIII.

The statute, as construed by the state courts, violates the contract clause of the constitution, in that it impairs the obligation of the contracts between the State of New Jersey and the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company, to whose rights the plaintiff in error has succeeded, by imposing upon the plaintiff in error a greater duty, with respect to the construction and maintenance of grade crossings, than was imposed upon said two companies.

Under this point the plaintiff in error claims that the charter duties of the two lessor companies to whose rights it has succeeded, as set forth under Point VI, so far as they relate to the construction and maintenance of highway grade crossings, have been altered to its disadvantage as a result of the statute in question under the construction thereof adopted by the state courts.

The state has the right to reserve the power to alter or amend the charter of a corporation or to alter or amend or repeal the laws under which the corporation is organized. *Berea College v. Commonwealth*, 211 U. S. 45, 53 L. Ed. 81.

Where the right is reserved, either by the constitution or by statute, the provision of the law to this effect becomes automatically a part of the charter of corporations thereafter organized.

In re College Hill Land Association, 157 Cal. 596, 108 Pac. 681.

Shiloh Turnpike Co. v. Bates, 80 N. J. L. 171, 76 Atl. 448.

But this reserved right does not authorize the confiscation or destruction of property of corporations, or the taking of such property without compensation, and it

must be construed subject to the restrictions of the State and Federal constitutions forbidding the taking of property without due process of law.

State v Bancroft, 148 Wis. 124, 134 N. W. 330, 38 L. R. A. (N. S.) 526.

Berea College v. Commonwealth, 211 U. S. 45, 53 L. Ed. 81.

Grand Trunk Western R. Co. v. City of South Bend, 227 U. S. 544, 57 L. Ed. 633.

Chicago, etc., R. Ct. v. Wisconsin, 238 U. S. 491, 59 L. Ed. 1423, and cases cited.

The statute upon which the jurisdiction of the Board of Public Utilities depends is general in its terms and on its face applies to every crossing at grade of a public highway by a railroad. It is not limited to highways which existed at the time the railroad was constructed. Under this statute, if it be valid, the board has the power, and in the present case, it has, by its order attempted to exercise the power, to enlarge the duty imposed upon the plaintiff in error by virtue of its alleged succession to the statutory duty of its predecessors with respect to the construction and maintenance of bridges or passages over or under the railroad at the said crossings. The statute therefore delegates to the board arbitrary power to alter or amend such charters so far as relates to the specific duty thereby imposed with respect to the construction and maintenance of such bridges or passages.

In its original answer the plaintiff in error set up that "certain" of said crossings were laid out and constructed by the city of Paterson across the existing tracks and right of way of the Paterson & Hudson River R. R.

Co., incorporated by act approved January 21, 1831 (P. L. 1830-1, p. 24) and of the Paterson & Ramapo R. R. Co., incorporated by act approved March 10, 1841 (P. L. 1840-1, p. 97), subsequent to the construction and commencement of operation of said railroads and that as to these crossings the Board of Public Utility Commissioners was without jurisdiction to order the plaintiff in error to alter or change the grade thereof or to construct another crossing in the place and stead thereof not at grade (Par. 24 of Answer, Vol. IV., p. 1671).

After the filing of this answer the board, at the request of counsel for the city, directed the plaintiff in error to file an amendment specifying which crossings were constructed subsequent to the construction and the commencement of operation of said railroads (pp. 132-4).

If our present claim is correct, that the plaintiff in error, as the successor in interest of the two original railroad companies, cannot legally be required to construct bridges or passages over or under the railroad tracks at the crossings where the streets were not in existence at the time the tracks were constructed, then this action of the board, in requiring the plaintiff in error to specify to which of the crossings the point was applicable, was unreasonable, as the burden of proof was upon the city to show that the streets were laid out at the time of the original construction of the railroad tracks, and not upon the plaintiff in error to show that they were not laid out at that time.

However that may be, the plaintiff in error pursuant to this direction of the board filed an amendment to its answer in which it alleged that Madison avenue, Cedar street, Putnam street, Straight street and Clay street were all laid out and opened subsequent to the construction of the railroad tracks; and further alleged that it had no knowl-

edge as to whether the other streets involved in the proceedings were laid out and opened before or after the construction of the railroad tracks (Vol. IV, p. 1678).

As the evidence in the case developed after the filing of this amendment, it appeared that this point was applicable to all of the streets—as is hereinafter shown.

The order under review requires that at all of the crossings except Madison avenue the crossings be altered by carrying the streets *under* the railroad; and in the case of Madison avenue by carrying the street *over* the railroad, according to the plan and profile attached to the order. The result, therefore, is that at Madison avenue the railroad is required to construct an overhead highway bridge above the tracks; and at all the other streets the railroad is required to construct railroad bridges above the several streets—the present grades, both of the streets and of the tracks, being partially changed in order to permit the streets to pass under the tracks. In both cases the entire expense of the work is ordered to be paid by the railroad company, less 10 per cent. to be paid by the Public Service Railway Company at three of the crossings. We therefore have a situation where in the one case the plaintiff in error is required to pay the expense of carrying a public street over its tracks, and in the other cases it is required to pay the expense of carrying several streets under its tracks.

Under the well settled law of the state of New Jersey as expressed in the line of authorities hereinafter cited, we submit that such an order is invalid—at least with reference to the streets which were not laid out and opened before the time when the railroad tracks were constructed, and the statute itself, having been construed by the state courts as applicable to all crossings regardless of whether the streets were laid out and opened before or after the time of the railroad construction, impair the obligation

of the contracts expressed in the charters granted to the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company, for the reason that as thus construed the statute permits the board to enlarge the duty imposed upon such companies above that fixed by such charters by extending the duty, with reference to the construction or maintenance of overhead railroad bridges or highways, to include streets that were not laid out or opened until after the railroad tracks had been constructed.

In considering this point we will first refer to the charters of the original companies and will then cite the New Jersey decisions holding that the provisions in such charters relative to the construction or maintenance of highway crossings do not require the construction of crossings not at grade at streets laid out and opened *after* the construction of the railroad tracks.

The charter of the Paterson & Hudson River R. R. Co. provides in Section 9 as follows:

"It shall be the duty of the said company to construct and keep in repair, good and sufficient bridges or passages over and under the said railroad or roads, where any public or other road shall cross the same, so that the passage of carriages, horses and cattle, on the said road shall not be prevented thereby; and also where the said road shall intersect any farms or lands of any individual, to provide and keep in repair, suitable wagonways over or under said railroad, so that they may conveniently pass the same." (Exhibit R. 15, p. 966; Laws of 1831, p. 29.)

The charter of the Paterson & Ramapo R. R. provides in Section 11 as follows:

"It shall be the duty of the said company to construct and keep in repair, good and sufficient

bridges or passages over or under the said railroad, where any public or other road shall cross the same, so that the passage of carriages, horses and cattle on the said road shall not be prevented thereby, and where the road shall intersect any farm or lands, they shall provide and keep in repair suitable wagonways over or under the said railroad, so that persons may conveniently pass the same." (Exhibit R. 15, p. 1013, 14, Laws of 1841, p. 97.)

By virtue of the leases and statutes hereinbefore mentioned, the plaintiff-in-error has succeeded to the rights and duties of the two original companies. (See Exhibit R. 15, pp. 986-1005.) The railroad tracks were constructed and trains were running over some at least as early as the year 1835. (See testimony, Vol. I, pp. 325-335; Exhibit R. 43—Time table of trains between Paterson and New York—p. 326.)

The tracks of the New York & Erie Railroad Company (incorporated in the year 1832) were constructed previous to the year 1852 (see pp. 951-2).

Assuming for the purpose of the present discussion that the plaintiff-in-error is charged with the same duty as the two original companies relative to the construction and maintenance of "good and sufficient bridges or passages over and under the railroad," we now inquire what would be the duty of those companies under the charter provisions above quoted—and particularly with reference to crossings at highways which were laid out and opened after the construction of the railroad tracks.

On this point the New Jersey cases are clear. The most recent decision is that of the Court of Chancery in *West Jersey, etc., Railroad Company v. Woodbury*, 84 Atl. 1047, 80 N. J. Eq. 412, where that court had occasion to

construe a section of a railroad charter providing as follows:

"It shall be the duty of the said company to construct and keep in repair, good and sufficient bridges or passages over or under the said road where any public road shall intersect and cross the same, so that the passage of carriages, horses and cattle along the said road shall not be obstructed, and likewise when said railroad shall intersect any farm or lands of any individual, to provide and keep in repair suitable and convenient wagon ways over or under said road." P. L. 1853, p. 45.)

It was held that this section relates only to public roads which existed at the time the railroad was constructed. Leaming, *V. C.*, said:

"I am unable to reach the conclusion that this can be regarded in this court as an open question. In *Morris Canal & Banking Co. v. State*, 24 N. J. Law, 62, a somewhat similar provision contained in the charter act of the canal company was treated as a legislative provision contemplating a work about to be constructed, and imposing upon the company no duty in relation to highways laid out across the canal after it should be constructed. in the subsequent case of *Morris & Essex Railroad Co. v. Orange*, 63 N. J. Law, 252, 43 Atl. 730, 47 Atl. 363, it became necessary for the court to determine what compensation the railroad was entitled to receive as damages arising from laying out a highway across the railroad at grade. The charter act of that company contained a provision of almost exactly the same terms as the one here in question. Two justices construed the provision as including highways laid across the railroad at any time, and on that ground determined that substantial damages should not be allowed to the company except for injuries not usually incident to the mere crossing of the railroad by a highway.

With the provision there under consideration understood as imposing upon the company a statutory duty of maintenance of safe crossings where highways should thereafter be laid out across the railroad, it necessarily followed that no substantial compensation could be exacted by the company for expenses appropriately incident to such maintenance. The failure of the majority of the court to give recognition to the possible existence of such a statutory duty must, I think, be regarded as a repudiation of the views expressed to that effect in the minority opinion referred to. In a still later case before the same court (*Marino v. Central R. R. Co.*, 69 N. J. Law, 628, 56 Atl. 306), the latter part of a similar charter provision (that relating to intersected lands) was under consideration and was deemed to relate only to lands intersected by the railroad when the railroad right of way was acquired. With the charter provision above quoted, understood as contemplating only such public roads as were then in existence, the provisions of section 26 of the general railroad act of 1903 (P. L. 1903, p. 659), are also without application."

In *Delaware, etc., R. R. v. East Orange*, 41 N. J. L. 127, the Court said (*italics ours*):

"It is true that in the construction of their road the corporation could only be required to make such bridges, passages and crossings as were needed and suitable *at the time the railroad was built*, to accommodate the public in the use of highways *then existing*. The effect of this provision in their charter and in others, as applied to highways, is simply to enforce a common law obligation and guard against any nuisance by the company in the construction of their road. *Morris Canal and Banking Co. v. State*, 4 Zab. 62."

In *Morris & Essex Railroad v. Orange*, 63 N. J. L. 232, the charter provided:

"It shall be the duty of the said company to construct and keep in repair good and sufficient bridges or passages over or under the said railroad or roads, where any public or other road shall cross the same, so that the passage of carriages, horses and cattle on the said road shall not be impeded thereby, and also where the said road shall intersect any farm or lands of any individual, to provide and keep in repair suitable wagonways over or under said road, so that he may pass the same."

The Court of Errors and Appeals held that under this charter the company, when a new street was laid out over its tracks, was not entitled to receive an allowance for damages to cover the expenses incident to the erection and maintenance of gates and sign boards, but was entitled to nominal damages for the use of its property for a highway crossing and was entitled to "adequate compensation" for the damage caused by structural changes—such as the removal of buildings or alterations in the tracks. There were four separate opinions. Dixon, *J.*, wrote an opinion (in which Ludlow, *J.*, concurred) wherein he reached the conclusion that this charter included highways laid across the railroad at any time. But it is obvious that the majority of the members of the court did not agree with this view, as only one of the judges voted for affirmance on the grounds stated by Dixon, *J.* (See 63 N. J. L. 275.) Three of the judges affirmed on other grounds, one on still another ground, and eight on the grounds stated by Mr. Justice Depue in the "opinion of the court." The question of whether the charter included highways laid across the railroad after the original construction, was not dis-

cussed or decided, but it is evident that the majority of the court were not willing to agree with the view of Mr. Justice Dixon—that the charter did include such highways. At this point, we may anticipate the claim made in the state courts by counsel for defendants in error that the view of the Court of Chancery, as stated in the Woodbury case, was unsound and that the rule set forth by Dixon, J., in the case of *Morris & Essex Railroad v. Orange*, *supra*, should be sustained. In view of the fact that only one member of the Court of Errors and Appeals agreed with such view, it is evident that it cannot be claimed that any such construction of the charter provisions has been adopted by the highest court of the state of New Jersey. Counsel for defendants in error also claimed that the Court of Errors and Appeals approved this view of Dixon, J., in the subsequent decision in *Erie R. R. Co. v. Paterson*, 79 N. J. L. 512, but, in that case, the point we are considering was not involved at all. That was a case in which the present plaintiff in error brought proceedings to review an ordinance of the city of Paterson for the opening of a certain street, known as Paxton street, which involved the construction of an overhead bridge at the street when thus opened. The opinion does not state, but the record of the case shows that that particular street was not located on the line of either the Paterson & Hudson River R. R. or the Paterson & Ramapo R. R., but on the line of an entirely different railroad, known as the "Newark Branch." The question of the duty of the plaintiff in error to construct a bridge at the street in question in order to comply with the terms of the ordinance did not turn at all upon the construction of the railroad charter, nor upon the question of whether the railroad was built prior to the opening of the street. The decision was

that the effect of the ordinance was to impose an "additional servitude" on the lands of the plaintiff in error and that, therefore, it was entitled to a hearing before it could be subjected to such burden (79 N. J. L. at p. 514). The court then concluded that no such hearing had been given and that, therefore, the ordinance was invalid.

Other cases in New Jersey on this point should also be mentioned. The case of *Morris Canal & Banking Co. v. State*, 24 N. J. L. 62, was an indictment against the company for failure to keep in repair a certain canal bridge at a public highway. The highway was laid out and opened after the canal was constructed and in use.

The section of the canal charter in question (12) provides:

"When the canal shall cross any road or farm, it shall be the duty of the company, at their proper expense, to make good and sufficient bridges across said canal, and to keep the same in repair, so as to prevent any inconvenience in the usage of the said road or farms, by reason of the said canal crossing the same."

The Court of Errors and Appeals entered judgment for the company, saying (italics ours):

"It is certainly true, as was contended by the counsel of the state, that where a canal and highway intersect each other, it is grammatically and mathematically correct to speak of the canal crossing the road, or the road crossing the canal. In describing an existing state of things, either form of expression might be adopted with equal propriety. But at the passage of the act, the canal had no existence. The legislature were making provision for a work about to be constructed, and they declared that when the canal shall cross any public road or farm, that is when the canal shall be constructed across any public road or farm, it

shall be the duty of the company to build and repair bridges. Such is the plain and obvious import of the language. To construe it to mean, when the canal shall cross *any* public road, or when any public road shall *hereafter be laid out across* the canal, the company shall build and repair bridges, is giving a broader meaning to the requirements than the language fairly imports, and one which could not have been intended to apply to farms. It never could have been the design of the legislature to require that in all future time, whenever a land holder should choose to unite two tracts of land, lying on opposite sides of the canal, into one farm, the company should build and maintain a bridge for his accommodation. If the language of the act will not bear this construction in regard to farms, neither can it in regard to highways. The same construction must, of necessity, be adopted in regard to both."

In *Marino v. Central R. R. Co.*, 69 N. J. L., 628, the Court of Errors and Appeals of the state of New Jersey had under consideration the question of the construction of the charter provision of the Somerville & Easton Railroad Co. of February 26, 1847, relative to the construction of crossings. This provision was as follows:

"That it shall be the duty of the said company to construct and keep in repair good and sufficient bridges or passages over or under the said railroad or roads where any public or other road shall cross the same, so that the passage of carriages, horses and cattle on the said road shall not be impeded thereby, and also where the said road shall intersect any farm or lands of any individual to provide and keep in repair suitable wagonways over or under said road, so that he may pass the same."

Certain lands have the right of way and were acquired by condemnation. Thereafter a subsequent owner of

the land on one side of the right of way brought suit to recover damages because of the alleged failure of the railroad to carry out this charter duty. It was held that the owner of the intersecting land had a right of way which was appurtenant to each of his divided tracts but that such right was not transmitted to a grantee of the portion of the lands which lay on one side only of the tracts.

It will be seen that the provisions in the several charters involved in these cases are substantially the same as those in the charters of the Paterson & Hudson River R. R. and Paterson & Ramapo R. R.—with the single exception that instead of the word “impeded” as used in the Morris and Essex charter and the Central R. R. charter, and the word “obstructed” as used in the West Jersey charter, the provisions in the charters of Paterson & Hudson River R. R. and Paterson & Ramapo R. R. contain the word “prevented.” But the charters under consideration are all alike in that none of them requires the construction of bridges or passages “over and under” the railroad where the public streets *hereafter laid out* shall cross the same.

In the state courts counsel for defendants in error cited four cases from Minnesota and one from Indiana for the proposition that at common law there is a duty upon a railroad to maintain crossings in condition for safe and convenient use, and that this duty applies both to highways which were in existence when the railroad was laid out and to those which were constructed later. Some of the Minnesota cases sustain these propositions, but in the cases wherein the common law duty was considered it appears there was no question of statutory construction involved. (*State ex rel. City of St. Paul v. Minnesota Transfer Railway Co.*, 80 Minn. 108, 83 N. W.

32; *State ex rel. City of St. Paul v. Chicago, etc., Ry. Co.*, 122 Minn. 280, 142 N. W. 312; *State ex rel. Village of Clara City v. Great Northern Ry. Co.*, 153 N. W. 879.) But the rule, we submit, is different when the charter of a railroad or a general statute *specifies* the duty of the railroad with respect to highway crossings. The question for consideration then is, not what is the duty of the railroad at common law, but how shall the charter or the statute be construed?

Thus, we find that in another case cited by counsel for defendants in error, namely, *State ex rel. City of Minneapolis v. St. Paul, etc., Ry. Co.*, 98 Minn., 380, 108 N. W. 261, 28 L. R. A. (N. S.) 298 (affirmed 214 U. S. 497, 53 L. Ed. 1060), the question of the duty of the railroad to construct and maintain a bridge over the railroad tracks was referred, not to any common law obligation, but solely to the terms of the charter of the railroad company, which provided as follows:

“The said company shall have the right and authority to construct their said railroad and branches upon and along, across, under, or over any public or private highway, road, street, plank road or railroad, if the same shall be necessary; but the said company shall put such highway, road, street, plank road, or railroad in such condition and state of repair as not to impair or interfere with its free and proper use.”

It was held that this provision applied to streets laid out after the construction of the railroad. The Minnesota court included the state of New Jersey in a list of several states, the decisions of which the Minnesota court says sustain the proposition that the state may compel a railroad to construct and maintain crossings at streets extended over the right of way subsequent to the construction of the railroad. But no case in New Jersey is cited in support of this statement; and, as we have

shown, a contrary rule has been declared by the courts of New Jersey in the Woodbury and other cases cited, *supra*.

Another basis for a distinction between the Minnesota rule and the New Jersey rule is found in the fact that in the Minnesota cases cited *supra* the state courts put the incidental annoyances from the movement of railroad trains in the same class with private nuisances, whereas in New Jersey the state courts have held that when a railroad company is not only authorized by its charter to run railroad trains, but is required to do so, then whatever annoyance to private persons follows from the exercise of this duty is *damnum absque injuria*, and must be considered as in contemplation when the railroad charters were allowed by the legislature of the state.

Beseman v. Pennsylvania R. R., 50 N. J. L. 235, affirmed 52 N. J. L. 221;

State v. Erie R. R., 84 N. J. L. 661;

Pennsylvania R. R. v. Jersey City, 84 N. J. L. 716, 49 L. R. A. (N. S.) 715;

Jersey City v. Erie R. R., 84 N. J. L. 761;

Kelly v. Erie R. R., 86 N. J. L. 379;

Roman Catholic Church of St. Anthony v. Pennsylvania R. R., 237 U. S. 575, 59 L. Ed. 1119, 207 Fed. 897.

Counsel for defendants in error may cite the decisions of this Court in *Cincinnati etc. R. Co. v. Connersville*, 218 U. S. 336, 54 L. Ed. 1060; *Lake Shore etc. R. Co. v. Clough*, 242 U. S. 375, 61 L. Ed. 374; *Northern Pacific Ry. Co. v. Duluth*, 208 U. S. 583, 52 L. Ed. 630; *St. Paul etc. Ry. Co. v. Minnesota*, 214 U. S. 497, 53 L. Ed. 1060; and *Chicago etc. Ry. Co. v. Minneapolis*, 232 U. S. 430, 58 L. Ed. 671, in all of which a railroad company was required to pay the expenses of the construction of bridges, even though the

highway was opened subsequent to the construction of the railroad tracks. The first two cases came to this Court from the state of Indiana. It was pointed out in the opinion in the *Clough* case that the courts of that state had held that the duty to construct overhead crossings was applicable not only to the original construction of a railroad across highways then in existence, but also where the highways are laid out and opened across a railroad after its construction. This being the settled law of the state this Court followed the construction of the state courts with reference to the charter obligations of the railroad.

So also in the three cases originating in Minnesota and reported in 208 U. S., 214 U. S. and 232 U. S. (cited *supra*), it appears that the settled law of that state required overhead crossings to be built at the expense of the railroad, regardless of the priority of railroad tracks as compared with the highway. But the settled rule in New Jersey under the authorities cited *supra* is directly to the contrary, and in that state railroads are not required to construct overhead bridges at crossings where the highways are laid out after the railroad has been built.

In view of the fact that in these several cases the rule adopted by the state courts was different from the rule adopted by the courts of New Jersey, it by no means follows that the same conclusion would be reached by this Court in a case originating in New Jersey—indeed, as the opinions are based upon the rule adopted in the particular state, it follows that a different conclusion should logically be reached by this Court in a case originating in a state where the settled law is that the railroad is not bound to build bridges or passages at highways laid out and opened after the railroad was constructed.

It will be observed that the charter in the Woodbury case, *supra*, involved the duty of the railroad to construct and maintain an overhead highway bridge. In the present case the only street in which literally the same condition exists is Madison avenue—at which point the plaintiff in error is required to construct an overhead highway bridge, leaving the railroad tracks at practically the present grade. There is, however, no difference in principle between the duty to construct a bridge for the purpose of carrying a highway over and above the railroad tracks and the duty to readjust and raise the grade of the railroad tracks for the purpose of carrying a highway under the tracks when thus raised.

The point for which we are now contending does not require the conclusion that there is no duty at common law on the railroad to provide reasonably sufficient passages for the use of the public at grade crossings, even though the particular highway may have been laid out and opened subsequent to the construction of the railroad. The argument in the present case involves only the duty to erect and maintain an *overhead* highway bridge with the railroad tracks underneath and an *undergrade* highway crossing with railroad tracks above. As was pointed out in the Morris and Essex case, *supra*, there is an important difference between the damages caused by *structural* changes, such as the removal of buildings or changes in the tracks, due to the opening of a street across a railroad, and *incidental* expenses arising by reason of the erection and maintenance of crossing gates, sign board, etc. In the latter case the company is not entitled to compensation, but in the former case it is; in the latter case the imposition of the cost upon the railroad is justified on the ground that it is a regulation adopted for public safety under the police power—in the former case it is

held that the railroad property cannot be taken without making just compensation: in the latter case the railroad must bear the expense of reasonable protection; in the former it is entitled to be paid for whatever damage it sustains. See *Morris and Essex R. R. v. Orange*, 63 N. J. L. at p. 259, *et seq.* To the same effect see:

Central R. R. v. Bayonne, 51 N. J. L. 428 (cited and approved in the *Morris & Essex* case at p. 257);

Paterson, etc., R. Co. v. Nutley, 72 N. J. L. 123;

Freeholders v. New York Bay R. R. Co., 84 N. J. L. 354.

Under the statute now in question the railroad is not only compelled to submit to the structural changes required by the order without receiving any compensation therefor, but it is required *at its own expense to make these changes.*

This does not involve the question of what duty may be imposed upon a railroad at common law to take reasonable care to enable the public to use highways whether laid out before or after the construction of the railroad tracks. Section 26 of the Railroad Act of 1903 expressly provides that said section shall not enlarge the duty imposed by its charter upon any railroad company incorporated by special act and whose railroad was constructed before April 2, 1873. This section does not apply to the present case, as the evidence hereinafter cited shows that the railroad in question here was constructed many years before the date specified in that section.

Attention should now be called to several other cases in New Jersey upon which counsel for defendants in error may rely. Thus counsel may urge that under the decision in the case of *Central Railroad v. State*, 32 N.

J. L. 220, "the duty prescribed is, to keep at all times, and under all circumstances, the public highways, at the point where they cross the railroad, in a condition fit for safe and convenient use." It should be observed, in the first place, that it is at least doubtful whether this language correctly expresses the law of the state of New Jersey. We presume that if a railroad were prevented from performing its duty by act of God or the public enemy, it would be excused. But in the next place a railroad crossing cannot be kept safe. The approach of a train must and does make it a place of danger. That it is a place of danger is charged in every crossing accident case and is the foundation of great numbers of judgments of non-suit. Thirdly, a level railroad crossing is never convenient. To stop, look and listen is and must be inconvenient. Even if the crossing is not at a grade it must often be inconvenient by making travelers go up or down a hill.

The statement in *Central R. R. v. State*, *supra*, is a mere dictum. The point at issue was, whether the railroad in digging up a street to depress it under the tracks was guilty beyond a reasonable doubt of committing a public nuisance. The court answers that there is such a doubt. That is all the case decides. And it should be noted that the case says that any change of grade of the highway by the railroad is done at its peril; "if such act has been done unreasonably and without any proper cause, the result would be different."

The same judge who in 1866 delivered the opinion that "at all times and under all circumstances" crossings should be "safe and convenient," wrote the opinion in the Matthews case in 1873, which holds that the obligation upon the railroad to place a flagman at a crossing only arises when the railroad itself so constructs its

road as to make the crossings unnecessarily dangerous, as by building through a cut. *Penna R. R. v. Matthews*, 36 N. J. L. 531. If other parties by placing buildings alongside the railroad make the crossing unnecessarily dangerous, the obligation is not incurred. *Kyle v. Lehigh Valley R. R.*, 81 N. J. L. 186. So as respects private persons there are some circumstances that do not demand of the railroad that they should keep the crossing "safe." Again, on a foggy day when the view of a train is prevented, one would think that if the railroad's duty was at all times and under all circumstances to keep a crossing "safe and convenient," the fog was a circumstance that might require a special warning signal. But when this was charged, at circuit, Chief Justice Beasley concurred in the opinion of the Court of Errors and upset the verdict. *N. Y., etc., R. R. Co. v. Leaman*, 54 N. J. L. 202.

The rule that the railroad, unless it created obstructions to view making the crossings dangerous, is not obliged to take measures to make it safe, is the same as respects the public and as respects private persons. The point came up in *Philadelphia & Reading R. R. v. State*, 61 N. J. L. 71. This was an indictment against a railroad for maintaining a grade crossing more than ordinarily dangerous to the public on account of the surroundings of the crossing itself and the manner in which the defendant operated its trains. The company requested the court at the trial to declare the law as laid down in the *Matthews* and *Leaman* cases. This was refused and writ of error taken. The New Jersey Supreme Court held that the Trial Judge should have substantially charged without qualification that the railroad was only required to give the statutory signals unless the crossing had some peculiarly dangerous feature occasioned by act of the company itself in constructing its road and buildings.

This case cannot be reconciled with *Central R. R. v. State*, and as a later opinion must be taken to overrule it, if *Central R. R. v. State* is held to mean that railroads must eliminate crossings *because of circumstances beyond their control*.

So also in *McCullough v. Franklin*, 59 N. J. L. 106, an ordinance for the establishment of flagmen at highway crossings was, on the facts, set aside as unreasonable. The court held that two of the crossings were more than usually dangerous, and that as to a third, its dangerous character was demonstrated. Yet because of the infrequent passage of trains and travelers at night, the ordinance, so far as it required flagmen at that time, was set aside. But night increases danger. There was some travel at that time. Yet here again an exception was made to the rule as laid down in the *Central R. R.* case, that the company must keep "at all times and under all circumstances the highway in a condition fit for safe and convenient use."

We have shown that by the decisions of the state of New Jersey the courts have overruled and disregarded the *Central R. R.* case; nothing remains of it except that if a railroad crossing *by the action of the railroad* in running frequent trains, etc., becomes "almost impassable," the *railroad* is justified in eliminating the grade crossing, and if such elimination is not done unreasonably, the public cannot complain. The case does not say, nor can it be inferred, except from general statements in the opinion, that because of circumstances arising from other causes than the railroad's construction or operation (such as increase of population, new buildings close to the railroad, etc.), the public can *compel* the elimination of the crossing; and under the *Philadelphia and Reading* case that claim is denied.

The case of *Metuchen v. Penna. R. R.*, 73 N. J. Eq. 359, approves *Central R. R. v. State*, so far as to say that the imposition of the duty to maintain and keep in repair "carries with it the power to perform that duty in exact accordance with the prescription. This, as we understand its opinion, was the view expressed by the Supreme Court in *State v. Central R. R.*"

The Court of Errors and Appeals of New Jersey has said that a railroad in bridging a highway must from time to time as traffic grows, enlarge the width of the bridge until it shall reach the full capacity of the highway. See *State v. Lackawanna R. R. Co.*, 84 N. J. L. 289. But this is quite another matter from attempting to define the duty prescribed by the statute. That court has never adopted the definition of the duty laid down in *Central R. R. v. State*.

It should further be observed that in the *Metuchen* case the existing highway crossing was under the railroad tracks, and the question was whether the company under its charter had the right to substitute such undergrade passageway in the place of a grade crossing, and if so, whether the undergrade passage should be constructed the full width of the highway. A holding that the railroad has the right to make such a change is very different from a holding that it is charged with the legal duty of so doing.

In *Reed v. Camden*, 53 N. J. L. 322, the court said: "The duty is continuous and changing, as travel and traffic increase and vary in their demands for public accommodation" and quotes the *Central R. R.* case as authority. In the Court of Errors opinion reversing the case below the case of *Central R. R. v. State* is not referred to. 54 N. J. L. 347.

In *Clark v. Elizabeth*, 61 N. J. L. 565, the Central R. R. case is cited by the majority opinion of the court, 61 N. J. L., 575, as authority for the proposition that the railroad has the power to change grade. The obnoxious definition of the railroad's duty is only quoted in the dissenting opinion, p. 538, and then on the point of the authority of the railroad to make the change.

The case of *Palmyra v. Pennsylvania R. R. Co.*, 62 N. J. Eq., 601, quotes the words of Chief Justice Bensley above referred to, but states that the ruling was challenged, and argues the question at some length. The Vice-Chancellor, p. 615, evidently doubts that the decision can be reconciled with other decisions, notably the *Leaman* case, and finally bases his decision, not on the Central R. R. case, but on the *Matthews* and *Leaman* cases, that hold that when the railroad increases the danger it must increase the warnings. The Court of Errors adopted this opinion as its own (63 N. J. Eq. 799), and in so doing based their judgment, as the Vice-Chancellor did, on the *Matthews* and *Leaman* cases and not on *Central R. R. v. State*.

It will be seen that the Central Railroad case sustained the right of the railroad company to alter the grade of a highway so as to pass under the track, provided the change is necessary for the convenience or safety of the public; but it does not discuss the question of under what circumstances the company can be compelled to make such a change. From 32 N. J. L. 225 we quote (italics ours):

"In order to accomplish this end, the power to alter the grade of the road as public emergencies require, so as to pass it, if necessary, under the track, must reside in the corporation."

So, also, in the case of *Metuchen v. Pennsylvania R. Co.*, 73 N. J. Eq. 363, the court decided, among other things, that the *right of the company* to construct an undergrade crossing was clear; citing *Central Railroad case, supra*.

There is a great difference between the *right* of a railroad company to construct an undergrade crossing and its *duty* so to do. In the one case the company may do so, if in the judgment of its officers and directors it is advisable, and in the other case it must do so when and if required by proper authority.

Granting that there is what has sometimes been called a "continuing duty" on the part of the railroad to perform the charter obligations with respect to highway crossings, this does not mean that the grades of the railroad and of the highway must be separated, but only that in a proper case the existing facilities for a crossing may be required to be enlarged by widening the highway crossing. It is well known that in many grade-crossings the planking is not the full width of the highway. This is illustrated by several of the cases cited hereinbefore. In the event that the highway traffic increases it may become the duty of the railroad to widen the planking, but it by no means follows that because of such increased highway traffic it becomes its duty to separate the grades. The "continuing" duty relates to the capacity of the crossing and not to the form thereof. Moreover, even if the duty may be said to be "continuing" in the sense that a railroad, as long as it exercises its franchise, cannot at any time lawfully avoid the performance thereof (except, of course, on the vacation of the street or some similar proceeding), it by no means follows that the duty is continuously enlarging as to capacity or changing as to form.

If we are right in our contention that the legal rules applicable to the present case are as above stated, then the next inquiry is whether there is evidence to show that any of the several streets involved were laid out and opened *before* the railroad tracks were constructed.

WILLIAM MCGILL testified as follows:

I have lived in Paterson 57 years. Among my father's papers I find a time table left by my grandfather. (Time table offered as Exhibit R. 43, pp. 325-6.)

This time table is dated June 15, 1835, and provides for what is called a "summer arrangement" Paterson and New York Railroad line. Then follows schedule of the trains. Certain trains leave "by steam," others leaving "by horses" (p. 326, ll. 10-30). It was admitted that this was a time table of the Paterson & Hudson River R. R. at that time (p. 326, 35).

WILLIAM H. LEVI. I have lived in Paterson since about 1841, except the four years during the Civil War. In 1841 I was 3½ to 4 years old, having been born in 1837. When I came to Paterson there was a railroad running from Paterson to New York. In 1847 or 48, at the age of 10 or 11, I went to New York with my parents, starting from the Main Street Depot (p. 327). The depot where we started was located on Main street. The railroad ran with an "S" curve with a junction in the vicinity of Straight street (p. 328, ll. 1-30).

I recall the construction of the Paterson & Ramapo R. R. When I was a boy I went on the locomotive with the fireman as far as Suffern. This was a short time either before or after the trip to New York. I think it was after, but about the same time (p. 328, ll. 30-40; p. 329, ll. 1-10).

Before I made my trip to New York in '47 or '48 I knew of the railroad to New York. We used to play there after school. If we went on "that section" we would be apt to be chased out of the yard by old Daddy Claxton, who was the general yardmaster. If we got thirsty we would go to the railroad spring and get a drink of water (p. 329, ll. 10-20).

I don't remember the building of the Market street station and railroad, but I remember after it was there. It was a common place for young men 14 to 16 years old to go and see the train go through. The station at Market street was maintained at the same time as the station on Main street. The last I remember of using a railroad from the old station was in 1861 when 300 of the boys joined Sickles' Brigade in New York on the 5th day of May, '61 (p. 329, ll. 30-40).

When we watched the trains go through we walked around on the platform. The trains came from Suffern and went through to New York.

I don't know what year the Erie Railroad got possession of the old Paterson & Hudson River Railroad, but previous to that the trains ran to the junction and there the passengers and baggage would be transferred to the Paterson & Hudson River Railroad because the Paterson & Ramapo was a six foot gauge road-bed, and the Paterson & Hudson River Railroad is a four foot eight and a half. That is why the junction was built there, to transfer passengers and freight to the old line (p. 330, ll. 20-30).

PETER DOREMUS, 85 years old, a director of the Second National Bank and has been for fifty years nearly. Have lived in Paterson since 1844. When I came to Paterson

the Hudson River Railroad was there. The depot was down near the court house.

They used to run the cars from there up to the corner of Main street with horses. The road ran to a connection with the Pennsylvania road and took us to Jersey City.

I remember the construction of the Paterson & Ramapo Railroad. It formed a junction with the Hudson River Railroad. It ran up to Suffern where it became the Union road to connect with the old Erie. The road was building from 1847 to '49, and was running not later than 1850.

At the time the Paterson & Hudson River Railroad was running it did not cross any streets; there were no streets laid through.

At the time the Paterson & Ramapo Railroad started to run it crossed Market street, Broadway and River street. It did not cross any other streets because there were no streets to cross (pp. 330-332).

I am not sure whether Straight street was laid out before the railroad as laid out on its present right of way. I am not so familiar with conditions south of Market street. It was all a "wilderness." So far as I know it is possible that Straight street or some other street may have been laid out over the railroad before the railroad started to operate. I am not positive about that (p. 333, ll. 1-40).

To the north, beside Market street, Broadway and River street, I think Godwin street was laid out. Van Houten street was not open. Ellison street was open from Main street. It did not cross the railroad. It was open only from Main street to Church street (p. 334).

The above testimony shows that at least as early as 1835 railroad trains were running, some by steam and some by horses, from Main street, Paterson, to Jersey City, and that at least as early as 1850 trains were running from Paterson to Suffern. Of the streets involved in the present proceeding the only ones that were open up to 1850, were Market street, Broadway and River street, although there is a possibility that Straight street may have been opened over the railroad tracks.

The dates of the deeds and condemnation proceedings for the right of way are also some evidence as to the date of construction. Abstracts of these are included in Exhibit R. 15 (pp. 1036-1056) as follows:

Powleson to P. & H. R. R.....	July 25, 1831
S. U. M. to P. & H. R. R.....	Sept. 9, 1856
S. U. M. to P. & R. R. R.....	June 14, 1850
Van Houten to P. & R. R. R.....	Nov. 26, 1847
Van Houten, <i>et al</i> , Receivers, to P. & R. R. R.....	May 1, 1848
Colt to P. & R. R. R.....	June 14, 1850
Seudder to P. & R. R. R.....	Sept. 12, 1848
P. & R. R. R. <i>vs.</i> Cooke.....	Dec. 30, 1847
Forbes to P. & R. R. R.....	Oct. 7, 1847
P. & R. R. R. <i>v.</i> Cummings.....	Nov. 30, 1847
Donnelly to P. & R. R. R.....	Nov. 27, 1847
Monerief to P. & R. R. R.....	Aug. 30, 1848
Hastings to P. & R. R. R.....	July —, 1848
Cass to P. & R. R. R.....	Oct. 7, 1847
Danforth to P. & R. R. R.....	Nov. 27, 1847
Jackson to P. & R. R. R.....	Sept. 16, 1847
Sweet to P. & R. R. R.....	Feb. 11, 1848
Mason to P. & R. R. R.....	Jan. 3, 1848
P. & R. R. R. <i>v.</i> Blackwell.....	Dec. 30, 1847
Van Houten, <i>et als</i> , to P. & R. R. R.....	Sept. 27, 1847
Van Blarecom to P. & R. R. R.....	Sept. 13, 1847

The above deeds, together with a number of others, are listed in the property map showing all lands owned or controlled by the plaintiff in error in the city of Paterson. This shows the original right of way of the Paterson & Hudson River R. R. and Paterson & Ramapo R. R. Most of the main line tracks lie wholly within this right of way. See pages 246-8, Exhibit R. 16. Map entitled "Lands owned or controlled by Erie Railroad Company, Main Line, city of Paterson, N. J."

On this map is indicated in detail the source of the title of the plaintiff in error and its predecessors to all of the lands within the city limits including not only the land at and near the crossings in question, but other lands within the city limits. On the several sheets comprising this map is an index showing the dates of the deeds or condemnation award, the name of the grantor or owner from whom the property was acquired and the date and place of record. These maps show a number of ancient deeds in addition to those above listed. Thus, on sheet numbered 5 are listed five deeds to the P. & H. all dated in June or July, 1831.

On sheet numbered six are listed four deeds to P. & H. all dated June or July, 1831.

On sheet numbered 7 are listed three deeds to P. & H. dated in July, 1831, and one deed to P. & H. dated in November, 1833.

On sheet numbered 8 are listed two deeds dated respectively May, 1848, and June, 1850, to P. & R., and two deeds dated Sept. 1856, to P. & H., one deed dated May, 1864, to Erie Railway Company.

On sheet numbered 9 are listed four deeds to P. & H. dated from 1847 to 1850, and four deeds to Erie Railway Co. dated in 1864 and 5.

On sheet numbered 10 are listed fifteen deeds to P. & R., all dated in 1847, and 8, and one deed to same company dated in 1849, besides three deeds dated in 1864 to Erie Railway Company, and one dated in 1864 to New York & Erie Railroad Company.

On sheet numbered 11 are listed one deed to P. & R. dated in 1849, two deeds to the same company dated in 1847, three deeds to Erie Railway Company dated 1864 and one deed to New York and Erie dated 1864.

There was no evidence offered by the city to show the dates of the opening of any of the streets, but the plaintiff in error undertook to present to the board all the evidence it had been able to gather on that subject. Thus, Mr. Dawley testified as to certain maps and Mr. Achenbach as to certain ordinances and street "Returns." Mr. Dawley identified two old maps known respectively as the Map of 1850 (Exhibit R. 76) and the Map of 1852 (Exhibit R. 77).

The map of 1850 purports to show the city of Paterson as it was at that time "from actual surveys by J. C. Sidney" (p. 457, l. 10).

On this map the present main line tracks appear under the name of "Paterson and Hudson River Railroad." At the intersection of this line of railroad with the streets designated on said map as Straight street and Washington street there is a branch leading to "Paterson Railroad Depot." The location of this depot is apparently that described by Mr. Levi and Mr. Doremus, as "near the court house" and "at the corner of Main street." After passing the junction point the main line, according to this map, continued in a northerly direction. So far as this map indicates the only streets (of those involved in the present proceeding) actually opened across the railroad were Straight street, Market street and

Willis street (one crossing)—the location of the latter street apparently being the same as that of the present Park avenue; Broadway and Lafayette street. There is also a street on said map called "Williamson street," which apparently crosses the railroad tracks. From its location this street is probably the same street that afterward was known as Van Houten street. Mr. Doremus, however, says that at the time the railroad was built Van Houten street was not open.

Of the other streets involved in the present proceeding, Madison avenue on the south and Keen street, Warren street, River street and Putnam streets on the north are apparently beyond the limits of the map of 1850.

There is no street on the map under the name of Clay street; Cedar street is indicated on the map in dotted lines, indicating that it was not open across the railroad tracks; Ellison street appears as running between Prospect street on the west and Church street on the east, but not as crossing the tracks; Fair street is on the map in dotted lines; Hamilton avenue does not appear under that name, but its location is the same as "Division street" which is on the map in dotted lines. Franklin street appears on the map in dotted lines.

The map of 1852 purports to have been surveyed by order of the Council (p. 459, l. 30). The date of the map is October 20, 1852, and on it appears the following legend: "Date of Ordinance, March 30, 1853." The map purports to show the courses of the several streets indicated thereon, but the only reference to the location of the railroad is two lines, one starting at "Township Line" and running in a general northerly direction marked "Paterson and Hudson River now Union R. R."; the other branching from the first named at its intersection with Straight street and running northeasterly, indicated

on the map as "Paterson & Ramapo now Union Railroad."

Following is a statement as to the streets involved in this proceeding so far as the same are referred to on said map:

- (A) Madison avenue does not appear.
- (B) Clay street does not appear.
- (B) Straight street is indicated on map under that name.
- (C) Cedar street does not appear.
- (D) Market is indicated under that name.
- (D) Park avenue is indicated on map under name of Willis street.
- (E) Ellison street indicated under that name.
- (F) Van Houten street indicated under name of East Van Houten street.
- (G) Broadway indicated under that name.
- (H) Fair street indicated under that name.
- (I) Hamilton avenue does not appear, but is probably the street indicated as "Division street."
- (J) Lafayette street indicated under that name.
- (K) Franklin street does not appear.
- (L) Keen street does not appear.
- (M) Warren street does not appear.
- (N) River street indicated under that name.
- (N) Putnam street does not appear.

The ordinance referred to by this map was discovered by Mr. Achenbach among the miscellaneous records of the Passaic County Register's Office. A certified copy was offered in evidence and marked Exhibit R-78 (p. 463, l. 30 to p. 464, l. 5). This ordinance *vacated* all the then existing streets in Paterson which are included in the present proceeding and then relocated and relaid out

the streets according to the map. A detailed statement as to the history of each of the streets in question was then received in evidence. This refers to the 1850 map under that description and refers to the map of 1852 as the Allen map (pp. 464, 5). The official returns of the several streets were also offered (pp. 466, 469—Exhibits R-81 to R-100 inclusive).

By reference to Exhibit R-78, as printed at length in Vol. II, p. 1208, *et seq.*, it will be seen that *all of the streets included in this proceeding were by Section 1 ordered to be vacated.*

Exhibit R-80 (Vol. II, p. 1276, *et seq.*), is a detailed history of each of the several streets based upon the maps of 1850 and 1852 as well as upon other maps on file and upon the official records of the city of Paterson and the county of Passaic. By reference to this exhibit the following information appears as to the streets in question:

(A)

MADISON AVENUE.

Earliest evidence of intention to open was filing of "Return" March 27, 1871; earliest map showing location is dated 1869.

(B)

CLAY STREET.

Earliest evidence of intention to open was filing of "Return" dated January 14, 1856—which did not show the street crossing the railroad tracks; earliest map showing this street across the tracks is dated November, 1873.

(B)

STRAIGHT STREET.

Is shown on map of 1850, but earliest evidence of intention to open same across the railroad appears in the road records and the survey of Allen, dated October 20, 1852.

(C)

CEDAR STREET.

Did not exist across the tracks in 1850. Vacated by Section 1 of ordinance of 1853 and by Section 21 opened in accordance with map of 1852.

(D)

MARKET STREET.

Appears on the 1850 map; vacated by Section 1 of said ordinance; by Section 13 of same ordinance laid out across the tracks in accordance with the Allen map.

(D)

PARK AVENUE.

Formerly Willis street. Also appears on the 1850 map; vacated by Section 1 of said ordinance and by Section 14 was laid out across the tracks.

(E)

ELLISON STREET.

Did not extend across the railroad tracks at the time the 1850 map was made; vacated by Section 1 of said ordinance and by Section 9 as laid out across the tracks.

(F)

VAN HOUTEN STREET.

Was originally known as Williamson street. Appears on the 1850 map; vacated by Section 1 of said ordinance; laid out across the tracks by Section 4 thereof.

(G)

BROADWAY.

Existed at the time the 1850 map was made; vacated by Section 1 of said ordinance; laid out across the tracks by Section 6 thereof.

(H)

FAIR STREET.

Did not exist across the tracks at the time of the 1850 map. On the west side of the railroad was open between certain points by Return dated July 2, 1839; is shown on the 1850 map as a *proposed* street; on the Allen map of 1852 did not extend across the tracks; earliest evidence of intention to open it across the tracks is in the Return of March 7, 1864.

(I)

HAMILTON AVENUE.

Formerly known as Division street, appears on maps of 1850 and 1852 between certain points but not across the railroad tracks. Earliest evidence of intention to open it across the tracks in Return of December 19, 1859.

(J)

LAFAYETTE STREET.

Existed when 1850 map was made; was vacated by Section 1 of said ordinance; by Section 56 thereof was

opened across the railroad in accordance with the Allen map.

(K)

FRANKLIN STREET.

Appears on the 1850 map across the railroad as a proposed street; on the Allen map of 1852 does not appear. Earliest evidence of intention to open it is in Return of February 11, 1870.

(L)

KEEN STREET.

Earliest evidence of intention to open is found in Book B of Road Records, but the map therein shows the street entirely east of the railroad. It does not appear on the Allen map of 1852.

(M)

WARREN STREET.

Earliest evidence to open the street is found in Book B of Road Records, p. 436. The map therewith shows street east of the tracks. It does not appear on the map of 1852.

(N)

RIVER STREET.

Appears on the 1850 map; vacated by Section 1 of said ordinance and by Section 17 opened across the railroad tracks.

(N)

PUTNAM STREET.

Earliest evidence of intention to open street is February 11, 1870.

The foregoing statement of the evidence shows that the Paterson & Hudson River R. R. Co. was constructed and in operation at least as early as 1835; and that the Paterson & Ramapo was constructed and in operation at least as early as 1850. Both dates are prior to the ordinance of 1852, whereby *all* of the then existing streets in Paterson were *vacated*. The legal effect of this, we submit, was to close (even though only temporarily) all of the streets in question in this proceeding that were then laid out, and to open them again as from the date of the several returns of courses—all of which were subsequent to the ordinance. It therefore follows that not one of the said highways was legally laid out and opened *before* the construction and operation of either of the two early railroads.

The majority of the streets involved in this proceeding were not actually in use until long after the railroads were in operation. Mr. Doremus says that the Paterson & Hudson River R. R. did not cross any streets and that the Paterson & Ramapo R. R. crossed only Market street, Broadway and River street (pp. 330-2). So far as concerns all of the other streets in question (outside of Market street, Broadway and River street), the claim of the plaintiff in error that they were not laid out and opened until after the railroads were in operation does not depend upon the legal effect of the vacation of the Paterson streets by the ordinance of 1852. With the exception of these three none of the other streets were actually in use at and across the railroad tracks; and even as to those three streets the ordinance of 1852 operates to close them and thus brings them within the class of streets that were *legally* laid out and opened *after* the railroad tracks had been constructed and the

railroads were in operation. Hence, the principle laid down in the Woodbury and the other cases, *supra*, we submit, applies with equal force to all of the streets in question; and it follows that there is no legal duty on the part of either the Paterson & Hudson River R. R. Co. or the Paterson & Ramapo R. R. Co., or on the part of the Erie R. R. Co. as the successor of these two companies, to construct the bridges required by the order under review.

In the state courts counsel for defendants in error said on this point: "From the evidence it is certain that some of the streets were opened before the railroad was laid out, and there is much uncertainty about the others." They took the position that the burden of proof was upon the railroad to show that the tracks were constructed before any particular street was laid out and opened rather than upon the city to show that the street was laid out and opened before the tracks were constructed. This, we submit, is erroneous; under the cases cited under this point it is necessary for the party alleging the duty on the part of a railroad to construct a bridge over a highway to prove the fact that the highway was constructed before the railroad. No reason has been suggested why the ordinary rule that the burden of proof of any particular fact rests upon the party alleging it should be modified in a case of this kind. It is true that the plaintiff in error undertook to put in evidence its abstract of title and all the information that it was able to secure relative to the dates of the opening of the various streets and of the construction and operation of the railroad at and across the streets. But it did this only because the Board of Public Utility Commissioners ordered it to specify which of the several crossings were constructed subsequent to the construction and operation

of the railroad (pp. 132-4 of Vol. I). If there is "uncertainty" about the date of the opening of the several streets or some of them, it is not the fault of the plaintiff in error, which produced all the evidence it found available. Ample opportunity was afforded the city to produce further evidence on this point, if it had any; and none was produced.

We do not concede, however, that there is "uncertainty" on this question. All available maps and records were examined in great detail by a representative of the plaintiff in error, and, without objection on the part of the city, an "abstract" was offered giving the history of the several streets so far as the same could be determined by an examination of the maps and records (see Vol. I, p. 465, Ex. R. 80; Vol. II, pp. 1276 and following).

Counsel for defendant in error also argued in the state courts that on the vacation of the old streets by the ordinance of 1852 (Ex. R. 78, pp. 1208 and following) these streets were then "immediately declared opened according to the lines of the Allen Map by the succeeding sections." This is not an accurate statement of the legal effect of said ordinance. The succeeding sections thereof did not "open" the streets that had been vacated by the first section thereof. All the latter sections did was to provide that each street (mentioning each by name) "be relaid and that the location of such relaid street be according to the map, survey and return made by J. W. Allen, City Surveyor, dated the twentieth day of October, eighteen hundred and fifty-two." According to the records in the County Clerk's office, the "returns of the courses and distances" of several of the streets in question were not filed until some time after the ordinance of 1852. Following is a statement of the dates of the filing of these returns:

(Date of Vacating Ordinance, October 20, 1852.)

<i>Street.</i>	<i>Date of Filing Return</i>	<i>Exhibit</i>
Madison avenue	March 27, 1871	R. 81
Straight street	Oct. 20, 1852	R. 82
Clay street	Feb. 11, 1870	R. 83
Clay street	July 14, 1856	R. 84
Cedar street	Oct. 20, 1852	R. 85
Market street	Oct. 20, 1852	R. 86
Willis street	Oct. 20, 1852	R. 87
(Later known as Park avenue)		
Ellison street	Oct. 20, 1852	R. 88
East Van Houten street.....	Oct. 20, 1852	R. 89
Broadway	Oct. 20, 1852	R. 90
Fair street	Oct. 20, 1852	R. 91
Fair street	March 7, 1864	R. 92
Division street	Dec. 19, 1859	R. 93
(Later known as Hamilton avenue)		
Division street	Oct. 20, 1852	R. 94
Lafayette street	Oct. 20, 1852	R. 95
Franklin street	Feb. 11, 1870	R. 96
Keene street	Feb. 11, 1870	R. 97
Warren street	Feb. 11, 1870	R. 98
River street	Oct. 20, 1852	R. 99
Putnam street	Feb. 11, 1870	R. 100

(See Vol. 2, pp. 1282 to 1305.)

If we are right in our contention that the vacation of the streets in question by the ordinance of 1852 operated to close all of them for the time being, then the present point applies to *all* of the highway crossings which are ordered to be eliminated. But if we are wrong in this contention, nevertheless, the point applies to all of the streets that were not actually in use until after the railroads were put in operation; and, as we have above

pointed out, the point would then apply to all streets except Market street, Broadway and River street, as those streets were the only ones that were actually in use by the public before and at the time of the construction and the first operation of the railroads.

It may be urged by the defendant-in-error that the point should be further limited to those streets which are crossed by the Paterson & Hudson River R. R. and should not apply to the streets which are crossed by the Paterson & Ramapo R. R., as the charter of the latter company expressly provides that it shall be lawful for the legislature, at any time thereafter, to alter, amend, or modify the act whenever, in their opinion, the public good may require it. (See page 1018.)

In the year 1846, the legislature of the state of New Jersey passed a statute which provides:

“The charter of every corporation shall hereafter be granted by the legislature, shall be subject to alteration, suspension and repeal, in the discretion of the legislature.” (See Nixon’s Digest, page 151.)

This statute of 1846 does not affect the charter rights of the P. & H. R. R., as that charter was granted in 1831. It differs from the charter of the P. & R. R. R. in that in the former there is no provision for repeal or alteration. If, therefore, it should be concluded that this point does not apply to the crossings over which the tracks of the P. & R. R. R. pass, because of the provision for the alteration of said charter, the point is still good as to the crossings of the P. & H. R. R. The evidence shows that that company is the owner, either in whole or in part, of the right of way at Madison avenue, Clay street, Straight street and Cedar street. So far as these streets are concerned, the effect of the statute,

as construed by the state courts, is to enlarge the duty imposed upon the Paterson & Hudson River R. R. by its charter. Of course, if the argument under Point X is correct, that the charter duty of the P. & H. R. R. to construct and maintain passages at public highways has not passed to the plaintiff-in-error, then it will not be necessary to consider the present point. But, if it should be held that such charter duty has passed to the plaintiff-in-error by virtue of the several leases, foreclosures, and conveyances heretofore recited, then it becomes important to consider whether the statute upon which the order is based, as construed by the state courts, operates to modify the obligation of the contract between the state of New Jersey and the Paterson & Hudson River R. R. with reference to the construction and maintenance of highway crossings.

The evidence which we have cited above shows without dispute that Madison avenue, Clay street, Straight street and Cedar street, were not laid out and opened at the time of the construction of the tracks of the Paterson & Hudson River R. R., and, hence, the present point is at least applicable to those four streets, even if it does not apply to the street crossings over which the tracks of the P. & P. R. R. pass.

The result of the construction of the statute which has been adopted by the courts of the state of New Jersey is to change the charter duties imposed upon the Paterson & Hudson River R. R. and thereafter transferred to the plaintiff-in-error, by requiring the construction of bridges (in one case a highway bridge above the railroad track, and in other cases railroad bridges above the highway) at streets which were laid out and opened subsequent to the construction of the railroad tracks; in other words, the statute changes the charter obligation to the disad-

vantage of the company operating under said charter and to that extent impairs the obligation thereof.

With respect to the charters of both the P. & H. R. R. and the P. & R. R. the statute further impairs the contracts express therein because it permits the board to order the elimination of crossings that may be found to be dangerous to public safety. There is nothing in either charter which requires the construction of bridges or passages at streets in such a way that they shall not be "dangerous to public safety." All that is required by the charters is that the bridges or passages be constructed so that the passage of carriages, horses, and cattle on the said road shall not be prevented thereby. (See Exhibit R. 15, 966 and 1013.)

The statute further impairs contract rights for the reason that there is nothing in the original charters which requires bridges or passages (whether at grade or other than at grade) to be constructed *the full width* of the highway. If the statute be construed to permit the board to order such construction, then the statute enlarges the charter duty. If there ever was any doubt on this question, it is now settled by the decision in the case of *State of New Jersey v. Lackawanna R. Co.*, 84 N. J. L., 289, which disapproves the dictum in *Township of Raritan v. Port Reading R. R.*, 49 N. J. Eq., 11, where it was said that when the railroad is so built as to cross a highway above grade it must bridge the entire width of the highway. The Lackawanna case holds that there was no hard and fast rule requiring the construction of a bridge the entire width of the highway, but that under Section 26 of the railroad law, the bridge must be of a width and character "suitable to the locality." While the precise point decided in the Lackawanna case was that Section 26 of the Railroad Law of 1903 did not require a con-

struction the entire width, yet the reasoning thereof applies equally to crossings constructed under the early charters. The same principle was applied to the charter of the New Jersey Railroad & Transportation Co. of 1832 in the case of *Metuchen v. Pennsylvania R. R.*, 73 N. J. Eq., 359, holding that the *company* had the right to substitute an undergrade passageway in the place of a grade crossing, but that the charter did not require such undergrade passage to be constructed the full width of the highway unless that width was required for the accommodation of public travel at the place of its location.

If it be urged that Section 26 of the General Railroad Law of 1903 has changed the law in this regard by providing that the bridges and passages shall be of such width and character as shall be "suitable to the locality," the answer is, first that this section does not enlarge the duty imposed by its charter upon any company incorporated by special act whose railroad was constructed before April 2, 1873, and second, there was no proof before the board and no finding by the board that it was necessary to have the bridges constructed the full width of the highway (as required by the board) in order that they should be suitable to the locality. Likewise, there was no proof before the board and no finding by the board that it was necessary to construct the subways passing under the railroad tracks the extent of full width of the highway in order to accommodate public travel.

IX.

The statute violates the contract clause and the due process clause, in that it impairs the obligation of the contracts between the plaintiff in error and the Public Service Railway Company by altering their respective rights and duties as fixed by said contracts; in that it fixes a maximum proportion to be paid by the said Public Service Railway Company, without regard to the terms of the said contract and without regard to the proportion of the danger or impediment created by the Public Service Railway Company.

By agreement dated February 26, 1892, between Paterson Railway Co., one of the predecessors of Public Service Railway Co., and the New York, Lake Erie & Western Railroad Co., the predecessor of the Erie Railroad Co., the street railway company is given the right to maintain tracks across the steam railroad at Market street, Broadway and River street. Under this agreement the Erie Company agreed that the Paterson Company might continue to maintain the street railway across the present tracks or any other track or tracks within the city. In the second paragraph the street railway company agrees "at their own cost and expense" to "construct said crossings at the points shown upon said diagram and in the manner agreed upon with the representatives of the Erie Company, *and will thereafter keep and maintain such crossings* and their tracks thereat in good and safe condition, satisfactory to the Erie Company, during the continuance of this agreement, and so as shall from time to time be best adapted to secure safety at such crossings under the supervision and direction of the Erie Company."

The sixth paragraph provides that the flagmen and gatemen shall be employed by the Erie Company and that the street railway company shall pay one-third of the expense thereof.

The seventh paragraph provides that if gates are erected the same are to be built at the expense of the Erie Company, and the street railway company agrees to pay one-third of the cost of erection and of repairs and renewals thereof and of maintaining the same.

This contract was changed by an amendment dated May 20, 1898, whereby it was agreed that the provision for payment by the street railway company of one-third of the expenses of flagmen and gatemen should be suspended for ten years, but should thereafter be in full force and effect (Exhibit Erie 13, pp. 2034-8).

There is also a supplemental agreement dated February 6, 1912, between the plaintiff-in-error as successor of the New York, Lake Erie & Western Railroad Company, and the Public Service Railway Company (successor to the Paterson Railway Company), amending the agreement of February 26, 1892, so as to permit the construction of a single trolley track across the railroad company's tracks at Park avenue. The third paragraph thereof specifically confirms all of the provisions of the previous agreement and extends them to the additional track "to the same extent and as fully as though said additional track were specifically referred to therein" (Ex. Erie 13 and 14, p. 2039).

Under these agreements the trolley company was required not only to construct the trolley crossings in the first instance, but to keep and maintain the same in good and safe condition. There is nothing in this agreement which places any burden of construction or maintenance

upon the railroad company; on the contrary, all such cost is to be borne by the trolley company. If under the orders of the Board of Public Utility Commissioners it becomes necessary to conform the trolley tracks to a change of grade of the streets, or if it becomes necessary to take up and relay the trolley tracks, in the course of the reconstruction of the railroad tracks and appurtenances, the duty of so doing clearly rests upon the trolley company under this agreement; and hence any such order of the board (and any statute which permits or requires such an order) impairs this contract to the detriment of the railroad company.

Further the statute arbitrarily limits the proportion of the expense to be paid by a street railway using a grade crossing to not exceeding ten per cent. It may be that this provision is invalid in any event for the reasons submitted by the Public Service Railway Company in the brief filed by it on its writ of error—which is to be heard at the same time with the present writ. In that event the entire statute must fall, as the provision for the payment of 10 per cent. is an integral and essential part of the statute, and it cannot be presumed that the legislature would have passed the rest of the statute without including therein the provision for the payment of a certain proportion of the cost by a street railway company.

But however that may be, if any proportion at all is to be chargeable to the street railway company, why limit it to 10 per cent. or any other specified amount? The jurisdictional facts upon which the elimination of a particular grade crossing is supposed to be ordered are, danger to public safety, or impediment to public travel. It may well be that in many cases the proportion of danger and impediment directly attributable to the use of the crossing by a street railway company largely ex-

ceeds 10 per cent. In the case of Market street the record shows an average of 580 to 590 trolley cars for the period between 5 A. M. and 11 P. M., or 18 hours, which is an average of about 32 trolley cars each hour, or one every two minutes. According to this count there were nearly half as many trolley cars as there were automobiles or horse-drawn vehicles passing over this crossing. At Broadway there was an average of 600 trolley cars per day of 18 hours—which was considerably in excess of the number of automobiles or horse-drawn vehicles. At River street there was an average of 190 to 230 trolley cars per day of 18 hours, or considerably over half of the number of automobiles or horse-drawn vehicles. When we consider that the average trolley car carries a large number of passengers or compared with an automobile or a horse-drawn vehicle, it is obvious that a very large proportion—much in excess of 10 per cent.—of the travel at these three crossings is by trolley. For example, if we estimate the average number of passengers at 50 for each car, the result would be at Market street (580x50) 29,000 trolley passengers; at Broadway about 30,000; at River street about 10,000. In the case of Market street the trolley passengers on this basis would be practically equal to the number of pedestrians; at Broadway the trolley passengers would be 3 or 4 times the number of pedestrians, and at River street the trolley passengers would equal, and according to two of the counts, would considerably exceed, the number of pedestrians.

It is also a matter of common knowledge that a trolley car obstructs the use of a crossing to a considerably greater extent as it passes over the same than an automobile or a horse-drawn vehicle, as it generally takes

longer to pass over, due to the larger size and comparatively slower movements of the trolley cars.

The unreasonableness of fixing a limit of 10 per cent. as the maximum amount to be paid by a street railway company is illustrated by the decrees that have been made by the Court of Chancery of New Jersey in cases where that court has been called upon to exercise its jurisdiction to determine the method of the use of conflicting easements and the apportionment of the cost thereof by and between steam railroad companies and street railway companies. That court has exercised such jurisdiction both under its common law power to regulate easements and under the provisions of Chapter 241, p. 462, Laws of 1895, and the supplement thereto known as Chapter 111, p. 248, Laws of 1899 (repealed by Chapter 176, Laws of 1904), and now incorporated in sections 32 and 33 of the General Railroad Law of 1903.

Thus, in the case of *In Re Atlantic Highlands, etc., R. Co.*, 35 Atl. 387, 389, the court ordered the electric railway to give bond in the sum of \$5,000, conditioned to pay salaries of towermen at crossing to be constructed, "and such other expenses as shall be necessary to the efficient maintenance and management of signals and cut-offs mentioned, during the continuance of said crossing," and also "erect Gibbs signal system, including the power cut-off and the scotch block or derailling switch." Also, "The electric company must bear whatever expense shall be necessary to adopt those gates (at crossing) for continued use after their wires shall be erected." (Reversed 55 N. J. Eq., 522, on another point not now material.)

In the case of *In Re Saddle River Traction Co.*, 41 Atl. 107, a like decree was ordered as in the case last above cited.

In *West Jersey, etc., R. R. Co. v. Atlantic City, etc., Traction Co.*, 65 N. J. Eq., 613, it was held:

(Headnote)

"Where a newly organized (railway) company is authorized to lay its railroad tracks at grade across existing tracks of another railroad, and the construction proposed involves only such a crossing, the new company should pay the expenses incident to the safe construction of its tracks across those of the senior company."

The expenditure involved was \$1,800.

In *J. C., etc. Ry. Co. v. N. Y. S. & W. R. R. Co.*, 62 N. J. Eq., 390, 396, the Court said:

"If the signal system is considered sufficient, I shall direct that the defendant company (railroad) pay two-thirds of the cost of installing and maintaining it, and the street railway company one-third. The terms of the decree may be similar, so far as applies, to those in the Bloomfield avenue case." In this case "The first cost (for installation) will be about \$1,800 and it will require about \$1,000 a year to maintain it." The court decreed on March 10, 1902, "the expense of installing the signal system and of maintaining and operating the same shall be divided between the complainant and defendant in the proportion of two-thirds thereof to be paid by the defendant (railroad company) and one-third by the complainant (railway company)."

In the *Watchung Railroad case* (unreported), the Court of Chancery of New Jersey assessed two-thirds of the cost of installing and maintaining a crossing for a street railway over the steam railroad upon the steam railroad, and one-third upon the street railway.

There are also several other unreported cases in which the Court of Chancery has decreed that street railway

companies should pay all or part of the expense incurred in changing railroad crossings so as to permit their street railways to pass over same.

In the case of *In Re Application of The West End & Long Branch Railway Co.* to define a mode of crossing the West End Railroad in Long Branch (decree filed May 7, 1896), Chancellor McGill decreed "that said crossing shall be constructed wholly at the expense of said West End & Long Branch Railway, and shall thereafter be maintained by it in good order." Also, "the expense of constructing and maintaining said protecting apparatus shall be borne by the petitioner, The West End & Long Branch Railway Company." Also, "the said protecting apparatus shall be operated by signalmen to be selected and employed by the corporation owning and operating said steam railroad, and the amount of wages of such signalmen, the usual wages for such occupation, shall be paid by the petitioner, The West End & Long Branch Railway Company." On May 23, 1904, the decree was modified so as to permit the installation of certain iron poles at the crossing, in place of wood. The court then decreed "The said Electric Railway shall install said iron poles at said crossing in place of wood, as shall be necessary to guard against the electric and other wires of the Electric Railway falling thereon."

In the case of *Re Application of the Jersey Central Traction Co.* to define the mode of crossing the Freehold and Atlantic Highlands Railway Company's tracks in the Township of Raritan, decree filed Sept. 14, 1904, Chancellor Magie decreed "that the crossing of said Jersey Central Traction Company's electric railway over its tracks and right of way of the said Freehold & At-

lantic Highlands Railroad, a steam railroad in the township of Raritan aforesaid, shall be overgrade and shall be constructed and hereafter maintained by the petitioner (railway company) at its expense and in the following mode, and in accordance with the following provisions."

In the case of *Re Application of The New Jersey & Hudson River Railway & Ferry Co.* to define the mode of crossing the Bergen County Railroad Company, decree filed December 24, 1902, Chancellor Magie decreed, "that the crossing by the said applicant (railway company) with its two tracks be constructed under the grade of said steam railroad company, and that for that purpose the grade of the highway called Broadway," etc., and the Court outlines how the work is to be done. So far as can be ascertained from the decree the railway company was to bear the entire expense of depressing its tracks.

In the case of *Re Application of the Bergen Turnpike Co.* to define the mode of crossing by its electric railway line of the steam railroad, the New York, Susquehanna & Western Railroad Co. in the village of Hackensack, decree dated July, 1916, it was decreed that the cost of laying and maintaining the track crossing frogs of the petitioner across the tracks of the defendant be paid and borne by the petitioner. It was also decreed that each party pay one-half of the cost of operating and maintaining the gates, switches, tower and interlocking system of signals.

The above summary of the several cases which may be found in the New Jersey reports or which may be found in the final decrees of the Court of Chancery wherein that court has determined the proportion of ex-

penses to be paid by a street railway company when its tracks cross the tracks of a steam railroad company, shows that there is no fixed rule whereby this proportion may be determined. In some cases the Court of Chancery directed that the entire expense both of construction and maintenance be paid by the street railway company; in other cases that two-thirds of the cost be paid by the street railway; in other cases that one-half be paid by the street railway; in other cases one-third. In no case has there been any decree which requires the street railway company to pay as small a proportion as 10 per cent.

Furthermore, when the question of a division of expense has been left to the railroad company and the street railway company to determine by contract between themselves, no such proportion as 10 per cent. has been fixed as the share of the street railway company. This is illustrated by the contract between the plaintiff-in-error and the Public Service Railway Company involving the crossings in question in this very case, whereby the street railway company agreed to construct the trolley tracks across the crossings at their own expense and to keep and maintain same in good and safe condition; and to pay one-third of the expense of flagmen or gatemen—and if gates should be erected, to pay one-third of the cost of construction and maintenance of same. See Exhibits Erie 13 and 14, p. 2034-9.

The statutory limitation of 10 per cent. of the expense directly chargeable to the crossing used by a street railway company is also invalid because it gives the Board of Public Utility Commissioners arbitrary power to decide in any case whether the amount to be paid by the street railway company shall be 10 per cent. of the ex-

pense or any less amount down to zero. The expression in Section 2 of the statute is "the board *may* order not exceeding ten per centum of such expense," etc. In the present case, for example, if the total expense chargeable to the crossings used by the street railway turns out to be the sum of \$3,000,000, then the board may order the street railway company to pay \$300,000, or any less amount, or nothing at all. There is no standard prescribed by the statute by which the amount of expense to be paid by the street railway company is to be determined. If the statute had provided that the board should order 10 per cent. of the expense directly chargeable to the crossings to be paid by the street railway company, the statute would not be open to the present criticism—as in that event the amount of such expense could be ascertainable. But under this statute the board is not *required* to order 10 per cent. of such expense but *may order not exceeding* ten per centum. This delegates to the board an arbitrary power to determine according to its own discretion, and even according to its own caprice, what amount the street railway company is to contribute, without any regard whatever to the nature and extent of the danger to public safety and the impediment to public travel created by and chargeable to the street railway company. The delegation of such power, without fixing any standard upon which the exercise of the power depends is illegal.

The legislature cannot give to an administrative body, such as the Board of Public Utility Commissioners, arbitrary power to order or to refuse to order the street railway company to participate in the cost of eliminating the crossings. *Yick Wo v. Hopkins*, 118 U. S., 356, 30 L. Ed., 220.

While the courts will not ordinarily pass upon the question of whether a statute enacted pursuant to the police power is wise or unwise, nevertheless the states cannot exercise that power in an arbitrary and unreasonable manner. *Chicago, etc., Ry. Co. v. Arkansas*, 219 U. S., 453; *Pennsylvania R. Co. v. Ewing*, 88 Atl., 775.

In the state courts counsel for defendants argued that the danger which the statute sought to eliminate was not attributable to the railroad alone nor to the street railway alone, but to both of them. But admitting this to be true, it does not follow that the legislature can impose some part of the cost of changing the crossing upon the street railway—still less does it follow that the legislature has the power to impose an arbitrary *limit* upon the proportion of the cost to be paid by the street railway company.

So far as concerns the question of whether the legislature can impose *any* proportion of such expense upon a street railway, we need only to refer to the brief filed in behalf of Public Service Railway Company, and to say that if for the reasons advanced by that company this part of the statute is unconstitutional, then the entire statute must fall, as this provision of the statute is inseparable from the remainder thereof. (See Point XI.)

But the plaintiff-in-error urges that this provision of the statute is unconstitutional—not because it requires a payment of not exceeding 10 per cent., but because it limits the payment on the part of the street railway to 10 per cent.

Whatever danger there may be at a railroad grade crossing where a street railway also crosses is due in part to the street railway, and therefore the street railway should be required to contribute a substantial pro-

portion of the cost of the elimination—such proportion to be an equitable amount commensurate with the proportionate use of the highway by the street railway. For many years past it has been the policy of the state of New Jersey to require street railways to pay a substantial proportion of the cost of protection at highways where they cross steam railroad tracks. See illustrations in the cases above cited. In the case of the very crossings in question in this case the street railway company has agreed to pay a certain proportion of the cost of protection.

There would be no practical difficulty in establishing a standard whereby the proportion of expense to be paid by the street railway company and the steam railroad company at a trolley crossing could be determined. For example, the cost might be apportioned according to the *use* of the crossing for trolley traffic as compared with its use for the railroad traffic. No such standard is attempted to be made in the present statute. This statute merely fixes an arbitrary limit of 10 per cent. regardless of whether the proportionate use of the crossing by the street railway company equals or exceeds such percentage, and regardless of the proportion of danger or impediment created by the street railway company.

X.

The statute violates the Fourteenth Amendment in that it is an unreasonable exercise of the police power.

By this statute there is imposed upon the plaintiff-in-error the "entire expense" of the alterations, changes, relocation or opening of the public highways, including damages to adjacent property, less 10 per cent. of the expense directly chargeable to certain crossings used by

a street railway company. Conceding that the legislature in the exercise of the police power may have the power to require protection at, or the elimination of grade crossings, the question still remains in any such case whether such power has been exercised in a reasonable manner. This question must be determined by the courts. We quote from the case of *Sanitary District of Chicago v. Chicago & Alton R. R. Co.*, 108 N. E., 312, 267 Ill., 252, as follows:

"The legislature may determine when the exigency exists for the exercise of the police power, but it is for the courts to determine what are the subjects of the police power and what are reasonable regulations thereunder, and whether there is any real or substantial relation between the avowed objects of the law and the means devised therein for attaining those ends. *People v. Steele*, 231 Ill., 340, 83 N. E., 236, 14 L. R. A. (N. S.), 361, 121 Am. St. Rep. 321; *City of Belleville v. Turnpike Co.*, 234 Ill., 428, 84 N. E., 1049, 17 L. R. A. (N. S.), 1071."

In that case the court further said:

"Counsel for applicant argues that the appellee railroad company accepted its franchise from the state to acquire its right of way and build and operate its railroad subject to the exercise, at any and all times, by the state, of this police power for the public health, safety, morals, and welfare; that the exercise of this power by the state and the observance of such duty by the railroad company ever exists and continues, and cannot be contracted away. Beyond question, this is the general rule. Counsel argue, further, that at common law the railroad company must at its own expense conform its road and the operation thereof to the conditions made necessary by the construction and use of works by the city or the municipality, such as public highways or canals; that this

duty rests upon the railroad company regardless of statute, and applies not only to the conditions at the time the railroad was built, but also to those existing thereafter. With this we cannot agree. In this and other jurisdictions it has been held that questions of this kind are frequently regulated by statute. In *Illinois Central Railroad Co. v. City of Bloomington*, 76 Ill., 447, this Court held that where a city had laid out a street within its corporate limits across the right of way of a railroad company prior to the passage of Section 8 of the present Railroad Fencing Act (the statute at that time not requiring railroads to construct and maintain crossings outside of villages), such city could not, by ordinance, direct the railroad to construct a crossing and approaches thereto. The doctrine of that decision, under the law as it then existed, has been quoted with approval in *People v. Illinois Central Railroad Co.*, 235 Ill., 374, 85 N. E., 606, 18 L. R. A. (N. S.), 915, and *City of Bloomington v. Illinois Central Railroad Co.*, 154 Ill., 539, 543, 39 N. E., 478, 479; it being stated in this last case that:

“If either a natural person or corporation has a right of way across lands, and the public or municipal authorities afterward locate and open a highway or street across such right of way, then there is no rule or principle of common law that would compel such person or corporation to construct and maintain the crossing of the highway or street over the right of way, or the approaches thereto, at his or its own expense.”

“We know of no decisions in this state that construe the rules of the common law on that question in any different way than as just stated.”

In that case the District sought to condemn the right-of-way for a canal across railroad property. The trial court allowed damages of \$100 for the property actually

taken and made a further allowance of about \$50,000 for certain items for the cost of the construction of a bridge on which to carry the railroad tracks and for the maintenance thereof; also for the expense of diverting traffic during the construction of the bridge. The District claimed that the only damage that should be allowed was the item of \$100. The action of the trial court was affirmed, and thus in effect it was held that there was no legal duty on the part of the railroad to construct or maintain the bridge *at its own expense*.

In *Dobbins v. Los Angeles*, 195 U. S., 223, 49 L. Ed., 109. the Court said:

“It is now thoroughly well settled by decisions of this Court that municipal by-laws and ordinances, and even legislative enactments undertaking to regulate useful business enterprises, are subject to investigation in the courts with a view to determining whether the law or ordinances is a lawful exercise of the police power, or whether under the guise of enforcing police regulations there has been an unwarranted and arbitrary interference with the constitutional rights to carry on a lawful business, to make contracts, or to use and enjoy property.”

In *Lawton v. Steele*, 152 U. S., 133, 38 L. Ed., 585, the Court said (*italics ours*):

“To justify the state in thus interposing its authority in behalf of the public, it must appear, first, that the interests of the public generally, as distinguished from those of a particular class, requires such interference and second, that the means are reasonably necessary for the accomplishment of the purposes, and not unduly oppressive upon individuals. The legislature may not, under the guise of protecting the public interests, arbitrarily interfere with private business

or impose unusual and unnecessary restrictions upon lawful occupations. *In other words, its determination as to what is a proper exercise of its police powers is not final or conclusive, but is subject to the supervision of the courts."*

In *Holden v. Hardy*, 169 U. S., 366, 42 L. Ed., 780, the Court said:

"The question in each case is whether the legislature has adopted the statute in exercise of a reasonable discretion, or whether its action be a mere excuse for an unjust discrimination, or the oppression or spoliation of a particular class."

In *Connolly v. Union Sewer Pipe Co.*, 184 U. S., 540, 46 L. Ed., 679, the Court said:

"The question of constitutional law to which we have referred (the equal protection of the laws) cannot be disposed of by saying that the statute in question may be referred to what are called the police powers of the state, which, as often stated by this Court, were not included in the grants of power to the general government, and therefore reserved to the states when the constitution was ordained. But as the constitution of the United States is the supreme law of the land, anything in the constitution or statutes of the states to the contrary notwithstanding, a statute of a state, even when avowedly enacted in the exercise of its police powers, must yield to that law. No right granted or secured by the constitution of the United States can be impaired or destroyed by a state enactment, whatever may be the source from which the power to pass such enactment may have been derived. 'The nullity of any act inconsistent with the constitution is produced by the declaration that the constitution is the supreme law.' The state has undoubtedly the power, by appropriate legislation, to protect the public morals, the public health and the public safety, but if, by

their necessary operation, its regulations looking to either of those ends amount to a denial to persons within its jurisdiction of the equal protection of the laws, they must be deemed unconstitutional and void."

In *Otis Elevator Co. v. City of Chicago*, 263 Ill., 419, 165 N. E., 338, 52 L. R. A. (N. S.), 192, 198, the Illinois Supreme Court said (*italics ours*):

"In the exercise of the police power the city had a right, *within reasonable limits*, to require the railroad to elevate its track so as to avoid grade crossings upon streets, and protect the lives and property of its citizens."

So far as railroad grade crossings are concerned, the defendants-in-error will no doubt cite the case of *New York & New England R. Co. v. Bristol*, 151 U. S. 556, 38 L. Ed. 269, where this Court held that the imposition upon railroad companies, in particular instances, of the entire expense of the performance of acts required in the public interest, did not deprive the railroad of property without due process of law "by statutes under which the result is ascertained in a mode suited to the nature of the case, and not merely arbitrary and capricious." There are many important differences between the statute involved in that case and the New Jersey statute now under consideration, as pointed out hereinafter (p. 275). But under the principles declared in that case we submit that the New Jersey statute is invalid.

If ever there was an "arbitrary and capricious statute, this one comes within such description. It is, we submit, subject to this criticism for several reasons:

First. Because it throws the entire expense of eliminating grade crossings upon the railroad company (regardless of whether the proceedings are instituted by

the railroad or by the municipality, or by the board itself—see sec. 5)—except in certain cases specified in section 2 of the statute, wherein the street railway is to contribute not exceeding 10 per cent.

Second. Because it limits the amount to be paid by the the street railway to not exceeding 10 per cent. of the expense “directly chargeable to the crossing used by the street railroad company,” regardless of any existing contracts between the street railway and the steam railroad company, and regardless of whether or not this percentage is a fair proportion of the danger to public safety and the impediment to public travel, which in any particular case may be reasonably chargeable to the use of such crossing by the street railway company.

Third. Because it does not even *require* that the street railway company pay ten per cent. of such expense. It simply fixes that proportion as the maximum amount to be paid and leaves it to the Board of Public Utility Commissioners to decide arbitrarily whether in any particular case the maximum shall be paid by the street railway or whether nothing at all shall be required of it; and does not fix any standard by reference to which the board is to decide whether, or what part of the ten per cent. is to be paid.

Fourth. Because it imposes upon the railroad the cost of damages to adjacent property, without providing for any proportion thereof to be paid by the municipality, and without establishing any standard by which such damages are to be determined, and without making any provision for assessment of any *benefits* that may accrue to adjacent property by reason of the elimination of the crossings and without providing any method for determining the amount of such damages.

Fifth. Because it imposes upon the municipality *no* expense whatever, except the expense of removing, relaying or relocating municipal water or sewer pipes or other municipal pipes, conduits or subways; and except, also, the expense of *paving, curbing and flagging* the highway constructed as the result of the change of grade. A large proportion of the expense resulting from the change of grade of highways is the cost of *fill and excavation*. In this case the cost thereof is \$56,849.72. (See city's estimate, pp. 919-931.) No logical reason can be suggested why the municipality should be relieved from the burden of the cost of fill and excavation, due to change of grade of streets. This obnoxious feature of the statute is particularly oppressive in the present case, where the board has directed that the grades of every one of the fifteen highways be changed—in one case, that of Madison avenue, by elevating the street across the railroad tracks, and in all the other cases by a partial depression of the street and a partial elevation of the tracks.

Sixth. Because the statute as originally drawn, and under which the proceedings under review herein were instituted makes no provision for giving notice to interested property owners. The value of such properties that may be affected in this case as we have shown elsewhere, is nearly \$10,000,000.

Seventh. Because it permits the Board of Public Utility Commissioners "of its own motion" to take proceedings for the elimination of a grade crossing—even without, or in some cases perhaps, even against, the wish of the municipality in which the crossing may be located, thereby imposing certain expenses upon such municipality against its protest, or at least without its consent. Further, in such a case, it constitutes the board the plain-

tiff to bring the proceeding, the judge to determine the law, the jury to decide the facts, the witness to prove the facts; and, in the event of a decision against the railroad, the hangman to execute the sentence.

Eighth. Because it gives to said board an unlimited and arbitrary power, even after it finds the existence of the jurisdictional facts prescribed in section 1, to order or not to order the elimination of crossings without fixing any standard of reasonableness or necessity or financial practicability, or indeed, any standard whatever—thus vesting in the board power to decide questions of vast importance both to the railroad companies and to the public without limit upon their discretion, and without affording any reasonable standard whereby the same must be guided.

Ninth. Because, if section 4 of the statute of 1913 is construed to apply to companies, corporations, co-partnerships or individuals other than those coming within the description or definition of public utilities, then such *private* companies, etc., are required, "at their own expense," to move or change the grade or location of their property or constructions.

Tenth. Because, as construed by the state courts, the statute gives said board practically unlimited power to change a public highway or to change a series of such highways that may happen to intersect railroad tracks and to relocate the same and to change the grade thereof, in disregard of the restrictions and limitations imposed by municipal charters or other laws and without notice or hearing to property owners who may be affected thereby.

Eleventh. Because under the construction of the statute adopted by the state courts, there is no limit

upon the number of crossings which may be considered at one and the same time, if any municipality sees fit to institute proceedings for the elimination of all crossings within its limits, or if the board, of its own motion, ~~sees~~ fit to institute proceedings for the elimination of all the crossing in the entire state in one and the same proceeding. According to the construction of the statute in the present case, either proceeding could be followed, notwithstanding that each crossing presents its own individual problem. If proceedings were instituted for the elimination of all, or a large number of crossings, on any one railroad within the state (and under the construction of the statute adopted by the state courts there is no limit to the number of crossings that may be considered in any one proceeding), the board, by instituting same of its own motion, might cause substantial interference with the operations of the railroad—even to the extent of making it necessary for the railroad to cease operations entirely pending the fulfilment of the board's order for the elimination of crossings.

Twelfth. Because, it gives said board practically unlimited power to enlarge the duties imposed upon railroad companies by their charters, and in effect repeals section 26 of the General Railroad Law of New Jersey, which required nothing more than that the "bridges and passages" at public highways should be "of such width and character as shall be suitable to the locality in which the same are situated."

Thirteenth. Because it confiscates the property of the railroad by compelling the expenditure of enormous sums against the protest of the company and contrary to the judgment of the board of directors without any compensating advantages, and without any prospect of receiving a reasonable return upon such an investment.

Fourteenth. Because there is no reasonable or other limit imposed upon the discretion of the board, as to the financial conditions under which grade crossings are to be eliminated; and in the absence of such limitation, the board has power, under the statute, to order the elimination of grade crossings regardless of the financial ability to the operating company to meet the burden of the cost thereof.

Fifteenth. Because, as construed by the state courts, it requires the entire expense to be paid by the operating company and takes the property of a lessee company as the company "operating" the railroad, for the benefit of the lessor company, which has title to the land upon which the railroad is constructed, and which owns the franchise by which the railroad has the right to do business, without making provision for a reasonable or for any apportionment between the lessor company and the lessee company; and without making any provision for reimbursement to the lessee company of the amount thus expended for the benefit of the lessor company, and without giving the lessee any further interest or estate in the lessors' property—and this without regard to the terms of the contracts between the lessor and the lessee; and thus makes it impossible for the lessee company to capitalize the expenditure, and, in effect, compels the cost thereof to be paid out of current earnings, even though the evidence may show that there are no such earnings available for that purpose.

Sixteenth. Because it makes no provision for eliminating the danger to public safety and the impediment to public travel by reducing the number of train movements or by abandoning the operation of trains when and if it appears that the cost of eliminating the cross-

ings is so great as to make it unprofitable to continue the operation of trains over the railroad or that part thereof where the crossings are ordered to be eliminated.

Seventeenth. Because it makes no provision whereby the discretion of the Board of Public Utility Commissioners is required to be reasonably dependent upon the financial possibility or feasibility of complying with an order directing the elimination of crossings.

Eighteenth. Because it gives the said board arbitrary power to order changes in or the removal of the property or constructions of other companies, corporations, co-partnerships or individuals without requiring that said changes be found to be reasonably necessary or appropriate for the elimination of any crossing or crossings, and without making any provision for making compensation for the cost of such changes, or the damages occasioned thereby, and without making any provision to compel such changes, if they are found to be necessary or proper.

Nineteenth. Because it does not permit the said board to eliminate highway crossings by depressing or elevating the public highway in part and by depressing or elevating the railroad tracks in part, but limits the power of the board to alter the crossing either by carrying the highway under or over the railroad (leaving the tracks at the same level) or by reconstructing the railroad under or over the highway (leaving the highway at the same grade).

These objections to the statute are discussed in detail in other parts of the brief but they are here summarized for the purpose of showing that the statute is "arbitrary and capricious" and is not a reasonable exercise of the police power.

Furthermore, the question of whether a statute is a reasonable or an unreasonable exercise of the police power, depends, to a certain extent upon the course of legislation, as well as upon general public opinion.

In the case of *Muller v. Oregon*, 208 U. S., 412, 419, 52 L. Ed., 551, the question arose as to the right of a state to regulate the working hours of women; the law under consideration limited the employment of females, in laundries, to not more than 10 hours during any one day; the statute was attacked on the ground that it was in violation of the Fourteenth Amendment. In coming to the conclusion that the statute was valid, this Court said:

"In patent cases counsel are apt to open the argument with a discussion of the state of the art. It may not be amiss, in the present case, before examining the constitutional question, to notice the course of legislation as well as expressions of opinion from other than judicial sources. In the brief filed by Mr. Louis D. Brandies, for the defendant in error, is a very copious collection of all these matters, an epitome of which is found in the margin.

"While there have been but few decisions bearing directly upon the question, the following sustain the constitutionality of such legislation: *Commonwealth v. Hamilton Mfg. Co.*, 120 Massachusetts, 383; *Wenham v. State*, 65 Nebraska, 394, 400, 406; *State v. Buchanan*, 29 Washington, 602; *Commonwealth v. Beatty*, 15 Pa. Sup. Ct., 5, 17; against them is the case of *Ritchie v. People*, 155 Illinois, 98.

"The legislation and opinions referred to in the margin may not be, technically speaking, authorities, and in them is little or no discussion of the constitutional question presented to us for determination, yet they are significant of a widespread belief that woman's physical structure, and the functions she performs in consequence thereof, justify

special legislation restricting or qualifying the conditions under which she should be permitted to toil. Constitutional questions, it is true, are not settled by even a consensus of present public opinion, for it is the peculiar value of a written constitution that it places in unchanging form limitations upon legislative action, and thus gives a permanence and stability to popular government which otherwise would be lacking. At the same time, when a question of fact is debated and debatable, and the extent to which a special constitutional limitation goes is affected by the truth in respect to that fact, a widespread and long continued belief concerning it is worthy of consideration. We take judicial cognizance of all matters of general knowledge."

In *Merrick v. Halsey Co.*, 242 U. S. 568, 61 L. Ed. 498, this Court sustained the validity of a "Blue Sky Law" and in the course of the opinion pointed out, by way of argument in favor of the law, that twenty-six other states had agreed with the state of Michigan in expressing their judgment by means of such a law, that the business of dealing in securities should have "administrative supervision" (p. 586).

See also *Bosley v. McLaughlin*, 236 U. S. 385, 59 L. Ed. 632.

The same principle was applied in the case of *People v. Charles Schweimler Press*, 214 N. Y., 395, in which the New York labor law prohibiting night work for women was sustained. In the course of the opinion the Court said (*italics ours*):

"In the decision by the legislature whether determination by us whether the legislature was justified in adopting it, it was and we are entitled to take into account the report made by the commission, such facts tending to *support it as were*

matters of common knowledge, and the widespread and long-continued belief evidenced by statutes and in other manners that night work by women in such a place as a factory is so injurious that grave dangers therefrom are to be apprehended."

In referring to and distinguishing the case of *People v. Williams*, 189 N. Y., 131, the Court said (*italics ours*):

"While theoretically we may have been able to take judicial notice of some of the facts and of some of the legislation now called to our attention as sustaining the belief and opinion that night work in factories is widely and substantially injurious to the health of women, actually very few of these facts were called to our attention, and the argument to uphold the law on that ground was brief and inconsequential.

"Especially and necessarily was there lacking evidence of the extent to which during the intervening years the opinion and belief have spread and strengthened that such night work is injurious to women; of the laws, as indicating such belief, since adopted by several of our own states and by large European countries, and the *report made to the legislature by its own agency*, the factory investigating commission, based on investigation of actual conditions and study of scientific and medical opinion that night work by women in factories is generally injurious and ought to be prohibited."

If under the principle laid down by this Court and by the New York Court of Appeals, *supra*, the courts have the right to consider the "course of legislation" in order to sustain the constitutionality of a law passed in the exercise of the police power, can not the same principle be applied in considering whether a particular law is *un-constitutional*?

Following the suggestion in the above cases let us examine "the course of legislation and expressions of opinion" upon this subject. Beginning with New Jersey we find that the statute of 1913 is a complete reversal of the policy that has prevailed in that state ever since the first railroad was constructed. It was the original contemplation of all parties to the construction of railroads that highway crossings should be at grade; as the number of trains and the rapidity of their movement increased and as highway traffic developed the question naturally suggested itself as to whether it was practicable to eliminate grade crossings either in whole or in part.

This was pointed out by Reed, V. C., in the case of *In re West Jersey Traction Company*, 59 N. J. Eq., 63. That was an application to define the mode of crossing a steam railroad by a trolley company. As it appeared that an undergrade crossing could be built for the trolley company at a comparatively small expense and with but little inconvenience to all interested parties, he decreed an undergrade crossing. In the course of the opinion he said (italics ours):

"The question then is whether the trolley shall be compelled to cross the railroad otherwise than at grade.

"No one suggests that it should be compelled to build a structure which will permit the passage of the trolley cars above the railroad tracks.

"The insistence is that it should build a tunnel so as to permit its cars to pass underneath the railroad. The argument in favor of such a crossing is grounded upon the danger of collision which arise from a grade crossing. It cannot be denied that there is an element of danger in every grade crossing of a steam railroad. Every public road that crosses a steam railroad at grade presents a point of possible peril. If all persons were con-

stantly vigilant danger would disappear or be reduced to infinitesimal proportions. So long however, as men are careless, as they always will be, the instances of collision on grade crossings will engage the attention of courts and create the wish that grade crossings may be abolished. The policy of the state in fostering the building of railroads as instruments for the transportation of persons and merchandise has not required elevated or underground crossings. The expense which would attend the construction of railroads, if so compelled, would be a practical prohibition against the opening up of new sections of the country by new railroads. So grade crossings have been permitted, and where such crossings are, by their environments, exceptionally perilous, such dangers have been guarded against by such provisions as gates, flagmen and signals.

"It cannot be said, therefore, that because there is an element of danger in a grade crossing, some other method is to be provided. The question is whether, taking into account *the degree of such danger* in the particular instance, and also the *facility and economy* with which such danger may be avoided by adopting some crossing other than at grade, the latter method should be required. The statute in the present case fixes the conditions upon which a crossing other than at grade may, in the discretion of the Chancellor, be ordered, namely, first, when such other method is reasonably practicable, and second, where the public safety so requires. The discretion of the Chancellor must be controlled by the conditions attending the particular crossings."

This was also pointed out by Stevens, *V. C.*, in the case of *Newark v. Central R. Co.* (67 Atl. Rep. 1009, 73 N. J. Eq. 469), in which he says (*italics ours*):

"If safe and convenient use will not permit of a grade crossing, then it is its (the railroad's)

duty to cross in some other way. In determining this question, however, the court cannot start out with the assumption that all grade crossings are unsafe; for the legislature has said otherwise. The charter of this company, and the charters of other companies and the General Railroad Act itself, as it stands today, *contain an implied assertion that grade crossings are or may be safe*, unless some peculiarity in the situation—for instance, a crowded thoroughfare with frequently passing trains or a multiplicity of tracks—makes them unsafe.”

In that case the city filed a bill to compel the railroad, among other things, to cross a certain street in some manner other than at grade. This part of the prayer in the city’s bill was denied.

The same matter was further discussed by Stevens, *V. C.*, in *Newark v. Erie R. Co.*, 75 N. J. Eq., 20. In that case the Court of Chancery gave careful consideration to the question of the circumstances under which it should exercise its power to order the elimination of grade crossings. After citing the various statutes providing for the elimination of grade crossings, either by agreement between the railroad and the municipality or by petition to the Supreme Court, Stevens, *V. C.*, said (italics by the Court):

“In view of this legislation it is quite impossible to hold that grade crossings are, *per se*, illegal structures, even in cities, or that streets are not *safe* in the legislative sense of that word, merely because they are crossed at grade by railroad tracks. There must be something in the situation so peculiar as to compel the court to say that gates will not adequately protect the public; that flagmen will not; that nothing but track elevation will. • • •

"The question, then, must be, as I have said, whether gates and flagmen and other expedients are, in the given case, so inefficacious that nothing but track elevation will give to the public, in fact as well as in name, the joint use of the highway" (pp. 28, 29).

The Court of Chancery on the facts of that case refused to order the elevation of the tracks, but did order that three of the six tracks at the crossing in question should be taken up and the "unlawful" use of one other track enjoined, saying:

"If the three tracks first spoken of, where they cross the highway, be eliminated and the unlawful use of the other enjoined, I do not think that the crossing, properly guarded, will be more dangerous in an absolute sense than most of the other grade crossings in the cities and many of the other municipalities of the state" (pp. 31, 32).

Both parties appealed to the Court of Errors and Appeals. The city appealed from so much of the decree as denied a mandatory injunction directing the railroad to effect its grade crossing in some other manner than at the grade of the street. This part of the decree was unanimously affirmed, Voorhees, *J.*, speaking for the Court, saying:

"Taking up the appeal of the city, we agree with the learned Vice-Chancellor in his conclusion that the facts of the case do not warrant so drastic a remedy as track elevation or depression, and that therefore on the merits of the case the appeal of the city should be dismissed, and the decree affirmed so far as that appeal has questioned it" (76 N. J. Eq., 319).

That part of the decree which ordered the removal of certain of the tracks and the cessation of the use of one

other track was reversed on the railroad's appeal because it was not within the scope of the bill.

When railroads were first constructed it was the view of all the parties interested therein that crossings should be at grade—in fact, the only way in which railroads could have been constructed in the first instance was to have the crossings at grade, as the income that was expected from the operation thereof was not enough to justify the expense of construction crossings other than at grade.

Moreover, under the charters themselves such construction was *required*.

In the cases of the two railroads that own the right of way in Paterson used by the Erie Railroad Co., the charters specifically provide that each road authorized thereby is declared to be free for the passage of *any* railroad carriage thereon, with passengers or property upon payment of the tolls prescribed by the charter; and in the case of the P. & H. R. R. R. there is the proviso that the said carriages so used shall be of the same description as those used by the company and shall be so regulated as to time of starting, rates of travelling and rates of tonnage, as not to interfere with the carriages of the company or injure the said road, and in the case of the P. & R. R. R. there is a like provision except that the "carriages" are not required to be "of the same description" as those used by that company. See Sec. 14 of P. & H. R. R. R. charter, Vol. II, p. 969; Sec. 16 of P. & R. R. R. charter, Vol. II, p. 1015.

The time table in evidence in this case shows that in the year 1835 some of the "carriages" were drawn over the line of the P. & H. R. R. R. "by steam" and others were drawn "by horses" (p. 326, ll. 10-25). Hence, at

the time of the original construction of this railroad it was not only to the mutual interest of the public and the company to have the crossings at grade, but it was necessary to have them so constructed in order that horse-drawn carriages might enter thereon at highway crossings, and in order that the members of the general public might drive their own "carriages" thereon, if they so desired.

That grade crossings, as such, are not "dangerous" in the contemplation of the legislature, is shown by the course of legislation ever since the first railroad was built in this state. The statutory history of the state abounds in illustrations of legislative recognition of the legality and necessity of grade crossings if railroads are to be built and operated at all. Reference to many of these statutes will be found in the opinion of Stevens, V. C., in *Newark v. Erie R. Co.*, *supra*.

A recent illustration is Chapter 181, Laws of 1914, p. 340. This provides for certain forms of protection at grade crossings in the way of safety gates, flagmen, electric bell, electric signs or other recognized system of alarm or protection which shall receive the approval of the Board of Public Utility Commissioners. This statute applies to every public road or street crossing railroad tracks at grade, meaning thereby all roads or streets which have been improved by joint action of the state and a municipality, county or township, under the laws of the state relative to the improvement of public roads; as to other roads the power of compelling "protection" remains. (See Section 7 of statute.)

This statute also recognizes that whatever danger to public safety there may be at grade crossings may be reduced or eliminated by methods of protection other than the elimination of the crossing itself by altering such crossing to a crossing not at grade. It so happens

that in the present case every one of the crossings involved is already provided with one of the forms of protection specified in this statute.

The right to cross streets *at grade* is also recognized, and expressly conferred upon the municipal railroads authorized to be constructed and operated by the legislature of 1915. (See Chap. 350, p. 647, Laws of 1915, Sec. 6; Chap. 412, p. 860, Laws of 1915, Sec. 1.) The same right is impliedly recognized in the very act under which the Board of Public Utility Commissioners is organized; Section 21 of the statute of 1911 permits the construction of grade crossings on obtaining the permission therefor from the board; Section 22 permits railroads and street railways to cross each other at the same level on making "reasonable provision for the protection of the travelling public," and gives the board power to order the adoption of such provision as the board deems necessary.

Under this Section 22 the question to be considered is whether the safeguards "measure up to the danger to be encountered." See *Erie R. R. Co. v. Board of Public Utility Commissioners and Hudson County* (Re Belleville Turnpike), 90 N. J. L. 271, 95 Atl. 177.

The course of legislation in New Jersey from the time when the elimination of grade crossings became a practicable matter for consideration is shown by the following summary of the New Jersey statutes on this subject.

1874, p. 45.

Authorized any city to enter into contracts with railroad companies whose roads enter corporate limits, whereby said companies may re-locate, change or elevate their railroads and when necessary for that purpose

gives power to vacate, change the grade of or alter the lines of any streets or highways therein.

Repealed by ch. 176 Laws of 1904, p. 317.

1893, p. 157.

Supplement to the above act. Amends section 1.

Repealed by ch. 176, Laws of 1904, p. 317.

186, p. 139 (3 Comp. St., p. 4262).

An act for the abolition of railroad grade crossings in cities of the first class.

Section 5 provides for certain expenses to be borne by the city.

1900, p. 312.

Supplement to 1874, p. 45, *supra*, providing for the issuance of bonds to pay the city's portion of the cost of a contract entered into under the provisions of said prior act.

Repealed by ch. 176, Laws of 1904, p. 317.

1901, p. 116 (3 Comp. St., p. 4266).

Authorizes any town or city to enter into contracts with railroad companies whose roads enter their corporate limits, to change or elevate their railroads, and, when necessary for that purpose, to vacate, change the grade of, or alter the lines of any streets or highways therein.

1902, p. 402 (3 Comp. St., p. 4266).

Amends section 2 of the act, 1901, p. 116, prescribing the method by which the town or city shall provide the necessary money.

1903, p. 645 (3 Comp. St., p. 4234).

An Act concerning railroads (Revision of 1903), Section 30, p. 661, authorizes any "municipality or town-

ship" to enter into contracts with the railroad companies for the construction or maintenance of crossings other than at grade.

Provides that nothing herein shall repeal or in any-wise effect the act of 1901, p. 116.

1903, p. 645 (3 Comp. St., p. 4234).

An Act concerning railroads (Revision of 1903), Section 31, provides that the Board of Chosen Freeholders may make contracts for changes in the grade of county roads.

1903, p. 645 (3 Comp. St., p. 4235).

An Act concerning railroads (Revision of 1903), Sections 32 and 33 provide for the crossing of steam railroads by trolley roads at points "not within the limits of any city" and gives power to the Chancellor to define the mode of crossing. Also gives the company power to alter grades and to take such land as may be necessary; requires it to pay the damages for the change of grade.

1904, p. 372 (3 Comp. St., p. 4258).

An Act to provide funds to enable any city or other municipality in this state to meet its obligations under any contract heretofore or hereafter made with railroad companies whose roads enter its corporate limits, for the change or elevation of their railroads, and, when necessary for that purpose, for vacating, changing the grade, or altering the lines, of any street or highway therein.

1912, p. 914.

Amendment to an Act concerning public utilities, etc., provides for division of expense in certain proportions and requires the removal of one grade crossing each year for every 30 miles.

This statute was held invalid by the Supreme Court in opinion reported 83 N. J. L., p. 303, and judgment to that effect was entered Nov. 26, 1912 (see Laws of 1913, pp. 894-6).

1915, p. 98.

Amends Section 30 of the Revision of 1903 and retains proviso as to the act of 1901, p. 116.

1915, p. 100.

Authorizes municipalities to contribute to expense of changing grade crossings, etc.

It will be seen that the legislative policy of New Jersey has been to provide for the elimination of grade crossings by *contract* between the municipality and the railroad company. From the first of the statutes on this subject, that of 1874, to the most recent, that of 1915, there is none which provides that the entire expense must be borne by the railroad.

On the contrary, they all provide either that certain of the expense be paid by the municipality or that the municipality may make contracts with the company. As it takes two to make a bargain the necessary implication from these statutes is that the municipality is expected to pay a reasonable part of the cost—and that, in fact, in many cases has been the result of the elimination of crossings under such statutes. See, for example, the case of *Morris & Essex R. R. v. City of Newark*, 76 N. J. L. 555, where a contract was made between the city and the railroad for the elimination of tracks in that city, pursuant to the provisions of the act of 1901, p. 116. Several of these statutes are still in effect and operations thereunder are now in progress in various municipalities, such as Morristown, Summit, Madison,

Chatham, South Orange, Orange, East Orange, Ridgewood and Rahway.

So far as concerns public opinion in the state of New Jersey, it is difficult to get a fair statement thereof from any of the municipalities who may be interested in having the crossings eliminated. Of course, if they can, they want to force the railroad to assume the entire burden, but if we take the Board of Public Utility Commissioners (and its predecessor, the Board of Railroad Commissioners) as representing the consensus of impartial opinion, then it is significant that both of these boards in their official reports to the legislature have repeatedly committed themselves to the view that in considering the problem of grade crossings the fact must be recognized that the elimination thereof is a benefit to the general public as well as to the railroads, and that, therefore, a reasonable division of the cost should be made between the railroads, the municipalities and the state.

We quote from these reports as follows:

From First Annual Report of Board of Railroad Commissioners for 1907, pp. 12, 13:

"To invest the board with direct authority on its own initiative or to make it the duty of the board to abolish all crossings where railroad tracks traverse highways at grade under conditions which create a menace to life or an obstruction to travel might be of doubtful wisdom. It might be suggested that the power thus conferred is extraordinary if not excessive; that its unreasonable or arbitrary exercise might create hardship and perhaps unnecessary financial embarrassment to the companies affected; and that a safer and perhaps a more judicious method would involve a plan somewhat akin to that adopted in Massachusetts and other states. How this subject of vital public interest has been dealt with elsewhere will appear from an examination of the brief summary

of the statutes of a number of the states which have thus far legislated upon the matter. This summary will be found under separate heading and attached to this report. The commission would suggest the following as a method which seems just and safe: That whenever a certain number of citizens (number to be fixed by statute) who in fact make use of a particular grade crossing, or the governing body of any municipality, shall deem such crossing a menace to life or obstruction to public travel, they may set forth the facts in a formal petition addressed to the Chancellor of the state who shall thereupon make an order directing the commission to inquire into the allegations set forth in the petition and report in writing with promptness to the court the result of its investigation. This method would involve a full hearing before the commission, not only of the petitioners but of the railroad affected. The report of the commission must, of course, embody its finding of fact and upon it, after review, by the court, the Chancellor will make his order, either ordering the crossing to be abolished or permitting its maintenance under conditions shown or such modified conditions as the court may deem proper.

"It will be observed that this plan leaves, generally, the initiative with the communities immediately affected by the presence of the crossing; that the finding of the commission in every instance, must pass in review before the Court of Chancery and that thus any unreasonable or arbitrary exercise of power will be rendered impossible, and finally, that the order disposing of the matter is made by a court, which is able promptly to enforce its commands by attachment for contempt or other methods.

"It is thought by the commission that the problem of dealing with grade crossings can best be met by this or some kindred method.

“Furthermore it would seem that the law should provide clearly that the cost of the elimination of grade crossings should either be borne wholly by the railroads concerned, or it should ordain a consistent division of the expenditure involved between the railroads and trolley companies and the state and the benefited municipalities as is done in certain other states. If the latter plan is adopted the law should state the local cost which should be proportionate to the population, or wealth, or both, of the municipalities involved.”

From same Report, p. 291:

“Believing that the legislature will consider the enactment of additional legislation upon this subject the board has prepared a digest of the laws of a number of states, relating to grade crossings, in which there may be found methods worthy of consideration and adoption by our own state.”

(The laws of other states, referred to, are New York, Massachusetts, Connecticut, Vermont, New Hampshire, Maine, Rhode Island and Ohio—in none of which is the entire cost of eliminating grade crossings imposed upon the railroad.)

From First Annual Report of Board of Public Utility Commissioners for the year 1910, pp. 5 and 6:

“While some advance has been made in the protection of grade crossings, and the method whereby protection can be obtained has been simplified, it is a matter of regret that no comprehensive law has been enacted providing for the elimination of such crossings, and that satisfactory progress in this direction cannot be noted.

“A consideration of the laws of other states, and of the effect of these laws, convinces the board that the most progress is made in this direction where there is a frank recognition of the fact that the elimination of grade crossings is beneficial to

the general public as well as the railroads, and a provision is made, as in New York, Massachusetts and other states, for a division of the cost of elimination between the railroad companies, the state and the municipalities. It is our opinion that a law giving the board power to order the abolishment of dangerous grade crossings and providing for an equitable division of the cost between the companies, the state and the municipalities should be enacted.

"The railroad companies being the more directly benefited, should, under such a law, bear the greater part of the cost.

"The sum to be paid by the state should be limited by law, and municipalities which are found to have excessive or dangerous crossings should be required to pay for the same a certain percentage of the cost. The sum to be paid by any municipality in any one year must not exceed a certain percentage of its income from taxation. This sum should be so limited as to prevent any unreasonable disbursement of the municipality funds for this purpose, and the interest of the municipalities could be further protected by providing that no order of the Board of Public Utility Commissioners requiring the abolishment of a grade crossing shall be issued except after hearing on the application of the governing body of the municipality where the crossing is located, or of a certain number of citizen taxpayers thereof."

To prevent undue burdens falling upon municipalities, the law, while naming the proportion of the cost to be borne by them in the event of orders being issued for the elimination of one or more crossings within their limits, should provide that the sum to be paid by any municipality in any one year must not exceed a certain percentage of its income from taxation. This sum should be so limited as to prevent any unreasonable disbursement of the municipality funds for this purpose, and the interest of the municipalities could be further protected by providing that no order of the Board of Public Utility Commissioners requiring the abolishment of a grade crossing shall be issued except after hearing on the application of the governing body of the municipality where the crossing is located, or of a certain number of citizen taxpayers thereof."

From Second Annual Report of Board of Public Utility Commissioners for the year 1911, pp. 21-22:

"The problem of eliminating grade crossings in such fashion as to minimize most rapidly the existing danger they present, cannot be successfully attacked in desultory or haphazard fashion. Not only must a census of existing grade crossings be made, but of even more importance is a classification of crossings with respect to the relative hazard which they create. A mere mechanical requirement that carriers must eliminate yearly a certain number of grade crossings might easily result in expense without a commensurate diminution of danger. It is evident that a great difference exists in the financial ability of the different carriers to provide funds for defraying the requisite expense. This is wholly apart from the question whether the carriers, including trolley companies, are to be required to bear the whole cost or only part thereof. Moreover, many other factors enter to complicate the matter. The elimination of grade crossings may adversely affect adjacent property. If, for example, tracks are elevated in eliminating a crossing at grade so as to transform a street into a blind alley, the loss of immediate accessibility may result in depreciating the property on the street in question. Similarly the construction work might often require a relocation of sewers or pipe systems to the financial detriment of a municipality, a public utility or an individual. These things tend to increase the cost of grade crossing elimination which, as a state-wide proposition must be very great.

"This is illustrated by the experience of Massachusetts where conditions are not dissimilar to those in New Jersey. There was expended in that state for grade crossing elimination from the time its grade crossing act became effective in 1890, until the close of 1910, the sum of \$24,372,048.03. Of this total the different railroad companies expended \$21,400,841.76, the state \$8,800,021.74; the different cities and towns, \$4,414,995.60, which sum of \$34,615.94 was paid from the Metropolitan Park Loans Fund.

"The magnitude of the task of planning for the elimination of grade crossing elimination makes it imperative that the state, the railroad companies, the cities and towns, should cooperate in the work and that the burden of the cost should be shared by all.

"It is the opinion of the committee that the state should not undertake the work of elimination of grade crossings, but that it should provide for an equitable division of the cost between the railroad companies, the state and the municipalities.

"So far as the elimination of a grade crossing lessens damage costs, and the costs of protecting the crossing, it rebounds directly to the financial benefit of the railroad. So far as it permits greater speed and facility of operation it also helps railroad earnings. But the carriers must make a capital outlay on this elimination work; and so far as the annual charges on the outlay are not met by the economies and facilities provided by track elevation, the railroads are bound to obtain the residue of the increased annual charge from rates and fares. If the public owned and operated the roads, track elevation would necessarily be a public charge in its entirety. While it is argued that private ownership and operation for gain transfers the responsibility from the public

to the carrier, the interests of both are so closely related that in the final analysis, no matter what provision is made for its immediate assumption, a part of the charge must be borne by the public.

"If a law is passed which provides that grade crossings shall be eliminated without cost to the municipalities, it is not unreasonable to assume that, no public burden being apparent, an agitation will start for the elimination of grade crossings wherever they exist, for all grade crossings are objectionable and possess some element of danger.

"But to remove all these crossings must be necessarily the work of years; disappointment would ensue to those who had been led to look for immediate results, and doubt would arise as to the efficacy of the law, no matter how earnest and intelligent the efforts made for its application.

"If, on the other hand, the law provides that a part of the cost, which may be small, in proportion to that paid by the railroads, shall be borne directly by the municipality sharing the benefit, local movements for the abolition of grade crossings would be accomplished by a sense of direct financial responsibility, which would tend to concentrate public attention on efforts for the elimination of crossings where the danger and annoyance are greatest.

"It would seem that this concentration of attention would lead to more practical results than could be reasonably looked for if the efforts for crossing elimination are based upon the general public impression that all grade crossings in the state are to be eliminated without cost to any municipality in which such crossings exist. Any law providing for a division of the cost of eliminating grade crossings should be so framed that the municipalities would be protected against any extravagant or disproportionate expenditure of public funds for this purpose."

From Third Annual Report of Board of Public Utility Commissioners for the year 1912, pp. 10-12:

"In its report last year the board expressed its opinion on the elimination of grade crossings. The board reaffirms the views there outlined. The rational solution of the railroad grade crossing problem requires three things. It requires first of all an appreciation of the difference in hazard existing in the various classes of the 3,000 or more grade crossings now extant in this state. Grade crossings that girdiron a populous city section are immeasurably more perilous than a similar number of grade crossings intersecting a sparsely inhabited rural section, a scrub pine warren, a stretch of sea meadow or a strip of desert sand dunes. Evidently an intelligent estimate of the danger to be guarded against depends on a careful examination of the hazards presented by the various kinds of grade crossings, and a scientific classification of the crossings with respect to the hazards they offer.

"The solution of the problem demands, second, a realization of the magnitude of the work of elimination, and of the time and money that will be required for its completion. The state will be more than fortunate if by the end of two decades it sees the removal of all the really dangerous crossings at grade. The cost alone would prevent much speedier elimination. In the case of a few of the smaller carriers it will prevent any immediate removal of grade crossings whatever. To require them annually to eliminate a certain number of grade crossings per mile might easily bankrupt several of the smaller roads in the state.

"It is difficult now for some of these smaller railroads to maintain their tracks, bridges and equipment in such condition as to satisfy this board that their trains may be safely operated. Several years ago the lessees of one line cancelled their lease and passed out of existence as a railroad company, because they were financially un-

able to spend on the track and bridges the sum necessary to meet the reasonable requirements of the then Board of Railroad Commissioners. An arrangement was subsequently effected with other lessees, whereby the road was put in safe condition, and operation was resumed. But recently, and against the protests of those living along the line, the board has most reluctantly given its consent to discontinuance of daily passenger service on this road during part of the year. The board was satisfied from a careful consideration of the revenue and operating expenses of the road that it was being conducted at a material loss, and that a requirement of continued daily passenger service might and probably would result in its abandonment, with little prospect of any other company affording even the limited service the present operating company provides. It is not difficult to see what would happen if a road like this and a number of others barely able to keep their tracks and bridges safe for operation should be directed to spend thousands of dollars to eliminate their crossings at grade.

"In all railroad operations there are elements of danger, not alone in the crossing of highways at grade, but to those who travel on trains. It is the duty of railroad companies by good management, the installation of mechanical devices, proper system of signaling and strict enforcement of salutary rules, to eliminate these dangers so far as practicable, it is the duty of the state, and of railroad and utility commissions to whom power is delegated by the legislature to require railroad companies to take measures for the protection of the public and of their employees where reasonable protection is not voluntarily provided. There is a limit, however, to such requirements which cannot be passed if the railroad company is to continue to supply service.

"In the third place, a solution of the problem of grade crossing elimination will be hastened by

a recognition of the justice of distributing the cost between the carriers and the public, as represented by the state and the municipalities. There are cases where the grade crossings within the past two years have been forced on the carriers against their will. It is indisputable that in such cases the entire cost of removal could not be put upon the carrier without a gross violation of the dictates of common fairness. Where progress has been most marked in eliminating grade crossings, as in Massachusetts, there has been an equitable partition of the cost of elimination.

"Moreover, it must not be forgotten that the investment in grade crossing elimination cannot be had for nothing. If the companies are to spend the vast amounts such elimination requires, the consumer must expect in rates and fares to contribute to the cost. If the companies at their own expense exclusively pay the cost, the indemnity they may reasonably exact will be heavier than if the public contribute in the first instance to the project, and thereby obtain some rightful control over the process of elimination."

This same policy was approved by Governor Wilson in his veto message relative to Chapter 412, Laws of 1912. (See Laws of 1912, page 918.)

We quote therefrom as follows:

"The circumstances which surround this problem are not the same for any two railways of the state, but what might be a reasonable enough requirement for one of the railway systems of the state might be a very impossible situation and breakdown of the law, and that is certainly not the purpose of the people of this state. The bill does not forbid the creation of new grade crossings, neither does it attempt any classification of those already in existence. I take the liberty of quoting the following from the 'Comments of the Board of Public Utility Commissioners on Grade

Crossings' in the report of the board for the year 1911."

(Here follows extract from board's report of 1911—see above.)

"This quotation makes very clear the possible complexity and engineering difficulty of the whole matter.

"What is needed is an adequate enlargement of the powers of the Board of Public Utility Commissioners. That board can be empowered, and should be empowered, to push the elimination of such crossings as fast as is possible to push it without bringing hopeless embarrassment upon the railways. The law could easily establish a principle by which it might be determined when it was equitable that the several communities affected should participate in the expense and to what extent, if any, they should participate. In this way all the results that could possibly be attained by the present bill would be attained without the risk and perhaps the discouragement and discredit of attempting a thing, in itself inequitable and impracticable.

"The non-enactment of this bill into law will, of course, be a serious disappointment to the people of the state, but it will only concentrate their attention upon the just and equitable way of accomplishing the end in view. I do not believe that the people of the state as in such haste as to be willing to work a gross injustice, either to the railroads or to private owners of the property or to the several communities affected.

"Respectfully,

"WOODROW WILSON,

"Governor."

The policy of the state of New Jersey, as it existed prior to the statute now under review, that the municipality or other parties in interest should have a substantial share in the expense of the elimination of grade crossings, is not peculiar to that state. Thus, in the state of Indiana the Railroad Commission of that state suggested the enactment of a law for the elimination of grade crossings, the cost to be "divided between the railroad and the counties, cities and towns wherein the crossings are located, according to some fair basis to be determined by the Railroad Commission" (see Report of 1909, p. 13).

Likewise, in California the Railroad Commission, referring to the law of that state authorizing the commission to determine the proposition in which the expense or alteration or abolition of grade crossings should be divided between the railroad or street railways and the state, county or other public authority, stated as the general policy of the commission that:

"In the determination of applications presented under the above section of the law, the commission is addressing itself to the problem of safeguarding against accidents. And with the assured construction in the future of many new roads and of increased traffic, this problem promises to grow in importance.

"While the protection of the public demands and is being given every consideration, the commission, in imposing requirements, unavoidably must act within the limits of commercial feasibility. It manifestly would be unwise, by denying a projected road the right to cross highway at grade, to render its construction financially improvident, and, therefore, impossible by reason of the great additional expense of constructing over or under crossings. Nor should such additional cost be required of a county which desired to construct a new public highway across existing tracks, if the crossing at grade may be reasonably safeguarded.

"In each proceeding the applicant must establish a *prima facie* case of necessity to construct at grade. The proposed crossing is inspected by the commission and its engineer and the manner and point of crossing approved or modified and the terms of installation, operation, maintenance, use and protection prescribed in the other in accordance with the circumstances of each particular case.

.

"Underlying its decision is the constant endeavor of the commission so to exercise its powers as not only to protect the public against those corporate practices which have led to state regulation, but to foster and encourage the development of public utility enterprises and the investment of capital therein. The best interests of the public imperatively demand the observance of this general policy."

(See Report for period January 1, 1911, to June 30, 1912, pp. 97, 98.)

In Massachusetts the Board of Railroad Commissioners and the State Highway Commission made an elaborate investigation of the whole subject in accordance with the direction of the legislature of that state (see Chapter 125 of Resolutions for year 1912). Under date of January 9, 1913, a report was made to the legislature "on the advisability of changing the present basis of the apportionment of the cost of abolishing grade crossings."

The report recites that the joint board made a careful study of the statutes relating to the elimination of grade crossings in other states and of the history of the work of abolishing grade crossings in Massachusetts. The report then calls attention to the Massachusetts statute of 1890, providing for the cost to be apportioned on the basis of 65 per cent. to the railroad and the remaining 35 per cent. between the commonwealth and the city or town in

which the crossing is situate—provided that no more than 10 per cent. should be apportioned to such city or town. This method was amended in 1902, whereby a street railway company was assessed not exceeding 15 per cent. The report further calls attention to the fact that, in certain cases, the apportionment has been changed by special statutes, for example, in Boston, in one case the railroad paid but 55 per cent., in another 39 per cent., and in another 50 per cent.

The report then concludes that after a comparison of the law and practice in other states the percentage of the cost is apportioned on an equitable basis and that payment by the railroad company of substantially two-thirds of the entire cost was generally regarded as reasonable. The report further says:

“As the benefits of grade crossing elimination are not merely local, but are of great benefit to the whole travelling public, the assessment of 25 per cent. to the state does not seem unreasonable, especially as this amount may be greatly decreased where a street railway company is a party to the proceedings. The provision requiring an amount not exceeding 10 per cent. to be paid by the city or town seems also to be reasonable, as recognizing the peculiar local benefits received, but limiting the maximum amount which may be paid in any case.”

We have added to the brief as Appendix A further quotations from the report discussing the practice in other states.

As bearing upon the question of whether the statute of New Jersey now under review is unreasonable and arbitrary, we also beg leave to call attention to the course of legislation in other states on the subject of elimination of highway grade crossings at railroad tracks. Attached hereto as Appendix B will be found a summary of the

statutory law of the forty-seven states other than New Jersey. By reference thereto it will be seen that there are fifteen states, namely, Florida, Georgia, Idaho, Kentucky, Louisiana, Minnesota, Missouri, Montana, Nebraska, New Mexico, North Dakota, Oklahoma, Tennessee, Texas and Virginia, in which there is no legislation on the subject.

In the remaining thirty-two states where the matter is covered by legislation, practically every statute provides for a partial payment of the cost either by the state or by the municipality, and in none of them is the entire cost imposed upon the railroad company, unless the statutes of Alabama and West Virginia might be so construed. In several of the statutes the proportion of the cost which is to be paid by the state or the municipality and the proportion which is to be paid by the railroad is fixed by the statute itself, but in most of them it is left to the discretion of the administrative body which is charged with the authority to order or to supervise the elimination of crossings.

This entire subject was thoroughly investigated by a committee appointed by the National Association of Railway Commissioners—the membership of which was made up of the railroad and public utility commissioners of all the states where such commissioners have been appointed. At the twenty-third annual convention of this association, held at Washington in October, 1911, the committee on grade crossings presented a full report on the subject (see p. 57), which after an elaborate discussion, was adopted (see p. 60) with an amendment on a minor point which does not affect the matter now under consideration. In this report the committee said (*italics ours*):

"We fear that we would prove unworthy of the confidence reposed and justify your questioning the sincerity of our effort if as the result of all our investigations we have nothing to offer looking to a solution of the problems under consideration, and though it may be in part a repetition of what has previously been recommended, we believe that as to grade separation we should renew our efforts to have the legislatures of our respective states pass a law requiring that each railroad operating therein should be required to eliminate a given number of grade crossings each year, and at such points as the commission having authority in such states shall direct *the expense to be apportioned between the state and county, township or village, as the case may be, and the railroad company, as the commission shall determine, believing that the varying conditions under which grades are separated do not make it advisable that any inflexible rule or statute shall govern as to the manner of division of expense; that the commission of the state in which such crossings are separated, making an inspection of the premises and being thoroughly conversant with the conditions is in a better condition to determine the reasonableness of the apportionment of expense than any other body, legislative or otherwise.*"

Of course, these statutes and reports are not conclusive upon the question of whether the New Jersey statute is a reasonable exercise of the police power, but they do show that New Jersey has either taken a very long step in advance (as will no doubt be claimed by Paterson) or else it has taken a very long step backward—as compared with the trend of the legislation and opinion throughout the country.

There are also other elements which the court should consider in determining whether the police power has

been exercised in a reasonable manner; thus attention must be paid to the element of cost and the practical effect of the statute under consideration—although, as stated in the case of *Erie Railroad Co. v. Williams*, 233 U. S. 685, 58 L. Ed. 1155, “cost and inconvenience would have to be very great before they could become an element in the consideration of the right of a state to exert its reserved power or its police power.”

In *Wisconsin R. R. Co. v. Jacobson*, 179 U. S. 287, 45 L. Ed. 194, an order made under the laws of Minnesota directing two railroad companies to establish certain track connections was sustained as a valid exercise of the police power. In the course of the opinion the Court said (*italics ours*):

“Taking the facts which we have already enumerated into consideration, we think there is no justification furnished for the argument that the judgment, if enforced, would violate any of the constitutional rights of the plaintiff in error. In so deciding we do not at all mean to hold that under no circumstances could a judgment enforcing track connections between two railroad corporations be a violation of the constitutional rights of one or the other, or possibly of both such corporations. It would depend upon the facts surrounding the cases in regard to which the judgment was given. The reasonableness of the judgment with reference to the facts concerning each case must be a material, if not a controlling factor, upon the question of its validity. A statute, or a regulation provided for therein, is frequently valid, or the reverse according, as the fact may be whether it is a reasonable or an unreasonable exercise of legislative power over the subject matter involved. And in many cases *questions of degree* are the controlling ones by which to determine the validity, or the reverse, of legislative action.

177
The court in *Chicago, &c., Ry. v. Chicago*,
166 U. S. 226, 236; *Missouri Pacific Ry. v. Ne-
braska*, 164 U. S. 403, 416. So that where the
taking is under an administrative regulation the
defendant must not be denied the right to show
that as matter of law the order was so arbitrary,
unjust or unreasonable as to amount to a deprivation
of property in violation of the Fourteenth
Amendment. *Chicago, &c., Ry. v. Chicago*,
166 U. S. 226, 236; *Missouri Pacific Ry. v. Ne-
braska*, 164 U. S. 403, 416. *Chicago, &c., Ry. v. Chicago*,
166 U. S. 226, 236.

6. Since the decision in *Wisconsin, &c., R. R. v. Jacobson*, 179 U. S. 287, there can be no doubt of
the power of a state, acting through an admin-
istrative body, to require railroad companies to
make track connection. But manifestly that does
not mean that a commission may compel them to
build branch lines, so as to connect roads lying
at a distance from each other; nor does it mean that
they may be required to make connections at every
point where their tracks come close together in
city, town and country, regardless of the amount of

166

order of the public utility board. The question in each case must be determined in the light of all the facts, and with a just regard to the advantage to be derived by the public and the expense to be incurred by the carrier. For, while the question of expense must always be considered (*Chicago, &c., R. R. v. Tompkins*, 176 U. S. 167, 174), the weight to be given that fact depends somewhat on the character of the facilities sought. If the order involves the use of property needed in the discharge of those duties which the carrier is bound to perform, then, upon proof of the necessity, the order will be granted, even though "the furnishing of such necessary facilities may occasion an incidental pecuniary loss." But even then the matter of expense is "an important criteria to be taken into view in determining the reasonableness of the order." *Atlantic Coast Line R. R. v. North Carolina Commission*, 206 U. S. 1, 27; *Missouri Pacific Ry. v. Kansas*, 216 U. S. 262. Where, however, the proceeding is brought to compel a carrier to furnish a facility not included within its absolute duties, the question of expense is of more controlling importance. In determining the reasonableness of such an order the court must consider all the facts and circumstances, and the interests of the public, the carrier and the shipper, the volume of business to be affected, the saving in time and expense to the shipper, as against the cost and loss to the carrier. On a consideration of such and similar facts the question of public necessity and the reasonableness of the order must be determined. This was done in *Wisconsin R. R. v. Jacobson*, in which, for the first time, it was decided that a state commission might compel two competing interstate roads to connect their tracks."

Under the authorities cited under Point II the question of whether an order of an administrative board, directed to a public utility requiring changes or improvements, de-

pende in large part upon the cost of compliance therewith as compared with the necessity therefor and the advantage supposed to be derived therefrom. The authorities thus cited are:

Houston, etc., Ry. v. City of Dallas, 98 Tex. 396, 84 S. W. 648;

Northern Central Ry. Company's Appeal, 103 Pa. 621;

Pennsylvania, etc., R. Co. v. Philadelphia & Reading R. Co., 160 Pa. 227;

Cleveland, etc., Ry. Co. v. Street Public Utilities Commission, 273 Ill. 210, 112 N. E. 689;

Connecticut Company v. Town of Stamford, 110 Atl. 554;

Chicago, etc., Ry. Co. v. City of Minneapolis, 238 Fed. 384;

Chicago & N. W. R. Co. v. Ochs, 249 U. S. 416, 63 L. Ed. 679.

So likewise the question of the validity of a statute depends in large part upon the question of whether the expenditure directed to be made thereunder is reasonable or arbitrary; for, as we have shown above, the validity of such statute depends not merely upon what is in fact done but what might be required to be done by virtue of its authority. The rule as to expense is conveniently summarized in the *Ochs* case, *supra*, as follows:

"The expense is an important element to be considered in determining whether the requirement is within the bounds of reasonable regulation or is essentially arbitrary."

We have heretofore shown that the cost to the plaintiff in error of complying with the order under review will be not less than \$3,000,000, and will probably be

considerably more than that sum. We have also shown that if all grade crossings within the state be held to come within the class of "dangerous" the expense to the plaintiff in error of complying with orders made under this statute will be over \$15,000,000. We have also discussed the details of the financial circumstances of the plaintiff in error as presented to the board on the hearing of the city's petition and on the application for a further hearing. Without referring further to this testimony we urge that the conditions are so extraordinary that in the language of this Court, in the *Jacobson* case, *supra*, "regard being had to the facts" this order "unduly, unfairly and improperly affects the pecuniary rights and interests" of the plaintiff in error. Under the *Williams* case, *supra*, it is stated that the cost and inconvenience must be very great in order to justify the conclusion that the regulation under review is an unreasonable exercise of the police power. If ever there was a case to which that principle applies, this is it. Not only does the evidence show that the cost to the plaintiff in error will be very great, but it goes even further, and shows that it will be *so* great that it is impossible to comply with the provision of the statute.

In examining the question of whether a statute which imposes the entire burden of the elimination of the grade crossings is a reasonable exercise of the police power, let us also consider the practical effect of such a statute. We have already called attention to the fact that there are not less than 2,500 grade crossings in the state of New Jersey, and that the cost to the railroad companies if all were paid by them, would be \$137,500,000; and the cost to the plaintiff in error in the state of New Jersey to eliminate its 256 crossings would be over \$15,000,000. But let us go one step further, and see

what the cost would be over the entire Erie system, covering the states of New Jersey, New York, Pennsylvania, Ohio and Indiana—provided that in every state the legislature saw fit to exercise its “police power” in the same manner that New Jersey has attempted to do. The total number of grade crossings subject to elimination on the Erie system on May 1st, 1913, was 2,410; the number in each State being as follows:

New York	931
New Jersey	256
Pennsylvania	417
Ohio	589
Indiana	189
	<hr/>
	2,382

(p. 281, line 40; p. 282; line 49). The total as given in the foregoing table varies slightly from the total number of grade crossings, as in Indiana there are certain crossings which are not subject to elimination under the present law (pp. 282, 283).

If a law imposing the entire expense on the railroad company is valid in New Jersey, such a law is equally valid in every other state. Taking the total number of crossings as 2,410, and the average cost of eliminating each at the sum of \$55,000 (p. 289, line 30), it will be seen that the total cost to this one company would be \$132,550,000 (exclusive of property damage)—or about one-third of its present total capital stock and bonded indebtedness, of approximately \$493,000,000 (p. 1359). It may be said that there is no likelihood that the railroad company will call upon to meet this enormous burden for many years to come, if ever, but that does not affect the general proposition that if a statute like the one under consideration is valid in one state, it is equally

valid everywhere. If the present statute is sustained, what is more probable than that other states will modify existing statutes to accomplish the same result. If the present order and statute are valid, there is no legal reason why the Board of Public Utility Commissioners of the state of New Jersey should not proceed to order all the grade crossings on the Erie Railroad system in the state of New Jersey to be forthwith eliminated, when the conditions specified in the statute are found to exist; and it follows, of course, that if an administrative board in the state of New Jersey can legally make such an order or orders, similar boards in other states can do likewise, and the result is that there is no limit to the enormous burden that might thus be imposed upon a railroad company, short of the elimination of every grade crossing on its entire system. If it be said that the statute applies only to those crossings that are dangerous to public safety or what impede public travel, that does not relieve the situation, because the question of danger is largely a matter of degree, and under the opinion of the New Jersey Court, the mere passage of trains over a grade crossing constitutes an "impediment" thereto.

If an administrative body is given power to determine as a matter of fact what constitutes danger or impediment, and if its conclusion in that respect is binding on the reviewing court, except in a case where there is *no* evidence whatever to sustain it, then there is no limit to what might be ordered under such a statute, other than the sound discretion of the administrative body to whom is committed this vast power—a discretion which, if the present case be taken as an illustration, may be grossly abused to the serious financial detriment, and even bankruptcy, of the company that is unfortunate

enough to have a large number of grade crossings on its railroad.

Indeed, by the opinion of the New Jersey Supreme Court an order requiring the elimination of grade crossings is probably not even a matter of *discretion* on the part of the board. That court says that the word "may," as used in the statute, may mean "must." If it does mean "must," it follows that whenever the jurisdictional facts appear the board *must* order the elimination of the crossing. But whatever be the correct view on this point, the real question upon which the validity of the statute depends is not merely what is in fact done under the authority thereof, but what *might* or *could* be done thereunder, as indicated by the following authorities:

In *Ex parte Christensen*, 43 Fed., 243, it was said:

"The validity of an ordinance must be determined by its terms, by what it authorizes, not by the manner of its execution. It is valid or invalid irrespective of the manner in which it is in fact administered. Its capability of being abused is the test."

In *Grauger v. Douglas Park Jockey Club*, 148 Fed. 513, 521, it was held:

"The constitutionality of a statute must be determined by its provisions, and not by the manner in which it is in fact administered."

In *Sargent v. Rutland R. Co.*, 85 Atl. 654, held "the constitutionality of a law is to be tested, not by what has been done under it, but by what may rightfully, by its authority, be done." Citing *Montana Co. v. St. Louis Mining & Milling Co.*, 152 U. S. 160, 38 L. Ed. 398.

The constitutionality of a statute is to be determined not according to the grace or favor of the officials who

act under it, but according to the terms of the statute itself. *Security Trust Company v. Lexington*, 203 U. S. 323, 51 L. Ed. 204; *Georgia Ry. v. Wright*, 207 U. S. 127, 52 L. Ed. 134.

In *Security Trust Company v. Lexington*, *supra*, it was said:

"If the statute did not provide for a notice in any form, it is not material that as a matter of grace or favor notice may have been given of the proposed assessment. It is not what notice, uncalled for by the statute, the taxpayer may have received in a particular case that is material, but the question is, whether any notice is provided for by the statute." *The Bristol Case*.

It will be urged by the defendants in error that the present statute can be sustained under the decision of this Court in the Bristol case, *supra*, as against the claim of the plaintiff in error that the statute is an unreasonable exercise of the police power. It is true that in that case the Connecticut statute requiring the alteration of grade crossings under certain conditions was sustained. That statute, however, differed in several very important respects from the one now under consideration. It is quoted at length in the opinion of the court. It will be observed that under that statute, if the petition for the abolition of the crossing is filed by the railroad company the expense is to be paid by the railroad company "owning or operating the railroad"; and in case the petition is filed by the municipality, then an amount not exceeding one-quarter of the expense is to be paid by the municipality and the remainder by the railroad company owning or operating the railroad; if the highway affected by such last-mentioned order (that is, in a case where the municipality files the petition) has been constructed

since the *railroad*, the commissioners may order an amount not exceeding one-half of the whole expense to be paid by the municipality and the remainder by the railroad company. It is further provided (*italics ours*):

"The *directors* of every railroad company which operates a railroad in this state shall remove or apply for the removal of at least one grade crossing each year for *every sixty miles* of road operated by it in this state, which crossings, so to be removed, shall be those which in the opinion of said directors are among the most dangerous ones upon the lines operated by it, and if the directors of any railroad company fail so to do, the railroad commissioners shall, *if in their opinion the financial condition of the company will warrant*, order such crossing or crossings removed as in their opinion the said directors should have applied for the removal of under the above provisions, and the railroad commissioners in so doing shall proceed in all respect as to method of procedure and assessment of expense as if the said directors had voluntarily applied therefor."

The important distinctions in this statute, as compared with the New Jersey statute, are the following:

1. When the municipality petitions for the abolition of a grade crossing it must pay not exceeding one-quarter of the whole expense, the railroad paying the balance; whereas under the New Jersey statute the railroad pays it all (regardless of whether the railroad or the municipality files the petition), except certain trifling expenses for paving, curbing and flagging and for changes in municipal water or sewer pipes.

2. If the highway has been constructed since the railroad (in a case where the municipality files the petition), then the municipality may be required to pay not exceeding one-half of the expense; whereas the

New Jersey statute makes no distinction whatever between highways constructed before and after the construction of the railroad.

3. One grade crossing is required to be removed each year for every sixty miles of road; whereas under the New Jersey statute (as construed in the present case) any one or more, or indeed all, of the grade crossings of any particular road, may be ordered to be removed just as quickly and rapidly as the board can approve the plans therefor.

4. The directors have the option of deciding which of the grade crossings are among the most dangerous ones; whereas under the New Jersey statute the directors have no discretion whatever on the subject.

5. *Compulsory* elimination may be ordered only in the event that the directors of the railroad fail to remove one crossing for each sixty miles; and it is only in the event, first, that the directors fail so to do, and in the *further* event that the railroad commissioners come to the conclusion that *the financial condition of the company will warrant*, that then the commissioners may order the removal of the crossings; whereas by the New Jersey statute the Board of Public Utility Commissioners is given power to order the elimination of crossings *regardless of financial conditions of the company, and even in the face of positive and uncontradicted testimony to the effect that it would be impossible for the company to comply with the board's order.*

The decision in the Bristol case is further distinguishable from the present case in that the charter of the railroad company in that case was subject to the legislative power to amend, alter or repeal the same. This fact is mentioned in the opinion as one of the ele-

ments that justified the court in concluding that the Connecticut statute did not violate the constitution. In the present case no such reserved power is found in the charter of the Paterson & Hudson River R. R. Co., and therefore so far as concerns the crossing on the line of that company this part of the reasoning of the Bristol case does not apply.

It should be further observed that the decision in this case was apparently based in part upon the fact that the state courts of Connecticut had ruled that, under the law of that state, grade crossings were in the "nature of nuisances, which the legislature had the right to abate." This is quite different from the attitude of the courts of the state of New Jersey relative to railroads and the danger or inconvenience incidental to the operation thereof. Thus, in *Vreeland v. Forest Park Commission*, 82 N. J. Eq. 349, the Court of Errors and Appeals of New Jersey held that the act of April 12th, 1909, commonly known as the "Fire Line Act," was unconstitutional as a taking of lands without compensation, which could not be justified as a proper exercise of the police power. In reaching this conclusion, the court said:

"There is nothing in the nature of the land or its use that creates a nuisance to be abated" (p. 351).

The rule in New Jersey is that incidental annoyances and inconveniences due to the operation of railroad trains, are not to be considered as a nuisance, either public or private, but on the contrary, must be considered as in contemplation when the railroad charters were given.

Beseman v. Pennsylvania R. R., 52 N. J. L. 221, 20 Atl. 169; affirming 50 N. J. L. 235;

Pennsylvania R. R. v. Jersey City, 84 N. J. L. 716, 49 L. R. A. (N. S.) 715;

Jersey City v. Erie R. R., 84 N. J. L. 761;
Kelly v. Erie R. R., 86 N. J. L. 379.

On the question of whether the railroad commissioners of Connecticut were justified in concluding that the financial condition of the railroad company would warrant the elimination of the crossing under consideration, the U. S. Supreme Court in the Bristol case held that that was a question of fact which it would not review unless it appeared that the error was so "gross" as to amount *in law* to a denial by the state of the rights secured under the constitution of the United States.

In the present case we submit that this Court has the right to consider and decide whether the action of the board in making the order under review was arbitrary; and if under the statute the board has no discretion but *must* order the elimination of crossings, regardless of comparative advantages to the public and the railroad, and of the financial condition of the latter, then we insist the statute violates the Due Process Clause.

The defendants in error may also cite the case of *Missouri Pacific Ry. Co. v. City of Omaha*, 235 U. S. 121, 59 L. Ed. 157. This was an injunction suit brought by the railroad to enjoin the city from enforcing an ordinance whereby the railroad was required at its own expense to construct a viaduct across its line of railroad at a certain street. The cost of the construction was \$80,000. It does not appear from the opinion whether the street was laid out and opened before or after the construction of the railroad tracks. This Court affirmed a decree of the Circuit Court dismissing the bill. In the course of the opinion the Court, referring to the police power, said (*italics ours*):

"So long as the means have a substantial relation to the purpose to be accomplished, and there

is no *arbitrary interference with private rights*, the courts cannot interfere with the exercise of the power by enjoining regulations made in the interest of public safety which the legislature has duly enacted."

The court also indicated in the opinion that if there was an "abuse" of the authority of the state or if the action was "arbitrary and oppressive," then the court would interfere by injunction or otherwise. It follows that if the court is satisfied that the action complained of is arbitrary and oppressive then it is both the right and the duty of the court to interfere.

Defendants in error may also cite the cases of

Northern Pacific Ry. Co. v. Duluth, 208 U. S. 583, 52 L. Ed. 630;

St. Paul etc. Ry. Co. v. Minnesota, 214 U. S. 497, 53 L. Ed. 1060;

Cincinnati etc. R. Co. v. Connersville, 218 U. S. 336, 54 L. Ed. 1060;

Chicago etc. Ry. Co. v. Minneapolis, 232 U. S. 430, 58 L. Ed. 671;

Lake Shore etc. R. Co. v. Clough, 242 U. S. 375, 61 L. Ed. 374.

In all of these cases the railroad was required to pay the expense of the construction of highway bridges. But as we have shown in discussing these cases under Point VIII, the decisions were rested upon the settled law of the state as indicated by the decisions of the state courts requiring railroads to construct overhead crossings at highways which had been laid out and opened after the construction of the railroad. These decisions are therefore not conclusive of the claim now made that this Court has the right to determine whether a requirement that the railroad

construct such bridges is an unreasonable exercise of the police power—particularly when we consider the insignificant expense to the railroad in those cases as compared with the enormous amount involved in the present case. For example, in the *Duluth* case in 208 U. S., the ordinance in question requires the railroad to make certain repairs to a bridge. The cost of the repairs is not stated in the opinion but as the total original cost of the bridge was only \$73,000 it is apparent that the amount involved must have been much less than that sum.

In the *Minnesota* case in 214 U. S., only one street and one bridge was involved; the cost does not appear from the opinion.

In the *Connersville* case in 218 U. S., a street was opened through a railroad embankment. The allowance to the railroad for damages by reason of such opening was fixed at \$800; the opinion does not show what was the total cost of the work.

In the *Minneapolis* case in 232 U. S., the improvement in question was the construction of a bridge to carry the railroad tracks across a canal which had been built as part of a park development. It was held that the railroad was not entitled to compensation for the cost of the bridge—which the opinion shows was about \$18,000.

In the *Clough* case in 242 U. S., the cost to the three railroad companies who were parties thereto was about \$160,000 for the expense of bridging a drainage ditch.

But in the present case the expense is a matter not of a few thousands but literally of millions; the original estimate made six years ago was nearly \$3,000,000 and it is a fair assumption that at the present time the amount of this estimate should be at least doubled. This enormous expense is imposed upon the plaintiff in error without any public necessity therefor; it does not even appear that the

public convenience will be materially advanced; and this large expense is required within the limits of a single municipality over a stretch of less than two miles out of a main line track of nearly 2,500 miles, without any consideration for the need of other and more immediately pressing and important expenditures which should have been made long since by the plaintiff in error if it had had the financial ability to do so, and without regard to the undisputed testimony that the plaintiff in error was absolutely without the financial means, either by way of cash in hand or by means of ability to borrow, to pay the cost required by the order under review and authorized by the statute upon which the order was based.

Counsel for defendants in error may also cite the cases of:

Atlantic Coast Line R. Co. v. Goldsboro, 232 U. S. 548; 58 L. Ed. 721.

Chicago & Alton R. Co. v. Tranbarger, 238 U. S. 67; 59 L. Ed. 1204, and

Great Northern R. Co. v. Clara City, 246 U. S. 434; 62 L. Ed. 817,

in support of the proposition that the state has the right to make various regulations affecting the health and safety of the public.

In the *Goldsboro* case, this Court sustained the validity of certain municipal ordinances which limited the speed of trains, required flagmen to precede them, and directed the railroad to change its grade at certain crossings. In that case the railroad tracks were constructed on a right of way which ran through the middle of what afterwards came to be the principal street of the town. One of the provisions of the ordinances in question required that the tracks be lowered, to conform to the

grade line of the street, and to fill in the tracks between the rails; the lowering being 6 inches at one point, 10 inches at another and 18 inches at another. It was pointed out, however, that if it appears that there is "wanton or arbitrary interference with private rights" the question then arises—whether the law making body has exceeded the legitimate bounds of the police power.

In the *Tranbarger* case suit was brought to recover a penalty fixed by a statute which required railroad companies to construct suitable openings across and through the right of way and roadbed, in order to afford proper drainage for surface water. This Court sustained the recovery of the penalty, in an action brought under such statute, on the ground that it was a "fair exercise" of the police power.

In the *Clara City* case, the railroad company was required to build a sidewalk at a highway crossing, in accordance with the provisions of a state law of Minnesota, which required railroad crossings to be planked at points where they crossed public streets and also required the construction of sidewalks across the tracks to connect with sidewalks constructed by the municipality or by the owners of abutting property. The statute was held valid, but the Court pointed out that such statutes might be declared unconstitutional "where they are arbitrary or unreasonable attempts to exercise authority vested in the state in the public interest."

All of these cases are very different from the present, where the statute compels the Board of Public Utility Commissioners (in case any order is made at all) to direct that the entire expense—sometimes amounting to millions of dollars—shall be paid by the railroad company, less the insignificant portion of not exceeding 10 per cent. if a street railway happens to cross the

tracks of the railroad company. Such a statute, we submit, is not a "fair exercise" of the police power and is "arbitrary and unreasonable" and, therefore, under the principles laid down in these very cases, it should be declared invalid.

Reference may also be made to the various cases in this Court which have held that railroad companies may be compelled, without compensation, to reconstruct bridges across navigable waters, when the increasing demands of traffic require such construction. *Chicago &c. Ry. Co. v. People*, 200 U. S. 561, 50 L. Ed. 596; *Chicago Railroad Co. v. City of Chicago*, 201 U. S. 506, 50 L. Ed. 845; *Union Bridge Co. v. United States*, 204 U. S. 364, 51 L. Ed. 523; *Monongahela Bridge Co. v. United States*, 216 U. S. 177, 54 L. Ed. 435; *Hannibal Bridge Co. v. United States*, 221 U. S. 194, 55 L. Ed. 699.

The decisions in this series of cases were based upon the ground that a railroad company was obliged to change its tracks in order to conform to the changed conditions of navigation, as, otherwise, the continuance of the tracks in existing locations would amount to a permanent obstruction of the waterway. This is very different from the case of railroad tracks that cross public streets. There can be no pretense in this class of cases that the tracks obstruct, or substantially interfere with, the use of the public highways. In the bridge cases, Congress was exercising a right over navigable waterways which was held to be "paramount," and, therefore, the railroad tracks were necessarily altered in order that the said right might continue to be exercised without obstruction. But, so far as public streets are concerned, there is no paramount right as between the railroad and the street—unless, indeed, the railroad

may be said to have a paramount right with respect to all streets, except those that were in existence at the time the railroad was constructed. Even as to waterways, it is doubtful if the principle of the bridge cases would be extended to artificial channels which were laid out after the construction of the railroad tracks, as distinguished from natural waterways which were in existence at the time of the construction of the tracks. It was so held by the Supreme Court of Illinois in the case of *East Side District v. East St. Louis, &c., Ry.*, 279 Ill. 123, 116 N. E. 720. This decided that a railroad company was entitled to be reimbursed for the cost of the work of elevating its tracks, excavating a channel and building a bridge, which work was made necessary by the construction of a new and artificial channel and a levee across its right of way.

A recent illustration of the foregoing argument is found in the decision of the United States District Court of Minnesota in the case of *Chicago, &c., R. Co. v. City of Minneapolis*, 238 Fed. 384. In that case, the railroad brought suit to enjoin the city from enforcing an ordinance which required the elimination of certain grade crossings by the depression of the tracks. The total cost to the railroad of changing its tracks to conform to the provisions of the ordinance was more than \$5,000,000. The railroad urged that the tracks should be elevated rather than depressed and showed that the expense upon the elevated plan would be \$3,000,000 less than on the depression plan. The Court pointed out that under a statute of the state of Minnesota, the city had the power to pass an ordinance providing for the separation of the grades of streets and railroad tracks, but came to the conclusion that the ordinance imposed an unnecessary and unreasonable expense upon the

railroad company and the industries served thereby to the extent of several million dollars, and that this amounted to "a practical confiscation of their property." (See page 405.) A permanent injunction was issued restraining the enforcement of the ordinance.

The only case in this Court in which the question of the validity of a state law providing for the abolition of grade crossings has been directly involved, is the Bristol case, *supra*. As we have already shown that case is distinguishable both on the facts and on the statute then under consideration.

The injustice and unreasonableness of compelling the railroad company to assume the entire burden of expense of eliminating grade crossings is shown in a striking manner in the present case. The "danger" upon which the board relies as the justification for making the order under the statute is due in large part to the city's own acts. At the three crossings where the highway traffic is heaviest, the city has given a street railway company the right to use the streets. The railroad company had nothing to say about that and could not reasonably be held responsible for any dangers resulting therefrom, and to the extent that the existence of the street railway tracks and the operation of its cars thereon contribute to or constitute "danger," that cannot be attributed to the railway company.

So far as the pedestrian and vehicular traffic is concerned, that is a matter which is the natural result of the development of the city and is not in any sense chargeable to the railroad company. So far as the "danger" may be said to arise by reason of obstructions to view, the evidence shows that in nearly every case these obstructions are located off of the railroad

property. The railroad company is not responsible for them and has no control over them.

The company has done all that it could to meet the "dangers to be encountered" (see 95 Atl., p. 177) from the operation of trains by providing gates and watchmen at every one of the crossings in question.

Assuming for the purpose of argument that the conditions at all of the crossings in question are such as to justify the conclusion that they are "dangerous to public safety" and that public travel is "impeded" thereby, the fact remains that the railroad is not the only agency responsible for such conditions. They are the result not merely of the running of trains, but also of the growth of the city and of the increased use of the crossings by reason thereof for vehicular, pedestrian and trolley traffic. They are also the result in part of the construction of factories and other structures near the right of way. It is highly inequitable to require the railroad company to pay the sole expense of removing dangers and impediments of which only a part can be ascribed to it. This argument is illustrated by the decision in the case of *City of Milwaukee v. Railroad Commission of Wisconsin*, 155 N. W. 948. There the court had under consideration a statute which authorized the railroad commission upon the petition of a municipality to order alterations in railroad crossings and to fix the proportion of the costs to be paid by the railroad company and the municipality. The commission ordered that the city pay 25 per cent. of the cost, the railroad 70 per cent. and a street railway 5 per cent. The city brought proceedings to set aside that part of the order which assessed 25 per cent. of the cost against it. The court sustained the order, saying (*italics ours*):

"Milwaukee has during the last half century become a great and prosperous city. Its great-

ness and prosperity must have come because of its commerce, and its commerce has come largely because of its railroads. Without them Milwaukee as we know it today would not exist. The growth of the city and of the railroads has been coincident, inter-dependent, inseparable, and from this growth has arisen the great danger of the grade crossing. *Why should not the expense of removing that danger be equitably shared by the different agencies whose joint growth has brought it about?*"

The New Jersey Supreme Court in its opinion cited the case of *Morris & Essex R. R. Co. v. City of Orange*, 63 N. J. L. 252, as establishing the principle that a regulation for public safety under a police power of the state is not a taking of private property without just compensation, although conformity to such regulation involves expense (p. 2289, ll. 10-20).

In that case it was held that a railroad is not entitled to compensation for the use of its tracks for a highway crossing at grade and that it was not entitled to receive an allowance for the erection and maintenance of gates, sign-boards, cattle-guards, etc. But it was also held that for an injury occasioned by *structural changes*, such as the removal of buildings or changes in the tracks, adequate compensation should be made (see page 270). The latter principle, we submit, is the one that applies to a case like the one now under consideration, where the purpose of the statute cannot be carried out without making many and expensive "structural changes."

Furthermore, in any event the question still remains whether the police power has been exercised in a reasonable manner; and upon that question the item of expense must be taken into consideration.

In the *Morris & Essex* case, *supra*, the amount of the damages claimed by the railroad, as the result of opening the street across its track at grade, aggregated the sum of about \$18,000, which was based upon a capitalization of the items for the value of the land and of the cost of construction of planking and gates and the maintenance of gates and flagmen (see page 254).

If we select from these items those which were occasioned by "necessary structural changes," we find that they amounted to only about \$600, namely, the cost of re-constructing a switch and the cost of constructing a culvert, the capitalized value of which, at 5 per cent., would be only about \$12,000. It is difficult to see how any precedent that is worth while can be obtained from a case of this kind where the expense is so trifling as compared with the enormous expenditure of \$3,000,000 and upwards, practically all of which is for structural changes. The present statute not only makes no allowance to the railroad for these changes, but it compels the railroad itself to pay for them.

We, therefore, submit that the statute in question is an unreasonable exercise of the police power because:

(a)

The statute, in many material respects, is different from the statutes sustained in the Bristol and other cases.

(b)

The methods authorized thereby for the elimination of grade crossings are "arbitrary and capricious."

(c)

The provisions thereof are directly contrary to the course of legislation and general public opinion both within the state of New Jersey and elsewhere within the United States.

(d)

The cost thereby imposed upon the railroad company is practically confiscatory of its property.

CHAPTER THREE.

Conclusion.

XI.

If, for any of the foregoing reasons, any part of the statute upon which the order under review is based is invalid, then the entire statute must fall; if, however, the statute is valid, but, nevertheless any part of the order under review is invalid, then the entire order must be set aside.

Unconstitutional provisions may be eliminated from a statute only where they are interjected into an enactment otherwise valid, and are so independent and separable that their removal will leave the constitutional features and purposes of the act substantially unaffected by the process.

Johnson v. State, 59 N. J. L. 535, 539.

Hamm v. Bedell, 67 N. J. L. 148, 150.

Riccio v. Hoboken, 69 N. J. L. 649, 661.

State v. Davis, 72 N. J. L. 345, 348.

Rutherford v. Hudson River Traction Co., 73 N. J. L. 227, 234.

Fagan v. Payne, 75 N. J. L. 851.

Hutches v. Borough of Hohokus, 82 N. J. L. 140.

In re Van Horn, 74 N. J. Eq. 600, 603.
36 Cyc. 976.

In *Riccio v. Hoboken*, 69 N. J. L. 649, 661, *supra*, it was said:

“It is argued, however, that these unconstitutional features may be treated as excrescences upon the general scheme of the act, and may be totally disregarded, leaving the statute in its main features to remain. Upon this question we adhere to the declaration of Mr. Justice Depue, afterwards Chief Justice, speaking for this court, in *Johnson v. State*, 30 Vroom, 535 (at page 539): ‘It is undoubtedly elementary law that the same statute may be in part constitutional and in part unconstitutional, and if the parts are wholly independent of each other, that which is constitutional may stand, and that which is unconstitutional will be rejected. But if the different parts of the act are so intimately connected with and dependent upon each other as to warrant a belief that the legislature intended them as a whole, and that if all could not be carried into effect the legislature would not have passed the residue independently, and some parts are unconstitutional, all the provisions which are thus dependent upon each other must fall.’”

In *Hann v. Bedell*, 67 N. J. L. 148, 150, *supra*, it was said:

“By the supplement of 1892 the legislature sought to extend the scope of the original act by embracing towns within its provisions, and by altering the method of selecting members of the excise board in all the municipalities affected by the legislation, except in cities of the first class. So far as the attempt to subject towns to the

provisions of this statute is concerned, it is manifestly, directly in the face of the constitutional provision. And in our judgment this illegality vitiates the whole act. Where an unconstitutional feature stands by itself, and is separable as a distinct thing from the body of the act, and there is no reason to suppose that it constituted an essential motive to the enactment of the law, only the unlawful superaddition to the declared object of the statute will be held to be inoperative and void. *Rader v. Township of Union*, 10 Vroom, 569. But where it cannot be so separated or where it is apparent that the eliminated portion does not constitute an essential motive for legislative object, the whole act must fall. The principle object of the supplement of 1892 was to include towns in the scheme for regulating the exercise, and to divide the municipalities embraced in that scheme into two classes, the first class to embrace cities containing a population of more than one hundred thousand, and the second class to embrace all other cities in the state, and all towns, a different method being provided of selecting members of the board of excise in these two classes of municipalities. To declare inoperative and void only that feature of this law which renders it unconstitutional would be in violation of the principle above enunciated, and would retain upon the statute-book a law which the legislature never passed, and which very probably, it never would have enacted."

In *Rutherford v. Hudson River Tr. Co.*, 73 N. J. L. 227, 234, *supra*, it was said:

"Were we to hold the requirement for paving Park avenue to be an unreasonable restriction, and therefore unjustified by section 7 of the Traction Act (with the result of declaring section 9 or the ordinance *ultra vires* the municipality, then the whole of the ordinance, including its grant of privileges and franchises, must fall at the same time. For, undoubtedly, the provision of macadam-

izing is an essential part of the ordinance, without which it presumably would never have been adopted. The same reasoning applies here that is applicable to an act passed by the general legislature containing some unconstitutional features. As was said by the Court of Errors and Appeals, in *Riccio v. Hoboken*, 40 Vroom, 662: 'In the absence of any express declaration to the contrary contained in the act itself, the presumption is that the legislature intended any given enactment to be effective in its entirety. *Iowa Life Insurance Co. v. Eastern Mutual Life Insurance Co.*, 35 Vroom, 340, 346. In seeking the legislative intent, the presumption is against any mutilation of a statute, and the courts will resort to elimination only where an unconstitutional provision is interjected into a statute otherwise valid, and is so independent and separable that its removal will leave the constitutional features and purposes of the act substantially unaffected by the process.' "

The rule is stated in 36 *Cyc.* 976, *supra*, as follows:

"It is elementary that the same statute may be in part constitutional and in part unconstitutional, and if the parts are wholly independent of each other, that which is constitutional may stand while that which is unconstitutional will be rejected. The rule is, however, subject to several important limitations, and the whole statute will be declared invalid where the constitutional and unconstitutional provisions are so connected and independent in subject-matter, meaning, and purpose that it cannot be presumed that the legislature would have passed the one without the other."

In the case at bar, Section 42 of the Act of 1911, creating the Board of Public Utility Commissioners (P. L. 1911, Chapter 195, pp. 374-389), provides "if, for any reason, any section or provision of this act shall be questioned, in any court, and shall be held to

is unconstitutional or invalid, no other section or provision of this act shall be affected thereby."

It will be noticed that the supplement to the act of 1911, viz., Chapter 57 of the Laws of 1913 (P. L. 1911, c. 91) does not contain any such provision. Section 42 of the Act of 1911 does nothing more or less than reiterate the rule of law laid down in the cases cited *supra*.

See *Fagan v. Payne*, 75 N. J. L. 851, 855.

In the case last cited it was said (italics ours):

"We are of the opinion that the fifth section is a separate part of the act. It is to be observed that section 24, page 168, of the act of 1901, provides that an unconstitutional clause or section shall not affect any other section or provision. *Whether this section is more than a mere affirmation of a general legal rule of statutory construction need not be discussed, but it at least shows that the legislature had in mind the existence of this rule.*"

The rule laid down in the above cases in the state of New Jersey is the same as in this Court, as shown by the following cases:

In *Poindexter v. Greenhow*, 114 U. S. 270, 29 L. Ed. 85, the Court said:

"It is undoubtedly true that there may be cases where one part of a statute may be enforced as constitutional, and another be declared inoperative and void, because unconstitutional; but these are cases where the parts are so distinctly separable that each can stand alone, and where the Court is able to see, and to declare, that the intention of the legislature was that the part pronounced valid should be enforceable, even though the other part shall fail. To hold otherwise would be to substitute for the law intended by the legislature, one

they may never have been willing by itself to enact" (p. 304).

In *El Paso, etc., Ry. Co. v. Gutierrez*, 215 U. S. 87, 54 L. Ed. 106, the Court said:

"It remains to inquiry whether it is plain that Congress would have enacted the legislation had the act been limited to the regulation of the liability to employes engaged in commerce within the District of Columbia and the territories. If we are satisfied that it would not, or that the matter is in such doubt that we are unable to say what Congress would have done, omitting the unconstitutional feature, then the statute must fall" (p. 97).

See also *Illinois Central R. R. Co. v. McKendree*, 203 U. S. 514, 51 L. Ed. 298; *Employers Liability Cases*, 207 U. S. 463, 52 L. Ed. 297; *Butts v. Merchants' Transportation Co.*, 230 U. S. 126, 57 L. Ed. 1422.

Under these cases, if the Court should conclude that any part of the statute is invalid, then the entire statute falls, and the order under review, in that event, would, of course, fall with the statute.

If, however, the Court should conclude that it is not necessary to pass upon the validity of the statute for the reason that some one or more of the provisions in the order are invalid, the entire order would fall for the reason that under the Public Utility Act of the state of New Jersey, under which these proceedings were brought, as construed by the highest court of the state of New Jersey, when any part of an order of the Board of Public Utility Commissioners is set aside as invalid, it is not possible to enter a judgment sustaining the valid part of the order and setting aside the invalid part—the only thing that can be done is to set aside the entire order and to start all over again.

The first case in the state courts of New Jersey wherein this question came up was *Public Service Gas*

Company v. Board of Public Utility Commission, 87 N. J. L. 581, 92 Atl. 606.

In that case writs of certiorari had been prosecuted in the Supreme Court by the cities of Paterson and Passaic to review an order of the Board of Public Utility Commissioners fixing the rate for gas at ninety cents per one thousand cubic feet, the claim of the municipalities being that the board should have fixed a lower rate. The New Jersey Supreme Court recognized its lack of power to order a modification of the order of the Board of Public Utility Commissioners and dismissed the writs prosecuted by the cities, saying (84 N. J. L., 463, at 465):

"The only remedy that could give the cities the relief they seek is a writ of mandamus commanding the commission to reduce the rate to ninety cents. Under well settled principles, this writ is not available. * * * The question now involved is not whether upon an application to this court for a mandamus to compel a public service corporation to furnish gas we might not determine for ourselves as an original question what would be a reasonable charge, just as the Court of Chancery determined a reasonable charge for water in *Long Branch Commission v. Tintern Manor Water Co.*, 4 Robbins, 71. The parties do not appeal to our original jurisdiction, but very properly have resorted to the new procedure provided by the legislature in the Public Utilities Act of 1911 (P. L., p. 374). Under that act our jurisdiction is appellate, not original, and the power given (section 38) is the power to set aside the order of the commissioners not to make or compel them to make a new order. Our original jurisdiction, as it has always existed is not and cannot be affected by the legislature, but they may provide, as they have in this case, a new method of procedure."

The Court of Errors and Appeals, upon a first hearing of an appeal by the two cities, affirmed the judgment of the Supreme Court dismissing the writs and said (87 N. J. L. 581, 92 Atl. 606):

"It was held in effect that in certiorari the Supreme Court had simply the alternative of affirming the order of the commissioners or setting it aside; whereas the relief they sought by the cities would approximately be given by the Supreme Court, if at all, only on an application for mandamus. The Supreme Court therefore dismissed the two writs prosecuted by the cities. With this conclusion we agree and have nothing to add to the reasoning of the Supreme Court in that regard."

Upon a rehearing, however, the Court of Errors and Appeals came to a different conclusion, not as to the power of the New Jersey Supreme Court on certiorari, but as to the propriety of dismissing the writs without adjudicating upon the merits of the question presented. Accordingly, upon re-hearing, that court reversed the judgments of the New Jersey Supreme Court (95 Atl. 127), and, upon the writs of certiorari prosecuted by the city, affirmed upon the merits the order of the Board of Public Utility Commissioners. The theory upon which this result was reached was that the cities were entitled to an adjudication as to whether or not the order of the board should be affirmed or set aside. The final decision, therefore, in no way affected the force of the decision of the Supreme Court and of the first opinion by the Court of Errors and Appeal, so far as the same related to the lack of power upon a certiorari prosecuted under Section 38 of the Public Utilities Act of 1911 to substitute the judgment of the courts for that of the peculiar statutory

tribunal to whom the determination of the particular question had been entrusted by the legislature. In other words, such a writ of certiorari was not an appeal to the original jurisdiction of the New Jersey Supreme Court to review all proceedings of inferior tribunals by certiorari, but was an appellate proceeding, the procedure under which was limited by the terms of the statute creating the same.

This question again came directly before the Court of Errors and Appeals for consideration in the case of *Erie R. R. Co. v. Board of Public Utility Commissioners*, 90 N. J. L. 271. This was an appeal from an order and judgment entered in the New Jersey Supreme Court, reversing in part an order of the Board of Public Utility Commissioners, directing certain protection to be given several grade crossings on the line of the railroad company in Hudson county. The judgment of the New Jersey Supreme Court had directed that the record be remitted to the board for the purpose of modifying the order under review. The Court of Errors and Appeals reversed this judgment, saying that the order should have been set aside *in toto*, without directing the board to revise or modify the order, and this conclusion was reached "because the Supreme Court had no power to make such an order or judgment under the statute. The power of the Supreme Court under the above statute must be limited either to affirm or set aside the order of the Board of Public Utility Commissioners as a whole." (Citing *Public Service Gas Co., supra.*) It, therefore, follows that if this Court reaches the conclusion that any part of the order under review is invalid, the court below should be directed to set aside the order as a whole. This conclusion is not affected by the amendment to the act

concerning public utilities, known as Chapter 150, Laws of 1918 (p. 304). This was passed on February 26th, 1918, and probably would not apply to an order made prior thereto, but in any event the amendment is expressly limited to orders "hereafter made."

XII.

The judgment of the Supreme Court of the State of New Jersey affirming the order of the Board of Utility Commissioners, under review, and the judgment of the Court of Errors and Appeals of the State of New Jersey affirming the judgment to the Supreme Court of the State of New Jersey should be reversed, with directions to the State Courts to set aside the entire order.

GEORGE S. HOBART,
GEORGE F. BROWNELL,
CHARLES E. HUGHES,
Counsel for Plaintiff in Error.

APPENDIX A.

Report of Board of Railroad Commissioners and of the Highway Commission of Massachusetts to the legislature of that state.

“The problem is to determine what policy should be applied for the elimination of crossings which now exist as the result of the indifference of the public in their eagerness for railroad facilities and of the poverty of the railroad companies during the early years of railroad construction.

“It will be seen from the resume of the law and practice of other states, which is appended to this report, that there is considerable diversity of policy among the different states in regard to grade crossing elimination. In a large number of states there are no laws whatever with regard to that matter. In other states the law applies to future crossings only.

“Where provision is made for the abolition of existing crossings a limited recognition is given in some jurisdictions to the theory that the entire cost should be assessed upon the railroad company. In Connecticut and New Hampshire, when the railroad company is the petitioner, it is obliged under the law to pay the entire expense. In New Hampshire the law also provides that a city or town may, subject to appeal to the Public Service Commission, require a railroad company to abolish any crossing in such city or town at the expense of the company, but in the only case where such action has been taken by any city or town, appeal was taken to the Public Service Commission and an agreement was reached by which the railroad was to pay 65 per cent., the State 23 per cent. and the town 12 per cent. In Indiana, where there is no statute on the subject, the Supreme Court has decided that the railroad commission, under its general powers, may require the separation of a

grade crossing in order to protect passengers on the trains, the entire expense to be borne by the railroad company. Broadly stated, therefore, the policy of assessing the entire cost of grade crossing abolition upon the railroad company is recognized in the statutory law of two states only, and in these is limited to proceedings brought on the initiative of the company."

"There has been a general recognition of the equities in the case as above stated. In the two states where the theory of assessing the entire cost on the railroads is recognized, it is limited, as we have already shown, to cases arising on the petition of the company. Whatever justice there may be in requiring railroad companies to pay the entire cost of any grade crossing elimination which they may desire in their own interests, this policy is open to the practical objection that under it very few grade crossings are likely to be abolished, and it seems to be the interest of the state to promote rather than to retard this work.

"The policy which not only seems to be most equitable but is found to be most effective in securing results is that of apportioning the cost of grade crossing abolitions between the railroad and other parties in interest. Under this arrangement a portion of the cost is generally paid by the city or town, and in some cases by the county or state where the grade crossing abolition occurs. Street railway companies having locations on public ways included in the scheme of grade crossing elimination are also required to pay a portion of the cost involved.

"As the relative advantage to the parties may vary widely in different cases of grade crossing elimination much may be said in favor of the principle of apportioning the cost according to the

equities in each particular case. This policy has been adopted in Arizona, California, Michigan, North Carolina and Wisconsin, as well as in the Dominion of Canada. In all these cases the apportionment is made by the railroad commission or other public board exercising supervision over railroad companies. So far as we are informed, this principle has never been recognized where the apportionment is made by other than a public board.

Owing to the disinclination to leave such large discretionary power in the hands of any board, the principal of fixed percentages for the various parties in interest has been adopted in Connecticut, Massachusetts, New York, Ohio and Vermont.

In Connecticut, when proceedings are brought on the petition of the city or town the percentage varies, as we have already stated, according to the priority of the highway or railroad. If the highway was opened before the construction of the railroad, 25 per cent. of the cost was assessed to the city or town and 75 per cent. to the railroad company; but if the railroad was constructed before the opening of the highway, the city or town and the railroad each paid 50 per cent. of the cost. In New York the cost of the abolition of existing crossings is apportioned between the railroad company, the state and the city or town, the railroad company paying 50 per cent., the state 25 per cent. and the city or town the remaining 25 per cent. In Ohio, 65 per cent. of the cost is assessed to the railroad company and the remaining 35 per cent to the city or town. In Vermont, none of the percentages are definitely fixed, except that the railroad must pay at least 65 per cent., the city or town not more than 10 per cent., and the state not more than 25 per cent. If, therefore, less than the maximum amount is assessed to the state or to the city or town, the proportion paid by the railroad company is correspondingly increased.

"In Massachusetts, the legislation enacted shows that the theory of apportionment according to the equities in each case, and the theory of apportionment according to fixed percentages, have both been considered by the public authorities. We have already stated that prior to 1890 the cost of grade crossing abolition was apportioned among the parties in interest at the discretion of the commission having the matter in charge, as is still done in proceedings for the alteration of crossings. This principle, moreover, was approved by the commission of 1888, as appears from the following statement:

"But we do not consider it practicable for the legislature to fix in advance a proportion to be paid by the parties interested, for the reason that in no two places that have so far come under our observation have the benefits or the disadvantages been equally divided. We would recommend that each one be divided on its own merits by some tribunal such as we have hereinbefore suggested.

"The experience in this state under both of the principles of apportionment which have been under consideration has shown that the principle of fixed percentages has been the one most productive of results. We believe that it would be unwise to abandon that principle, so long, at any rate, as special commissions continue to be appointed for each proceeding.

"A comparison of the law and practice in other states seems also to indicate that the percentage of cost paid by the different parties in interest is apportioned on an equitable basis. The provision by which the railroad company pays 65 per cent., or substantially two-thirds of the entire cost, is generally regarded as reasonable, though there may be individual cases where this amount is either too large or too small. As the benefits of grade crossing elimination are not merely local, but are of great benefit to the whole traveling public, the assessment of 25 per cent. to the state does not

seem unreasonable, especially as this amount may be greatly decreased where a street railway company is a party to the proceedings. The provision requiring an amount not exceeding 10 per cent. to be paid by the city or town seems also to be reasonable, as recognizing the peculiar local benefits received, but limiting the maximum amount which may be paid in any case.

"In our opinion, the present law has proved as satisfactory in operation as the law of any other state in relation to this matter. We do not deem it expedient, therefore, at this time, to recommend any radical change in the law as it now stands. We believe, however, that there are certain details in which the law might be amended to advantage. While the law does not provide that a fixed percentage of 10 per cent. of the cost of grade crossing elimination shall be paid by the city or town, but only an amount not exceeding 10 per cent., we find that in practice the amount paid by the town has been fixed at less than the maximum amount authorized by the statute in only 5 grade crossing eliminations out of a total of 482. There may be cases, especially where the grade crossing elimination is made in a sparsely settled community, where the benefit received by the town represents less than 10 per cent. of the total cost of the grade crossing elimination. Moreover, it may not only be inequitable in certain cases to assess 10 per cent. of the cost to the city or town, but such an assessment may prove a disproportionate burden to a town of small size or limited financial resources.

"We would recommend, therefore, that the law be amended so as to provide expressly that the amounts assessed upon the cities and towns shall be proportionate to the benefits received and to the ability of these municipalities to pay; and that the Board of Railroad Commissioners should be given the right before the final decree is en-

tered by the court, to review the apportionment of the cost as well as the general plan of grade separation made by the special grade crossing commission.

"We would suggest that the legislature might also consider the advisability of substituting a permanent board representing the public for the separate special commissions now authorized by law, in accordance with the following recommendation of the commissions of 1888:

"Some board or court should be clothed with power to act on petition, and, furthermore, they should have the power to act on their own motion; in case such action should be required for the purpose of carrying out the provisions of the law, and we suggest that it would be a step in advance if the authority and responsibility now somewhat widely distributed were concentrated into one set of hands and the same persons were required to decide what should be done, who should do it and also who should pay for it, making all reasonable provisions at the same time for appeal; but if the custom of employing a special commission to apportion the cost is to be kept up, we would suggest that it should be made permanent to that extent; that the same persons should be called in all cases, in order that whatever experience is gained from year to year may be utilized."

"We desire also to call attention to the fact that in certain states the railroad or Public Service Commission is empowered on its own motion to order the abolition of grade crossings in the interest of public safety or convenience. While we deem it proper to call these matters to the attention of the legislature, we make no recommendation in relation thereto."

APPENDIX B.

Summary of the statutes in states other than New Jersey on Subject of Elimination of Railroad Grade Crossings.

Alabama.

Cities with a population of more than 35,000 may compel the construction and maintenance of bridges, viaducts, tunnels and bridges within city limits and may apportion the cost among different railroads where such viaduct, bridge or tunnel crosses the tracks of more than one railroad; where there is only one railroad the expense must be borne by it.

(Code of 1907, Sec. 1296, p. 736.)

Arizona.

The Public Service Commission has exclusive power to alter or abolish grade crossings, to prescribe the terms thereof and the proportion in which the expense should be divided between the railroad, street railway, and the state, county or other public authority in interest.

(Revised Statutes of 1913, Sec. 2319, p. 803.)

Arkansas.

There is no general statute. The only legislation is a special act requiring two companies named therein to raise their tracks to the maximum grade of a certain levee at the point where the track crosses same; also another special act which requires a certain railroad to remove sidetracks and switches at a certain crossing.

(Laws of 1913, Chap. 172, p. 728.

Laws of 1917, Chap. 141, p. 762.)

California.

Public Utilities Commission has exclusive power to alter or abolish grade crossings and to prescribe the terms thereof, and the proportion in which the expense thereof should be divided between the railroad or street railway and the state, county, or other public authority in interest.

(Laws of 1911, Chap. 14.

Laws of 1915, Chap. 91.

Laws of 1917, Chap. 209.)

Colorado.

The Railroad Commission has power, upon its own motion or upon complaint, to order the alteration or abolition of grade crossings, "upon just and reasonable terms and conditions to be prescribed by the commission"; it also has power to prescribe the proposition in which the cost is to be divided between the railroad and the state, county, or other public authority in interest.

(Laws of 1917, Chap. 109.)

Connecticut.

Authority is given to the Public Utilities Commission to alter grade crossings under certain conditions; if a petition is brought by the directors of the railroad, the entire expense is to be paid by the company. If brought by a municipality, it is to pay not more than one-quarter of the expense and the railroad the remainder, provided the highway was in existence when the railroad was constructed, or its layout changed for the benefit of the railroad. If the highway was constructed since the railroad, the commission may order the town, city or borough to pay not more than one-half of the costs. The directors of every railroad are required to apply for the removal or to remove at least one grade crossing every year for

every fifty miles. If they fail to do so, the commission shall, if, in its opinion, the *financial condition of the company will warrant*, order such removal. If the commission upon its own motion orders any alterations, it shall determine and direct by whom such alteration shall be made, and at whose expense and in such cases one-quarter of the entire expense is to be paid by the state, and the remainder by the railroad.

(Laws of 1911, Chap. 196.

Revision of 1918, Sec. 3710 and following.)

Delaware.

There is no statute for the compulsory elimination of grade crossings, but there are statutes which provide for the assessment of damages to property owners when such crossings are changed and authorizing the city of Wilmington to borrow money for the abolition of grade crossings.

(Laws of 1913, Chap. 168.

Laws of 1905, Chap. 164.)

Florida.

No legislation on the subject.

Georgia.

No legislation on the subject.

Idaho.

No legislation on the subject.

Illinois.

Public Utilities Commission has power to alter or abolish grade crossings and to prescribe the terms thereof

and to fix the proportion in which the expense is to be divided between the railroad, or street railway, and the state, county, or other public authority in interest.

(Laws of 1913, page 460.

Laws of 1917, page 672.)

Indiana.

Cities of more than 100,000 may require elimination of grade crossing. In such case the railroad pays 75 per cent., the trolley company, if there be one, 5 per cent., the city 14 per cent. and the county in which the city is located 6 per cent. of the cost. Where there is no trolley at the crossing, the city pays 17 per cent. and the county 8 per cent. of the costs. Cities of between 43,000 and 49,000 may also require the abolition of grade crossings, in which case the railroad pays 75 per cent., the trolley company, if there be one, 15 per cent., and the city the remainder of the cost. The amount required from the trolley company is not to exceed \$10,000 at a crossing where the right-of-way and tracks of two or more steam railroads join and are contiguous, or more than \$5,000 at any other crossing. If the amount required from the trolley company exceeds such maximum amount, the additional expense is to be paid by the city, or the railroad. If the railroad commission orders the elimination, one-quarter of the entire expense is to be apportioned between the county or counties in which the grade crossing exists, and three-quarters by the railroad. This, however, does not apply to cities of more than 20,000, nor to cities or incorporated towns.

(Burns' Anno. Stats. of 1908, Vol. 3, Sec. 8864 and following.

Laws of 1913, Chap. 182.

Laws of 1915, Chap. 75.)

Iowa.

Board of Railroad Commissioners may order the alteration, relocation or vacation of a highway where the same crosses a railroad; in such event the portion of expense borne by the municipal authority is to be considered as held in trust by the railroad company receiving the same and cannot be included as a part of the value upon which the railroad is entitled to receive a return. Cities of 7,000 or over may require railroads to construct and maintain viaducts, provided the railroad commissioners determine the same to be necessary for public safety and convenience, but if not more than one viaduct is required in any one year property damage is to be paid by the city, ordinary repairs to the viaduct or approaches are divided between the city and the railroad.

(Code of 1915, p. 174, Sec. 2017.)

Kansas.

Cities of the first and second class may require railroads to construct and maintain viaducts or tunnels, "as may be deemed necessary for the convenience, safety or protection of the public." On county roads the cost of eliminating crossings is to be divided between the company and the township or county "in a fair and equitable proportion"—to be determined by the State Highway Commission.

(Laws of 1913, Chap. 106.

Laws of 1917, Chap. 264.)

Kentucky.

No legislation.

Louisiana.

No legislation.

Maine.

The Public Utilities Commission apportions the expenses and damages incidental to elimination of crossings between the state, the town in which the crossing is located, and the railroad, and shall order 25 per cent. to be paid by the state, 10 per cent. by the town and the remainder by the railroad. It is provided that the commission shall not make any order upon any petition until they are satisfied by investigation, or otherwise, that the *financial condition of the corporation owning or operating the railroad will enable said corporation to comply with such order*, and that the probable benefit to the public will warrant said order and the probable expense resulting therefrom, and that the order can be complied with, without exceeding the state appropriation, which is limited to \$15,000 in any one year. Where the street railway has a right-of-way at such crossing, the commission shall apportion to it an equitable share of the damage and expense of alteration and the balance shall be apportioned as provided above.

(Laws of 1915, Chap. 325.

Rev. Stats., Chap. 24, p. 409.

Laws of 1917, Chap. 38.)

Massachusetts.

A commission appointed by the Superior Court, apportions the work to be done by the railroads, and the city or town. The railroad is to pay 65 per cent. of the total expense. If there is a street railway at the point, it pays 15 per cent. and the remainder is divided between the commonwealth and city or town, but not more than 10 per cent. is assessed to the city or town. If the amount assessed to the city or town is less than 10 per cent., the difference between the assessment and 10 per cent. of

the total cost is to be paid by the railroad. If the crossing was established after June 21, 1890, no part of the expense shall be charged to the commonwealth, and such unapportionable part shall be apportioned by the commission between the railroad, street railway, the city or town. There is a provision for the division of the costs of maintenance between all parties in interest.

(Laws of 1902, Chap. 111.

Laws of 1905, Chap. 408.

Laws of 1906, Chap. 463.

Laws of 1914, Chap. 722.)

Michigan.

The Railroad Commission and the state highway commissioner shall apportion the expense between the railroad, state, county, good-roads district or town. The state's portion is not to exceed 25 per cent. Cities, towns, counties and other political subdivision of the state may agree with railroad companies for the elimination of crossings. If no agreement can be reached, then the Board of Railroad and Street Crossings may determine the portion to be paid by the railroads, city, county or township. There is a provision for the maintenance of such crossings to be paid by all parties in interest, according to the special circumstances.

(Compiled Laws of 1915, Chap. 87.)

Minnesota.

No legislation.

Mississippi.

The railroad company is required to make proper grades in the highway when same is raised or lowered;

and must also erect and maintain all bridges on the highway. There is no provision for compulsory elimination of crossings.

(Code of 1906, p. 1115, Sec. 4053.)

Missouri.

No legislation.

Montana

No legislation.

Nebraska.

No legislation.

Nevada.

The Railroad Commission has power to order repairs or reconstruction of property, including buildings, tracks and equipment. This does not in terms extend to the abolition of grade crossings.

(Rev. Laws of 1912, Sec. 4555.)

New Hampshire.

The Board of Railroad Commissioners has power upon petition of the railroad to authorize the highway to be raised or lowered; a town may by vote require the railroad to raise or lower the highway, but the railroad may apply to the board for determination of the question whether the change should be made and the board may then make such order as it adjudges "the public good requires."

(Laws of 1901, Chap. 159.)

New Mexico.

No legislation.

New York.

The Public Service Commission is authorized to eliminate grade crossings on petition of any city, village or town; when the change is made on such petition, the railroad pays 50 per cent. of the expense, the municipality 25 per cent. and the state 25 per cent., except where the crossing is in a village of not more than 1,200 inhabitants. Where the crossing is on a state or county highway 50 per cent. is paid by the railroad and the remaining 50 per cent. by the state, or by the state, county and town in the proportion in which the cost of construction of the highway was paid.

(Laws of 1915, Chap. 240, Sec. 94.)

North Carolina.

The Corporation Commission has power to require the raising or lowering of tracks or highways and to designate who shall pay for the same and to apportion the costs among the railroads and the municipalities.

(Laws of 1907, Chap. 469.

Laws of 1911, Chap. 197.

Laws of 1913, Ex. Ses., Chap. 63.)

North Dakota.

No legislation.

Ohio.

A municipality or county may contract with a railroad to abolish grade crossings, and apportion the costs between them. The costs, including that of land or prop-

erty purchased or appropriated and the payment of the damages to abutting property shall be apportioned so that the railroad shall pay not less than 65 per cent. and the municipality or county not more than 35 per cent.; the apportionment is subject to this limitation only. A municipal corporation may require a railroad to raise or lower its tracks. The costs thereof shall be borne 35 per cent. by the municipality and 65 per cent. by the railroad. A street railway, where its tracks are at any such crossing, may be required to bear a reasonable portion of the costs assumed by the municipality, but not more than one-half thereof.

(Page & Adams General Code, Sec. 8863.)

Oklahoma.

There is no legislation on the subject, but in the constitution of the state it is provided that the Corporation Commission should have the duty of supervising, regulating and controlling transportation companies.

(Sec. 18 of Article IX.)

Oregon.

The Public Service Commission has power to abolish grade crossings and to prescribe the terms and the proportion of the expense to be divided between the railroad and the public authority in interest.

(Laws of 1917, Chap. 228.)

Pennsylvania.

The Court of Quarter Sessions may vacate a highway which crosses a railroad and declare any undergrade or subway or overgrade bridge, whether constructed by the railroad or others, to be the public way. Munic-

ipalities may enter into contracts for the alteration of crossings and the erection of bridges, which provides for the apportionment of the expense within certain fixed limits.

(Purdon's Digest, Vol. 5, p. 5893, Sec. 59.

Purdon's Digest, Vol. 4, p. 3871, Sec. 131.

Supplement of 1912, p. 560, Sec. 13.)

The Public Service Commission has power upon its own motion or complaint, to order crossings to be re-located or abolished "upon just and reasonable terms and conditions"; in prescribing same and the proportionate contributions to the expense, the commission takes into account the relative importance to the public of the services rendered by the company, as well as the priority of location.

(Public Service Commission Law—Laws of 1913, p. 1391.)

Rhode Island.

The town council may apply to the railroad commissioner to decide whether a request for change of grade is reasonable, neither party may appeal to the court from his decision; the expense is borne by the railroad and the town in such proportion as the court may decide.

(General Laws of 1896, Chap. 187, p. 605.)

In certain cities grade crossings were abolished by special commission—the expense being apportioned on the basis of 65 per cent. to the railroad company and 17½ per cent. to each of the two cities in question.

(Laws of 1912, Chap. 896.)

South Carolina.

The county supervisors may point out the location of crossings considered to be unsafe and may indicate how

and in what manner they should be constructed, and may require such construction within 60 days, and the railroad is then authorized to raise or lower the highway; under a decree from the county commissioners. There is no express provision for division of the expense between the railroad and the municipal authorities.

(Code of Laws, Vol. 1, Sec. 3232.)

South Dakota.

The municipal or county authorities may declare by ordinance when any viaduct is deemed necessary for the safety and protection of the public. Property damage is to be paid by the municipality and may be assessed against the property benefited. There is no express provision for apportionment of cost between the railroad and the municipality.

(Laws of 1909, Chap. 126.)

Tennessee.

No legislation.

Texas.

No legislation.

Utah.

The city council has power to provide for or change the location, grade or crossing of any railroad. There is no expense provision for the elimination of grade crossings or the division of the cost thereof.

(Laws of 1911, Chap. 120, p. 205.)

Vermont.

The Public Service Commission may change grades on petition of the municipality or of the railroad. The

state is to pay not more than 25 per cent., the town not more than 10 per cent., and the railroad the remainder. If the highway was constructed since the railroad, the state's proportion is the same, but the town is to pay not more than 15 per cent., and the railroad the remainder. Where there is a trolley company occupying any part of the crossing, it may be assessed such per cent. of the total cost as is according to the benefits conferred. Railroads are required to eliminate one crossing for every eighty miles. Should they not do so, the board shall, if in its opinion the *financial condition of the corporation will warrant*, order the elimination thereof. In such case the state pays 20 per cent. of the cost.

(Public Stats. of 1906, Chap. 194, Sec. 4544.

Public Acts of 1908, Chap. 108.

Gen. Stats. of 1917, Sec. 5294.)

By a later statute a railroad is required to spend \$75 per mile of main line per annum.

Laws of 1917, Chap. 156.)

Virginia.

No legislation.

Washington.

The Railroad Commission may require changes of grade on petition of municipality or county; the cost is apportioned between the railroad and the municipality or county, or between the railroad and the state if the highway is a state highway; this apportionment is made "as justice may require, regard being had for the benefits accruing to the railroad, municipality, county or state, by reason of the improvement."

(Laws of 1913, Chap. 30.

Remington's Code of 1915, Sec. 8733.)

West Virginia.

At the time of the making of the order under review (1915), this state had no legislation on the subject. By a recent statute, however, the County Circuit Court is authorized to appoint a commission to determine whether a highway which crosses a railroad track is unsafe for travel and whether an alteration is necessary, and if the commission orders such alteration and the railroad refuses to comply with the order, the court has the power to direct that the highway be altered and that the expense thereof be recovered from the railroad.

(Code of 1918, Sec. 1940, p. 393.)

Wisconsin.

The Railroad Commission has power on petition of municipality authorities or of the railroad to order alteration in crossings and is authorized to fix the proportion of the cost to be paid by the railroad company and the municipality.

(Laws of 1909, p. 722.

Laws of 1911, Chap. 191; Statutes of 1917, Sec. 1297.)

Wyoming.

The Public Service Commission has power to apportion the cost of construction of highway crossings between public utility companies and municipalities. There is no provision for compulsory elimination.

(Laws of 1915, Chap. 146.)

(1.)

STATEMENT OF THE CASE.

This writ brings up for review a judgment of the New Jersey Court of Errors and Appeals entered March 5, 1918, affirming a judgment of the New Jersey Supreme Court dated June 28, 1916, which judgment affirmed an order of the Board of Public Utility Commissioners dated April 20, 1915, in a certain proceeding entitled "In the matter of the application of the City of Paterson for alteration of grade crossings on the line of the Erie Railroad." The order of the Board of Public Utility Commissioners, which was thus affirmed, required the Erie Railroad Company to alter certain grade crossings accord-

ing to a plan annexed to said order and made part thereof, and required certain other of the parties to the proceeding, including the plaintiff in error, to make certain changes in their property and construction, and to comply with all of the requirements of said order.

That portion of the order of the Commissioners relating to the plaintiff in error reads as follows:

"Any telegraph, telephone, gas, electric, lighting, water, oil, pipe line or other company, or corporation, co-partnership or individual, whose property or construction it may be necessary to change or remove to carry said plan and this order into effect, shall change or remove the same, according to said plan."

"And it is further ordered, that the said Erie Railroad Company and the City of Paterson and Public Service Railway Company, Public Service Gas Company, Public Service Electric Company, Passaic Water Company, New York Telephone Company, Paterson, Passaic and Suburban Telephone Company and Western Union Telegraph Company and all other parties to this proceeding and each and every of them proceed with due diligence to the execution of this order, and comply with all the requirements thereof, and the duties imposed upon them thereby, and by the said act under which this order is made, and the laws of this state, and that to that end they and each of them exercise in good faith all of the powers conferred upon them and each or any of them by the laws of this state" (p. 1790, l. 37 to 1791, l. 17).

The effect of the order of the Commissioners upon the Erie Railroad Company was substantially to require it to reconstruct its railroad by elevating it above the level of the fifteen crossings over which it passes (p. 2263, ll. 28-38) from Madison avenue to River street in the city of Paterson, a distance of approximately ten thousand

eight hundred feet (10,800) or a little over two miles (p. 2264, ll. 29-32).

The plaintiff in error is financially affected by this order, because if it is upheld it will be required to incur the expense involved in moving its water pipes.

(2)

SPECIFICATION OF ERRORS.

The Court of Errors and Appeals of the State of New Jersey erred in holding that the order of the Board of Public Utility Commissioners of said state, dated April 30th, 1915, and the statute of said state whereon the same is based, did not violate the rights of the plaintiff-in-error, secured to it by the Constitution of the United States and the several amendments thereto; and in not holding that the said order or that the said statute did violate such rights, or some one or more of them, in the following particulars:

I.

Because the order under review and the statute upon which the same is based, are an unreasonable exercise of the police power; they are therefore invalid as to the railroad company and if invalid as to the railroad company, they must be set aside not only as to it but also as to the water company.

II.

Because said order and statute take the property of the plaintiff-in-error for public use, without compensation, and also take its property for the private benefit of other companies, and thereby deprive the plaintiff-in-error of

its property without due process of law, contrary to the provisions of the Fourteenth Amendment.

III.

Because said order and statute deny the plaintiff-in-error the equal protection of the laws, contrary to the provisions of the Fourteenth Amendment.

(3)

BRIEF OF THE ARGUMENT.

I.

The order under review and the statute upon which the same is based, are an unreasonable exercise of the police power; they are therefore invalid as to the railroad company, and if invalid as to the railroad company, they must be set aside not only as to it but also as to the water company.

The railroad company runs some of its trains through the city of Paterson, in accordance with the provisions of two leases, one from Paterson and Hudson River Railroad Company and one from Paterson and Ramapo Railroad Company (see petition of city, p. 1636; answer of Erie Railroad Co., p. 1664; answer of Paterson and Hudson River Railroad Co., p. 1679; answer of Paterson and Ramapo Railroad Co., p. 1684; opinion of New Jersey Supreme Court, p. 2275, l. 39).

The two lessor companies organized under special charters (Laws of New Jersey 1831, p. 24; Laws of New Jersey 1841, p. 97). They were leased by two separate leases, dated September 9, 1852, to the "Union Railroad Co.," and these leases were afterwards validated by the

legislature of the State of New Jersey on March 14, 1853 (Laws of 1853, p. 480; p. 2276 of Record, II 13-21).

It is not necessary in this brief to enter into an extended argument relating to the powers of the state to compel a railroad company to protect grade crossings as an incident to the exercise of the police power. The argument will be limited to the proposition that said order is *unreasonable*, and therefore beyond the scope of the police power, and we rely upon the rule established by the cases *that the power to require an owner of property to make alterations is limited by the requirement that such alterations shall be reasonable in nature, to be determined not only by the nature and extent of the alterations required to be made, but by the expense entailed in relation to the value and nature of the property involved in the proposed alterations.*

The rule referred to is laid down in the case of *Health Department of the State of New York v. The Rector, etc. of Trinity Church*, 145 N. Y., pp. 32-40 (cited in the opinion of the New Jersey Supreme Court in the present case, p. 2280, l. 22).

Quotation per Peckham, *J.*

"As to the other objection, no one would contend that the amount of the expenditure which an act of this kind may cause, whether with or without a hearing, is within the absolute discretion of the legislature. It cannot be claimed that it would have the right, even under the exercise of the police power, to command the doing of some act by the owner of property and for the purpose of carrying out some provision of law, which act could only be performed by the expenditure of a large and unreasonable amount of money on the part of the owner. If such excessive demand were made the act would without doubt violate the constitutional rights of

the individual. The exaction must not alone be reasonable, when compared with the amount of the work or the character of the improvement demanded. The improvement or work must in itself be a reasonable, proper and fair exaction when considered with reference to the object to be attained. If the expense to the individual under such circumstances would amount to a very large and unreasonable sum, that fact would be a most material one in deciding whether the method or means adopted for the attainment of the main object were or were not an unreasonable demand upon the individual for the benefit of the public. Of this the courts must, within proper limits, be the judges. We may own our property absolutely and yet it is subject to the proper exercise of the police power. We have surrendered to that extent our right to its unrestricted use. It must be so used as not improperly to cause harm to our neighbor, including in that description the public generally. There are sometimes necessary expenses which inevitably grow out of the use to which we may put our property and which we must incur, either voluntarily or else under the direction of the legislature, in order that the general health, safety or welfare may be conserved. The legislature, in the exercise of this power, may direct that certain improvements shall be made in existing houses at the owners' expense, so that the health and safety of the occupants and of the public through them may be guarded. These exactions must be regarded as legal so long as they bear equally upon all members of the same class and their cost does not exceed what may be termed one of the conditions upon which individual property is held. It must not be an unreasonable exaction either with reference to its nature or its cost. Within this reasonable restriction the power of the state may, by police regulations, so direct the use and enjoyment of the property of the citizen that it shall not prove pernicious to his neighbors or to

the public generally. The difference between what is and what is not reasonable, frequently constitutes the dividing line between a valid and void enactment by the legislature in the exercising of its police power. In commenting on the difference of the degree in any given case which would render an act valid or otherwise, Mr. Justice Holmes, in *Rideout vs. Knox*, speaking for the Supreme Court of Massachusetts said: 'It may be said that the difference is only one of degree; most differences are when nicely analyzed. At any rate, difference of degree is one of the distinctions by which the right of the legislature to exercise police power is determined. Some small limitations of previously existing rights incident to property may be imposed for the sake of preventing a manifest evil; larger ones could not be except by the exercise of the right of eminent domain.' (148 Mass., 368, 372. See also *Miller vs. Horton*, 152 *id.* 540, at 547.) The case of *Stuart vs. Palmer* (74 N. Y., 183) is an example of the exercise of the taxing power of the state and other considerations obtain in such cases." * * * p. 47. "We do not think that the cost of making the improvements called for by this act exceeds the limits which have been defined, assuming the amount thereof which the defendant offered to prove."

In that case the owner of certain dwelling houses was required to install plumbing fixtures to supply running water so as to comply with the tenement house law at a certain expense. Whether the expense to the property owner under any given circumstances should be regarded as so large as to be unreasonable would seem to depend upon the nature of the property and its value and the public necessity in each case. In the case cited the Court determined that the expense for installing running water into a dwelling house occupied by numerous tenants and classified as a tenement house under the state law was not

so large as to be unreasonable in view of the character of the property, but it seems clearly to follow that an expense anywhere nearly approximating the value of the property to be altered would have been held to have been so large as to be unreasonable within the rule laid down, and that an order requiring the owner substantially to rebuild his property at an expense equal to its original value would also be regarded within the same category.

In Tiedman on State and Federal Control Over Persons and Property, Vol. 2, p. 988, the rule is stated:

"It is a judicial question whether a particular regulation is a reasonable exercise of police power.

"The public necessity of the exercise of the police power in any case is a matter addressed to the discretion of the legislature; but whether a given regulation is a reasonable restriction upon personal rights is a judicial question."

See also *Helena v. Dwyer*, 64 Ark., 424.

Quotation, p. 425:

"The police power of the state is very broad and comprehensive and can be exercised to promote the health, comfort, safety and welfare of society. Its limits have not been definitely defined. It is not, however, without its limitations. *In re Jacobs*, 98 N. Y., 110, the Court said, 'If this were otherwise, the power of the Legislature would be practically without limitation. In the assumed exercise of the police power in the interest of the health the welfare or the safety of the public, every right of the citizen might be invaded and every constitutional barrier swept away. Generally it is for the legislature to determine what laws and regulations are needed to protect the public health and secure the public comfort and safety, and while its measures are calculated, intended, convenient and appropriate to accomplish these ends, the exercise of its discre-

tion is not subject to review by the courts. But they must have some relation to those ends. Under the mere guise of police regulation personal rights and private property cannot be arbitrarily invaded and the determination of the legislature is not final on conclusive."

The great difficulty, of course, is to apply to a particular case the rule stated in the authorities above cited that the expenditure required to comply with the regulation under the police power shall be a reasonable amount relatively to the nature of the property, its value and the nature of its use.

We submit to the Court the following considerations concerning the present case:

The charter of Paterson and Hudson River Railroad Co., one of the two lessor companies, provided that its capital should be two hundred and fifty thousand dollars (\$250,000) with authority to increase it to five hundred thousand dollars (\$500,000) (P. L. 1831, p. 24, section 2). By a subsequent act approved March 3rd, 1837 (P. L. 1837, p. 292) the capital was authorized to be increased the further sum of two hundred thousand dollars (\$200,000), which would bring the total authorized capital of the road to seven hundred thousand dollars (\$700,000).

The charter of Paterson and Ramapo Railroad Company fixed its capital at four hundred thousand dollars (\$400,000) (P. L. 1841, p. 97).

The lines of these two roads, which join in the city of Paterson, form a single continuous line extending from the New Jersey state line to the Hudson river opposite the city of New York, a total length for the two lines of approximately thirty miles, they being of about equal length.

Assuming that the full amount of authorized stock has been issued, the entire property of these two lessor railroads would be capitalized at about one million one hundred thousand dollars (\$1,100,000), an average of about thirty-seven thousand dollars (\$37,000) per mile of road. These two roads are leased to the Erie Railroad Company. The leases provide that at their termination any erections or improvements upon the demised property made by the lessee shall be paid for by the lessors (p. 2276, l. 37 *et seq.*). It is no doubt possible that considerable sums have been spent upon these leased properties by the lessees so that their total value may now exceed the total sum at which they are actually capitalized by the owners, as shown above. There is no evidence in the case to indicate that the actual present value of the roadbed included in the leases (aside from the question of the value of the right of way) exceeds the average of thirty-seven thousand dollars (\$37,000) per mile. Applying that average value to the two miles of roadbed which the present order of the Board of Public Utility Commissioners requires to be rebuilt, the result is that the Erie Railroad Company is ordered to expend upon property which it has leased worth about seventy-four thousand dollars (\$74,000) the sum of nearly three million dollars (\$3,000,000), which amount some day the owners of the property may be compelled to repay to it under the terms of the leases. The result of this requirement made in an attempted exercise of the police power of the state is that the Erie Railroad Company, in order that it may enjoy its property rights under the two leases, is to be compelled to expend in rebuilding a small portion of the leased property a sum nearly equal to forty (40) times the value of the property to be rebuilt.

If this result is a reasonable one, and is within the limitation of the police power as stated in the authorities cited, it would seem that so far as the rule is to be actually applied in any particular case it may as well be declared at once that there is no limitation whatever beyond the judgment and discretion of these boards in regard to their powers to compel railroad corporations to expend their funds to rebuild their road so as to eliminate grade crossings.

The unreasonableness of the statute and the order in question is rendered still more conspicuous when they are applied, as they are, in the case at bar, not to one or two single grade crossings in a city, but to nearly every grade crossing in a city involving an enormous expense to the operating company large enough to cause it to become bankrupt.

This argument is developed more at length in the brief filed in behalf of the Erie Railroad Company and to save repetition we refer to Point X thereof.

For these reasons, we submit that the order under review and the statute whereon the same is based are an unreasonable exercise of the police power. If, on these or any other grounds, the order is invalid as to the railroad company, it follows that the order is also invalid as to this plaintiff-in-error, for the obvious reason that there would be no occasion for the water company to incur the expense of changing its water pipes unless the crossings were changed and the grades of the several streets were altered in the manner set forth upon the plan attached to and forming part of the order under review.

II.

The order and statute take the property of the plaintiff-in-error for public use, without compensation, and also take its property for the private benefit of other companies, and thereby deprive the plaintiff-in-error of its property without due process of law, contrary to the provisions of the Fourteenth Amendment.

But even though the order and statute should be found to be valid as against the objections urged by the railroad company, it does not necessarily follow that the provisions of the statute and order requiring the water company to pay the expense of moving or changing the grade or location of its property is also valid.

Under the charter of the water company, it has certain rights to lay pipes and hydrants. Section 9 of its charter provides as follows:

"9. And be it enacted. That the said company be, and they are hereby fully authorized and empowered to lay their pipes beneath such public roads, streets, avenues, and alleys as they may deem necessary for the purpose aforesaid, free of all charge, to be made by any person or persons, or body politic whatsoever, for said privilege, and also such hydrants at the crossings or intersections of the said streets and alleys; provided, that the said pipes shall be laid at least two feet below the surface of the same, and shall not in anywise unnecessarily obstruct or interfere with public travel, or damage public or private property."

(See Act of the Legislature of the State of New Jersey, entitled "An Act to Incorporate the Passaic Water Company," laws of 1849, page 47.)

It further appears from undisputed testimony offered in behalf of the city of Paterson that this company has

water pipes, varying in size from 6" to 24" at nearly all of the streets affected by the order under review. See Vol. I, p. 14, l. 10; p. 19, l. 18; p. 23, l. 40; p. 29, l. 15; p. 32, l. 20; p. 34, l. 5; p. 35, l. 40; p. 37, l. 25; p. 39, l. 1; p. 40, l. 30; p. 41, l. 40; p. 44, l. 10. See also maps of various crossings in question, Vol. VI., Exhibits P. 1 A to P. 1 N.

Under the statute and order, the necessary changes in pipes and hydrants involved in the change in grade of the streets and the re-location thereof must be made by the water company at its own expense. Of course, we do not question the right of the city to change the grade of the streets, and when such changes are made, probably the water company must make its property conform thereto. *Jersey City v. City of Hudson*, 13 N. J. Eq. 420. There is no evidence, however, that the city of Paterson has passed any ordinance or taken any other proceedings under the City Charter requiring changes to be made in the grades of the streets wherein the railroad is directed to eliminate the crossings.

Moreover, the changes thus required to be made at the sole expense of the water company are of no benefit or advantage whatever to it. There is no evidence in the present case that any of the pipes or other property of the water company "unnecessarily obstruct or interfere with the public travel or damage public or private property;" there is no evidence to show that any of the changes required in the water pipes or other property will improve the service either for the benefit of the public or the water company; there is no pretense that the water company has in any way failed to comply strictly with the provisions of its charter, but, notwithstanding the lack of evidence on these points, the water company is required to share in the great expense of changes in the

grades of the streets and of the railroad tracks, which, to some extent may be said to benefit the property of other companies, to wit, the Erie Railroad Company, Paterson & Hudson River Railroad Company, Paterson & Ramapo Railroad Company and Public Service Railway Company. The share which the water company is required to contribute to the benefit of these other companies is probably without any corresponding benefit or compensating advantage to the water company. Its property is, therefore, taken for the private benefit of these other companies, to the extent that it is required to make a contribution to the general expense of the elimination of the crossings, and thereby the water company is deprived of its property without due process of law.

III.

The order of the Board of Public Utility Commissioners and the statute upon which the same was based deny the plaintiff-in-error the equal protection of the laws, contrary to the provisions of the Fourteenth Amendment.

We submit that the statute denies the plaintiff-in-error the equal protection of the laws, particularly in this respect, viz., that it places a street railway, using a crossing, upon a different footing in regard to the bearing of the expense, from that on which it places other public service corporations, whose property or constructions lie underneath such crossing.

If the statute can lawfully impose upon the Passaic Water Company the obligation to bear all the expense of removing its constructions, where such removal is necessary to eliminate the crossing, what possible reason is there for putting a street railway, the removal of whose

constructions is also necessary to eliminate the crossing, upon an absolutely different footing?

Both the railway company and the water company are public utility corporations. Both possess the right under their respective charters to lay their constructions, the one under and the other over the crossing. Conceding that such right is subordinate to the public right of way, why should the water company pay the whole expense of changing the location of its pipes, and the railway company be treated on a totally different principle, not being required to pay the total expense of removing its tracks and relocating them, but being required to pay not exceeding 10 per cent. of the total expense?

If these two public utility corporations, the street railway company and the water company, are entitled to the equal protection of the law, and should consequently be dealt with on the same basis in apportioning the cost of eliminating the grade crossing between them, and if the legislature had the right to impose upon the water company the entire cost of removing its pipes, then the legislature, to insure equality, should have cast upon the street railway the entire cost of removing its street railway apparatus, and adapting it to the new grade. That cost could very readily be ascertained, and was, in fact, ascertained in the case at bar, the details of the cost of changing the tracks, wires and other property of the street railway company being summarized in Exhibit PSR-1 at pages 1394 to 1396, and the details being given in PSR-2, at pages 1397 *et seq.* In any given case it would be only necessary to first find the cost of eliminating the grade crossing had no street railway been there, and then find the cost of eliminating the grade crossing with the street railway there, and the difference would be the cost consequent upon the existence of the street railway. This

difference might in one case amount to next to nothing; in another case to less than 10 per cent. of the total cost of eliminating the grade crossing, and in still another case to considerably more than 10 per cent. of eliminating the grade crossing. If the grade crossing was eliminated so that the railroad ran over the existing street railway, without disturbing it, there would be very little extra cost due to the existence of the street railway. On the other hand, a condition can well be imagined where at a grade crossing the expense of changing the location of the street railway tracks, etc., might amount to considerably more than 10 per cent. of the total expense of eliminating the grade crossing. So that the provision of the statute casting the whole expense of removing its pipes on the water company, and an indeterminate sum not to exceed 10 per cent. of the whole expense of eliminating the grade crossing, upon the street railway, in lieu of the actual expense of changing its tracks, etc., is absolutely incongruous and rests upon no basis of equality or fairness.

The general principle upon which depends the question of whether a person has been deprived of the equal protection of the laws, has been summarized by this court in *Southern R. Co. v. Greene*, 216 U. S. 400, as follows:

"The equal protection of the laws means subjection to equal laws, applying alike to all in the same situation. If the plaintiff is a person within the jurisdiction of the state of Alabama, within the meaning of the 14th Amendment, it is entitled to stand before the law upon equal terms, to enjoy the same rights as belong to, and to bear the same burdens as are imposed upon, other persons in a like situation."

In the same case, the Court also laid down the rule by which the legality of the classification of persons might be determined, using the following language:

"While reasonable classification is permitted, without doing violence to the equal protection of the laws, such classification must be based upon some real and substantial distinction, bearing a reasonable and just relation to the things in respect to which such classification is imposed; and classification cannot be arbitrarily made without any substantial basis. Arbitrary selection, it has been said, cannot be justified by calling it classification." (Citing cases.)

If we apply this principle to the present case it will be observed that the plaintiff-in-error does not enjoy the same rights as belong to, nor does it bear the same burdens as are imposed upon, other persons in a like situation. We, therefore, respectfully submit that the distinction made by the statute and order between the plaintiff-in-error and the Public Service Railway Company has no reasonable and just relation to the classification and that the attempt to compel one public utility such as this plaintiff-in-error, to pay the entire expense of moving or changing its property, while requiring another public utility to pay an amount not exceeding 10% (and not even requiring such proportion of payment to be made by such other public utility unless the board sees fit to so order), is arbitrary and "without any substantial basis." The order and statute, therefore, deny to the plaintiff-in-error the equal protection of the laws, contrary to the Fourteenth Amendment.

IV.

CONCLUSION.

Insofar as the order under review affects the rights and property of the plaintiff-in-error, it is invalid and, to that extent, should be set aside. But, under the construction of the Public Utility Act of the State of New Jersey, as adopted by the courts of that state, when any part of an order made by the board pursuant to the statute is found to be invalid, then the entire order must be set aside. To save repetition on this point, reference is made to the authorities under Point XI of the brief filed by Erie Railroad Company. The result, therefore, is that if the Court finds the part of the order which affects this plaintiff-in-error to be invalid, the entire order must be set aside.

The judgment of the Supreme Court of the State of New Jersey affirming said order, and the judgment of the Court of Errors and Appeals of said state, affirming said judgment, should, therefore, be reversed with directions to the state courts to set aside the entire order.

WESTERN UNION TELEGRAPH COMPANY,
Plaintiff-in-Error.

vs.

BOARD OF PUBLIC UTILITY COMMISSION-
ERS, CITY OF PATERSON, and BOARD OF
FINANCE OF SAID CITY,
Defendants-in-Error.

IN ERROR TO THE COURT OF ERRORS AND APPEALS
OF THE STATE OF NEW JERSEY.

BRIEF IN BEHALF OF PLAINTIFF-IN-ERROR.

(1)

STATEMENT OF THE CASE.

The writ of error in this case was sued out to review a judgment of the Court of Errors and Appeals of the State of New Jersey, affirming a judgment of the Supreme Court of said state, which had sustained an order of the Board of Public Utility Commissioners of said state, dated April 20th, 1915, whereby said board directed the plaintiff-in-error to "change or remove" its property according to a certain plan and profile attached to an order for the elimination of certain highway grade crossings in the city of

Paterson, on the lines of railroad owned by Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company and operated by the Erie Railroad Company.

The Supreme Court of the State of New Jersey allowed the plaintiff-in-error a writ of certiorari to review said order in so far as it affected the property of the plaintiff-in-error, and the proceedings are a part of the case wherein the Erie Railroad Company has also taken a writ of error from the Court of Errors and Appeals to this Court, for the purpose of reviewing said order insofar as it affected said railroad company.

The record in the present case is a part of the record in the case wherein said Erie Railroad Company is the plaintiff-in-error, and has, for convenience, been included as a part of the record in the latter case.

The New Jersey Supreme Court, in a *per curiam* opinion, affirmed the order of the Board of Public Utility Commissioners, saying that the various reasons which were presented to the Court in behalf of this plaintiff in error were "disposed of" in the opinion filed in the Erie Railroad case and needed "no further discussion." (Vol. V, page 2313, 4.)

The judgment of the New Jersey Supreme Court was affirmed, without further opinion, by the Court of Errors and Appeals, by a vote of seven to five. (See 90 N. J. L. 729, 103 Atl. 1055.)

The order of the Board of Public Utility Commissioners, which it is sought to be reviewed, purports to be made under the authority of Chapter 57 of the Laws of 1913 of the State of New Jersey (printed at length in the brief

filed for the Erie Railroad Company). Section 4 of this statute reads as follows:

"4. Where the order of said board shall require changes in, or the removal of the property or constructions of any telegraph, telephone, gas, electric, lighting, power, water, oil, pipe lines or other company or corporation, co-partnership or individual, they shall at their own expense, move or change the grade or location of their property or constructions in conformity with the order of said board. They shall be deemed parties in interest and shall be given notice of hearing and an opportunity to be heard."

The plaintiff-in-error is the owner of several lines of telegraph wires and poles and the appurtenances used in connection therewith at fifteen highway grade crossings in the city of Paterson, the grades of which are directed to be altered by said order of April 20th, 1913.

Insofar as the said order concerns the plaintiff-in-error it provides as follows:

"Any telegraph, telephone, gas, electric, lighting, water, oil, pipe line or other company, or corporation, co-partnership or individual whose property or construction it may be necessary to change or remove to carry said plan and this order into effect, shall change or remove the same, according to said plan.

"AND IT IS FURTHER ORDERED, that the said Erie Railroad Company and the city of Paterson, and Public Service Railway Company, Public Service Gas Company, Public Service Electric Company, Passaic Water Company, New York Telephone Company, Paterson, Passaic and Suburban Telephone Company and Western Union Telegraph Company, and all other parties to this proceeding, and each and every of them proceed with due diligence to the execution of this order, and comply with all of the requirements thereof and the duties

imposed upon them thereby, and by the said act under which this order is made, and the laws of this state, and that to that end, they and each of them exercise in good faith, all of the powers conferred upon them and each or any of them by the laws of this state."

The plaintiff-in-error will urge that this order, insofar as it affects its rights and property, is invalid, and should, therefore be set aside as to it, even though the order may be sustained as against the objections of the railroad company and other plaintiffs-in-error.

(2)

SPECIFICATION OF ERRORS.

The Court of Errors and Appeals of the State of New Jersey erred in holding that the order of the Board of Public Utility Commissioners of said state, dated April 20th, 1915, and the statute of said state whereon the same is based, did not violate the rights of the plaintiff-in-error secured to it by the Constitution of the United States and the several amendments thereto; and in not holding that the said order or that the said statute did violate such rights, or some one or more of them, in the following particulars:

I.

Because said order and statute impose a burden upon the interstate traffic of the plaintiff-in-error, contrary to the provisions of Article I, Section VIII, Paragraph 3, of the Federal Constitution.

II.

Because said order and statute take the property of the plaintiff-in-error for public use, without compensation, and also take its property for the private benefit of other companies, and thereby deprive the plaintiff-in-error of its property without due process of law, contrary to the provisions of the Fourteenth Amendment.

III.

Because said order and statute deny to the plaintiff-in-error the equal protection of the laws, contrary to the provisions of the Fourteenth Amendment.

IV.

Because said order and statute impair the obligation of the contract between the plaintiff-in-error and the Erie Railroad Company, contrary to the provisions of Article I, Section X, Paragraph 1, of the Federal Constitution.

(3)

BRIEF OF THE ARGUMENT.

I.

The order under review and the statute upon which the same is based imposes a burden upon the interstate traffic of the plaintiff-in-error, contrary to the provisions of Article I, Section VIII, Paragraph 3, of the Federal Constitution.

The poles, wires, &c., which the order under review requires the plaintiff-in-error to change at its own expenses, are part of an interstate telegraph system included within

a contract between the plaintiff-in-error and Erie Railroad Company in that part of the United States described in said contract as "lying east of Lake Michigan." (Ex. R. 21, pp. 1062-6.)

The schedule attached to the answer filed by the plaintiff-in-error gives a detailed statement of the poles and wires owned and operated by it along that part of the right of way of the Erie Railroad Company in the city of Paterson which would be affected by the order under review. (Vol. II, pp. 1696-7.)

The following is a description of said poles and wires taken from said schedule.

(1) Madison avenue, line of poles and wires on both sides of track, the line on the north side owned by Erie Railroad Company but leased to and maintained by the Western Union Telegraph Company, carries on top arm five telegraph and two signal wires operated by Erie Railroad Company. On the other arms all wires are signal wires operated by Erie Railroad Company. The line of poles and wires on the south side of tracks is owned and operated by Western Union Telegraph Company and carries two railroad company wires and eight Western Union wires.

(2) Between Newark Jet. and east end of the Paterson station opposite telegraph office the lines are consolidated on the north side. This joint line carries nine Erie Railroad telegraph wires, eighteen Western Union wires, and six Erie Railroad short line signal and telephone wires. The above wires are on six upper arms. The wires on arms below the sixth arm are Erie Railroad automatic signal wires.

(3) Between the east end of Paterson station and a point opposite the Paterson City station of the N. Y., S. & W. R. R. there are seven Erie telegraph wires and fourteen Western Union telegraph wires and a varying number of Erie R. R. short line telephone and signal wires and Public Service Electric light wires; also Erie Railroad automatic signal wires.

(4) Between a point opposite the N. Y., S. & W. R. R. Paterson City station, and Broadway the line is consolidated and carries seven Erie R. R. telegraph wires; seven Western Union telegraph wires; three railroad short line signal wires and two Erie R. R. short line telephone wires, with a varying number of Erie R. R. automatic signal wires.

(5) Between Broadway and River Street station there are two pole lines, one on either side of the tracks. The north side line carries seven Erie R. R. telegraph wires, three Erie R. R. short line signal and two Erie R. R. short line telephone wires on the two upper arms and a varying number of automatic signal wires on the arm below the second crossarm. On the south side there are seven Western Union telegraph wires.

The location of these poles and wires was shown in detail by the testimony of one Veenstra, a witness called on behalf of the city (see that part of his testimony which relates to this subject, beginning at p. 14, l. 30, and continuing at intervals to p. 47).

The Erie Railroad Company offered in evidence a tabulated statement showing the location, number and character of the various wires, and distinguishing between those owned or used by the railroad company and those owned or used by the telegraph company (see Exhibit

R. 13, p. 949; testimony of Mr. Corson, telegraph inspector of the railroad, pp. 235, 6). According to the estimate of the city's engineer, the cost of changing and adapting the poles, signals and wires in order to have them conform to the proposed change of grade, would be \$50,000. (Exhibit P. 55, p. 919.) The estimate of the railroad engineer for this work is \$20,000. (Exhibit R. 101, p. 1306.)

By reference to Exhibit R. 13 (p. 949) it will be seen that the number of telegraph wires and the number of railroad wires is approximately equal. It may therefore be reasonably inferred that the cost imposed upon the telegraph company by the order under review will be about one-half of the total cost. This amount, according to the estimate of the city engineer, would be about \$25,000, and according to the estimate of the railroad engineer, would be about \$10,000. For the purposes of the present discussion, the exact amount thus ordered to be paid by the telegraph company is not important. Its legal rights are invaded whether the cost is to be \$1,000, or \$10,000, or \$25,000, or any other substantial sum.

It is settled that telegraph lines, when extending through different states, are instruments of interstate commerce and that the messages passing over said lines from one state to another constitute a portion of such commerce.

Pensacola Tel. Co. v. Western Union Tel. Co., 96 U. S., 1;

Western Union Tel. Co. v. Texas, 105 U. S., 460;

Western Union Tel. Co. v. Pendleton, 122 U. S., 347;

Western Union Tel. Co. v. James, 162 U. S., 650;

Western Union Tel. Co. v. Kansas, 216 U. S., 1;

Western Union Tel. Co. v. Commercial Milling Co., 218 U. S., 406;

Western Union Tel. Co. v. Crovo, 220 U. S., 364;
Western Union Tel. Co. v. Brown, 234 U. S., 542;
Gardner v. Western Union Tel. Co., 231 Fed. 405.

The question in any particular case, of course, is whether the state statute which is attacked "regulates" interstate commerce, contrary to the provisions of Article One, Section 8 of the Federal Constitution. Some of the cases above cited are illustrations of the application of this principle.

Thus, in *Pensacola Tel. Co. v. Western Union Tel. Co.*, *supra*, it was held that as against the act of Congress of July 24, 1866, entitled, "An act to aid in the construction of telegraph lines, and to secure to the government the use of the same for postal, military and other purposes" (when accepted by the Western Union Telegraph Co.) the statute of the State of Florida of December 11, 1866, which purported to confer exclusive rights upon a telegraph company organized under the laws of that state, was inoperative because it was in conflict with the former act. A bill filed by the Pensacola Company, to enjoin the erection of a telegraph line by the Western Union Company, on account of the alleged exclusive right of the former company to construct such telegraph line, under its charter, along a certain railroad in Florida, was therefore dismissed.

In *Western Union Tel. Co. v. Texas*, *supra*, the State of Texas brought suit to recover the amount of taxes imposed pursuant to state laws requiring every telegraph company doing business in the state to pay a tax of one cent for every full rate message and one-half cent for every message less than full rate. A large portion of the messages were sent to places outside of the state and by

the officers of the United States on public business. The state court entered judgment for the full amount. The U. S. Supreme Court held that the judgment, so far as it included the tax on messages sent out of the state, or for the Government on public use, was erroneous, on the ground that so far as the tax operated on private messages sent out of the state it was a regulation of foreign and interstate commerce and beyond the power of the state; and that as to Government messages, it was a tax on the means employed by the United States to execute its powers.

In *Western Union Tel. Co. v. Pendleton*, *supra*, a statute of the State of Indiana was held to be in violation of the Federal Constitution in so far as it attempted to regulate the delivery of messages to places situated in other states, by imposing a penalty for failure to deliver such messages.

In *Western Union Tel. Co. v. James*, *supra*, a state statute of Georgia, imposing a penalty for failure to deliver a telegram, was held valid in an action brought to recover the penalty by reason of failure to make delivery within the limits of the state. The penalty prescribed by the statute under consideration in that case was \$100 besides damages. In discussing this statute, the Court said:

“Nor is the statute open to the same objections that were regarded as fatal in *Western U. Telg. Co. v. Pendleton*, 122 U. S., 347 (30:1187), 1 Inters. Com. Rep. 306. No attempt is here made to enforce the provisions of the state statute beyond the limits of the state, and no other state could by legislative enactment affect in any degree the duty of the company in relation to the delivery of messages within the limits of the state of Georgia. No confusion therefore could be expected in carrying out within the limits of that state the provisions of

the statute. It is true it provides a penalty for a violation of its terms and permits a recovery of the amount thereof irrespective of the question whether any actual damages have been sustained by the individual who brings the suit; but that is only a matter in aid of the performance of the general duty owed by the company. It is not a regulation of commerce, but a provision which only incidentally affects it. We do not mean to be understood as holding that any state law on this subject would be valid, even in the absence of congressional legislation, if the penalty provided were so grossly excessive that the necessary operation of such legislation would be to impede interstate commerce. Our decision in this case would form no precedent for holding valid such legislation. It might then be urged that legislation of that character was not in aid of commerce, but was of a nature well calculated to harass and to impede it. While the penalty in the present statute is quite ample for a mere neglect to deliver in some cases, we cannot say that it is so unreasonable as to be outside of and beyond the jurisdiction of the state to enact."

In *Western Union Tel. Co. v. Kansas*, *supra*, it was held that the exaction from a foreign telegraph company for the benefit of the permanent school fund, under the authority of a statute of Kansas, of a "charter fee" of a given per cent. of the authorized capital stock as a condition of continuing to do local business within the state, was invalid, for the reason that it was a violation of the interstate commerce clause.

In *Western Union Tel. Co. v. Commercial Milling Co.*, *supra*, it was held that a statute of the State of Michigan fixing the liability of telegraph companies for non-delivery of messages and the damages sustained by the sender was not unconstitutional as a burden on, or a regulation of,

interstate commerce, and that therefore the telegraph company was not entitled to have its damages limited to the amount received by it for the sending of the message if, in fact, the damages exceeded that amount.

In *Western Union Tel. Co. v. Crovo, supra*, a statute of the State of Virginia was held valid, which imposed a penalty for delay within the state in sending a message, even though the message was to a point without the state.

In *Western Union Tel. Co. v. Brown, supra*, it is held that a statute of South Carolina, which made mental anguish caused by the negligent non-delivery of a telegram a cause of action, was an unconstitutional attempt to regulate interstate commerce when the non-delivery of the telegram occurred in the District of Columbia, although the message was sent in South Carolina.

A number of other cases dealing with the question of the power of states to control or impose burdens upon interstate telegraph companies will be found collated in a note in 24 L. R. A., p. 161 and following. The editor of the note thus summarizes the cases:

"The conclusion to be drawn from all the decisions of the Supreme Court of the United States upon the subject seems to be clear that a state cannot impose burdens of any kind whatever upon interstate messages of telegraph or telephone; but that business of such companies, so far it consists of messages of private individuals between points in the state, is subject to state regulation and taxation."

The present order is doubly obnoxious to this principle. In the first place the large cost imposed upon the plaintiff-in-error (varying estimated at from \$10,000 to \$25,000)—not to speak of the inconvenience and delay during the

progress of the work of eliminating the grade crossings—interferes with the plaintiff-in-error's business and operates to "impede interstate commerce," in the language of the *James* case, *supra*. It is in the same category as a "grossly excessive penalty" imposed for failure to deliver telegrams—although in the present instance the interference with interstate commerce is even clearer than in the case of the imposition of a penalty, because here the plaintiff-in-error is obliged to expend a large amount of money not because it has violated any law or in any way defaulted in the performance of its legal duty, but merely because it happens to own and operate telegraph wires along a line of railroad crossings which have come under the ban of the Board of Public Utility Commissioners. Such expenditure on the part of the plaintiff-in-error is more than the payment of a fine or a penalty—it amounts to a spoliation of the plaintiff-in-error and a confiscation of its property for the benefit of other persons and corporations and operates as a direct burden upon the interstate commerce of the plaintiff-in-error.

In the second place, the money required to be expended by the plaintiff-in-error to comply with the order under review is in effect a tax upon it and its interstate commerce. The improvement ordered by the board is attempted to be justified on the theory that it will remove danger to public safety and impediment to public travel on the public streets. It is therefore neither more nor less than an improvement of the public streets. It should therefore be paid for either by assessments for special benefits or by general taxation.

State v. Newark, 27 N. J. L. 185;

State v. Jersey City, 36 N. J. L. 56;

State v. Elizabeth, 37 N. J. L. 330;

Davis v. Newark, 54 N. J. L. 144.

But by Section 4 of Chapter 57, Laws of 1913, and by the order under review, the plaintiff-in-error is required to contribute to the cost of such improvement whatever amount it will cost it to change or remove its property or construction so far as may be necessary to carry the board's order into effect. This payment is an arbitrary imposition on the plaintiff-in-error as one of a number of taxpayers for the cost of the improvement of public street, and therefore operates not only as a burden upon the interstate commerce of the plaintiff-in-error but imposes upon it an unjust and unequal burden of taxation and assessment.

II.

Said order and statute take the property of the plaintiff-in-error for public use, without compensation, and also take its property for the private benefit of other companies, and thereby deprive the plaintiff-in-error of its property without due process of law, contrary to the provisions of the Fourteenth Amendment.

The order under review is not of the slightest benefit or advantage to the plaintiff-in-error. The undisputed evidence shows that all of its wires are now elevated a considerable distance above the present grades of the railroad tracks and of the stations. There is no pretense that any of these wires (or any other property of the plaintiff-in-error) in any way impede public travel or operate to make the street crossings or any of them, dangerous to public safety.

The very nature of the plaintiff-in-error's business is such that it makes little difference to it whether its wires are five feet or ten feet or a hundred feet above the surface

of the ground, except, of course, that they should be high enough to afford sufficient clearance for the railroad or for the highway traffic.

The evidence in the present case shows that the poles and wires are properly constructed for those purposes. But if the grade of the railroad tracks is changed, it will be necessary to reconstruct the poles and wires and other appurtenances in order to adapt them to the changed grade and location of the tracks—the cost thereof varying from \$10,000 to \$25,000, according to the respective estimates.

It may be claimed that the adaptation of the property of the plaintiff-in-error to the changes in the railroad tracks is necessarily incidental to the elimination of the grade crossings. But assuming for the sake of argument that that is the fact, still there is no legal justification for compelling the plaintiff-in-error to make this adaptation at its own expense. It receives no benefit therefrom; on the contrary, it may well be that such changes will be a detriment to the plaintiff-in-error—they are practically certain to operate as a detriment at least during the time when such changes are being made, due to the inconvenience and delay necessarily involved in the making of such changes.

The expense thus imposed upon the plaintiff-in-error cannot be justified under the plea of the police power, as there is no claim that the plaintiff-in-error's property at the present time constitutes a nuisance or that it is necessary to have it reconstructed for the sake of the public health or safety. The statute upon which the order under review is based arbitrarily requires the plaintiff-in-error, at its own expense, to move or change the "grade or location" of its "property or constructions," regardless of

whether such changes are necessary for any of the purposes upon which the exercise of the police power depends. The statute in this respect, we submit, is "arbitrary and capricious" (in the language of the U. S. Supreme Court in the case of *New York & New England R. R. v. Bristol*, 151 U. S. 556).

Such a statute, and the order which purports to have been made in conformity therewith, are, we submit, an unlawful interference with the plaintiff-in-error's property and impose upon the plaintiff-in-error an expense which cannot be justified under the police power.

It may, however, be urged that, in view of the fact that the plaintiff-in-error is a public utility corporation, it cannot claim compensation for the cost of making whatever changes in its property may be necessary in order to have same conform to the changes in the street grades. See *Jersey City v. City of Hudson*, 13 N. J. Eq., 420; *Union Bridge Co. v. United States*, 204 U. S., 364.

So far as concerns that part of the property of the plaintiff-in-error which is within the limits of the streets, this argument might be sound, *provided* the municipality was seeking to change the street grades. But in the present case, the municipality has taken no proceedings for that purpose. If they should hereafter be taken then, of course, the plaintiff-in-error would be entitled to have a hearing thereon so far as the same affect its property and franchise; and unless such hearing be given, an attempt on the part of the municipality to make such changes would operate to deprive the plaintiff-in-error of its property without due process of law. If it be said that the Board of Public Utility Commissioners, by virtue of the authority conferred by Chapter 57, Laws of 1913, stands in the shoes of the municipality with respect to

changes of grades of streets, the answer is that the board has not itself undertaken to change the grades of the streets but has *ordered* the Erie Railroad Company to do so and the latter company is without power to carry out such order.

Furthermore, many of the poles and wires of the plaintiff-in-error are not in public streets at all. The location of the poles at the several highways is indicated on the detail crossing maps of the city (Exhibits P. 1A to 1N). By reference to same, it will be seen that at and near crossings some of the poles are within the limits of the street lines and others are outside of those limits. *Between* the lines of the several crossings the poles are not within the limits of the streets, but are on the right of way of the railroad. The principle in the case of *Jersey City v. City of Hudson, supra*, if applicable at all, therefore applies only to a comparatively small portion of the plaintiff-in-error's property, namely, that which is actually located within the limits of the public streets.

The present order deprives the plaintiff-in-error of its property without due process because made without an opportunity to be heard. It is true that section 4 of the statute provides for notice of hearings, etc., but the same section also provides that where the order of the board requires changes, etc., then the telegraph or other company *shall*, at their own expense, move or change their property, etc. The hearing is therefore a mere sham. The statute prescribes in advance what the duty of the telegraph or other company is to be. It is difficult to imagine what purpose could be served by such a hearing. The rights and duties of the plaintiff-in-error are prejudged. No matter what evidence may be produced at such a hearing, the determination of the board (if the crossings are

to be altered at all under the terms of section 1 of the statute) is inevitably the same so far as concerns the plaintiff-in-error.

In the case of *Landoner v. Denver*, 210 U. S., 373, at p. 386, this Court said:

"A hearing in its very essence demands that he who is entitled to it shall have the right to support his allegations by argument, however brief, and if need be, by proof, however informal."

But what purpose can be served by submitting proof or by making argument if the party whose rights are affected knows in advance that his proof, no matter how strong, and that his argument, no matter how weighty, are addressed to those whose ears are closed by the very statute under which his rights are impaired and his property destroyed. Under such conditions, a "hearing" is a farce and argument becomes mere mockery.

Moreover, the changes which the plaintiff-in-error is ordered to make are not within the terms of the petition upon which the order is founded. This petition originally did not name the plaintiff-in-error as a party in interest, although it purported to describe various wires at each of the several crossings (pp. 1639-1659). The prayer of the petition asked that notice thereof be given to certain named corporations of which the plaintiff-in-error was not one (p. 1661). At the first hearing before the board it appeared that the plaintiff-in-error was interested in some of the wires (p. 52); and thereupon the city was directed to amend its petition by including the plaintiff-in-error a party thereto (p. 96). Such amendment was thereafter filed (p. 663). But even this amendment did not state what changes, if any, were desired in the property of the plaintiff-in-error, it merely alleged as a fact that

some of the overhead wires were owned and operated by the Erie Railroad Company and others by the plaintiff-in-error, and that the number and height of the wires were shown upon the various maps accompanying the petition. The plaintiff-in-error was therefore haled before the Board of Public Utility Commissioners without any information as to what the city desired so far as its property was concerned; and even after a large number of hearings before the board, the plaintiff-in-error is still in the dark as to what the city wants; and even after the order itself has been made by the board, plaintiff-in-error is still without *definite* information as to what must be done by it in order to comply with the order. True, the order says "that any telegraph * * * or other company or corporation shall change or remove its property or construction, "according to said plan" (p. 1790, l. 42), but the plan does not inform the plaintiff-in-error what changes it is required to make in the construction or location of its poles, wires, and other property. If any order at all is sustainable against the plaintiff-in-error, we submit that it is at least entitled to know what changes are desired by the city and what changes are ordered by the board. Unless it receives such information, it is compelled arbitrarily by the order to spend its money to adapt its property so far as necessary to the changed grades of the railroad tracks and streets, without notice as to what changes are desired or ordered and without a hearing as to the propriety or necessity thereof.

Moreover, there is no evidence to show that the relocation and reconstruction of the property of the plaintiff-in-error contemplated by the board's plan and which the plaintiff-in-error is ordered to make "according to said plan" are necessary or appropriate for the elimination of

the grade crossings. The board's scheme for eliminating the crossings can be carried out fully and effectively, so far as appears, without requiring the plaintiff-in-error to make any changes whatever in its property. It might be convenient for the plaintiff-in-error to rearrange its poles and wires when the tracks are elevated, but that, we submit, is a matter which rests entirely in the discretion of the plaintiff-in-error and is of no concern to the board. So long as the plaintiff-in-error is properly equipped to carry out its duties as a public utility corporation, and so long as it does in fact effectively perform such duties, the details of how, when or where the plaintiff-in-error shall change "its property or construction" does not concern the Board of Public Utility Commissioners.

Finally, the property of the plaintiff-in-error is not only taken for public use without compensation, but to the extent that the changes benefit the property of the Erie Railroad Company, Paterson & Hudson River Railroad Company, Paterson & Ramapo Railroad Company and Public Service Railway Company, the order takes its property for the private benefit of said other companies.

The assertion of a right on the part of the legislature to take the property of one citizen and transfer it to another, even for a full compensation, where the public interest is not promoted thereby, is claiming a despotic power, and one inconsistent with every just principle and fundamental maxim of a free government. 15 Cyc. 579, and cases cited.

Aside from the general public who use the several crossings in question and who may be presumed to derive some benefit by the elimination thereof, the other parties interested therein are (a) Erie Railroad Company, the lessee of the right of way, (b) the Paterson & Hudson River Rail-

road Company, and the Paterson & Ramapo Railroad Company, the respective owners in fee of the right of way, and (c) Public Service Railway Company, the operator of the street railway company using three of the several crossings. It cannot be denied that the changes in the railroad tracks, etc., ordered by the Board of Public Utility Commissioners will add to the value of the railroad property and will facilitate the use thereof. The same thing applies in less degree to the Public Service Railway Company, the movement of whose cars across the railroad tracks will be rendered more rapid and convenient. The question of whether such advantages are outweighed by the great cost imposed upon the Erie Railroad Company and Public Service Railway Company is quite another story. But so far as the plaintiff-in-error is concerned, we submit that there is no doubt that certain benefits and advantages will accrue to those companies. The Paterson & Hudson River Railroad Company, and the Paterson & Ramapo Railroad Company, as owners of the improved property, must also be presumed to derive some advantage therefrom. But the plaintiff-in-error is in a different position. By the order under review it is compelled to contribute an amount, the estimates whereof vary from \$10,000 to \$25,000 to the cost of an improvement which is of no advantage to it, but on the contrary benefits the other companies above named. This amounts to a taking of the property of the plaintiff-in-error to the extent of the amount of the contribution forced from it, for the benefit of other companies.

The property of the plaintiff-in-error is therefore taken for the private use and benefit of the above-named companies. This cannot lawfully be done even if the plaintiff-in-error received compensation therefor. 15 Cyc., 578 and cases cited.

III.

The order and the statute deny to the plaintiff-in-error the equal protection of the laws.

Section two of the statute provides that the "entire expense" of the alterations, etc., shall be paid by the railroad, unless a street railway uses the crossing, in which event the board may order not exceeding ten per centum of the expense directly chargeable to the crossing used by the street railway company to be paid by the company operating such street railway.

In the order under review, the board directed the Public Service Railway Company to pay ten per centum of the expense of the alterations, etc., directly chargeable to three of the crossings, to wit: (1) Park avenue and Market street, (2) Broadway, and (3) River street, used by the street railway operated by said company (p. 1792, ll. 1-20).

Section 4 imposes upon the plaintiff-in-error as a telegraph company the entire expense of moving or changing the grade or location of its property or constructions. This section does not in terms refer to a street railway company. True, it uses the expression "or other company or corporation, co-partnership or individual." But section 2 had already dealt with the question of the extent of the obligation of street railways and had limited their burden to an amount not exceeding ten per cent. of the expense "directly" chargeable to the crossing. If section 4 does not apply to street railways, then it follows that the street railway company and the telegraph company are treated on entirely different principles—although they are both public utility corporations and although each has the same rights to use the public streets so far as may be necessary for their respective purposes.

Under this statute and order, the Public Service Railway Company is required to pay not exceeding ten per cent. of the expense directly chargeable to the crossings used by it, and the plaintiff-in-error is required to pay all of the expense of moving or changing its property at all the crossings, for the purpose of conforming with the order.

The general principle upon which depends the question of whether a person has been deprived of the equal protection of the laws has been summarized by this Court in *Southern R. Co. v. Greene*, 216 U. S. 400, as follows:

“The equal protection of the laws means subjection to equal laws, applying alike to all in the same situation. If the plaintiff is a person within the jurisdiction of the State of Alabama, within the meaning of the 14th Amendment, it is entitled to stand before the law upon equal terms, to enjoy the same rights as belong to, and to bear the same burdens as are imposed upon, other persons in a like situation.”

In the same case, the Court also laid down the rule by which the legality of the classification of persons might be determined, using the following language:

“While reasonable classification is permitted, without doing violence to the equal protection of the laws, such classification must be based upon some real and substantial distinction, bearing a reasonable and just relation to the things in respect to which such classification is imposed; and classification cannot be arbitrarily made without any substantial basis. Arbitrary selection, it has been said, cannot be justified by calling it classification.”
(Citing cases.)

If we apply this principle to the present case, it will be observed that the plaintiff-in-error does not enjoy the same rights as belong to, nor does it bear the same bur-

dens as are imposed upon, other persons in a like situation. We, therefore, respectfully submit that the distinction made by the statute and order between the plaintiff-in-error and the Public Service Railway Company has no reasonable and just relation to the classification and that the attempt to compel one public utility such as this plaintiff-in-error, to pay the entire expense of moving or changing its property while requiring another public utility to pay an amount not exceeding 10 per cent. (and not even requiring such proportion of payment to be made by such other public utility unless the board sees fit to so order), is arbitrary and "without any substantial basis." The order and statute, therefore, deny to the plaintiff-in-error the equal protection of the laws, contrary to the Fourteenth Amendment.

IV.

The order and the statute impair the obligation of the plaintiff-in-error's contracts with the Erie Railroad Company (Reason 5).

By the agreement between the plaintiff-in-error and Erie Railroad Company, dated September 25, 1907 (Exhibit R. 21, p. 1062), the railroad company leases to the telegraph company the right to maintain along certain railroads (including the railroad where these crossings are to be altered) poles, wires, etc., with the right to erect and maintain additional wires, the right to operate and use all of the poles, wires and other property, and the right to operate and use the said property and to enjoy the returns and profits thereof.

The agreement runs from October 1, 1907, to September 30, 1928. Upon the termination of the agreement the

poles, wires, etc., are to be returned to the railroad company in like good order and repair as when received by the telegraph company.

The railroad company grants to the telegraph company the exclusive right to conduct commercial or public telegraph business on and along the premises covered by the agreement.

The plaintiff-in-error operates its telegraph lines under the Federal statute of 1866. See *Pensacola Tel Co. v. Western Union Tel. Co.*, 96 U. S., 1, 24 L. Ed., 708, where the statute is quoted at length and the powers and duties of the plaintiff-in-error thereunder are discussed.

This contract, taken in connection with the Federal statute, gives the plaintiff-in-error the franchise to operate said telegraph lines during the term of the agreement.

The plaintiff-in-error is, therefore, in the same position as if it had a franchise from the State of New Jersey or from the city of Paterson giving it the right to construct, maintain and operate the telegraph line in and through the city. The necessary effect of the order under review is either that the telegraph lines will be destroyed; or, the plaintiff-in-error, at its own expense, must reconstruct them in conformity with the plan attached to the board's order, making whatever changes may become necessary by reason of the change of grade and reconstruction of the main line railroad tracks and side tracks. In either event, the rights of plaintiff-in-error under its said contract with the Erie Railroad Company, are destroyed or at least substantially impaired; and the order which causes this result and the statute which permits it, are therefore invalid. *Hudson Telephone Co. v. Jersey City*, 49 N. J. L., 303; *Phillipsburg Electric Co. v. Town of Phillipsburg*, 66 N. J. L., 505; *United Electric*

Co. v. Bayonne, 73 N. J. L., 410; *Owensboro v. Cumberland Telephone Co.*, 230 U. S., 59, 66.

V.

CONCLUSION.

Insofar as the order under review affects the rights and property of the plaintiff-in-error, it is invalid and, to that extent, should be set aside. But, under the construction of the Public Utility Act of the State of New Jersey, as adopted by the courts of that state, when any part of an order made by the board pursuant to the statute is found to be invalid, then the entire order must be set aside. To save repetition on this point, reference is made to the authorities under Point XI of the brief filed by Erie Railroad Company. The result, therefore, is that if the Court finds the part of the order which affects this plaintiff-in-error to be invalid, the entire order must be set aside.

The judgment of the Supreme Court of the State of New Jersey affirming said order, and the judgment of the Court of Errors and Appeals of said state, affirming said judgment, should, therefore, be reversed with directions to the state courts to set aside the entire order.

Supreme Court of the United States

OCTOBER TERM, 1920.

No. 37.

D. FULLERTON & COMPANY,
Plaintiff-in-Error.

vs.

BOARD OF PUBLIC UTILITY COMMISSION-
ERS, CITY OF PATERSON and BOARD
OF FINANCE of said City,
Defendants-in-Error.

IN ERROR TO THE COURT OF ERRORS AND APPEALS OF THE
STATE OF NEW JERSEY.

BRIEF IN BEHALF OF PLAINTIFF-IN-ERROR.

(1)

STATEMENT OF THE CASE.

The writ of error in this case was sued out to review a judgment of the Court of Errors and Appeals of the State of New Jersey, affirming a judgment of the Supreme Court of said state which had sustained an order of the Board of Public Utility Commissioners of said state, dated April 20th, 1915, directing the Erie Railroad Company to elevate certain railroad tracks in the City of Paterson, N. J., for the purpose of eliminating certain highway grade crossings in said city.

According to the recital in said order, the plaintiff-in-error is one of the "parties in interest" who appeared before said board in the proceedings leading to the making of said order. The order directs the railroad company to eliminate the crossings in the manner therein provided, and according to a certain plan and profile thereto attached. The order then provides, among other things, as follows:

"Any telegraph, telephone, gas, electric lighting; water, oil, pipe line or other company or corporation, co-partnership or individual whose property or construction it may be necessary to change or remove to carry said plan and this order into effect, shall change or remove the same, according to said plan" (p. 1790, ll. 35-40).

The order further directs Erie Railroad Company, the City of Paterson, certain other companies, "and all other parties to this proceeding" to proceed with due diligence to the execution of the order and to comply with all the requirements thereof and the duties imposed upon them thereby, and by the said act under which this order is made, and the laws of this state, and that to that end, each of them exercise in good faith all of the powers conferred upon them and each or any of them, under the laws of this state (p. 1791, ll. 1-20).

The plaintiff-in-error was allowed a writ of certiorari by the New Jersey Supreme Court for the purpose of reviewing said order. The opinion of that Court sustaining the order did not discuss the points that were raised by the plaintiff-in-error, other than merely to recite the same and to conclude that they were disposed of in the opinion filed in the case wherein the Erie Railroad Company was prosecutor. The opinion is reported in 90 N. J. L. 677, 103 Atl. 1051. It was affirmed by the Court of Errors and Appeals of New Jersey without further opinion (see 90 N. J. L. 678, 103 Atl. 1052). For copy of opinion see Vol. V., p. 2315.

(2)

SPECIFICATION OF ERRORS.

The Court of Errors and Appeals of the State of New Jersey erred in holding that the order of the Board of Public Utility Commissioners of said state, dated April 20th, 1915, and the statute of said state whereon the same is based, did not violate the rights of the plaintiff-in-error secured to it by the Constitution of the United States and the several amendments thereon; and in not holding that the said order or that the said statute did violate such rights, or some one or more of them, in the following particulars:

I.

Because the order under review and the statute upon which the same is based take the private property of the plaintiff-in-error for public use, without compensation, and also take its property for the private benefit of other companies and thereby deprive the plaintiff-in-error of its property without due process of law, contrary to the provisions of the Fourteenth Amendment.

II.

Because said order and statute deprive the plaintiff-in-error of the equal protection of the laws.

III.

Conclusion.

(3)

BRIEF OF THE ARGUMENT.**I.**

The order under review and the statute upon which the same is based take the private property of the plaintiff-in-error for public use, without compensation, and also take its property for the private benefit of other companies and thereby deprive the plaintiff-in-error of its property without due process of law, contrary to the provisions of the Fourteenth Amendment.

The plaintiff-in-error is the owner of several tracts of land located between the railroad right of way and the Passaic River in the vicinity of Franklin, Keen and Warren streets, in the City of Paterson. One of these tracts adjoins the railroad right of way on the westerly side (Exhibit D. F-1, pp. 1424-1427), and has a frontage of about 108 feet towards the railroad. Buildings of the value of over \$100,000 are constructed thereon and are used by the plaintiff-in-error in its business. It acts as agent for Swift & Company and receives an average of ten cars per week of dressed beef. Shipments are sent out by wagon and by railroad (p. 434, ll. 1-40).

A side track leads from the main line tracks of the railroad to the buildings of the plaintiff-in-error, the latter being located at a distance of about three feet from the side track. This side track is on the railroad right of way (p. 1977, ll. 10-25). The plaintiff-in-error has been in business in the same place for thirty-five years and has used this side track continuously during that time. The first floor of the building is used for a beef cooler in the rear and for shipping department and offices in the front. On the second floor are the pipes of the refrigerator. There

is also a receiving platform at the rear of the building, which is constructed about three feet from the side track (pp. 435, 436).

The side track is marked as No. 33 on the map of Erie Railroad Company showing track facilities, sidings, etc. (Exhibit R. 23A, known as siding map.)

Under the order of the Board of Public Utility Commissioners, the grade crossings at Keen and Warren streets are to be eliminated by raising the tracks, and Franklin street is to be closed and an undergrade crossing is to be constructed at Montgomery street, two blocks to the south thereof (p. 1790, ll. 1-30). By reason of the elevation of the tracks, the building of the plaintiff-in-error will have to be changed to conform therewith (pp. 437, 438). In one year the amount of business done by the plaintiff-in-error is over \$2,000,000 (p. 438, l. 35). The elevation of the tracks would substantially interfere with the plaintiff-in-error's business (p. 438); it would also require the construction of a new conveyor and it would be necessary to rearrange the various existing facilities in the present buildings, (pp. 443, 444).

The testimony of the city is that on the city's plan (which in this respect was adopted by the board) the side track will have to be raised about sixteen feet (p. 495, l. 40; p. 496, l. 1; also p. 1977, ll. 10-25).

It will therefore be seen that the plaintiff-in-error will be substantially affected by the proposed plan for the elimination of the crossings in that (1) the existing side track leading from the main line tracks of the railroad will be cut off by the elevation of the main line tracks and its usefulness destroyed; (2) if the plaintiff-in-error desires to continue to have the use of a side track, it will be necessary for *somebody* to construct another side track to

conform to the new grade of the main line tracks when elevated—the new side track to be built at about sixteen feet above the present grade; (3) it will be necessary to make various changes in the existing building of plaintiff-in-error in order to continue to use it for the purposes to which it is now adapted; (4) the business of the plaintiff-in-error so far as it has to do with the handling of meat and by-products, will be interfered with and probably to some extent destroyed.

The plan and the profile attached to and forming part of the order show that a new side track is to be constructed on bridges passing over Keen street and Franklin street and in front of the property of the plaintiff-in-error in the same relative location with respect to the property as the present side track, but at an elevation of about sixteen feet above the same. It was apparently the purpose of the board in making this order to have the plaintiff-in-error retain the benefit of a side track in the same location as the existing side track. This would be convenient if the only consideration were the location of the side track, and if somebody other than the plaintiff-in-error were to pay the cost of reconstructing the same. The evidence, however, shows that it will be necessary for the plaintiff-in-error, in order to avail itself of the side track when thus elevated, to make material changes in its building in order to continue to use it for the purposes to which it is now adapted. Assuming for the purpose of the present discussion that the plaintiff-in-error has no legal ground of complaint because it may be compelled to make these changes in its *building* in order to continue to do business, the question still remains as to how the plaintiff-in-error will be able to avail itself of the side track unless somebody reconstructs it in the manner required by the plan. The railroad company takes the position that

it, the railroad, is under no legal duty thus to reconstruct the side track for the benefit of the plaintiff-in-error; and if that position is well taken, then the plaintiff-in-error will be cut off from the further use of the side track when the main line tracks are elevated as required by the order, unless plaintiff-in-error itself undertakes to reconstruct the side track.

It may be said that the order is not susceptible of the construction that the plaintiff-in-error is commanded to reconstruct the side track. This argument, however, overlooks the fact that a side track will not raise itself. *Somebody* must raise the track if anybody is to continue to make use thereof. But if the railroad cannot be legally compelled to do this work, and if the plaintiff-in-error desires to continue to have the benefit of the use of the side track, then the necessary result of such an order as is now under consideration is that the plaintiff-in-error itself must do the work; in lieu of so doing it can no longer use the side track. The plaintiff-in-error is therefore in effect required to raise the side track at its own expense if it would continue to have the use thereof. But how can it do the work of raising the side track on the land of the railroad company without the consent of the latter? The plaintiff-in-error is in this dilemma; in order to continue to use the side track the track must be raised—the plaintiff-in-error cannot do it because it has no permission from the railroad company to go on its land for that purpose; the railroad cannot be compelled to do it—even if the order be construed to require the railroad so to do, for the reason that such an order is invalid as against the railroad company. The result, therefore, is that when the main line tracks are elevated, the side track stays on its present level; and there is no practical method of compelling a connection between the side track and the

main line tracks thus elevated. Section 16 (k) of the act covering public utilities does not help the matter, as that applies only to a side track which may be *constructed by the "shipper."*

The plaintiff-in-error is therefore either deprived of its existing side track facilities; or it must at its own expense reconstruct the side track to conform to the new grade of the main line track. From either aspect the order under review is invalid as against the plaintiff-in-error.

If the order is construed so as to require the plaintiff-in-error to reconstruct the side track by elevating same, at its own expense, as indicated on the plan attached to the order, then the property of the plaintiff-in-error is taken for public use without compensation, to the extent of the cost of such reconstruction; but if it be said that the reconstruction is not essential to the elimination of the grade crossings and that therefore the property of the plaintiff-in-error is not taken for public use, nevertheless, its property, to the extent of the cost of such reconstruction, is taken for the benefit of other companies, to wit, Erie Railroad Company as lessee, and Paterson & Ramapo Railroad Company as owner in fee of the land upon which the improvement is made.

The statute directs that "where the order of the said board shall require changes in or the removal of the property or constructions of any telegraph * * * or other company or corporation * * * they shall, *at their own expense*, move or change the grade or location of their property or constructions, in conformity with the order of said board." Pursuant to this provision of the statute, the order directs that "any telegraph * * * or other company or corporation whose property or construction it may be necessary to change to carry said plan and this

order into effect, shall change or remove the same according to said plan" (Vol. IV, p. 1790, ll. 35-40). A further paragraph of the order directs that "all other parties to this proceeding and each and every one of them, proceed with due diligence to the execution of this order and comply with all the requirements thereof and the duties imposed upon them thereby, and by the said act under which this order is made" (Vol. IV, p. 1791, ll. 10-15).

This plaintiff-in-error was a party to the proceedings and its appearance therein is recited in the order. What other construction, therefore, can be given to the order than a command to the plaintiff-in-error to change its property or construction as shown on the plan?

The opinion of the New Jersey Supreme Court is not entirely clear on the point as to whether the order requires the plaintiff-in-error to reconstruct its side track as indicated on the plan. In dealing with this particular case, the New Jersey court contented itself with reciting the points that were made and then stated "all these points are disposed of in the opinion of the court in the case of *Erie Railroad Company v. Board of Public Utility Commissioners*." (See Vol. V., page 2315.)

So far as the point now under discussion is concerned, presumably the reference is to that part of the opinion in the Erie case wherein the Court reached the conclusion that the order under review did not require the railroad company to make changes in private sidings, and did not require the owners of such private sidings to reconstruct them. The New Jersey Court said:

"The plan which accompanies the order simply suggests to such owners a method by which their property may be conformed to the new conditions so as to admit of a continuance of the siding facilities theretofore enjoyed" (p. 2282, ll. 15-40).

If this be the proper interpretation of the order, the obvious consequence is that the plaintiff-in-error is entirely deprived of the use of its side track unless it undertakes to reconstruct same at its own expense. The plaintiff-in-error will therefore be compelled to abandon the use of the side track and for all practical purposes be unable to continue its business. Under the construction of the order thus adopted by the New Jersey courts, we submit that the plaintiff-in-error is deprived of its property without due process of law.

This has been so decided in several cases which hold that an individual or a corporation is entitled to receive compensation for interference with switch connections or other shipping facilities due to a change in the location or grade of main line tracks.

In *Chicago, &c. R. Co. v. McGrew*, 104 Mo. 282, 15 S. W. 931, it was held that the connection of a mine with a railroad is a valuable property right and whatever damage was occasioned by cutting it off in the taking of part of the property by another railroad, should be allowed to the mine owner, even if the switches and tracks whereby the connection was made belonged to the railroad company.

In *New York, &c. R. Co. v. Blacker*, 178 Mass. 386, 59 N. E. 1020, part of petitioner's coal yard was taken in elevating a railroad for the purpose of eliminating a grade crossing. It was held that the fact that switch connections would be done away with was an element of damage which should be considered, although there was no obligation on the part of the railroad to continue the said connections. See also *Chicago, &c. R. Co. v. Wolf*, 137 Ill. 360; 27 N. E. 78; *Chicago, &c. R. Co. v. Walker*, 251 Ill. 629, 96 N. E. 536.

II.

The order and statute deprive the plaintiff-in-error of the equal protection of the laws.

We have shown under Point I that no matter what happens to the side track, the plaintiff-in-error is bound to incur some expense or sustain some loss; if the side track is to be reconstructed at the expense of the plaintiff-in-error (as is apparently directed by the order), then the plaintiff-in-error must bear that expense; but if the side track is not reconstructed at all, then the plaintiff-in-error is deprived of the use thereof. In either event, the result is that the plaintiff-in-error is required to contribute to the expense of a general public improvement without any compensating advantage. The contribution is not in proportion to the benefits received by the plaintiff-in-error as the result of such improvement for the obvious reason that no benefit is received by the plaintiff-in-error, as the elevation of the main line tracks does not add anything to the facilities of the business of the plaintiff-in-error. The case is analogous to a compulsory payment of a special tax or assessment for the benefit of the general public without any corresponding benefit.

State v. Newark, 27 N. J. L., 185;

State v. Jersey City, 36 N. J. L., 56;

State v. Elizabeth, 37 N. J. L., 330;

Davis v. Newark, 54 N. J. L., 144.

The case, in this respect, is like the case of *Houck v. Little River Drainage District*, 239 U. S. 254, 60 L. Ed. 266, and *Myles Salt Co. v. Drainage District*, 239 U. S. 478, 60 L. Ed. 392. In the latter case, it was held that property which was not benefited directly or indirectly by a drainage improvement could not be included within

the drainage district solely for the purpose of deriving a revenue from the levy and collection of drainage taxes thereon for the benefit of other lands that were to be improved by the drainage. This Court, in reversing a judgment in a suit to restrain the sale of the land in question for non-payment of drainage taxes, said:

"We are not dealing with disputable grounds of discretion or disputable degrees of benefit, but with an exercise of power determined by considerations not of the improvement of plaintiff's property, but solely of the improvement of the property of others—power, therefore, arbitrarily exerted, imposing a burden without a compensating advantage of any kind."

The general principle upon which depends the question of whether a person has been deprived of the equal protection of the laws, has been summarized by this Court in *Southern R. Co. v. Greene*, 216 U. S. 400, 54 L. Ed. 536, as follows:

"The equal protection of the laws means subjection to equal laws, applying alike to all in the same situation. If the plaintiff is a person within the jurisdiction of the State of Alabama, within the meaning of the 14th Amendment, it is entitled to stand before the law upon equal terms, to enjoy the same rights as belong to, and to bear the same burdens as are imposed upon, other persons in a like situation.

In the same case, the Court also laid down the rule by which the legality of the classification of persons might be determined, using the following language:

"While reasonable classification is permitted without doing violence to the equal protection of the laws, such classification must be made upon some real and substantial distinction, bearing a

reasonable and just relation to the things in respect to which such classification is imposed; and classification cannot be arbitrarily made without any substantial basis. Arbitrary selection, it has been said, cannot be justified by calling it classification." (Citing cases.)

III.

CONCLUSION.

Insofar as the order under review affects the rights and property of the plaintiff-in-error, it is invalid and, to that extent, should be set aside. But, under the construction of the Public Utility Act of the State of New Jersey, as adopted by the courts of that state, when any part of an order made by the board pursuant to the statute is found to be invalid, then the entire order must be set aside. To save repetition on this point, reference is made to the authorities under Point XI of the brief filed by Erie Railroad Company. The result, therefore, is that if the Court finds the part of the order which affects this plaintiff-in-error to be invalid, the entire order must be set aside.

The judgment of the Supreme Court of the State of New Jersey affirming said order, and the judgment of the Court of Errors and Appeals of said state, affirming said judgment, should, therefore, be reversed with directions to the state court to set aside the entire order.

Supreme Court of the United States

OCTOBER TERM, 1920.

Nos. 38 and 39.

MORRIS & COMPANY,
Plaintiff-in-Error,

vs.

BOARD OF PUBLIC UTILITY COMMISSIONERS, THE CITY OF PATERSON AND BOARD OF FINANCE of Said City,
Defendants-in-Error.

JACOB MEYER and KOMMER DE VOGEL,
partners trading and doing business
as MEYER & DE VOGEL,
Plaintiffs-in-Error,

vs.

BOARD OF PUBLIC UTILITY COMMISSIONERS, CITY OF PATERSON and BOARD OF FINANCE of Said City,
Defendants-in-Error.

IN ERROR TO THE COURT OF ERRORS AND APPEALS OF THE
STATE OF NEW JERSEY.

BRIEF IN BEHALF OF PLAINTIFFS-IN-ERROR.

(1)

STATEMENT OF THE CASE.

The writs of error in this case were sued out to review judgments of the Court of Errors and Appeals of the State of New Jersey, affirming judgments of the Supreme Court of said state which had sustained an order of the Board of Public Utility Commissioners of said state, dated April 20th, 1915, directing the Erie Railroad Company to elevate certain railroad tracks in the City of Paterson, N. J., for the purpose of eliminating certain highway grade crossings in said city.

According to the recital in said order, the plaintiffs-in-error are "parties in interest" and appeared before said board in the proceedings leading to the making of said order. The order directs the railroad company to eliminate the crossings in the manner therein provided, and according to a certain plan and profile thereto attached. The order then provides, among other things, as follows:

"Any telegraph, telephone, gas, electric, lighting, water, oil, pipe line or other company or corporation, co-partnership or individual whose property or construction it may be necessary to change or remove to carry said plan and this order into effect, shall change or remove the same, according to said plan" (p. 1790, ll. 35-40).

The order further directs Erie Railroad Company, the City of Paterson, certain other companies, "and all other parties to this proceeding" to proceed with due diligence to the execution of the order and to comply with all the requirements thereof and the duties imposed upon them thereby, and by the said act under which the order is made, and the laws of this state, and that to that end, each of them exercise in good faith all of the powers con-

ferred upon them and each or any of them, under the laws of this state (p. 1791, ll. 1-20).

The plaintiffs-in-error were allowed writs of certiorari by the New Jersey Supreme Court for the purpose of reviewing said order. The opinion of that Court sustaining the order did not discuss the points that were raised by the plaintiffs-in-error, other than merely to recite the same and to conclude that they were disposed of in the opinion filed in the case wherein the Erie Railroad Company was prosecutor. The opinion is reported in 90 N. J. L. 694, 103 Atl. 1053. It was affirmed by the Court of Errors and Appeals of New Jersey without further opinion (see 90 N. J. L. 694, 103 Atl. 1053). For copy of opinion see Vol. V., p. 2317.

(2)

SPECIFICATION OF ERRORS.

The Court of Errors and Appeals of the State of New Jersey erred in holding that the order of the Board of Public Utility Commissioners of said state, dated April 20th, 1915, and the statute of said state whereon the same is based, did not violate the rights of the plaintiffs-in-error, secured to them by the Constitution of the United States and the several amendments thereto; and in not holding that the said order or that the said statute did violate such rights, or some one or more of them, in the following particulars.

I.

Because the order under review and the statute upon which the same is based take the private property of the plaintiffs-in-error for public use, without compensation and also take their property for the private benefit of other companies and thereby deprive the plaintiffs-in-error of their property without due process of law, contrary to the provisions of the Fourteenth Amendment.

II.

Because said order and statute deprive the plaintiffs-in-error of the equal protection of the laws.

III.

Because the order and statute impair the obligation of the contracts between Erie Railroad Company and the respective plaintiffs-in-error, contrary to the provisions of Article I, Section X, paragraph 1 of the Federal Constitution.

IV.

Conclusion.

BRIEF OF THE ARGUMENT.**I.**

The order under review and the statute upon which the same is based take the private property of the plaintiffs-in-error for public use, without compensation, and also take their property for the private benefit of other companies and thereby deprive the plaintiffs-in-error of their property without due process of law, contrary to the provisions of the Fourteenth Amendment.

A preliminary statement of the location and character of these plaintiffs-in-error is essential in order that there may be a proper understanding of the disastrous effects upon them of the order of the board, which is under review.

MORRIS & COMPANY.

This company has its principal place of business in Chicago. Its place of business in Paterson is adjoining the right of way of the Erie Railroad and on the north side of Market street. This situation is for its purpose the very best in the city. The company has occupied the premises at this point for twenty-seven years (p. 364). The supplies for its business are brought in refrigerator cars. They receive eight to ten cars a week. The siding upon which these cars are received is near the building, which is an old brick structure. The land occupied by virtue of a lease, which is set out on page 2026. While this lease can be terminated upon sixty days' notice, it is in effect a perpetual lease. The parties thereto are satisfied. It is mutually beneficial to them. A third

party seeking advantage from this site cannot be heard as to the right of either party to the lease to terminate it. The whole interior of the building has been reconstructed, at a cost of \$8,000, so as to make it useful for the business of this company. The interest of this company in the Paterson Beef Company building upon the same premises represents \$25,000. The volume of this company's business at this place is one and a half million dollars per year (p. 565).

Mr. Beekman, the manager, says (367) that "it is next to impossible for a beef house to run a business without tracking facilities. There are some places that cart it. You take it out in the air and keep it a few minutes and it takes the bloom off the meat. It is impossible for those people to compete with those having facilities for unloading it."

As to this particular company the plan of the city adopted by the board does not provide as in other cases for a new siding. It takes the site of Morris & Company for a new station and gives them another site elsewhere.

Mr. Beekman says (564):

"According to the blue-print, that wipes us off the map entirely.

"They put us down in the woods.

"Q How does this affect your business (565)?

A It is out of the world up here (indicating).

"Q What do you mean by that? A No trade coming up there. We might just as well back out entirely."

At the present time the building used by this company is located on the northerly side of Market street, and on the westerly side of the railroad tracks. It is practically in the location where, according to the plan attached to the order, the *new* Market street railroad station is to be constructed. The proposed new site for this

company, as shown on sheet No. 3 of the plan attached to the order, is on the easterly side of Railroad avenue between Greene and Slater streets, on a plot of ground nearly 100 feet distant from the right of way. The new site is on property owned by Erie Railroad Company, on which at this time there are located several side tracks and leads which are part of the railroad's main freight yard in the City of Paterson. The cost to Morris & Company of the reconstruction in the middle of the railroad freight yard is the sum of \$40,000. (See testimony of Mr. Brameld, p. 1956, Ex. Erie 18, p. 2247.) There has not been any request to the railroad company on the part of Morris & Company to change the location of the side track and the switch connections now used, and there has been no complaint that the present facilities are inadequate and improper. The proposed site for the new building of Morris & Company is already in use by the railroad company as part of a very large freight yard. It is obvious that the new location is not as desirable for the purpose of this company's business as its present location—which is in the centre of the city and is equipped with side tracks and appropriate connections. The plan, as prepared by the board, makes no provision for access to the new location, nor for the construction of side tracks or of any of the other facilities that the company requires.

It is obvious that this part of the order, so far as it affects Morris & Company, cannot be justified on the theory that the change in the location of its building is necessary for or incidental to the elimination of the grade crossings; it is not necessary to destroy the present building of Morris & Company, and still less is it necessary to require the construction of another building, 1800 feet distant and 100 feet from the main line railroad tracks.

If, therefore, the order means that either Morris & Company or the railroad company is required to make this violent change in the location of the plant of Morris & Company, it is, to that extent, clearly invalid. *Potter v. Board of Public Utility Commissioners*, 89 N. J. L. 157, 98 Atl. 30.

MEYER & DE VOGEL.

Meyer & De Vogel are grain merchants and have their place of business abutting on the property of the Erie Railroad, 65 feet on Franklin street, 100 feet on Summer street and 100 feet on the railroad at the junction of Franklin and Summer streets. The land was purchased for this particular business, which they have carried on there for twenty-four years. They have adapted their building to their business so as to receive every reasonable facility from the railroad for their work. They unload their cars directly into the building, which is of brick and cost \$13,000 (386). In addition, \$2,700 worth of machinery was installed. The first floor of the building now is on a level with the floor of a car standing on the siding. The grain is taken to the top of the building by machinery and then dropped down upon the scales. From the scales it falls into the granary, which is on the second floor. It is carried to each bin as it may be needed. The elevation of the tracks at this point is to be fifteen feet. It will require \$3,000 to \$4,000 (387) to adapt the building to the new elevation. The whole interior of the building will have to be altered. After the plan of the city was submitted Mr. Meyer testified again on page 571, and stated that if the tracks were raised fifteen feet, it would consequently make the opening in the middle of the first and second stories. This will be a serious damage to the

building and to their business. The siding of Meyer & De Vogel, as testified to by Mr. Brameld (1976), leaves the siding of A. H. Smith about thirty feet west of Keen street, and thence crossing Keen street parallels the right of way of the railroad company to Franklin street. It is on the property of the railroad company. A letter dated February 25th, Exhibit Erie 12 (2031), shows that the company, Meyer & De Vogel, paid \$430.19 for the installation of this siding. There was an agreement signed in reference to the matter in the usual form. Neither Mr. Bostman, the secretary of the railroad company (1945), nor Mr. Meyer has been able to find the written agreement. The right of this company therein was the same as that of other property owners having an agreement for the construction of siding. The terms and conditions of such agreements are shown by the other siding agreements presented in evidence. This contract between the railroad company and the company, Meyer & De Vogel, cannot be impaired without great loss to them. The fact that it may be terminated by notice from the other contracting party does not make it any the less valuable. These agreements are in effect perpetual contracts. Another serious blow which they are called upon to bear is the attempt to close Franklin street. The land of this company is bounded by three sides as stated *supra*; one side is upon the railroad, one side abuts on Summer street, and the other on Franklin street. Their main building several stories in height, is at the junction of Franklin street and Summer street and extends along Franklin street to the railroad. Franklin street is used for the entrance to the building, of which there are two, one at either end. It is also used for loading and unloading their trucks. Mr. Meyer says, "We do most of our business on Franklin street" (573). But an important fact

is that it is used exclusively as a means of reaching the populous centers of the city. With this street closed, it will be necessary for their trucks and teams to haul their loads to Lafayette street and cross under the railroad at this point and return on the other side of the railroad to a point opposite the closed street.

Mr. Meyer says (at p. 573), "We have a traveling trade that would be cut off altogether." Their right to do business is thus impaired.

Ryerson v. Morris Canal and Banking Co., 69 N. J. L. 505.

Such a result we need hardly add is a very heavy burden placed upon the shoulders of these plaintiffs-in-error. When they were young men they purchased this site for its advantages for their trade, and they have prospered in consequence of their foresight. To be deprived now of its benefits by this order under review is to destroy the work of a lifetime.

The order directing the construction of a new crossing at Montgomery street as a substitute for the present crossing at Franklin street, 500 feet distant, is an unwarranted exercise of power and invalid.

The order directs that an undergrade crossing at Montgomery street be constructed in the place of the present crossing at Franklin street. The words are: "The plan of the city provides . . . for substituting for the present crossing at Franklin street a new undergrade crossing at Montgomery street" (1757). This was ordered to be done (1765). The precise language of the order is "by substituting for the existing crossings at Cedar street a crossing under the railroad at Taylor street and for the existing crossing at Franklin street a crossing under the railroad at Montgomery street" (1790).

The authority for this extraordinary exercise of power is alleged to be found in Section I of the act and which section the board set forth in their report of November 4, 1914 (1750). This section is as follows:

"Whenever a public highway and a railroad cross each other at the same level, and it shall appear to the board that such crossing is dangerous to public safety, or that the public travel is impeded thereby, the Board of Public Utility Commissioners may order the company operating such railroad, within such time as said board may fix, to alter such crossing according to plans to be approved by said board, by substituting therefor a crossing not at the grade of such public highway either by carrying such public highway under or over such railroad, or by reconstructing such railroad under or over such public highway, or by vacating, relocating or changing the lines, width, direction or location of such highway and the opening of a new highway in the place of the one ordered vacated." P. L. 1913, p. 91.

The authority given by this section to the board is to alter such crossing by substituting therefor a crossing not at the grade of *such* public highway either by carrying *such* public highway under or over such railroad or by reconstructing such railroad or changing the lines, width, direction or location of *such* highway, and the opening of a new highway in the place of the one ordered vacated.

It is obvious that what the legislature had in mind was to change the grade only of *such* highway by carrying it under or over the railroad. Power, indeed is given to vacate and open a new highway *in the place* of the one ordered vacated. The board in the order under review has, however, directed the opening of Montgomery street as a substitute for Franklin street, which new highway is

about 500 feet south of the vacated street. Even if the order directed that Montgomery street crossing be opened *in the place of* Franklin street, the board was without power to make it, as there is another highway—Lafayette street, between these two points open for public travel for many years and in daily use. Yet by this order the Montgomery street crossing is to be substituted for the present crossing at Franklin street! There is, too, a highway, Keen street, open for travel north of Franklin street at the same distance as Lafayette street is south. There is also another crossing at Lawrence street at the same distance north of Franklin street and Montgomery street, the new substituted crossing, is south of Franklin street. Why not, instead of going 500 feet and passing an open street, go 5,000 feet and pass a dozen open streets? Where is the limit? The statute does not confer such extraordinary power.

But, again, there is an entire absence of reason for this vacation. The city employed Henry Ryon, a young man with the briefest experience to aid the city engineer. This was his first experience of the kind. Yet this is how lightly the property rights of Meyer & DeVogel in Franklin street are set aside.

He is examined by the city counsel:

“Q You intend to close Franklin street? A Franklin street is shown closed.

“Q Why do you show that? A It was a little more convenient there, the way the tracks were laid out, and also due to the fact it gave a better distribution of streets to open Montgomery street and close Franklin Street. Franklin Street, according to the census given in the testimony before this commission, has the least number of people crossing of any street in the city.”

This is the whole story. This young man, a complete stranger in the city, without any experience in similar cases, draws a map showing Franklin street closed and when asked to justify his action merely states that "it was a little more convenient" and then adds, as an after-thought, that it also gave a better distribution of streets. No *substantial* argument is advanced why Meyer & De Vogel should submit to this injury. He attempts a better distribution of streets by making a crossing at a street where there never existed any and where there has never been the slightest request therefor. The Court is "to set aside such order when it clearly appears that there was no evidence before the board to support reasonably such order" (P. L. 1911, 374, Sec. 38). If this new crossing is to be opened, then Meyer & De Vogel say that it must not be done at the expense of Franklin street.

The railroad company is directed by this order to substitute Montgomery street crossing for Franklin street crossing. This is not left in doubt. It is the specific and direct command of the board.

"The board * * * does hereby order the Erie Railroad Company to alter such crossings and each of them according to the plan," etc. * * * "by substituting for * * * the existing crossing at Franklin street a crossing under the railroad at Montgomery street," etc. * * * "and by performing all other work required according to and shown on the said plan and profile." (1789, 1790.)

The city of Paterson is included (1791) among a long list of the parties to the proceeding who are in a general way to execute the order. How is this railroad company to vacate Franklin street and open Montgomery street? To state the question is to answer it. It has no such power. The board cannot invest it with such power. Will

the city assume to execute it, although the railroad company is commanded to do so? The validity of an order cannot depend on such assumption. It will be conceded that the railroad company cannot open and close streets. If it be argued that the city was ordered to open and vacate these streets, then we ask—does this order itself open the new crossing?

Is the regular method prescribed by law in opening and vacating highways thus abrogated? Is notice to be given to those interested? Are objectors to have an opportunity to be heard? Has the Board of Works, the municipal body having jurisdiction over these streets, lost *pro hac vice* such jurisdiction? (P. L. 1907, p. 114; P. L. 1911, p. 179; *Sherwood v. Paterson*, 94 Atl. 311.) Is the act creating such board annulled? Is the vote of the members of the Board of Public Works to be dispensed with and the vote of the Board of Public Utility Commissioners substituted therefor?

Meyer & De Vogel paid for the siding and the construction thereof, and as a necessary adjunct of the contract they have an easement to the circulation of light and air.

So far as their right to light and air over the land of the railroad company, which abuts their property, is concerned, it is conceded that against this property of the railroad company no easement of light and air can be acquired by a mere user for twenty years. *Hayden v. Dutcher*, 31 N. J. Eq. 217. But it is claimed that against the railroad company an easement of light and air by virtue of their siding contract does exist. *Johnson v. Hahne*, 61 N. J. Eq. 438. This is a property right under the constitution.

These parties will also be deprived of light and air to that part of their building abutting on Franklin street near the railroad. The plans require the construction of a wall or embankment about fifteen feet high across Franklin street on the easterly line of the railroad. The effect of this will be to make the first story contiguous to this wall less valuable to these parties. This building is entitled to the lateral light and air over the street. Any obstruction of the highway is a nuisance and subjects the party to indictment. The passage of a steam railroad longitudinally over a street is a nuisance if unauthorized, and if authorized, can only be done after compensation is made.

Van Horne v. Newark Pass. Ry. Co., 48 N. J. Eq. 332.

The 34th Section of our Railroad Act, P. L. 1903, 645, declares that in any city except in a city of the first class, the municipal authorities may permit the railroad company to lay its tracks along and upon any street, provided the company shall first acquire the rights of the owners abutting thereon by agreement for condemnation.

In the Elevated Railroad cases in New York, *Lahr v. Metropolitan Elevated R. Co.*, 104 N. Y. 268, it was held that abutters upon public streets in a city are entitled to such damages as they may have sustained by reason of a diversion of the street from the use for which it was originally taken and its legal appropriation to other and inconsistent uses. These plaintiffs-in-error have an easement in the bed the the street for ingress and egress to and from their premises and also for the free and uninterrupted passage and circulation of light and air. The ownership of such an easement is an interest in real

estate constituting property within the meaning of that term in the constitution.

Ibid.

The loss to these plaintiffs-in-error, if this street is vacated, will be very great. It deprives them, as has been said, of its use for their business and as a means of ready communication with their customers and of their customers with them. To say that the vacation of the street will restore the land to the center of the highway to the plaintiffs-in-error, discharged from its public easement, and that such restoration is adequate compensation for the vacation, is to state what we all know to be not in accordance with the fact. These parties are deeply concerned, not only in the part of the street vacated in front of their own property, but also in every foot of it elsewhere, and especially in the part sought to be vacated.

Meyer & De Vogel will also be deprived of light and air where the line of their property adjoins the railroad property. The level of the railroad is at this point to be raised fifteen feet and will in consequence deprive these parties of the light and air for their building for their whole first story on the railroad side.

The plaintiffs-in-error, Meyer & De Vogel, as abutting property owners on the part of Franklin street which the order now under review directs to be vacated are entitled to subject such order to judicial scrutiny.

Beecher v. Newark, 64 N. J. L. 475; aff. 65 N. J. L. 307;

Morris & Cummings Dredging Co. v. Jersey City, 64 N. J. L. 142;

Lambert v. Paterson, 72 N. J. L. 437;

Sherwood v. Paterson, 94 Atl. 311.

This firm is not only deprived of light and air by the elevation of the main line tracks, but they are also deprived of the use of the existing side track. The plan adopted by the board provides that the new siding for the use of this firm is to be an extension of another new siding constructed for one Smith, to be built at an elevation of fifteen feet above the present siding, on the railroad's right of way (1976, ll. 20-30). It is obvious that before such new side track can be used at the new elevation, *somebody* must build it. The railroad company claims that it is under no legal duty to rebuild the side track for the benefit of Meyer & De Vogel, and if that position is well taken, then Meyer & De Vogel can no longer use the side track, as it will be cut off when the main line tracks are elevated—unless Meyer & De Vogel undertake to rebuild the track; but they have no right to go on the right of way of the railroad company for that purpose, even if they wanted to do so.

Effect of Destruction of Side Tracks.

It will be seen from the foregoing summary of the conditions as they now exist, and of the order of the board and the plan thereby adopted, that with respect to both Morris & Company and Meyer & De Vogel, the side tracks now used by both are destroyed. In the case of the former, there is no provision made for a new connection with the main line tracks when elevated—all that is done is to set its building in the middle of the freight yard; in the case of the latter, the existing side track is cut off and if Meyer & De Vogel desire to maintain a connection with the main line tracks, they must build a new siding at the new elevation, at their own expense. If, however, the

order is construed so as to require Morris & Company to construct a building at the proposed new site, and to require Meyer & De Vogel to rebuild the side track by elevating same, then the property of both of the plaintiffs-in-error is taken for public use, without compensation, to the extent of the cost of such construction. If it be said that such removal and such reconstruction is not essential to the elimination of the grade crossings, and for that reason the property of these plaintiffs-in-error is not taken for *public* use, nevertheless, the property of both of them, to the extent of the cost of such reconstruction, is taken for the benefit of other companies, to wit, in the case of Morris & Company, for the benefit of Erie Railroad Company as owner of the land on which the new building is to be constructed, and, in the case of Meyer & De Vogel, for the benefit of Erie Railroad Company as lessee and of Paterson & Ramapo Railroad Company as owner in fee of the right of way upon which the new siding is to be built.

But it will probably be urged that the order of the board does not require the construction of a new building by Morris & Company in the railroad freight yard, or the construction of a new side track by Meyer & De Vogel at the new elevation of the main line tracks. The opinion of the New Jersey Supreme Court is not entirely clear as to what, if anything, these plaintiffs-in-error are required to do. The Court merely recited that the reasons in both cases were the same as those presented in the case of D. Fullerton & Co., and then stated: "all the points in these cases are disposed of in the opinion of the court in the case of Erie Railroad Company *v.* Board of Public Utility Commissioners" (p. 2317). We assume that this reference is to that part of the opinion in the Erie case

wherein the Court concluded that the order under review did not require either the railroad company or the owners of private sidings to make changes therein or to reconstruct the same. The Court said:

“The plan which accompanies the order simply suggests to such owners a method by which their property may be conformed to the new conditions, so as to admit of a continuance of the siding facilities theretofore enjoyed.” (P. 2282, ll. 15-40.)

This conclusion might be said to include the case of Meyer & De Vogel, as the plan indicates a means by which such facilities may continue to be enjoyed (always providing that somebody builds the new side tracks to conform to the new grade of the main line track), but it certainly cannot be stretched to include the case of Morris & Company. So far as the latter company is concerned it is not only deprived of the use of the existing side track and connections, and it is not only deprived of the use of the existing building (which is to be destroyed to make way for a new construction for the benefit of the railroad company) but there is no provision even “suggested” in the plan, whereby its new building (if somebody is gracious enough to build it) is to have any means of connection with the main line tracks. The above quotation from the opinion of the New Jersey Supreme Court applies generally to all of the proposed changes in side tracks, leads, &c.; and later in the opinion, the Court makes further comment as to the effect of the order upon Morris & Company, saying:

“Point X is that the order is invalid in so far as it requires the prosecutor to construct structures upon its lands for the use of Fuller’s Express Company and Morris & Co. in substitution for the structures now occupied by them as lessees and

which will be rendered useless by the elimination work.

"It is true that the plan adopted by the board has indicated upon it suggested possible locations upon the lands of the railroad company of substituted structures for these private companies, but it does not require the railroad company to provide such locations or to erect such structures since neither the existing structures nor the suggested structures constitute any part of the railroad." (P. 2285, ll. 8-20.)

Under this construction of the order, it will be observed that Morris & Company, to use the expression of its manager, is "entirely wiped off the map." This company has to submit to the destruction of its existing *building*, as well as of the side track and connections thereof and it does not even have the poor consolation of constructing another building and another side track at its own expense in the same relative location. In this respect, it is even worse off than Meyer & De Vogel, as in the latter case, the board at least undertook to "suggest" the construction of a new side track in a position which corresponds substantially to the location of the existing track. It will, therefore, be seen that if the railroad is not "required" to provide a new location for Morris & Company, that company is absolutely deprived of the use of the present building and side tracks without *any* means of rehabilitating itself.

But if again, it be urged that the destruction of the building of Morris & Company is merely a "suggestion" which cannot be legally carried into effect, still the fact remains that the side track which is now in use by Morris & Company is cut off in exactly the same way as the side track of Meyer & De Vogel is cut off, and in the case

of both parties, *somebody* must reconstruct the side tracks at some place and at some time, if either party is to continue to carry on its business. It follows, that from any point of view, both these plaintiffs-in-error are deprived of the use of their existing facilities and for all practical purposes they will be unable to continue their business.

Under the construction of the order thus adopted by the New Jersey courts, we submit that these plaintiffs-in-error are deprived of their property without due process of law. The cases hold that persons are entitled to receive compensation for interference with switch connections or other facilities, caused by a change in the location or grade of main line tracks.

In *Chicago &c. R. Co. v. McGrew*, 104 Mo. 282, 15 S. W. 931, it was held that the connection of a mine with a railroad is a valuable property right and whatever damage was occasioned by cutting it off in the taking of part of the property by another railroad, should be allowed to the mine owner, even if the switches and tracks whereby the connection was made belonged to the railroad company.

In *New York &c. R. Co. v. Blacker*, 178 Mass. 386, 59 N. E. 1020, part of petitioner's coal yard was taken for the purpose of eliminating a grade crossing. It was held that the fact that switch connections would be done away with was an element of damage which should be considered, although there was no obligation on the part of the railroad to continue the said connections. See also, *Chicago &c. R. Co. v. Wolf*, 137 Ill. 360, 27 N. E. 78; *Chicago &c. R. Co. v. Walker*, 251 Ill. 629, 96 N. E. 536.

To compel these plaintiffs-in-error to make the changes at their own expense, or to destroy their facilities, without compensation, operates to deprive them of their property without due process of law, contrary to the provisions of the Fourteenth Amendment.

II.

The order and statute deprive the plaintiffs-in-error of the equal protection of the laws.

We have shown under Point I that under any possible construction of the order under review, both of the plaintiffs-in-error are bound to incur some expense or sustain some loss. If the order means (as on its face it apparently does) that these plaintiffs-in-error must construct buildings or side tracks, then they must themselves bear that expense; but if the side tracks are not reconstructed at all, then they are deprived of the use thereof; and in addition, so far as Morris & Company is concerned, the building where its business is now carried on is destroyed. The result is that these parties are required to contribute to the expense of a general public improvement without any compensating advantage. Such contribution is obviously not in proportion to the benefits received, as there is no evidence to show that any benefits will be received. They are in a different position than some of the other parties who are similarly situated, and to that extent sustain an unequal portion of the cost of the proposed public improvement; and they are, therefore, deprived of the equal protection of the laws.

The case, in this respect, is like the case of *Houck v. Little River Drainage District*, 239 U. S. 254, 60 L. Ed.

266, and *Myles Salt Co. v. Drainage District*, 239 U. S. 478, 60 L. Ed. 392. In the latter case, it was held that property which was not benefited directly or indirectly by a drainage improvement, could not be included within the drainage district solely for the purpose of deriving a revenue from the levy and collection of drainage taxes thereon for the benefit of other lands that were to be improved by the drainage. This Court, in reversing a judgment in a suit to restrain the sale of the land in question for non-payment of drainage taxes, said:

"We are not dealing with disputable grounds of discretion or disputable degrees of benefit, but with an exercise of power determined by considerations not of the improvement of plaintiff's property, but solely of the improvement of the property of others—power, therefore, arbitrarily exerted, imposing a burden without a compensating advantage of any kind."

The general principle upon which depends the question of whether a person has been deprived of the equal protection of the laws, has been summarized by this Court in *Southern R. Co. v. Greene*, 216 U. S. 400, 54 L. Ed. 536, as follows:

"The equal protection of the laws means subjection to equal laws, applying alike to all in the same situation. If the plaintiff is a person within the jurisdiction of the state of Alabama, within the meaning of the 14th Amendment, it is entitled to stand before the law upon equal terms, to enjoy the same rights as belong to, and to bear the same burdens as are imposed upon, other persons in a like situation."

In the same case, the Court also laid down the rule by which the legality of the classification of persons might be determined, using the following language:

"While reasonable classification is permitted without doing violence to the equal protection of the laws, such classification must be based upon some real and substantial distinction, bearing a reasonable and just relation to the things in respect to which such classification is imposed; and classification cannot be arbitrarily made without any substantial basis. Arbitrary selection, it has been said, cannot be justified by calling it classification." (Citing cases.)

III.

The order and statute impair the obligation of the contracts between Erie Railroad and the respective plaintiffs-in-error.

The contract of Morris & Company is in the form of a lease dated May 14th, 1910, whereby the railroad company leased to Morris & Company a certain part of a brick building located on the northerly side of Market street, together with certain premises appurtenant thereto.

The original contract of Meyer & De Vogel, which was in the usual form of siding agreements, was not located (1945-6). Under this agreement the shipper agrees to pay the cost of the grading and of all materials and labor used in the construction of the side track (Ex. R. 50, p 1118).

It is obvious that the use of the side tracks is necessary to the business of both of these parties. It is a valuable property right which depends upon the contract. The

railroad is not bound to construct side tracks for the benefit of private shippers.

If the order be construed to require the railroad company to reconstruct the side tracks, the railroad may decline to do so, as it is not part of its obligation; and, on the other hand, if the plaintiffs-in-error or either of them should desire to reconstruct the side tracks so as to continue their business in their present locations, the railroad company may not permit them to do so, and finally, if nobody is required to reconstruct the side tracks, then the plaintiffs-in-error are deprived of the benefit of their contracts with the railroad company. No matter how the order is construed, the rights of the plaintiffs-in-error, as given by their respective contracts, are impaired.

IV.

Conclusion.

Insofar as the order under review affects the rights and property of the plaintiffs-in-error, it is invalid and, to that extent, should be set aside. But, under the construction of the Public Utility Act of the State of New Jersey, as adopted by the courts of that state, when any part of an order made by the board pursuant to the statute is found to be invalid, then the entire order must be set aside. To save repetition on this point, reference is made to the authorities under Point XI of the brief filed by Erie Railroad Company. The result, therefore, is that if the Court finds the part of the order which affects this plaintiff-in-error to be invalid, the entire order must be set aside.

The judgment of the Supreme Court of the State of New Jersey affirming said order, and the judgment of the Court of Errors and Appeals of said state, affirming said judgment, should, therefore, be reversed with directions to the state courts to set aside the entire order.

WILLIAM B. GOURLEY,
Attorney of Plaintiff-in-Error.

GEORGE S. HOBART,
Of Counsel.

INDEX.

PAGE

POINT I.

The common law imposes upon a railroad company the duty to maintain the public highway where they cross the railroad, in condition for safe and convenient use at all times and under all circumstances. This duty is continuing and extends to the separation of the grades of the public highway and the railroad whenever such separation is reasonably necessary for safety and convenience. The duty applies alike to highways in existence when the highway was laid out and to those constructed later....

1

POINT II.

The acts incorporating "The President and Directors of the Paterson & Hudson River Railroad Company (laws of New Jersey, 1831, p. 24) and the "Paterson & Ramapo Railroad Company (laws of New Jersey, 1841, p. 97) (lessors of Erie Railroad Company), each imposes the duty "to construct and keep in repair, good and sufficient bridges or passages over or under the said railroad or roads, where any public or other road shall cross the same, so that the passage of carriages, horse and cattle on said road shall not be prevented thereby.....

5

POINT III.

The duty imposed by the acts incorporating the President and Directors of the Paterson & Hudson River Railroad Company and the Paterson & Rama-

po Railroad Company is continuous and requires that at all times and under all circumstances the public highways, where they cross the railroad, be kept by the companies respectively in a condition fit for safe and convenient use.....

7

POINT IV.

The duty imposed by the specific charter provisions of the act incorporating the President and Directors of the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company, set out under Point 2, extended to public highways in existence at the time that the railroads were laid out, and also to public highways later laid out over the same.....

11

POINT V.

The leases under which the rights of the Erie Railroad Company exist, and which leases were confirmed by the act of the Legislature of New Jersey, enacted in 1853 (Laws of New Jersey, 1853, p. 480), vested the power, privileges and rights of the lessor in the lessee. The power, privileges and rights, however, were vested subject to the duties imposed by the respective acts incorporating the lessors

13

POINT VI.

Independent of the common law and of the specific charter provisions before referred to the laws of New Jersey impose upon railroad companies operat-

III

PAGE

ing within the State a continuing duty at all times and under all circumstances to keep the public highways where they cross the railroad, in a condition fit for safe and convenient use. The duty so imposed is applicable alike to public highways existing at the time of the laying out of the railroad or later extended thereover 17

POINT VII.

The law of the State of New Jersey (New Jersey Laws of 1913, page 91), hereinafter referred to as the Grade Crossing Elimination Act under which the proceedings which terminated in the judgments here under review were initiated, simply provides a definite method of enforcing the duty imposed by the common law, the provisions of the charters and the provisions of the General Railroad Act, in specific cases 22

POINT VIII.

The provisions of the Grade Crossing Elimination Act involve merely an exercise by the Legislature of the State of the police power of the State.. 25

POINT IX.

The order of the Board of Public Utility Commissioners, which was affirmed by the judgments hereunder review, is merely an act of administration in execution of the Grade Crossing Elimination Act, which statute, as heretofore indicated, merely exerts the police power of the State..... 31

POINT X.

The Grade Crossing Elimination Act and the order of the Board of Public Utility Commissioners made in pursuance thereof impose upon the railroad company part of the cost of the separation of grades. Neither the act nor the order is obnoxious in the particular to the due process clause of the Constitution

36

POINT XI.

Both the statute and order relate to highways existing at the time of the construction of the railroad and to highways laid out thereafter. In this respect neither the order nor the statute is obnoxious to the due process clause of the Constitution.....

44

POINT XII.

The statute provides for the imposition not exceeding 10 per cent. of the cost directly chargeable to the elimination of the crossings used by the street railway company, upon that company. The order made in pursuance of the statute imposes 10 per cent. of such costs upon the street railway company. Neither the statute nor the order in this respect is obnoxious to the due process clause of the Constitution

47

POINT XIII.

The statute requires that changes in, or the removal of, the property or construction of any telegraph, water, etc., company shall be made by such

company at its own expense. The order made in pursuance of the statute requires such changes. Neither the statute nor the order is, on this account, obnoxious to the due process clause of the Constitution 55

POINT XIV.

Neither the statute nor the order requires the Erie Railroad Company to construct or reconstruct switches, sidetracks or structures for the private use of others. Neither the statute nor the order, therefore, in this respect, violates the due process clause of the Constitution..... 63

POINT XV.

The statute requires that the order made thereunder shall be directed to the "company operating such railroad." The order made in pursuance of the statute was directed to the Erie Railroad Company, the company operating such railroad. Neither the statute nor the order in this respect was obnoxious to the due process clause of the Constitution 69

POINT XVI.

Neither the Grade Crossing Elimination Act nor the order made in pursuance thereof impaired the obligation of any contract between the state and the railroad companies..... 75

POINT XVII.

Neither the Grade Crossing Elimination Act nor the order made in pursuance thereof contravenes the contract clause of the Constitution by reason of the effect thereof upon the contracts embodied (a) in the leases of the railroads and franchises, or (b) the contracts between the railroad companies and the holders of their obligations and securities, or (c) the contracts between the railroad companies and other utility companies occupying the public highways and crossing the railroad, or (d) the contracts between the railroad companies and others for switch connections and service.....

82

POINT XVIII.

Neither the Grade Crossing Elimination Act nor the order made in pursuance thereof impose a direct burden upon or interfere with the regulation of interstate commerce clause.....

94

POINT XIX.

The police power of the state is, under the Constitution, when exerted in the interest of public safety, unlimited, except by the requirement that the exercise thereof be not merely capricious and wanton. Neither the Grade Crossing Elimination Act nor the order made in pursuance thereof is, in any aspect, capricious or wanton.....

105

POINT XX.

The order does not violate the due process clause because of the action of the Board on the Erie Railroad Company's petition for rehearing.....

123

POINT XXI.

Collective point in refutation or remaining arguments of plaintiffs-in-error.

(a) Under the law of New Jersey, the exercise of the power of eminent domain in the construction of a new highway over a railroad requires that compensation be made for injury occasioned by necessary structural changes.

It does not follow that an exercise of the police power of the State is limited by a requirement that compensation be made for such changes when exerted in the interest of public safety..... 128

(b) The Erie Railroad Company, plaintiff-in-error, insists that the common law duty and the duty imposed by the provisions of the charter of its lessor companies relating to crossings, extends only to highways existing at the time the railroads were constructed, and that this is the settled law of the state 130

(c) There is a fundamental distinction between the police power exerted in regulation of rates exacted in the conduct of enterprises affected with a public interest and the police power exerted in the interest of public safety..... 131

(d) It has been difficult for us to comprehend the arguments advanced on behalf of the Erie Railroad Company, plaintiff-in-error, on the basis of the claimed course of adjudication and legislation in the state, with reference to which the brief submitted by it is replete.

BRIEF IN BEHALF OF DEFENDANTS-IN-ERROR.

BRIEF OF THE ARGUMENT.

(The Italics used are not in the text quoted, but are ours.)

POINT I.

The common law imposes upon a railroad company the duty to maintain the public highways where they cross the railroad, in condition for safe and convenient use at all times and under all circumstances.

This duty is continuing and extends to the separation of the grades of the public highway and the railroad whenever such separation is reasonably necessary for safety and convenience.

The duty applies alike to highways in existence when the railroad was laid out and to those constructed later.

The authorities are uniform in recognition of the fact that the common law imposes upon a railroad company the duty to maintain the public highways, where they cross the railroad, in condition for safe and convenient use, at all times and under all circumstances.

The rule was distinctly stated in *State ex rel. Village of Clara City v. Great Northern Ry. Co.*, 130 (Minn.) 400, 153 N. W. 879, where BURR, J., said:

"Even at common law the burden was cast upon the railroad to maintain that part of the public highway occupied by its tracks and right of way in a proper condition for travel."

The authorities are also uniform in recognizing that the duty so imposed by the common law is continuing.

In *State v. St. Paul and Minn. Transfer Ry. Co.*, 80 Minn. 108; 83 N. W. 32, the Court held that at common law the duty rests upon a railroad corporation, when it occupies a public thoroughfare with its tracks, to restore the same by some reasonably safe and convenient means to its former condition of usefulness, and that the duty is continuing.

That this continuing duty requires the separation of the grades of the public highway and the railroad, whenever such separation is made reasonably necessary by increased operation over the railroad, or increased use of the highway, or both, in order that the safety and

convenience of the traveling public may be conserved, is likewise uniformly recognized.

In *State ex rel. City of St. Paul v. Chicago, M. & St. P. Ry. Co.*, 122 Minn. 280; 142 N. W. 312, the Court held that whenever it is reasonably necessary for the convenience and safety of the traveling public, it is the duty of a railway company to viaduct or bridge its tracks at their intersection with streets and that *this duty exists at common law.*

To the same effect is *Wabash R. Co. v. Railroad Commission, Ind.*, ; 95 N. E. 673, where the Court in the course of its opinion said:

"It is well settled in this state that the right of a railroad company to cross a highway with its tracks carries with it the duty upon the part of the railroad company to restore the highway to, and keep it in, its former condition of usefulness and safety, and, if this cannot be done by a grade crossing, the company must do it either by constructing its tracks over or under the highway or the highways over or under its tracks. . . ."

"While under the law of this state the railroad company may have a discretion as to the manner of performing this duty of providing a safe and useful crossing, it is a ministerial discretion. The act must be done, and there is no discretion as to whether it will or will not do it. If the mode chosen fails to execute the duty, though the company claims it is adequate, the law by mandamus will compel a proper performance, pointing out in the writ the point of failure and what must be done that there may be no further failure." . . ."

There is a conflict in the authorities as to whether the duty so imposed by the common law applies alike to highways in existence when the railroad was laid out and to those constructed later. The weight of authority sup-

ports the proposition that the duty is not confined to highways that were in existence when the railroad was laid out, and that it extends as well to highways constructed later.

This question was considered in *State ex rel. City of Minneapolis v. St. Paul, M. & M. Ry. Co.*, 98 Minn. 380; 108 N. W. 261; 28 L. R. A. (N. S.), 298; where the Court concluded that the obligation imposed upon the railroads by the common law extended to highways in existence when the railroad was laid out and to those constructed later as well, and where the Court said:

“ * * * In view of the fact that the railroad company takes its franchise subject to the reserved right of the state to lay new streets over and across its tracks, and in contemplation that it may do so, * * * and the further fact that the company is solely responsible for the necessity of safety devices at street crossings, the same being occasioned by the operation of its trains over and across the street, and the further elementary principle that he who creates and maintains upon his premises a condition dangerous and inimical to others is under legal obligation to so guard and protect it that injury to third persons may not result therefrom, *the rule of the common law as to existing, must be held to apply equally to new streets.* The right is a condition attached by implication of law to the charter and franchises of the railway company, and the obligation to maintain the street intersections in good repair is a continuing one, follows the franchise and applies to new streets or highways as soon as they come into existence.”

There is no conflict between the duty so imposed by the common law—a duty to the general public—and the duty of care, the violation of which constitutes a tort, and gives rise to an action for damages by the individual

injured. The first of these duties is based upon the right of the general public and is enforceable by an action for injunction or mandamus by the state or its political sub-divisions in an appropriate case, and may be made the subject of indictment.

The latter of these duties is based upon the right of the individual and may be asserted by the individual injured in his person or property, through violation thereof by an action for damages.

Clark v Elizabeth, 61 N. J. L. 565, 575;

Palmyra v. Pennsylvania R. R. Co., 62 N. J. E. 601, 614.

POINT II.

The acts incorporating "The President and Directors of the Paterson & Hudson River Railroad Company" (Laws of New Jersey, 1831, p. 24) and the "Paterson & Ramapo Railroad Company (Laws of New Jersey, 1841, p. 97), (lessors of Erie Railroad Company) each impose the duty "to construct and keep in repair, good and sufficient bridges or passages over and under the said railroad or roads, where any public or other road shall cross the same, so that the passage of carriages, horses and cattle on said road shall not be prevented thereby."

The Paterson & Hudson River Railroad Company was incorporated by an act of the Legislature of New Jersey in 1831 (Laws of New Jersey, 1831, p. 24; Exhibit R. 15). The Paterson & Ramapo Railroad Company was organized under an act of the Legislature of the State of New Jersey enacted in 1841 (Laws of New Jersey, 1841, p. 97; Exhibit R. 15).

The Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company leased their respective lines, on September 9th, 1852, to the Union Railroad Company. The following day the latter company assigned these leases to the New York and Erie Railroad Company, a corporation organized under the Laws of the State of New York in 1832. These leases were ratified by an act of the Legislature of the State of New Jersey on March 14, 1853 (Laws of New Jersey 1853, p. 480, and 1862, p. 206). The respective railroads of the Paterson and Ramapo Railroad Company and the Paterson and Hudson River Railroad Company, so leased, were incorporated into the main line of the New York & Erie Railroad Company, which connected with them at Suffern in the State of New York. After 1852 the New York and Erie Railroad Company was succeeded by the Erie Railroad Company, which in turn was succeeded by the New York, Lake Erie and Western Railroad Company, which latter company was finally succeeded by the present corporation, the Erie Railroad Company. (See Exhibit R. 15.)

The charters of both the Paterson and Hudson River Railroad Company and the Paterson & Ramapo River Railroad Company and the franchises granted thereby were unlimited in time, and therefore perpetual; *Hudson Tel. Co. v. Jersey City*, 49 N. J. L. 303; *East Orange v. Suburban Elec. & Co.*, 59 N. J. E. 563; *Louisville v. Cumberland Tel. & Tel. Co.*, 244 U. S. 649. The leases of the property and franchises of these two railroad companies to the Union Railroad Company were made for and during the existence and continuance of the charters of the companies respectively, and the legal existence of said companies.

The statute creating The President and Directors of the Paterson & Hudson River Railroad Company, before referred to, provided in its ninth section as follows:

“That it shall be the duty of the said company to construct and keep in repair, good and sufficient bridges or passages over and under the said railroad or roads, where any public or other road shall cross the same, so that the passage of carriages, horses and cattle on the said road shall not be prevented thereby, and also where the said road shall intersect any farm or lands of any individual, to provide and keep in repair suitable wagon ways, over and under said railroad, so that they may conveniently pass the same.”

The statute incorporating the Paterson & Ramapo Railroad Company, before referred to, contains a substantially similar provision in its eleventh section.

POINT III.

The duty imposed by the acts incorporating The President and Directors of the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company is continuous and requires that at all times and under all circumstances the public highways, where they cross the railroad, be kept by the companies respectively in a condition fit for safe and convenient use.

The courts of the State of New Jersey have had occasion to consider charter provisions similar to those contained in the acts incorporating the President and Directors of the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company. Their conclusions upon the construction of such provisions have uniformly been that the duty imposed thereby is continuous and that it requires that the company shall

at all times and under all circumstances, maintain the public highways where they cross the railroad in a condition fit for safe and convenient use; and that existing crossings may become insufficient either because of increased operation over the railway, or increased use of the highway, or both.

In *Borough of Metuchen v. Pennsylvania R. R. Co.*, 73 N. J. E. 359, the Court of Errors and Appeals of New Jersey had before it the charter of a railroad company, which provided that it should be the duty of the company to construct and keep in repair, good and sufficient bridges or passages over or under its railroad where any public road should cross the same, so that the passage of carriages, horses and cattle should not be impeded thereby.

And held, that when the tracks of the railroad company have been laid across a public highway at grade, and increasing travel requires the abandoning of the grade crossing for the better conserving of the safety of those using the highway, the right of the company under such a charter provision to construct a passageway under its railroad, as it then exists, of sufficient width and height to accommodate public travel, instead of lowering the grade of the highway and carrying it in its full width under the railroad, is clear in that the imposition of the duty carries with it the power to execute that duty in exact accordance with its prescription.

And further held that, the duty resting upon the company of constructing and maintaining a good and sufficient passage under its railroad at its intersection with a public street *was a continuing duty* and that since the passage was not originally made of equal capacity with the highway, it must, from time to time, be enlarged by the company as public accommodation demands, until it shall reach the full capacity of the highway.

In *Newark v. Erie Railroad Company*, 72 N. J. E. 447, a bill to compel the defendant companies to elevate their tracks where they cross Summer avenue, in the City of Newark. On demurrer to the bill, the demurrer was overruled.

In the course of his opinion the Chancellor said:

"The first contention raises the question of the true construction of the clause contained in the ninth section of the act of incorporation of the Montclair Railway Company, under which act that corporation obtained the franchises which the defendant now exercises, and under which the tracks were laid and are now maintained across Summer avenue at grade. The language in which the legislature expressed its will is the following: 'It shall be the duty of the said company to construct and keep in repair, good and sufficient bridges over or under the said railway, where any public or other road shall cross the same, so that the passage of carriages, horses and cattle across the said railway shall not be impeded thereby.' Was the duty thus imposed completely performed by the construction of 'bridges' under or over the railway, where it crossed Summer avenue, which were at the time of their construction 'sufficient' to prevent the public use from being 'impeded' by the railway? It is impossible to give such a construction to the language of this clause. The bridges which it is the duty of the defendants to construct are to be sufficient to permit the passage, in the use of the easement, of carriages, horses and cattle, so that it shall not be impeded by the railway. If the bridge at first provided becomes insufficient for the required purpose, whether because of the increased business of the railway company, or of the increased use of the public easement in the street, *the duty, which is a continuing one*, has not been performed."

“The ninth section of the charter of the Central Railroad Company of New Jersey contains a clause identical, in all substantial respects, with the ninth section of the Montclair Railway Act above recited. It came under review in *Central Railroad Company ads. State*, 32 N. J. L. (3 Vr.), 220. The Supreme Court, in the opinion of Chief Justice Beasley, declared that the clause imposed a duty on the railroad company in favor of the public, which was continuous, and the performance of which must be measured by circumstances. The prescribed duty was, it was held, to keep at all times and under all circumstances the public highways at points where they cross the railroad, in a condition fit for safe and convenient use. The doctrine was again expressed in the Supreme Court in *Reed v. Camden*, 53 N. J. L. (24 Vr.) 322, and when that case came into review in the Court of Errors and Appeals, while the judgment of the Supreme Court was reversed, there was no criticism of the doctrine. Chancellor McGill, in this court, in construing a similar clause in the General Railroad Act, held that if the crossing constructed originally was not of sufficient capacity, it must from time to time, be enlarged as public accommodation demands. *Raritan v. Port Reading Railroad Co.*, 49 N. J. E. (4 Dick.), 11. In *Clark v. Elizabeth*, 61 N. J. Law (32 Vr.), 565, the opinion of Chief Justice Beasley was cited with approval. Vice-Chancellor Grey declared that the doctrine of a continuing duty, under such legislative prescription, had been adopted by our courts (*West Jersey and Seashore Railroad Co. v. Waterford*, 64 N. J. Eq. [19 Dick.], 663), and his opinion, giving expression to this view, in *Palmyra v. Pennsylvania Railroad Co.*, 62 N. J. Eq. (17 Dick.), 601, was adopted by the Court of Errors and Appeals in affirming the decree made on his advice in 63 N. J. Eq. (18 Dick.), 799. Vice-Chancellor Van Fleet, in *Newark v. Delaware Lackawanna and Western Railroad Co.*, 42 N. J.

Eq. (15 Stew.), 196, declared, and Vice-Chancellor Emery, in *Swift v. Delaware, Lackawanna and Western Railroad Co.*, 66 N. J. Eq. (21 Dick.), 34, assumed that the doctrine of a continuing duty in such case is beyond doubt. See also *S. C.*, 66 N. J. Eq. (21 Dick.), 452."

POINT IV.

The duty imposed by the specific charter provisions of the acts incorporating The President and Directors of the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company, set out under Point II, extended to public highways in existence at the time that the railroads were laid out, and also to public highways later laid out over the same.

It is submitted that the specific charter provisions contained in the statutes incorporating the President and Directors of the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company, which have been set out under Point II, imposed a duty alike with respect to public highways existing at the time the railroads were laid out and public highways thereafter constructed over the same.

It is conceded that in passing upon a substantially similar statutory provision, Vice-Chancellor Leaming, in *West Jersey & Seashore Railroad Company v. Woodbury*, 80 N. J. E. 412, reached the conclusion that the provision related only to public roads which existed at the time the railroad was constructed, and did not include highways opened at a later time.

It is contended, however, that the view adopted by the Vice-Chancellor is unsound, and that the contrary view adopted and set forth by Justice Dixon in *M. & E. R. R.*

Co. v. Orange, 63 N. J. L. 253, 273, is sound, and was adopted by the Court of Errors and Appeals of the State of New Jersey in *Erie Railroad Company v. Paterson*, 79 N. J. L. 512, 513.

It is submitted that the proposition which we urge as representing the law of the State of New Jersey has the support of the weight of authority in other jurisdictions.

The conflicting authorities are carefully reviewed and considered in the case of *State of Minnesota ex rel. City of Minneapolis v. St. Paul, M. & M. Ry. Co.*, 98 Minn. 380; 108 N. W. 261 (affirmed by this Court in 214 United States 497), where it was held that the provision of the charter of the Minnesota & Pacific Railroad Company to the effect that:

“That said company shall have the right and authority to construct the said railroad and branches upon and along, across, under or over any public or private highway, road, street, plank road or railroad, in such condition or state of repair as not to impair or interfere with its free and proper use.”

was applicable to streets and highways laid out over the railroad after its construction.

POINT V.

The leases under which the rights of the Erie Railroad Company exist, and which leases were confirmed by the act of the Legislature of New Jersey, enacted in 1853, (Laws of New Jersey 1853, p. 480) vested the power, privileges and rights of the lessor in the lessee. The powers, privileges and rights, however, were vested subject to the duties imposed by the respective acts incorporating the lessors.

Whatever rights the Erie Railroad Company has in the railroads of The President and Directors of the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company, respectively, are derived from the confirmatory act of the Legislature of the State of New Jersey (Laws of New Jersey, 1853, page 480).

In the absence of precedent legislative authority conferred for that purpose, or of a confirmatory act, a lease made by a railroad corporation of its road and franchises in New Jersey would be absolutely null and void.

Black v. Delaware & Raritan Canal Co., 24 N. J. E. 455, reversing same case, 22 N. J. E. 130.

As before indicated, the acts incorporating the lessor companies, respectively, each imposed upon the company the duty at all times and under all circumstances to keep the public highways where they cross the railroads in condition fit for safe and convenient use.

The confirmatory act provided:

“That the said leases and contracts shall not be held to grant any power, privilege or right not granted to said companies respectively by their charters and the supplements thereto.”

It therefore follows that the powers, privileges and rights acquired by the lessee were vested subject to the duties imposed by the respective acts of incorporation.

If authority in support of this proposition is needed, it may be found in the following cases:

In *Buffalo Stone & Cement Co. v. Delaware, Lackawanna & Western R. Co.*, 130 N. Y. 152, it was held that where a railway company organized under the laws of the state leases its property to a foreign company, and by a covenant in that lease the latter agrees to perform all things in connection with the road which the lessor might be required by law to perform, the lessee must maintain farm crossings, as required by Laws of 1850, Chap. 140, Sec. 44. In the course of the opinion it is said:

"In *Jones v. Seligman*, 81 N. Y. 190, a railroad corporation mortgaged its property to trustees to secure the payment of an issue of bonds, and thereafter defaulted in the payment of the interest. Under a power in the mortgage the trustees entered into possession, completed and operated the road for the benefit of the bondholders. An action was brought to compel the trustees to build fences and farm crossings, which was defended on the ground that no corporations or persons could be compelled to perform either of these statutory duties except those mentioned in the statutes. It was held that the trustees being in possession with power to make reparation and additions, they had the right, and it was their duty, to construct fences and necessary farm crossings; that being in possession of the property, and engaged in operating it, they must carry out the provisions of the statutes as the representative of the corporation. In this case the defendant, by a covenant in the lease above quoted, expressly agrees to perform all things in connection with the road which the lessor might be required by law to perform.

This provision plainly includes the duties imposed by statute on the lessor, and brings the case within the principle of *Jones v. Seligman*. The position that the defendant is not liable because it is not a corporation of this state, or organized under Chapter 140, Laws 1850, is not tenable. It having the right to operate its leased lines under the statutes of this state, it must be held to have assumed to discharge the same duties to the public and adjoining owners as are imposed upon such corporations organized and existing under our own statutes."

In *Thayer v. Flint & P. M. R. Co.*, 93 Mich. 150; 53 N. W. 216, the Court said:

"The statute makes it the duty of railroad companies to restore the highway to its former state, as near as may be, and to construct suitable crossings for the passage of teams. How. St. Sec. 3323. The obligation imposed by the statute continues until its proper discharge. By the transfer to it, the defendant took subject to the obligations and duties prescribed by the general railroad laws of the state. Laws 1889, p. 11."

In *St. Louis & S. F. R. Co. v. Hale* (Ark.), 100 S. W. 1148, the Court said:

"This is an appeal by a railroad company, from a judgment rendered against it . . . for a penalty of \$200 for failing to construct stop gaps at two places, where the railroad operated by defendant passed through inclosed land owned by plaintiff.

"The first contention on the part of the defendant is that it is only the lessee of the railroad, and not the owner thereof, and that the statute requiring railroad companies organized under the laws of this state to construct stop gaps in certain cases does not apply. But our statutes provide that any railroad corporation of another state leasing any railroad in this state shall become

subject to all the regulations and provisions of the law governing railroads in this state and held liable for the violation of any such laws. Kirby's Dig., Nos. 6732, 6743, 6757, 6758. These sections put the defendant in the same position, so far as this statute in reference to stop gaps is concerned, as the railroad company which first constructed the road, and any failure to obey the statute, subjects it to the penalties pronounced by the statute. *Russell v. Railroad*, 71 Ark. 451, 75 S. W. 725."

This question is taken out of the realm of argument by the inclusion in the lease of the property and franchises of the Paterson and Hudson River Railroad Company (Exhibit R. 15, Case Vol. II 986, 992) of the following undertaking by the lessee:

"And the parties of the second part do hereby covenant and agree with the parties of the first part, that the said parties of the second part and their assigns, will keep and maintain and run said railroad and other premises hereby demised, in such manner, order and condition as the said parties of the first part are bound to keep and maintain and run the same by the charter of the said parties of the first part, and the statutes supplementary thereto, and that they will indemnify and save harmless the said parties of the first part from all damages to which they may be subject by reason of said road and premises not being so kept, maintained and run."

And further by the inclusion in such lease (Case Vol. II, p. 993) of a provision to the following effect:

"It is in like manner further agreed . . . that if any erection or improvements shall . . . be made on said demised premises or appurtenant thereto, the same shall, at the termination of said term or terms, and the cessation of the interest of the parties of the second part of, in and to the same, by the expiration thereof, or other termina-

tion thereof, be valued by arbitrators * * * and the award of a majority of such arbitrators shall be conclusive as to the value of the said erections and improvements; and the parties of the first part shall pay and discharge the amount so valued to the parties of the second part or their assigns."

The lease of the property and franchises of the Paterson and Ramapo Railroad Company (Ex. R. 15, Case Vol. II, p. 1025) contains identical undertakings and provisions (Case Vol. II, pp. 1030, 1029).

POINT VI.

Independent of the common law and of the specific charter provisions before referred to the Laws of New Jersey impose upon railroad companies operating within the State a continuing duty at all times and under all circumstances to keep the public highways where they cross the railroad, in a condition fit for safe and convenient use. The duty so imposed is applicable alike to public highways existing at the time of the laying out of the railroad or later extended thereover.

Section 14 of the original General Railroad Act, "An Act to authorize the formation of railroad corporations and regulate the same" (Laws of New Jersey, 1873, p. 88), provided:

"That it shall be the duty of any company incorporated under this act to construct and keep in repair, good and sufficient bridges and passages over, under and across the said railroad, where any public or other roads, *now or hereafter laid*, shall cross the same, so that the passage of carriages, horses and cattle on the said road shall not be impeded thereby * * * provided that in case said railroad shall cross any street or high-

way in any city it shall be either above or below the grade thereof, at such distance as shall not interfere with the free and uninterrupted use of said streets or highways; provided further, that the common council of any city may grant permission to cross such streets or highways at grade, if they shall deem it to the best interest of said city."

This section of the law has gone through a process of change and expansion.

By a supplement, Laws of New Jersey, 1882, page 245, the section was amended so as to apply to "any company incorporated under this act or owning or operating any railroad, or owning any complete or incomplete right of way for a railroad within this state."

In addition this supplement provided:

"That in the event that such company shall not within a reasonable time after notification from the common council of the city, or committee of the township, in which such bridges and passages are to be constructed or repaired, proceed to construct or repair the same as required by this act, said common council or committee may proceed to construct or repair such bridges or passages, and when the cost thereof shall have been ascertained, the same may be collected of and from said corporation by the said common council or committee, by an action at law in any court of competent jurisdiction; and further provided, that the said council or committee, in the name of the city or township, may institute proceedings against said company to compel the specific performance of the requirements of this act."

In 1887 (Laws of New Jersey, 1887, p. 226), the Legislature further amended Section 14, making its provisions applicable to

“any company incorporated under this act, or any company owning, leasing or controlling any right of way for a railroad within the state which has been graded in the whole or in part, but upon which right of way the track or tracks have not been completely laid, shall construct good and sufficient bridges and passages over, under and across the said railroad.”

The foregoing act was declared unconstitutional in *N. Y., etc., R. R. Co. v. Montclair*, 47 N. J. E. 591.

The changes attempted to be made by it were accomplished by the supplement of March 17, 1891, Laws of New Jersey, 1891, page 169, which contains the further provision:

“That the permission of the common council of any city hereinbefore referred to shall not be necessary for the purpose of crossing any street or highway at grade, unless the said street or highway at the point where said railroad shall cross, or at some point between the crossing of said railroad and the nearest terminus of said street or highway shall be in actual use by and for pedestrians and teams at the time of the acquirement of the right of way of said railroad across such street or highway.”

The foregoing provisions became Sections 26, 27 and 29 of the Act Concerning Railroads (Revision) Laws of New Jersey of 1903, page 645, and therein are made applicable to “every railroad company owning, leasing or controlling any right of way for any railroad within this state.”

Section 26 contains the proviso:

“that this section shall not enlarge the duty imposed by its charter upon any railroad company incorporated by special act, and whose railroad was constructed before the second day of April, eighteen hundred and seventy-three.”

As to the effect of this proviso, see:

South Amboy v. P. R. R. Co., 76 N. J. E. 57;
same case, 77 N. J. E. 244.

The duty imposed by these general statutes is a continuing duty.

In the *Central R. R. Co. vs. The State*, 32 N. J. L. 220, the Court had under review and set aside a judgment convicting a railroad company for obstructing a public street, the grade of which the company had begun to depress so as to pass the street beneath the tracks.

Chief Justice Beasley, delivering the opinion of the Court and referring to a specific provision of the charter of the company similar to the general provision now contained in the general railroad act, said (224):

“This provision, it will be perceived, imposes a duty on the company in favor of the public. It is to be taken most strongly against the corporation, but it is to receive a reasonable construction. It is a continuing duty to which the company is made subject, which in its performance must be measured by circumstances. Thus, a bridge or passageway which at one time would be adequate to the public accommodation might at a subsequent period, from an increase of business or population, be totally inadequate and consequently a provision which at one juncture would be a discharge of the duty would at another amount to its infraction. Suppose a public street in a town to have been originally laid by the company over the surface of their

track, and that by reason of the growth of their business at that locality their trains should pass in such quick succession as to render such street almost impassible; under these circumstances could it be contended that the company could discharge themselves from the obligation which the section in question imposes except by passing the street thus obstructed under their road so as to restore it to public use? The duty prescribed is to keep at all times and under all circumstances the public highways at the point where they cross the railroad in a condition fit for safe and convenient use. * * * So also if the passageway, which has been constructed, is insufficient, or is not kept in good condition, the defendant may undoubtedly be held criminally responsible."

From the position so taken the Courts of New Jersey have not receded. On the contrary, the rule as stated by Chief Justice Beasley is recognized to be the established law of the state by the court of last resort in *State v. Lackawanna Railroad Co.*, 84 N. J. L. 289, 293, and is there declared not to be restricted to cases in which a grade crossing had previously existed, but to be applicable as well to cases in which the original crossing was not at grade.

That the duty so imposed by the General Railroad Act extends alike to highways existing when the road was laid out and to highways later constructed thereover is established by the cases cited and quoted under Point IV above.

POINT VII.

The Law of the State of New Jersey (New Jersey Laws of 1913, page 91, hereinafter referred to as the Grade Crossing Elimination Act, under which the proceedings which terminated in the judgments here under review were initiated, simply provides a definite method of enforcing the duty imposed by the common law, the provisions of the charters and the provisions of the General Railroad Act, in specific cases.

The proceedings which resulted in the judgments here under review were initiated under the law of the State of New Jersey, which for brevity we hereafter refer to as the Grade Crossing Elimination Act. This act is chapter 57 of the New Jersey Laws of 1913 (page 91). It is in form a supplement to the act providing for the creation of the Board of Public Utility Commissioners of the State of New Jersey, and is entitled: "A supplement to an act entitled: 'An Act Concerning Public Utilities; to create a Board of Public Utility Commissioners and to prescribe its duties and powers', approved April 21, 1911." The act is set forth in full in the Brief of Erie Railroad Company, plaintiff in error, at page 11,

Section 1 of the act provides that:

"Whenever a public highway and a railroad cross each other at the same level and it shall appear to the Board that such crossing is dangerous to public safety, or that the public travel on such highway is impeded thereby, the Board of Public Utility Commissioners may order the company operating such railroad, within such time as said Board may fix, to alter such crossing according to such plans to be approved by said Board by substituting therefor a crossing not at the grade of such public highway, either by carrying such public highway under or over such rail-

road, or by reconstructing such railroad under or over such public highway, or by vacating, relocating or changing the lines, width, direction or location of such highway and the opening of a new highway in the place of the one ordered vacated."

Section 5 of the act provides for the initiation of a proceeding under its provisions, either:

(a) By the board or body having charge of the finances of any municipality wherein any such crossing exists;

(b) By any railroad company whose tracks cross or are crossed at grade; and

(c) By the Board of Public Utility Commissioners of its own motion.

The provisions of the act are applicable, as are the provisions of the General Railroad Act to railroad corporations, irrespective of whether they were created, or their rights acquired before, or after, the enactment of the statute. This proposition is supported by *Hudson County v. Central R. R. of N. J.*, 68 N. J. E. 500, where the Court said (508):

"The twenty-sixth section of the revised railroad law (Statutes of New Jersey, 1903, p. 659) prescribes the duty of railroad companies with respect to highways crossed by said companies."

"Similar provisions will be found in the charters of almost all, if not all, of the railroads chartered by special act. *Palmyra v. Pennsylvania Railroad Co.*, 62 N. J. Eq. (17 Dick.), 601 (Vice-Chancellor Grey, 1901).

"And there seems to be no doubt that the legislature has the power to provide, as enacted in this section, in the public interest, and the railroads previously chartered would be subjected to such provisions. *Palmyra v. Pennsylvania Railroad Co.*, *supra*; *Montclair v. New York and Greenwood Lake Railway Co.*, 56 N. J. Eq. (18 Stew.), 436 (Chancellor McGill, 1889)."

The provisions of the act are applicable alike, as are the provisions of the General Railroad Act, to highways existing when the railroad was laid out and to highways constructed thereover thereafter. This position is sustained by the cases cited and quoted under Point IV above.

Sections 2, 3 and 4 provide for the distribution of expense, section 2 providing that the entire expense of the alterations, changes, relocation or opening, including damages to adjacent property, shall be paid by the railroad company unless a street railway uses the crossing, in which event the Board may order, not exceeding ten per centum of such expense directly chargeable to the crossing used by the street railway company, to be paid by the company operating the street railway; the balance to be paid by the company operating the railroad.

Section 3 provides that the expense of removing, relaying or relocating any municipal water or sewer pipes or other municipal pipes, conduits or subways, shall be borne by the municipality owning the same; and also the expense of paving, curbing and flagging the highway constructed as the result of the change of grade.

Section 4 provides that, where the order of the Board shall require changes in, or the removal of, the property or construction of any telegraph, telephone, gas, electric lighting, sewer, water, oil, pipe lines, or other company or corporation, co-partnership or individual, they shall at their own expense move or change the grade or location of their property or constructions in conformity with the order.

Section 6 provides that all the powers, supervision, regulation of, jurisdiction and control over public utilities granted by the act to which this act is a supplement,

are vested in the Board of Public Utility Commissioners and courts of the State, as may be necessary to carry the provisions of the act into effect.

The duty imposed by the common law, by the original acts of incorporation and by the General Railroad Act, is a general duty.

The Grade Crossing Elimination Act provides a method of administrative procedure, by means of which this general duty may be converted into a specific and definite duty, with respect to particular crossings at which the conditions set out by the statute; viz., that the crossings are "dangerous to public safety" or "that the public travel on such highway is impeded thereby," are found to exist.

POINT VIII.

The provisions of the Grade Crossing Elimination Act involve merely an exercise by the Legislature of the State of the police power of the State.

(a) *The source of the State's authority to adopt regulations for public safety at grade crossings is the police power of the State.*

This proposition is too elementary to require elaborate citation of authority.

The rule is concretely stated in *The Pittsburg & Corvellsville Railroad Co. v. The Southwest Pennsylvania Railway Co.*, 77 Pa. St. 173; where, at page 186, the Court said:

" * * * Besides, we cannot presume the legislature ever intended to divest itself of the exercise of the police power of the state. The right to regulate railroad crossings naturally flows from

that reserved power. It is by the exercise of the same power that the speed of trains is limited in populous districts."

In *M. & E. R. R. Co. v. Orange*, 63 N. J. L. 252, the Court, at page 258, said:

" * * * the duty of erecting and maintaining gates at the crossing of streets over a railroad, whether for the protection of the public using the street or of the railroad company in operating its road, is referred to the police powers of the government."

(b) *The elimination of grade crossings is within the scope of this power.*

The cases demonstrating this proposition and illustrating the manner in which the power has been exercised through legislation in the several states are many. Of these we direct the attention of the Court especially to the following:

In *N. Y. & N. E. Railroad Co. v. Bristol*, 151 U. S. 556, the case arose under "An Act relating to Grade Crossings," Pub. Laws, Conn., 1889, p. 134. Chief Justice Fuller, reading the opinion of this Court, at page 566, said:

"It must be admitted that the act of June 19, 1889, is directed to the extinction of grade crossings as a menace to public safety, and that it is therefore within the exercise of the police power."

In *re Selectmen of Norwood, et al.*, 161 Mass. 259; 37 N. E. 199, the Supreme Court of Massachusetts had under consideration the statute of that State enacted in 1890, which provided for the abolition of grade crossings, and required the cost of changes made to be paid by the town, the railroad company, and the state, in proportions

fixed, without reference to the value of the property owned by them, or the benefits which they severally received.

The Court distinguishing between the taxing power and the police power said:

"It is contended that the statute under which these proceedings are had, as construed by the superior court, is unconstitutional. It is quite clear that a statute providing for general public improvements to be paid for as the changes of grade are to be paid for under this statute, would be unconstitutional, as an attempt to impose taxes which would not be proportional. The cost of these changes is to be paid by the town, the railroad company and the state, in proportions which are fixed, without reference to the value of the property owned by them, respectively and without reference to the benefits which they severally receive in any particular case. This would not be a legitimate exercise of the power of taxation to meet public charges (cases cited). The validity of this statute does not depend upon the right of the legislature to levy taxes. It was enacted rather in the exercise of the power of the legislature to enact all needful laws to prevent accidents, and provide as well for the convenience as the safety of the public while traveling on highways across railroads, and while being transported in the cars of the railroad companies. It would have been in the power of the legislature, in granting charters to railroad companies, to provide that the railroad should not be constructed across a public highway without carrying the highway over or under the railroad, and that all the expenses of changing the grade of the way and constructing the approaches to the railroad, should be borne by the railroad corporation. If, by an increase in the amount of travel at a grade crossing, or of the number of trains running over the railroad, or changes in the manner of running trains, or of

the mode of travel on a highway, or if for any reason, it should seem to the legislature best for the public interest that a grade crossing should be abolished, it would be within the constitutional authority of the legislature to forbid the continuance of it, and to require the railroad company to pay the whole, or any part, of the cost of making the change (cases cited). This it might do, in the exercise of the police power, for the protection of the people, and its decision in regard to what is right and proper in each particular case, or in any class of cases, would not be subject to revision by any other tribunal. This would not be taking from the railroad company its property, or any vested right. It would be merely prescribing, in the interest of the public, the mode of constructing its road. Of the power to prescribe such regulations for railroad corporations, there can be no doubt. These corporations are creatures of the state, engaged in doing a public business, and are bound by any reasonable statutes for the regulation of this business which the legislature chooses to enact (cases cited)."

In *Illinois Central R. Co. v. Copiah County*, 81 Miss. 685; 33 So. 502, the statute considered by the Court provided that where a railroad is constructed so as to cross a highway, and it is necessary to raise or lower the highway, it shall be the duty of the company to erect and keep in order all bridges at such points as bridges may be necessary to cross the railroad.

The Court said:

"All statutes like this, and statutes requiring roads to fence their tracks, and to establish farm cattle guards, etc., are plainly ascribable to the police power of the state for their justification."

In *St. Louis & S. F. R. Co. v. City of Fayetteville*, 75 Ark. 534; 87 S. W. 1174, it was held that in a proceeding

to condemn a street crossing over a railroad right of way, the necessity of an overhead crossing, or the fact that the railroad company may be compelled to construct either such overhead or grade crossing and to keep it in repair, as an exercise of police power, are not elements of damage.

The Court said:

"But if we concede that an overhead crossing is necessary at this place, it would not, in our opinion, entitle a company to any increase in the amount of damages. For what the city is seeking now is to acquire for the public a right to cross the railway track, and the right of way of the company at the point named. If we concede that the legislature has not empowered the city to compel the company to construct the crossing and keep it in repair, as a police regulation, yet, as the legislature can do this at any time—as it can compel the company, without compensation, to construct and keep in repair either an overhead or a grade crossing, as the circumstances may require—it follows that those matters are not elements of damage in this case. *Railroad Co. v. City of Chicago*, 166 U. S. 226; 17 Sup. Ct. 581; 41 L. Ed. 979."

In *Cincinnati, I. & W. R. Co. v. Connerville*, 218 U. S. 336, in error to the Court of last resort of the State to review a judgment affirming the assessing of the damages of a railway company in a street opening proceeding, where the expense of constructing a bridge over the highway was not taken into consideration, this Court held that the expense of constructing a railway bridge over a highway, made necessary by the action of the municipality in opening such highway through the railway company's embankment, may be cast upon the railway company without denying the due process of law guaranteed by the Federal Constitution, which requires that com-

pensation be made when private property is taken for public use.

Mr. Justice Harlan, reading the opinion of this Court, said:

"The question as to the right of the railway company to be reimbursed for any moneys necessarily expended in constructing the bridge in question is, we think, concluded by former decisions of this court . . . (cases cited). The railway company accepted its franchise from the state, subject necessarily to the condition that it would conform at its own expense to any regulations, not arbitrary in their character, as to the opening or use of streets, which had for their object the safety of the public, or the promotion of the public convenience, and which might, from time to time, be established by the municipality when proceeding under legislative authority, within whose limits the company's business was conducted. This court has said that 'the power, whether called police, governmental, or legislative, exists in each state, by appropriate enactments not forbidden by its own constitution or by the constitution of the United States, to regulate the relative rights and duties of all persons and corporations within its jurisdiction, and, therefore, to provide for the public convenience and the public good.' *Lake Shore & M. S. R. Co. v. Ohio*, 173 U. S. 385, 397. Without further discussion . . . we adjudge, upon the authority of former cases, that there was no error in holding that the city could not be compelled to reimburse the railway company for the cost of the bridge in question."

In *Mo. Pac. Ry. v. Omaha*, 235 U. S. 121, Mr. Justice Day, reading the opinion of this Court, on page 127, said:

"That a railway company may be required by the state, or by a duly authorized municipality acting under its authority, to construct overhead crossings or viaducts at its own expense, and that the

consequent cost to the company as a matter of law is *damnum absque injuria*, or deemed to be compensated by the public benefit which the company is supposed to share is well settled by prior adjudications of this court (cases cited).

"This is done in the exercise of the police power, and the means to be employed to promote the public safety are primarily in the judgment of the legislative branch of the government, to whose authority such matters are committed, and so long as the means have a substantial relation to the purpose to be accomplished, and there is no arbitrary interference with private rights, the courts cannot interfere with the exercise of the power by enjoining regulations made in the interest of public safety which the legislature has duly enacted."

POINT IX.

The order of the Board of Public Utility Commissioners, which was affirmed by the judgments here under review, is merely an act of administration in execution of the Grade Crossing Elimination Act which statute, as heretofore indicated, merely exerts the police power of the State.

The Grade Crossing Elimination Act does not empower the Board of Public Utility Commissioners to require a separation of grades whenever a public highway and a railroad cross each other at the same level, but commands the Board to effect such separation when it shall appear to it that "such crossing is dangerous to public safety or that the public travel on such highway is impeded thereby."

Prior to the enactment of this statute there were adjudications of the courts of the State clearly indicating

the effect that would be given to the words so employed in the statute. These cases are as follows:

In *Mayor, etc., of Newar v. Central R. R. Co.*, 73 N. J. E. 469, the Court, at page 470, said:

"Under the recent decision of the Chancellor in the case of *Newark v. Erie Railroad Co.*, 72 N. J. Eq. (2 Buch.), 447, there can be no doubt that the court of chancery may compel railroad companies, whose roads cross streets at grade, and whose charters contain provisions like those of the defendant, to elevate or depress their tracks or the highways crossing them.

"Under that decision, the question remaining for determination is whether, in the given case, the situation is such that this court should, in the exercise of its power to regulate conflicting easements, compel the change.

"Railroads whose tracks have been laid at grade are lawful structures. The legislature has not as yet seen fit to condemn them. If their tracks are to be elevated or depressed, it must be because of some peculiarity which makes them especially dangerous."

In *Newar v. Erie Railroad Co.*, 75 N. J. E. 20, the Vice-Chancellor, after reviewing the development of the legislation of the State relating to grade crossings, said, at page 29:

"In view of this legislation it is quite impossible to hold that grade crossings are *per se* illegal structures, even in cities, or that streets are not safe in the legislative sense of that word, merely because they are crossed at grade by railroad tracks. There must be something in the situation so peculiar as to compel the court to say that gates will not adequately protect the public; that flagmen will not; that nothing but track elevation will." * * *

"The question then must be, as I have said, whether gates and flagmen and other expedients are,

in the given case, so inefficacious that nothing but track elevation will give to the public in fact as well as in name, the joint use of the highway. It is obvious that a street may be so encumbered with tracks that the public is practically shut out from using it. As neither party is at liberty to destroy the right of the other, the appropriate remedy in such a case would appear to be an injunction restraining the excessive use. *Newark v. Central Railroad Co.*, 73 N. J. Eq. (3 Buch.), 469; *Newark v. Delaware, Lackawanna & Western Railroad Co.*, 42 N. J. Eq. (14 Stew.), 196. If on the other hand, the number of tracks be not excessive, it is still conceivable that the trains might run over them with such frequency and speed and at such an angle or with such curves that the joint user of the crossing would be practically gone. The question is, then, one of fact, to be determined according to the circumstances of the case.

"In considering the question, it must, however, be remembered that it is no light thing to order a change in the grade of a steam railway. In the language of Chief Justice Church, in *People v. New York Central & Hudson River Railroad Co.*, 74 N. Y. 302, 'the grade necessarily embraces considerations of convenience, expense and facility of construction and operation and is fixed at a particular point with reference to grades at other points.' The legislature has, therefore, necessarily vested the company with a considerable discretion in determining what and where it shall be."

The court of last resort on appeal affirmed the rule so stated by the Vice-Chancellor and his application thereof to the facts of the case, *Newark v. Erie R. R. Co.*, 76 N. J. E. 317.

The words of the Grade Crossing Elimination Act must be construed in the light of these decisions.

Following these decisions the Board of Public Utility Commissioners was required to and did treat the question as to whether a crossing was, within the meaning of the Grade Crossing Elimination Act, dangerous to public safety, or the public travel on such highway was impeded thereby, as one of fact, to be determined according to the circumstances of each case; and acted upon the theory that the power conferred upon it by such act was to be exercised only where it appeared to it, with respect to such crossings, that elements existed making them *peculiarly* dangerous and a *serious* impediment to public travel.

The testimony before the Board amply establishes that with respect to each of the crossings in question elements exist which make them peculiarly dangerous and a serious impediment to public travel. This testimony is referred to in the report made by the Board of Public Utility Commissioners under date of January 11, 1915 (Case, Volume IV, page 1753, etc.), and is made the basis of the determination of the Board contained in its order of April 20, 1915 (Case, Volume IV, page 1787), to the effect that the said crossings "are, and each of them is, dangerous to public safety, and that the public travel on such highways and each of them is impeded thereby."

The protection afforded at each of the crossings is shown in "Schedule A" attached to the Board's report of January 11, 1915. (Volume IV of case, 1766.)

The traffic over each of the crossings and a characterization of the view thereat is set forth in "Schedule B" attached to the report (Case, Volume IV, page 1768).

That, notwithstanding the protection afforded at the several crossings, casualties have occurred, is shown by the admittedly incomplete list of accidents which appears

in the record (Case, Volume I, page 173, etc.), (Case, Volume II, page 905, etc.).

Referring to this question, the Supreme Court of the State of New Jersey in its opinion (Case, Volume V, page 2257), at page 2272, said:

“The next ground of attack is that the evidence taken before the Board of Public Utility Commissioners does not justify nor reasonably support the Board’s conclusions or findings. To that end the insistence is that the court has power and should review the Board’s finding of fact. We understand such to be the power of this court. The rule on this point is stated thus by Chief Justice Gummere, speaking for the Court of Errors & Appeals in the case of *West Jersey & Seashore Railroad Co. v. Board of Public Utility Commissioners*, 88 N. J. L., 94 Atl. 60, ‘that court (i. e., the Supreme Court) can, upon certiorari, or under the statutory procedure provided by section 38 of the Act of 1911, page 374, review such action for the purpose of ascertaining whether or not it is purely arbitrary, whether or not it has a reasonable basis to rest upon, whether or not it is supported to any extent by the facts submitted to the Board for its consideration; and, if it shall be made to appear to the court that such action is purely arbitrary, or that it has no reasonable basis upon which to rest or is unsupported by the facts laid before the Board, the court may declare it null and void and order it to be set aside. So, too, if the Board refuses to consider the matter at all, the court by mandamus can compel it to do so. * * * Our reading of the record shows that a mass of testimony was presented to the Board, particularly with reference to the various elements of danger and the impediments to travel, at all of the level crossings of the highways, such as a list of accidents at some of the crossings; obstructions to the view of persons traveling along the highways in

both directions; a series of photographs, made and produced by the railroad company, showing the obstructions of the view at each crossing; delays to travel in general; the fact that at the crossings where there are trolley tracks every street car is stopped near the railroad crossing until the conductor goes over it on foot and releases a derail switch; schedules made at different times as to the number of persons, vehicles drawn by horses, automobiles, bicycles and trolley cars passing over such crossings, in a given period; testimony that the crossings were protected by gates and automatic bells; the number of trains and drill locomotives passing over the crossings within a given time; operation of gates, etc.; from which the Board found the facts in its report that each of the crossings was dangerous to public safety, and we think, after reading the evidence, the conclusion of the Board is supported by the facts that were before it. The question is one of fact to be determined according to the circumstances of each case. * * * This applies to both conditions called for in the statute; viz.: that such crossings are dangerous to public safety, or the public travel on such highway is impeded."

POINT X.

The Grade Crossing Elimination Act and the order of the Board of Public Utility Commissioners made in pursuance thereof impose upon the railroad company part of the cost of the separation of grades. Neither the act nor the order is obnoxious in this particular to the due process clause of the Constitution.

It is well settled that the inhibition of the Constitution of the United States upon the deprivation of the property without due process is not violated by the imposition upon

a railroad company of the *entire* expense of separation of grades, since the requirement of such separation finds its source in the police power.

The requirement of uncompensated obedience to a regulation enacted for the public safety under the police power of the State is not a taking of property without due compensation, and any injury sustained in observing such a regulation is but *damnum absque injuria*. The following authorities fully support this proposition.

In *N. Y. & N. E. Railroad Co. v. Bristol*, 151 U. S. 556, this Court was called upon to consider the act of Connecticut entitled "An Act relating to Grade Crossings" (Pub. Laws, Conn., 1889, p. 134), Mr. Justice Fuller, reading the opinion of this Court, after indicating that the act was directed to the extinction of grade crossings as a menace to public safety, and that it was therefore within the police power, said (page 567):

"It is likewise thoroughly established in this court that the inhibitions of the constitution of the United States upon the impairment of the obligation of contracts, or the deprivation of property without due process or of the equal protection of the laws, by the states, are not violated by the legitimate exercise of legislative power in securing the public safety, health and morals. The governmental power of self-protection cannot be bargained away, nor can the exercise of rights granted, nor the use of property, be withdrawn from the implied liability to governmental regulations in particulars essential to the preservation of the community from injury" * * *

"The conclusions of this court have been repeatedly announced to the effect that though railroad corporations are private corporations as distinguished from those created for municipal and governmental purposes, their uses are public, and

they are vested with the right of eminent domain, only to be exercised for public purposes; that therefore, they are subject to legislative control in all respects necessary to protect the public against danger, injustice and oppression; that the state has power to exercise this control through boards of commissioners; that there is no unjust discrimination and no denial of the equal protection of the laws in regulations applicable to all railroad corporations alike; nor is there necessarily such denial nor an infringement of the obligation of contracts in the imposition upon them in particular instances of the entire expense of the performance of acts required in the public interest, in the exercise of legislative discretion; nor are they thereby deprived of property without due process of law, by statutes under which the result is ascertained in a mode suited to the nature of the case, and not merely arbitrary and capricious; and that the adjudication of the highest court of a state, that, in such particulars, a law enacted in the exercise of the police power of the state, is valid, will not be reversed by this court on the ground of an infraction of the Constitution of the United States."

In *C. B. & Q. Railway Co. v. Drainage Commissioners*, 200 U. S. 561, it appeared that:

A public corporation, charged by law with the duty of causing a large body of lands, principally swamp and slough lands, to be drained, and made capable of cultivation, had, under direct legislative authority, adopted a reasonable and suitable plan to accomplish that object. The plan required the enlarging and deepening of the channel of a natural water course running through the district, which is the only natural outlet or way of drainage of lands of the district—the best and only practicable mode by which the lands could be made tillable. The plan could not be carried out unless the timbers and stones in

the creek—placed there by the railroad company when it constructed the foundation for its bridge—were removed. The timber and stones could not, however, be removed without destroying the foundations of the bridge and rendering it necessary to construct another bridge with an opening underneath wide enough to permit a channel sufficient to carry off the water of the creek as increased in volume under the drainage system adopted by the Commissioners.

The contention of the railway company was that, as its existing bridge was lawfully constructed, under its general corporate power to build, construct, operate and maintain a railroad, and as the depth and width of the channel under it were sufficient, at the time, to carry off the water of the creek as it then flowed and now flows, the foundation of the bridge could not be removed and its use of the bridge disturbed, unless compensation be first made or secured to it in such amount as would be sufficient to meet the expense of removing the timber and stones from the creek and of constructing a new bridge of such length and with such opening under it as the plan of the Commissioners required. The company insisted that to require it to meet these expenses out of its own funds would be, within the meaning of the constitution, a taking of its property for public use without compensation, and, therefore, without due process of law, as well as a denial to it of the equal protection of the laws.

Mr. Justice Harlan, delivering the opinion of the Court, at page 594, said:

“It remains to deal with a particular aspect of the case. The opening under the present bridge, we assume from the record, was sufficient, when the bridge was constructed, to pass all the water

naturally flowing in the creek from lands in that locality. It is sufficient if the channel of the river be left as it is now. The commissioners demand, however, as they may rightfully do, in the public interest, a larger, deeper and wider channel in order to accommodate the increased volume of water in the creek that will come from the proposed plan of the commissioners. But that is a matter which concerns the public, not the railway company. The duty of the company will end when it removes the obstructions which it has placed in the way of enlarging, deepening and widening of the channel. It follows, upon principles of justice, that while the expense attendant upon the removal of the present bridge and culvert, and the timbers and stones placed by the company in the creek, as well as the expense of the erection of any new bridge which the company may elect to construct in order to conform to the plan of the commissioners, should be borne by the railway company, the expense attendant merely upon the removal of soil in order to enlarge, deepen and widen the channel must be borne by the district. The expense to be borne by the district and the railway company respectively can be ascertained by the state court in some appropriate way, and such orders made as will be necessary to facilitate the execution of the plan of the commissioners.

“Without further discussion, we hold it to be the duty of the railway company, at its own expense, to remove from the creek the present bridge, culvert, timbers and stones placed there by it, and also (unless it abandons or surrenders its right to cross the creek at or in the vicinity of the present crossing) to erect at its own expense and maintain a new bridge for crossing that will conform to the regulations established by the drainage commissioners, under the authority of the state, and such a requirement, if enforced, will not amount to a taking of private property for public

use within the meaning of the constitution nor to a denial of the equal protection of the laws."

In *Chicago, M. & St. P. R. Co. v. Minneapolis*, 232 U. S. 430, this Court held that the expense of constructing and maintaining the necessary bridge over the gap in a railway right of way made by the municipal construction across it of a canal or waterway with footpaths on each side connecting two lakes used for public recreation may be cast upon the railway company without denying it the due process of law guaranteed by the Constitution.

Mr. Justice Hughes, in delivering the opinion of the Court, said:

"The question . . . presented is whether the refusal to allow compensation for the cost of constructing and maintaining the necessary railroad bridge across the gap in the right of way, made by the building of the canal, amounts to a deprivation of property without due process of law.

"It is well settled that railroad corporations may be required, at their own expense, not only to abolish existing grade crossings, but also to build and maintain suitable bridges or viaducts to carry highways newly laid out over their tracks, or to carry their tracks over such highways. (Cases cited and considered.) . . .

"Under the doctrine of these decisions, it necessarily follows that if the city of Minneapolis had opened a public road through the embankment of the plaintiff-in-error, the latter would have had no grounds to complain that its constitutional rights had been violated because it was compelled to bridge the gap at its own cost. No different rule could be applied, because the highway was laid out in order to increase the advantages of a public park. In this respect, it would be equally a crossing devoted to the public use (*Shoemaker v. United States*, 147 U. S. 282, 297; 37 L. ed., 170, 184; 13 Sup. Ct. Rep. 361); and we see no basis

for a distinction in principle in the case of an intersecting public road opened under competent authority, because such a highway might lead to public recreation grounds instead of places of business, or might connect lakes instead of avenues.

"If there is a distinction in the present case, it must lie in the fact that the crossing is an artificial waterway instead of a road. But it is none the less a public highway established to afford an appropriate place of public passage. Walks are provided for those who go afoot, and it does not concern the plaintiff-in-error that others go in boats instead of vehicles. * * * It cannot make a difference in the constitutional rights of the railway company that this way was not constructed entirely, or chiefly, of solid earth; it is the fact, and not the mode of public passage, that is controlling. The case must be regarded as being one of the public crossings provided by law; and the authorities we have cited lead to the conclusion that the state, without infringing the guarantees of the Federal Constitution, could require the railway company to make suitable provision for carrying its tracks over the crossing without compensation."

In *Denver & Rio Grande R. Co. v. Denver*, 250 U. S., page 241, this Court held that an ordinance of Denver which required removal of so much of a railroad side track as lay within the intersection of two streets just opposite the entrance of the Union Depot, practically within the gateway of the city, was not obnoxious to the due process clause.

Referring to the scope of the police power Mr. Justice Van Devanter, delivering the opinion of the Court, said:

"The scope of the power and instances of its application are shown in the decisions sustaining regulations (a) requiring railroad companies at their own expense to abrogate grade crossings

by elevating or depressing their tracks and putting in bridges or viaducts at public crossings (*Northern P. R. Co. v. Duluth*, 208 U. S. 583; 52 L. Ed. 630; 28 Sup. Ct. Rep. 341; *Chicago, M. & St. P. R. Co. v. Minneapolis*, 232 U. S. 430; 58 L. Ed. 671; 34 Sup. Ct. Rep.; *Minneapolis P. R. Co. v. Omaha*, 235 U. S. 121; 59 L. Ed. 137; 35 Sup. Ct. Rep. 82), (b) requiring a railroad company at its own cost to change the location of a track and also to elevate it as a means of making travel on a highway safe (*New York & N. E. R. Co. v. Bristol*, 151 U. S. 556; 38 L. Ed. 309; 14 Sup. Ct. Rep. 457), (c) prohibiting a railroad company from laying more than a single track in a narrow, busy street, although its franchise authorized it to lay double tracks there (*Baltimore Trust & G. Co.*, 166 U. S. 673; 41 L. Ed. 1160; 17 Sup. Ct. Rep. 696) and (d) requiring a gas company whose mains and pipe were laid beneath the surface of the street under existing franchises to shift them to another location at its own cost to make room for a public drainage system. (*New Orleans Gas Light Co. v. Drainage Commission*, 197 U. S. 453; 49 L. Ed. 831; 25 Sup. Ct. Rep. 471.)"

If the imposition of the entire cost of effecting a separation of grades upon a railroad company does not involve a violation of the due process clause, then it must follow that the imposition as here of less than the entire cost by a statute and an order made in pursuance thereof is not obnoxious to the due process clause.

POINT XI.

Both the statute and order relate to highways existing at the time of the construction of the railroad and to highways laid out thereafter. In this respect neither the order nor the statute is obnoxious to the due process clause of the Constitution.

That the State may, in the exercise of police power, impose upon a railroad company whose line intersects a public highway laid out after the construction of the railroad, the uncompensated duty of constructing and maintaining at such crossing all such safety devices as are reasonably necessary for the protection of the traveling public, and that a bridge or viaduct over the railroad tracks when necessary to make the crossing safe for public use, is a safety device within the meaning of that expression is now well settled.

In *State ex rel. Minneapolis v. St. Paul, M. & M. R. Co.*, 98 Minn. 380; 108 N. W. 261, the Court said:

"The authorities are not fully agreed upon the question whether the state may in the exercise of police power compel a railroad company, without compensation, to construct and maintain suitable crossings at streets extended over the right of way subsequent to the construction of the railroad. Our examination of the books, however, leads to the conclusion that the great weight of authority sustains the affirmative of that proposition."

In *Northern Pacific Railway Co. v. State of Minnesota ex rel. The City of Duluth*, 208 U. S. 583, this Court said:

"As the Supreme Court of Minnesota points out in the opinion of 98 Minnesota, 380 . . . the state courts are not altogether agreed as to the right to compel railroads, without compensation, to construct and maintain suitable crossings at streets extended over its right of way, after the construc-

tion of the railroad. The great weight of state authority is in favor of such right. (See cases cited in 98 Minnesota, 380.)

"There can be no question as to the attitude of this court upon this question, as it has been uniformly held that the right to exercise the police power is a continuing one; that it cannot be contracted away, and that a requirement that a company or individual comply with reasonable police regulations without compensation is the legitimate exercise of the power and not in violation of the constitutional inhibition against the impairment of the obligation of contracts."

In *Chicago, Milwaukee & St. Paul Railway Company v. City of Minneapolis*, 232 U. S. 428, Mr. Justice Hughes, writing the opinion of this Court and addressing himself to this question, said:

"It is well settled that railroad corporations may be required, at their own expense, not only to abolish existing grade crossings, but also to build and maintain suitable bridges or viaducts to carry highways, *newly laid out*, over their tracks, or to carry their tracks over such highways. (Cases cited.) The rule, as established in the State of Minnesota, was thus declared in the case of *State ex rel. Minneapolis v. St. Paul, M. & M. R. Co.*, 98 Minn. 380: 'A railroad company receives its charter and franchise subject to the implied right of the state to establish and open such streets and highways over and across its right of way as public convenience and necessity may, from time to time, require. That right on the part of the state attaches by implication of law to the franchise of the railroad company, and imposes upon it an obligation to construct and maintain at its own expense suitable crossings at new streets and highways to the same extent as required by the rules of the common law at streets and highways in existence when the railroad was constructed.' In that case,

it appeared that long after the construction of the railroad, the city of Minneapolis had laid out a street across the railroad right of way, building at its own cost a bridge over the railroad tracks. After the bridge had been maintained for several years by the city it was destroyed by fire, and the city then demanded that the railroad company should build a new one. This demand the state court sustained; and, mandamus having thereupon been awarded (101 Minn. 545, 112 N. W. 1142), the case was brought to this court, one of the grounds being that the action of the state deprived the company of its property without due process of law. The judgment was affirmed (St. Paul, M. & M. R. Co. v. Minnesota, 214 U. S. 497, 53 L. ed. 1060, 29 Sup. Ct. Rep. 698), this conclusion being reached upon the authority of *Northern P. R. Co. v. Duluth*, 208 U. S. 583, 52 L. ed. 630, 28 Sup. Ct. Rep. 341. Although the *Duluth* case was earlier in this court, the decision therein by the supreme court of the state immediately followed that of the same court in the Minneapolis case, and applied the principle which had been there announced. *State ex rel. Duluth v. Northern P. R. Co.*, 98 Minn. 429, 108 N. W. 269. The facts were that after the railroad had been built, a street had been opened across the right of way, and subsequently a viaduct for the crossing had been constructed at the joint expense of the city and the railroad company, the former agreeing to maintain it. Later, the city, repudiating the agreement, insisted that the company should repair the viaduct at its own expense. The state court entered judgment for the city, holding that the obligation to construct and maintain the viaduct rested upon the railroad company, and that hence the contract was invalid. This court affirmed the judgment, saying: 'As the supreme court of Minnesota points out in the opinion in 98 Minn. 380, * * * the state courts are not altogether agreed as to the right to compel railroads,

without compensation, to construct and maintain suitable crossings at streets extended over its right of way, after the construction of the railroad. The great weight of state authority is in favor of such right. See cases cited in 98 Minn. 380. *There can be no question as to the attitude of this court upon this question * * *.*"

POINT XII.

The statute provides for the imposition of not exceeding 10 per cent. of the cost directly chargeable to the elimination of the crossings used by the street railway company, upon that company. The order made in pursuance of the statute imposes 10 per cent. of such costs upon the street railway company. Neither the statute nor the order in this respect is obnoxious to the due process clause of the Constitution.

Both the railroad and the street railway make special use of the highways occupied and crossed by them. The right to make such special use must find its source in a legislative grant. Both are operated over fixed tracks.

The danger, the elimination of which it is the purpose of the statute to effect, is not in the case in which a railroad crosses the public highway and a street railroad crosses the railroad on such public highway, attributable to the railroad alone nor to the street railroad alone, but to both of them.

Where, as here, the electric cars run at frequent intervals across the railroad over which trains are run at frequent intervals, a place of unusual danger is created to both the passengers in the railroad cars and to the passengers in the street railroad cars.

In such circumstance the State may, in the exercise of the police power, require the elimination of the danger and may require one of the companies interested to perform the work of elimination at its own expense, or may distribute the cost among the companies which have contributed to the condition.

In making such distribution the State is not required to ascertain the exact quantum of damage caused by each road, and by that standard to assign the cost of protecting the public.

In *Mo. Pac. Ry. v. Omaha*, 235 U. S. 121, this Court had the question here considered before it and through Mr. Justice Day said (129):

"It may be that it would be more fair and equitable to require the street railway company to share in the expense of the viaduct, and if the municipality had been authorized so to do by competent authority, it would have been a constitutional exercise of the police power to have made such division of expenses. *Detroit, &c., Railway v. Osborn*, 189 U. S. 383, 389. But there is nothing in the statute requiring the municipality to divide the expense of such improvement among those responsible for the dangerous condition of street crossing. Where a number of railroads have contributed to the condition which necessitates such improvement in the interest of public safety, it is not unconstitutional exercise of authority, as this court has held, to require one of the companies interested to perform such work at its own expense."

An analogous rule was stated and applied by this Court in *Northern Pacific Railroad Co., et al., v. Puget Sound and W. H. Railway Co.*, 250 U. S. 332, where this Court held, as to a railroad constructed before, and crossed by another railroad after passage of a statute changing the prior law, that the crossing road should bear all the

expense of necessary interlocking safety devices, the statute did not take property in violation of the due process clause.

Mr. Justice Clark, delivering the opinion of this Court, said:

“It is admitted in the argument that the act assailed would be validly applicable to apportioning the costs of crossings of highways and railroads regardless of the dates of their construction (cases cited), and that it would be valid as applied to crossings of railroad lines constructed prior to its enactment where no contract had been entered into with respect to the protection of the crossing (cases cited). But it is contended that it is not a valid law as applied to the case at bar where the road of the Pacific company was constructed at a time when the state law imposed the entire cost of the construction and the maintenance of the crossing upon the junior company. Obviously this is a slender thread on which to hang a grave constitutional argument and it is difficult to treat it seriously. At most the earlier statute, and the interpretation which the State Supreme Court placed upon it, was a rule or law applicable to the assessment of damages in a proceeding to appropriate a crossing to which a junior company was entitled by the statute. It was no part of the charter of the Pacific company, which was organized under the Wisconsin law, and that company had no vested right to insist that the rule should not be changed by statute or by court decision. While this is sufficient to dispose of the case, it may be added that the act of 1913 was passed in an obviously legitimate customary exercise of the police power of the state to protect travelers and employees from injury and death from such crossings and also to protect property from damage. It has long been the settled law that the imposing of charges, involved in obeying a law passed in reasonable ex-

ercise of a police power is not the taking of property without due process of law within the meaning of the Fourteenth Amendment of the United States." (Cases cited.)

We cannot state the arguments in support of the proposition here involved better than it was put in the opinion of the Supreme Court of the State of New Jersey by Mr. Justice Garrison in the opinion rendered in *Public Service Railway Company v. Public Utility Commissioners and City of Paterson*, 89 N. J. L. 24, 98 Atl. 28; affirmed 90 N. J. L. 713, 103 Atl. 1054, where he said:

"We agree that this imposition of a part of the expense of abolishing dangerous grade crossings is neither a tax nor an assessment for a public improvement, but we think, that it is a legitimate exercise of the police power. The contention of counsel for the prosecutor is placed squarely upon the proposition that the police power is not legitimately exercised in the present case 'unless the property (of the prosecutor) has become a public nuisance and so lost its right to protection;' and he then proceeded to demonstrate that a street railway is not a public nuisance. We, of course, agree to this, but we entirely dissent from the narrow definition of the police power which would restrain its exercise to the case of property that had become in a legal sense a nuisance.

"If such a narrow definition has any place in the doctrine of the police power, it is confined to the appropriatory aspect of that power, *i. e.*, to such appropriation as is incidental to the destruction of property as a nuisance and has no place in the vastly wider scope of such power that is regulative of energies that are curbed, not that they may be impaired or destroyed, but, on the contrary, that they may be of greater service and beneficence to the public.

"Instances of such regulative exercises of the police power are met at every turn and constitute

in fact the chief characteristics of modern social life. There are, to use a rough analogy, two aspects of the exercise of the police power, one so to speak *in rem* and the other *in personam*; and it is to the former alone that the proposition of counsel has any possible pertinence, and even in that connection it is of doubtful value as a definition, and of no apparent service as a criterion.

"The distinction between these two aspects of the police power is perfectly patent. The destruction of a pest house would be an illustration of appropriation of property because it was *per se* a nuisance, *i. e.*, a menace to the public health, while the compulsory vaccination of school children would be in order to prevent them from becoming such. The securing of public safety from anticipated dangers rather than the abatement of concentrated nuisances is the essence of the police power in its broader scope. That there are such dangers to be anticipated from the operation at a grade crossing of a steam railroad and a trolley line is not more obvious than that each of these public agencies contributes its element to such danger. The steam road may indeed furnish in greater degree the active element of danger to human life, but the surface road in its operation brings to such place of danger its human freight in extraordinary numbers and under special conditions, which, or so the legislature might determine, greatly increase and accentuate the normal danger and hence justify its elimination by the joint act or at the joint expense of both of the public agencies that contribute to its production. It is matter of common knowledge that during what are termed the rush hours of the day a single surface car of modern construction carries a hundred or more passengers and that the cars thus crowded follow each other in an almost unbroken procession. The stalling of one of these cars upon the grade crossing by the sudden giving out of the electric current or its

propulsion onto the railroad track by the failure of the brake to work properly, or as in the Newark case (*State v. Young*, 56 Atl. Rep., p. 471), by the failure to sand the track, would imperil the lives of scores, who were brought into such position of peculiar peril by reason of being passengers on a street railway. It is not at all a question of the creating of a common nuisance, but solely of the participation in and contribution to a common source of danger arising from the transportation problem in its relation to grade crossings of common carriers of passengers.

"The state grants this use of its highways for the convenience of its citizens, and the incorporators of such companies eagerly seek the privileges thus granted because of the profits to be derived therefrom; hence, if dangers arise from the very success of such enterprises, it is eminently within the exercise of the police power of the state in the elimination of such dangers to place a portion of the expense of so doing upon those who profit by the very success which has contributed to such dangers.

"The fact that by such a collision as we have suggested the lives of the passengers on the steam railroad are also imperiled, so far from demonstrating that the entire expense of eliminating the dangerous condition would be borne by such railroad, merely emphasizes the participation of each carrier in the production of a common source of danger, and hence points to their joint contribution to the expenses of its elimination.

"In support of this obvious conclusion, counsel for the defendants cites a number of pertinent authorities, but the question which seemed to be at bottom one of fact, from which, when the fact is once established the legal result follows as a necessary consequence. The establishment of such fact is, moreover, a part of the legislative function and as such is not subject to review by the judicial department."

The following cases are to like effect.

In *Detroit, Fort Wayne & Belle Isle Railway v. Osborn*, 127 Mich., 219; 86, N. W. 842; 62 L. R. A. 149, it was held, that under Michigan statute (Act 1893, No. 171, No. 5) authorizing the railroad commission to provide proper safeguards at crossings of railroads and street railroads, and to apportion the expense between the companies affected as they may deem just and reasonable, where a steam railroad has extended its road across an existing street car line, and subsequently, owing to the increase of travel on the street, the erection and maintenance of safeguards at the crossing becomes essential for the protection of the public, the railroad commissioner may require the street railway company to pay a portion of the expense of constructing and maintaining such safety devices, the Court said:

"New dangers upon the public streets require new safeguards in the interests of the safety of the public. It is a matter of common knowledge that where electric cars run at frequent intervals, across a railroad over which trains are frequently run, it is a place of unusual danger, not only to the passengers in the steam cars, but also to the passengers in the electric cars. This danger is occasioned not by the steam road alone, nor by the electric road alone, but by both of them. We have no doubt that under such circumstances the state, in the exercise of its police power, can take such steps as will minimize the danger and can impose the expense of doing so upon the corporation causing the danger."

This Court affirmed the decision above (189 U. S. 383). Mr. Justice McKenna (390) delivering the opinion of the Court, said:

"The record in this case shows that there are thirty-eight daily passenger trains crossing Clark

avenue, and that the cars of the plaintiff-in-error pass every few minutes. It is manifest, as the Supreme Court of the State observed, that the crossing 'is a place of unusual danger, not only to the passengers in the steam cars, but also to the passengers in the electric cars,' and that the danger is caused by both. In such a situation the city is surely not powerless to act, nor before acting must it ascertain the exact quantum of damage caused by each road, and by that standard assign the cost of protecting the public. See *Railroad Co. v. Street Ry. Co.*, 89 Me. 328."

In *Board of Aldermen of Fitchburg v. Boston & M. R. R. Co.*, 203 Mass. 304; 89 N. E. 438, it was held, that under St. 1906, pp. 488, cp. 463, pt. 1, Secs. 23, 25, authorizing the alteration of railroad grade crossings and providing for the appointment of a special commission to determine whether the municipality, or steam railroad company, or street railroad company shall pay the cost thereof, when considered in connection with the legislative power which seeks to make parties specially benefited by alterations of crossings share in the expense of the improvements, and in connection with St., 1908, p. 504, cp. 542, defining the purpose of the Statute of 1906, a street railway company having tracks on a way is a party interested in an alteration of a railroad crossing on or over the way, and is liable to pay its proper portion of the expenses of the alteration.

POINT XIII.

The statute requires that changes in, or the removal of, the property or constructions of any telegraph, water, etc., company, shall be made by such company at its own expense. The order made in pursuance of the statute requires such changes. Neither the statute nor the order is, on this account obnoxious to the due process clause of the Constitution.

That the requirement of the statute and order to this effect does not work a deprivation of property in violation of the due process clause, is amply established by the following adjudications.

In *Jersey City v. City of Hudson*, 13 N. J. E. 420 (Ch.), it was held, that the expense incident to the lowering of the water company's pipes to conform to a new grade established by the municipality must be borne by the water company. It was urged that the right to have the water pipes under the street constituted a right of property which could not be taken without compensation.

On this point the Chancellor said (424):

"The owner of the soil has a common law right to the use and enjoyment of the soil under the highway. He may open a mine, construct vaults or chambers, erect machinery, lay water pipes, or exercise any other right of ownership in the soil not inconsistent with the public easement. But all these rights are held and must be enjoyed in subordination to the public right of way, including the right of construction, alteration and repair. It cannot be successfully maintained that a mere easement in land, though enjoyed and exercised by legislative sanction, can be a more sacred right of property in the eye of the constitution than the right of the land holder himself. It must be held

(and such must be the construction of the legislative grant) in subordination to the public easement."

In re Dering, 93 N. Y. 361, plaintiff, an abutting property owner, complained of the act of the municipality in assuming the expense of relaying gas pipes as part of the cost of grading a street and assessing the same upon abutting owners. The Court modified the assessment so as to exclude such expense, taking the ground that the gas company, in laying its pipes, took the risk arising from such changing as public convenience or security might require and said:

"The learned counsel for the city failed to satisfy us that any authority exists for imposing upon the owners of adjacent property expenses incurred by the gas company in removing and replacing its pipes. . . . For aught that appears here, although authorized to lay pipes through the public streets (Law 1848, chap. 37, sec. 18), the company took the risk of their location and should be required to make such changes as public convenience or security requires, at its own cost and charge."

In *Stillwater Water Co. v. Stillwater*, 50 Minn., 498; 52 N. W. 893, it was held, that the right to lay water pipes in the highways is subordinate to the power of the municipality to grade the highway, and that the municipality is not liable for the expense of lowering the pipes to conform to the new grade established. The Court said:

"When under this ordinance the plaintiff acquired the right to lay pipes in the streets, that right was subordinate to the power of the city to establish grades and grade the streets, . . . and although the exercise of the power may at times cause plaintiff inconvenience and expense, that is nothing more than it took the risk of in accepting the grant. . . ."

In *City of Detroit v. Fort Wayne & E. Ry. Co.*, 90 Mich., 646; 61 N. W. 688, the Court said:

"The charter of the city of Detroit commits the regulation, suspension and control of its streets to the common council. It empowers the council to improve the same and to determine the nature and details of such improvement. It gives to the common council the power to control, prescribe and regulate the manner in which the streets shall be used and enjoyed. These powers are held in trust for the public benefit. They cannot be surrendered or delegated to private parties. All franchises granted or contracts made with reference to the use of streets must be made, not only with due regard to their lawful and proper use by others, but subject to the exercise by the municipality of the powers referred to.

"The permission given respondents to use this street is in subordination to the general power of the municipality over its streets. The city is not under obligation to conform its treatment of its streets to the construction of respondent's road-bed, but on the contrary, respondent must conform the construction of its road-bed to such reasonable regulations as are made by the municipality in the reasonable exercise of its powers respecting the use, control, regulation and improvement of its streets. Street railways occupy public streets subject to the use of such streets by the public, subject to such burdens as may be made necessary by reason of the improvement of such streets, and subject to such changes in the construction of road-beds as improved and changed conditions may demand."

In *Columbus Gaslight & Coke Co. v. Columbus*, 50 Ohio St. 65; 33 N. E. 292, it was held, that a gas company could not recover from a municipality the expense of relaying its pipes in order to accommodate them to a

new grade established by the city, though the pipes were originally laid to conform to an established grade. The Court said:

"The grant by the city must be interpreted in the light of the right and duty of the city to re-grade, whenever in its judgment the public interest demands; and whatever easement the gas company can receive, it must accept and enjoy in common with equivalent rights which have been or may be acquired by other public agencies—rights of a like secondary character; and all must give way to the paramount duty of the city to care for the streets, and keep them open, in repair and convenient for the general public. This duty would be seriously interfered with if the city could not change the grade of its streets save upon the condition that it should make compensation to every gas company, and water company, and telephone company, and electric light company, and street railway company, for inconvenience and expense thereby occasioned. All such agencies must be held to take their grants from the city upon the condition, implied where not expressed, that the city reserves the full and unconditional power to make any reasonable change of grade or other improvement in its streets."

In *Natick Gaslight Co. v. Inhabitants of Natick*, 175 Mass. 246; 56 N. E. 292, it was held, that under a statute relating to grade crossings providing that all damages sustained by any person in his property by the taking of land for, or by, the alterations of the grade of a public highway, may be determined when occasioned by the taking of land for the locating and laying out of public ways, a gas company was not entitled to compensation for the expense which it incurred in taking up and relaying its gas mains, occasioned by a change in the grade of the streets in which they had theretofore been laid.

The Court said:

"The permission to lay down pipes in the public ways, whether or not, so long as the way remains public, and the pipe does not interfere with the other public uses, if be revocable, must be held to have been granted originally upon the condition that the pipes, neither at the time of the laying or thereafter, shall interfere with the public travel upon the way as then existing, or as it may thereafter be changed to meet the reasonable exigencies of such travel. To hold, otherwise, and to say that whenever, under the statutory permission, a gas pipe is laid in a public way, the pipe cannot be disturbed, even to make such changes as are required by public travel, except under the right of eminent domain is to make what is merely a subordinate use paramount to the great important use for which the land is taken. Such a construction seems to us unreasonable."

In *New England Tel. & Tel. Co. v. Boston Terminal Co.*, 182 Mass. 397; 65 N. E. 835, it was held, that the permission to use the highway must be held to have been granted on condition that the structures neither at the time of their laying or thereafter shall interfere with any other public use to which the Legislature sees fit to devote the way and that when the condition takes effect the privilege ceases to exist and that it is not taken or damaged.

The petition in this case was for assessment of land damages. The one petitioner was a telephone company, the other an electric lighting company. Each had conduits and wires in certain streets of the City of Boston when these streets were discontinued and taken for a terminal station.

The petitioners contended that they had rights of property in the streets, for which they were entitled to compensation. The petition was denied.

In *Anderson v. Fuller*, 51 Fla. 380; 41 So. 684, the Court said:

"While municipalities may by ordinance grant to individuals and corporations the privilege of occupying the streets and public ways for lawful purposes, such as railroad tracks, poles, wires, gas and water pipes, such rights are at all times held in subordination to the superior rights of the public and all necessary and desirable police ordinances that are reasonable may be enacted and enforced to protect the public health, safety and convenience, notwithstanding the same may interfere with legal franchise rights. A water company, placing its pipes in the streets under a franchise contract with the city, does so in subordination to the superior rights of the public, through its duly constituted municipal authorities, to construct sewers in the same streets whenever and wherever the public interest demands; and if, in consequence of the exercise of this right, the water company is compelled to relay its pipes, in the absence of unreasonable or malicious conduct, it has no cause of action against the corporation for reimbursements on account thereof."

In *Scranton Gas & Water Co.*, 214 Pa. 586; 64 Atl. 84, it was held, that a gas and water company could not hold the city liable for the cost of making the necessary changes in its pipe lines laid in the street under a franchise, upon the raising by the municipality of the street grade to carry it over a railroad crossing.

The Court said:

"It is the reasonable discretion of the municipal authorities that determines the extent of the change

in streets required to meet public necessities; and to that change, whatever it may be, short of an abrogation or annulment of the company's right to maintain its system of pipe in the public streets, the company must conform at its own cost and expense. The former results from the inherent right of the municipality to the exercise of police power, and the latter from subordinated rights of the gas company in the public streets, under its original grant of privilege, to those of the public."

In *City of Indianapolis v. Indianapolis Light & Heat Co.*, Ind. : 95, N. E. 246, it was held, that a light and heating company is not entitled to an award for damages caused to its property by a change of the grades of streets made by a city in making an improvement under the track elevation statute (Acts 1905, c. 82), since such improvement was made in the lawful and proper exercise of the police power.

In *Walker v. North Bergen*, 84 N. J. L. 248, the Court said:

"A further contention of the prosecutor is that the contract as awarded imposes upon the taxpayers an improper burden of expense, in that it saddles the taxpayers with the cost of shifting the water pipes of the Hackensack Water Company and the gas pipes of the Public Service Company. This contention is sound. These companies are private corporations. They exercise functions of a public nature in the distribution of water and gas to the public. This feature of their business, however, does not give them a vested right to have their pipes remain under the public highway undisturbed when the public good or necessity requires that they should be shifted or relocated. For aught that appears in this case these companies are mere licensees. It will therefore be presumed that they laid their pipes under the public highways sub-

ject to the paramount use of the highway by the public. Under such conditions a natural sense of justice demands that the expense of shifting and relocating the pipes should be borne by the companies owning them, and not by the taxpayers."

The rule applied in the foregoing cases by the courts of the several states has the approval of this Court.

In *New Orleans Gas Light Co. v. Drainage Commission of New Orleans*, 197 U. S. 453, it was held that imposing upon a gas company the cost of changes in the location of its pipes and mains necessitated by the construction of a drainage system, did not impair its contract rights under its exclusive franchise to supply gas to the city through pipes and mains laid in the streets, and that such a gas company had no such property rights in the location of its pipes and mains as to make the imposition upon it of such cost a taking of property without compensation.

Mr. Justice Day, delivering the opinion of the Court said:

"We think whatever right the gas company acquired was subject, so far as the location of its pipes was concerned, to such future regulations as might be required in the interest of the public health and welfare. These views are fully sustained by the authorities. *National Water Works Co. v. City of Kansas*, 28 Fed. Rep. 921; * * * *Chicago, Burlington, &c., R. R. Co. v. Chicago*, 166 U. S. 266, 254. In the latter case it was held that uncompensated obedience to a regulation created for the public safety under the police power of the state was not taking property without due compensation. In our view that is all there is to this case. The gas company by its grant from the city acquired no exclusive right to the location of its pipes in the streets, as chosen by it, under a gen-

eral grant of authority to use the streets. The city made no contract that the gas company should not be disturbed in the location chosen. In the exercise of the police power of the state, for a purpose highly necessary in the promotion of the public health, it has become necessary to change the location of the pipes of the gas company so as to accommodate them to the new public work. In complying with this requirement at its own expense, none of the property of the gas company has been taken, and the injury sustained is *damnum absque injuria*."

POINT XIV.

Neither the statute nor the order requires the **Erie Railroad Company to construct or reconstruct switches, side-tracks or structures for the private use of others.** Neither the statute nor the order, therefore, in this respect, violates the due process clause of the **Constitution.**

It is contended by some of the plaintiffs-in-error that the statute authorized, and that the order directed, the Erie Railroad Company to construct or reconstruct switches, sidings and structures for the private use of others, and that such authorization and direction violated the due process clause of the Constitution. This contention was raised before, considered, and completely disposed of by the courts of the state.

The Supreme Court of the state, in its opinion (case, vol. V, pp. 2257, 2280), said:

"Point VIII is that the order of the Board is invalid insofar as it requires the prosecutor to make changes in switches, side tracks, leads, bridges, yards, structures and other facilities and property of the prosecutor and of other companies, co-part-

nerships or individuals. We think in this respect the order *properly interpreted* is justified by the statute *properly construed*.

"The statute authorizes the Board, in a proper case to order the railroad to alter grade crossings according to plans to be approved by the Board, by substituting therefor crossings not at grade, either by carrying the highway under or over the railroad, or by reconstructing the railroad under or over the highway, or by vacating, relocating or changing the lines, width, direction or location of the highway and the opening of a new highway in the place of the one vacated, and this includes the power to order such changes in the property and facilities of the railroad company as are fairly incidental to, or rendered necessary by, the alteration of the crossings.

"Now, the order of the Board directs the railroad company 'to alter such crossings, and each of them, according to the plan therefor annexed to and made part hereof * * * and profile of the same also annexed to and made part hereof * * * which said plan and profile are hereby approved; by substituting therefor crossings not at the grade of the public highways known as Madison Avenue, Straight Street, Clay Street, Market Street and Park Avenue, Ellison Street, Van Houton Street, Broadway, Fair Street, Hamilton Avenue, Lafayette Street, Keen Street, Warren Street, Putman Street and River Street; by changing the lines, width and direction thereof and carrying so much thereof as so changed under the said railroad, except in the case of Madison Avenue which is carried over the railroad, according to and as shown on said plan and profile for said purpose, and by vacating the remaining parts of said highways within the lines of the right of way of said railroad company, and further by vacating that part of Madison Avenue lying west of the railroad and the line of the relocated Madison Avenue;

by substituting for the existing crossing at Cedar Street, a crossing under the railroad at Taylor Street and for the existing crossing at Franklin Street a crossing under the railroad at Montgomery Street, and also by widening and altering the existing highways known as Essex Street, Governor Street and Fulton Street, adjusting the structures, spanning them to the proposed grade or grades (which said new highway shall be located, and of the width, length and direction and carried over or under the said railroad where so indicated); by reconstructing said railroad and highways and by performing all other work required according to and as shown on the said plan and profile.'

"It therefore appears, we think, that the order is confined in its direction to the company to the alteration of the crossings in question by changing the highways and by reconstructing the railroad and by performing such work as is required thereby. It does not require the railroad company to make changes in private sidings, and the like, not its property, and not within the limits of its right of way. The closing words of the order 'and by performing all other work required according to and as shown on said plan and profile' do not affect this conclusion as to the scope of the order. These general words follow specific provisions of the order and under an elementary rule of construction, are limited thereby. Further, they refer back to the introductory, general mandate of the order requiring the company to 'alter said crossings and each of them' and are limited thereby.

"Neither does the order require the owners of such private sidings to reconstruct them. The plan which accompanies the order simply suggests to such owners a method by which their property may be conformed to the new conditions so as to admit of a continuance of the siding facilities theretofore enjoyed. The order only requires others than the railroad company to make such changes in and re-

movals of their property and constructions as are necessary to carry the order and plan into effect. In this it accords with section 4 of the statute. Since the mandate of the order to the railroad company is limited to requiring the changing of highways and the reconstruction of the railroads, the changes in, or removal of, such private sidings cannot be said to be necessary to carry the order to the railroad into effect. Of course, the plan does indicate a way in which, in part, existing siding facilities may be continued after the ordered changes in the highways, and the ordered reconstruction of the railroad are made. It is appropriate that it shall do so, for in the adoption of a plan, the effect thereof on existing industrial facilities should be taken into account, and this factor should also be taken into consideration in determining whether the plan adopted is reasonable or unreasonable.

“As we have pointed out, insofar as the order directs the prosecutor to make changes in its own side tracks, and the like, it was within the power conferred by the statute. If such changes were fairly incidental to the changes of grade of the main line tracks, we think that such changes were of that character.”

* * *

The construction so given the statute and the order by the Supreme Court of the state was affirmed by the court of last resort. Such interpretation of the statute and the order by the court of last resort of the state will be adopted by this court.

Tullis v. Lake Erie & Western Railroad Co., 175 U. S. 348;

Plymouth Coal Co. v. Pennsylvania, 232 U. S. 531.

As interpreted by the court of last resort of the State, neither the statute nor the order falls within the condemnation of:

Missouri Pacific Railway Co. v. Nebraska, 164
U. S. 403;

Missouri Pacific Railway Co. v. Nebraska, 217
U. S. 196.

The matter of providing adequate private siding facilities can be taken up during the progress of the work and thereafter. If agreement cannot be reached between the railroad company and adjoining owners who desire such facilities, application can be made by such owners to the Board of Public Utility Commissioners under the statute creating that Board (Laws of New Jersey 1911, chap. 195, p. 374) for relief. Section 16 (k) of that act provides that the Board shall have power, after hearing, upon notice, by order in writing, to direct any railroad company "to construct, maintain and operate upon reasonable terms, a switch connection with any private side-track, which may be constructed by any shipper to connect with the railroad . . . where, in the judgment of the Board, such connection is reasonable and practicable, and can be put in with safety, and will furnish sufficient business to justify the construction and maintenance of the same."

POINT XV.

The statute requires that the order made thereunder shall be directed to the "company operating such railroad." The order made in pursuance of the statute was directed to the Erie Railroad Company, the company operating such railroad. Neither the statute nor the order in this respect was obnoxious to the due process clause of the Constitution.

The Erie Railroad Company operates the railroads to which the order relates as lessee thereof.

Its leasehold rights are perpetual. For all substantial practical purposes, the leases under which it operates the railroads are conveyances in fee.

Black v. Delaware &c. Canal Co., 24 N. J. E. 455.

As such lessee, that company is subject to the continuing duty imposed by the charters of the lessor companies to construct and keep in repair, good and sufficient bridges or passages over and under the said railroads where any public road shall cross the same, so that the passage of carriages, horses and cattle on such roads shall not be prevented thereby.

As such lessee, that company is by force of section 26 of the General Railroad Act, further under a continuing duty to construct and keep in repair good and sufficient bridges and passages over, under and across the railroad right of way where any public road, street or avenue shall cross the same, so that public travel on said road shall not be impeded thereby.

The statute confirming the leases and contracts under which the company operates said railroads (Laws of New Jersey 1853, p. 480, case 977, 1021), refers to the New York and Erie Railroad Company as now in possession of

the Paterson and Hudson River Railroad, and the Paterson and Ramapo Railroad, under certain leases and contracts made by said companies.

It further refers to the New York and Erie Railroad Company, as *now carrying on* the business of said roads under said leases and contracts, and enacts that, "the New York and Erie Railroad Company and any other corporation or individuals using the aforesaid roads or either of them shall be and they are hereby declared liable for all claims, debts, damages, omissions and delinquencies arising from the running or operating said railroads and carrying freight and passengers on the same, as fully as the said Paterson and Hudson River Railroad Company and the Paterson and Ramapo Railroad Company are now liable by the laws of this State."

It permits service of summons or subpoena to be made upon the New York and Erie Railroad Company, or any other foreign corporation using said roads, by service thereof, "on any station agent of said corporation."

By the terms of the Grade Crossing Elimination Act the order made thereunder is to be directed to "the company operating such railroad."

The order consequently was directed to the Erie Railroad Company.

This provision of the act is neither arbitrary nor unreasonable.

The dangerous conditions, to the elimination of which the act is directed, are the result of the operation and not the mere ownership of the railroad.

It cannot be seriously contended that to impose upon the company operating the railroad, particularly where its leasehold rights are perpetual, the duty of performing the work necessary to eliminate the dangerous conditions

resulting from such operation, is arbitrary or unreasonable.

Especially is this true where, as here, the leases under which the roads are operated provide that at the termination of the leases any erections or improvements upon the demised property, that may have been made by the lessees or their assigns at their own expense, shall be paid for by the lessors at their appraised and just value (case, pp. 990, 993, 1027, 1029).

The following cases support the propositions advanced under this point.

In *Lee v. Smith*, 42 Oh. St., 458; 51 Am. Rep., 839, it was held that section 2573 of Revised Statutes of Ohio, as amended April 19, 1883 (80 O. L. 188), does not impose upon any owner in fee of a building more than two stories high, the duty to provide a convenient exit from the different upper stories of said buildings when such owner is not in possession or control thereof, although his tenant in possession and control of the building may use the same as a factory or workshop.

The Court said:

"We have considered a single proposition in this case, to wit: the true meaning of the phrase, 'any owner of any factory or workshop.' * * *

"That a factory or workshop is not synonymous with building must be admitted. * * *

"The owner of a building and the owner of a factory which is conducted in the building may be different persons, and when this is so, the owner of the factory and not the owner in remainder or reversion of the building, is the person on whom the statute imposes the duty. * * * If the building were constructed and used for a factory by the owner, who afterwards transfers the building in fee and the business to another, the duty of providing

fire escapes thereafter devolves upon the purchaser who continues the business, and the grantor is relieved therefrom. This proposition will not be questioned. We think the same result would follow the transfer of a life estate or an estate for years. The true test of liability is the possession and right to control the factory by one who is owner of the business or agent for such owner, although owner of the building for the time being only."

In *Schott v. Harvey*, 105 Pa. St., 222, it was held that the provision of P. L. 1879, p. 128, of Pennsylvania, that certain factories, etc., shall be provided with fire escapes by the "owners" or other persons therein designated, does not apply to an owner in fee, not in possession, who has leased the premises to a tenant who occupies the same as such factory and that such tenant in possession, using the premises as such a factory, is the "owner" of the factory within the meaning of said act.

The Court said (227):

"But the question which more immediately concerns us is, who is the 'owner' of a factory within the meaning of the act? The plaintiff contends that the owner is the person who holds the fee in the land on which the factory building stands. The word 'factory' is a contraction of manufactory, which Webster defines to be a building, or collection of buildings, appropriated to the manufacture of goods. But a manufactory is something more than a building. It includes not only the building but the machinery necessary to produce the particular goods manufactured, and the engines or other power requisite to propel such machinery. A building with only bare walls and a roof would no more be a manufactory than it would be a hotel. Such a building would be a mere shell and would not impose the duty of erecting fire escapes. It is only when it is completed by the addition of machinery,

and operatives are introduced to assist in the manufacture, that the duty of erecting fire escapes attaches. To whom does that duty attach? Clearly to the occupant in possession, who places the operatives in a position of danger, and enjoys the benefit of their services. If he is the lessee of the building, then he is a tenant in possession. For all practical purposes he is the owner until the end of his term, which may be in one year or in one hundred years. There is a large amount of property held in reversion in the City of Philadelphia. Some of the leases are for several hundred years. However long the term, the lessee is but a tenant for years; the fee is in him that hath the reversion. Yet the broad principle contended for would make the reversioner, who has practically parted with all control of the property, responsible for the neglect of the tenant in possession to put up fire escapes. And this would be so even if the property leased had been a vacant lot, and the factory building had been erected, and the machinery placed therein by the tenant subsequent to the lease. We cannot impute to the legislature an intention of doing a thing so palpably unjust and absurd as this. When, therefore, they used the term 'owner' in this connection, it is plain the owner at the time of the injury was contemplated without regard to the quantity or duration of his estate. * * * This view meets all of the requirements of the act. It places the responsibility where it properly belongs, upon the person in possession and occupancy of the property as owner for the time being and the nature of whose business renders the erection of fire escapes necessary to protect the lives of his employees."

In *Baltimore & Ohio Railroad Co. v Walker*, 45 Ohio St., 577, it was held that a railroad company which has the possession and control of a railroad in Ohio, and is managing and operating the same as the lessee thereof, is

one "owning the tracks" of such railroad within the meaning of section 3333 of the Revised Statutes, which provides that: "When the tracks of two railroads cross each other, or in any way connect, on a common grade, the crossing shall be made and kept in repair, and watchmen maintained thereat at the joint expense of the companies owning the tracks."

The Court said:

"The necessity for keeping the crossings in repair and maintaining watchmen thereat, grows out of the use and operation of the railroads whose tracks cross each other at a common grade, and lessee companies having the possession and control of the roads and operating them as such, receive all the advantages and securities resulting from safe crossings, and the services of the watchman, as fully in all respects as companies that are the absolute owners thereof could if they were operating them, and it would appear but reasonable, that while operating the roads they should receive the benefits subject to the burden of their expenses as provided by the statute and we are of the opinion that such lessees are companies 'owning the tracks' of the road operated by them, in the sense in which that phrase is used in the statute."

In *Buffalo Stone & Cement Co. v. Delaware, Lackawanna & Western R. Co.*, 130 N. Y. 152, it was held that where a railway company, organized under the laws of the state, leases its property to a foreign company, and by a covenant in that lease the latter agrees to perform all things in connection with the road which the lessor might be required by law to perform, the lessee must maintain farm crossings, as required by Laws of New York 1850, chap. 140, sec. 44.

The Court said:

"In *Jones v. Seligman*, 81 N. Y. 190, a railroad corporation mortgaged its property to trustees to secure payment of an issue of bonds, and thereafter defaulted in the payment of the interest. Under a power in the mortgage, the trustee entered into possession, completed and operated the road for the benefit of the bondholders. An action was brought to compel the trustees to build fences and farm crossings, which was defended on the ground that no corporations or persons could be compelled to perform either of these statutory duties except those mentioned in the statutes. It was held that the trustees being in possession with power to make reparation and additions, they had the right, and it was their duty, to construct fences and necessary farm crossings; that being in possession of the property, and engaged in operating it, they must carry out the provisions of the statutes as the representative of the corporation. In this case the defendant, by a covenant in the lease above quoted, expressly agrees to perform all things in connection with the road which the lessor might be required by law to perform. This provision plainly includes the duties imposed by statute on the lessor, and brings the case within the principle of *Jones v. Seligman*.

"The position that the defendant is not liable because it is not a corporation of this state, or organized under chapter 140, laws 1850, is not tenable. It having the right to operate its leased lines under the statutes of this state, it must be held to have assumed to discharge the same duties to the public and adjoining owners as are imposed upon such corporations organized and existing under our own statutes."

See also *Appeal of Town of Westbrook*, 57 Conn. 95; 17 Atl. 368.

Finally, it should be noted (see title map, Ex. R. 16) that parts of the railroad within the City of Paterson are owned by the Erie Railroad Company and are not held under the leases.

POINT XVI.

Neither the Grade Crossing Elimination Act nor the order made in pursuance thereof impaired the obligation of any contract between the state and the railroad companies.

The power exerted through the enactment of the Grade Crossing Elimination Act, and through the order made in pursuance thereof, was the police power of the state. This power the state could not by contract surrender or bargain away. The contracts contained in and the rights derived from the several charters, were from the beginning subject to the future exercise of this power.

The right which the Erie Railroad Company has, as lessee, in the railroad in question are derived from the statute of the State of New Jersey confirming the lease to the New York and Erie Railroad Company (Laws of New Jersey, 1853, p. 480; case, 977, 979).

Without legislative authority previously conferred, or a confirmatory act, the leases of the roads and franchises would have been wholly inoperative and void.

Black v. Delaware &c. Canal Co., 24 N. J. E. 455;
West Jersey and Seashore R. R. Co. v. Board of Public Utility Commrs., 87 N. J. L. 870; 94 Atl. 57, 59.

The confirmatory act, in its fifth section provides, "that the legislature may at any time, alter, amend or repeal this act."

Under the powers so reserved to the state, the franchises, privileges and exemptions granted by the state may be restricted, and burdens may be imposed, submission to which, is the price of the continued enjoyment of such franchises, privileges and exemptions.

The act incorporating the Paterson and Ramapo Railroad Company (Laws of New Jersey, 1832, p. 24; case p. 1005), in its thirteenth section, provides "that it shall be lawful for the Legislature, at any time hereafter, to alter, amend, or modify this act, whenever in their opinion the public good may require it."

The statute incorporating the President and Directors of the Paterson and Hudson River Railroad Company (Laws of New Jersey, 1831, p. 24; case p. 966) contains no reservation of the power to alter, amend or modify the act.

Irrespective of whether or not the power to alter, amend or repeal was reserved in the several statutes of incorporation and confirmation, the contracts contained therein and the rights derived therefrom were subject to the police power of the state. This power, the Legislature could not by contract surrender or bargain away. The exertion of this power, therefore, through an act of legislation or an administrative order made under an act of legislation, would not impair the obligation of the contracts contained in the several acts of incorporation or the confirmatory acts.

From among the many cases sustaining these propositions we select, as especially pertinent, the following:

In *Minneapolis & St. L. Ry. v. Emmond*, 149 U. S. 364, this Court had before it a statute of Minnesota which provided that all railroad companies in the state should within six months after its passage "build or cause to be built good and sufficient cattle guards at all wagon crossings, and good and substantial fences on each side" of their roads and declared that they should be liable for domestic animals killed or injured by their negligence, and that a failure to build and maintain cattle guards and fences as above provided should be deemed an act of negligence on the part of such companies; and by its fourth section, as amended, provided that any company guilty of the failure or neglect mentioned should be liable for all damages sustained by any person in consequence of such failure or neglect.

The statute so requiring the erection of cattle guards and fences was sustained notwithstanding an assumed contract with the state to the contrary.

Mr. Justice Field, delivering the opinion of this Court, said:

"It was also objected that the statutes of Minnesota, in requiring the defendant to build partition fences for the benefit of adjoining landowners, or to pay damages for not building them, imposed upon the company a duty not required by contract, common law, or its charter, and is, therefore, a violation of the right conferred by the charter to buy and hold lands for specified purposes, the same as any other landowner.

"To this position we answer that the extent of the obligations and duties required of railway corporations or companies by their charters does not create any limitation upon the state against impos-

ing all such further duties as may be deemed essential or important for the safety of the public, the security of passengers and employees, or the protection of the property of adjoining owners. The imposing of proper penalties for the enforcement of such additional duties is unquestionably within the police power of the states. *No contract, with any person, individual or corporate, can impose restrictions upon the power of the states in this respect.*"

In *C. B. & Q. R. R. v. Nebraska*, 170 U. S. 57, this Court held that a contract between the City of Omaha and two railroad companies, founded upon an act of the legislature of Nebraska, for the building of a viaduct along a street at the expense of the two companies, was a contract in such a sense that the respective parties continued to be bound by its provisions so long as the legislation remains unchanged; *but it was not a contract whose continuance and operation could not be affected or controlled by subsequent legislation.*

In *Northern Pacific Railway Co. v. State of Minnesota ex rel. The City of Duluth*, 208 U. S. 583, Mr. Justice Day, delivering the opinion of this Court referring to this subject, at page 598, said:

"The exercise of the police power cannot be limited by contract, for reasons of public policy, nor can it be destroyed by compromise, and it is immaterial upon what consideration the contract rests, as it is beyond the authority of the state or the municipality to abrogate this power so necessary to the public safety."

In *Texas & N. O. R. Co. v. Miller*, 221 U. S. 408, this Court held that a charter provision exempting a railroad company from liability for death of employees, even if caused by its own negligence, does not amount to an irre-

vocable contract within the protection of the contract clause.

Mr. Justice Van Devanter, delivering the opinion of this Court, said:

"The doctrine that a corporate charter is a contract which the constitution of the United States protects against impairment by subsequent state legislation is ever limited in the area of its operation by the equally well settled principle that a legislature can neither bargain away the police power nor in anywise withdraw from its successors the power to take appropriate measures to guard the safety, health and morals of all who may be within their jurisdiction.

. . .

"The subject to which the provision in question relates is the civil liability of a railroad company for the death of its employees, resulting from its negligence. That is a matter of public concern, and not of mere private right. It is closely connected with the safety of the employees, and undoubtedly belongs to that class of subjects over which the legislature possesses a regulatory but not a contracting power. Manifestly, therefore, the charter contract did not embrace that provision, and the contract clause of the Constitution did not prevent its repeal."

In *Denver & R. G. R. Co. v. Denver*, 250 U. S. 241, this Court sustained, against attack upon the ground that it offended the contract clause, a municipal ordinance directing a railroad company to remove its tracks from a busy street intersection.

Mr. Justice Van Devanter, delivering the opinion of the Court, said:

"The track in Wynkoop Street has been there since 1871, and we shall assume, as did the Supreme

Court of the state, that it was put there in virtue of some ordinance of that period, and that the ordinance became a contract and the right granted became a vested property right. But, as this court often has held, such contracts and rights are held subject to the fair exercise by the state, or the municipality as its agent, of the power to adopt and enforce such regulations as are reasonably necessary to secure the public safety; for this power 'is inalienable even by express grant,' and its legitimate exertion contravenes neither the contract clause of the Constitution nor the due process clause of the Fourteenth Amendment."

In *Morris & Essex R. R. Co. v. Orange*, 63 N. J. L. 253, Mr. Justice Depue, writing the opinion of the Court of Errors and Appeals of New Jersey, after pointing out that certain New York and Connecticut decisions were placed upon the ground that the charters of the respective companies were subject to alteration or repeal, but that the opinion of the Connecticut Court and of the Supreme Court of the United States in *New York and New England Railroad v. Bristol*, 62 Conn. 252; 26 Atl. 122; 151 U. S. 556, lays stress upon the fact that the regulations were a proper exercise of the police power of the state, said (264):

"In *Boston and Maine Railroad Co. v. County Commissioners*, 79 Me. 386; S. C., 10 Atl. Rep. 113, an act requiring the expense of building and maintaining so much of the townway or highway as was within the limits of the highway where such way crossed the track at grade, should be borne by the railroad company, was held to be constitutional. This decision was made against a company whose charter provided that it should not be altered, amended or repealed. The power of the legislature to impose such burdens for general safety under the police power was declared to be fundamental

and that the act did not impair any contract in the company's charter. Whether the corporation has an irrevocable contract in its charter or not is immaterial. Police powers are inherent in the government, and the legitimate exercise of legislative powers in securing public safety does not impair the obligation of contracts nor deprive anyone of property without due process of law."

In *Town of Waterbury v. Central Vermont Railway Co.*, 108 Atl. 423, it was held that in its application to the Central Vermont Railway Company, chartered originally by an act of 1843, the application of a later enacted statute requiring the repair of a bridge under the railroad's overpass in a town, did not deprive the railroad of vested rights, its charter having been granted subject to the police power of the state and such later statute being in the exercise of such power.

Mr. Justice Powers, writing the opinion of the Court, said:

"There is nothing in the law more firmly established than this: Every contract made, every charter granted, regardless of its stipulations, is subject to the police power of the state. The Legislature cannot divest itself of the power (which carries with it the corresponding duty) of conserving the health, safety, comfort, and welfare of the people; nor can one legislature bind its successor by any contract to the contrary."

POINT XVII.

Neither the Grade Crossing Elimination Act nor the order made in pursuance thereof contravenes the contract clause of the Constitution by reason of the effect thereof upon the contracts embodied (a) in the leases of the railroads and franchises, or (b) the contracts between the railroad companies and the holders of their obligations and securities, or (c) the contracts between the railroad companies and other utility companies occupying the public highways and crossing the railroad, or (d) the contracts between the railroad companies and others for switch connections and service.

These several contracts and the rights thereunder were, when entered into and acquired, subject to the police power of the State. It was not within the competency of the parties thereto, by their contracts to withdraw the subject thereof from or to restrain or affect in anywise the future exercise of such power by the State.

If, as we contend, the Grade Crossing Elimination Act and the order made in pursuance thereof, are based upon, and justified in the police power, neither such act nor such order operates to unconstitutionally impair the obligation of the several contracts above referred to, nor violates the due process clause. Rights which are subject to the police power of the State cannot be removed from that power by the making of a contract concerning them. The contract in such case carries with it the infirmity of the subject matter. The general principle involved in this point were considered in the following cases.

In *Manigault v. Springs*, 199 U. S. 473, it appeared that Manigault, Springs and others were adjoining riparian owners on the Santee River at the mouth of Kinloch

Creek. Springs and others built a dam across the creek, which interfered with Manigault's passage up the creek and with irrigation. In 1898 a contract was made between the parties by which the obstructions were to be removed to give a clear passage up the creek, and the removal was effected. In 1903 the Legislature of South Carolina authorized Springs to erect and maintain a dam across the creek in order to drain the lowlands on the Santee River and enhance their values. Manigault applied for an injunction against this in the United States Circuit Court of South Carolina. A demurrer to his bill was sustained and appeal was taken. On appeal the judgment below was affirmed.

Mr. Justice Brown, delivering the opinion in this Court, said:

"The main argument was addressed to the question whether the contract of August, 1898, providing for the removal of the obstruction on December 31, and the free ingress and egress through the creek thereafter was impaired by the act of the general assembly of 1903, permitting the defendants by name to construct and maintain the dam in question.

"It is the settled law of this court that the interdiction of statutes impairing the obligations of contracts does not prevent the state from exercising such powers as are vested in it for the promotion of the common weal, or are necessary for the general good of the public, though contracts previously entered into between individuals may thereby be affected.

"This power, which, in its various ramifications, is known as the police power, is an exercise of the sovereign right of the government to protect the lives, health, morals, comfort and general welfare of the people, and is paramount to any rights under contracts between individuals. Familiar instances

of this are where parties enter into contracts, perfectly lawful at the time, to sell liquors, operate a brewery or distillery, or carry on a lottery, all of which are subject to impairment by a change of policy on the part of the state, prohibiting the establishment or continuance of such traffic; in other words, that parties, by entering into contracts, may not estop the legislature from enacting laws intended for the public good.

"While this power is subject to limitations in certain cases, there is wide discretion on the part of the legislature in determining what is and what is not necessary, in a discretion which courts ordinarily will not interfere with."

In *Union Dry Goods Co. v. Georgia Public Service Corporation*, 248 U. S. 372, this Court held that one having a contract with a public service company fixing rates is neither deprived of property without due process nor is the obligation of his contract impaired in violation of the contract clause by the fixing of higher rates in the exercise of the State's police power of regulation.

Mr. Justice Clark, delivering the opinion of the Court, said:

"Thus it will be seen that the case of the plaintiff in error is narrowed to the claim that reasonable rates, fixed by a state in an appropriate exercise of its police power, are invalid for the reason that if given effect they will supersede the rates designated in the private contract between the parties to the suit, entered into prior to the making of the order by the Railroad Commission.

"Except for the seriousness with which this claim has been asserted and is now pursued into this court, the law with respect to it would be regarded as so settled as not to merit further discussion.

"That private contract rights must yield to the public welfare, where the latter is appropriately

declared and defined, and the two conflict, has often been decided by this court."

"Thus in *Monigault v. Springs*, 199 U. S. 473, 480, 26 Sup. Ct. 127, 130 (50 L. Ed., 274), it was declared that:

'It is the settled law of this court that the interdiction of statutes impairing the obligation of contracts does not prevent the state from "properly exercising its police powers" for the general good of the public, though contracts previously entered into between individuals may thereby be affected.'"

"This on authority of many cases which are cited."

"In *Hudson Water Co. v. McCarter*, 209 U. S. 349, 357, 28 Sup. Ct. 529, 531 (52 L. Ed. 828, 14 Ann. Cas. 560), it is said that:

'One whose rights, such as they are, are subject to state restriction, cannot remove them from the power of the state by making a contract about them. A contract will carry with it the infirmity of the subject-matter.'"

"In *L. & N. R. R. Co. v. Mottley*, 219 U. S. 467, 482, 31 Sup. Ct. 265, 270 (55 L. Ed. 297, 34 L. R. A. (N. S.) 671), this is quoted with approval from *Knorr v. Lee*, 12 Wall. 457, 550, 551, 20 L. Ed. 287, viz.:

'Contracts must be understood as made in reference to the possible exercise of the rightful authority of the government, and no obligation of a contract can extend to the defeat of legitimate government authority.'"

"In the same report, in *Chicago, B. & Q. R. Co. v. McGuire*, 219 U. S. 567, 31 Sup. Ct. 259, 262, (55 L. Ed. 328), it is said:

'There is no absolute freedom to do as one wills or to contract as one chooses. The guaranty of lib-

erty does not withdraw from legislative supervision that wide department of activity which consists of the making of contracts, or deny to government the power to provide restrictive safeguards. Liberty implies the absence of arbitrary restraint, not immunity from reasonable regulations and prohibitions imposed in the interests of the community.' ”

“In *Atlantic Coast Line R. R. Co. v. Goldsboro*, 323 U. S. 548, 558, 34 Sup. Ct. 364, 368 (58 L. Ed. 721), the Court said:

‘It is settled that neither the “contract” clause nor the “due process” clause has the effect of overriding the power of the state to establish all regulations that are reasonably necessary to secure the health, safety, good order, comfort, or general welfare of the community; that this power can neither be abdicated nor bargained away, and is inalienable even by express grant; and that all contract and property rights are held subject to its fair exercise.’ ”

“And in *Rail and River Coal Co. v. Ohio Industrial Commission*, 236 U. S. 338, 349, 35 Sup. Ct. 359, 362 (59 L. Ed. 607), the state of the law upon the subject is thus aptly described:

‘This court has so often affirmed the right of the state in the exercise of its police power to place reasonable restraints, like that here involved, upon the freedom of contract, that we need only to refer to some of the cases in passing.’ ”

“These decisions, a few from many to like effect, should suffice to satisfy the most skeptical or belated investigator that the right of private contract must yield to the exigencies of the public welfare when determined in an appropriate manner by the authority of the state, and the judgment of the Supreme Court of Georgia must be affirmed.”

Cases specifically applying this settled principle to facts such as are here before the Court follow:

In *Swift v. Delaware, L. & W. R. R. Co.*, 66 N. J. E. 34, it was held that Gen. Stats., p. 2689, par. 221, empowers municipal authorities to make such contracts with railroad companies as shall secure greater safety to persons and property, or facilitate the construction and maintenance of other than grade crossings.

Under this statute a city contracted with a railroad company (whose charter bound it to keep its highway crossings fit for safe and convenient use, and gave it power to elevate its tracks) to remove certain tracks at a grade crossing, substituting therefor an elevated crossing.

It was further held that the obligation thus imposed on the company was paramount to the conflicting obligation existing by virtue of a prior contract with a private individual to maintain a switch and siding so that the latter contract would not be specifically enforced in equity in any manner, but that such individual would be remitted to his legal remedies, if any.

Emery, *V.-C.*, (47) said:

"In view of the subsequent contract made by the company with the city, under the acts of 1874 and 1893, for the removal of its tracks, is the agreement with the complainants, if proved, one which a court of equity should specifically enforce? In my judgment, it should not, and for the reason that the track elevation contract was one made for the purpose of carrying out obligations imposed upon the company in the interest of public safety, which are paramount to the private interests of the complainants, and the performance of these public obligations should not be interfered with or prevented by the special enforcement of complainants' supposed private rights. The railroad company at the time

of the alleged contract was, under the express terms of its charter, chargeable with the duty to keep, at all times and under all circumstances, the public highways where they cross the railroad in a condition fit for safe and convenient use, and for this purpose had power, when public exigencies required, to elevate their tracks or alter the grades or highways. *Central Railroad Co. v. State*, 3 Vr., 220 (Supreme Court, 1867); *Newark v. Delaware, Lackawanna & Western Railroad Co.*, 15 Stew. Eq. 196 (*Van Fleet, V.-C.*, 1886). Under the general law of the state as it existed prior to 1874, both the railroad and the municipal authorities were charged with the duty of providing for the public safety, and for carrying out this purpose were empowered, by the statute of 1874, to mutually agree upon the elevations or changes to be made. *Read v. Camden*, 24 Vr., 322, 326 (Supreme Court, 1891). This statute was in force at the time of the agreement now in question. By the act of 1893, similar powers were granted to both companies, which were charged with similar duties in reference to the removal of grade crossings.

"As to the validity of any contract made by a railroad company for such a private use of or interest in its lands used for its railway or any of its appurtenances as would prevent its performance of these public obligations, to arrange for the public safety by the removal of grade crossings in cities, my view would be either that the contracts are altogether void or that they must be considered as made and taken subject to any contract subsequently made to remove its grade crossings.

"Contracts of this character, for the permanent location or use of their road or works, have been held to be subject to termination when even the interest of the road itself requires it. 'Railroad companies, while private corporations, are *quasi* public agencies, engaged in the performance of public duties, and contracts which prevent them from

the discharge of these duties cannot be sustained.' E. & S. &c., R. R. Co. v. McDevitt, 24 Sup. Ct. Rep. 36 (U. S. Sup. Ct. October Term, 1903). This case was an action at law for damages for breach of a contract made on securing the right of way to operate an extension of the railroad over a particular track, and it was held that damages could not be based on the company's obligation to continue permanent use under the contract."

In *Swift v. D., L. & W. R. R. Co.*, 66 Eq. 452 (Ct. E. & A.), in a *per curiam* opinion the Court said:

"We concur in that part of the opinion delivered in this cause by the learned vice chancellor which holds that the alleged contract between the defendant railroad company and private persons for the permanent maintenance of grade crossing over certain streets in the city of Newark must, so far at least as the right to specific performance is concerned, be deemed subject to the public duty of that company and to the police power of the legislature vested by the act of 1893 (P. L. of 1893, p. 157) in the municipal authorities of this city to secure the safety of public highways. The authorities of the city and of the railroad having both determined that those crossings unnecessarily endanger public travel, we think, on that ground, an injunction forbidding their removal was rightly refused.

"This being our conclusion, we refrain from expressing either concurrence in, or dissent from, the other propositions set forth in that opinion."

In *Branson v. City of Philadelphia*, 47 Pa. St. 329, it was held that every person holding license for any public authority, exercising the whole or a portion of the right of eminent domain, necessarily takes it subject to the exercise of this right whenever the public good requires it, and that with respect to the care, regulation and control of the highways within its corporate limits, the City

of Philadelphia exercises a portion of this power of the commonwealth, subject only to the higher control of the state and the use of the public, and therefore a written license, granted by the city for a valuable consideration, authorizing the holder to connect his property with the City Railroad by a turnout and track, is not such a contract as will prevent the city from abandoning or removing the said railroad, whenever in the opinion of its authorized authorities such action will tend to the benefit of the public.

In *Asher v. Hutchinson W. L. & P. Co.*, 66 Kans. 496, 71 Pac. 813, it was held that a contract by ordinance between a city and a water company, that the latter will lay water mains and supply the inhabitants with water on certain streets of the city, may, after such mains are laid, be so modified and changed by the city and water company as to require the water company to remove its mains from certain streets where, in the judgment of the council, public necessity no longer requires their continuance, to other portions of the city where public necessity requires that mains should be laid, and injunction will not lie at the suit of an individual to prohibit the city and water company from making such change, notwithstanding it may greatly decrease the value of his property and render it practically valueless for the purpose for which it was improved.

The Court said:

"An individual can acquire no vested right as against the public in the continued service of a public utility. Such a doctrine, once admitted, would destroy the convenience as a public utility. It would then become hampered, and subject to the control of the individual, and made to subserve such interests, to the detriment of the public welfare."

In *Appeal of New York, N. H. & H. R. Co.*, 53 Atl. 314 (Conn.), it was held that a railroad company having constructed a spur track across a highway at grade, and it being part of its system, and being presumed to have been constructed with due authority, and the company being bound to maintain and operate it till it is legally discontinued, and no steps for discontinuance having been taken, the Court has jurisdiction to order a bridge for support of such track under which a highway may be carried.

The Court said:

“At the hearing in the superior court the appellant claimed that the expense of the change of grade asked for would be so great that no change should be ordered, and included in its estimate of such expense the cost of the bridge for the spur track. Such a bridge would cost about \$5,000, and the appellant now claims that the court had no jurisdiction to order one, since this track was laid simply to facilitate business with the owner of a particular warehouse. The finding does not support this claim. It shows that the track is also used for the delivery of goods to other parties, and that it is part of the appellant's railroad system. That it was constructed without due authority of law is not to be presumed; and it could not have been legally laid on the highway except by virtue of a special franchise, and pursuant to a location duly made by the appellant and approved by the railroad commissioners. *Canastota Knife Co. v. Newington Tramway Co.*, 69 Conn. 146, 160; 36 Atl. 1107. Being a part, and apparently a material part, of the appellant's railroad system in the locality in question, it was bound to maintain and operate this track until it should be legally discontinued. *State v. Hartford & N. H. R. R. Co.*, 29 Conn. 538, 547. No step toward its discontinu-

ance had been taken when the cause was heard in the superior court, and the appellant cannot complain that the judgment was not so framed as to provide for a possibility, which it had not suggested, of a discontinuance at some future period."

In *re Grade Crossing Com'rs of City of Buffalo*, 208 N. Y. 139; 102 N. E. 552, the Court said:

"The railroad company had the right to elevate or depress its tracks without making compensation to abutting owners and irrespective of whether it obtained its right of way by deed or by condemnation. . . . The sum originally paid by the railroad company on its acquisition of the right of way must be deemed to have included compensation for damages occasioned by changes made necessary to meet the increasing demands of the business, or to conform to the requirements of public improvements. The abutting property owners are therefore neither legally nor morally entitled to compensation for changes in the grade of the railroad. . . ."

In *Otis Elevator Co. v. City of Chicago*, 263 Ill. 419; 105 N. E. 338 it was held that the construction by a property owner of improvements used in connection with a railroad does not estop the municipality from requiring an elevation of the railroad tracks in the interest of the public welfare, to avoid danger of injury to persons at street crossings, although the result is to destroy the switch connection.

The Court said:

"In the exercise of the police power, the city had a right, within reasonable limits, to require the railroad company to elevate its tracks so as to avoid grade crossings upon streets, and protect the lives and property of its citizens. *Chicago & N. W. R. Co. v. Chicago*, 140 Ill. 309; 29 N. E. 1109. That

power, like other powers of government, when mere property interests are involved, is subject to constitutional limitations. * * * But the power is incapable of alienation, and no valid contract can be made which assumes to surrender or alienate such a power, which is required to continue in existence for the welfare of the public. *Chicago v. Chicago Union Traction Co.*, 199 Ill. 259; 59 L. R. A. 666; 65 N. E. 243. So far as requiring elevation of the tracks was an exercise of the police power, no equitable estoppel could operate to prevent its existence. All that was alleged in the declaration was that the plaintiff constructed improvements upon its own ground for use in connection with the switch. That gave no right against the city to have the railroad maintained, at the existing grade."

To the claims made under the leases and contracts between the lessor and lessee railroad companies, the following quotation from the opinion of Mr. Chief Justice Waite in *Chicago, Burlington & Quincy Railway Co. v. Iowa*, *supra*, is pertinent (152):

"Neither does it affect the case that before the power was exercised the company had pledged its income as security for the payment of debts incurred and leased its road to a tenant that relied upon the earnings as a means of paying for the leased property. The company could not grant or pledge more than it could give. After the pledge and after the lease the property remained within the jurisdiction of the state and continued subject to the same governmental power that existed before."

POINT XVIII.

Neither the Grade Crossing Elimination Act nor the order made in pursuance thereof impose a direct burden upon or interfere with the regulation of interstate commerce in violation of the commerce clause.

That it is competent for a state to adopt protective measures in the interest of public safety, although interstate commerce may incidentally or indirectly be involved, is a principle too well settled to require elaboration.

In *Smith v. Alabama*, 124 U. S. 463, this Court had before it a statute of Alabama providing that it should be lawful for the engineer of any railroad train in the State to drive, or operate, or engineer any train of cars or engine upon the main line of roadbed, of any railroad, in the state which is used for the transportation of persons, passengers or freight without first undergoing an examination as therein provided. The statute prescribed a penalty for its violation.

It appeared that an engineer of a railroad, whose sole duty was to drive, operate and engineer a locomotive engine drawing a passenger train, regularly plying in one continuous trip between Mobile, in Alabama, and Corinth, in Mississippi, and *vice versa*, was proceeded against under the statute.

In sustaining the statute Mr. Justice Matthews, delivering the opinion of this Court, at page 481, said:

"It is to be remembered that railroads are not natural highways of trade and commerce. They are artificial creations; they are constructed within the territorial limits of a state and by the authority of its laws, and ordinarily by means of corporations exercising their franchises by limited grants from the state. The places where they must

be located, and the plans according to which they must be constructed, are prescribed by the legislation of the state. Their operation requires the use of instruments and agencies attended with special risks and dangers, the proper management of which involves peculiar knowledge, training, skill and care. The safety of the public in person and property demands the use of specific guards and precautions. The width of the guage, the character of the grades, the mode of crossing streams by culverts and bridges, the kind of cuts and tunnels, the mode of crossing other highways, the placing of watchmen and signals at points of special danger, the rate of speed at stations, and through villages, towns and cities, are all matters naturally and peculiarly within the provisions of that law from which these modern highways of commerce derive their existence. The rules prescribed for their construction and for their management and operation, designed to protect persons and property, otherwise endangered by their use, are strictly within the limits of the local law. They are not *per se* regulations of commerce; it is only when they operate as such in the circumstances of their application, and conflict with the expressed or presumed will of congress exerted on the same subject, that they can be required to give way to the supreme authority of the constitution.

"In conclusion, we find, therefore, first that the statute of Alabama, the validity of which is under consideration, is not, considered in its own nature, a regulation of interstate commerce, even when applied as in the case under consideration; secondly, that it is properly an act of legislation within the scope of the admitted power reserved to the State to regulate the relative rights and duties of persons being and acting within its territorial jurisdiction, intended to operate so as to secure for the public, safety of person and property; and, thirdly, that so far as it affects transactions of com-

merce among the States, it does so only indirectly, incidentally, and remotely, and not so as to burden or impede them, and, in the particulars in which it touches those transactions at all, it is not in conflict with any express enactment of congress on the subject, nor contrary to any intention of congress to be presumed from its silence."

In *Nashville, &c., Ry. Co. v. Alabama*, 128 U. S. 96, it appeared that the appellant corporation had been indicted and convicted under a State statute for employing a train conductor who had not obtained a certificate from a State Board of Medical Examiners that he was free from color blindness.

In sustaining the judgment of the State Court affirming the conviction, Mr. Justice Field, delivering the opinion of this Court, said:

"It is conceded that the power of congress to regulate interstate commerce is plenary; that as incident to it congress may legislate as to the qualifications, duties and liabilities of employees and others on railway trains engaged in that commerce; and that such legislation will supersede any state action on the subject. But until such legislation is had, it is clearly within the competency of the states to provide against accidents upon trains whilst within their limits. Indeed, it is a principle fully recognized by decisions of State and Federal Courts, that whenever there is any business in which, either from the products created or the instrumentalities used, there is danger to life or property, it is not only within the power of the States, but it is among their plain duties, to make provisions against accidents likely to follow in such business so that the dangers attending it may be guarded against so far as is practicable."

In *Hennington v. Georgia*, 163 U. S. 299, it was held that an act of the State of Georgia forbidding the run-

ning of freight trains on any railroad in the state on Sunday, and providing for the trial and punishment on conviction of the superintendent of a railroad company violating that provision, although it affects interstate commerce in a limited degree, is not, for that reason a needless intrusion upon the domain of Federal jurisdiction, nor strictly a regulation of interstate commerce, but is an ordinary police regulation, designed to secure the well being, and to promote the general welfare of the people within the state, and is not invalid by force alone of the Constitution of the United States.

In *New York, New Haven & Hartford Railroad Co. v. State of New York*, 165 U. S., p. 628, this Court sustained a statute of the State of New York forbidding the heating of cars by stoves, although it extended to cars employed in interstate commerce.

Mr. Justice Harlan, delivering the opinion of the Court, said:

"According to numerous decisions of this Court (some of which are cited in the margin), sustaining the validity of state regulations enacted under the police powers of the state, and which incidentally affected commerce among the states and with foreign nations, it was clearly competent for the State of New York, in the absence of national legislation covering the subject, to forbid under penalties the heating of passenger cars in that state by stoves or furnaces kept inside the cars or suspended therefrom, although such cars may be employed in interstate commerce. While the laws of the states must yield to acts of congress passed in execution of the powers conferred upon it by the Constitution (*Gibbons v. Ogden*, 9 Wheat. 1, 211), the mere grant to congress of the power to regulate commerce with foreign nations and among the

states did not, of itself and without legislation by congress, impair the authority of the states to establish such reasonable regulations as were appropriate for the protection of the health, the lives, and the safety of their people. The statute in question had for its object to protect all persons traveling in the State of New York on passenger cars moved by the agency of steam against the perils attending a particular mode of heating such cars. There may be reason to doubt the efficacy of regulations of that kind. But that was a matter for the estate to determine. We know from the face of the statute that it has a real, substantial relation to an object as to which the state is competent to legislate, namely, the personal security of those who are passengers on cars used within its limits. Why may not regulations to that end be made applicable, within a state, to the cars of railroad companies engaged in interstate commerce as well as to cars used wholly within such state? Persons traveling on interstate trains are as much entitled, while within a state, to the protection of that state, as those who travel on domestic trains. The statute in question is not directed against interstate commerce. Nor is it within the meaning of the Constitution a regulation of commerce, although it controls, in some degree, the conduct of those engaged in such commerce. So far as it may affect interstate commerce, it is to be regarded as legislation in aid of commerce, and enacted under the power remaining with the state to regulate the relative rights and duties of all persons and corporations within its limits. Until displaced by such national legislation as congress may rightfully establish under its power to regulate commerce with foreign nations and among the several states, the validity of the statute so far as the commerce clause of the Constitution of the United States is concerned, cannot be questioned.

"Counsel for the railroad suggests that a conflict between state regulations in respect of the heating of passenger cars used in interstate commerce would make safe and rapid transportation impossible; that to stop an express train on its trip from New York to Boston at the Connecticut line in order that passengers may leave the cars heated as required by New York, and get into other cars heated in a different mode in conformity with the laws of Connecticut, and then at the Massachusetts line to get into cars heated by still another mode as required by the laws of that commonwealth, would be a hardship on travel that could not be endured. These possible inconveniences cannot affect the question of power in each state to make such reasonable regulations for the safety of passengers on interstate trains as in its judgment, all things considered, is appropriate and effective. Inconveniences of this character cannot be avoided so long as each state has plenary authority within its territorial limits to provide for the safety of the public according to its own views of necessity and public policy, and so long as congress deems it wise not to establish regulations on the subject that would displace any inconsistent regulations of the States covering the same ground."

In *Chicago, M. & E. R. Co. v. Solan*, 169 U. S. 133, Mr. Justice Gray delivering the opinion of this Court, said:

"The rules prescribed for the construction of railroads, and for their management and operation, designed to protect persons and property, otherwise endangered by their use, are strictly within the scope of the local law. They are not, in themselves, regulations of interstate commerce, although they control, in some degree, the conduct and liability of those engaged in such commerce. So long as congress has not legislated upon the particular subject, they are rather to be regarded

as legislation in aid of such commerce, and as a rightful exercise of the police power of the state to regulate the relative rights and duties of all persons and corporations within its limits.

"Such are the grounds upon which it has been held to be within the power of the state to require the engineers and other persons, engaged in the driving or management of all railroads passing through the state, to submit to an examination by a local board as to their fitness for their positions; or to prescribe the mode of heating passenger cars in such trains."

In *Chicago, R. I. & P. Co. v. Arkansas*, 219 U. S. 452, it was held that a state statute prescribing a minimum of three brakemen for freight trains of more than twenty-five cars operated in the state, did not amount to an unconstitutional regulation of interstate commerce when applied to a foreign railway company engaged in such commerce.

Mr. Justice Harlan, delivering the opinion of the Court, said:

"It is not too much to say that the state was under an obligation to establish such regulations as were necessary or reasonable for the safety of all engaged in business or domiciled within its limits. Beyond doubt, passengers on interstate carriers while within Arkansas are as fully entitled to the benefits of valid local laws enacted for the public safety as are citizens of the state. Local statutes directed to such an end have their source in the power of the state, never surrendered, of caring for the public safety of all within its jurisdiction; and the validity under the Constitution of the United States of such statutes is not to be questioned in a Federal Court unless they are clearly inconsistent with some power granted to the general government, or with some right se-

cured by that instrument, or unless they are purely arbitrary in their nature. The statute here involved is not in any proper sense a regulation of interstate commerce, nor does it deny the equal protection of the laws. Upon its face, it must be taken as not directed against interstate commerce, but as having been enacted in aid, not in obstruction of such commerce, and for the protection of those engaged in such commerce. Under the evidence, there is admittedly some room for controversy as to whether the statute is or was necessary; but it cannot be said that it is so unreasonable as to justify the Court in adjudging that it is merely an arbitrary exercise of power, and not germane to the objects which evidently the state legislature had in view. It is a means employed by the state to accomplish an object which it is entitled to accomplish, and such means, even if deemed unwise, are not to be condemned or disregarded by the Courts, if they have a real relation to that object."

In *Simpson v. Shepard*, 230 U. S. 350, Mr. Justice Hughes delivering the opinion of this Court (after considering the limitations upon state action), said:

"But within these limitations there necessarily remains to the states until congress acts, a wide range for the permissible exercise of power appropriate to their territorial jurisdiction although interstate commerce may be affected. It extends to those matters of a local nature as to which it is impossible to derive from the constitutional grant an intention that they should go uncontrolled pending federal intervention. Thus, there are certain subjects having the most obvious and direct relation to interstate commerce, which, nevertheless, with the acquiescence of congress, have been controlled by state legislation from the foundation of the government because of the necessity that they should not remain unregulated, and that their regulation should be adapted to varying local exi-

gencies; hence, the absence of regulation by congress in such matters has not imported that there should be no restriction, but rather that the states should continue to supply the needed rules until congress should decide to supersede them. Further, it is competent for a state to govern its internal commerce, to provide local improvements, to create and regulate local facilities, to adopt protective measures of a reasonable character, in the interest of the health, safety, morals and welfare of its people, although interstate commerce may incidentally or indirectly be involved. Our system of government is a practical adjustment by which the national authority as conferred by the constitution is maintained in its full scope without unnecessary loss of local efficiency. Where the subject is peculiarly one of local concern, and from its nature belongs to the class with which the state appropriately deals in making reasonable provision for local needs, it cannot be regarded as left to the unrestrained will of individuals because congress has not acted, although it may have such a relation to interstate commerce as to be within the reach of the federal power. In such case, congress must be the judge of the necessity of federal action. Its paramount authority always enables it to intervene at its discretion for the complete and effective government of that which has been committed to its care, and, for this purpose and to this extent, in response to a conviction of national need, to displace local laws by substituting laws of its own. The successful working of our constitutional system has thus been made possible."

In *South Covington & C. Street R. Co. v. Covington*, 235 U. S. 537, it was held that a municipal regulation of a street railway company principally engaged in interstate commerce with reference to passengers riding on car platforms, unless the same are provided with suitable rails or barriers and with reference to the cleanliness,

ventilation and fumigation of the cars, did not infringe upon the Federal authority over such commerce, at least until such Federal authority is exerted.

In *St. Louis, I. M. & S. Co. v. Arkansas*, 240 U. S. 518, it was held that interstate commerce is not unconstitutionally interfered with by a state statute which forbids railway companies with yards or terminals in cities of the state to conduct switching operations across public crossings in cities of the first or second class with a switching crew of less than one engineer, a fireman, a foreman and three helpers.

In *Vandalia R. Co. v. Public Service Commis. of Indiana*, 242 U. S. 255, it was held that until congress acts in the matter there is no constitutional interference with interstate commerce in an order of a state railroad commission made under legislative authority requiring all engines used in the transportation of trains over any line of railroad within the state to be equipped with headlights of not less than fifteen hundred candle power.

Mr. Justice Pitney, delivering the opinion of the Court, said:

"So far as the attack upon the Act of 1909 and the order made pursuant to it is based upon interference with interstate commerce, it very properly is conceded that, but for the recent act of congress, the case would be controlled by *Atlantic Coast Line Co. v. Georgia*, 234 U. S. 280, 290, where it was held that, in the absence of Federal legislation the states are at liberty in the exercise of their police power to establish regulations for securing safety in the physical operation of railroad trains within their territory, even though such trains are used in interstate commerce * * *."

In *South Covington &c., Ry. Co. v. Kentucky*, 252 U. S. 399, held:

"That a state law requiring interurban railroad companies to supply separate cars or compartments for white and colored passengers, and punishing failure to do so, is not an unconstitutional burden on interstate commerce as applied to such a railroad, owned by a local corporation and lying wholly within such state, while in control of an allied street car company and in practice operated as part of a street car system over which the cars are run to and from a city in another state (where such separation of races is illegal), and passengers are carried through to destination without charge for a single fare, those travelling interstate greatly exceeding in number those travelling wholly within the state making the requirement."

The Justice McKenna, delivering the opinion of the Court, said:

"There was a distinct operation in Kentucky. In operation authorized and required by the charters of the companies and it is that operation, the act in question regulates, and does no more, and therefore is not a regulation of interstate commerce. This is the affect of the ruling in *South Covington Street Ry. Co. v. Covington*, 235 U. S. 537. The regulation of the act affects interstate business incidentally and does not subject it to unreasonable demands.

"The cited case points out the equal necessity, under our system of government, to preserve the power of the states within their sovereignties as to prevent the power from intensive exercise within the national sovereignty, and an interurban railroad company deriving its powers from the state, and subject to obligations under the laws of the state, should not be permitted to exercise the powers given by the state, and escape its obligations to the state under the circumstances presented by this record, by running its coaches beyond the state lines."

POINT XIX.

The police power of the State is, under the Constitution, when exerted in the interest of public safety, unlimited, except by the requirement that the exercise thereof be not merely capricious and wanton. Neither the Grade Crossing Elimination Act nor the order made in pursuance thereof is, in any aspect, capricious or wanton.

It is admitted that the police power of the state is, under the Constitution, even though exerted in the interest of public safety, limited by the requirement, that it be not exerted in mere caprice or wantonness. A reading of the cases in this court, involving legislative acts and administrative orders sought to be justified as exerting the police power in the interest of public safety, demonstrates that, while the Court has said that the power cannot be arbitrarily, needlessly or unreasonably exercised, these words have been used as comprehending merely capricious and wanton acts of legislation and administration.

In *N. Y. & N. E. Railroad Co. v. Bristol*, 151 U. S. 556, where this Court sustained the statute of Connecticut directed to the extinction of grade crossings as a menace to public safety, Chief Justice Fuller, after stating that railroad corporations are subject to legislative control in all respects necessary to protect the public against danger, injustice and oppression, said that such companies are not deprived of property without due process of law, *by statutes under which the result is ascertained in a mode suited to the nature of the case, and not merely arbitrary and capricious; and that the adjudication of the highest court of the state, that, in such particulars, a law enacted in the exercise of the police power of the state is*

valid, will not be reversed by this court on the ground of an infraction of the Constitution of the United States.

It is submitted that neither the Grade Crossing Elimination Act nor the order made in pursuance thereof, is, in any respect, capricious or wanton.

(a) There is a substantial relation between the means adopted by the act and the purpose thereby sought to be accomplished. As we have before shown, the act does not extend to every level crossing, but to such crossings only as involve elements of peculiar danger or serious impediment to public travel. The requirement of the separation of grades, at a crossing where peculiar danger or serious impediment to public travel exists, bears a substantial relation to the end sought to be accomplished, and cannot be said to be adopted in mere caprice and wantonness. In view of the fact that the statute extends only to the crossings at which there is peculiar danger, or serious impediment to public travel, it serves no useful purpose to direct attention to the fact as the plaintiff-in-error, Erie Railroad Company, does at page 45 of the brief submitted by it, that in 1913 there were no less than 2,500 grade crossings in the State of New Jersey, of which 256 were on its line. Whether or not the statute extends to these crossings, depends upon whether peculiar danger or serious impediment to public travel exists thereat. This question could only be determined with respect to each of these crossings, as it has been in the case at bar, through the specific investigation of the conditions there existing.

(b) The record, as we have before indicated, establishes that there exists at each of the crossings, to which the order relates, in varying degree, elements of peculiar danger and of serious impediment to public travel. The

requirement by the order of the separation of the grades at the several crossings, therefore, bears a substantial relation to the end sought to be accomplished and cannot be said to have been adopted in mere caprice or wantonness.

That separation of the grades alone will suffice as a means to accomplish the purpose of the statute and the order is made apparent by the fact that, at the time of making the order the highest form of grade crossing protection existed at the crossings, viz: gates operated by watchmen; that, nevertheless, accidents and casualties have occurred, and that the operation of these gates, through the frequency of the train movements over the crossings, in itself formed an element in the serious impediment to public travel.

(c) The order requires the separation of grades at the several crossings according to a comprehensive plan. This requirement is neither capricious nor wanton. Throughout the proceedings before the board, it was recognized by all of the parties thereto that the situation that existed could only be met through the adoption of a comprehensive plan. With the exception of Madison avenue, which the board required should be carried over the railroad, it was impossible to plan for any one of the crossings without considering and providing for the others. In other words, to effect the elimination of one crossing, it was necessary that a plan be made for all. On this point the board, in its report of January 11, 1915 (Case Vol. IV, p. 1748, 1756), said:

"While the railroad company, in its answer, protested against the inclusion of more than one crossing in the petition, the consideration of the entire subject is simplified by the acquiescence of all parties to the proceeding, that all of the cross-

ings mentioned in the petition must be considered in any plan of elimination. From the beginning to the conclusion of the hearings, there was no intimation from anyone that a change at a particular crossing only should be considered. We will, therefore, deal with the proceeding as involving the adoption of one comprehensive plan or scheme covering all of the crossings. It was never questioned but that a general plan for the separation of grades at the crossings was practicable. Differences of opinion between engineers for the municipality and the utilities affected occurred as to some details, but the chief objection raised was to the expense."

On this point the Supreme Court of the state in the case of the Erie Railroad Company against these defendants (Case Vol. V, p. 2257), dismissing the contention of the company, that the statute required a separate proceeding for each crossing, said:

"The prosecutor does not point out, or even attempt to show, how or in what way, fifteen separate petitions, with fifteen separate hearings, would be more advantageous to it, but on the contrary, rather acquiesces in the idea, that all the crossings mentioned in the petition must be considered in one plan of alteration, if alteration is to be made at all, and that a general plan of the alteration of the grade at the several crossings is practical, as an engineering problem.

"Mr. Brameld, the engineer of the prosecutor, the Erie Railroad Company, at page 509 of the record, testified, 'there are various changes which I think will have to be made.' At page 526, 'Of course, I haven't worked up the detailed solution of every one of them, but from my general knowledge of the situation I think they could be taken care of'; i. e., the details. The testimony further shows that Section D provides for the elimination

of the crossing at Madison avenue, according to a plan submitted by the prosecutor, the Erie Railroad Company, known as Exhibit R. 105, which is an estimated cost of \$192,133.92 less than the plan prepared by the city, and which carries Madison avenue over the tracks of the railroad instead of under the tracks. We think the construction of the statute cannot be limited to a single crossing in a separate proceeding, but in a proper case, where the jurisdictional facts appear, several crossings may be considered in one proceeding, when so related to one another, that the consideration of the one necessarily involves the consideration of the other, as a practical engineering problem."

Recognition of the inseparable relation of the crossings to each other was also made when the company, in course of informal negotiations, as early as 1911 prepared a preliminary sketch providing for their elimination and an estimate of cost.

The City of Paterson proposed before the board that the work involved in the elimination should be executed as a single operation. *The engineer of the company* (Case Vol. I, p. 530, &c.) suggested that the work be divided into sections in its execution. This suggestion the board adopted. It should not be assumed from this, however, that the sections are independent of each other. The fact is the contrary. It appears (Case Vol. I, p. 532) that the completion of the section known as Section A would close Keen and Warren streets until the sections known as Sections B and C can be completed.

(d) Compliance with the statute and order will require the expenditure of a substantial sum of money. This fact, however, renders neither the statute nor the order capricious or wanton. As before stated, it appears from the record that at each of the crossings there are

elements of peculiar danger and that seriously impede public travel; that the relation of these crossings to each other is such as to require the adoption of a comprehensive plan in the separation of grades.

It was not contended before the Board of Public Utility Commissioners, nor, apparently, is it now contended by the Erie Railroad Company, the plaintiff-in-error, that the comprehensive plan that was adopted is unnecessarily costly and that another plan effecting a separation of grades at the crossings might be adopted which would involve a lesser expenditure of money.

In *Erie Railroad Company v. Williams*, 233 U. S. 685, this Court had before it a case in which the police power was not exerted by the state in the interest of public safety, but was exercised to require railway companies to make semi-monthly payment of wages to their employees, and in which the statute was attacked among other grounds because of the cost entailed by compliance therewith. Mr. Justice McKenna, delivering the opinion of this Court, said:

"It is hardly necessary to say that cost and inconvenience (different words, probably, for the same thing) would have to be very great before they could become an element in the consideration of the right of a state to exert its reserve power or its police power (cases cited)."

In *Oregon Railroad, &c. Co. v. Fairchild*, 224 U. S. 863, a statute of the State of Washington authorized the Railroad Commission of that state "to order that additional trackage or sidings be constructed . . . and that additional connections be made." Under the statute the commission made an order that certain connections be made. The statute and the order were sustained by the Court of

that state. The judgment was reversed by this Court. The statute here, too, was one that did not exert the police power in the interest of public safety. It exercised the power in the interest of public convenience merely.

Mr. Justice Lamar, delivering the opinion of this Court, said:

"Since the decision in *Wisconsin, &c. Railroad Co. v. Jacobson*, 179 U. S. 287, there can be no doubt of the power of a state, acting through an administrative body, to require railroad companies to make track connections. But manifestly that does not mean that a commission may compel them to build branch lines, so as to connect roads lying at a distance from each other; nor does it mean that they may be required to make connections at every point where their tracks come close together in city, town and country, regardless of the amount of business to be done, or the number of persons who may utilize the connection if built. The question in each case must be determined in the light of all the facts, and with a just regard to the advantage to be derived by the public and the expense to be incurred by the carrier. For, while the question of expense must always be considered (*Chicago, &c. R. Co. v. Tompkins*, 176 U. S. 167, 174), the weight to be given that fact depends somewhat on the character of the facilities sought. If the order involves the use of property needed in the discharge of those duties which the carrier is bound to perform, then, upon proof of the necessity, the order will be granted, even though 'the furnishing of such necessary facilities may occasion an incidental pecuniary loss.' But even then the matter of expense is 'an important criteria to be taken into view in determining the reasonableness of the order.' *Atlantic Coast Line Railroad Co. v. North Carolina Commission*, 206 U. S. 27; *Missouri Pacific Railroad Co. v. Kansas*, 216 U. S. 262. Where, however, the proceeding is brought

to compel a carrier to furnish a facility not included within its absolute duties, the question of expense is of more controlling importance. In determining the reasonableness of such an order the Court must consider all the facts—the places and persons interested, the volume of business to be affected, the saving in time and expense to the shipper, as against the cost and loss to the carrier. On a consideration of such and similar facts the question of public necessity and the reasonableness of the order must be determined."

Where, as in the case at bar, the statute exerts the police power in the interest of public safety and where it appears, as here, that the order made under the statute is directed to the separation of the grades at crossings having elements of peculiar danger and affording a serious impediment to public travel; where it appears that the highest form of protection is afforded at these crossings and has proved ineffective and that the safety of the travelers on railway and highway can only be effected by the separation of the grade; and where the plan adopted to effect such separation is a plan not unnecessarily expensive, and in the adoption of which plan suggestions by the railroad company for modifications which would reduce the cost thereof have been acceded to; where the outlay required does not outrun the necessity of the requirement for public safety, the expense entailed in compliance with the order, though substantial, cannot be said to have been capriciously and wantonly imposed. Under such circumstances there is a substantial relation between such expense and the danger to be obviated by the execution of the order.

The principle here involved was recognized in *Health Department of the City of New York v. Rector, &c. of Trinity Church*, 145 N. Y. 32. The case which came be-

fore the court of last resort of the State of New York on appeal in an action to recover the statutory penalty for refusing to comply with an order of the Board of Health to place water facilities in certain tenement houses. The statute and order were sustained.

Mr. Justice Peckham, delivering the opinion of the Court, said:

"The exaction must not alone be reasonable, when compared with the amount of work or the character of improvement demanded. The improvement or work must, in itself, be reasonable, proper and fair exaction, when considered with reference to the object to be attained."

In the record of the case at bar, as has heretofore been indicated, it appears that the work required by the statute and the order made thereunder is a reasonable, proper and fair exaction, when considered with reference to the object to be attained; and it further appears that such exaction is reasonable when compared with the amount of work and the character of the improvement required to be executed by the order.

In *Woodruff, et al., Commissioners v. New York & N. E. R. Co.*, 59 Conn. 63; 20 Atl. 17, the case arose under the Grade Crossing Elimination Act of Connecticut in sustaining an order made by the State Commission under this act. The Court said:

"The twelfth paragraph alleges only that the defendants would be subjected to great expense if the order of the commission should be carried out. The resolution and the order being valid, and being required for the protection of life, the contention that the enforcement would subject the defendant to expense is, in not any reason, against its legality. That is an argument to be addressed to the commission."

In *Pennsylvania Railroad Co. v. Ewing*, 241 Pa. St. 581; 88 Atl. 775, it was sought to enjoin the enforcement of the "Full Crew Act." The Court, in sustaining the statute, said:

"The act of 1911, being a valid exercise of the police power by the legislature, the fact that railroad companies affected by it must make additional expenditures to comply with its provisions is an immaterial matter so far as courts are concerned. That fact was for the consideration of the legislature alone in determining whether the act should be passed. Uncompensated obedience to a regulation enacted for the public welfare or safety, under the police power of the state, is not taking property without due compensation, and any injury sustained in obeying such a regulation is but *damnum absque injuria*."

In *New York & N. E. R. Co. v. Bristol*, 151 U. S. 556, in which the Connecticut act relating to elimination of grade crossings was before this Court, Mr. Justice Fuller reading the opinion, said:

"* * * nor is there necessarily such denial or infringement of the obligation of contracts in the imposition upon them in particular instances of the entire expense of the performance of acts required, in the public interest, in the exercise of legislative discretion; nor are they thereby deprived of property without due process of law, by statutes under which the result is ascertained in a mode suited to the nature of the case, and not merely arbitrary and capricious."

In *Chicago and Alton R. Co. v. Tranberger*, 238 U. S. 67, this Court sustained a statute of Missouri compelling railway companies to construct transverse openings in rights of way and roadbeds to take care of surface water.

Mr. Justice Pitney, delivering the opinion of this Court, said:

"We deem it very clear that the act under consideration is a legitimate exercise of the police power, and not in any proper sense a taking of the property of plaintiff-in-error. The case is not at all analogous to those which have held that the taking of a right of way across one's land for a drainage ditch, where no water course exists, is a taking of property within the meaning of the Constitution. The present regulation is for the prevention of damage attributable to the railroad embankment itself, and amounts merely to an application of the maxim *sic utere tuo ut alienum non laedas*. Of course, compliance with it involves the expenditure of money, but so does compliance with regulations requiring a railroad company to keep its roadbed and right of way free from combustible matters; to provide its locomotive engines with spark arresters; to fence its tracks; to provide cattle guards and gates at crossings, or bridges or viaducts, or the like. Such regulations as these are closely analogous in principle, and have been many times sustained as constitutional." Cases cited.

"And it is well settled that the enforcement of uncompensated obedience to a legitimate regulation established under the police power is not a taking of property without compensation, or without due process of law, in the sense of the 14th Amendment." Cases cited.

In *Missouri P. R. Co. v. Kansas*, 216 U. S. 262, where this Court affirmed a judgment ordering a peremptory mandamus to compel a railroad company to obey an order of the State Railroad Commission, requiring passenger train service between the terminus of a branch line within the state and its point of intersection with

the state line. Mr. Justice White, reading the opinion of the Court, said:

"Where a duty which a corporation is obliged to render is a necessary consequence of the acceptance and continued enjoyment of its corporate rights, those rights not having been surrendered by the corporation, other considerations are, in the nature of things, paramount, since it cannot be said that an order compelling the performance of such a duty at a pecuniary loss is unreasonable. To conclude to the contrary would be but to declare that a corporate charter was purely unilateral; that it was binding in favor of the corporation as to all rights conferred upon it, and was devoid of obligation as to duties imposed, even although such duties were the absolute correlative of the rights conferred."

In *Sullivan v. City of Shreveport*, 251 U. S. 169.

"This court held that the enforcement of a city ordinance requiring each street car to be operated by a motorman and a conductor, as against a company seeking to substitute, *at less cost*, cars run each by one man, with the aid of safety and other operating devices, cannot be declared an arbitrary and unreasonable exercise of police power in the absence of a clear demonstration that the substitutes, thus operated, would prove as safe and convenient for the public as cars operated by two men."

In *Milwaukee E. R. & L. Co. v. Wisconsin*, 40 Sup. Ct. Rep. 306, Mr. Justice Brandeis, delivering the opinion of this Court, said:

"The financial condition of a public service corporation is a fact properly to be considered when determining the reasonableness of an order directing an unremunerative extension of facilities or forbidding their abandonment. *Mississippi Railroad Commission v. Mobile & Ohio R. R. Co.*, 224

U. S. 388, 37 Sup. Ct. 602 L. Ed. 1216; *New York & Queens Gas Co. v. McCall*, 245 U. S. 345, 350, 38 Sup. Ct. 122, 62 L. Ed. 337. But there is no warrant in law for the contention that merely because its business fails to earn full 6 per cent upon the value of the property used, the company can escape either obligations voluntarily assumed or burdens imposed in the ordinary exercise of the police power. Compare *Missouri Pacific Railway Co. v. Kansas*, 216 U. S. 262, 279, 30 Sup. Ct. 330, 54 L. Ed. 472; *Chicago, Rock Island & Pacific Railway v. Arkansas*, 219 U. S. 453, 31 Sup. Ct. 275, 55 L. Ed. 290; *Missouri Pacific Railway v. Omaha*, 235 U. S. 121, 35 Sup. Ct. 82, 59 L. Ed. 157.

See also *Atlantic Coast Line R. R. v. North Carolina Railroad Comm.*, 206 U. S. 1.

Since the record makes it clear that no method other than that adopted by the order would be effective in the separation of the grades at the crossings to which the order relates, the case of *Chicago, M. & St. P. Railroad Co. v. Minneapolis*, 238 Fed. Rep. 384, is not pertinent. In that case it appeared among other things (page 403) that the plan adopted requiring *depression* would cost approximately seven millions of dollars, as compared with less than two millions of dollars under an equally effective *elevation* plan. In that case, therefore, there was, in this fact alone, justification for the conclusion that the power of the state was capriciously and wantonly exerted.

(e) No element of caprice or wantonness is involved in a case such as this in refusing to permit the claimed necessities of a railroad company for the use of its funds for other purposes which, in the judgment of its Board of Directors, will prove more advantageous to the company, to limit the exertion of the police power in the interest of public safety. The substance of the

claim of the company is that the judgment of its Board of Directors as to the most advantageous employment of its funds, transcends, in effect, and nullifies the judgment of the legislature of the state and the judgment of an administrative body created by it and the affirmatory judgments of its Courts, including its court of last resort, as to what is reasonably required in the interest of public safety.

That this is the position taken by the company is apparent from the brief here submitted on its behalf (pp. 32, etc.). This was also the position taken by the company before the board, as appears from testimony of the witness Falconer:

“Q In your judgment, if the railroad company was required at this time to spend three millions or more for the elimination of grade crossings in Paterson, would its ability to handle the improvement, its duty with regard to interstate business be impaired?

“A In my opinion it would. In my opinion that three million, or whatever it is, should be expended in making some improvement that would enable the railroad to earn a greater income and it might thereby be enabled to set aside sums to carry out work which is not non-income producing. The elimination of grade crossings in Paterson or any other city produces no income, adequate, when compared to the expenditure. The saving in expenses is a very small fraction of one per cent. of the cost of the elimination, as a rule, and it will be so in Paterson. In other words, if the Paterson elimination is undertaken, the company will be burdened by fixed charges equal to the interest on the cost of construction and will save practically nothing in operating expenses, whereas, if this same amount of money is expended at a point where operating expenses are reduced, such as

grade reduction or additional tracks where they are necessary, the saving in operating expenses will help to pay for such improvement at a later time. The credit of the company is impaired by expenditures which do not improve, which do not increase its revenue. The credit of the company is improved by expenditures which do increase its revenue and the company, as I see it, cannot make expenditures of such magnitude as the Paterson grade crossing elimination without borrowing money."

Further than this, the Board of Public Utility Commissioners had before it all of the testimony bearing upon the financial condition of the company and the work that it had in contemplation, and upon this testimony conclude as follows (Case, Vol. IV, p. 1756):

"In considering this matter the board has been mindful of the claim of the Erie Railroad Company that it is not now financially able to make the expenditure necessary to do the work. The testimony discloses that the company contemplates spending larger sums than would be required for this purpose, in doing work that, in the judgment of the board, is not so immediately necessary. It seems to the board that some of the money intended to be used for other purposes might more appropriately be used in this work, should it be found necessary to divert it. Nor does the testimony satisfy us that the company will not be able to secure the necessary funds."

In the opinion of the Supreme Court in the case below, *Erie Railroad Company v. the defendants-in-error here* (Case, Vol. V, pp. 2257, 2279), the Court, directing its attention to this point, said:

"It is further urged that, if the Court should hold the statute valid, still the order in the present case should be set aside for the reason that it is

insisted the evidence shows, without dispute, that the prosecutor has not, and in all reasonable probability will not have sufficient funds for the purpose of meeting the cost of complying with the order. The determination of this question is one of fact, in the first instance, devolving upon the Board of Public Utility Commissioners. The board had before it the financial history of the Erie Railroad Company, its indebtedness, its income and many other details bearing upon the finances of the company, and from this evidence the board found adversely to the prosecutor, the Erie Railroad Company. *After a careful reading of the voluminous testimony on this point, we are unable to say that the board's determination is without sufficient facts to support its conclusion.* The prosecutor has eight years in which to comply with the order of the board and do the work. Where the work is in itself a reasonable, proper and fair exaction with reference to the object to be attained, the expense is not a reason against its legality (cases cited), the order being based upon and made in an exercise of the police power, which is a part of the reserved power of the state."

(f) Neither the statute nor the order is capricious and wanton in its distribution of cost. As before shown, it was within the legislative power to impose the entire cost upon the railroad company, or the entire cost of the work at the crossings used by the street railway company upon that company. Neither of these companies are, therefore, in a position to complain on the ground that less than the entire cost was imposed upon it, or, on the other hand, of the fact that part of the cost was imposed upon the municipality and part upon other public utilities using the public highways.

In *C., B. & Q. R. R. Co. v. Nebraska*, 170 U. S. 57, this Court held that it was competent for the legislature of a

state to put the burden of the repairs of a viaduct crossing several railroads upon one of the companies, or to apportion it among all, as it saw fit; and that such apportionment might be made through the instrumentality of the City Council.

Mr. Justice Shiras, delivering the opinion of the Court (76), said:

"Again, it is said that the apportionment made by the ordinance of the expense of the repairs, one-third to the plaintiff-in-error and two-thirds to the Union Pacific Railway Company, was arbitrary, without notice, and contrary to plain principles of justice and equality.

"But if, as we have seen, it would have been competent for the legislature to have put the burden of these repairs upon one of the parties, or to have apportioned them among the parties, as it saw fit, so it may make a due apportionment through the instrumentality of the City Council. The latter was not directed to proceed judicially, but to exercise a legally delegated procession."

The statute provided that not exceeding ten per cent. of the expense directly chargeable to the crossing used by the street railway company should be paid by such company. The order of the board in imposing upon the street railway company the requirement of the maximum payment of ten per cent. was not capricious or wanton, for it was based upon specific testimony as to the comparative use of the crossings by the railroad and by the street railway, and also upon the fact that through the separation of the grades the street railway company would be relieved of the burden of contributing to the expense of the protection of the said crossing which it assumed by agreement with the railroad company. (See Case, Vol. IV, pp. 2034, 2039.)

The imposition by the statute and the order upon the remaining utility companies employing the highway of the expense of changing and removing their property or constructions in neither capricious nor wanton but in accordance with a rule of law well settled, as we have heretofore shown. The imposition upon the municipality of the expense of removing, relaying and relocating its water and sewer pipes, and the expense of paving, curbing, and flagging the highway as the result of the change of grade has a rational basis. It is not wanton or capricious. It requires the municipality to care for the municipal property in the public highways and to discharge the municipal function of paving, curbing, and flagging the highways. If the statute and order, because of the distribution of expense effected thereby, are wanton and capricious, then the several statutes summarized on page 305 of the brief of the plaintiff-in-error, Erie Railroad Company, are subject to attack upon like grounds, for they either provide for a distribution of the expense by the action of a commission or prescribe an apportionment thereof, fixing the proportion to be met by the railroad company, street railway company and municipality and state in greatly *varying* percentages.

It therefore appears that the statute and the order exert the police power of the state necessarily, reasonably and appropriately, and not in caprice and wantonness; and it follows that neither the statute nor the order violates the due process clause, the contract clause or the commerce clause of the Constitution.

POINT XX.

The order does not violate the due process clause because of the action of the Board on the Erie Railroad Company's petition for rehearing.

The proceedings before the Board were initiated by the filing of a petition on September 11, 1913. An answer to the petition was filed by the Erie Railroad Company, the plaintiff-in-error (case, vol. IV, 1664, 1774). The first hearing was held on September 17, 1913. Sixteen hearings were thereafter held, the last on November 4, 1914, when all of the parties to the proceeding rested their case. The hearings therefore covered a period exceeding one year. The Board filed a report containing its conclusions on January 11, 1915, determining the crossings to be severally dangerous to public safety and to impede public travel thereover and requiring the separation of the grades thereat. This report left open only one question, viz.: the time within which work should be commenced and completed. To secure the views of the parties interested the Board fixed February 5, 1916, to hear the parties affected on the question of the "times to be provided in the order within which the work included in each section, and in its entirety, was to be commenced and completed." On that day testimony on this point was taken. The Erie Railroad Company, then filed a petition for further hearing, which appears in case, volume IV, page 1772. In connection with its presentation counsel of the company was given an opportunity to discuss its merits. On April 20, 1915, the Board denied the prayer of the petition for further hearing (case, vol. IV, p. 1793), and in so doing, among other things, said (1794):

"This proceeding was pending for a number of months, during which time ample opportunity was

afforded to all parties interested to present fully and completely all the testimony desired to be submitted. Testimony was in fact submitted touching all questions, except that arising from the suggestion to reduce train movements, and the Board had before it and considered such proofs in arriving at the conclusion. Since the filing of the petition for further hearing the Board has given further consideration to the testimony taken, and the suggestions contained in the petition of the railroad company.

"The Board concludes that as the petitioner had ample opportunity to submit all and any material evidence, and the Board had before it and actually considered the questions raised, that the prayer for an opportunity to submit further testimony on such questions should be denied.

"As to the reduction of train movements, the company was afforded every opportunity to furnish such proof, if it had any, and did not avail itself of such opportunity. In addition, the offer on this score was so indefinite that it does not appear reasonable to delay the proceedings for the purpose."

This denial of further hearing was not arbitrary. It was made in reasonable discretion and was fully warranted by the facts to which the board calls attention as above.

On April 20, 1915, after the denial of further hearing, the order now before the Court was made. It provided that the beginning of the work of construction might be deferred until August 1st, 1916, in accordance with the suggestion of the company. It granted eight years from the date of the order for the completion of the work required, this was also in accordance with the suggestion of the company. It further divided the execution of the work into sections requiring "Section A" to be first con-

structed. This was likewise in accordance with the suggestion of the company.

On June 15, 1915, two months after the order was made and nearly two years after the proceedings were initiated the company filed a petition for rehearing. On June 16, 1915, the company sued out a writ of certiorari to review the order of April 20, 1915. On June 28, 1915, testimony on this petition for rehearing was heard by the board. (Case, vol. IV, p. 1895, 1918). At this hearing the company called but one witness, I. B. Lincoln, who was in charge of operation and had no control over construction. (Case, vol. IV, 1893.)

He had little familiarity with what was contemplated by the company with respect to diversion of trains appears from his examination. He testified (case, vol IV, p. 1896) that of the 118 passenger trains then running through Paterson over the Erie Railroad, 61 would not under the plan in mind run west of the Broadway station on the Susquehanna Railroad. This was a matter of importance. He later admitted under cross examination (case, vol. IV, 1911) that he was in error in this statement. That he did not know how existing train movements contemplated to be changed is apparent. He said (case, vol. IV, p. 1900):

"I am not prepared to answer any detail question, on the adjustment of that timetable, because as I say, it is a matter that will have to be very carefully studied. It has been gone over in a preliminary way, but I don't consider we have exhausted the subject at all, or made *any reasonable, any practical* determination of what we could do there."

No engineer was produced as a witness, nor was any working plan or profile offered. The witness, Lincoln, admitted that neither detail surveys had been made, nor

had detail plans been prepared. (Case, vol. IV, 1893.) He further stated that *preliminary profiles* had *none* been prepared and that the matter had not been gone into in sufficient detail to admit of the submitting of a preliminary plan; that it would not be practicable to "submit it" (the preliminary plan) "as a working drawing." Nothing was offered to show that it would be practicable to work out the plan along the lines generally suggested. The only statement made in this connection by this witness, who was in charge of operation and not construction, was to the effect that he would say it is practicable to get such construction in there" and again "based on the best judgment of the men, the engineers, whom we have had go into the matter again, I believe it is practical." (Case, vol. IV, 1895.)

The purpose of this hearing was specifically stated by the board to the company as follows (case, vol. IV, 1900):

"You are now asked to support your plan sufficiently to appeal to the discretion of this board to give you a rehearing."

At the close of the testimony of the single witness produced, an opportunity to supplement such testimony was offered by the board to the company. The following colloquy occurred (case, vol. IV, 1916):

Commissioner Donges: "Then you don't care to supplement your proofs?"

Mr. Taylor: "Not unless the board wants it."

Commissioner Donges: "It is a matter for your judgment, Mr. Taylor."

The company did not avail itself of the offer to supplement its proofs and the matter was taken into conference.

On July 9, 1915, the board made its report upon the petition for rehearing, and said (case, vol. IV, 1919):

"Application is made by Erie Railroad Company for a rehearing of the proceeding, which resulted in an order of the Board, dated April 20, 1915, approving plans for the separation of the grade of certain public highways, in the City of Paterson, and the tracks of the Erie Railroad, for the purpose of considering a plan suggested in said application for rehearing, in lieu of the plans approved by the Board.

"The Board has carefully considered the petition, the exhibits attached thereto, and the testimony, exhibits and reasons submitted in connection therewith, and concludes that the application should be denied."

We submit that on this record the action of the board in denying the petition for rehearing was not arbitrary but was made in reasonable discretion.

In this connection it should be noted that at best, the general and indefinite proposal of the company contemplated in the main, the decreasing of one of the elements of danger at one set of crossings and seriously increasing this element at another set of grade crossings, and that in one instance at least, it contemplated the creation of a new crossing at grade (case, vol. IV, 1963). It should further be noted that the general and indefinite plan proposed by the company requires the consent of the New York, Susquehanna and Western Railroad Company; that this company was not a party to the proceeding; that it did not appear therein and that consequently the Board had no jurisdiction over it.

Certain arguments advanced by the plaintiffs-in-error not hereinbefore fully answered remain to be met.

We bring these arguments and the answers thereto together under a single point.

POINT XXI.

Collective point in refutation of remaining arguments of plaintiffs-in-error.

(a) Under the law of New Jersey, the exercise of the power of eminent domain in the construction of a new highway over a railroad requires that compensation be made for injury occasioned by necessary structural changes.

It does not follow that an exercise of the police power of the state is limited by a requirement that compensation be made for such changes when exerted in the interest of public safety.

It is conceded that the Court of last resort of the State of New Jersey in *Morris & Essex Railroad Company v. Orange*, 63 N. J. L. 252, held that in a proceeding in which the power of eminent domain was exerted in the laying out of a public highway over a railroad, the award of damages must include compensation for an injury occasioned by necessary structural changes in the railroad, such as the removal of buildings and changes in the tracks.

It is also conceded that the rule so declared has since been adhered to.

Paterson &c. Railroad Co. v. Nutley, 72 N. J. L. 123;

Freeholders v. New York Bay Railroad Co., 84 N. J. L. 354.

In such circumstances the necessity of making the structural changes is due solely to the compulsory subjection of the railroad to an easement of public way there-over through an exercise of the power of eminent do-

main, and not to interests of public safety and an exertion of the police power in furtherance thereof.

This distinction was recognized in *Morris & Essex Railroad v. Orange*, for the Court there held that the company was not entitled to allowance of the expense incident to the erection and maintenance of gates, sign-boards, cattle guards and the like, including the salary of a flagman, nor for the cost of planking between the rails, and the cost of maintaining it, since such expenditures are required either for the protection of the company in running its trains or of the public using the street at such crossing, and therefore expenditures incident to a compliance with police regulations.

This distinction was also recognized in *St. Louis & S. F. A. Co. v. City of Fayetteville*, 75 Ark. 534; 87 S. W. 1174, where it was held in a proceeding in eminent domain that the fact that the railroad company might later be compelled to build an overhead crossing was not an element of damage.

It is submitted therefor that though under the law of the state the exercise of the power of eminent domain in laying out a new highway over a railroad requires that compensation be made for injury occasioned by necessary structural changes, it does not follow that an exercise of the police power by the State is limited by a requirement that compensation be made for such structural changes when such power is exerted in the interest of public safety.

Atlantic Coast Line R. Co. v. Goldboro, 232 U. S. 547.

(b) The Erie Railroad Company, plaintiff-in-error, insists that the common law duty and the duty imposed by the provisions of the charter of its lessor companies relating to crossings, extends only to highways existing at the time the railroads were constructed, and that this is the settled law of the state.

We have hereinbefore considered this claim and demonstrated its fallacy.

On the basis of this insistent it is argued that the Grade Crossing Elimination Act and the order made thereunder, which extend alike to highways existing when the railroads were constructed and to highways later laid out thereover, violate the contract clause of the Constitution and impair the obligation of the contracts existing between the state and the companies, contained in the acts of incorporation and the act confirming the lease, and further violate the due process clause of the Constitution.

If, for the purpose of argument it be conceded that the duty imposed by the common law, and by the acts of incorporation, was confined to highways existing when the railroads were constructed, it by no means follows that a statute, and an administrative order made thereunder, extending the duty to highways laid out after the construction of the railroads, has the effect claimed.

It suffices to answer the claim to again point out that the statute and order exert the police power of the state in the interest of public safety; that in the exertion of this power, the state is not required to confine its mandate to highways existing when the railroads were constructed; that the State cannot by contract abdicate or limit the future exertion of this power and that consequently the contracts existing between the state and the companies respectively, and the rights acquired there-

under, are subject to the exercise of the power to its full extent, even though such contracts have been construed by the courts of the State as claimed by the companies.

(c) There is a fundamental distinction between the police power exerted in regulation of rates exacted in the conduct of enterprises affected with a public interest and the police power exerted in the interest of public safety.

The first is founded upon the power of the state to protect its people against oppression, through the exaction of unjust and unreasonable rates for *quasi* public services. The latter is founded upon the power of the state to protect the person and property of its people against conditions of danger.

The first is limited by the requirement that it be not exerted so as to deny a fair opportunity to earn a fair return upon the fair value of the property devoted to the public use. The inherent nature of the latter inhibits a like limitation upon its exercise.

Atlantic Coast Line R. Co. v. North Carolina Corp. Commrs., 206 U. S. 1, 26;

Missouri Pac. R. Co. v. Kansas ex rel. Taylor, 216 U. S. 262, 278.

The state may surrender and limit the future exercise of the former by contract at least for a reasonable period of time.

Detroit v. Detroit Citizens Ry. Co., 184 U. S. 368, 382;

Home Tel. & Tel. Co. v. Los Angeles, 211 U. S. 265.

The state, as we have fully demonstrated, may not so surrender or limit the future exercise of the latter.

It is submitted that the cases freely cited and quoted in the brief submitted by the plaintiff-in-error, Erie Railroad Company, relating to the power to regulate rates have no relevancy on the issues here before the Court where an exercise of the police power of the state in the interest of public safety is involved.

(d) It has been difficult for us to comprehend the arguments advanced on behalf of the Erie Railroad Company, plaintiff-in-error, on the basis of the claimed course of adjudication and legislation in the state, with reference to which the brief submitted by it is replete.

Apparently it proceeds upon the theory that the rules relating to the duties of railroad companies whose roads are crossed by public highways, as claimed to have been declared by adjudication and legislation in the state, from time to time, before the enactment of the Grade Crossing Elimination Act, have, by some process, become part of the contracts earlier entered into between the State and the companies respectively; and that the companies respectively have contract and vested rights to have these claimed rules of law continue unaltered by subsequent adjudication or legislation, and that these rights are protected by the contract and due process clauses of the Constitution.

The following cases make it clear that argument proceeding upon such a theory has no foundation upon which to rest.

Northern Pac. R. Co. v. Puget Sound &c. R. Co.,
250 U. S. 232;

Chicago & A. R. Co. v. Tranbarger, 238 U. S. 67;
Milwaukee El. R. & L. Co. v. Wisconsin, 40 Sup.
Ct. Rep. 306.

e. The statute provides that where a street railway crosses the railroad, "the board may order not exceeding ten per centum of such expense directly chargeable to the crossing * * * to be paid by the company operating such street railway."

It is argued that this provision violates the due process clause in that it vests arbitrary power in the board, to impose either the maximum of ten per cent. or a lesser proportion of the expense, and prescribes no rule to govern the board in determining whether the maximum or a lesser percentage shall be imposed.

It is submitted in answer that the statute is complete in itself as a law, in that it prescribes the maximum of the imposition to be made; that the factors to be ascertained and considered, in determining whether a lesser percentage shall be imposed in particular cases may be complex and varying; that they cannot be known to, much less defined by, the legislature; that they can only be intelligently ascertained and acted upon in specific cases, through the agency of an administrative commission and that no provision of the Federal Constitution is violated, by the legislative assignment of such task to an administrative commission.

It is further submitted that all of the powers of the powers of the board are, as construed by the courts of the State, limited by the requirement of reasonableness; and that the exercise of its powers is subject, under such act, to judicial review. Consequently no arbitrary power

is, by the provision of the Grade Crossing Elimination Act, now considered vested in the board.

Western Union Tel. Co. v. Richmond, 224 U. S. p. 160.

(f) The findings (a) that conditions of peculiar damage and serious impediment to travel exist at each of the crossings; (b) that the relation of the crossings to each other is such that the situation at one of them cannot be met without providing for the others; a single engineering problem is presented thereby; (c) that the degree of danger and impediment to travel is such as to require elimination; and (d) that it is not without the financial ability of the company to meet the requirements of the order, are, each, findings of fact.

These findings of fact (each supported by the evidence) made by the board and confirmed by the Supreme Court of the State, and by its court of last resort, are conclusive.

Interstate Amusement Company v. Albert, 239 U. S. 560.

(g) The contention of the plaintiff-in-error, Western Union Telegraph Company, that its acceptance of the provisions of the act of Congress of July 24, 1866 (14 Stat. at l. 221, chap. 230, Rev. Stat. secs. 5263 *et seq.*, U. S. Comp. Stat. 1901, p. 3579) removes it and its property from the operation of the police power of the state, though such power is exerted in the interest of public safety, was considered and denied by this Court in *Western Union Telegraph Co. v. Richmond*, 224 U. S. 160.

Conclusion.

It is submitted that the arguments of the plaintiffs-in-error, throughout, overlook the fact that it is a settled principle of constitutional law that the government (here the state) which has the right to do an act, and has imposed upon it the duty of performing that act, must, according to the dictates of reason, be allowed to select the means; and that those who contend that it may not select any appropriate means, that one particular mode of effecting the object is excepted, take upon themselves the burden of establishing that exception.

This burden the plaintiffs-in-error have not met.

It likewise overlooks the fact that the test of the power of the state is not the judgment of the courts that particular means are not the best that could have been employed to effect the end contemplated by the legislative department of the government; that the judiciary can only inquire whether the means devised in the execution of a power granted is forbidden by the Constitution, and that it cannot go beyond such inquiry without trenching upon the domain of the legislative department of the government.

It loses sight of the fact that the Constitution provides a preventive and cure for the extreme case, which is vividly pictured, of the possible adoption of legislation, by each of the states, on the lines of that now before the Court, and coincident state administrative action, under such statutes, producing conflict and chaos and imposing collectively burdens impossible to be borne, for it always remains for Congress under the power to regulate interstate commerce by affirmative action to displace the local laws, substitute laws of its own, and thereby obviate the possibility of the imagined conflict and chaos.

It is finally respectfully submitted that neither the statute nor the order violates the Constitution in any respect and that the several judgments below should be affirmed.

Board of Public Utility Commissioners

Newark, N. J., Friday, October 17, 1913.

PATERSON GRADE CROSSING ELIMINATION— } 10
ERIE RAILROAD COMPANY, *et al.*

Before Commissioners Donges, Hillery and Daniels.

F. H. Sommer, Esq., Counsel.

J. Maybury, Jr., Esq., Railroad Inspector.

For the City of Paterson appears E. F. Merrey, Esq.

For Erie Railroad Company appears H. A. Taylor, Esq. 20

Mr. Taylor. I would like leave to file an answer but not at this time. Messrs. Collins and Corbin represent us in this proceeding but unfortunately Mr. Hobart is engaged in court. I have come here not prepared to file an answer but will do so at a future date. I would like permission to do that.

Commissioner Donges. That permission will be granted.

Mr. Merrey. You will file an answer for the Paterson & Hudson River Railroad Company and the Paterson and Ramapo Railroad Company? 30

Mr. Taylor. We do not represent those companies.

Mr. Merrey. They are served.

Mr. Taylor. Perhaps they have; I do not represent them.

Mr. Merrey. You will find on page 37 a list of the various corporations. They are arranged in groups.

Commissioner Donges. Notices have been given to all parties in interest. Does any one represent the Public Service Railway Company, Public Service Gas 40

Opening.

Company, Public Service Electric Company, Passaic Water Company?

(No response.)

For New York Telephone Company appears P. H. Burns, Esq.

Commissioner Donges. Is the Paterson, Passaic & Suburban Telephone Company represented?

10 (No response.)

Commissioner Donges. Are there any other persons represented? Is the Paterson & Hudson River Railroad and the Paterson & Ramapo Railroad Company represented?

Mr. Taylor. I do not represent them. I know some gentlemen spoke to me before the meeting about wanting to be heard who haven't as yet appeared. I think they are still here.

20 *Commissioner Donges.* You may proceed with any testimony, Mr. Merrey.

Mr. Merrey. I was going to say, we have quite a lengthy petition here setting forth the question. I presume the practice would have been to have the railroad company answer. They would answer and admit some of the facts and it would seem unnecessary to prove them. The situation is now we will have to go ahead with our proof, which may take a great deal of time and is not necessary.

30 *Commissioner Donges.* Perhaps Mr. Taylor will stipulate some of the allegations in the petition.

Mr. Taylor. We can see about that as we go along. I don't propose that they take up time with unnecessary proofs.

Mr. Merrey. It is set forth in paragraph 1 that the Board of Finance of the City of Paterson is the body having charge of the finances and its petition seems necessary, and the action of the board is attached to the petition in certified form. Can you admit paragraphs 1 and 2 are true?

40 *Mr. Taylor.* I admit this is the petition of the Board of Finance of the City of Paterson in accord-

Opening.

ance with the application attached to the petition. The question of the jurisdiction of the Board of Finance is governed by the statute and the statute speaks for itself. I don't understand you have to prove that.

Mr. Merrey. I want to prove that this action—

Commissioner Donges. What Mr. Merrey wants, as I take it, is an admission the Board of Finance is the financial body of the City of Paterson. 10

Mr. Taylor. I think Mr. Merrey filed a certified copy.

Mr. Merrey. It is.

Mr. Taylor. You filed a certified copy, I don't ask that you bring the clerk.

Mr. Merrey. Too?

Commissioner Donges. It is admitted the Board of Finance is the financial body of the City of Paterson. 20

Mr. Taylor. The statute governs that.

Commissioner Donges. The statute says the petition must be filed by that body.

Mr. Taylor. The statute shows that body. Whether the action was taken by that body or not, as Mr. Merrey has filed a certified copy of the action—

Mr. Merrey. It is admitted the Board has taken the action specified in paragraph 2, that is all we ask. Paragraph 3; will you admit the facts set forth there, "the Erie Railroad Company operates a railroad running through the City of Paterson," and so on? That seems so plain. 30

Mr. Taylor. Yes, I believe that is the fact.

Commissioner Donges. Paragraph 3 is admitted.

Mr. Merrey. Paragraph 4 says that the crossings are dangerous to public safety.

Mr. Taylor. I don't think I better admit anything in paragraph 4.

Mr. Merrey. Paragraph 5 is a matter really within the knowledge of the railroad company more than ours; it operates under a lease— 40

Opening.

Mr. Taylor. If you are prepared to take up the proof in the order of these paragraphs I imagine you better go ahead with the first four. I am quite willing to answer now, to go categorically through the petition and admit or deny the paragraphs we can't agree on. That is enough to furnish you with a basis of proof for some time.

10 *Mr. Merrey.* The fifth, you don't know about that.

Mr. Taylor. That fifth is correct, except the lease runs to the Union Railroad Company in the first place and by various conveyances vests finally in the Erie Railroad.

Commissioner Donga. So the Erie Railroad Company is operating these.

Mr. Taylor. The Erie Railroad is operating them.

20 *Mr. Merrey.* I am somewhat handicapped in that the railroad company has not filed an answer, because the details they are familiar with better be annexed by them rather than put in by our proof.

Mr. Taylor. There is no difficulty about that.

Mr. Merrey. The sixth is along the same line. I may say here, that the line between the Paterson and Ramapo Railroad and the Paterson and Hudson River Railroad is at Market street.

30 *Mr. Taylor.* Paragraph 6 is not precisely correct. I am not in a position to say just what it is. It is not exactly correct. That may be a point of importance in this case.

Commissioner Donga. How soon will you be prepared to file an answer?

Mr. Taylor. I think in a short time, only a matter of a few days.

40 *Mr. Merrey.* That is a matter that is not covered, I will expect the commission to direct the company to answer on those things which they only know. My information on that came from the case of paving of Market street and the book put in showed the point at just about that point.

Opening.

Mr. Taylor. The Hudson Company does own some property in the vicinity; I don't think it extends as far as recited.

Mr. Merrey. Number 7 would be the same thing.

Mr. Taylor. I might just as well answer this petition as go through in this manner. I haven't the answer prepared, and will go on with it later. I think I have furnished enough to start.

Commissioner Donges. It is somewhat embarrassing in view of the fact that the answer has not been filed, to know what facts are to be proven and what facts to take as admitted.

Mr. Taylor. I think we will have to insist that the city make full presentation of the physical situation.

Commissioner Donges. I think, Mr. Merrey, perhaps time will be saved by taking up the question of the physical situation and then we will see what there is to prove.

Mr. Merrey. We are about at that point now. We are just about reaching that point. These other questions are ones we need information on.

Mr. Taylor. You raised that point in paragraph number 4.

Mr. Merrey. We passed over that. We practically have covered it all now.

Mr. Taylor. At that point, if Mr. Merrey is prepared to proceed with testimony as to the physical situation, I think we should be furnished by the city, under the rules of the commission, with much more complete maps than are furnished here. We have no data of our own from which we can prepare that information; either the city will have to prepare it or we will have to. It seems to me the city should prepare it. Without attempting to make a complete statement, I will say the maps are deficient; they don't show the property owners affected; they don't show all the railroad tracks; they don't show our yard; they don't show the side tracks, they don't show

10

20

30

40

Opening.

any profile, except as they might make a rough profile from certain information on the map. It seems to me in that respect they don't comply with paragraph C of rule 9 which the board fixed in respect to filing petitions.

10 "The petition shall have attached thereto a map, plan or drawing of the area that may possible be affected by an order which may be made granting the relief sought, upon which shall be located the railroad" (I presume that means all the railroad tracks), "the crossing or crossings, to which the petition relates, and also all other crossings within such area; the municipal water or sewer pipes, or other municipal pipes, conduits or subways, the street railways, and any property or construction of any telegraph, telephone, gas, electric, lighting, power, water, oil, pipe line, or
20 other public utility located within the limits of such crossing and within such area."

Commissioner Donges. If it appeared, Mr. Taylor, that the maps filed are not in accordance with the rule the petitioners will be required to furnish whatever maps are needed.

Mr. Merrey. Of course, the rule requires us to furnish a map showing all the property that is to be affected. Our request is that the tracks be depressed; under those circumstances, if that order be made
30 there will be very little property injured. If the order be that the grade of the street be changed we will need a much more detailed plan. We can't see the possibility of such an order. We haven't gone in and made a detailed map of what is possible under an extreme plan would cause the change in the adjoining property line; we haven't done that. We haven't gone to the fullest extent an order of this commission might cover. We admit that. We can't imagine of any view of the case that the commission would make an order
40 of that sort. If the tracks were ordered to be elevated

Opening.

then there would be property damaged and it might be more than any of these maps show. If that is the case we would furnish those details later.

Mr. Taylor. The City of Paterson asks that the tracks be depressed or in the alternative be raised; it doesn't ask any other relief. The point I have in mind particularly is there is approximately sixty side tracks in Paterson. I haven't made a detailed study of the situation, but from the nature of things, if our tracks were lowered through Paterson I don't see how a single one of these side tracks can be preserved. If the tracks are elevated which is the City of Paterson's alternative request, it would be a hard matter to preserve any of the tracks and very expensive to do so. It seems to me those parties are interested whose property is affected by an such change, and that the map should show what the present situation is with regard to the side tracks and such things so it may be before the commission as to what the effect of such work as this will be. 10 20

Commissioner Donges. If it appears the map is insufficient the petitioner may be required to furnish another map.

Mr. Merrey. The railroad company having this information by the nature of the business they are engaged in, are more familiar with it than we are and could in the answer give the information; say how many side tracks and so on would be affected by this change. 30

Mr. Taylor. We will give you a list of the side tracks in our answer, as far as that is concerned. My point is simply—

Commissioner Donges. I think, Mr. Taylor, that the board will order that the additional maps be furnished if it is found these maps are insufficient.

Mr. Merrey. This act is a new act; there has not been much practice on it. We are proceeding finding out what is wanted. That is the reason I am 40

Opening.

taking a little more time than I otherwise would do. It seems to me it results in this—if the board decides the change is to be made some plan must be adopted. The question is how is that plan to be prepared.

- 10 *Mr. Taylor.* It seems to me we are getting a long way ahead of the game in making that suggestion now. As to that I would simply say the cost of this elimination through Paterson would be so enormous that the Erie Railroad Company has never been in a position where it could even contemplate the expenditure of the amount of money necessary to do the work and we never have made any plans, that is any plans which would be in any sort of shape for submission to the commission if we had gotten to that point.

- 20 *Mr. Merrey.* I merely make that suggestion because we are going to travel the road and it would be a good idea to show the steps we are to pursue and the course to be preserved.

Commissioner Donges. The first question is whether or not the situation presents such hazards as to demand the elimination of the grade crossings.

Mr. Merrey. I will proceed now to prove the maps we have submitted.

For the Passaic Water Company appears Cuddebach, Esq.

For McNab & Harlin Mfg. Company appears Daniel O'Connor, President, having sidings in Paterson.

- 30 *Mr. Taylor.* I suppose, Mr. President, any other owner of side tracks whose interest is affected may come in.

Commissioner Donges. Yes, any person affected or interested may come in at any time; that is during the course of the hearing.

For R. J. Steel appears B. S. McKirk, Esq.

For John Agnew Company appears John Agnew, Esq.

- 40 For Herrmann Company appears E. E. Hassin, Esq.

John C. Veenstra, direct.

Q Have you those maps which are lettered from A, I believe to N, with you?

A Yes.

Q Are those blue prints of those maps?

A Those represent the blue prints of those maps.

Q Have you the map there of Madison avenue?

Mr. Taylor. Has this map (indicating) been offered? 10

Mr. Merrey. I will offer that in evidence.

Mr. Taylor. This isn't the same map as attached to the petition.

Mr. Merrey. It is.

Mr. Taylor. It covers more area than the one we have.

Mr. Merrey. I can't understand that.

Mr. Taylor. The map I have River street is on one side and Madison avenue on the other. Is this the same map except that it extends further? 20

Mr. Merrey. We will find out.

Q The key map which you annexed to the petition filed by the city in this case seems not to include as much territory as this map does.

A We first made a map showing Madison avenue to River street then we were instructed to go on to Gould avenue and to Hawthorne; then we made a second map.

Q How was the second made? 30

A It was traced from the other and then added on from River street to Hawthorne and from Madison avenue to Gould avenue.

Q Is there any difference in the body of the map now before us and the one annexed to the petition?

A No difference at all.

Q Except these additions were made.

A Simply extended.

Q Have you found the map of Madison avenue?

Commissioner Donges. You have another copy for the Erie? 40

John C. Veenstra, direct.

Mr. Merrey. We will furnish copies of these and the matter of the change or two in the new map in addition is probably not a matter of importance to the commission because there are no crossings which we refer to in our petition in the extended part of the map.

10 *Commissioner Donges.* But a copy of this map has been filed with the commission.

Mr. Merrey. Mr. Mead called on us and got a map and we have taken it from Mr. Mead.

Commissioner Donges. If there is no objection this map will be admitted.

(Same is marked Exhibit P-1.)

Q Mr. Veenstra, can you tell us how Madison avenue, marked A, is protected?

A By gates.

20 Q On this map, marked A, which I now offer the commission in evidence, are such gates shown?

A Yes.

Q They are indicated by the word "gate"?

A Exactly.

Q There is a bell at the crossing also?

A Yes, sir.

Q The position of the bell is indicated?

A Yes, sir.

30 Q By the word "bell." Can you tell us what obstructions there may be to the view of persons using Madison avenue at the crossing of the tracks of the Erie Railroad?

A In what respect.

Q Obstructions to the view of persons going by. What buildings or structures are there?

A There are telegraph poles along the line, then there is the American Locomotive Works.

Commissioner Donges. If there is no objection to this it will be admitted and marked.

40

(Same is marked Exhibit P-1A.)

John C. Veenstra, direct.

For J. Wilson & Son, Inc., appears J. Wilson, Jr., Esq.

For Meyer & DeVogel appears Jacob Meyer, Esq.

For Paterson, Passaic & Suburban Water Company appears R. E. Lindsey, Supt.

JOHN C. VEENSTRA, sworn on behalf of petitioner.

Direct examination by Mr. Merrey.

10

Q Where are you employed?

A Mr. Harder's office, City Engineer, Paterson.

Q How long have you been there?

A I have been with him for the last twelve or thirteen years.

Q Did you make a survey of the line of the Erie Railroad Company through the City of Paterson and also make certain maps showing that survey?

A Yes.

20

Q Have you copies of those maps here?

A I have them here.

Q The first is the key map.

A (Produces map.)

Q This map before you is a blue print; was that made from a tracing you made yourself?

A Yes, sir.

Q It is marked, "Map showing grade crossings of the Erie Railroad," and dated October, 1913, H. J. Harder, City Engineer. At what point does that map begin? 30

A Gould avenue, and she ends at Hawthorne.

Q Is Gould avenue near the line of South Paterson?

A Yes, near Crooks avenue.

Q Near the southerly line?

A Near the southerly line.

Q How far is Gould avenue from Crooks avenue?

A I should judge, maybe, 2,000 feet.

40

John C. Veenstra, direct.

Q Have you shown on this map the various streets of the City of Paterson close or near to the main line of the Erie Railroad?

A Yes, sir.

Q Was this map from a survey?

A Yes, made from a survey.

Q Who made the survey?

10 A I made the survey.

Q What is the scale of the map?

A The scale is 150 feet to the inch.

Q Is the map drawn true to the scale?

A Yes, sir.

Q I presume there is some little shrinkage due to the blue printing.

A Yes. with the wetting the blue print shrinks a little.

20 Q I notice on this map you have a number of letters marked on the line of the railroad company where certain streets cross them. What is that, do you know?

A That represents the different maps we have showing the different details, or as an index.

Q I notice that the letter A is on the crossing at Madison avenue.

A Exactly. That represents the cross map at Madison avenue.

30 Q You have a more detailed map of that crossing?

A Yes, sir.

Q How were those maps made, the detail maps?

A Those were made from actual survey.

Q By whom?

A By myself.

Q Drawn to scale?

A Drawn to scale, yes, sir.

Q And the blue print made from the original map?

40 A The tracing made from the original and the blue print made from those.

John C. Veenstra, direct.

Mr. Taylor. They might be telephone or telegraph wires.

Witness. I don't know.

Q There are how many wires?

A Twenty-seven.

Q How high?

A Twenty-five feet.

Q Above the rail?

10

A Above the ground underneath the wires. I should judge about the same at the railroad, the same elevation.

Commissioner Hillery. What other obstructions are there in the highway?

Q Are there any other obstructions?

A Only the tower that operates the gates?

Q Is that noted on the map?

A Yes, sir.

20

Q Do you know what the distance is to the nearest passenger station from this crossing?

A I haven't got it positively, no.

Q About. Can you tell us from the map.

A I could scale it.

Q What is the nearest passenger station?

A The nearest passenger station is South Paterson on the Newark branch.

Q On this railroad?

A It would be Market street.

30

Q No, it is Lakeview. Just scale it from Madison avenue to Lakeview station.

A I haven't got it.

Q You have told us how far off the map, you said it was about 2,000 feet away. Approximately how far away.

A About 2,000 feet.

Q How far is it to the main Paterson station on Market street from this crossing, from Madison avenue.

40

John C. Veenstra, direct.

A About 6,000 feet.

Q What is the nearest overhead or underground crossing; what is the next one?

A Essex street.

Q How far is that from this crossing?

A I should judge about a mile.

Q Just let us have it please.

A 4,500 feet.

10

Q Do the elevations which you have marked on the map show the grade of the highway in the vicinity of the railroad tracks?

A Yes, sir.

Q Is there any street railway using this crossing?

A Not at Madison avenue, no, sir.

Q Will you find the map B relating to Clay and Straight streets.

A (Produces map.)

20

Q Is this map made by you from actual survey?

A Yes.

Q What is the scale?

A One inch to sixteen feet.

Q This map shows two streets crossing the railroad.

A Straight street and Clay street crosses the railroad.

Q Are both crossings near together?

A Yes.

30

Q Give the distance between the center lines along the center line of the railroad.

A About 150 feet.

Q Tell us what obstructions there are to the view of persons passing along the street.

A Clay street we have a frame building and we have the tower.

Q Just tell us going along Clay street from the west toward the east what buildings we would find in the view to the south.

40

A South we have a frame building.

John C. Veenstra, direct.

Mr. Taylor. The American Locomotive Works is a brick building.

Mr. Merrey. Yes.

Q As you approach the Erie Railroad from the west going east, what buildings or structures are there that would interfere with your view of the railroad?

A The American Locomotive Works. 10

Q And that is to the south?

A To the south of Madison avenue.

Q And is indicated on your map by lines and the words "brick building"?

A Exactly.

Q Does that show the exact location of it?

A Yes, sir.

Q Are there any buildings to the north coming from the west?

A No, no buildings at all. 20

Q Coming from the east, are there any buildings?

A No buildings there.

Q Have you indicated on this map the elevations above the sea level?

A Yes.

Q Can you tell me what it is at the track?

A The elevation at the rail is 110.44.

Q What is the scale of map A?

A Sixteen feet equals one inch.

Q (*By Mr. Taylor.*) Are all these maps alike in that respect? 30

A Yes, sir.

Q (*By Mr. Merrey.*) Can you tell us some other elevations nearby on Madison avenue?

A Well, I have an elevation at the center of East Railway avenue and Madison avenue of 111.32. Then I have one on beyond I should judge I have taken that about 700 feet east, and that elevation is 114.59. Another elevation is at Getty avenue and Madison avenue, 139.32. 40

John C. Veenstra, direct.

Q These elevations are marked on the map in figures?

A Yes.

Q At the point they were taken?

A At the point exactly where taken.

Q Can you tell us what water pipe or gas pipe crosses this railroad under the rails?

10 A The pipe of the water company.

Q The Passaic Water Company?

A The Passaic Water Company. The Public Service has a six-inch pipe.

Q What size pipe is the water company's?

A Sixteen-inch pipe.

Q Do any wires cross at this point?

A Yes.

Commissioner Donges. What size gas pipe?

Witness. Six inch.

20 Q There are two gas pipes, one six inches and one sixteen inches?

A Yes.

Q Do any wires cross?

A Yes, sir.

Q Do you know what they are?

A There is electric wires, three electric wires cross.

30 Q Are there a number of wires running along the right of way which are evidently operated by the railroad company?

Mr. Taylor. I object to that. He can testify who operates them if he knows.

Mr. Merrey. He don't know.

Mr. Taylor. Can the engineer state whether they are telegraph wires or wires for the operation of signals.

Witness. The majority of them seem to be telephone wires.

40 *Mr. Taylor.* Telephone or telegraph?

Witness. They are about one-eighth of an inch in diameter.

John C. Veenstra, direct.

Q Do you know who occupies that building?

A No, I do not.

Q It is indicated on your map by a frame building?

A Exactly.

Q And to the north coming from the same direction along Clay street, what do you find?

A Find a tower of the Erie Railroad.

Q Coming from the east along Clay street what obstructions are there to the north? 10

A A brick building.

Q Is that indicated on the map?

A Yes, sir.

Q What obstructions are to the view?

A No obstructions on Straight street.

Q You mean on Clay street from the east and looking to the south.

A No, sir, no obstructions.

Q Coming south along Straight street what obstructions would there be on Straight street to the view to the south? 20

A No obstructions there.

Q What obstructions to the view of a train coming from the north while you were going south along Straight street?

A You have got that same brick building. That would be a hindrance.

Q People passing along Straight street to the north, what are the obstructions to the view of a person to the north? 30

A A frame building on the west side.

Q Is that shown on your map and marked?

A Yes, sir.

Q What is to the south or southeast?

A There is a stone structure, stone building rather.

Q What is that?

A I think that represents the office of the iron works. 40

John C. Vecenstra, direct.

Q The Passaic Iron Works?

A Yes.

Q Is that a large building?

A The building itself is about two stories high, brown stone.

Mr. Taylor. That is shown on the map?

Mr. Merrey. Yes.

10 Q Is there a curve at this point?

A There is partly a curve in the railroad, yes, sir.

Q Does that interfere with the view? Can you see it on the key map there?

A Answer, it does.

Q Are there any other obstructions to the view than those you have mentioned?

A Different poles.

Q Are they all indicated there?

20 A Yes.

Q Have you on this map indicated every building, pole or structure of any kind that might interfere with the view?

A Yes, sir.

Q The names are given, the character of the obstruction?

A Exactly.

Q Tell the distance to the nearest passenger station from these crossings.

30 A About three thousand feet to the Market street station.

Q What is the nearest overhead or underground crossing?

A Essex street.

Q How far is that from these crossings?

A About 1,200 feet—rather 1,800 feet.

Q Is there a street railway at this point crossing the tracks?

A No, sir.

40 Q There is, however, nearly, is there not; shown on Straight street?

John C. Vecastro, direct.

A Yes, sir.

Q Running north and south on Straight, then turning east and west on Clay street, but not crossing the railroad.

A Not crossing the railroad.

Q Tell us what pipe crossings there are.

A At Clay street we have a fifteen-inch pipe sewer and we have another forty inch.

Q That is a city sewer?

10

A Yes. We have a forty-inch brick sewer. We have the Passaic Water Company crossing with a twelve-inch pipe. That is all underground. On Straight street we have an eighteen-inch pipe sewer.

Q That is the city's?

A The city's. The Passaic Water Company has an eighteen-inch pipe and the Public Service Gas Company has a six-inch main.

Q What is there overhead?

20

A Overhead there is three wires crossing the railroad at Straight street, twenty-four feet high.

Q Running from a signal tower?

A Running from the tower, yes, sir.

Q Are there any other lines running across Straight street, wire lines?

A No other wires.

Q On Clay street what wires are overhead?

A Eight wires, forty-one feet high.

Q Which side?

30

A The north side.

Q What is there on the south side?

A Thirty-three wires, thirty-nine feet high.

Mr. Taylor. What lines are there at the crossing starting at the south side of Clay street marked twenty-four feet high; fifty-two wires?

Q You have on your map fifty-two wires, twenty-four feet high; what are they? Are they a continuance of the wires which cross Madison avenue?

40

A Yes, sir.

John C. Veenstra, direct.

Q Are the same character as those wires?

A Exactly.

Q And they run along the right of way?

A Parallel with the railroad.

Commissioner Donges. That map is offered?

Mr. Merrey. Yes.

Commissioner Donges. It will be marked.

10 (Same is marked Exhibit P-1B.)

Q Give us the grade of the highway. What is the elevation above sea level of Clay street on the rails?

A The elevation of Clay street is 95.57.

Q At Straight street?

A At Straight street 95.95.

Q At the west of the railroad on Clay street tell us the elevation.

A The elevation there is 99.02.

20 Q About what point is that?

A The first street west of the railroad.

Q Is the elevation marked?

A At the intersection.

Q At the point the elevation was taken?

A Yes.

Q What is the elevation at the intersection of Straight street and Clay street?

A 91.60.

30 Q And south of the railroad on Straight street have you an elevation?

A Yes, sir.

Q What is that?

A 97.03.

Q And how far from the center of the track is that taken?

A 240 feet, about.

Q I ask you to produce map annexed to the petition which is marked C, Cedar street crossing.

A (Produces map.)

John C. Veenstra, direct.

Q We find on the map, and to the north of Clay street, a street marked Taylor street; does that cross the right of way?

A It does not cross the right of way.

Q It is not open for travel?

A No.

Q So the next street north of Clay street is Cedar street?

10

A Cedar street.

Q Of which I ask you now, and is annexed to the petition?

A Yes.

Q And is from a survey made by you?

A Yes.

Q And the scale is the same?

A The scale is one inch equals sixteen feet.

Q How many tracks are there at Cedar street?

A Four main tracks and there seems to be four switches. 20

Q (*By Mr. Taylor.*) Five switches.

A Five switches, yes, Ramapo avenue.

Q (*By Mr. Merrey.*) How is it protected?

A By gates.

Q A single set or a double set?

A A double set, four gates.

Q Do you know whether a watchman is maintained on the ground?

A I couldn't tell you that.

30

Q This section is getting into the main yards of the railroad?

A Yes.

Q Can you tell us the obstructions to the view of the public passing along this street to trains?

A Passing up Cedar street on the west.

Q Coming from what direction?

A Coming from Straight street.

Q From the east?

A From the east going to the west, the northerly side there is a brick building. 40

John C. Vecnstra, direct.

Q A large brick building?

A Yes, a large brick building.

Q Is the building built close to the right of way and these switches?

A Yes.

Q How near to the nearest switch is that building?

10 A About eight feet.

Q What do you find coming from the same direction to the south?

A A large brick building.

Q How near is that building to the nearest switch?

A Also eight feet.

Q Now then, coming from the other direction, coming from the east and going west on Cedar street.

A The south side we have a large brick building.

20 Q On the north?

A On the north we have no buildings.

Q Are there many cars on the switches?

A Yes, there is always.

Q At the time you were there were there any?

A Yes, sir.

Q How frequently were you there?

A I was there two or three times.

Q Can you tell us the distance to the nearest passenger station, what it is?

30 A Market street is the nearest passenger station; eighteen hundred feet.

Q And the distance to the nearest overhead or underground crossing.

A The underground crossing is Essex street.

Q How far is that?

A Nine hundred feet.

Q Are there any overhead crossings on this line of the railroad between the points we are considering?

A No, there is not.

40 Q Or underground crossings there?

John C. Veenstra, direct.

A Essex street and Straight street.

Q That is lower Straight street you mean?

A Lower Straight street.

Q Where does Straight street cross again, other than the point you testified to?

A Not the furtherest point we have on our map, no.

Q What other points are there?

10

A Straight and Fulton is the same point.

Q Is there another one?

A Another beyond Straight street, Governor street.

Q That is all?

A That is all.

Commissioner Donges. The tracks at those streets pass over the street at those points?

Witness. Yes, sir.

Q Can you give us the grade of the highway by the elevation of the track from nearby points at Cedar street?

20

A Yes. The elevation of the rail is 89.93; on the center of Railroad avenue and Cedar street, that is west of the railroad, 88.26; on Cedar street east of the Erie Railroad at Straight and Cedar streets, 89.38.

Q Is there any street railway tracks crossing at this crossing?

A No, sir.

30

Q Any pipe crossings?

A Yes, sir, the Passaic Water Company has an eight-inch pipe; the Public Service Gas Company has a six-inch pipe.

Q Any overhead wires crossing?

A Yes; seven overhead wires crossing.

Q You say there is seven wires?

A Seven wires crossing from a pole at the north-east corner of Railroad avenue and Cedar street to

40

John C. Vecnstra, direct.

Ramapo avenue, there is seven. The north side of Cedar street there are sixteen wires thirty-seven feet high; on the south side there are four wires twenty feet high.

Q Is that line of wires paralleling the railroad crossing at this point, too?

10 A Forty-eight wires twenty-two feet high paralleling the railroad.

Q Can you tell us whether the wires on the south-erly side are electric light wires or telephone wires?

A I couldn't tell you that very well on the map.

Mr. Taylor. Which do you mean by the south-erly side?

Mr. Merrey. The railroad company I suppose calls that the east.

20 *Mr. Taylor.* The seven wires shown on the map?

Mr. Merrey. Yes. I will offer this map in evidence if the commission please.

Commissioner Donges. There is a street indicated on the map paralleling the tracks.

Witness. Yes.

Commissioner Donges. The tracks appear to be laid in this street.

Mr. Taylor. Ramapo avenue.

Mr. Merrey. That street is open.

30 Q Do you know whether Ramapo avenue, which is shown on this map, is open and used at that point at Cedar street?

A It is used by switching, they drive in and out and unload cars. But for public use I doubt it.

Mr. Taylor. I understood it was open as a public street.

Witness. On the assessment map they have it as a street and lots assessed as on Ramapo avenue.

John C. Veenstra, direct.

Q (*By Mr. Merrey.*) Do you know whether the people on those buildings use it to go to and fro to their buildings?

A I am pretty sure they do.

Mr. Merrey. I offer this map.

Commissioner Donges. It will be admitted and marked.

(Same is marked Exhibit P-1C.)

10

Q I ask you to produce map D, Market street crossing.

A (Produces map.)

Q This map was made by you after survey by you?

A Yes, sir.

Q What is the scale?

A One inch equals sixteen feet.

Q Do you know how this crossing is protected?

A Yes, sir, by gates.

Q Operated from a tower?

20

A Operated from a tower, and I think a flagman at the station.

Q Can you tell us what obstructions there are to the view of people passing at this place—obstructions to the view of the railroad track?

A Yes, sir. Going west on Park avenue from straight street there is a row of buildings; the side of that block is built in full.

Q There is a small open street called Crosby Place?

30

A Yes, sir.

Q Between those buildings and the railroad track?

A Yes, sir.

Commissioner Donges. How wide is that street?

Q How wide is that?

A It varies.

Q Right at the point of Park avenue.

40

John C. Fernstra, direct.

A Forty feet.

Q Do you know there is a sign placed there stating that Crosby Place is not a public thoroughfare, set up by the Susquehanna Railroad Company?

A I have never seen it. I have never noticed it there.

10 *Mr. Merrey.* We will show that later. We will show later that it is claimed to be owned by the Susquehanna and that it is not a public street.

Commissioner Donges. It is not used by the public.

Mr. Merrey. It is used by the public. The main station of the Susquehanna is right here (indicating), and a spur runs in and stops at this point (indicating); those are reached by this short street and Straight street.

20 *Mr. Taylor.* It is used for access to the Susquehanna station?

Mr. Merrey. Yes, the public use it. It is used like an ordinary public street. They have a sign to protect their right and claim ownership.

Commissioner Donges. You claim it is a private way?

Mr. Taylor. So Mr. Merrey says; I am not familiar with the facts.

30 Q Continue and show what obstructions there are coming from the east on Market street.

A On Market street?

Q What is it coming from the east on Market street.

A We have a brick building on the right; then we have a row of brick buildings on the left.

Q How near are these buildings to the track?

A About sixty feet to the track.

Commissioner Donges. These triangular-shaped buildings?

40 *Mr. Merrey.* Yes.

John C. Vecenstra, direct.

Q And the building on the left that you spoke about.

A Thirty-six feet to the track?

Q What are the obstructions to the west of the track on Market street?

A We have a brick building on the corner on the intersection of the railroad.

Q That is on the left?

A Along that whole block is a brick building.

10

Q And to the right.

Commissioner Donges. What is the distance of this brick building at the northwest corner to the tracks?

Witness. Thirty-four feet.

Q Do you know who owns that building?

A It is occupied by Morrin Company.

Commissioner Donges. Are there any other obstructions between that brick building and the railroad track? 20

Witness. There is a tower and flag station.

Q To the south on Market street from the west?

A The Erie Railroad station.

Q The passenger station at Market street?

A The passenger station, yes, sir.

Q Any other obstructions?

A Then we have on the other side, on the east side of the railroad—

Q You told that.

30

A The poles.

Mr. Merrey. You admit the ownership of that building at this point, Nelson Morris?

Mr. Taylor. Owned by the Erie Railroad?

Mr. Merrey. Yes.

Mr. Taylor. I don't know.

Q Do you know that the railroad has a part of its workshop, partly occupied by Nelson Morris Company?

40

John C. Veenstra, direct.

A Yes, sir, in the rear.

Q Do you know that the freight cars on the Susquehanna Railroad obstruct the view any?

A They do, yes, sir. The switching of the Susquehanna obstructs the view to the north.

Q As you are coming from the east.

A Yes.

10 Q (*By Mr. Taylor.*) What street?

A They are not on the street.

Mr. Merrey. They are on the Susquehanna Railroad.

Mr. Taylor. This map doesn't show.

Mr. Merrey. It will show on the other?

Mr. Taylor. The witness should be a little more definite.

Q You don't show the Susquehanna here?

20 A No, we don't show the Susquehanna here.

Q The nearest passenger station is located right at this street?

A Market street.

Q And the nearest underground crossing is where?

A The nearest underground crossing is Essex street.

Q How far is that?

A About 1,000 feet.

30 Q Can you give us the grade of the highway? First tell us the elevation on the rail at Market street above the sea level.

A The elevation on the rail at the intersection of Market street and Park avenue where both intersect, that elevation is 79.29; the elevation at Railroad avenue and Market street 75.03; the elevation at Park avenue and Straight street 88.22. The elevation on Straight street and Market street 85.98.

Q What street railway tracks cross at this point?

40 A The Public Service crosses Market street and also Park avenue

John C. Veenstra, direct.

Q How many cross?

A Double tracks on Park avenue and single track on Market street.

Q What pipe crossings are there?

A The Public Service has a twelve-inch gas pipe and the Public Service Electric Company has two two-inch tubes; the gas company has a six-inch pipe; the telephone company has nine conduits; the Public Service Electric Company has twelve conduits; and there is a thirty-inch brick sewer owned by the City of Paterson; the Passaic Water Company has a twelve-inch pipe; the Public Service Gas Company has another six-inch pipe. 10

Q How many tracks cross at this point?

A Two tracks.

Q Two tracks?

A Two main tracks.

Q What wire crossings are there? 20

A Across Park avenue and Market street and parallel to the railroad forty-one wires, thirty feet high, on the east side of the railroad. Crossing the railroad track we have got trolley wires; two trolley wires on Park avenue, one trolley wire on Market street; four on the other side, the south side of Market street, twenty-six feet wide.

Q And then the same set of wires paralleling the railroad company that you spoke of, not crossing.

A Forty-one wires, thirty feet high. 30

Q Which side of the railroad?

A East side of the railroad.

Commissioner Daniels. What is the covering over the sewer trunk; the distance between the crown of the street and the top of the sewer?

Witness. They average eight feet; eight to ten feet.

Mr. Taylor. Your answer applies to all these crossings, or only Market street?

John C. Veenstra, direct.

Witness. They average about eight to ten feet, the depth of the sewers all through the city.

Mr. Taylor. Below the surface?

Witness. Below the surface of the street.

Q I might say, some of our records were destroyed, records of the sewers.

A Yes, our records there were all destroyed by
10 fire.

Q When was the fire?

A 1902.

Commissioner Donges. What about Ramapo avenue at this point?

Witness. Ramapo avenue is a public street.

Q A paved macadam street, Ramapo avenue?

A It is asphalt, I think.

Q Used by the public?

A Yes.
20

Mr. Merrey. I will offer this blue print in evidence.

Commissioner Donges. It will be marked.
(Same is marked Exhibit P-1D.)

Recess from 12:20 to 1:20.

AFTER RECESS.

JOHN C. VEENSTRA resumes the stand.

30 *Direct examination by Mr. Merrey (continued).*

Q Mr. Veenstra, will you produce map E, showing crossing at Ellison street.

A (Produces map.)

Q How is that protected?

A That is protected by gates.

Q Will you tell us the obstructions to the view of people passing along Ellison street?

A Traveling from Straight street towards the
40 railroad, right of way, a brick building, and on the south side a concrete building.

John C. Veenstra, direct.

Q How near are they to the railroad tracks?

A About five feet.

Mr. Taylor. May I ask a question here?

Mr. Merrey. Yes.

Q (*By Mr. Taylor.*) In measuring from the railroad track to the buildings are you measuring from the nearest rail?

A Yes.

10

Q In each case?

A Yes.

Q (*By Mr. Merrey.*) Not the end of the ties; the rail.

A The rail.

Q Just continue and give us the other side.

A The west side of the track going towards Paterson street north side of Ellison street, is a lumber shed, and the south side we have the freight station; then we have a tower.

20

Q How near are they to the tracks?

A The lumber shed is about nine feet and the freight station about sixteen feet.

Q How many tracks of the railroad company cross this street?

A Three.

Q What is the nearest passenger station and how far is it?

A Market street; six hundred feet.

Q And how far is the nearest underground crossing or undergrade crossing?

30

A That would be Governor street.

Q Governor street or Essex street; tell us both.

A Essex and Governor both. Essex street is about nine hundred feet and Governor street about twenty-four hundred feet.

Q Take the Essex street again; not from Market street, from Ellison street.

A About eighteen hundred feet.

40

Mr. Merrey. We wish to correct that testimony.

John C. Veenstra, direct.

Q Can you give us the grades of the highway? What is the elevation of the tracks above sea level?

A The elevation of the tracks above sea level is 78.68; Straight street is 81.34; the elevation of Straight and Ellison.

Q (*By Mr. Taylor.*) What was the other?

10 A The intersection of the Erie Railroad and Ellison street 78.68. The intersection of Ellison and Paterson street, 70.52.

Q No street railway tracks cross here?

A No street railway.

Q Tell us the pipe crossings under the railroad?

20 A The Public Service Gas Company has a six-inch pipe; the Public Service Electric Company has a tube; there are four conduits; thirty-six inch brick sewer of the city and an eighteen-inch pipe sewer of the city; the Passaic Water Company has a six-inch pipe; the Public Service Electric Company has two tubes; the Public Service Gas Company has another four-inch pipe.

Q What overhead wires cross?

A There are fifty-one wires on the west side of the track parallel with the track, forty feet high.

Q The same line that started at Madison avenue?

A The same line crossing over.

Q Are there any wires running east and west?

A The south side sixteen wires, forty feet high.

30 Q (*By Mr. Taylor.*) Do you know whose wires they are?

A No.

Q (*By Mr. Merrey.*) Are they electric wires?

A Electric and telephone.

Mr. Merrey. I offer that map in evidence.
Commissioner Donges. It will be marked.
(Same is marked Exhibit P-1E.)

Q Get map F.

40 A (Produces map.)

John C. Veenstra, direct.

Q What street crossing does this show?

A Van Houten street.

Q How is that protected?

A That is protected by gates.

Q They are operated from a tower?

A Yes, sir.

Q What is the obstructions to the south of this crossing?

10

A The north side, from State street, east side of the railroad, there is a frame building; along the west side a brick building. On the south side of the street from State street to Paterson street, a brick building on the east, and the west of the railroad there is a brick building.

Q How near are these to the tracks?

A On the east side of the railroad they are about five feet; on the west side about ten feet, that is on the north side of Van Houten street. On the side of Van Houten street, east side of the track, sixteen feet along the west side, ten feet.

20

Q What is the nearest passenger station, and how far down?

A Market street, about 1,200 feet.

Q What is the nearest undergrade crossing and how far is it from Van Houten street?

A Governor street is the nearest one; about 1,500 feet.

Q Give us the grade of the highway?

30

A The grade of the railroad at the intersection of Van Houten street, 77.63; and the intersection of Straight street and Van Houten, 84.07; and the intersection of Paterson and Van Houten street, 72.31.

Q Do any street railways cross at this point?

A No street railways.

Q What pipe crossings are there under these rails?

A The Public Service Electric Company has two; the New York Telephone Company has six conduits;

40

John C. Veenstra, direct.

the Passaic Water Company has a twenty-four inch pipe; the City of Paterson has an eighteen-inch pipe sewer; the Passaic Water Company, on the south side, has a six-inch pipe; the Public Service Gas Company has, on the south side, two three-inch mains; the Public Service Electric Company has twenty conduits and two tubes.

10 Q What overhead wire crossings are there?

A The west side, parallel with the Erie Railroad, forty wires thirty feet high.

Q Is that the same line of wires following the railroad?

A Yes. Crossing the railroad on the south side of that Van Houten street, seven wires fifty-two feet high.

Mr. Merrey. I offer this map in evidence.

20 *Commissioner Donges.* It will be received and marked.

(Same is marked Exhibit P1-F.)

Q Give me map G.

A (Produces map.)

Q What crossing does it show?

A Broadway crossing.

Q How is that protected?

A That is protected by gates and I think there is a flagman.

30 Q The gate is operated by a tower?

A Operated by a tower.

Q And a flagman on the ground?

A A flagman on the ground.

Mr. Merrey. I might mention that this crossing we are now on is the one at which an accident happened and a report made to the commission of a man named Foley killed there. I haven't the notice here.

Commissioner Donges. How recently?

40 *Mr. Merrey.* August 26, 1911.

John C. Veenstra, direct.

Q What obstructions to the view are there on Broadway?

A The north side, east side of the tracks, a frame building, and west side of the tracks, north side of Broadway, a brick building; the south side and east side of the track, a frame building; the west side of the track and south side of Broadway, a brick building.

10

Q How near are those buildings to the rails?

A On the south side, east side of the tracks, we have four feet to the nearest rail, and on the west side of the tracks and south side of Broadway, seventeen feet to the nearest rail. On the north side of Broadway, east side of the track, thirty feet to the nearest rail; on the west side of the track, north side of Broadway, we have thirty-seven feet.

Q What is the distance to the nearest passenger station?

20

A Market street is the nearest passenger station; 2,100 feet.

Q What is the nearest undergrade crossing?

A Governor street.

Q How far is that?

A That is 2,100 feet.

Q Let us have the grade of the highway.

A The grade at the railroad track, intersection of Broadway, 86; the intersection of Paterson and Broadway, 67.26.

30

Q How many railroad tracks cross at this point?

A Two.

Q And street railway tracks?

A Double tracks, two tracks.

Q What pipe crossings are there?

A On the north side, Public Service Electric Company, six conduits; Public Service Gas Company, three-inch pipe; Passaic Water Company, sixteen-inch pipe; City of Paterson, twelve-inch pipe sewer;

40

John C. Veenstra, direct.

Suburban Telephone Company, four conduits; Public Service Gas Company, four-inch pipe; Public Service Electric Company, two two-inch tubes.

Q How many pipes of the gas company?

A Four-inch pipe, it don't say how many.

Q Isn't there one three-inch?

A One three-inch pipe on the north side.

Q State the overhead wires crossing.

10 A Parallel with the railroad, on the west side of the track, fifty-two wires, thirty-five feet high.

Q Is that the same line of wire following the railroad?

A Yes. Seven wires crossing diagonally, fifty-three feet high, and then the trolley wires, two trolley wires, feed wires.

Mr. Merrey. I will offer this map in evidence.

Commissioner Douges. It will be admitted and

20 marked.

(Same is marked P-1G.)

Q I ask you to produce map H.

A (Produces map.)

Q This shows Fair street?

A Yes.

Q How is it protected?

A By gates.

Q Operated from a tower?

A Yes, sir.

30 Q What obstructions are there to the view along this right of way?

A North side of Fair street, east side of the track, a frame building; west side of the track and north side of Fair street, a frame building; south side of Fair street, east side of the track, a frame building; west side of the track, south side of Fair street, a frame building.

Q How near are these buildings to the rail?

40 A The one on the north of Fair street and east side of the track, about twenty-eight feet; the one on

John C. Veenstra, direct.

the north side of Fair street and west side of the track, eighty-eight feet; the one on the south side of Fair street, east side of the track, thirty-four feet; the one west of the track is seventy feet.

Q Are there poles and other obstructions?

A Electric poles and telegraph poles.

Q All shown on the map.

A Yes; gas light; trees.

Q What is the distance to the nearest passenger station? 10

A Market street is the nearest passenger station; 1,600 feet.

Q And the nearest undergrade crossing?

A Governor street, about 1,200 feet.

Q Let us have the grade of the highway.

A The grade of the intersection of the Erie Railroad and Fair street is 73.15; at the intersection of Straight street and Fair street, 83.43; at the intersection of Fair street and Paterson street, 59.12. 20

Q Are there any street railway tracks crossing over here?

A No.

Q Pipe crossings?

A The Passaic Water Company has a six-inch pipe, the City of Paterson has a twelve-inch pipe sewer.

Q Wire crossings?

A There are wires paralleling the railroad on the west side; thirty-six wires, thirty-four feet high; on the east side, twenty-three wires, twenty-nine feet high. 30

Mr. Merrey. I will offer this map in evidence.

Commissioner Donges. It will be admitted and marked.

(Same is marked Exhibit P-1H.)

Q Produce map I, showing Hamilton avenue.

A (Produces map.) 40

John C. Veenstra, direct.

Q How is that protected?

A Protected by gates.

Q Operated from a tower?

A From a tower.

Q Tell us what obstructions to the view there are at this crossing.

10 A The north side of Hamilton avenue, east of the track, a brick building; the west side of the railroad, north side of Hamilton avenue, a brick building; on the south side of Hamilton avenue, east of the track, a frame building; south side of Hamilton avenue, east of the track, another frame building.

Q How near are these buildings to the rail?

20 A North side of Hamilton avenue, east of the track, the building is fifty feet; on the west side of the track, north side of Hamilton avenue, we have sixty-four feet; on the south side of Hamilton avenue, east of the track, we have got forty-four feet; on the south side of Hamilton avenue, west of the track, we have got twenty-two feet.

Q What is the distance to the nearest passenger station?

A Eighteen hundred feet.

Q What is the nearest undergrade crossing?

A Governor street.

Q How far is that?

A About eight hundred feet.

30 Q What is the grade of the highway?

A The grade at the intersection of Hamilton avenue and the Erie Railroad, 70.86; at the intersection of Straight street and Hamilton avenue, 80.79; at the intersection of Paterson street and Hamilton avenue, 54.33.

Q Are there any street railway tracks across this point?

A No, sir.

Q Pipe crossings?

John C. Veenstra, direct.

A Passaic Water Company, six-inch pipe; City of Paterson, twelve-inch pipe sewer; Public Service Gas Company, four-inch pipe.

Q Any wire crossing?

A A set of wires paralleling the track, west side of the track, twenty-six wires, thirty-six feet high; east of the track, twenty-three wires, twenty-five feet high.

10

Q No wires directly on the street?

A No wires crossing at this street.

Mr. Merrey. I will offer this map in evidence.

Commissioner Donges. It will be received and marked.

(Same is marked Exhibit P-11.)

Q I ask you to produce map J, crossing at Lafayette street, and ask you how that crossing is protected?

20

A (Produces map.)

Q That is protected by gates?

A Yes.

Q From a tower?

A Yes.

Q Tell us what obstructions to the view there are.

A On the north side of Lafayette street, east of the railroad, a frame building; on the south of Lafayette street, west of the railroad, a frame building.

Commissioner Donges. Between Hamilton avenue and Lafayette street there are no grade crossings? 30

Witness. No grade crossings.

Commissioner Donges. The streets indicated on the map have no railroad crossings?

Witness. Have no railroad crossings. (Continuing.) South side of Lafayette street, east of the tracks, frame building; south side of Lafayette street, west of the tracks, another frame building. 40

John C. Veenstra, direct.

Q What is the distance to the nearest passenger station?

A River street.

Q What is it?

A 1,200 feet.

Q What is the nearest undergrade crossing?

A Governor street.

10 Q Is Governor street nearer than Fulton?

A Fulton street, 800 feet.

Commissioner Donges. There is an undergrade crossing at Fulton and Straight street?

Mr. Merrey. Yes; and then there is one at Governor street. I think he testified to that this morning.

Q What is the grade of the highway?

20 A Intersection of Lafayette street and the Erie Railroad, 55.91; intersection of Summer street and Lafayette street, 48.21; intersection of Straight street and Lafayette street, 45.71.

Q Are there any street railway tracks crossing at this point?

A No.

Q What pipe crossings are there under the railroad?

30 A North side, Public Service Gas Company, six-inch main; Passaic Water Company has a six-inch pipe; twelve-inch pipe sewer of the City of Paterson; thirty-inch brick sewer owned by the City of Paterson.

Q What overhead wires crossing?

A West of the track and parallel with the track we have got eight wires forty-one feet high; parallel with the track, east of the track, twenty-three wires twenty-one feet high; north side of Lafayette street crossing the railroad, six wires, forty-one feet high; south side, one cable, thirty feet high, and three telephone wires.

John C. Veenstra, direct.

Mr. Merrey. I will offer that map in evidence.

Commissioner Donges. It will be admitted and marked.

(Same as marked Exhibit P-1J.)

Q I ask you to produce map K, showing Franklin street crossing.

A (Produces map.)

Q How is that crossing protected?

10

A By gates operated from a tower.

Q What obstructions to the view?

A North side of Franklin street, east side of the tracks, a brick building; north side of Franklin street, west of the tracks, we have a frame building; south side of Franklin street, east of the track, we have got a small frame house; on the west side of the tracks and south side of Franklin street, another brick building.

Q Are there any other obstructions in the way of poles?

20

A Poles and tower, gate tower.

Q All indicated on the map?

A Yes, sir.

Q What is the distance to the nearest passenger station?

A River street, 1,000 feet.

Q And what is the nearest undergrade crossing?

A Fulton street, about 780 feet.

Q Give us the grades of the highway.

30

A The grade at the intersection of the railroad and Franklin street, 54.76; Summer street and Franklin street, 50.12; River street and Franklin street, 47.72.

Q Do any street railway tracks cross?

A No, sir.

Q What pipe crossings are there under the railroad?

A Passaic Water Company, six-inch pipe, that is all.

40

John C. Veestra, direct.

Q What wires cross above?

A West of the railroad and parallel to the tracks, eight wires, thirty-eight feet high; east of the tracks; parallel, twenty-five wires, twenty-four feet high; north side of the Franklin street crossing the railroad, twenty wires, thirty-one feet high.

Mr. Hervey. I offer that map.

10 *Commissioner Douglas.* It will be received and marked.

(Same is marked Exhibit P-1K.)

Q I ask you to produce map L, showing Keen street crossing, and tell us how that is protected.

A (Produces map.) That is protected by a flag-man.

Q And a bell is there also?

20 A I have got the poles mentioned but I haven't the bell mentioned.

Q Tell us what obstructions to the view there are.

A On the north side of Keen street, east of the track, a brick building; on the west side of the track, north side of Keen street, a frame building; on the south side of Keen street, west of the track, a frame building; then on the south side of Keen street and east of the railroad, we have a brick building; then there is flag station.

Q Any other obstructions, poles?

30 A Poles, a few poles, yes, sir.

Q What is the distance to the nearest passenger station?

A 700 feet.

Q What is the nearest undergrade crossing?

A Fulton street.

Q What is the distance?

A About 1,300 feet.

Q Tell us the grade of this highway.

40 A The grade at the intersection of Keen street and the Erie Railroad, 54.26; the intersection of Sumner

John C. Vernesten, direct.

street and Keen street, 52.48; at the intersection of River street and Keen street, 50.61.

Q Are there any street railway tracks crossing?

A No, sir.

Q What pipe crossing?

A Twenty-four inch pipe sewer.

Q Maintained by the city?

A Yes, sir.

Q What wire crossings are there?

19

A Eight wires on the west side of the track and parallel with it, thirty-eight feet high; east of the track and parallel with the railroad, twenty-seven wires, twenty-seven feet high; north side of Keen street, eight wires, forty-seven feet high on the north side of Keen street passing over the railroad.

Mr. Merrey. I offer this map in evidence.

Commissioner Donges. It will be admitted and marked.

20

(Same is marked Exhibit P-11.)

Q I ask you to produce map M, showing Warren street crossing. How is this crossing protected?

A (Produces map.) By gates from the tower.

Q What is the obstruction to the view?

A North side of Warren street, east side of the track, a brick building; on the west side we have River street; we have got a tower on the west side; south side of Warren street, east of the track, a frame building; and on the west side a frame building.

30

Q How near are these buildings to the rail?

A On the east side of the track, thirty-three feet to the rail; on the west side they are seventeen.

Q What is the distance to the nearest passenger station?

A River street is the nearest passenger station, about 500 feet.

Q What is the nearest undergrade crossing?

A Fulton street, 1,700 feet.

40

John C. Veenstra, direct.

Q What is the grade of the highway?

A The grade at the intersection of the Erie Railroad and Warren street is 35.08; then on Warren street, 225 feet east of the tracks, the elevation is 59.85; then at the intersection of River street and Warren street, 52.85; at the intersection of Warren street and East Fifth street, 47.25.

10 Q Are there any street railway tracks there?

A No, sir.

Q What pipe crossings are there?

A North side, Passaic Water Company, six-inch pipe, and an eighteen-inch sewer pipe owned by the City of Paterson; the Passaic Water Company has a pipe and the Public Service Gas Company has a four-inch pipe.

Q That is two water mains?

A Yes.

20 Q What overhead wires cross?

A Parallel to the track? On the east side, twenty-three wires twenty-seven feet high.

Q Twenty wires cross directly?

A Diagonally eight wires, thirty-four feet high, at the north side at right angles about crossing the railroad two telephone wires.

Mr. Merreg. I offer that map in evidence.

Commissioner Douglas. It will be admitted and marked.

30 (Same is marked Exhibit P-1M.)

Q I ask you to produce map X, showing River street and Putnam street crossings.

A (Produces map.)

Q How is this crossing protected?

A By gates from a tower.

Commissioner Douglas. Both streets?

Witness. Yes, sir.

Q Are there several gates there?

40 A A flagman is stationed there.

John C. Veestra, direct.

Q This street cuts the railroad at quite an acute angle, River street?

A Yes, sir.

Q Tell us what angle.

A An angle of about thirty degrees.

Q What are the obstructions to the view? Give us River street first.

A River street, on the east side of the track, east side of River street, a brick building; on the west side we have the Erie depot; on the south side of Putnam street, east of the Erie Railroad, we have a brick building. 10

Q Are there any others?

A That is all on River street.

Q On Putnam street.

A Putnam street, east of the railroad, north side of Putnam street, a frame building; south side of Putnam street, east of the railroad, a brick building; west of the track on Putnam street, south side, a brick building; on the north side we have a large wall, about eight feet high. 20

Q There is a passenger station at these streets?

A Yes.

Q Called River street?

A Yes.

Q What is the nearest undergrade crossing?

Commissioner Donges. Back of the passenger station to the north of River street, are there any buildings? 30

The Witness. There is a building in through here (indicating).

Mr. Merrey. Mention where that is.

Witness. On the triangular spot; on the west side of River street and east side of the railroad; between River street and the Erie Railroad there are buildings.

Q What is the distance to the nearest undergrade crossing? 40

John C. Vecnstra, direct.

A About 2,000 feet.

Q And what is the grade of this highway?

10 A At the intersection of River street and the Erie Railroad 56.55; at River street and Lyon street, 65.03; that is the first street north of Putnam street; it isn't marked on the map. At the intersection of River street and Putnam street is the same thing. Another elevation is at the intersection of Putnam street and Wait street, 56.05.

Q Is there a sharp rise in River street as it goes toward the northeast?

A Yes, sir; there is. At Lyon street, 65.03.

Q How many tracks cross at this point?

A Two tracks.

Q Of the railroad?

A Two tracks of the railroad, yes; one of the Public Service Electric Company.

20 Q The street railway cross?

A One track, yes, sir.

Q What pipe crossings are there?

A Pipe crossing on River street, Public Service Gas Company, one three-inch main and a six-inch main; the City of Paterson has got a twenty-four inch brick sewer; the Passaic Water Company has a six-inch pipe. Across Putnam street the Public Service Gas Company has an eight-inch main.

30 Q Just count the number of mains they have there.

A Then there is the Public Service Gas Company with a twelve-inch main.

Q How many mains has the Gas Company got altogether?

A Three.

Q And counting Putnam street, too?

A Yes.

Q The gas house of the gas company is located near by, isn't it?

40 A Yes, sir, opposite the Erie depot, River street.

John C. Veenstra, direct.

Q What wire crossings are there?

A Parallel to the railroad, on the east side, we have thirty-seven wires, twenty-six feet high, and crossing the railroad on the west side of River street, there is thirty-nine wires, fifty-two feet high. Then we have the trolley wires of the trolley tracks.

Q Tell us the distance from the Madison avenue crossing on the south to the River street crossing on the north; the entire length of this work. 10

Mr. Taylor. I don't think it is the length of the entire work.

Mr. Merrey. I didn't mean the work that may have to be done.

Q Give us the distance from Madison avenue on the south along the railroad line to River street.

A 10,800 feet.

Q That is approximately? 20

A Approximated, yes, sir.

Q What is the distance from the River street crossing to the city line on the north?

A 3,600 feet.

Q Are there any other streets across the railroad at grade; the main line of the railroad in the city?

A Fifth avenue.

Q Is Sixth avenue?

A We have Crooks avenue at the city line.

Q (*By Mr. Taylor.*) How is that? 30

A Crooks avenue at the city line.

Q (*By Mr. Merrey.*) The southerly line of the city?

A The southerly line of the city.

Q Is Delaware avenue open?

A It is not a crossing, not a grade crossing.

Q How about Michigan avenue, is there a crossing; or don't you know about that?

A I don't know about that, no.

John C. Veenstra, cross.

Q At this point I refer to at Sixth avenue application was made some time ago by the city for a grade crossing at that place.

Mr. Taylor. Is that shown on the map?

10 *Mr. Merrey.* Yes, Sixth avenue is shown on the map. We haven't any grade crossing there because the commission refused permission. The street is open; I presume the city would try to get the Court of Chancery to give a crossing there.

Mr. Taylor. I don't think that is so—

Mr. Merrey. As they said we couldn't have a grade crossing there; they didn't say we couldn't have anything.

That is all I care to show by this witness.

I will offer this map in evidence.

20 *Commissioner Donges.* It will be received and marked.

(Same is marked Exhibit P-1N.)

Cross examination by Mr. Taylor.

Q You said, Mr. Veenstra, you made this map from a survey made by yourself.

A Yes, sir.

Q I don't suppose you surveyed the whole area shown on the map?

30 A I surveyed each crossing; we have an assessment map which we have from actual survey.

Q So that this map, this map referred to as the key, which I think is Exhibit P-1, is really made from the assessment map?

A The majority is the assessment map and we used the survey of the crossings.

Q You surveyed the individual crossings?

A Exactly.

40 Q How far did your survey extend each side in each case?

John C. Veenstra, cross.

A The first street east and west of the railroad. If a street was, say, 700 feet from the railroad, I didn't go as far as that.

Q That is at right angles to the railroad; did your survey at the different crossings overlap?

A No.

Q There was some space in between?

A Space in between.

Q You pieced your survey together in accordance with the assessment map, is that the idea?

10

A Yes, sir.

Q This line, which apparently indicates the line of the railroad off to the south between the crossing marked A and B on Exhibit No. 1, what does that represent; the Newark branch of the Erie?

A That represents the Newark branch, yes, sir.

Q There is a crossing shown there at Getty avenue, isn't there?

20

A Yes, sir, over the Newark branch.

Q Is that a grade crossing?

A Yes, sir.

Q That is not included in your petition?

Mr. Merrey. No.

Q There are other grade crossings on the Newark branch, are there not, in the City of Paterson?

A I think there are overhead crossings; Main street.

Q Is that near the South Paterson station?

30

Q Did you say there is open to travel the crossing at Fifth avenue, near the north end of the city?

A Yes.

Mr. Taylor. That is not included in the petition.

Mr. Merrey. Not included.

Commissioner Donges. Fifth avenue you said?

Mr. Taylor. Yes.

Commissioner Donges. Where is that?

40

John C. Veenstra, cross.

Mr. Taylor. Near the river; I described it as near the northerly end of the city.

Commissioner Donges. That is a grade crossing?

Witness. Yes, sir.

10 Q There are undergrade crossings, as I understand it, indicated by dotted lines on this map at Essex street and at Fulton street and Straight street?

A Well, Fulton street, the same thing; Governor street is the other one. This one here is Governor street (indicating).

Q Is there an undergrade crossing there?

A Yes, sir.

20 Q It isn't indicated there the same way; the dotted line shows an undergrade crossing at Governor street, another undergrade crossing at Fulton street, which is also the crossing at Straight street, which is at right angles to Fulton street—

A About at right angles.

Q —with those exceptions have you included all of the grade crossings in the City of Paterson in this petition?

Mr. Merrey. This engineer has nothing to do with the filing of the petition.

Mr. Taylor. Can you tell us whether they are all here with those exceptions?

30 *Mr. Merrey.* No; there are some crossings in the southern section.

Mr. Taylor. East of Madison avenue?

Mr. Merrey. Yes. My examination of Mr. Veenstra he was not sure of them. There was a crossing at Michigan avenue which is planked.

Mr. Taylor. That isn't shown on the map at all?

Mr. Merrey. No.

40 *Commissioner Donges.* What do you mean by "Planked"?

John C. Veestra, cross.

Mr. Merrey. It is planked each side of the rail so that traffic can go over it.

Mr. Taylor. He means an actual existing crossing. That is what you mean?

Mr. Merrey. Yes.

Q Are there any other streets physically open across the railroad south of Madison avenue?

A There is no grade crossing, no. 10

Q Are there any other crossings of any sort?

A Between Crooks avenue and Madison avenue, or between Gould avenue and Madison avenue.

Q Between Gould avenue and Madison avenue, that being the extreme southerly end of the map.

A I couldn't tell you. I doubt if there is any grade crossings.

Mr. Taylor. I understand from you there are some grade crossings. 20

Mr. Merrey. Gould avenue is open and the one opposite Michigan avenue, I think that is all. Gould avenue, Michigan avenue, and Crooks.

Q I notice on a number of these maps you have wires not paralleling the railroad but crossing the railroad in the street, overhead wires, I don't think in any case have you given on your map the owners of those wires.

A I couldn't tell you who was the owner. I couldn't tell whether it was telephone, electric, or what they were. 30

Q Do you know whether they were wires for the transmission of electric current or not?

A Some of them were.

Q What other kinds were there?

A They are all here.

Q You don't know whether they are electric light, power, or telegraph or telephone?

A No. 40

Joh. C. Veenstra, cross.

Q You don't know, I gather from your testimony, who owns or operates the wires parallel to the railroad shown on these maps?

A I do not.

Mr. Taylor. I can state from my general knowledge the Western Union Telegraph Company is interested in some of those wires.

10

Mr. Merrey. I intended that, after completion of the examination of this witness, to ask the commission to order the different parties to this suit to file a report here showing what wires they did own; the Western Union Telegraph Company we now learn should be made a party. I supposed they were controlled by the railroad and they would give them in their answer. We found difficulty in determining who owned these wires and underground conduits. The company couldn't tell us; we didn't get it. I think under the circumstances the commission should order each party in the suit specifically, really to answer the petition, to really answer the petition as to what they do own.

20

Mr. Taylor. As far as the wires on the railroad right of way, I know enough about it to state that the Western Union has an interest, that interest varies along the railroad; I am not prepared to say what its interest is in Paterson. They do have some interest.

30

Commissioner Donges. In your answer you can state the ownership of the wires on your right of way.

Mr. Taylor. Yes, I presume we can. I merely raise the point now to indicate that the Western Union is the necessary party in this case under the statute.

Mr. Merrey. It seems to me that the changes that would be necessary in the wires is a very, very small part of the case. They are necessary

40

John C. Vecenstra, cross.

and should be brought in; the expense of changing the wires is to be trifling as compared with the main work. Therefore, I thought we would save time to go ahead and get that as we go on.

Mr. Taylor. It is necessary and a part that is not in. I notice you have no testimony nor do the maps show the extent of the view up and down the track at these various crossings.

10

Q Did you take any views to show how far you could see up and down the track?

A It all depends if it is a straight or curve in the railroad, you can't see far.

Q Did you take any observations?

A I did not.

Q Did you make any notes of it?

A I did not.

Q In referring to Cedar street you designated four of the tracks as main tracks. That is covered by map C. Do you know as a matter of fact whether they are main tracks or side tracks or yard tracks?

20

A I couldn't tell you that.

Q Why did you call them main tracks?

A Between those gates the main traffic goes by those tracks.

Q (*By Mr. Merrey.*) The four tracks between the gates?

A I think there were.

Q (*By Mr. Taylor.*) You don't know whether, as a matter of fact, they are running tracks?

30

A No, I couldn't tell you that.

Q In connection with Market street, you refer to the Susquehanna cars obstructing the view?

A Yes.

Q There is nothing on the map to indicate that; what do you mean by that?

A There is nothing shown on the map.

Q Will you kindly explain what you mean by that?

40

John C. Veenstra, cross.

A It seems to be the end of a spur of the Susquehanna Railroad; they got a kind of a switch yard there and they back trains and unload, with ice and things.

Q Where do they back and unload them?

A Right in here (indicating).

Q (*By Mr. Merrey.*) Mention where it is.

10 A Between Crosby Place and Ellison street, north of Straight street. In through here (indicating).

Q (*By Mr. Taylor.*) Two or three tracks running at right angles to the Erie tracks?

A About, yes.

Q And ending—

A Ending there (indicating).

Q Do you know what the elevation of those tracks is as compared with the Erie track?

20 A I should judge maybe six feet higher, five or six feet higher.

Q How near to the end of those tracks do the freight trains have to be to obstruct the view?

A Well, they would have to be right up at the end.

Q If they were not right up at the end the view would not be obstructed by the cars?

A Not so much.

Q Could you say how far they would have to be to avoid any obstruction to the view?

A I should say two lengths of the car.

30 Q Have you ever measured that?

A I never measured it.

Q Beginning with map of Ellison crossing, map E, running through to map I, inclusive, and then again on map J (perhaps some of the others), you show all the streets that cross the railroad track some distance east or west of the railroad, or perhaps on both sides, show a broken line which runs across the street, sort of a broken line which runs across the street to a broken line, a dash.

40 A That simply cuts off the scale of the map; I would have to make the map much larger.

John C. Vecustra, cross.

Q In that respect the map is not drawn to scale?

A They are drawn to scale; that is simply broken off. You can't scale from the railroad up to the next street.

Q That is what I mean.

A No.

Q Take map G-1 for example. That happens to be a handy one; on Broadway near Paterson street and again near Straight street you will see the broken lines extend across Broadway; that indicates a portion of the map was left off, as I understand it. 10

A Yes, sir.

Q So you couldn't get a grade by scaling from the railroad up to the elevation shown on Paterson street.

A You couldn't figure that exactly.

Q You would have to know how much was left out—

A Between Paterson street and the railroad. 20

Q That would be true of all these maps on which the broken line appears.

A Yes.

Q You could get the distance in an approximate way by reference to this key map I suppose?

A Yes, sir.

Q Do you undertake to show all the railroad tracks across the street at the crossings?

A Yes, sir.

Q But you didn't undertake to show all the railroad tracks between the streets, did you? 30

A No, sir. There may be switches in between.

Q There may be switches or sidings in between the crossings not shown on the large map or on the small map?

A Yes, sir.

Q As far as the large map is concerned you didn't undertake to show the tracks that are across the street, did you?

A What do you mean, the trolley tracks? 40

John C. Vecenstra, cross.

Q No, the railroad tracks.

Mr. Herrey. You mean the key map?

Mr. Taylor. The key map.

A No, just the two main tracks.

Q The small map, you show the number of tracks actually at each crossing?

A Yes.

10 Q But not between crossings?

A No; there may be switches.

Q For example, at River street on map I, there might be a siding to the Public Service property.

A Railroad sidings.

Q There are, as a matter of fact?

A Yes, sir.

Q There are yard tracks and station delivery tracks not shown here?

A Yes, sir.

20 Q That might be true elsewhere.

A Yes, sir.

Q There is a flagman at Market street?

A A flagman, and there is gates.

Q On map I, which shows Hamilton avenue crossing, I notice on the north side of Hamilton avenue, and the east side of the railroad, the words "Ramapo Avenue" on the map; what does that mean?

A That is a street.

Q The map doesn't show the dimensions of that street, does it?

30 A It varies.

Q Now, on the key map at that same point I notice two lines parallel with the track on the east side of the track; is the first of those lines supposed to indicate the line between the railroad right of way and this Ramapo avenue, so-called?

A Yes, sir.

Q It is?

A That is right.

40 Q So that the space between the two lines parallel to the railroad running from Hamilton avenue to

John C. Veestra, cross.

Governor street is supposed to indicate Ramapo avenue?

A It indicates the street Ramapo avenue.

Q That you say is a public street?

A Yes, sir.

Q Have you prepared any maps showing the property which might be affected by any changes in the grade at these highways or by the closing of some of them with diversion into other streets?

10

A I have not, no. This index map here has all the lot numbers on, from the lot numbers you can get the assessment map of the different property owners.

Q It has—

A The lot numbers of the different properties adjoining the railroad.

Q Yes, but not along the streets crossing the railroad.

A It has got them on all over.

20

Q Take Lafayette street, J, for example, on the south side of Lafayette street and the east side of the track you only show one lot number.

A That is the lot adjoining the track.

Q That is the lot adjoining the track. Now, supposing for example, that this matter should be settled in part by the lowering of the grade of Lafayette street, that map wouldn't indicate all the property that would be affected by that?

A No.

30

Q You haven't made such a survey or calculated anything on that?

Mr. Taylor. Mr. Merrey, do you propose to introduce any person in support of the allegation in your petition that it is impractical to change the grade of any of the said highways?

Mr. Merrey. We may later, Mr. Taylor.

Mr. Taylor. Because I think that is information of a character which would naturally be put in support of that allegation and is something

40

John C. Veestra, cross.

that ought to be shown by these maps. It is something which is essential to any study of the situation because you can't make an intelligent study of it, if anything ought to be done, without the information of the consequent damage which is likely to ensue from any particular treatment.

10

Mr. Merrey. That is all a matter of the plan which is afterwards adopted. I don't know but what we would be trespassing if we went on the right of way to make the map you require. We confined ourselves to the streets. We have shown what is on the highways. I don't think strictly we have any right to go on the track. I think it is clearly information the railroad company has on file.

20

Mr. Taylor. It is information you have got in the records of the City of Paterson with respect to properties along the streets we are talking about.

Mr. Merrey. We will undoubtedly, before the hearing is finished, furnish information to show the assessed value of all these properties nearby at each of these crossings. We will send a list of the assessors and then put on the engineer later to show it is a very expensive item to change the streets.

30

Mr. Taylor. I merely want to say that sort of information is essential to any study of this thing and we can't make any progress until that study is made.

Commissioner Dongen. I think the first question is whether or not the crossings are so hazardous the crossings ought to be removed and then the question of how the elimination shall be made is a question to be taken up afterward. The first step is to determine—

40

Mr. Taylor. I think, Mr. Chairman, that this commission is confronted with practically the

John C. Verstra, cross.

same question which has been before the Court of Chancery in an action brought before that court to determine whether the crossings should be eliminated or not. The words of the statute under which the commission has to act, are similar to the statute under which the Court of Chancery formally acted. In any case of that sort, it seems to me the whole situation has to be considered before the commission can reach any determination as to what the danger requires.

10

Commissioner Dongra. You mean—

Mr. Taylor. The two things are all in one.

Commissioner Dongra. Whether the elimination should take place and how is a single question.

Mr. Taylor. I can imagine this illustration; a crossing in the country where there is very little travel over it which the board ought to eliminate if brought to its attention, although they have in mind these cases where the travel is much more extensive, it should not be eliminated on account of the cost or expense and the traffic, all those things. I think information regarding the whole situation should be before the commissioners before the determination of the basic question.

20

Commissioner Dongra. Perhaps that is true; the purpose of filing the map in the first instance is to apprise the parties and the commission of the cost and generally the situation at the crossings. As was said this morning, the detail in any of the maps necessary will be required to be applied as the hearing progresses. I think for the purposes of the hearing the maps filed will be held to be sufficient.

30

H. J. Harder, direct.

H. J. HARDER, sworn on behalf of petitioners.

Direct examination by Mr. Merrey.

Q Mr. Harder, are you the city engineer of the City of Paterson?

A Yes, sir.

Q How long have you been such engineer?

10 A Sixteen years.

Q In your office have you maps of the City of Paterson?

A Yes.

Q And was this map on the board here (indicating) marked P-1, and the various maps 1-A to 1-N showing the grade crossings of the Erie Railroad, prepared under your directions?

A Yes, sir.

Q By whom were they prepared?

20 A The last witness, Mr. Veenstra.

Q The last witness stated that some of the information was obtained from the assessment maps of the City of Paterson; that was done by your order?

A Yes, sir.

Q How were those assessment maps made up?

A Along the railroad from actual survey and copies of the right of way of the Erie Railroad Company furnished us by Mr. Von Moscazisker, when he was real estate agent.

30 Q That was how long ago?

A 1903 or 1904—1903.

Q Were the assessment maps of the City of Paterson destroyed by fire?

A They were.

Q What year?

A 1902.

Q What maps you have were made from surveys made since that time?

A Yes.

40

John F. Fitzgerald, direct.

Q And these assessment maps you spoke of were made up about what time?

A In 1903 and 1904; ran over until 1905; it was a pretty big job.

Q Under whom were they made?

A Under the supervision of myself; the actual drawing was done by different men employed in the office.

10

Mr. Taylor. No questions.

JOHN F. FITZGERALD, sworn on behalf of petitioners.

Direct examination by Mr. Merrey.

Q Mr. Fitzgerald, are you secretary of the Paterson Board of Trade?

A I am.

Q Has the Board of Trade of Paterson been interested in the question of the abolition of grade crossings in the City of Paterson?

20

A We have been since the summer of 1910 when the accident occurred at Broadway killing Andrew Frolich and his daughter.

Q How long has your board been organized?

A In 1908.

Q After that accident at Broadway did you do anything?

A At that time the Board of Trade called a mass meeting of citizens which was attended by a representative body of citizens of Paterson and the matter was, at the suggestion of that mass meeting, turned over to the Board of Trade who appointed a committee, which committee is in existence to-day.

30

Q Who were on the committee?

A The president of the Board of Trade, M. H. Ellenbogen, Mayor A. F. McBride, Genl. S. V. S. Muzzy, August A. Fisher, Albert B. Howe, E. A. Brown, W. G. Norwood, and a few others—

40

John F. Fitzgerald, direct.

Mr. Taylor. May I ask the purpose of this line of examination?

Mr. Merrey. I want to show this matter was agitated and taken up with the Erie Railroad and a plan submitted by this company of the abolition of these crossings and an estimate made.

10 *Mr. Taylor.* That it was agitated, I think, is irrelevant and immaterial.

Mr. Merrey. I think that is a mere reflection of the effect of that situation in Paterson.

Mr. Taylor. I think you must prove a situation and not a reflection. I must object to testimony of that sort as to agitation such as this as being irrelevant.

20 *Commissioner Donges.* I think the fact of there being agitation is not pertinent and material. The facts and circumstances that produce such a condition are things that have prohibitive force.

Mr. Merrey. The amount of interest taken in the subject of these crossings that must be eliminated.

Commissioner Donges. No, I think that is not evidential. It is a matter of judgment only.

30 *Mr. Merrey.* We will show what has been done heretofore and that the board did take it up with the railroad company.

Commissioner Donges. And then prove the physical condition?

Mr. Merrey. Yes.

Q Did that committee enter into any litigation with the railroad company?

A After our first meeting we did on Tuesday, October 6, with the Erie Railroad officials in New York.

40 *Commissioner Donges.* What year, 1908?

Witness. 1910. We were organized in 1908.

John F. Fitzgerald, direct.

Mr. Taylor. Were you on this committee?

Witness. As secretary.

Mr. Taylor. And attended the conference yourself?

Witness. Yes.

Q Was anything done by the committee or the railroad company?

A At that time of the meeting, J. C. Stuart and 10
Mr. Harrahan, who was vice-president; Mr. Stuart was general manager at the time; after a conference there Mr. Allen informed us that the Erie Railroad Company would send us an estimate of the cost of the elimination of the grade crossings in Paterson. That was finally sent to us after another conference on January 6, 1911.

Q Did it include any sketch or plan?

A It did.

Q Have you got the plan here? 20

A Yes.

Q Will you produce it. You may read the letter and then produce the plan.

Mr. Taylor. Let me see the letter.

Mr. Merrey. Is there any objection?

Mr. Taylor. I don't think any of this is material and relevant to the issue before the commission. If the commission is interested in it I don't see any particular harm in producing it. 30

Commissioner Donges. You may read the letter.

Witness. (Reads.) "Dear Sir: Referring to the conference which was held in my office with reference to the question of Grade Crossing Elimination at Paterson, N. J. Enclosed herewith I hand you plan and profile giving a tentative sketch showing what can be done in eliminating a number of crossings. You will note that there are two principal groups; the first consisting of 40

John F. Fitzgerald, direct.

10 what may be known as the Market street group, the second consisting of the River street group. To eliminate the crossings in these two groups would cost about \$1,200,000.00. To eliminate only those crossings in the Market street group would cost about \$750,000. For reasons which were explained to the committee, this company is not at this time in position to furnish the money for the carrying out of such a project. You will remember that at the conference referred to I called attention to the arrangements which we had made at certain other points in which the community furnished the money originally by selling its own bonds which the company afterwards repaid to them upon virtually an instalment plan. This matter was explained in considerable detail to the committee so that it is not necessary to recount it here. Subject, of course, to the approval of our board, we would be willing to consider such a proposition with the understanding that the original cost of the work would be divided as follows: 66 2/3% to be assumed by the railroad company and 33 1/3% to be assumed by the City of Paterson, which would mean that in one event this company would pay about \$800,000, while in the other event it would pay about \$500,000.00.

20
30 I shall be very much pleased to hear from you whenever you have determined whether or not you desire to pursue the subject any further.

Yours truly,

H. J. HARRAHAN,
Vice-President."

Mr. Taylor. When was that dated?

Witness. January 5, 1911.

Q (*By Mr. Merrey.*) Have you got here the tentative sketch referred to in that letter?
40

John F. Fitzgerald, direct.

A Here are the sketches (producing blue prints).

Mr. Merrey. I offer that in evidence.

Mr. Taylor. The commission understands that plan is merely preliminary and tentative sketch and was never worked out to any conclusion.

Witness. This smaller sketch. I understand, at the conference was prepared to show that crossings could be eliminated by groups. That is, the Market street group might be eliminated independent of any group and the River street group might be eliminated independent of any of the other groups. 10

Mr. Taylor. Of course, it speaks for itself. The map does sketch such a possibility, but I must object to Mr. Fitzgerald assuming any motive for Mr. Harrahan or any one else in making the map for this purpose. The map speaks for itself. 20

Commissioner Donges. These will be admitted and marked.

(Smaller blue print is marked Exhibit P-2.)

(Larger blue print is marked Exhibit P-3.)

Q What was the end of the conference?

A The letter was considered by the Board of Trade Committee and then we took the matter before the Finance Commission of the City. The City Counsel at that time said the city, under the State Constitution could not permit its funds to be used for any such purpose. At the time the then City Counsel, McCran, who was a member of the Legislature, informed the committee that a bill was to go before the Legislature at that time known as Senator Prince's Bill, and the matter then rested. 30

Mr. Taylor. I move the testimony be stricken out except what refers to the conference of the Board of Trade and the Erie Railroad Company.

Commissioner Donges. I think it is not pertinent; I think it does no hurt either way and 40

John F. Fitzgerald, direct.

we will let it stand. I don't think it is damaging at all.

10 *Witness.* I might say, at the conference we tried to learn from the officials of the Erie Railroad what the estimated cost of the elimination of each of the crossings and whether the estimate here of \$700,000 for the Market street group, which included Market street, Ellison, Broadway and Hamilton avenue, whether that included any property damage, and if my memory is not at fault at that time the estimate was tentatively given at about \$60,000 a crossing. That \$700,000 estimate included the change of the grade of the street.

Q Later, Mr. Fitzgerald, did you undertake to tabulate what the use was of some of the crossings?

A Yes, four crossings.

20 Q What crossings?

A Straight and Clay street crossings which run together, the Market street, Broadway and River street.

Q When was that done?

A October 4, 6 and 7.

Commissioner Donges. Of this year?

Witness. Yes.

Q And who had charge of that work?

A George J. Hattersley.

30 Q Under you?

A Under me.

Q How many men were employed?

A Thirteen, altogether.

Mr. Taylor. Have you those men here?

Mr. Merrey. Yes.

Mr. Taylor. Let us have them.

Mr. Merrey. We will.

Q Did they turn in a report to you?

40 A They did.

George J. Hattersley, direct.

Q Did they return the actual figures counted?

A They did, which were tabulated by the man in charge, Mr. George J. Hattersley.

Q They did keep the record marked on the paper turned in to you or Mr. Hattersley?

A Yes.

Mr. Taylor. The original tally?

Mr. Merrey. Yes.

10

Q Have you that here?

A Yes.

Q Will you produce it?

A Yes. I might say before Mr. Hattersley is on the stand that our figures included taking pedestrians, trolley cars, autos or automobiles, horse-drawn vehicles, bicycles, and anything else. We didn't attempt to take account of the persons in cars.

Q In trolley cars?

A In trolley cars, but we supposed from a cursory view— 20

Mr. Taylor. Never mind that.

Witness. I am talking of the Public Service Corporation.

Mr. Taylor. I object to that.

Commissioner Donges. Do you care to examine?

Mr. Taylor. No cross examination.

GEORGE J. HATTERSLEY, sworn on behalf of 30
petitioner.

Direct examination by Mr. Merrey.

Q I show you a number of papers fastened together and marked "Summary of October 4, 1913," and ask you if you know what this is?

A Yes, sir.

Q What is it?

A That is a summary of the figures taken by pedestrians, trolley cars, horse-drawn vehicles, bicy- 40

George J. Hutterling, direct.

cles, gates, showing the number of times the gates were down, movement of passenger trains passing by, freight trains drilling on the crossing.

Q Over what crossings?

A Clay street, Market street, River street, and Broadway.

Q When were they made?

10 A October 4, 6 and 7.

Q Under whose direction or charge?

A I am directed to take charge of it by Mr. Fitzgerald.

Q How many had you in your employ?

20 A Two at Clay street, one working from five in the morning until two in the afternoon, and one from two in the afternoon until eleven at night. Market street two men working from five o'clock in the morning until two in the afternoon and two others from two in the afternoon until eleven o'clock at night. Broadway two men from five o'clock in the morning until two in the afternoon—rather one I should say, one, and one from two o'clock until eleven o'clock at night. River street we had one man from five o'clock in the morning until two in the afternoon and another man from two until eleven at night.

Q What were these men doing?

A The men counted the pedestrians as they went over the crossings—

30 *Mr. Taylor.* This is what you instructed the men to do?

Witness. I instructed those men to get the number of pedestrians that went over the crossings, get the number of trolley cars and also note down the number of times the gates went down, the number of passenger trains that went by, the number of freight trains, the number of times drill engines went by, and also take the number of bicycles, and note any unusual happening that occurred at these different crossings.

40

George J. Hattersley, direct.

Q Did you assist in any way in doing this work?

A I visited the men at five o'clock and collected the data at eleven o'clock at night. I visited the crossings several times during the day. When the men wanted relief I offered my assistance; if they did want relief.

Q After the day was over did they return the report?

10

A They returned the report at the end of the day.

Q I show you another paper marked "Clay Street"; is that the report turned in from Clay street?

A It is.

Q And the name signed at the bottom, I notice, is John L. Radcliffe?

A John L. Radcliffe, that is the name of the man who was working from five to two o'clock, five in the morning until two in the afternoon shift.

Q Each of these men turned in a report of that kind?

20

A They did.

Q How many days was that kept up?

A Clay street two days, Broadway two days, Market street and River street three days.

Q Have you summarized that return?

A I have, yes, sir.

Mr. Merrey. If you don't object at this time I will offer this summary.

Mr. Taylor. I don't object to the summary if this is put in later on.

30

Q There are four; will you identify them and tell us what they are?

A This sheet is a report—

Commissioner Donga. Is that the same crossings?

Witness. That is Market street (indicating) and this is River street (indicating); and that is Broadway and Clay street (indicating).

40

George J. Hattersley, direct.

Q What day?

A October 4.

Commissioner Danges. Those four crossings for the same day?

Witness. The same day.

Q The fifth paper you have is a summary of the four crossings?

10 A Four crossings.

Commissioner Danges. That better be marked as an exhibit.

Q The first sheet shows the hour?

A Every two hours, except the last period, eight to eleven, that was three hours.

Q The fifth sheet shows the total?

A There is one from one to two and from eight to eleven; the others were in two-four shifts.

20 *Mr. Taylor.* That exhibit comprises five sheets?

Mr. Merrey. Yes.

Mr. Taylor. Four of them showing four individual crossings and the fifth a summary covering October 4?

Mr. Merrey. Yes.

(Same is marked Exhibit P-4.)

Q October 4 was Saturday?

30 A Yes.

Q Sunday did you take a tabulation?

A No, sir.

Q This would be Monday (indicating)?

A Yes.

Q Is that made the same day?

A Yes.

Q Have you the paper before you?

A I have, sir.

40 Q Is it kept in the same fashion as the last exhibit?

George J. Hattersley, direct.

A Identically the same.

Mr. Merrey. I offer this in evidence.

Mr. Taylor. It covers the same streets?

Mr. Merrey. Yes.

(Same is marked Exhibit P-5.)

Q You have a summary of October 7; what does that cover?

A Covers tallies kept of Market street and so forth.

Q In the same fashion as the last two?

A Yes.

Q What is the date?

A October 7.

(Same is marked Exhibit P-6.)

Q What have you in your hand there?

A I have a record here showing the comparison of the figures covering the entire work.

Q Three days?

A Summary of three days, Market street and River street and Clay street and Broadway.

Mr. Merrey. I offer that.

Witness. I have also records here showing the number of pedestrians crossing Clay street for two days, October 4 and 6 every hour; that report covers the crossing; I show the average length the gates were down.

Commissioner Donges. Taken from the memorandum subject matter made by the census takers?

Witness. Yes, sir.

Mr. Taylor. Nobody said anything about the length of time the gates were down.

Witness. I kept track of it myself.

Q I notice on this sheet the average length of time the gates were lowered was fifty-three seconds?

A Yes, sir.

Q Where was that taken?

George J. Hattersley, direct.

A Market street.

Q And taken for the other gates?

A An average for the other gates. I took it from a four hour average on Market street.

Q I notice here the record shows the average length of time the gates were lowered is fifty-three seconds?

10 A Yes, sir.

Q Tell us what crossings that applied to and how you obtained that average?

A On Market street from two in the afternoon until half-past six on Monday, October 6, I took a record of the length of time the gates were down from two in the afternoon until about half-past six and then averaged the length of time.

Commissioner Dinges. You used a stop watch?

20 Witness. I used a stop watch. I computed the length of time the gates were down by the number of times the gates were down and found the average was fifty-three seconds. There were times when the gates were down much longer than that.

Q What was the longest time?

A I think two minutes, forty-five seconds.

Q And the shortest?

30 A About thirty seconds, I should judge. The time the gates were down thirty seconds it appeared to me to cover a lowering of the gates for no purpose whatever because the gates went down and nothing went by. This was in the afternoon, daytime.

Q (By Mr. Taylor.) Do you know whether a train was approaching at those times?

40 A There were no trains approaching. The gates were also lowered when a train reaches Essex street. Sometimes the gates were lowered for some purpose, whatever it was I don't know, there was no train in sight; whatever the purpose was I can't state.

George J. Hatteraley, direct.

Q That was Market street?

A Market street.

Q (*By Mr. Merrig.*) Do you know whether it is a habit at Market street that the gates be lowered twice for each train that approaches from the east?

A From the east, New York.

Q One time in case the train should overrun the station and cross the street?

10

A I presume that is the reason for lowering the gates. If the train doesn't stop before it reaches the crossing it goes over the crossing and it is lowered when it reaches Essex street.

Q And it is lowered after it goes out of the station?

A Yes.

Q The gates at two places are lowered more frequently than the trains passing as shown on the table?

A Yes, sir.

20

Q It shows the trains delayed north of Market street approaching the crossing because there was a train in the station?

A Yes, sir.

Q In that case the gates are down without a train crossing?

A I don't quite understand.

Q The trains would be stopped north of Market street?

A Yes.

30

Q In order to prevent accident in any case of failure of the brakes the gates were lowered?

A Yes.

Q (*By Mr. Taylor.*) The trains stop north of Market street?

A They do.

Q When there is another train in the station?

Mr. Merrig. Yes.

(Same is marked Exhibit P-7.)

40

George J. Hattersley, cross.

Cross examination by Mr. Taylor.

Q Did each one of your men keep an actual account of the persons handing in an original tally sheet to you?

A Yes, sir.

10 Q Did you get it from one man who handed it to another and from that man's hands to you, or did it come direct?

A The last shift in the afternoon handed it to the man who relieved him and he handed it to me.

Q Did you visit each one of these crossings during the day?

A I did, sir.

Q Did you visit each one of the men on duty?

A I did.

Q Sometime during the day?

A Yes, sir.

20 Q Were they carrying out your instructions at the time you visited them?

A Yes, sir.

Q How many visits did you make each one of these men?

A About three times a day.

Q Visiting each one three times or three times a day?

A Three times, each man at each crossing.

Q That makes six times or nine times?

30 A Three times during the day at each crossing.

Q One time for each shift; you have three shifts or two shifts?

A Two shifts.

Q Visited one shift twice and the other two twice?

A No, each shift three times.

Q At each crossing six times?

A Six times.

Q How long did you stay each time?

40 A I didn't stay longer than five or ten minutes at a time.

George J. Hattersley, cross.

Q So your personal knowledge of what they did is limited to what happened while you were there?

A Of course.

Q In making these compilations you assumed they had done what you told them to do and what they were doing while you were there, is that the idea?

A That is the idea.

Q When you saw the gates at Market street go down and no train cross the crossing do you know whether or not there was a switch engine approaching the street in either direction? 10

A Yes, I didn't know that.

Q You didn't know it?

A I didn't know it.

Q There was nothing approaching?

A I did not see anything approaching.

Q You looked?

A I looked. 20

Q There was nothing approaching?

A As I stated a little while ago, several times when the gates went down there was actually nothing approaching.

Q Those times were included in the count?

A Yes, the gates were down thirty seconds.

Q Did that occur anywhere except Market street?

A I can't say.

Q Can you say it didn't occur at any place except Market street? 30

A No, I couldn't say; I was not at the crossings as long as at Market street and the same condition might have existed there.

Q How long were you at Market street?

A October 6, from two in the afternoon until half-past six at night.

Q You were there practically all afternoon?

A All afternoon.

Q During that time you saw the gates close when there was no train approaching? 40

George J. Hattersley, cross.

A No train at all.

Q You say the men watching at the crossing reported that circumstance to you; that the gates went down with no train approaching?

A Yes, they reported that. We didn't note that on the report, but kept a tally of the gates down.

10 Q It is included in the tally of the number of times the gates went down?

A Yes, the number of times the gates went down is included in the tally.

Q You understood then after the crossing gates went down no train approached or went over the crossing?

A That was their report.

Q You kept this tally of pedestrians, trolley cars, horse-drawn vehicles, automobiles, bicycles, delayed at Market street yourself, didn't you?

20 A No, sir.

Q That was made up and a report turned in by the men working at that crossing?

A Yes.

Q How did you expect them to keep that tally?

A I told them to count the number of pedestrians walking across there, also the number of horse-drawn vehicles, automobiles, trolley cars, bicycles, all such other traffic as might find it necessary to go over those crossings.

30 Q You mean all that went over were included in those delays. I am talking about the item of pedestrians delayed and so forth?

A That means this: That shows the number of pedestrians delayed every hour.

Q No, it says "all day." Pedestrians delayed by lowering gates all day.

A Could I look at that? (Examines paper.) Yes, that is right. That is what it means; delayed all day.

40 Q How is it made up; what instructions were given them as to how to make that up?

George J. Hattersley, cross.

A They didn't make that up at all. That is computed from the figures arrived at by the gates being down fifty-three seconds. That is the average struck. If the gates were down fifty-three seconds so many hundreds of times during the day, that means the gates were down so many hours. The lowering might be three hours and so many minutes the gates were down. If so many pedestrians can go over the crossing in an hour, it means so many were delayed the length of time the gates were down. 10

Q That is based on the assumption there was an absolutely steady stream—

Mr. Merrey. I don't object to leaving out that table.

Commissioner Donges. That is estimated by the average number of persons in an hour in an average length of time the gates were down. 20

Q It is based on the assumption that the pedestrians were going over there at a steady rate all day long?

A Yes, it is; but we can assume this, as taken actually by the busy hours of the day, there is no question but the number of pedestrians delayed is much larger than that.

Mr. Taylor. I object to that conclusion; there is no evidence as to that at all.

Mr. Merrey. It is wholly a matter of estimate. I didn't know that he had that. If you want it in all right. If you don't want it in all right. It is an estimate of what might have happened or not. 30

Mr. Taylor. The same thing applies to the trolley cars delayed, horse-drawn vehicles delayed, and bicycles delayed; it is all computed from the figures.

Witness. Computed from the figures.

Mr. Taylor. I think that should be stricken out. 40

Commissioner Donges. That will be excluded.

George J. Hattersley, cross.

Q The total length of time the gates were down; how was that arrived at; you kept it yourself or was it kept by them?

A Myself.

Q With a stop watch. That was from two to half-past six one afternoon you kept it yourself?

A Kept it myself.

10 Q How did you do it the rest of the time?

A It wasn't done at all the rest of the time, with the possible exception of each time I visited the crossing—I visited these men—I would use the stop watch and time the gates. Then when I wasn't visiting these men, when I was in actual contact with the men, such as the night time, the timing of the gates was done. The average is taken on the number of times the gates were down in Market street; I found the average was practically the same on each of the other crossings.

20 Q Did you direct your men to keep the actual number of times the gates were lowered all day?

A Yes.

Q The actual number of times the gates were lowered by count?

A Yes, by count.

Q You made an average of the time the gates were down while you were there?

A I did.

30 Q And you applied that average to the total number of times they counted all day?

A Yes.

Q That is the total number of times the gates were down multiplied by your average for the number of times, is that correct?

A Yes.

Mr. Taylor. I move that be stricken out.

Mr. Merrey. I don't care whether it is in or not.

Commissioner Donges. It will be excluded.

George N. Courtade, direct.

GEORGE N. COURTADE, sworn on behalf of petitioner.

Direct examination by Mr. Merrey.

Q Mr. Courtade, were you employed under Mr. Hattersley to keep tallies of certain things on the Market street crossing?

A Yes, sir.

10

Q I show you a number of sheets here marked Market street, some of which are signed by you?

A Yes.

Q Were those made by you?

A All that I have signed.

Q Tell us just what you did at the Market street crossing. When did you go there?

A I was supposed to report there at five o'clock in the morning.

Q What time did you report?

20

A About ten minutes of five.

Q Did you have these sheets with you?

A Positively, yes.

Q Who furnished them to you?

A Mr. Hattersley.

Q When you arrived was anybody with you?

A Mr. Keys.

Q Tell us what the two of you did?

A Well, my instructions were the same as his; to go there and get the pedestrians that crossed that crossing from five o'clock until two; five o'clock in the morning till two o'clock in the afternoon, no matter how many times they crossed as long as they crossed that track. The same was done with vehicles, bicycles, autos, we got the trains, passenger trains, freight trains, drill engines, and gates down.

30

Q Where did you place yourself?

A Why, at a point between—that is on a point—Market and Park avenue.

Q What is the point called the flatiron?

40

A Yes.

George N. Costade, direct.

Q (By Mr. Taylor.) The east side of the track?

A Yes.

Q (By Mr. Merrey.) Where did Keys place himself?

A Just opposite on the Market street side. I was on Park avenue and he on Market street.

Q Did you make any arrangement between yourselves as to how you would count?

10 A Yes.

Q What was it?

A It was to take anyone going up and down Park avenue; he was to take anyone up and down Market street. I was to take all eastbound trains going west and he was to take westbound trains going east or anything else.

Q So your work didn't duplicate?

A No, it couldn't.

20 Q In order to find the total it was necessary to add together the two figures?

A Yes.

Q Yours was the eastbound and his the westbound trains?

A Yes.

Q How did you keep a record of them?

A Why, every person that went by I tallied.

Q Marked on this (indicating)?

30 A I had an extra piece of paper tacked on here; when the crowd was small I tallied one. As the crowd got bigger I took groups of ten, marked ten, and grabbed another ten and marked ten or fifty on the tally.

Q Were you there three days?

A Three days.

Q From what time?

A Five to two in the afternoon.

Q Are all the reports of all the work there that you made?

40 A Yes, sir.

George N. Courtade, cross.

Q Are those the sheets as you made them?

A Yes.

Q Who did you deliver them to?

A Mr. Hattersley.

Q Who relieved you?

A My relief man was Mr. Coates.

Q Who relieved Keys?

A That I don't know; I didn't know the young man's name. We didn't have much time to get acquainted. 10

Q You left when he came there?

A Yes.

Cross examination by Mr. Taylor.

Q Who did you get your instructions from in regard to this?

A From Mr. Fitzgerald and also Mr. Hattersley.

Q At what time?

A We did, perhaps three days ahead, and Mr. Hattersley just before we went to work. 20

Q Was Mr. Keys there at the same time you got your instructions?

A We were all there.

Q What do you mean by all there?

A All the men employed on the crossings.

Q Who else was there, do you know?

A I don't know the name; Mr. Keys, Mr. Dunn, Mr. Radford, was there—several.

Q Anybody else you know? 30

A No, it was a regular school that day; a school of instruction.

Q You were all given instructions at the same time?

A We were told what our duties were, yes, sir.

Q Did you make any sheets while you were there at this crossing which you didn't sign?

A No, sir.

Q I thought you just said you had some supplemental sheets you took? 40

George N. Courtade, cross.

A Not signed. I had a little piece of paper where I tallied pedestrians, in order not to put one down on one sheet, I put a mark on the small sheet.

Q What did you do with that piece of paper?

A I didn't think it was necessary and tore it up.

Q What did you do with them?

A They were no record, just for my own use.

10 Q I asked you what you did with them?

A Tore them up.

Q Tore them up as you went along?

A No, I kept them a couple of days after. I didn't think they were any more use.

Q These are not the original records which you made at the time?

A Yes. They were the original records.

Q When did you fill in the figures on these sheets you signed?

20 A Perhaps one or two minutes after, two minutes, maybe three minutes.

Q Did you put on any after, or while you were on the crossing?

A No; I never got that far; while there was a little slack I counted off the sheets.

Q You took these sheets and put them down?

A On the tally.

Q You didn't destroy the sheets until a few days after?

30 A A couple of days after, because I made the tally on the big sheet.

Q Did you check them up with the sheets afterwards?

A Afterwards? No, I knew I was correct.

Q On one of these sheets I notice you have about ten or fifteen bunches of tens; how do you know you didn't have some of those down twice?

A I know I didn't.

40 Q How do you know you didn't skip any?

George N. Courtade, cross.

A I am pretty positive sure in answering the question; as positive as you are asking the question.

Q Did you have a system?

A I did, I made it in my mind.

Q What was the system?

A When the crowd was small I would tally on the small sheet one mark as a pedestrian passed and get to four; if five passed I marked a cross over indicating five.

10

Q There seems to be very little of that, because you have almost no individual checks on those sheets?

A You will find some there. When the crowd got so enormous going across, I took groups of ten, fifty sometimes, one hundred, sometimes two hundred; especially between the hours of eleven and two, or eleven and one.

Q In those cases what was your system?

A Grouping them as they go by, one, two, three, four, five, six, and seven, five, ten, fifteen and twenty-five counted up as the crowd was going by and then have the tally on the sheet.

20

Q You would have to take them as they came?

A I couldn't stop to mark down.

Q You just glanced over the crowd?

A Not glanced; looked at them.

Q Counting as near as you could as they went past you?

A Positively.

Q You think you got all of them?

30

A Pretty sure.

Q (*By Commissioner Donges.*) Did you estimate the number in groups?

A No; they almost always came in fives or tens.

Q (*By Mr. Taylor.*) There were accommodating not to come in sevens and eights?

A They were loose, then they would come in groups of ten or fifteen; I would get them the best I possibly could.

40

George N. Courtade, cross.

George N. Courtade, cross.

Q (By Mr. Hervey.) You only had one side of the street?

A One side of the street; it was very easy for me to get it.

Q (By Mr. Taylor.) One side of the crossing or of Park avenue?

A One side of the crossing.

10 Q The people who went directly across Park avenue?

A Yes, because more people were going up Park avenue.

Q You are more familiar with the situation than I am. I think it would be difficult for Mr. Keys to tell whether a person came from Park avenue or Market street; how could he tell?

20 A The man would have to pass him to the tracks. Anybody that had come on Park avenue on to Market street would have to pass me.

Q Which side of the street was Mr. Keys on?

A On Market street.

Q Which side of the tracks?

A Easterly side of the tracks.

Q The same side you were?

A We were both on the easterly; at a point we could see everybody coming.

Q He was on Market street and you on Park avenue?

30 A Right at the flatiron.

Q I thought you said Keys was on the other side of the track?

A No, we were both together, not two feet apart.

Q You didn't keep track separately of the number of people passing to the station or coming away from the passenger station?

A If they crossed the tracks we kept them.

Q You didn't keep separate count of them?

40 A Not as long as they crossed the tracks. The instructions were to take any one crossing the tracks no matter how many times they went over.

George N. Courtade, cross.

Q Do you know whether or not all the people you counted went over across the tracks?

A Positively.

Q Did you watch from one side of the track to the other?

A At my point.

Q I think you would lose one or two to watch them all across the track?

10

A No. It is hardly possible to get them in big rushes. I think I missed more than I put on.

Q It is a sort of estimate in a big crowd.

A I can't say as it was; not an estimate; it was a count.

Q Did you count everybody coming down Park avenue to the east?

A Going over the tracks.

Q You didn't count the ones who turned up Hamapo avenue?

20

A No, I couldn't count them because they didn't cross the tracks.

Q Where did you stand?

A That point indicated by Mr. Merrey on the Park avenue side.

Q Were you up against the building?

A Yes, sir.

Q Close to the building?

A In this position (indicating). I was just like that (illustrating). We had to see everybody coming either way. The same way with Mr. Keys.

30

Q About twenty-five feet from the track?

A About that. I couldn't say as it was twenty-five feet hardly.

Q You didn't count these people until after they had gone on the track?

A As soon as he put his foot on the track he is credited as going across; if he comes back he is credited with coming back.

Q You didn't count him when he passed you?

40

A Yes.

George N. Courtade, cross.

Q How did you know he wasn't going on Ramapo avenue?

A I could see that. Mr. Keys was to take that.

Q No, because the people come out of Park avenue.

10 A Yes, if they go to his point he takes them. If they come out of Market street to my point I take them, so we don't get mixed up.

Q Those people that turn down from Ramapo avenue to Park avenue neither took them?

A He says look out, don't check them. I tell him the same way when they come out of Crosby Place. The same with passenger trains east, I said John, train for you, or I said, Jack, a train for you; or coming west he would say George, here is a train for you.

Q Everybody who went up Ramapo avenue to the Susquehanna he would strike off his list.

20 A I would say, John, that is my man; he would say, all right. We had a pretty good system.

Q Coming the other way, coming down Park avenue, suppose a man passed you and turned down to Ramapo Place, I understood he would be Mr. Keys' man.

A Yes.

Q What did you do?

A We didn't mark him. We couldn't credit him with going across.

30 Q You didn't mark him because he was Mr. Keys' man or because he didn't go across?

A He didn't take it. I would say to John, that man is going on Ramapo avenue, or on Crosby Place he would tell me the same way.

Q Did you have many more conversations during the day?

A We didn't have any chance. There were times we couldn't look at one another.

Q You mean you were too busy?

40 A Yes.

George N. Courtade, re-direct.

Q You don't note any particular case of people turning on Ramapo avenue or Crosby street?

A Yes, I noted several. Sometimes people would come from Crosby Place right straight across. We couldn't credit them.

Q You paid no attention to them?

A Yes.

Q What did you do with them?

A We didn't put them down? We had to see they didn't go over the tracks. That is the attention I paid to them. 10

Re-direct examination by Mr. Merrey.

Q There wasn't any unusual crossing of the tracks and coming right back again on that day?

A No.

Q It was the ordinary traffic?

A Yes.

Q Is there much traffic from Park avenue coming down into Crosby Place? 20

A How do you mean?

Q Are there many people coming down Park avenue and turning into Crosby Place?

A Very seldom.

Q Where does Crosby Place lead?

A Into the Straight street station.

Q It would be much shorter for people to turn into Straight street and reach the Susquehanna station if they wish? 30

A Yes.

Q Are there many people going down Ramapo avenue?

A Not so many.

Q What is there along there?

A Saloons.

Joseph Coates, direct.

JOSEPH COATES, sworn on behalf of petitioner.

Direct examination by Mr. Merrey.

Q Mr. Coates, were you employed by Mr. Fitzgerald and Mr. Hattersley to take account of the pedestrians crossing the Erie Railroad?

A I was.

10 Q Whereabouts?

A Market street.

Q How many days were you there?

A Saturday, Monday—the 4, 6 and 7.

Q Tell us just what you did there.

A We had about the same system as Mr. Courtade.

Q Who was with you?

A A fellow called Coburn.

Q Where did you stand?

20 A Part of the time at the intersection of Park and Market streets and close to the track when the traffic got heavy. The Susquehanna trains discharged traffic; when the traffic was extraordinarily heavy on Market coming toward Park, we would get on the other side.

Q Right at the triangular building?

A Yes.

Q What did you do, mark on this paper?

A Yes.

Q Your records are there?

30 A Yes.

Q Did you sign each sheet when completed?

A Yes.

Q What did you do with them?

A Turned them in to Mr. Hattersley. I started at two o'clock and was off at eleven.

Q From two until eleven?

A Yes.

Q What did you mark down on the paper?

40 A I didn't use a scrap sheet; I bunched them in tens.

Joseph Coates, direct.

Q That is the pedestrians?

A The pedestrians.

Q You say you grouped the pedestrians you counted?

A Counted ten, perhaps fifteen, kept that other five in my mind, three or two, and matched up ten. Marked it on the original sheet.

Q Did you keep track of the trains that went by? 10

A Westbound trains.

Q Did you keep track of the vehicles?

A Yes.

Q You separated the automobiles?

A Yes, separated the automobiles, bicycles, and horse-drawn vehicles.

Q Did you notice trolley cars going by?

A Trolley cars up and down Park avenue?

Q How did those cars run as to whether they were full or empty? 20

A That I didn't notice; I wasn't instructed to notice at all; I tabulated the cars.

Q The passengers on the cars were not noticed?

A No, they were not included.

Q You made that report and signed your name to it as you find it there now?

A Yes.

Q For three days?

A Yes.

Q You say Coburn was with you? 30

A Yes.

Q Where did he stand?

A At the intersection of Market street; at the same point, you know—

Q Did you have an understanding with him?

A We handled everything practically the same system as was just previously stated. He would have the travel all the territory touching the railroad coming down or going up Market street that would be on a line with Market street. Anything touching the 40

Joseph Coates, cross.

railroad crossing, but in the line of Park avenue, I handled. Pedestrians coming down Market street on the east side of the track and swung on the north side of Market street he became mine and I tallied him. You might say the outer edge of the railroad track and the street away out to that intersection point, whatever pedestrians passed that I tabulated.

10 Q Did you talk about apportioning it in two?

A No, that was the instructions first; that was the agreement between both of ourselves.

Cross examination by Mr. Taylor.

Q Your system seems to be a little from the other. If a man came down Market street and crossed from the east to the west and got to the north side of the street you counted him?

20 A Yes. He would intersect Park avenue just about half way in the railroad track, in that way he became my property as it were.

Q Who was the man on with you?

A Coburn; I never met him before that time.

Q You said you did not talk with him as to the matter in which to count.

A Yes; we made that arrangement between ourselves how we would handle the traffic.

Q I thought you said you were instructed by Mr. Hattersley.

30 A No; we used practically the same plan. We devised our own plan.

Q You thought it out with the gentleman on the crossing with you and agreed to divide it that way?

A Exactly, now you have it.

Q All your sheets are there?

A Yes.

Q Did you make any sheets you didn't sign?

A No.

Q That is your signature? (Indicating.)

40

A Yes.

George N. Courtade, cross.

Q You made none that you didn't sign?

A No.

Q Do you know whether they are all in here or not?

A No, I just simply seen one, I ought to modify that, I see there isn't.

Q How many did you have?

A From two to four. We should have twelve sheets there. 10

Q You should have twelve sheets to cover it all?

A Twelve sheets to cover it all.

GEORGE N. COURTADE resumes the stand.

Cross examination by Mr. Taylor.

Q How did you and Mr. Keys count a man coming down or up Market street from the east across the tracks and swung to the north side, to the opposite side; did you consider it Market street or Park avenue? 20

A Park avenue.

Q You counted him?

A Yes.

Q I thought you said you limited your count to Park avenue?

A Yes; if a man passed Park avenue down here (indicating) he was Mr. Keys; when a man came on Market street and crossed in that direction (indicating) I took him. The other men were contrary to what we were. 30

Q Suppose a man was walking across the middle of the two streets you would both count him?

A Yes, sir, both count him.

John Radcliffe, direct.

JOHN RADCLIFFE, sworn on behalf of petitioner.

Direct examination by Mr. Merrey.

Commissioner Donges. Are you going to call all the men who took the count?

10 *Mr. Taylor.* I don't know as it is necessary to call them all; what ones have you got? Call one for Clay street and another for River street and the two Broadway men.

Mr. Merrey. I haven't the men that were on the other Market street crossing.

Mr. Taylor. As to the men that were on the other crossing you can swear them all and prove satisfactorily to me they attended this school class and afterward kept actual count of these crossings.

20 Q Mr. Radcliffe, did you keep account of the number of pedestrians and vehicles and number of times trains passed and gates went up and down at the Clay street crossing?

A Yes.

Q You did that?

A Yes.

Q Is that the sheet showing the count kept by you?

A Yes, sir.

Q They are signed by you, are they; five?

30 A They are signed by me.

Q And they were kept by you?

A Yes.

Q You noted the number of people passing and all the information set down there?

A I did.

Q You did that how many days?

A Two days.

Q What days?

A Saturday and Monday.

William J. Dunn, direct.

Q What hours?

A From five to two.

Q From five in the morning until two in the afternoon?

A Yes, sir.

Mr. Taylor. No cross examination.

WILLIAM J. DUNN, sworn on behalf of petitioner. 10

Direct examination by Mr. Merrey.

Q Did you keep a tabulation in River street?

A Yes, sir.

Q I show you some sheets here, several of them, signed William J. Dunn.

A Yes, they are mine.

Q Those were kept by you?

A Yes.

Q What did you note, the number of pedestrians passing River street, the number of trolley cars, horse-drawn vehicles, bicycles, and the number of times passenger trains and freight trains passed? 20

A Yes, I did.

Q Did you turn those over to Mr. Hattersley?

A Yes, with the exception of one sheet, and that I gave to the man who relieved me.

Q What hours were you on?

A Five in the morning until two in the afternoon.

Q These sheets were kept in two-four periods? 30

A Yes, with the exception of the last sheet. That was kept from one to two.

Q That is all indicated on those sheets?

A Yes.

Q That is a true count?

A That is a true count, the best we could keep.

Mr. Taylor. No cross examination.

James J. Troy—Walter C. Furlong, direct.

JAMES J. TROY, sworn on behalf of petitioner.

Direct examination by Mr. Merrey.

Q Mr. Troy, did you assist in this count of the pedestrians and vehicles crossing Broadway in the City of Paterson?

A Yes.

10 **Q** How many days were you there?

A Two.

Q What hours?

A From two in the afternoon until eleven at night.

Q I show you some sheets signed James J. Troy, is that a true record?

A Yes.

Q You signed that?

A Yes.

20 **Q** It is true, it is a true count of the people passing, as it purports to be?

A Yes.

Q The same with the second day?

A Yes.

Q That is your signature on those sheets, too?

A Yes.

Mr. Taylor. No questions.

30 **WALTER C. FURLONG**, sworn on behalf of petitioner.

Direct examination by Mr. Merrey.

Q Did you assist in the count at Broadway crossing?

A Yes, sir, I did.

Q At what hours were you there?

A Five in the morning until two in the afternoon.

Q What days?

40 **A** Saturday, October 4th, and Monday, October 6th.

Discussion.

Q I show you some sheets here signed Walter C. Furlong, a detail of that count; were those kept by you?

A Yes, sir.

Q Is that a true count of the matters it purports to show?

A Yes, sir, the best of my ability.

Mr. Taylor. No cross examination.

10

Mr. Merrey. This seems to be all the witnesses we have on this Paterson count at present. I have also present some employees of the street department who, in March and April last, kept a similar report of which I have the summary. It is probably too late to go on with that. Mr. Taylor, if you wish a copy of this, it is here. This report was on all the crossings and it seems to tally fairly well with this, except the Clay street crossing. At the time the original count was kept there was a strike and a large number of idle men; the number counted by the Board of Trade is double that counted by the City. The explanation is work was commencing and the number using the crossing was different.

20

Mr. Taylor. We will have to go into it at another time, as you say.

Mr. Merrey. This count was made in a similar way, except Market street.

Commissioner Donges. We will take it up at some further day. It appears in the course of taking the testimony that the Western Union Telegraph Company has some interest in telegraph lines. I understand it is agreed by all parties the Western Union Telegraph Company shall be made a party.

30

Mr. Merrey. Yes, sir.

Commissioner Donges. That being the case, Mr. Merrey will be required to serve them.

40

Discussion.

Mr. Taylor. I make the point, they are necessary. I am unfortunately in the position I don't want—this situation is so vital to the Erie Railroad I can't waive anything; they should have been a party heretofore; I simply raise the point they should be a party.

10 *Mr. Merrey.* I ask they be made a party. The service was made heretofore by the commission and not myself. If you wish I will add an amendment to my petition that we pray now the Western Union should be made a party, as they have wires along the right of way.

20 *Commissioner Donges.* Couldn't you furnish a copy to the Western Union. It didn't appear the Western Union had any interest in any property to be affected. Mr. Taylor doesn't concede to it, but suggests they are a necessary party. Nobody else seems to object to their being made a party at this time so the proceeding will be, you will be furnished a copy and serve them and give them notice of the continuance of the hearing.

Mr. Merrey. Yes, sir.

30 *Mr. Taylor.* I would like to say this; as far as taking testimony of the sort taken to-day, whatever men Mr. Merrey may want to offer, any time is as good as another. As far as getting into the question at the different crossings, the study of what might be done and what should be done, we won't be in a position to take that up for a considerable length of time. We want to make such a study; it is a matter of long work. There is a great deal of fundamental work in the way of surveys which will have to be done for the purpose of making the study. We will have to make a study of our roads for the Interstate Commerce Commission and we propose beginning that work in Paterson for the purpose of using

Discussion.

the data for that purpose. It will be some weeks before we will have the engineers available to do that kind of work.

Commissioner Donges. Well, we can go on with the testimony in the matters that the petitioner desires to submit.

Mr. Taylor. I suppose we can, as far as that is concerned. 10

Mr. Merrey. When will we have your answer?

Mr. Taylor. It is very difficult for me to fix an exact date. Mr. Hobart is in court to-day.

Commissioner Donges. Within two or three days you said.

Mr. Taylor. Within a few days. It rests with Mr. Hobart. We will get it in a short time—when do you propose having the next hearing, Mr. President? 20

Commissioner Donges. In two weeks.

Mr. Taylor. I think we can undertake to serve an answer before the next hearing.

Commissioner Donges. The Erie Railroad will file its answer and notice will be given the Public Service Railway Company and other respondents to answer.

Mr. Merrey. All right.

Adjourned until Friday, October 31, 1913, at 30
the Court House, Newark, N. J., 10.30 A. M.

Discussion.

SECOND HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Newark, N. J., Friday, October 31, 1913.

PATERSON GRADE CROSSING ELIMINATION, }
ERIE RAILROAD COMPANY. }

10 Before Commissioners Donges and Daniels. F. H. Sommer, Esq., Counsel.

For the City of Paterson appears R. B. Lewis, Esq.

For Erie Railroad Company appears H. A. Taylor, Esq.

For Public Service Railway Company, Public Service Gas Company, Public Service Electric Company appears L. D. H. Gilmour, Esq.

20 *Mr. Gilmour.* The secretary asked the Public Service Railway Company, the Public Service Gas Company and the Electric Company to file answers. I suppose all that the commission wants for the record is that the appearance should be entered for those companies.

Commissioner Donges. No.

Mr. Gilmour. We have no answer filed.

30 *Commissioner Donges.* We want an answer to the allegation of the petition, insofar as your company is able to answer them, in respect to its own property.

Mr. Gilmour. The allegation in respect to the railroad company is that they cross the tracks at one or two points. Of course that we can't submit.

Commissioner Donges. That is so, the record will show by formal pleading what is admitted and what denied.

Mr. Gilmour. I didn't understand that. I would be glad to do that as of the first hearing.

40 *Commissioner Donges.* All right. Answer so much as relates to your property.

Mr. Taylor. Mr. Chairman, I have handed to Mr. Sommer, with the request that he file with the secretary, a copy of our answer. I have also handed him a copy of the answer of Mr. Lewis representing the city. I have one or two additional copies here I would be glad to hand you.

Mr. Lewis. Before proceeding I would like to move that Exhibits P-4, P-5 and P-6 be extended and put into record. They were not put in at the last hearing. That is the summary. 10

Commissioner Donges. I think it was agreed at the last hearing that they should be put into the record subject to the right of cross examination if Mr. Taylor desired.

Mr. Lewis. They are marked as exhibits and were offered.

Mr. Taylor. Well, I think the understanding was that these were to go in at the convenience of the commission and counsel, but to be supported by the originals from which these computations were made. Those originals I think could properly be filed with the commission in a body as one exhibit. 20

Mr. Lewis. We will file all the exhibits if you wish.

Mr. Taylor. I think we should have the opportunity to check up the summaries from the original records that were made. 30

Commissioner Donges. I think the testimony disclosed in some cases that entries were made in the first instance on these sheets.

Mr. Taylor. Not on these sheets.

Commissioner Donges. What they called B sheets.

Mr. Taylor. It appeared in some cases the men at the crossings threw away the original scrap sheets. I am not asking for those, but I ask the records these summaries were made from, the 40

Exhibit P-4.

original records kept at the crossing—the others are records made by the men at the crossings, as I understand, from such original records as they had.

Mr. Lewis. I am going to offer them all.

Mr. Taylor. That is all right.

10 *Mr. Lewis.* Mr. Taylor wanted the opportunity to examine two men who were not here at the last time on the Market street crossing.

Commissioner Donges. These are marked. (Indicating.)

Mr. Lewis. They are offered, but according to the copy of the testimony, were not put in.

Commissioner Donges. They will be admitted and marked.

Mr. Taylor. It is understood they are merely summaries.

20 *Mr. Lewis.* Yes.

Mr. Taylor. And not evidence in and of themselves, but are summaries.

Commissioner Donges. Yes.

Mr. Lewis. We will offer all these reports.

Commissioner Donges. Were they not offered at the last hearing?

Mr. Lewis. They were offered; these are three summaries.

30 *Commissioner Donges.* It is your purpose to offer the others later?

Exhibit P-4. Summary October 4, 1913:

Clay Street: Pedestrians, 6,342; trolley cars, —; horse-drawn vehicles, 997; autos, 198; bicycles, 123; gates down, 181; passenger trains, 104; freight trains, 12; drill engines, 59. Market Street: Pedestrians, 34,547; trolley cars, 563; horse-drawn vehicles, 1,901; autos, 1,700; bicycles, 827; gates down, 297; passenger trains, 104; 40 freight trains, 13; drill engines, 47. Broadway:

Exhibits P-5—P-6.

Pedestrians, 9,410; trolley cars, 607; horse-drawn vehicles, 395; autos, 602; bicycles, 169; gates down, 150; passenger trains, 103; freight trains, 14; drill engines, 26. River Street: Pedestrians, 8,947; trolley cars, 252; horse-drawn vehicles, 1,015; autos, 427; bicycles, 351; gates down, 137; passenger trains, 104; freight trains, 13; drill engines, 31.

10

Exhibit P-5, Summary October 6, 1913:

Clay Street: Pedestrians, 5,040; trolley cars, —; horse-drawn vehicles, 835; autos, 238; bicycles, 120; gates down, 207; passenger trains, 103; freight trains, 11; drill engines, 96. Market Street: Pedestrians, 27,029; trolley cars, 592; horse-drawn vehicles, 1,750; autos, 1,555; bicycles, 798; gates down, 188; passenger trains, 103; freight trains, 19; drill engines, 39. Broadway: Pedestrians, 7,166; trolley cars, 597; horse-drawn vehicles, 364; autos, 433; bicycles, 119; gates down, 116; passenger trains, 104; freight trains, 9; drill engines, 9. River Street: Pedestrians, 6,857; trolley cars, 225; horse-drawn vehicles, 1,017; autos, 337; bicycles, 298; gates down, 129; passenger trains, 106; freight trains, 11; drill engines, 38.

20

Exhibit P-6. Summary October 7, 1913.

30

Market Street: Pedestrians, 24,220; trolley cars, 562; horse-drawn vehicles, 1,734; autos, 1,205; bicycles, 623; gates down, 196; passenger trains, 104; freight trains, 9; drill engines, 46. River Street: Pedestrians, 6,932; trolley cars, 212; horse-drawn vehicles, 906; autos, 291; bicycles, 269; gates down, 141; passenger trains, 104; freight trains, 11; drill engines, 36.

40

John Keyes, direct.

JOHN KEYES, sworn on behalf of petitioner.

Direct examination by Mr. Lewis.

Q Mr. Keyes, were you under the direction of Mr. Hattersley keeping a count of the traffic at Market street?

A Yes, sir.

10 Q When was that?

A It was October 4th, 5th and 6th, I think—the 4th, 6th and 7th.

Q I show you a number of sheets purporting to be a record of what you discovered at that crossing. Is that your signature attached thereto?

A Yes, it is my signature.

Q In what manner did you arrive at this tabulation?

20 A Mr. Courtade and I agreed to divide up. I was to take all persons using the crossing going or coming on Market street or Ramapo, and I was to take east-bound trains.

Q What were the dates you said you were there?

A 4th, 6th and 7th.

Mr. Lewis. I offer these in evidence.

Mr. Taylor. How many of them are there?

Mr. Lewis. Fourteen.

Commissioner Donges. As there is no objection they will be admitted and marked as exhibits.

30 (Same are marked Exhibits P-8 to Exs. P-22, both inclusive.)

Mr. Lewis. I believe Mr. Taylor wanted Mr. Keyes and Mr. Coburn for the purpose of questioning the veracity of the count. I believe at the time it was admitted they all acted under the direction of Mr. Hattersley who testified at the last hearing.

John Keyes, cross.

Cross examination by Mr. Taylor.

Q Mr. Keyes, you took the Market street and Ramapo avenue side of this double crossing, as I understand it?

A Yes, sir.

Q Where did you station yourself?

A I stood by the flatiron building.

Q That is right at the junction between Park avenue and Market street? 10

A Yes.

Q On which side of the railroad track?

A On the east side.

Q And where did Mr. Courtade stand?

A He stood the same place, only, like the Market street side.

Q Only on the Park avenue side?

A Right there by the crossing together; I was on the Market street side and he on Park avenue. I was 20 to count Market street and Ramapo avenue side.

Q When he came down Park avenue did you count that person?

A No, I didn't count Park avenue.

Q When he came down Market street from the east you counted that person?

A Yes, sir.

Q When did you count him?

A I counted him as he was going over the crossing, or if I thought they were going over the crossing. 30

Q As they came west on Market street when did you count them?

A As they came across the crossing.

Q You had to watch them from the time they came across the street?

A I had to watch them as they came across. If they came across I counted them.

Q How could you tell whether they turned on Market street or Park avenue?

A How could I tell?

John Keyes, cross.

Q Yes?

A I waited until they came along.

Q Waited until they came past you?

A Yes.

Q You had to watch them cross the tracks until they passed you?

10 A No, when I was sure they were going along Market street I counted them.

Q You didn't follow them to see definitely, but if they turned up Market street?

A They had to pass me.

Q You say you didn't watch them until they passed you?

A Not until they went up the street, no.

Q A person coming down Ramapo avenue from the south, when did you count them?

20 A As soon as I was sure they were going to cross the crossing.

Q What do you mean by when you were sure they were going to cross the crossing?

A When I saw them go over.

Q You didn't count them until they got on the crossing?

A No; when I was sure in my mind they were going to cross there I counted them.

30 Q Did you make any distinction between persons coming from the railroad station and those coming along the street?

A No, I did not.

Q You counted all those that came from the railroad station and crossed the street?

A Yes; they had to come through the gate there. I counted them as they came through the gate.

Q Do you know whether or not Mr. Courtade did the same thing?

A That I don't know. I am not positive.

Q You were on this crossing during what hours?

Isaac Coburn, direct.

A From five until two; from five in the morning until two in the afternoon.

Q Three days?

A Yes; Saturday, Monday and Tuesday.

Q October 4th, 6th, 7th?

A Yes.

ISAAC COBURN, sworn on behalf of petitioner. 10

Direct examination by Mr. Lewis.

Q Mr. Coburn, did you act under the instructions of Mr. Hattersley in taking a record of the traffic on the Market street crossing?

A Yes.

Q During what period?

A October 4th, 5th and 6th; of October.

Mr. Taylor. On what days?

Witness. Fourth, sixth and seventh, rather. 20

Q Of what month?

A October.

Q And you followed out the instructions of Mr. Hattersley as to the taking of the number of people who crossed?

A Yes, to the best of my ability.

Q I show you here some papers showing tabulation; is that your signature attached?

A Yes. 30

Mr. Lewis. I offer these, Mr. Taylor. There are ten.

Commissioner Donges. As there is no objection they will be admitted and marked as exhibits.

(Same are marked Ex. P-23 to Ex. P-32, both inclusive.)

Isaac Coburn, cross.

Cross examination by Mr. Taylor.

Q Who was your partner, Mr. Coburn?

A Mr. Coates.

Q When were you there?

A The fourth, sixth and seventh of October.

Q What were the arrangements between you and Mr. Coates as to keeping track?

10 A I kept as near as possible according to the arrangement Mr. Coates made with me.

Q What was the arrangement with Mr. Coates?

A I stood on the Market street side in the same position Mr. Keyes stood, and Mr. Coates, I believe, stood where Mr. Courtade was standing.

Q How did you keep track of the pedestrians coming from the east on Market street?

A Coming from the east?

Q Yes?

20 A As they passed the gate that was the time I took the count.

Q You counted as they passed the gate; how did you know they came from Market street or Park avenue?

A Coming from Market street or Park avenue?

Q The two streets cross at the same place?

A Yes. As they passed through the gate, that was the time I counted them.

30 Q How did you know whether they came down Market street or Park avenue?

A I didn't know whether they came down Market street or Park avenue. I was counting one crossing. If they came on Market street or Park avenue crossing Mr. Coates counted them.

Q I am talking of the people coming from the east. There is one crossing at this point where both streets cross?

A One crossing.

Q One set of gates?

40 A One set of gates.

Isaac Coburn, cross.

Q At this crossing?

A Yes.

Q You were counting these people coming from the east going towards the center of the city?

A Yes.

Q You counted them as they went under the gate?

A As they passed the gate.

Q How did you know they were coming down Market street from the east or down Park avenue from the east? 10

A I didn't know. As they passed the gate I counted them because they were crossing the railroad at that time.

Q How did you count those who came up Ramapo avenue from the south?

A Coming up Ramapo avenue?

Q Yes?

A As they went across the railroad I counted them. 20

Q How did you know they came from down Ramapo avenue?

A Well, I counted them as they crossed the crossing.

Q Did you know whether they came from Ramapo avenue or not or where they came from?

A No.

Q When the pedestrians were coming from the other direction, from the center of the city, passing easterly over the crossing where did you count them? 30

A As they passed the gate.

Q Passed the gate?

A Nearest to me on Market street.

Q How did you know when they passed the gate they were coming up Market street or up Park avenue or down Ramapo avenue?

A I couldn't tell that. I counted them as they passed the gate.

John Flynn, direct.

Q Did you make any distinction between persons simply going along the street and those going to and from the railroad station, the Paterson railroad station of the Erie Railroad?

A The people that were passing along the street?

Q Did you make any distinction between those passing along the street and those who were going
10 over the crossing to or from the railroad station?

A No, I counted them as they crossed the crossing. That was all I know.

JOHN FLYNN, sworn on behalf of petitioner.

Direct examination by Mr. Lewis.

Q Mr. Flynn, were you employed by the street commissioners of the City of Paterson in keeping a count of the traffic at certain crossings in the City of
20 Paterson?

A I was.

Q When was that?

A April 7th, 8th, 9th and 10th.

Q What crossings did you keep a count on?

A Franklin, Keen, Warren and Fifth avenue.

Q How did you keep a count of the people?

A Well, for the pedestrians I had a small register, a hand register, I registered the pedestrians on that.

Q One of these things you punch?

30 A Yes, a hand register. The figures I tallied on a sheet, a scrap sheet.

Q After you had finished your count did you make a memorandum of it?

A Yes, I made a memorandum.

Q Did you make a record of it, any typewritten record; anything of that sort?

A A typewritten record.

Q Made by yourself?

40 A Yes.

John Flynn, direct.

Q I show your signature on this, is that the record to which you refer?

A Yes.

Mr. Lewis. I offer this in evidence.

Mr. Taylor. That portion that relates to the Fifth avenue crossing is irrelevant, of course.

Mr. Lewis. Isn't Fifth avenue mentioned in the petition? 10

Mr. Taylor. No.

Mr. Lewis. It goes from Madison avenue.

Mr. Taylor. To River street.

Mr. Lewis. Well, the Fifth avenue crossing as you recollect, Mr. Taylor, crosses the Susquehanna this side.

Mr. Taylor. Fifth avenue has nothing to do with this case.

Mr. Lewis. All right. We will eliminate Fifth avenue. 20

Commissioner Donges. The statement or summary, except in so far as it relates to Fifth avenue, is admitted and will be marked as an exhibit.

(Same is marked Exhibit P-33.)

Mr. Lewis. It might save time at this point: We have three other men who kept tallies at this point. I have their statement here in typewriting.

Mr. Taylor. Are those men here? 30

Mr. Lewis. Yes, these men are here. I think I am right in saying they all used registers.

Witness. The man who relieved me used it, that is all I know.

Mr. Taylor. I think you better call them.

Q (*By Mr. Taylor.*) Your statement covers one day at each crossing?

A Yes, sir.

William Dunleavy, direct.

WILLIAM DUNLEAVY, sworn on behalf of petitioner.

Direct examination by Mr. Lewis.

Q Mr. Dunleavy, were you employed by the city street commissioners of Paterson to take count of the traffic of certain crossings in the City of Paterson?

10 **A** Yes, sir.

Q Do you recall what crossings you looked after?

A I do.

Q What were they?

A Madison avenue, Straight street, Clay street, Cedar street, Market street, Ellison street, Van Houten street, Broadway, Fair street, Lafayette street, River street.

Q Did you keep any count of Hamilton avenue?

A Yes, Hamilton avenue.

20 **Q** What date were you there?

A Started at Madison avenue the twenty-second of March and terminated the fifth of April.

Q For what period?

A Six in the morning until 12.30 at noon.

Q At the time was there any unusual condition in the City of Paterson which would affect traffic?

A A strike was on.

Q In what way would that affect traffic?

30 **A** There wasn't so many people coming and going from the mills.

Q Were the schools in session at that time?

A They had a vacation, Easter vacation was on about that time.

Q What effect did that have on the traffic?

A Affected it quite some, from Clay street down.

Q Lessened it?

A Oh, yes.

Mr. Taylor. Clay street and south.

Q What do you mean by down?

40 **A** Down town.

William Dunleavy, direct.

Commissioner Donges. Going in what direction?

Witness. North end of the city.

Q (By Mr. Taylor.) I don't know whether he means all the crossings from Clay street down or the crossings from Clay street north?

A I say going north, down towards the center of the city.

10

Q You mean to say affected the travel at Clay street going from the east to the west?

A Yes, that way (indicating); on all crossings down.

Commissioner Donges. All crossings toward the center of the city?

Witness. Yes, sir.

Commissioner Donges. All crossings between Clay street and the center of the city you said would be affected?

20

Witness. Yes, sir.

Commissioner Donges. Was there, in the past sixty days, any condition in Paterson at Market street or any of these crossings in the center of the city where a census was taken, different from the ordinary conditions that affected the travel at all?

Witness. In the last sixty days?

Commissioner Donges. Yes.

Witness. The factories are going now; they are coming and going.

30

Commissioner Donges. The streets are all open to travel?

Witness. Yes. Clay street crossing, for instance, the traffic is heavier now than at the time of the strike.

Commissioner Donges. What I want to know, is whether there was any unusual conditions prevailing at any of these crossings?

Witness. No.

40

Michael J. O'Rourke, direct.

Q (*By Mr. Lewis.*) What method did you use in keeping count of the people that passed?

A Well, pedestrians I had a hand register.

Q This is a typewritten report, not typewritten by you, but signed by you. How did you make this report?

A Turned them in. Took them on a pad and copied them in when I got home on that sheet there.

Q Could you say whether this report was taken from the report taken by you?

A Yes, sir.

Mr. Lewis. If there is any objection to that the only thing I can do is to hand in the scrap sheets.

Mr. Taylor. I haven't any objection if they compare accurately.

Witness. I compared the figures and they are correct.

Q (*By Mr. Taylor.*) Compared those figures with the original report and they are all in accordance with that report?

A Yes.

Mr. Taylor. I am entirely satisfied to have this summary substituted for the original report.

Mr. Lewis. All right, we offer that.

Commissioner Donges. There being no objection, it will be admitted and marked.

(Same is marked P-34.)

MICHAEL J. O'ROURKE, sworn on behalf of petitioner.

Direct examination by Mr. Lewis.

Commissioner Donges. In the answer in the first paragraph of the amended petition your answer says that no copy of the original petition was served upon your company.

Mr. Taylor. I understand that to be a fact.

Michael J. O'Rourke, direct.

Commissioner Donges. But you received a copy of the amended petition?

Mr. Taylor. A copy of the amended petition was served; that is, the one we are answering.

Commissioner Donges. You are now answering the petition as amended.

Mr. Taylor. As amended, yes.

Commissioner Donges. Which petition, as amended, was served upon you. 10

Mr. Taylor. We put that in the answer because the amended petition referred to the original petition. The original was never served on us, but the amended petition was served.

Commissioner Donges. I understand the fact to be, the petition as amended in its entirety is the petition now pending.

Mr. Taylor. That is my understanding.

Commissioner Donges. That is a substitute as a whole for the original petition. 20

Mr. Taylor. Well, I suppose that is the case. I don't know anything to the contrary.

Commissioner Donges. I wanted to be sure you had been served with the amended petition.

Q *Mr. O'Rourke,* were you employed by the city street commissioners to keep a count of the traffic at certain crossings in the City of Paterson?

A Yes, sir, I was.

Q When was that? 30

A March 27, I think, and 28.

Q Where were you March 27th and March 28th?

A Erie Depot, Market street, on the north side of the street.

Q Were you also at Franklin street?

A Yes, sir.

Q And Keen street?

A Yes, sir.

Q Warren street?

A Yes, sir. 40

Michael J. O'Rourke, direct.

Q And Fifth avenue, which is eliminated, Mr. Taylor?

A Yes, sir.

Mr. Taylor. Yes.

Q And what dates were you at those crossings?

A I think, April 7th, 8th, 9th and 10th, to the best of my knowledge.

10 Q And how did you keep count of the people and vehicles passing?

A The pedestrians I kept count by one of those indicators, and the vehicles I had a piece of paper on which I marked them down, and at night I tabulated them up.

Q There was at that time a strike in Paterson, and schools were closed?

A Yes.

20 Q In your opinion, would that have a tendency to lessen the traffic?

A It certainly would, a whole lot.

Q How did you keep count of the number of people who crossed?

A By an indicator.

Q How did you take it off the indicator?

A Took it off the face of the figures.

Q Was a typewritten copy made of your report?

A Was there?

Q You wrote out your report?

30 A Yes, I did.

Q Was that afterwards copied on a typewriter? Have you seen this? (Indicating.)

A No, sir.

Q You are not familiar with that?

A No, not to my knowledge.

Mr. Lewis. In this case I will have to put in the original figures.

Mr. Taylor. I am perfectly willing to have you compare it here.

John Kane, direct.

Q Is this report made by you, Mr. O'Hourke?

A That is my report.

Mr. Lewis. I offer that in evidence, and for the sake of convenience offer the typewritten copy; if there is any discrepancies the original will be consulted.

Commissioner Danges. It will be marked.
(Same is marked Exhibit P-35.)

10

JOHN KANE, sworn on behalf of petitioner.

Direct examination by Mr. Lewis.

Q Were you employed by the city street commission of the City of Paterson, Mr. Kane, to make a count of the traffic at crossings in Paterson?

A Yes, sir.

Q What crossings were you at?

A Madison avenue, Straight street, Clay street, 20
Cedar street, Market street, Ellison street, Van
Houten street, Broadway, Fair street, Hamilton avenue,
Lafayette street and River street.

Q Did you mention Van Houten?

A Yes, sir, Van Houten.

Q How did you keep a count of such?

A With a hand indicator and a pad.

Q There was a strike on in Paterson at that time and schools were closed?

A Yes.

30

Q In your opinion, would that affect traffic?

A Yes.

Q What affect would it have on it?

A People not going to work and crossing the tracks on this crossing.

Q You kept account of your tallies?

A Yes, sir.

Q Is that the count you made (handing witness paper)?

A Yes.

40

John Kane, cross.

Q Made by yourself?

A Myself.

Q And afterwards reduced to typewriting?

A Yes, sir.

Q Can you say whether that was a copy of it; have you compared it?

A No.

10

Mr. Lewis. I will offer these in the same way.
Mr. Taylor.

Commissioner Donges. They will be admitted and marked.

(Same are marked Exhibit P-36.)

Cross examination by Mr. Taylor.

Q The people in Paterson who were striking stayed in the house?

20

A Yes, sir; they wouldn't be going to work; and stayed home. There wouldn't be the crossing and re-crossing of the tracks.

Q Don't you think a good many people would be on the streets in working hours in the case of a strike who would be in the shops or mills if they were working?

30

A They would to a certain extent. They cross and re-cross the tracks from the mills. At the railroad crossings there are the mills. At noontimes they run in and out, and at night time they cross and re-cross.

Q Well, it is a matter of opinion as to the affect of a strike on the railroad crossings, is it not?

A Well, no, from my experience; I go to the shop myself I cross Clay street, I work there.

Q Did you ever make an actual count when a strike was on and when it was not, to see the difference?

40

A You can tell the difference at six o'clock at night; there is practically nobody crossing, while

John Kane, cross.

there are practically hundreds crossing when there is work.

Q At that particular time?

A At that particular time.

Q It is at particular times people go to and from work you have reference to, that is when it makes the difference?

A Yes; at night.

10

Q In between times, except people going to and from work, there is a little more people when there is a strike than when there is not?

A This particular crossing, Clay street, I had reference to. I have waited night after night for trains to pass—

Q Speak a little louder.

A Hundreds of people wait for trains to pass. Then trains would pass and nobody would be waiting.

Q What crossing are you speaking of?

20

A Clay street.

Mr. Lewis. I would like to offer in evidence all the tallies that have been marked as originals of the crossings. There is no objection.

Mr. Taylor. It is made by men who have testified?

Mr. Lewis. Yes.

Mr. Taylor. I haven't any objection to those who testified.

Commissioner Donges. There is no objection then to the exhibits.

30

Mr. Taylor. Assuming the men came and had been sworn, I have no objection.

Commissioner Donges. Very well, they will be admitted and marked as exhibits, and a record made in the minutes, each exhibit is composed of so many sheets.

(Eighteen sheets, Clay street, marked Exhibit P-36½.)

40

John C. Veenstra, direct.

(Twenty-nine sheets, Market street, marked Exhibit P-37.)

(Eighteen sheets, Broadway, marked Exhibit P-38.)

(Twenty-eight sheets, River street, marked Exhibit P-39.)

10 JOHN C. VEENSTRA, re-called on behalf of petitioner.

Direct examination by Mr. Lewis.

Q You are employed in the city engineer's office in the City of Paterson, Mr. Veenstra?

A Yes, sir.

Q At the last hearing you prepared a map showing the right of way of the Erie Railroad and surrounding territory and testified as to the crossings in Paterson?

20 A Yes, sir.

Q You make a supplement map to that; have you made a map showing any additional details?

A To the one I had at the last hearing was added the lots. Showing the numbers for the radius of 400 feet each side of the track.

Q Have you that map with you?

A Yes, sir.

Q I would like to offer the map. You made the map yourself?

30 A Yes, sir.

Q That is the Erie Railroad across there (indicating)?

A Yes.

Commissioner Donges. This map has been offered; is there any objection?

Mr. Taylor. No.

Commissioner Donges. Then it will be admitted and marked as an exhibit.

40 (Same is marked Exhibit P-40.)

John C. Veenstra, direct.

Mr. Taylor. It seems the standard distance. My saying there is no objection doesn't admit this map is complete.

Commissioner Donges. No.

Mr. Taylor. It isn't complete, particularly as to the railroad.

Mr. Lewis. It is intended to show the lots in the vicinity of the Erie Railroad.

Witness. About 400 feet each side of the railroad. The lots are numbered according to the assessor's map we have.

10

Q I show you another map; what does that purport to be?

A A map of the City of Paterson.

Q Is that a copy of the official map, used in the city engineer's office.

A Yes, a copy of the official map, the one we made ourselves in the office.

20

Q Is the Erie Railroad line shown on that?

A Yes.

Q What represents the Erie Railroad?

A (Indicates.)

Q That is shown about the center of the City of Paterson?

A Yes.

Mr. Lewis. I offer that map in evidence, merely to show how the road divides the city.

Commissioner Donges. It will be admitted and marked as an exhibit.

30

(Same is marked Exhibit P-41.)

Q (*By Mr. Taylor.*) These numbers in rings?

A Those correspond to the assessor's sheet.

Q And the other numbers represent the lot numbers?

A Represent the lot numbers.

40

Edward Acorn, direct.

EDWARD ACORN, sworn on behalf of petitioner.

Direct examination by Mr. Lewis.

Q What is your occupation?

A Chief clerk in tax office in the City of Paterson.

Q There is no deputy tax receiver in the City of Paterson?

A No, sir.

10 Q That is the position which you practically occupy?

A Yes, sir.

Q What is this (handing witness papers)?

A That is a copy of the land and building valuation from Crooks avenue to the Passaic river, an area of about 400 feet each side of the railroad.

Q Are those lots shown on this map (indicating)?

A The lots there?

Q Yes.

20 A I presume so.

Q They are within 400 to 500 feet of the right of way of the Erie Railroad?

A Yes, sir.

Q Were these copies, typewritten copies, made for the purpose of the tax receiver of the City of Paterson?

A Yes, sir.

Q Compared by you?

A By me personally.

Mr. Lewis. I offer these in evidence.

30 Commissioner Donges. They will be admitted and marked in evidence.

(Same are marked Exhibit P-42.)

Mr. Lewis. That is all we have.

Commissioner Donges. Does that conclude your case?

Mr. Lewis. No, we have other matters to put in at a later date, if you could continue this two weeks or whatever date suits your pleasure.

40 Adjourned until Friday, November 14, 1913, at the Court House, Newark, N. J., 10.30 A. M.

Petitioner.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Newark, N. J., Friday, November 14, 1913.

PATERSON GRADE ELIMINATION, }
 ERIE RAILROAD COMPANY, *et al.* }

Before Commissioners Donges, Hillery and Daniels. F. H. Sommer, Esq., Counsel.

10

For the petitioner appears Edward F. Merrey, Esq., and R. B. Lewis, Esq.

For the respondent appears G. S. Hobart, Esq., and D. E. Minard, Esq.

For Public Service Railway Company, *et al.*, appears L. D. H. Gilmour, Esq.

Mr. Sommer. In this case may I make this statement to the board: Mr. Merrey wrote me a letter in which he requested me that I have in attendance to-day, Mr. Maybury, for the purpose of examination. Mr. Maybury, however, had made all his arrangements to go on with his grade crossing investigation; therefore it was impossible to break those arrangements and produce him here to-day. I will produce him at any other time this is adjourned to. I simply want to make that statement because Mr. Merrey might want to close this case.

20

Mr. Merrey. My case will be finished to-day.

30

Mr. Hobart. I would like to file an amended answer to the one heretofore filed. I have submitted a copy to Mr. Merrey and I have a copy for Mr. Sommer. It is along the same lines as the one submitted yesterday in another case.

Mr. Gilmour. I suppose we are a party to this proceeding, but we can't do anything except to put in our actual cost of changes. I understand that the statute fixes on the street railway; they may be assessed 10% of the total cost if in the

40

Discussion.

10 judgment of the commission it thinks that amount is warranted. We can't tell what the cost will be—what our cost will be until the method of eliminating the crossing is determined on. If it is overhead it may be one thing, if it is underneath it may be one thing; if the railroad goes overhead, another thing. That is especially true of gas mains and electric light wires. We are in the same position in the Perth Amboy case until all the evidence is in and the commission decides it is feasible to separate the grades and do it in a certain way, then we have got to go in and show our cost, depending on the separation of the grade in the way decided by the commission. I would like to ask the commission to put in our cost after that point in the case is reached.

20 *Commissioner Donges.* That would seem reasonable. When you speak of the method of elimination do you refer to the general plan that might be advanced, or a special plan?

Mr. Gilmour. A general plan; whether it is to go under the railroad or the railroad under the street. That is the important thing to us. Then we can determine what our cost will be, as our part of the total cost; that must be considered before the percentage we are to pay is taken.

30 *Commissioner Hillery.* It all depends on the method, the cost.

Mr. Gilmour. Our cost, yes.

Mr. Merrey. While Mr. Gilmour is here I would like to call his attention to the amendment to the answer filed by the Erie Railroad Company and would like to know the position they take on one paragraph.

40 *Commissioner Donges.* I think that is the same question that arose in the other case; the understanding is this is exclusively the answer of the

Erie Railroad Company for itself, not acting as an agent or representative of any other party.

Mr. Merrey. The claim is made here; I presume it is the same in the other case.

Commissioner Donges. It is confiscation of these properties.

Mr. Merrey. Yes; taking property, railroad property.

10

Mr. Gilmour. I haven't seen that answer and it was made without any conference with me or any concurrence.

Commissioner Donges. It is the separate, supplemental answer of the Erie Railroad Company.

Mr. Hobart. That is the understanding of it; and not under the order of any other company.

Commissioner Donges. You may proceed.

Mr. Merrey. I would like to ask if any answer is filed on behalf of the Paterson & Hudson River Railroad or the Paterson & Ramapo Railroad Company?

20

Mr. Sommer. I think not.

Commissioner Donges. We have heard of no such answer. Mr. Barber can confirm that.

Mr. Merrey. Also the Western Union Telegraph Company.

Commissioner Donges. None, so far as we are advised.

Mr. Gilmour. Is it on the record that the request I made, about putting in the cost after the determination of the general scheme, is allowed by the commission?

30

Commissioner Donges. I think we may put that on the record, that the Public Service Company is allowed to put in their testimony as to the probable cost after the entire conclusion of the testimony in the case is submitted by the other parties.

40

Discussion.

Mr. Gilmore. And the commission has agreed on the general plan of eliminating the crossing, if elimination is decided upon.

Commissioner Donges. It seems reasonable, but we don't want to decide.

10 *Mr. Gilmore.* There is no occasion for my following these hearings until you are through. I can't do anything until you get to the point of telling me whether you are going over our tracks or under them.

Commissioner Donges. You wouldn't, until the close of the other testimony, be in a position to know and contemplate the contracted methods of separating the grade.

Mr. Gilmore. And give the cost of either one or both.

Commissioner Donges. Yes.

20 *Mr. Gilmore.* I suppose so.

Mr. Minard. Doesn't Mr. Gilmore overlook the possibility of changing the grade of the street as well as the railroad?

Mr. Gilmore. That is just exactly what is the question.

Mr. Minard. Your remarks were whether the railroad go under or over the street.

Mr. Gilmore. It makes a difference.

30 *Mr. Minard.* I had in mind the case where both would be changed.

Mr. Gilmore. Probably both will be changed going over or under, but the cost of the change will be different whether you go over or under.

Mr. Sommer. In view of Mr. Merrey's question, I want to file on behalf of the Paterson-Passaic & Suburban Telephone Company its answer in this petition.

Commissioner Donges. It will be received.

40 *Commissioner Hillery* suggests that perhaps the entry on the minutes should be made that

Discussion.

Mr. Gilmour, that the Public Service Corporation, be allowed to submit estimates of the cost to produce the changes, the understanding by that—

Mr. Gilmour. On notice from the commission.

Commissioner Hillery. On notice from the commission.

Mr. Gilmour. I suppose there will be the same rule in the Rutherford case. 10

Commissioner Donges. I think we may make the same entry by consent.

Mr. Sommer. Make the rule apply to all these cases practically.

Mr. Merrey. In paragraph 5, of the answer of the Erie Railroad Company, it speaks about certain leases that were made by the Paterson & Hudson River Railroad Company to the Union Railroad Company and so on until finally the property comes in by lease to the control of the Erie Railroad Company. I would like to ask now that the company be directed to produce its leases at some future time, of course, showing the entire situation. 20

Mr. Hobart. I suppose that Mr. Merrey means not only the leases, but the various conveyances.

Mr. Merrey. I want the various conveyances to show the chain of title and the exact situation.

Mr. Hobart. We are entirely willing to produce that, and I only make the suggestion, however, that it will lumber up the record to a most remarkable extent. It includes foreclosure proceedings and the recital takes ten pages, as we prepared it in another case. I would like to make the suggestion that we produce the abstract or chain of title, which I will submit, Mr. Merrey, and then produce the leases themselves. 30

Mr. Merrey. I think that is a good thing. We don't want them written out at length in the 40

Discussion.

record. We ought to have them in case there is any necessity of examining them.

Commissioner Donges. Suppose it rest in the understanding the abstract will be produced. If further detail is wanted it will be proper to make a motion at that time.

10 *Mr. Merrey.* I want to offer them and offer them as part of our case. They will be produced by the company and we can agree on the form.

Mr. Hobart. I am not sure the board ruled on the question of leave to file the amended answer.

Commissioner Donges. I think we will admit the amended answer.

20 *Mr. Merrey.* In section eight of the answer it is set up that the maps are not accurate and complete; that these maps we have furnished do not show all the railroad tracks, nor all the freight yards, nor all the sidings or switches or connections with the property of private individuals or corporations which would be affected by the change of grade. I think that is a matter which is peculiarly in the knowledge of the railroad company. I presume they have those maps and I ask now that they be directed to furnish us with such maps as will actually show the tracks and sidings and switches referred to in paragraph eight of their answer.

30 *Commissioner Hillery.* Does that section refer to the tracks and switches of the company or those that might be owned by abutting owners, which?

Mr. Merrey. Both.

40 *Mr. Hobart.* It seems to me, under the rules of the board, the petitioner in a matter of this kind is required to furnish those maps. The rules provide that the property affected, the map must show it. The petitioner must do that. I don't see how we can be called on to perform work the

Discussion.

city should perform under the orders of the board. We will help them by giving them access to our property. To say we have to go to the expense of hundreds of dollars for maps for their benefit is an injustice. Certainly the rules don't require it.

Commissioner Donges. The board will hold that under advisement for the time being, Mr. Merrey. 10

Mr. Merrey. There is another provision of the answer, and I can't seem just to get it. It is the one referring to the statement about the title of the two railroads, the Paterson and Ramapo.

Mr. Minard. That is paragraph twenty-four or twenty-three?

Mr. Merrey. No. It is the provision, in my bill of complaint that set up that those railroads met about Market street. You say that isn't right. You don't tell us what is right. 20

Mr. Minard. That is our business. You will find that the Erie's answer refers to the paragraph number in which your bill states the facts.

Commissioner Hillery. You are speaking of the amended supplemental answer or the original?

Mr. Merrey. No, it is the original.

Mr. Minard. Paragraph five of our answer, first page. 30

Mr. Merrey. Yes. That section provides that the junction between the Paterson & Hudson River Railroad and the Paterson & Ramapo Railroad is not clearly described and located in the petition. That is a matter which probably should be disclosed and it is impossible for us to get that. The railroad company knows it. They are operating under those leases. It may be under my first request that I made, that they furnish us this information; it may come in; I don't 40

Discussion.

10 know, but I think they should be directed to show particularly the location of the property showing what property is owned by the Paterson & Hudson River Railroad and what property owned by the Paterson & Ramapo Railroad, and what property owned by the Erie itself. I understand the thing to some extent, having experience with this company before. If that information will be given in the history they say they will give, all right. If they do not intend to do it, I ask now they be directed so to do it.

20 *Mr. Hobart.* I suppose that is a matter of record; the records are as accessible to the city as to the Erie Railroad Company. Some records go back for a number of years. I assert those things in the answer; we say they are incorrect. It seems to me the burden is on him to prove what he says.

30 *Mr. Merrey.* I know some of the things are not a matter of record. I have endeavored to find out before where the railroad bought property, and we can't locate it in our records. I know one railroad company has no deeds, but come in as a kind of squatter and got possession by twenty years adverse users. That may be the situation here; we don't know. It is a matter entirely in the hands of the railroad company and I don't think they will have any great difficulty in getting it. In the case concerning the paving of Market street they had maps which they offered in evidence which showed the conditions there.

Mr. Hobart. We have proof of those.

Mr. Merrey. We have just that much, but we haven't that nearby.

Mr. Hobart. I don't think we should be called on to do this searching and produce maps.

Discussion.

Mr. Merrey. We don't ask you to do searching, but tell us what you own and what the two other railroads own.

Commissioner Donges. It is referred to in page one specifically in their petition.

Mr. Merrey. Yes; it says we have not given the correct description of that location. We have given it the best we could. If that is not right and we are wrong, they certainly know what is right. 10

Commissioner Hillery. Wouldn't the description in the lease show?

Mr. Merrey. I don't know.

Mr. Minard. The records in the county clerk's office would show all that.

Mr. Merrey. They may and they may not, I don't know, but I think if we search in the engineer's office we will find maps already prepared. I am afraid it is a case of lots of work on the part of the city, but it could be easily done by the railroad. 20

Mr. Hobart. You want to cast your work on us.

Mr. Merrey. No.

Commissioner Donges. The board is of the opinion, inasmuch as the answer denies the allegation in the petition, it ought fully to set up how the title is acquired by setting out a description of the papers through which title is acquired, and if the matter is public record where they may be found, and if not a matter of public, by attaching copies to the answer. But we do not think the railroad company ought to be called upon to produce maps as requested by Mr. Merrey; but we think the answer ought to point out the process through which title is acquired, and if a matter of public record, where they may be found. 30

Discussion.

Mr. Hobart. Probably that can all be covered by the stipulation that was made before.

10 *Commissioner Donges.* If you will indicate through what process the title has been acquired and where they are recorded, if recorded, and produce the papers entirely within your possession and knowledge, that may save mistake and amendment to your answer.

Mr. Merrey. I fear the description in whatever records they are, is very difficult or impossible to understand without a sketch to illustrate them.

Commissioner Donges. We think the railroad ought not to be called on to furnish that to you at this time.

20 *Mr. Merrey.* In paragraph twenty-one of the answer the railroad company names many private individuals and corporations who have sidings and switches and tracks connecting with the railroad company and says they are entitled to notice and entitled to be heard. I would like to make a motion they be notified and given an opportunity to be heard. I have notified the Paterson & Hudson River Railroad and the Paterson & Ramapo Railroad and they haven't answered. If the commission will direct me to notify these people I will take that work upon myself. I feel
30 better results will be obtained and better records kept if they are notified as the railroad company was, or whatever is the rule.

Mr. Minard. Is it Mr. Merrey's idea they be sent copies of the petition like other defendants if brought in as parties?

Mr. Merrey. I don't think that is necessary. The serving of copies of the petition is handled by rules of the commission. If the board desires to have copies of the petition we will have to have
40 them printed, there are so many of them.

Discussion.

Mr. Minard. I refer to the commission's rule D of the rules prescribed.

Commissioner Donges. In this case the conclusion of the board is to waive the provision of rule D and provide that the petitioner give notice to the parties mentioned in paragraph 21.

Mr. Merrey. I would ask if the commission will make an order directing that they appear at a certain time to answer this petition. 10

Commissioner Donges. The statutes provide that a notice be given.

Mr. Merrey. The notice was given by the commission heretofore.

Commissioner Donges. A reading of the statutes, Mr. Merrey, leads to the conclusion that perhaps the duty of giving the notice is perhaps on this board. The statute reads: Whereupon said Board of Public Utility Commissioners shall fix a time and place for a hearing before it and shall give such notice thereof as it shall deem reasonable, so the board will give notice upon receipt from you of specific addresses of the individuals. 20

Mr. Merrey. I suppose I can give it.

Commissioner Donges. I think that is imposed upon you.

Mr. Merrey. I think the board should probably fix a time for the hearing of these individuals and corporations. 30

Commissioner Donges. I think they ought to have notice.

Mr. Merrey. I mean fix a time when they will be heard.

Commissioner Donges. If you will furnish the addresses a time will be fixed and those parties given notice of it. I assume at that time they will appear if they choose and participate to what extent they desire. 40

Discussion.

Mr. Merrey. I shall give the information and also include the two railroad companies I have served but which haven't answered, and also the Western Union.

Commissioner Donges. Include all parties.

Mr. Merrey. Who have not been served by the board.

10 *Commissioner Donges.* And who have been suggested as possible parties in interest, whether in this paragraph or any other.

Mr. Merrey. All right.

I would like to offer in evidence the specific act incorporating the President and Board of Directors of the Paterson & Hudson River Railroad, pamphlet laws 1830 and 1831, page 84, I haven't it at hand. I make that formal offer.

20 *Mr. Merrey.* I also offer the specific act incorporating the Paterson & Ramapo Railroad pamphlet laws of 1841, page 97.

Mr. Merrey. There is a provision there that refers to the duty of the company, about crossings and so on.

Mr. Minard. May I inquire whether the offer of those in evidence is simply to show the duty, or to connect up the plaintiff's case. If so the Union Railroad should come in too. They are as important a factor as any other.

30 *Mr. Merrey.* Are they a special incorporation?

Mr. Minard. Yes.

Mr. Merrey. They are offered to show the duties which were put upon these two railroad companies by that charter. We will claim that it is still upon them, or their lessees.

Commissioner Donges. They will be admitted.

40 *Mr. Merrey.* There is another provision in the answer which states that certain of these crossings have been put across the tracks after the railroad was laid out and it doesn't specify

Discussion.

which. I ask the commission to direct the amendment of that.

Commissioner Donges. Which paragraph is that. I presume it is paragraph twenty-four?

Mr. Hobart. Twenty-four, I guess.

Mr. Minard. Yes.

Mr. Merrey. I ask that the company state particularly what crossings they refer to. 10

Commissioner Donges. These are the paragraphs you have in mind (indicating).

Mr. Hobart. May I make a suggestion in that respect: I suppose the records of the city will show what is the fact; they may be in the records.

Mr. Merrey. The records prior to 1902 were destroyed by the fire.

Mr. Minard. So were ours. Our records were in Paterson.

Mr. Merrey. The railroad company didn't burn up. 20

Mr. Minard. No, but the records did.

Mr. Merrey. The Paterson & Ramapo Railroad?

Mr. Minard. The Paterson & Ramapo and Paterson & Hudson River; our records were there too.

Commissioner Donges. I think, in view of the allegation of Mr. Minard that there are certain crossings that this company ought not to be required to pay the cost of altering the grade, because they were subsequent to the construction of the railroad, puts an obligation on you to point out which crossings they are. You say in your answer; subsequent to the construction and commencement of operations of said railroad certain crossings were laid out, and that as to these crossings the said Board of Public Utility Commissioners is without jurisdiction to order respondent at its own expense to alter or change the 30 40

Discussion.

grade thereof, or to construct another crossing in the place or stead thereof not at grade; without pointing out which crossings they are.

10 *Mr. Minard.* The form of this answer was drawn for the purpose of conforming with this board's rules; that conforms and is a denial. It wasn't drawn with the idea of assuming the obligation of proving the plaintiff's case.

Commissioner Donges. No. As you deny and assert there is no obligation necessarily upon your company to do the things that the petitioner asks to have done, because of some circumstances within your knowledge, you ought to point out the fact you rely on to relieve you.

Mr. Minard. Should we point them out now, or should it be part of the proof to sustain the allegations of the answer?

20 *Commissioner Donges.* That allegation points it out and your proof sustains your answer.

Mr. Merrey. There should be positive direct denial of the matter. You are really putting up a new matter in one sense.

30 *Mr. Minard.* Our facilities for ascertaining the facts are perhaps as good and no better than Mr. Merrey's; while I haven't any hesitancy in saying in producing our case we naturally will attempt to prove our allegations there. In order to prove that we would probably have to make the necessary allegations or get the best evidence possible before the board.

Commissioner Donges. I think your answer should state which of the crossings come within this class according to your view.

Mr. Hobart. Whatever this board rules we will try to comply with.

Commissioner Donges. Your amendment should be amended to point out that specifically.

40 *Mr. Minard.* It will have to be a sort of deduction. We will do it as soon as we can.

Andrew F. McBride, direct.

Commissioner Donges. In ten days?

Mr. Minard. I don't know. We will try to do it in ten days, but I wouldn't give any assurance that we would.

Commissioner Donges. Suppose we say ten days; if you find you can't do it you may advise.

Mr. Merrey. Do you know the streets yourself?

10

Mr. Minard. I know as Mr. Merrey knows, without being able to sustain it with proof. I assume what you want to know is to know. I am only guessing at it. We are not setting forth any guesses in our answer, that is the difficulty.

ANDREW F. McBRIDE, sworn on behalf of petitioner.

Direct examination by Mr. Merrey.

20

Q You are Mayor of the City of Paterson?

A Yes, sir.

Q How long have you been mayor?

A Five years and ten months.

Q And you are a practicing physician?

A Yes, sir.

Q Did you hold any official position before that of mayor?

A Yes; county physician for eleven years.

Q That was just previous to your becoming mayor? 30

A I resigned the office to become mayor.

Q You became mayor in 1907?

A 1908.

Q Eleven years previous to that time you were county physician?

A Yes, sir.

Q What were your duties as county physician?

A Why, to investigate all sudden deaths, or deaths without medical attendance or deaths under suspicious circumstances. 40

Andrew F. McBride, direct.

Q How long have you been a practicing physician?

A Twenty-five years.

Q Where has your practice been?

A Paterson, N. J.

Q In the course of that practice do you go throughout the city frequently?

10 A Yes, sir; every day.

Q And what parts of the city do you cover?

A The entire city and most of the County of Passaic, with the exception of Passaic city. I frequently go through Passaic city.

Q What do you use now for getting about?

A A car.

Q An automobile?

A Yes.

Q How long have you been using that?

20 A Nine or ten years.

Q And before that how did you get around?

A A carriage.

Q Now, do you pass any of the crossings of the Erie Railroad?

A I do.

Q In your work?

A I do.

Q How often?

A Why, many times a day.

30 Q Tell us anything you have observed at the Market street crossing in the way of impeding travel?

A Why due to the passage of trains there, both passenger and freight trains and switch trains, I notice that the traffic is impeded there very much.

Q Can you give us any description as to just how it is impeded?

A The gates are lowered when the trains pass and that necessitates traffic being obstructed.

40 Q Have you passed it and noticed any number of vehicles held up?

A Yes.

Andrew F. McBride, direct.

Q And pedestrians?

A Yes.

Q How many about?

A I never counted the number; sometimes there are more than others. I have noticed as high as (this is a guess, of course) as many as twenty vehicles on both sides of the tracks and a great number of people; how many I don't know. It may be fifty or sixty. 10

Q And trolley cars delayed?

A Yes, sir.

Q Taking up the other crossings; you use Madison avenue?

A Yes, sir.

Q Do you find any delay there?

A Yes.

Q Have you been delayed?

A I have, frequently.

Q Clay and Straight streets? 20

A That is a bad crossing. Two streets come there, Straight and Clay meet at the crossing, practically; almost meet.

Q You say it is a bad crossing; what do you mean?

A Coming from the southwest, crossing Straight street, you find it obstructed by the rolling mill; on the left hand side by a coal yard and material yard.

Q Can you see any distance along there?

A Not on that side.

Q There is a curve in the railroad track? 30

A Yes, the other side is Lambert's mill.

Q Cedar street, do you use that?

A I do, frequently.

Q Have you found much delay there?

A Yes.

Q What is the character of the crossing, as to danger?

A Why, it is a very dangerous crossing. There are a number of tracks for freight cars, the Erie freight station is located at Cedar street and Rail- 40

Andrew F. McBride, direct.

road avenue on one side; then your view is obstructed by the great number of freight cars there are. There is a yard there that they load and unload. You can't see unless the track is cleared; these freight cars are on one side. On the south side your view is obstructed by the presence there of the freight station.

Q You find it dangerous in crossing at that point?

10 A I have always been very careful of the danger. On the other side is the Paterson Brewing Company and McNab & Harlin foundry on the other side to obstruct the view. The street is narrow there, too.

Q You use Ellison street?

A Yes, sir.

Q What is the condition there?

A That is a bad crossing; I mean bad as far as danger is concerned. Those buildings are close up to the track. The Laffray & Herman Company is on one side, a concrete building occupied by Kiley, a business firm there. That is the east side of the track. On 20 the west side of the track you have a lumber yard on one side and an express company.

Q These buildings are close to the track?

A Yes, sir.

Q The main track?

A Yes, sir.

Q Van Houten street?

A That is dangerous on account of the buildings 30 close to the track on one side and dwelling houses with a long high wall on the other side; and Robin's mill on the other side; a flat on the other side.

Q Broadway?

A Broadway is, likewise, dangerous. You have a brewery on one side close to the track and the old Gilsey on the other side, this side of the track; and the east side is also close up.

Q Have you seen traffic delayed at that point?

A Yes.

Andrew F. McBride, direct.

Q What is the great bulk of the traffic at that street?

A Vehicles, trolley cars, pedestrians.

Q The Fair street crossing?

A That is likewise a bad crossing. There is a grade coming up Fair street crossing from the west. It is built up closely at the two sides.

Q Hamilton avenue?

A Hamilton avenue is a street likewise with quite a steep grade crossing from the west. That is built up by dwellings and a coal yard.

Q Lafayette street?

A Lafayette street is also a dangerous crossing. There is Smith's coal yard on one side and some buildings on the other side.

Q Franklin street.

A Likewise a dangerous crossing. There is a grade coming up from the west there.

Q Keen street?

A It is quite a dangerous crossing also. There is a feed store on one corner and a machinery shop on the other, and a mill on the other.

Q Warren street?

A Warren street is built up close to the track.

Q River and Putnam street crossing?

A That is a bad crossing. It is one of the main avenues in our city. It is a double crossing.

Q It is a crossing at a diagonal?

A At a diagonal.

Q It makes a very long crossing?

A A very long crossing.

Q Is it your opinion traffic is impeded on all the crossings?

A It is.

Q And they are all dangerous?

A Yes, sir.

10

20

30

40

Samuel V. S. Muzzy, direct.

Cross examination by Mr. Hobart.

Q Doctor, these various observations you have referred to at the different crossings are all shown on the map prepared by the city?

A I haven't examined them.

Q You haven't examined the maps?

A I have seen them; I haven't examined them at
10 all.

Q Maps have been prepared by the engineering department which purport to show the different obstructions?

A I imagine so.

Q These several crossings which Mr. Merrey called to your attention, which are the most dangerous?

A Why, I believe at "straight and Clay streets is the most dangerous and the one at River street and
20 Putnam street.

SAMUEL V. S. MUZZY, sworn on behalf of petitioner.

Direct examination by Mr. Merrey.

Q How long have you lived in Paterson?

A Sixty-one years.

Q You have been in business there and are now?

A Since 1867.

Q You are now President of the Board of Trade of the City of Paterson?
30

A I am.

Q And for some time back on the Grade Crossing Committee?

A Yes.

Q Did you take up the question with some of the officials of the Erie Railroad Company?

A I did.

Q With whom?

A With the vice-president, Mr. Stuart, was one,
40 and the engineer, I have forgotten his name.

Samuel V. S. Muzzey, direct.

Mr. Hobart. I object to his stating evidence of taking up grade crossings with officers of the Erie Railroad. It is immaterial and has nothing to do with this petition.

Commissioner Donges. Is that along the same lines pursued at the last hearing?

Mr. Muzzey. Yes, by Mr. Fitzgerald.

Commissioner Donges. What is the objection? 10

Mr. Hobart. It is immaterial. What possible bearing will it have, taking it up with officials of the Erie Railroad whose names he has forgotten, the grade crossings at Paterson. It has nothing to do with the question before the board.

Commissioner Daniels. May not it be the witness is acquainted with and confirms those who spoke on the subject?

Mr. Hobart. If that is the purpose, that, perhaps, is an entirely different purpose. 20

Mr. Muzzey. I suppose it will go further; that is one of the purposes.

Mr. Hobart. I object now.

Commissioner Donges. The board will take the testimony.

Q Was a plan presented for the elimination of the crossings in Paterson?

A There was.

Q And did you discuss with the railroad officials whom you have named the advisability or necessity of eliminating those crossings? 30

A I did.

Mr. Hobart. I object to that on the same ground mentioned, and on the further ground there is nothing to show the gentlemen he discussed the matter with had any authority whatever to bind the company.

Commissioner Donges. Does it appear with whom it was discussed? 40

Samuel V. S. Muzzy, direct.

Mr. Merrey. I understood him to say the vice-president.

Witness. Mr. Stuart, vice-president, I don't remember the name of the engineer. It was informally three years ago, November, 1910, I think it was.

10 *Mr. Hobart.* This company is run by a board of directors.

Witness. The vice-president at that time, if you will pardon me —

Commissioner Donges. We will take the testimony.

20 *Mr. Minard.* I think this board knows very well the department in charge of the construction is not the vice-president's department; vice-president Stuart is an operating vice-president and has nothing to do with the construction department.

Commissioner Donges. We will take the testimony for what it is worth.

Q Did they express an opinion upon it?

A They did.

Q What was it?

Mr. Hobart. I object as immaterial and not binding on the company.

Commissioner Donges. It will be admitted.

30 A The vice-president of the road, taking the initiative in the answer, stated he was well aware Pater-son needed elimination of grade crossings. The road, the board of directors had requested the engineer and his corps of engineers to prepare maps covering the same; which were displayed to our committee. I was then acting chairman; one of the committee of the Board of Trade. We discussed this thing in a friendly-way. There didn't seem to be any objection to the necessity of eliminating the grade crossings. In fact,
40 they thought it would be a good thing for the city and a very good thing for themselves.

Samuel V. S. Muzzy, direct.

Commissioner Donges. Who expressed that view?

Witness. Mr. Stuart and the engineer both. I can't recall the name of the engineer.

Q Was it Allen?

A It was the gentleman who prepared the map for us. You were there at the time. It was the engineer at that time; he was the engineer; the first engineer. He was very glad we came there in this open way to discuss the thing. He finally said the only trouble in the way was we are unable to do it on account of lack of funds. He asked if we could provide money or the City of Paterson issue bonds of some sort, issue their bonds to provide money and we would be reimbursed in a number of years after. That was the proposition Mr. Stuart put up. It was simply tentative, of course, but it was so tentative, it was taken up considerably in the discussion. We couldn't do that. The city couldn't do that legally, so we dropped that. I merely mention that to show the disposition of the railroad. I think we have one or two people that will confirm what I have said. There was no objection; no discussion in regard to the necessity of it. Paterson was recognized as a city where the traffic was increasing every year and it is a manufacturing town where parts of our mills are located on one side of the track and part on the other, and the operatives have to travel back and forth frequently, six times back and forth to their mills; and the service is growing all the time. If you will notice the crossing at Broadway the east side of the track there is a hill; and there has been one or two serious accidents; I don't know whether anybody was killed; cars were smashed and gates smashed by the trolley coming down the hill and not under control. And that same condition exists at Market street where we have a larger number of people crossing the track and a

Samuel V. S. Muzzy, direct.

larger number of vehicles than we do at Broadway; but Broadway is equally dangerous; one of our principal streets. As the mayor said, River street is one of the most dangerous streets on account of the diagonal crossing, long crossing at River street; it intersects with a street, but a smaller street. All these conditions were set forth at the interview; which was most
10 cordial. There wasn't an objection put forth; there wasn't a stand taken by the Erie Railroad or the representatives that indicated they didn't think it was necessary, entirely necessary.

Q General, can you tell us which part of the City of Paterson has developed the most rapidly at the present time and some time back?

A Market street.

Q I am not meaning the business, but the residential section?

20 A Well, I should say Market street, residences too. Well, I don't know; out on the east side, of course, Broadway is growing—in fact, the three streets—River street crossing.

Q Not referring to the crossings, but the section of town that is growing, increasing in population?

A That is pretty hard to tell. It is the east side of the city, but that covers three streets.

Q The business center is on which side of the railroad?

30 A On the west side.

Q Did you notice whether the traffic is increasing or not over these crossings you use?

A Yes, sir.

Q Which crossings do you use most frequently?

A I am living in Passaic for the last few months. I did use Broadway for thirty or forty years, but I still see the crossing over Market street. I usually come in on the Erie and get there at 9.30. I see them every day; but I cross them quite frequently.

Samuel V. S. Muzzy, cross.

Q You say there is an increase in the use of Market street?

A Yes, decidedly.

Q Is that caused by the growth of the population on the east side?

A Yes.

Q And they have to cross the tracks to come to the business center?

A Yes.

10

Cross examination by Mr. Hobart.

Q When was this interview you had with Mr. Stuart and this unknown engineer?

A I am under the impression it was in 1910, November, our secretary, who is here, can furnish that date.

Q About three years ago?

A About three years ago, yes.

Q At that time I understand the matter was suggested by the Board of Trade, or by you as representative of them that the city might be willing to contribute to the expense of eliminating this grade crossing?

20

A Yes.

Q Did you get to the point of any amount of money the city would contribute?

A I think our mayor said, we were so earnest in the matter, that we considered 15%.

Q Is that all?

30

A No, we wouldn't go 25%. Personally I said I would favor as high as 25%, but the mayor said no, he wouldn't stand for that.

Q You say 25% even now?

A I think life is dearer to the community than money; yes. Personally, yes, but as long as—

Q As long as the company must pay it all, you would rather have them do that?

A They are big enough to pay it all. They ought to be big enough to pay it all.

40

Samuel V. S. Muzzey, cross.

Q Have you in mind what cost your committee suggested to the president, the figures discussed?

A At that time Mr. Stuart had these plans and the engineer said it would cost \$1,200,000.

Q Covering what streets?

A I think it included River street, I think that was the last street.

10 Q River street to the north?

A River street to the north. I don't know whether it was Madison avenue or Straight; I think Straight street, and concluded at River. The plans are here.

Q Those will show?

A Those will show; those ones I refer to.

Q Do you recollect, General, if there was discussion at that time relative to two sections or series of grade crossing to be eliminated?

20 A I think they were; two plans submitted. I think they were alternative plans.

Q Which one of those figured this \$1,200,000 referred to?

A The one I stated. I am not sure about that. The plans will show. The figures were on the plans, I think.

30 Q You have referred to a number of manufacturing plants which are on both sides of the railroad tracks, and which you say operatives go back and forth over the tracks. Do you recollect the names of some of them?

A Yes. On the east side of the track—well, I don't know exactly the operatives, I will mention the names of the concerns.

Q Maybe we can save time by showing you the list that was given in paragraph twenty-one in the answer filed of the Erie Railroad Company. Just look at that and see if that shows the plans as far as you recollect?

40

Samuel V. S. Muzzy, re-direct.

A Leslie Elliott Company, east side of the track; Cook Locomotive Works, west side of the track of Madison avenue; Passaic Steel Company, west side of the track at Straight street. I don't remember where McDonald or Zabriskie are, Commercial Lumber & Mill Work Company, I don't know them. C. Kelly, west side of the track. Standard Oil Company, west side of the track. I don't know whether it is necessary to go on with each one.

10

Q No, don't go in detail. After looking over the list you can state generally that all the various industries are located on either side of the track.

A Yes, they vary; John Agnew, west side; Samuel Smith & Sons, west side—

Q Nearly all of them have connections with the railroad tracks?

A No; I don't think all of them do.

Q Most of them do?

20

A I couldn't tell you that.

Q Some of them do?

A Yes.

Re-direct examination by Mr. Merrey.

Q There are many industries besides these of large size in the City of Paterson, are there not?

A Yes.

Q I believe you had a bill prepared for the elimination of the grade crossings, your grade crossing committee?

30

A Yes.

Q It was introduced, wasn't it?

A Yes.

Q What year was that?

A I think it was the session in 1911; it just followed after this interview in New York.

Q At the time what is known as the Pierce Bill was introduced?

A 1912.

40

Samuel V. S. Muzzy, re-cross.

Q Your committee attended a hearing, didn't they?

A Yes.

Q Did that say the city was willing to take a portion of the cost?

A Yes.

Q What was that portion?

10 A 15%. That didn't apply to the provisions of the Pierce Bill; I think it was 25%.

Q 15%.

A Was it 15%? Where was the 25% mentioned?

Mr. Minard. I think the General refers to the bill of 1910; 35% and 65%.

The Witness. No, that was before. I remember that bill.

20 Q The position of the city was it was willing to pay 15% in order to have the thing done properly?

A Yes.

Q That was the position of the Pierce Bill?

A Yes.

Q Which allowed the city to make an agreement with the railroad company?

A Yes.

Re-cross examination by Mr. Hobart.

30 Q Is that the bill, general, which was set aside by the courts, on account of some blunders of the Governor or the people at Trenton?

A I think it was the Pierce Bill that was sent to the House; the one you refer to that was set aside.

Q You referred to some accidents, having in mind particularly some trolley accidents?

A Yes. I don't think they were attended with loss of life; but the cars were smashed and the gates were smashed. I merely mentioned that to show it was dangerous down hill.

40 Q Because the cars were smashed going through the gates after the gates were down?

Samuel V. S. Muzzy, re-cross.

A Yes. If the grade aspect had been eliminated there wouldn't be any possibility of the accidents if an imbecile went on there.

Q If the motorman had controlled his car there wouldn't have been any accident?

A All human nature, you have to guard against that.

Q (*By Mr. Gilmour.*) I want to know what you know about those accidents; whether you saw the accidents or saw the cars? 10

A I read the papers. It was authentic.

Q (*By Mr. Merrey.*) What prompted the Board of Trade to take up the grade crossing matter?

A The accident at Broadway crossing, Mr. Fronick; two were killed at that time. I don't think in a trolley car.

Q (*By Mr. Gilmour.*) Wasn't it in an automobile? 20

A Yes.

Q Isn't there a derail at that crossing?

A Yes. I don't care what crossing you take; how many gates you put there; two were put at my suggestion at the Broadway crossing; still it is dangerous there and it is only the elimination of the grade crossing—

Q I am not speaking of the crossing itself, the crossing danger. I am objecting to the statement that the operation of our railway is careless. 30

A No; I don't say that. I think you are careful; but beyond that, you can't be careful enough. It isn't in the power of human to guard against that, because there is a hill and sometimes it gets beyond the control of the railway.

Q (*By Mr. Merrey.*) You said there was an accident and that Mr. Gilmour's railroad was careless, you didn't mean the trolley?

A Yes. 40

Samuel V. S. Muzzy, re-cross.

Q (*By Mr. Hobart.*) Do you think the railroad is careless?

A I think the railroad exercises due care under the circumstances. In exercising due care it becomes a great nuisance to the community.

Commissioner Donges. How?

10 **Witness.** Six miles an hour going through the town. The last year or two since the accidents have occurred they have been reducing the speed materially.

Q You think an order of this board operates as a nuisance to Paterson?

A Not because they obey the board, but the results obtained by obeying the board.

Commissioner Donges. In what manner is the nuisance created?

20 **Witness.** It takes that longer to get to New York and the gates are down now. I think, when a train is at Broadway or Fair street, the gates are put down on Market street and people wait and wait and wait two or three minutes before they can cross when a train isn't in sight. That is a necessary precaution. Notwithstanding that, **when the gates are down, some people run under the gates.** They are not stopped by the flagman; I presume they have instructions they rely on
30 the notice that no person should not go there. They do go there. If the grade crossing is eliminated they couldn't go there; it would be impossible. We want to make it so safe that a man who is an imbecile going on the street couldn't be run over.

William Wieda, direct.

WILLIAM WIEDA, sworn on behalf of the petitioner.

Direct examination by Mr. Merrey.

Q Mr. Wieda, how long have you lived in the City of Paterson?

A Nineteen years.

Q What business are you engaged in?

10

A Retail and manufacturing confectioner.

Q Where is your place located?

A 210 Market street for the last three years; before, 212 Market street.

Q Near the Erie Railroad?

A About 500 feet from the crossing.

Q Are you connected with some board or association there?

A The Market street Business Men's Association.

Q Are you president of that organization?

20

A Yes, for the last four years.

Q Have you given any attention to the question of the elimination of the grade crossings in the City of Paterson?

A Yes; from time to time and almost every day on account of the danger and also for business purposes.

Q Do you use any of these crossings?

A I use the Market street crossing sometimes four or five times a day. Then again four or five times a week only. Years ago I crossed it at least three times a day, because I used to live on the other side of the railroad.

30

Q Is the railroad crossing in sight from your place of business?

A Yes, sir.

Q Can you tell us whether the traffic has increased at Market street or not?

40

William Wieda, direct.

A The traffic at Market street is increasing constantly. To find out the number of people passing a given place I employed a man about four years ago and had him count the people.

Mr. Hobart. I object to what the witness heard a man say.

10 *Commissioner Douglas.* He ought to confine it to his own knowledge.

Q You have nothing but your impression from daily observations of the street?

A That is all.

Q What is your impression as to whether it is increasing or not?

20 A It is constantly increasing on account of the growth east of the Erie Railroad. The population is growing constantly, building up, the whole section is building rapidly in the last eighteen years; building every day.

Q You have noticed that growth yourself, have you?

A Yes, business has increased on Market street; the merchants have increased on Market street and the rent has tripled in the last ten years.

Q The section on Park avenue just opposite the railroad, has there been much increase in houses?

A Yes, sir.

30 Q What is the character of those houses?

A Tenement houses and apartment houses.

Q Many of them?

A Yes, three blocks I believe, both sides of Park avenue; where there used to be small one-family houses before the fire.

Q Do the people from those houses use the crossing?

A They have to; it is the only way to cross them.

Mr. Hobart. No questions.

James E. Taylor, direct.

JAMES E. TAYLOR, sworn on behalf of the petitioner.

Direct examination by Mr. Merrey.

Q Are you a street commissioner in the City of Paterson?

A Yes, sir.

Q How long have you been employed there?

A Two years, five months.

10

Q Have you had any occasion to observe the railroad crossings running from Madison avenue to River street?

A Yes, sir.

Q The count of persons going over the crossing was made under your direction?

A Yes, sir.

Q From your own experience—do you use the crossing?

A Yes, sir.

20

Q Which one?

A I use them all.

Q Do you find any delay or impeding of traffic at these crossings?

A Yes, sir.

Q Much?

A Well, a great deal.

Q Can you tell us which crossing there is a great deal of traffic impeded?

A Straight street and Market street I noticed it most.

30

Q Broadway?

A I haven't noticed Broadway so much.

Q River street?

A River street.

Q How are these crossings paved for the traffic across them?

A Part isn't paved at all; only just alongside the railroad.

40

James E. Taylor, direct.

Q You have a great deal of trouble about that?

A Yes, I have noticed them.

Q How is the traffic taken across, on planking?

A Yes.

Q Are any of the crossings not planked?

A Yes.

Q I mean that have something else besides plank-
10 ing?

A Straight street.

Q Is this planking changed frequently?

A Yes, I think they have changed it on the course
of two years.

Q Which one?

A Most all of them; I went over them. They have
replaced the old planking.

Q That caused delay while they were doing that?

A Yes; they had a permit to block the street.

20 *Commissioner Dungen. Do what?*

Witness. Block the street; shut off the street.

Q Can you tell us how often that is done, plank-
ing?

A It has been done once this year. That is when
they were changing rails, putting in heavy rails.

Q Can you tell us which is the most dangerous of
these crossings in your observation?

A I think Straight, the intersection of Straight
30 and Clay.

Q Why, what makes you feel that is the most dan-
gerous?

A The most accidents happen there and they hold
them off longer. People going to the mills from the
west side run in under and between freight cars when
they are doing their switching there. There is times
when they hold them up ten minutes at the Straight
street crossing. Generally it is around noon time
or morning when people are going to and from work.

James E. Taylor, cross.

Cross examination by Mr. Hobart.

Q Mr. Taylor, how long have you been a street commissioner?

A Two years, five months.

Q Referring to the new planking on Straight street; when was that put down, do you remember?

A No; I think it was along this spring at the Straight street crossing. 10

Q When was the last time before that any new planking was put there?

A I don't remember; about one year. That was done twice since I have been in there; most of the paving in between the tracks on Straight street crossing.

Q They were changing the rails at that time, putting in different rails, heavier rails?

A They changed the rails this year.

Q That was the time they changed the planking? 20

A Yes, sir.

Q You spoke of the crossing at Straight and Clay streets.

A They are two crossings, Straight and Clay streets.

Q Really it is only one crossing?

A No, two crossings. We say that is the most dangerous, Straight and Clay street crossing, on account of the switching engines switching in there.

Q You spoke of accidents happening there? 30

A Yes.

Q Did you ever see any?

A Yes, sir.

Q How many?

A One. I stood right there and seen it.

Q When was that?

A Along this summer some time.

Q Do you remember the name?

A No, I don't know.

Q Was it a man or a woman; tell us about it. 40

James E. Taylor, cross.

A No; I ain't sure whether it was a man or a woman. I come in there after the accident occurred. I didn't stop to look at it at all; I went right along.

Q What did you see of it?

A Just seen there was an accident there.

Q Do you know whether the injured person dodged under the gates?

10 A I think he dodged in between cars on account of the switching.

Q While the cars were moving?

A I don't know; switching there all the time. The cars must have been moving or he wouldn't have got caught.

Q You spoke of some count made under your direction; a count of the number of people?

A Yes.

Q What streets?

20 A All the streets.

Q Referred to in this proceeding?

A From Madison avenue to Fifth avenue.

Q When was it made?

A The first part of the summer.

Q Who was the man that made it?

A Dunleavy, Kane, Flynn, O'Rourke, Crooks and Owrey.

Q Are they here to-day?

A No.

30 Q (*By Mr. Merrey.*) They testified last week?

A Part of them were here.

Q (*By Mr. Hobart.*) Part, not all?

A I think there was four last week.

Q You spoke of being held up ten minutes one time?

A Yes. I wouldn't say positively; I have been held up ten minutes at Straight street.

Q On what day?

A I couldn't tell you the date or time; frequently.

40 Q Once?

William Wieda, direct.

A Most every noon time I am held up at Market street three or four minutes.

Q Let us stick to Straight and Clay streets; when was you held up there ten minutes?

A I couldn't say just when it was.

Q Were you ever held up ten minutes?

A I think I was.

Q Can you give me an idea when it was?

10

A No, I go over there so often.

Q You didn't hold a stop-watch to see how long you were held up?

A No. After I had been there three or four minutes I pulled out my watch, and after that it was, say, five minutes.

Q That isn't ten minutes.

A I say five minutes, but it had been four or five minutes before that.

Q One particular occasion do you remember doing that? 20

A Yes.

Q Is that the only one you remember?

A I never pulled out my watch before.

WILLIAM WIEDA, re-called on behalf of petitioner.

Direct examination by Mr. Merrey.

Q Did you ever time the delay at the Market street crossing?

30

A Yes, I did.

Q How long were you delayed?

A The longest time was four minutes.

Q And when was that?

A About four weeks ago, one noon. The condition was that the train was coming in from New York that brings some express along. That train came in; another switch engine went up on the other track and then the next switch engine came in to get the car from the train further west, and when that switch

40

Discussion.

engine pulled in front of Market street the train went west by Broadway and the freight was sighted and the passenger train, and then four minutes' time elapsed and the gates were down.

Mr. Hobart. No question.

Mr. Merrey. That is all I intend to offer outside of Mr. Maybury's testimony.

10 *Mr. Hobart.* I don't care to go ahead with our case until the city is finished.

Mr. Merrey. The matter Mr. Maybury will give is merely that which he is required to give as part of the commission.

Commissioner Donges. Mr. Maybury is really not a witness of the municipality.

Mr. Hobart. I understand he is going to call him as a witness.

20 *Commissioner Donges.* The board always prefers that its engineers and inspectors shall be, if called to testify, put on the stand as employees of the board and at the board's direction; so Mr. Maybury, if called, he will be called at the instance of the board and you may proceed then, if you choose, on the assumption that the municipality's case is closed.

Mr. Hobart. Of course, the board knows the testimony Mr. Maybury will give, and I would like to know what that is before we proceed.

30 *Commissioner Donges.* I don't know. Mr. Maybury may or may not be called. I would say that it wouldn't be prejudicial to your rights.

Mr. Hobart. May I make another suggestion. Of course, I don't represent any of the gentlemen or companies that are named in the answer to whom the board is going to send notice of the hearing. It occurs to me those gentlemen should be present when the testimony is given. Their interests are seriously affected.

40 *Mr. Merrey.* The principal thing that I shall ask from Mr. Maybury is to produce before the

Discussion.

board its records which, I believe, he is in charge of, of accidents at these crossings.

Commissioner Donges. The reports?

Mr. Merrey. Yes.

Mr. Hobart. That is very important. We want to know what they are.

Mr. Sommer. You know. They are the ones you made to the board.

10

Mr. Hobart. I don't know which Mr. Maybury will put in.

Mr. Merrey. All the crossings called for. I may say it is impossible for us to get a complete list of the accidents at these crossings except as to those the board has. We have a record of the number of deaths at those crossings, but we can't get you the information concerning them.

Commissioner Donges. Your case is closed with the exception of producing the report of the railroad company made to this board.

20

Mr. Merrey. Yes.

Commissioner Donges. Of accidents at these crossings.

Mr. Merrey. Yes, sir.

Mr. Minard. May I suggest this to the commission: This commission has powers to issue subpoenas *duces tecum*, and the complainant can have those at any time they want it. So his case is never closed. They never asked us.

30

Commissioner Donges. Those records are in the control of this board, but the board of course would request them to be produced; no subpoenas would be necessary.

Mr. Minard. I wouldn't say definitely, but I think our people would produce them if they asked for them.

Commissioner Donges. Of course, the records of this board are open to any one. Are you ready to proceed?

40

Discussion.

10 *Mr. Hobart.* No, sir, I am not, especially in view of the fact that these other parties will be brought in. Of course, that is only a suggestion. I don't appear for them in any way. If I may make the further suggestion; it would facilitate the entire matter if Mr. Merrey undertook to close as far as he is concerned, and knowing, exactly that the purpose is of putting it in, we can be prepared with that feature, and other lines.

Commissioner Donges. Mr. Merrey has closed. The board will, of course, order the production of the reports made to it. As far as the testimony, I understand Mr. Merrey to say, on the part of the municipalities, that is closed.

Mr. Merrey. Yes.

20 *Commissioner Donges.* Couldn't you meet the specific contents of the reports?

Mr. Hobart. No, sir.

Commissioner Donges. There seems to be no reason, if you are ready, why you shouldn't go on.

Mr. Merrey. All I desire is to get into this particular record the records the board had as to the conditions of the crossings, the classification, and so on, so we may have them.

Mr. Hobart. We are not prepared to go on to-day.

30 *Commissioner Donges.* Adjourned until Thursday, December 4th, at the Chancery Chambers, Jersey City, at 10.30 o'clock A. M., with the understanding that if the case is not closed we will on Friday devote as much time as possible to it.

Discussion.

FOURTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Jersey City, N. J., Thursday, December 4, 1913.

PATERSON GRADE CROSSING
ELIMINATION, ERIE RAILROAD. }

Before Commissioners Donges, Hillery and Daniels. F. H. Sommer, Esq., Counsel. 10

For City of Paterson appears E. F. Merrey, Esq., and R. B. Lewis, Esq.

For Erie Railroad Company appears G. S. Hobart, Esq., and D. E. Minard, Esq.

For Passaic Water Company appears Humphreys & Sumner.

For adjoining property owners appears W. B. Gourley, Esq. 20

For Paterson & Ramapo Railroad and president and directors of Paterson & Hudson River Railroad appears W. I. Lewis, Esq.

For D. Fullerton & Co., and Swift & Co., appears W. R. Hudson, Esq.

Mr. Humphreys. I represent the Passaic Water Company, which has water pipes underneath every crossing mentioned in the petition, except one crossing. This company thought it was not necessary to file an answer; but on consideration thought it better to do so, in order that their rights shall be protected and that they should be permitted to testify if occasion required. It doesn't want to spend money under any law that is unconstitutional. I ask leave to file answer of the Passaic Water Company. 30

Commissioner Donges. Is there any objection?

Mr. Minard. No. 40

Discussion.

Mr. Merrey. No objection.

Commissioner Donges. Mr. Sommer?

Mr. Sommer. I would like to see the answer.

10 *Mr. Gourley.* If the commission please, I represent D. S. VanKirk, Paterson Brewing & Malting Company, John Agnew Company, Hermann Company, Jacob Meyer and DeVogel, McNab & Harlin, and James Wilson & Sons, Samuel Smith & Sons and Leslie Elliott Company, partners, Henry M. Post. I ask permission to file an answer for each of these in this case.

Commissioner Donges. Is there any objection?

Mr. Merrey. I want to ask whether there are a number of switch owners in a like position that you represent.

20 *Mr. Gourley.* There are some others. I represent Fuller's Express Company and Mills Company—

Mr. Merrey. Nelson Mills?

Mr. Gourley. Formerly Nelson Mills. I ask permission later to file an answer in this case. I would also like to file an answer for the National Silk Dyeing Company later. I have a formal answer here; I have some facts I want to verify.

30 *Mr. Lewis.* In behalf of the Paterson & Ramapo Railroad Company and of the president and directors of the Paterson & Hudson River Railroad Company I would ask leave to file an answer within ten days. Leave was granted to me in the Rutherford case last week. Now, in the Paterson case, I would like similar leave. I have given a great deal of time to the investigation of matters involved and of interest to the two companies and the relation to each other, and I have covered a period from 1831 down to the present. It required an examination of the various acts of the Legislatures that were passed from time to time and the proceedings in court and a multi-

40

Discussion.

tude of things, and I really haven't been able to intelligently consider and adjust it. I would like to have ten days in order to file my answer. I don't think it will occasion any taking of evidence. I think all the evidence will be put in that is necessary to be put in in this hearing without my answer. It is simply matters that involve the constitutionality of the law.

10

Commissioner Donges. Is there any objection? (No response.)

Mr. Humphreys. In regard to the Passaic Water Company, Mr. Sommer makes no objection to our filing the answer.

Commissioner Donges. I understood that you may want to offer proof?

Mr. Humphreys. It is very doubtful; I think we will have no testimony; it is just possible.

Mr. Gourley. We will, of course.

20

Commissioner Donges. Your clients are all—

Mr. Gourley. Property owners, yes. I should say one or two of these—

Commissioner Donges. Your rights are subject to the testimony already taken.

Mr. Gourley. Yes. I haven't had a chance to read that. I want to say one or two are outside the immediate district affected, but the possible effect may be embraced within it.

Mr. Minard. I don't know as it is hardly fair to say that those people are bound by the testimony offered. They had no notice of these proceedings until the last hearing when it was decided to have notice sent them, and they are now here.

30

Commissioner Donges. I understand they were parties to it.

Mr. Minard. They were never parties until notice was sent out by the board at the last hearing. We gave the names in our answer.

40

Discussion.

Commissioner Donges. If they come now they must come in the proceedings at this time and be subject to the testimony already taken, Mr. Minard.

Mr. Minard. That may be true; it is a question whether they can be compelled to do that or not.

10 *Commissioner Donges.* Mr. Gourley said he was willing.

Mr. Gourley. I haven't seen the testimony. There may be something I wish to cross examine on.

Mr. Merrey. I don't see as that concerns him, the Erie Railroad Company, if somebody else doesn't have a hearing. I think it is up to the other people to make an objection; he is not called on to do so.

20 *Commissioner Donges.* That is true.

Mr. Minard. That isn't true. If these people come in as defendants to contest the constitutionality of this law and they subsequently contest it, we are interested in the result. That would result in a benefit for us as well as for them. We cannot say they are separate defendants and our rights are not co-related.

30 *Commissioner Donges.* You are not in a position to assert the other defendants may not come in and bind themselves by the proceedings already taken.

Mr. Minard. You are not in a position to say these people are separate defendants. They are people who should have been made parties in the beginning under the language of the act. If the petitioner failed to do it, they cannot possibly by any order of the commission, be foreclosed of the opportunity of putting in their case from the beginning even to hearing it all over again.

Discussion.

Mr. Sommer. We offer any witness that has been sworn for cross examination by these parties now coming in if they desire it.

Commissioner Donges. The commission would say, any person coming in now and being made a party, have that opportunity.

Mr. Minard. That is the only point I desire to make. 10

Mr. Hudson. I desire to file an answer for D. Fullerton & Company and later for Swift & Company.

Mr. Minard. I would like to see it.

Mr. Gourley. Some of my clients are abutting and some are not abutting switch owners.

Mr. Sommer. I should say there was objection to the answer of D. Fullerton & Company unless the board specifically passes on it. The last paragraph says: "D. Fullerton & Company reserve the right to more fully answer the petition filed herein." 20

Commissioner Donges. Do you desire to answer more fully?

Mr. Hudson. I do.

Commissioner Donges. Inasmuch as Mr. Lewis was given ten days to answer, if there is no objection, the board will entertain your motion at that time.

Mr. Hudson. I want, at that time, to file an answer for Swift & Company. 30

Mr. Sommer. Suppose you withdraw this and make an application for both parties, filing the answer in ten days?

Mr. Hudson. I have leave, in ten days, to file an answer of D. Fullerton & Company and Swift & Company.

Mr. Sommer. Yes.

I have no objection to filing the answers of Mr. Gourley if the city has not. 40

Discussion.

Mr. Merry. I haven't any.

Commissioner Donges. What is your position, Mr. Gourley, in filing your answer in respect to the question raised as to whether your clients are injuriously affected by the failure to make them parties, I understand some of them were not when the proceedings were begun.

10 *Mr. Gourley.* Of course, we don't want to assent to anything done against us. At the same time we don't want to inconvenience the commission's activity. I haven't read this book (indicating). Permit me to reserve my reply until I read this book.

20 *Commissioner Donges.* The thought in the mind of the commission, if there is any question to be raised as to the effect of bringing in interested persons now as parties and objection is made later that the failure to bring those parties in works a hardship or injustice and was fatal to the continuance of this proceeding and the determination by this board, we want to meet that question as early as possible. If that question should be raised the board should meet it and pass upon it and do whatever is necessary to get the record in shape to go on.

30 *Mr. Gourley.* Notice was given to me to appear last night at eleven o'clock. We will be glad to help the commission and raise no technical objections at all.

Commissioner Donges. Judge Lewis, I think your client was given notice originally, that is to say, of the first hearing when notice was served on the other respondents.

Mr. Lewis. I believe not; I believe we were not distinctly informed.

40 *Mr. Merry.* The companies were made parties to the city's petition by notice served upon the Erie Railroad, and they came in and disclaimed any connection with the other company.

Discussion.

Commissioner Donges. No notice was given to the president and directors, if that is the title, of the Ramapo Railroad?

Mr. Lewis. There is no alliance between the railroads.

Commissioner Donges. Do you contemplate raising the question in your answer of failure to give notice to your client? 10

Mr. Lewis. I can't answer that question now.

Commissioner Donges. What is the position of the Passaic Water Company?

Mr. Humphreys. The Passaic Water Company was made a party originally.

Commissioner Donges. And given notice?

Mr. Humphreys. Yes.

Mr. Herreg. I want to say this, the title of one company Judge Lewis represents was incorrectly stated. I think we called it the Paterson & Hudson River Railroad and the title is the President and Directors of the Paterson & Hudson River Railroad. I suppose there is no objection to the misnaming of it and we may correct it in the record. 20

Commissioner Donges. Judge Lewis says his client was not served with notice.

Mr. Herreg. There may be some question whether they were served or not. The secretary of the commission, in giving notice, didn't serve the secretary of the company. 30

Mr. Lewis. At 50 Church street.

Mr. Herreg. It was served on the office of the Erie Railroad Company and probably the service is not correct service. It was assumed the companies were allied and would not disclaim the alliance.

Commissioner Donges. The commission desires to have the record show just what the posi- 40

Discussion.

tion of the parties now answering is on the question, so as to know how to deal with it now.

Mr. Lewis. We wouldn't put the commission or counsel to any inconvenience in the introduction of evidence, subject to our rights if necessary to cross examine if it should develop later it is necessary.

10 *Commissioner Donga.* That opportunity will be afforded any person answering now and coming in. The question is whether it is necessary, in order that the proceeding go on, and examination be made that these parties should have had notice or waive it now.

Mr. Lewis. I think we can safely waive that.

Commissioner Donga. Mr. Gourley, will you give us an answer?

Mr. Gourley. I haven't read the testimony.

20 *Mr. Lewis.* I am in the same position as to that, but I think I can waive it.

Commissioner Donga. I would like the attitude of your client in respect to that question, Mr. Hudson?

Mr. Hudson. I feel I would like to go over that testimony first before being bound by that. I haven't any objection at this time.

30 *Commissioner Donga.* You say, being bound by it. You are not bound by any testimony; the only question is whether or not you now submit yourself to the determination based on the testimony heretofore taken. It is not sought to make that testimony binding on you, but simply whether you would claim it was fatal to the determination of this proceeding as your interests are affected by reason of the failure to have been made a party earlier in the proceeding.

Mr. Hudson. I do not have any intention of making it.

Commissioner Donges. Do I understand, Mr. Minard, the Erie Railroad does take that position, that the failure to give notice to these other parties—

Mr. Minard. No; the Erie Railroad takes this position; it hasn't any objection itself to this case going on, except that it wants to exercise its rights to see that the parties who come in later, because their contentions, if successful, would be a benefit to us and may save us damages which we, under the act, would otherwise be required to pay, that they ought to have at least the right to cross examine witnesses heretofore produced.

10

Commissioner Donges. Yes; but do you assert the failure to bring them in is fatal?

Mr. Minard. No.

Commissioner Donges. You agree the proceedings may go on?

20

Mr. Minard. Yes, certainly.

Commissioner Donges. As if they had been parties originally?

Mr. Minard. Yes; I assume they have the same privileges as we.

Commissioner Donges. Yes. The board gives any person brought in an opportunity to cross examine fully.

Mr. Merreg. The pleading was the service of the petition by the city and the answer; is that the end of the pleadings?

30

Commissioner Donges. Yes. I understand the petitions and answers are all that you are required to file by way of pleading.

Mr. Merreg. It is met usually.

Commissioner Donges. You mean as to whether there are amendments?

Mr. Merreg. Our amendment; may we reply to the answer?

Commissioner Donges. On application for a reply, you can. The commission will pass on any application.

40

Discussion.

Mr. Merrey. If the commission desire we should reply, we will do it. There is no set rule about pleading and whether we are entitled to the last say or not.

Commissioner Donges. Any matter raised in any answer that seems to call for a reply, the commission will give an opportunity for such reply.

10

Mr. Minard. I would like to offer the amendments which we were asked to produce.

Mr. Merrey. You were to give some information, Mr. Minard.

Mr. Minard. About what?

Mr. Merrey. Give us a history of the leases.

Mr. Minard. That will come along. Mr. Palmer will give you that.

20

Mr. Sommer. I think there was an understanding last time that we were to obtain from the files of the board the reports of accidents at these crossings and produce them. I have them here.

Mr. Merrey. Not only the accidents, but also produce the report of your inspector of conditions at crossings.

Mr. Minard. I don't remember any testimony of conditions at crossings. Only the reports, those reports where there were accidents at crossings.

Commissioner Donges. Reports filed by the railroad company with the board?

30

Mr. Minard. Yes.

Commissioner Donges. Whether or not all the reports of the company connected with these crossings were to be introduced, I am not clear.

Mr. Sommer. We were to produce them and they are here. If the board desires any testimony of preliminary investigation or classification, of course, Mr. Maybury is here. I can't take the position of offering it.

40

Mr. Merrey. The position of the board was Mr. Maybury would be called, it was preferred

Discussion.

he would be called at the instance of the board. We may proceed on the assumption the municipality's case is closed.

Mr. Minard. That was only for the production of those accident reports.

Mr. Merrey. No.

Mr. Sommer. That was as to a question of procedure; whether a subpoena shall issue for one employee of the board, or whether the board would voluntarily produce it. 10

Commissioner Donges. The board has no objection to Mr. Maybury testifying and will produce him at this time. Mr. Maybury will be called.

Mr. Minard. The commission will note our objection to any testimony at this time, except that provided at the last hearing, which were the accident reports. We object to any offer in their case now to produce material that was left out before. 20

Commissioner Donges. On the part of the municipality?

Mr. Minard. On the part of the petitioner. I don't know whether the petitioner is entirely the municipality or the commission.

Commissioner Donges. This proceeding is on the petition of the City of Paterson, not upon the initiative of the board. 30

Mr. Minard. I have considered the board a party.

Mr. Merrey. That is all we ask, the accident reports be produced.

Mr. Minard. We have no objection to that.

Mr. Merrey. I would like to say in cases of this kind where reports and schedules are produced, where they are short, they should be in the record, and the stenographer should put them in. I think our last summary, showing the use of the crossing was not put in the record. 40

Discussion.

Commissioner Donges. It was not read into the record?

Mr. Merrey. I think not. We put in the summary of the record made by the Board of Trade at four crossings and then afterwards we showed the count made by the City Street Commission. I think the summary was not in the record.

10 *Commissioner Donges.* There is no objection. It may be read into the record.

Mr. Hobart. That proof is already in. I think it was received as an exhibit.

Commissioner Donges. It is agreed it be read in and made part of the record.

Mr. Merrey. It was a summary of P-33, P-34, and P-35, and P-36, the result of that was one table, it was all consolidated in one table, so if we have a copy of that, it is sufficient.

20 *Commissioner Donges.* It is agreed now that letter be made an exhibit and copied in the record.

(Same is marked Exhibit P-43, as follows):

"The following is a report of the inspectors taking the record at the various crossings of the Erie Railroad:

	Date	Crossing	Trains		Autos	Wagons	Pedes- trians.
			E.	W.			
30	March						
	22	Madison Avenue	38	35	236	481	2,148
	24	Straight Street	75	78	90	222	2,488
	25	Clay Street	83	76	51	314	3,244
	26	Cedar Street	33	35	16	251	3,151
	28	Market Street	38	35	1,051	1,847	27,136
	29	Ellison Street	65	50	22	524	3,822
	31	Van Houten Street	51	46	273	450	3,608
	April						
	1	Broadway	51	46	288	345	10,484
	2	Fair Street	47	41	47	161	1,366
	3	Hamilton Avenue	45	45	108	433	3,258
	4	River Street	55	53	279	756	10,913
	5	Lafayette Street	51	35	35	327	4,611
	7	Franklin Street	64	56	7	91	1,188
40	8	Keen Street	60	53	28	131	1,367
	9	Warren Street	57	53	48	115	1,520

Discussion.

Mr. Hobart. Mr. Maybury will state reference to the date, name of party and name of the street crossing?

Mr. Sommer. Yes.

Mr. Maybury produces from the files of the board telegraphic and written reports of accidents made by the Erie Railroad Company to the board in accordance with the rules of the board and will identify the telegraphic and other reports. 10

Mr. Hobart. I ask we have given the date, name of party and place, as shown by the report.

Mr. Maybury. December 11, 1911, Fifth avenue crossing, Paterson; employee of J. W. Ferguson & Company. April 18, 1908, Market street crossing; unknown man attempting to board train, killed. August 26, 1910, Broadway crossing, two killed, three injured; automobile accident. July 15, 1912— 20

Commissioner Donges. Just a moment. This accident of August 26, 1910. The report of the railroad company to this board showed there were two persons killed and three others injured?

Mr. Maybury. Yes. July 15, 1912, Clay street crossing, trespasser killed. The trespasser went under the gates when they were lowered, John Rooney.

Mr. Sommer. The statement which you have just made and the statements that you shall hereafter make are simply taken from the reports? 30

Mr. Maybury. Yes, sir.

Mr. Sommer. Of the company?

Mr. Maybury. Of the company, yes, sir. September 7, 1912, Keen street crossing; wagon damaged, Siboris Sinson and wife injured.

Mr. Minard. Can I make a suggestion as to that. The name is Libero Sansorie.

Discussion.

10 *Mr. Maybury.* September 18, 1912, wagon struck, Clay street crossing, Mendel Senanseeck, driver, killed. November 6, 1912, Madison avenue, wagon damaged, John Hamilton injured, one other occupant injured. March 24, 1913, Keen street crossing, James Eakins, pedestrian, killed. I presumed in the accidents in this case it covered simply between Madison avenue and River street and no other point on the main line of the Erie in Paterson.

Commissioner Donges. I don't know whether it would be limited.

Mr. Minard. This would be confined to the crossings involved, the reports should be.

Mr. Maybury. They are.

Mr. Minard. Fifth avenue is in there.

20 *Mr. Maybury.* That is the first street west of River street. I have others; I won't read them.

Commissioner Donges. These reports are to be marked as exhibits.

(Accident report, December 11, 1911, marked Exhibit P-44.)

(Accident report, April 18, 1909, marked Exhibit P-45.)

(Accident report, August 26, 1910, marked Exhibit P-46.)

30 (Accident report, July 15, 1912, marked Exhibit P-47.)

(Accident report, July 15, 1912, marked Exhibit P-48.)

(Accident report, September 7, 1912, marked Exhibit P-49.)

(Accident report, November 6, 1912, marked Exhibit P-50.)

(Accident report, March 24, 1913, marked Exhibit P-51.)

40 *Mr. Merrey.* These reports are the ones made by the company itself, and what period of time do they cover?

Discussion.

Mr. Maybury. A number of years.

Mr. Merrey. When do they begin? At the beginning of the original railroad commission?

Mr. Maybury. 1909. The original railroad commission started in 1907.

Mr. Merrey. Do you know whether they are confined to any particular kind of accidents?

Mr. Maybury. Yes, grade crossing accidents. 10
And grade crossings only.

Mr. Merrey. Do they include those accidents where only property was damaged and life or limb not injured?

Mr. Maybury. No.

Mr. Merrey. They do not include those?

Mr. Maybury. There may have been several accidents along that line. We haven't asked for those reports unless the property damage was over one hundred dollars and happened on a 20
grade crossing.

Mr. Merrey. Do you ask for reports or does the company make them in the first instance?

Mr. Maybury. They make them in the first instance.

Mr. Merrey. Do you investigate to find or do they make a report of all accidents?

Mr. Maybury. All accidents are supposed to be reported immediately by the railroad companies. If an accident should happen and not 30
be reported by the railroad company, the probabilities are it wouldn't be investigated because that would be the only means of communicating accidents to the board.

Mr. Merrey. Are you certain now you have here all accidents that have been reported by the company since the beginning of the commission?

Mr. Maybury. No, I wouldn't say that.

Mr. Merrey. I would ask permission to have Mr. Maybury make a further search in this matter, 40
because I believe there are many more acci-

Discussion.

dents that have happened, and with the privilege of suggesting dates so he may investigate his record to find if there are any further.

Mr. Maybury. May I ask a question: Mr. Merrey, just what kind of a report do you want? Suggest some you have the names of.

10 *Mr. Merrey.* For instance, I believe on June 6, 1909, a trolley car was struck at Broadway crossing by an approaching train.

Commissioner Donges. Mr. Maybury, have you thoroughly examined the records of the board to find all the reports made by the company?

Mr. Maybury. No, there may be several others that I didn't think were necessary.

20 *Mr. Merrey.* I have a list here which we believe is very incomplete, but it contains a report to the police department of a great number of accidents at these crossings in addition to the ones Mr. Maybury has stated.

Commissioner Donges. You now suggest that Mr. Maybury make a further examination?

Mr. Merrey. Further search, and I will give him whatever assistance I have in this report, to assist the commission in these reports.

Mr. Maybury. What I would like to know is whether these accidents are of a nature the board requires reports on?

30 *Mr. Merrey.* Some of them are—

Mr. Hobart. Before testimony is given on such a list I presume we will have an opportunity to examine it.

40 *Commissioner Donges.* I understand Mr. Maybury suggests, that is the assumption, that the record ought to disclose reports made by the railroad company of other accidents than those the records of which Mr. Maybury finds in the records of the board, so all he is now asked to do is to produce further records of the board.

Discussion.

Mr. Hobart. That have been reported?

Commissioner Donges. Yes.

Mr. Merrey. I think some may have escaped.

Mr. Hobart. I wanted to be sure his examination was confined to the records of the board.

Commissioner Donges. Yes, his examination is to be confined to the records of the board.

Mr. Hobart. I am informed by Judge Lewis 10
this morning that two or three witnesses we expected to have here to-day are not able to testify to what we anticipated in regard to the operation of the Paterson & Hudson River and Paterson & Ramapo Railroad. It is a matter that concerns his client and also the Erie Railroad Company. But he does inform me that two or three are rather elderly gentlemen from Paterson, eighty years old and upwards, who will testify to the facts as to when the road began. I consider that an important matter from the standpoint of the Erie Railroad Company, at least. In view of the suggestion of Judge Lewis that these witnesses are aged and infirm, I make the suggestion that possibly Mr. Merrey, with the board's consent, will take their testimony with Mr. Brainard. 20

Commissioner Donges. I think a member of the commission had better be there.

Mr. Hobart. We can go to Paterson at some convenient time in the next few days. 30

Commissioner Donges. The board will make an effort to accommodate the infirmities of these witnesses.

Mr. Hobart. Would it be possible to mention any date now?

Commissioner Donges. Would Thursday be convenient for you to take the testimony of these witnesses at Paterson?

Mr. Merrey. Yes. 40

A. L. Sorensen, direct.

Mr. Gourley. Yes.

Commissioner Donges. Very well. At 11 o'clock, Thursday, December 11, at Paterson, City Hall, Paterson. If the other members are unable to be present, Commissioner Hillery will sit for the commission.

10 *Mr. Minard.* I am going to take the liberty of changing the order of our defense some on account of the necessity of releasing Mr. Sorensen; he is required in New York to-day.

Commissioner Donges. Very well.

A. L. SORENSEN, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q What is your occupation?

20 A Statistician of the Erie Railroad.

Q Are you chief clerk to the comptroller?

A Yes, sir.

Q Are you familiar with the records, figures, reports, and so on of that department?

A Yes, sir.

Q They pass through your hands, all of them?

A They do.

Q In fact, most of them are made up either by you or under your supervision?

30 A Yes, sir.

Q I show you a paper and ask you what that is.

A This is a statement of the Erie Railroad system, showing the percentage of return on the investment and property devoted to railroad purposes.

Q Begin on the top line and explain what that statement shows?

A The first line?

Q The dates up there.

A The dates show the fiscal year of the company
40 from June 30, 1903, to 1913, inclusive.

A. L. Sorensen, direct.

Q The second line shows what?

A The second line shows the total operating revenue including outside or auxiliary operation, as it is sometimes called.

Q In other words, the total gross income of the road from operating properties?

A Total gross operating revenue; of course, we have other income. 10

Q That covers the various years you have mentioned?

A From 1903 to 1913, the year ending June 30th.

Q The next item?

A The next item shows the total operating expenses including expenses for auxiliary or outside operation.

Q The next item?

A Shows the net operating revenue left deducting the operating expenses from the operating revenue, which, of course, also includes outside operation. 20

Q The next item?

A The next item, taxes that are accrued for the various years shown.

Q The next item?

A The next item is the result after deducting the taxes from the net operating revenue.

Q And then you have the operating income?

A The operating income, yes, sir.

Q What did you do next? 30

A The next item we have the net of the debit and credit, net-hire of equipment, joint facilities, miscellaneous rent, and added and deducted, whatever the balance happens to be, with the operating income, which is the net operating income figure.

Q Wherever Dr. is marked that means you paid that out?

A We paid that much out in excess of the amount we collected.

Q For those purposes? 40

A Yes, sir.

A. L. Survasca, direct.

Q From the net operating income with the net operation what was done?

A We took out the amount paid for lease of roads, not included above, and interest charges or obligations issued for railroad purposes only.

Q You get a result which is what?

A Get a result which represents the net income
10 from railroad operating investment, which, divided by the total amount that is invested in the property, is a percentage of return on the investment in property.

Q 1913, the fiscal year, shows a net return of what?

A 1.3%.

Q 1912?

A .64%.

Q 1911?

20 A 1.37%.

Q And so on up the marks are all shown?

A Yes.

Q 1908 shows a deficit?

A .33%.

Q .33% deficit?

A Yes.

Q What else is in there? This is property investment (indicating), this line underneath net income from railroad operating investment is property
30 investment?

A Yes, sir.

Q What is the last line?

A The last line shows taxes paid to the State of New Jersey for the years ending June 30, 1910, to 1913, both inclusive.

Q It shows an increase in those four years from \$539,713 to \$894,368?

A Yes, sir.

A. L. Sorensen, direct.

Commissioner Hillery. Why are they omitted for the previous years?

Mr. Minard. We didn't compile them.

I offer that statement in evidence.

Mr. Merry. I object to it.

Mr. Minard. What is your objection?

Mr. Merry. It is merely a summary of something we can't possibly investigate the truth of 10
by cross examination. It is made up from a great many accumulations of figures that we don't know the truth of and have no means of finding out the truth of. It refers to property outside of the State of New Jersey and not connected in any way with the question before the commission. For instance, the property investment. Nobody knows what they mean by property investment. Nothing of this kind is explained. It is merely a summary which throws no light on this ques- 20
tion; it is not a pertinent matter in here.

Mr. Minard. The Erie Railroad Company operates outside the State of New Jersey. Its treasury covers the entire system; we are simply laying our cards on the table before the commission to show whether we should be bled for \$5,000,000 or \$6,000,000 for crossing elimination or could, whether it is physically impossible to do the thing. We have a right to show that. There is nothing in that statement that Mr. Mer- 30
rey cannot examine on cross examination. If he wants a trainload of statistics with the original data, it can be done.

Commissioner Douglas. It will be marked for identification.

Mr. Minard. This is part of our defense.

Commissioner Douglas. I understand. I think there are not sufficient facts to justify this being admitted.

Mr. Minard. Does the commission want all 40
the details that is made from?

A. L. Sorensen, direct.

Commissioner Donges. To submit this it is necessary to submit proof to support this summary if it is called for.

Q Mr. Sorensen, are these figures taken from the records of the company?

A They are.

Q Are they all accurate?

10 A To the best of my knowledge and belief they are.

Q What is the basis of the figures?

A The figures are based on the report made to the Interstate Commerce Commission, Public Service Commissions of the various States, or the general records of the company itself.

Q Then, in other words, they are figures based on public reports?

A Yes, sir.

20 Q Which are available in the files of the commission's office or reports made from time to time by the railroad?

A They are all taken from public reports.

Commissioner Donges. You have examined the records and testify this is a correct summary of the record books and accounts?

Witness. To the best of my knowledge and belief it is.

30 Q (*By Mr. Hecceg.*) Is this your work?

A This is my work.

Commissioner Donges. Did you make such examination and investigation as enables you to say this is accurate?

Witness. A man may make a mistake; that is why I say, to the best of my knowledge and belief it is accurate.

40 Q (*By Mr. Minard.*) Barring natural mistakes in addition or subtraction and based on the fact that

A. L. Sorensen, direct.

you are the chief statistician and have the responsibility for this work, can you or can you not say you rely on the accuracy of these statements?

A I rely on its accuracy.

Q (*By Mr. Mervyn.*) What do you know of the property investment of the Erie Railroad?

A The property investment is taken from the general ledger of the Erie Railroad Company. 10

Q You don't know what the property of the Erie Railroad Company is, other than the figures which you have set forth here?

A We have no physical valuation, no, sir.

Q You don't know what the net return on the valuation of the property is?

A I can only say, from the records of the company, the property according to the books, that is a statement of fact. From the physical valuation I can't answer; we never had one made. 20

Q From your knowledge, was the sum of \$364,000,000 ever invested in the Erie Railroad Company?

A The Erie Railroad is a re-organization. It is almost impossible to tell whether the re-organization, from the record, from the evidence, \$364,000,000 is absolutely correct.

Q It takes that amount assumed as a valuation?

A No, I wouldn't say that.

Q You don't know whether those figures were ever based on any actual valuation? 30

A It is based on the re-organization of the Erie Railroad from the New York, Lake Erie and Western, account of additions and betterment, and betterments made since.

Q (*By Mr. Minard.*) That represents the amount the Erie Railroad was legally obligated to pay for taxes or interest?

A The property back of it is property assessed for taxation purposes. 40

A. L. Sorensen, direct.

Q (*By Mr. Merrey.*) As I get your answer to Mr. Minard the three hundred and sixty-four million, some odd thousand dollars, was the amount the Erie Railroad was bound to pay in interest charges, is that true?

10 A I believe you misunderstood the question. I believe Mr. Minard's question was that the amount we were obliged to pay in taxes. My answer was the property back of it was the amount on which we paid taxes, the assessed valuation of the property back of it and earnings and stock.

Q Do you know whether the property of the company is assessed at any such sum of \$364,000,000 for taxation?

A I have no knowledge of the taxation value of the property.

20 Q Have you any knowledge as to what proportion represents stock?

A This is invested in the property.

Q Do you know which portion represents bonds and which stock?

A You mean which portion has been invested from receipts of sale of stocks and bonds?

Q Yes.

A No, I couldn't say that.

Q Some of it represents stock?

A Undoubtedly.

30 Q And some of it represents bonds?

A Some of it represents bonds, yes, sir, or received by capital invested.

Commissioner Donges. Does any of it represent property—what we term property—other than tangibles?

40 *Witness.* No, sir. Not to my knowledge, it does not. However, of course, there is the amount which we have in there, property investment for real estate which we get a real estate revenue from. I don't know whether that is pertinent to your question or not.

A. L. Sorensen, direct.

Commissioner Donges. What I want to know is whether this three hundred and sixty-four million odd thousand dollars is an estimate of the investment represented by the physical property, or whether it includes franchises or expenditures?

Witness. Intangibles?

Commissioner Donges. Yes.

10

Witness. No, sir, it only includes tangible property; not franchises.

Q (By Mr. Sommer.) Isn't it based in part, upon what was done in the re-organization?

A These figures are worked up from the re-organization. Of course, the valuation was placed on the road in re-organization and is included in this \$364,000,000.

Q This basing figure you take as cost of re-organization was represented by what; securities issued? 20

A Securities issued.

Q Can you say whether the securities measure the valuation of the tangible property taken in re-organization or whether it measures the actual property and allowance for intangible element; can you?

A All I can say, the re-organization—we acquired through re-organization tangible property for which we presumably paid and did not pay for tangibles we did not receive.

Q But after all you started with the re-organization and you take the sum then expended, don't you, whether it represents bonds issued or stock. 30

A The cost.

Q And then, I take it, you have added from time to time, as the items of cost, something representing tangible property acquired. In other words, there doesn't enter into this, since the re-organization, any intangibles. Is that what you mean?

A That is correct.

40

A. L. Sorensen, direct.

Q Doesn't this sum represent the outstanding capitalization of the company with the exception of that property not devoted to railroad purposes?

A The total capital obligation and capital investment. I don't believe we have any—they are assumed to have respect for one another and it doesn't necessarily mean they have respect for one another.

10 Q That isn't answering my question.

Commissioner Daniels. Put it this way; what your aggregate capital obligation is, excluding duplication.

Witness. What the capital obligation is?

Commissioner Daniels. This aggregate of \$453,000,000 is simply the summary of your property account?

Witness. Exactly, yes, sir.

20 *Commissioner Daniels.* And represents the aggregate of the property used in railroad operation?

Witness. According to our books.

Commissioner Daniels. Now then, as the return on that comprises the interest paid upon the bonds as well as what you figure your per cent. on property investment, would not that increase the percentage from 1.13% to something between three and four per cent.?

30 *Witness.* I beg pardon, I missed your question.

Commissioner Daniels. I will repeat. The rate earns enough to pay over \$10,800,000 in interest?

Witness. Yes, sir.

Commissioner Daniels. And in addition to paying interest and operating expenses there is here figured a net income of over \$5,000,000?

Witness. Yes, sir.

40 *Commissioner Daniels.* So that \$10,862,000 and \$5,112,000 are both net earnings from this

A. L. Sorensen, direct.

railroad property. You earn the interest to pay as well as what you have over the interest.

Witness. Here is the figure.

Commissioner Daniels. That would be \$15,000,000.

Witness. That is what we earn from operation.

Commissioner Daniels. From net operating income. 10

Witness. We have to pay the leased roads; we have to pay interest charges on the property; then we get down to the figure which leaves us \$5,000,000.

Commissioner Daniels. I understand your residue is \$5,000,000. My point is the net earning is \$15,000,000.

Witness. Operating income.

Commissioner Daniels. And the net property investment \$453,000,000. 20

Witness. Yes, sir.

Commissioner Daniels. There the per cent. would be between three and four per cent. upon the value of your property account.

Witness. To pay interest charges, lease of roads, dividends, permanent improvements, out of income.

Commissioner Daniels. Which are not calculated in that? 30

Witness. Yes.

Commissioner Daniels. If you pay the stipulated interest you have one and a fraction per cent.?

Witness. To improve your property and pay dividends.

Commissioner Daniels. Whatever you do with it. Isn't this fair: Both the interest you earn and pay as well as the residue left over, both jointly represent the earnings you derive from 40

A. L. Sorensen, direct.

your property; not the earnings to you, but the earnings to the security holders as a whole.

Witness. This amount is left to pay the other roads for lease of their roads, to pay security holders, and improvements on your property, which are not repairs, and such items as that.

10 *Mr. Merrey.* The board and we look at railroad property irrespective of who owns it; whereas the witness is looking at it as an individual corporation. He wants to disassociate it from the Erie Railroad.

Commissioner Daniels. Forget for the moment the bondholders as creditors. Regarding them as security holders of this system and shareholders, although they don't get any dividend, they are security holders.

20 *Mr. Minard.* We can't do that; it is physically impossible. We are legally bound to pay and haven't any money left to deal with the matter. When we are through we have one and a fraction left.

Mr. Merrey. We don't regard the security holders or stockholders. We are looking at the property as bondholders. It makes no difference where it hits or whom.

30 *Mr. Minard.* We are looking at it from the standpoint of the one who pays the bills. Not the one who is bleeding us.

Commissioner Daniels. The bondholder is the security holder technically and legally. I assume the bondholders and stockholders are both security holders, for the purpose of that classification (perhaps not legally), you show here earnings to pay three and four per cent. to the aggregate security holders.

40 *Mr. Minard.* This statement shows on the legal obligations paid we earn one and something per cent.

A. L. Sorensen, direct.

Commissioner Donges. In a part of your \$364,000,000, part is represented by securities outstanding on which you have paid interest.

Mr. Minard. Certainly.

Commissioner Donges. So if the amount of outstanding securities taken is \$364,000,000, which you say is the value of your property upon the different roads, it would show a greater rate of earning than 1.13%. 10

Mr. Minard. That may be, if there is anything left after deducting the bonds; I don't say there is.

Commissioner Donges. From this statement it clearly appears there would be.

Mr. Minard. Then this statement is right.

Commissioner Donges. After paying interest charges of \$10,000,000, which interest is paid upon securities included in your amount of \$453,000,000, it appears there is left sufficient to pay 1.13%. 20

Mr. Minard. That is what the statement is intended to show on its face.

Commissioner Donges. If you should add the amount paid as interest charges, \$10,810,000, to the five million odd thousand dollars, the net income, after paying all charges, you would have a greater return upon all the property than 1.13%.

Mr. Minard. Yes; that 1.13% represents the amount we have got left after we paid obligations, the amount we have got left to improve our property with. That is free capital for improvement and matters of betterment. 30

Commissioner Donges. In a sense the \$364,000,000 represents duplication of capitalization as between earnings and valuation. You have paid \$10,810,000 interest charges presumably upon your outstanding bonds.

Mr. Minard. Yes. 40

A. L. Sorensen, direct.

Commissioner Donges. You don't claim upon that amount you ought to be entitled to earn dividends, too?

Mr. Minard. No.

Commissioner Donges. What is the amount of those outstanding bonds upon which you paid ten millions of interest?

10 *Mr. Minard.* I have got it somewhere. There is the amount.

Commissioner Donges. Two hundred some odd millions. If you deduct two hundred some odd millions represented by the bonded indebtedness from the \$453,000,000, you have left two hundred and some million upon which five million of net income might be used to pay dividends, so the earning on the residue is more than 1.13%; do I make that clear?

20 *Mr. Minard.* I understand that point. That to my mind is just a purely technical distinction which the comptroller's department can't work out in practical figures.

Commissioner Donges. In ascertaining the earnings on four hundred and fifty-three million of property isn't it necessary then to add the amount which has been paid for interest charges?

Mr. Minard. Why no; that doesn't change this statement.

30 *Commissioner Donges.* To ascertain how much the \$453,000,000 of property has earned after paying all expenses?

Mr. Minard. This statement is intended to show on its face all that investment earns for improvement and betterments after we paid all these things. Of course, you can figure this out forty ways, maybe one thousand different ways, all of which are accurate conclusions. Now if you should say \$200,000 or \$2,000,000 allows us so much, we find from computing from the state-

A. L. Sorensen, direct.

ment of what the rest earn. We find the whole thing—you deduct what you want, one thing or another—the whole—amount on the property investment earned that much surplus—not surplus but in the treasury, being surplus over operation, for the maintaining of the road and improvements.

Commissioner Donges. But the \$453,000,000 10
has allowed a return in the interest paid.

Mr. Minard. If you take the amount you mentioned and then divide into this your \$5,000,000 you may increase the percentage; you don't increase the amount of money in the treasury for that purpose.

Commissioner Donges. The amount of free capital is greater, the percentage; the earning of free capital is greater; that is what I understand this statement was designed to show. 20

Mr. Minard. The summary intended to show what was done.

Commissioner Donges. It doesn't show the per cent. of free capital.

Mr. Minard. It can be shown; it is technical; no matter how you figure it out it don't increase the amount of money in the treasury you have to do the work.

Commissioner Donges. Can the witness tell us about the Bergen shortcut, whether it was charged to capital account or income? 30

Witness. The new open cut?

Commissioner Daniels. Yes.

Witness. That is not charged into the accounts of the Erie Railroad, except that the Erie Railroad Company advanced the money to build it.

Q (*By Mr. Minard.*) Is it included in here?

A It is.

A. L. Sorensen, direct.

Commissioner Daniels. So the cost of building that tunnel was put in as one of the operating expenses?

Witness. No; it is in this figure here (indicating).

Q Property investment?

A Yes.

10 *Commissioner Daniels.* How was it built; it wasn't built from sale of capital issued?

Witness. It was built by the Erie Railroad advancing the money to the company that organized to build it.

Commissioner Daniels. Penhorn Creek Railroad?

Witness. The Penhorn Creek Railroad.

Commissioner Daniels. That advances the figure in there (indicating)?

20 *Witness.* Nothing in there. Nothing in there as far as the Penhorn Creek is concerned, in the operating expenses. It is in the property investment account.

Q (*By Mr. Sommer.*) Before it went into property investment from what source was it taken; before it was taken from property investment the money must have been taken from some source.

A The Erie Railroad advanced the Penhorn Creek Railroad to build the road.

30 Q They got it from somewhere. As a matter of fact the account where it was taken was income?

A The money was taken from its treasury. I presume it was earned.

Q Wasn't it taken from the current income of the Erie?

A I couldn't answer that without knowing just exactly the amounts that had been advanced and trace them back. I have never done it. All I can say is the Erie Railroad advanced the money.

40 Q Did you attend in the preparation of the petition to the Board of Public Utility Commissioners,

A. L. Sorensen, direct.

which petition requested the approval by the board of certain proposed issues of securities to be made by the Penhorn Creek Railroad to the Erie Railroad?

A No, sir, I did not.

Q That wouldn't come through your department?

A Yes, sir, it would.

Q And if appended to that application was a statement that the money advanced was taken by earnings 10
from time to time out of current income, you wouldn't assume responsibility for that statement?

A That statement was not prepared by me personally.

Q It was prepared by your department?

A I assume it was. Naturally, it being an accounting question, I assume it was prepared in our department.

Q Do you know anything about it?

A I know nothing about it. 20

Q You know the Erie has outstanding, as from time to time approved by the board, car trust certificates?

A Yes, sir.

Q How do you handle payment on car trust certificates?

A The payments are made in accordance with the trust agreement every six months and paid out of current funds.

Q In accordance with the maturity date for that 30
note?

A Yes, sir.

Q At maturity how is it met; out of what funds?

A Out of the current funds of the company.

Q And then carried into what account?

A When first set up on the books the certificates are charged to the person to whom the sale is credited, the obligation account, funded debt. Finally they are charged, when the trust is cleaned up, to the individual itself, and transferred to capital account. 40

A. L. Sorensen, direct.

Q So it is included in investment?

A In investment, yes, sir.

Q The moneys means of by which payments are made are moneys coming from current income?

A The payments on car trust certificates after maturity are paid from current funds.

10 Q Do you include the payments that you make under car trust certificates in your operating expenses?

A No, sir.

Q Do you include them in any of the items shown on this sheet?

A No, sir.

Commissioner Douglas. Anything further?

20 The statement will be admitted as the summary of what this witness would testify to, or his statement of what the books and records of the company show and subject to the production by the company of any books or records for examination on cross examination.

Mr. Mizard. That is agreeable.

(Same is marked Exhibit B-1.)

30 Q (*By Mr. Mizard.*) Mr. Sorensen, I show you a statement entitled "Eric Railroad System, capital expenditures made July 1, 1910, to June 30, 1913, for betterment of conditions and safety as follows." Was that statement made up by you?

A It was made up under my supervision, yes, sir.

Q Are you familiar with the figures set forth there?

A Yes, sir.

Q Have you reason to believe they are accurate?

A I have.

Q What does that statement show?

A The statement shows, for the year ending June 30, 1911, the total expenditures were—

40 Q Explain the statement, the three columns there; the first of the three columns, beginning in the center

A. L. Swenson, direct.

of the statement, represents the expenditures as above mentioned, June 30, 1911, and the next column for the same period, 1912, and the third column for 1913?

A Yes, sir.

Q And the fourth column represents the total of the three, on each item?

A Yes.

Q The statement covers what?

10

A Necessary expenditures for equipment.

Q That means new equipment?

A Yes, sir.

Q Construction?

A That is new construction.

Q On right of way?

A Yes, sir.

Q The next item is the total of construction and equipment?

A Yes, sir.

20

Q The next line is what?

A It shows included in the above totals there are certain amounts for eliminating grade crossings mentioned, station facilities, automatic signals, interlocking appliances, increased weight of rail, bridges, trestles and culverts; replacing wooden passenger equipment with steel—

Q Wooden passenger equipment with steel?

A There is nothing there.

Q You don't mean to tell—don't you mean the statement doesn't show anything?

30

A Yes.

Mr. Minard. I have another statement which will show that.

Q The next item?

A Applying steel underframe to postal cars.

Q There was expenditure there?

A Yes.

Q Is or not that expenditure required by federal statutes?

40

A. L. Kurensen, direct.

A It is required by federal statutes.

Q The next one?

A Safety appliances to equipment.

Q That is the Federal Law?

A Yes.

Q The next one?

A Ash pans.

10 Q That is required by law?

A The Legislature.

Q The headlight isn't there?

A No, sir, applications under boiler inspection law, another legislative enactment.

Q They are legislative requirements. Do you know whether that boiler inspection law is more of a continuous permanent change?

A Yes, sir, I understand it will be.

Q That is permanent, annual charge?

20 A Yes.

Mr. Minard. I offer that statement in evidence.

Commissioner Dungen. Is there any objection?

Mr. Merrig. I make practically the same objection. I suppose it will be received.

Mr. Minard. This is actual expenditures.

Commissioner Dungen. This will be received and marked as an exhibit subject to the right to call for the books, documents, papers and witnesses to support and verify it, and for examination.
30

Mr. Merrig. Can I cross examine on this statement?

Commissioner Dungen. If there is no objection it will be marked now, have it marked as an exhibit now.

(Same is marked Exhibit B 2.)

A. L. NORRIS, cross.

Cross examination by Mr. Merrey.

Q Do you know where the money was obtained by the company for these expenditures for equipment and construction?

A Some were paid out of income and the rest capitalized.

Q Do you know how much was paid out of income and how much out of capital? 10

A I couldn't say off-hand, no, sir.

Q That obtained out of capital was from the sale of securities?

A Yes.

Q Not by the issue of new capital stock?

A No, sir. Well, I assume when you say securities you mean capital stock and bonded debt?

Q Not in the sense that amounts to bonds?

A There has been no stock issued on the Erie Railroad. 20

Q Whatever come from capital account was from the sale of bonds?

A The sale of funded debt, yes, sir.

Q You have items for the eliminating of grade crossings?

A Yes, sir.

Q How much of that was done in New Jersey?

A I couldn't say.

Q Was any done in New Jersey?

A I couldn't say. 30

Q Was not most of it done in States which have laws compelling the removal of grade crossings?

A From my knowledge of it I believe that possibly the greater portion of it was in the State of New York.

Q You have an item for increased weight of rail?

A Yes, sir.

Q I think, in answer to Mr. Minard, you said these changes were for greater safety?

A Sir? 40

A. L. Sorensen, direct.

Q Would you say the expenditures for increased weight of rail is an expenditure to insure greater safety and in order to use heavier or greater equipment?

A For the betterment of conditions or safety.

Q Isn't it principally to allow you to use heavier equipment?

10 A It is really an operating matter, but I believe a great deal of the heavy rail is also for safety purposes.

Q That is in the view it would be unsafe to use the old steel rail with the new kind of equipment?

A And the heavier traffic.

Mr. Minard. In other words, we wouldn't comply with the Federal Steel Postal Car law and still have light rails. It wouldn't be safe to do that.

20 *Witness.* No, sir.

Q (*By Mr. Minard.*) You say you believe most of the money was spent for the elimination of grade crossings in New York State. Do you know anything about how much?

A No, I say that—

Q Do you know the New York State law requires us to pay only 50% of the cost of elimination. Do you know that?

30 A I understand so.

Mr. Minard. We will offer that a little later.

Q I show you now a statement entitled, "Erie Railroad Company (including Chicago & Erie Railroad) Station Improvements as ordered by Commissions to October 31, 1913."

Commissioner Donges. From what date?

Q Do you know from what date that is?

A No, I couldn't say.

A. L. Sorensen, direct.

Q Well, it shows certain improvements ordered by Commissions, anyway?

A Yes, sir.

Q What is the top line, explain it?

A The top lines shows the amount that has been authorized as expenditures.

Q Under order requiring improvements?

A Yes, sir.

10

Q And the amount authorized and the amount expended?

A Expended.

Q Does that mean that the actual expenses either did not amount to or exceeded, perhaps, the cost of the estimate of the amount authorized?

A Exactly, yes, sir.

Q Over to the end there is a provision here for the amount to be expended. In other words, the amount expended plus the amount to be expended may in some cases represent the authorized amount?

20

A Yes, sir.

Q Under each one of these headings of the amount authorized, amount expended, and amount to be expended, are sub-columns, called improvements; what does that mean?

A That amount charged to improvements in capital account.

Q Under the expense amount that is the cost charged to expense?

30

A No, of replacing in kind.

Q Just explain to the commission what that means. For instance, wherever there is an improvement that has to be done either on a large scale or with different material, I understand an estimate is made of the cost of replacing in kind that amount is charged to expenses and different improvements?

A Charged to capital account.

Q The columns marked individuals and companies; what does that mean?

40

A. L. Sorensen, direct.

A The amount charged to individuals and companies, where somebody had a portion of the station or interest paying property, on account of abutting property.

Q On joint agreement using the station?

A Yes.

10 Q That includes the necessity of changing the sidings to meet the improved conditions?

A Yes, abutting property owners.

Mr. Merrey. I object to all this testimony. I can't for the life of me see why an expenditure made in Painted Post, New York, is pertinent before this commission, is pertinent in the elimination of these grade crossings.

Commissioner Donges. The commission will take it for whatever it is worth.

20 Q I ask you what appears to be letters and numbers are?

A Appropriation numbers.

Q The numbers in your record?

A Yes, sir.

Q I see an asterisk in some places in regard to these figures?

A The note to which that refers is on the left-hand side.

Q It means over-expended?

30 A Yes, sir. In other words, the cost exceeded the anticipated amount?

Mr. Minard. I offer this in evidence.

Commissioner Donges. It will be received and marked as an exhibit, subject to the right to call for further proof.

(Same is marked Exhibit R-3.)

A. L. Sorensen, cross—re-direct.

Cross examination by Mr. Sommer.

Q This allotment as between improvements and expenses is made by whom? Is it made in your department?

A As between improvements and expenses?

Q Yes.

A It is passed upon by the Board of Directors.

Q And the figures simply come to you? 10

A On our appropriation; come to us, yes.

Re-direct examination by Mr. Minard.

Q You have a statement before you, Mr. Sorensen, entitled "Erie Railroad Company; statement showing extra expense on account of the 'Full Crew Law' in the State of New York and New Jersey for the month of September, 1913." Subdivided under division, freight travel, passenger travel, and total. Where were those figures obtained? 20

A Those figures were obtained from the time slips of the various divisions.

Q By your traveling auditor?

A Yes.

Q On the ground?

A Yes.

Q From actual examination of pay rolls and time slips?

A Actual examination.

Q They show a total for the month of September in New York and New Jersey alone, of what? 30

A \$17,905.79.

Q At the bottom you have what is entitled, "Statement showing approximate annual expense account of 'Full Crew' laws in States of New Jersey and New York, based on expenses for the month of September, 1913."

A That statement shows the total expense on the basis of the month of September, 1913, of \$214,869.48 per annum for "Full Crew" laws. 40

A. L. Sorensen, re-direct.

Q I understand that is taking the figures above as an average figure and multiplying by twelve?

A Yes, sir.

Q What do you say as to September, 1913, being an average?

A Being a thirty-day month, it is a minimum. This figure is an annual figure, minimum figure.

10 Q It will be increased in every month with thirty-one days?

A Yes, sir.

Q And decreased only in February?

A Only in February.

Mr. Minard. I offer that in evidence.

Mr. Merrey. I object as not pertinent.

Commissioner Donges. It will be received and marked as an exhibit, subject to the right to call for the presentation of further proof.

20 *Commissioner Daniels.* Do you have in your statistical department any method of determining the cost per ton mile moved per month?

Witness. Yes.

Commissioner Daniels. How does that compare at present with years ago?

Witness. I can't say off-hand.

Mr. Merrey. Speak louder.

30 *Witness.* I couldn't answer that off-hand as I haven't looked at the figures comparing one year with another for some little time back.

Commissioner Daniels. You are not prepared to say whether the cost per ton mile is now greater than years ago?

Witness. In my understanding from some figures I have looked up from other matters it was greater in 1913 than it was in 1912; due to increased expenses and increased cost of material.

40 *Commissioner Daniels.* From your recollection of these figures, do you remember about what percentage greater it was?

A. L. Sorensen, cross—re-direct.

Witness. No, sir.

Commissioner Donges. That will be marked as an exhibit, subject to the same right of verification, production of books and records, and so forth.

(Same is marked Exhibit R-4.)

Cross examination by Mr. Merrey.

Q Have you made any allowance for anything saved in accident claims under the operation of the "Full Crew" law?

10

Mr. Minard. Of course he hasn't. It is a perfectly foolish question.

Commissioner Donges. Let the witness answer if he knows.

Q Have you made any such allowance?

A No, sir.

20

Mr. Minard. I can say for the commission's information in the ten days of the hearing on the subject in Pennsylvania and seven days in New Jersey before this commission—perhaps not the same personnel—when the proponents of this bill were not able to show a single case of accidents to have ever happened because a train was insufficiently manned.

Mr. Merrey. You might add to that statement that Mr. Hobart was a defendant in a case in which that claim was made and we got a verdict from a jury.

30

Re-direct examination by Mr. Minard.

Q You have a statement there, "Erie Railroad, cost for compliance with full train crew laws."

Commissioner Donges. Including the C. & E.?

Mr. Minard. They have a habit of charging the C. & E. that is a road from Marion, Ohio, to

40

A. L. Sorensen, re-direct.

Chicago, it hasn't a separate identity, but we have a general manager for lines east and a general manager for lines west.

Q I notice this statement covers Indiana, Ohio, Pennsylvania, New Jersey and New York "Full Crew" laws; can you say how this statement was made?

10 A This statement was prepared in the office of the vice-president and general manager by reports from the division superintendents, which were taken from their time records.

Q And it covers the disbursements under "Full Crew" laws in these several States to date; from the date the law was effective until the date shown in the statement?

A Yes, sir.

20 Q Those totals show Indiana, \$57,272.49; Ohio, \$22,841.64; Pennsylvania, \$157,731.27; New Jersey, \$14,355.60; New York, \$28,848.68; total to October; that includes October, doesn't it?

A Yes.

Q Up to the first of November. It includes expenditures of \$281,049.68 for "Full Crew" laws?

A Yes.

Mr. Minard. I offer that in evidence.

30 *Commissioner Donges.* It will be received and marked as an exhibit, subject to the same rights as the others.

(Same is marked Exhibit R-5.)

Q I show you a statement, "Erie Railroad System, Principal Capital Expenditures made in the State of New Jersey for years ending June 30, 1911, 1912 and 1913." How was that statement prepared?

A That statement was prepared from actual expenditures made according to the record in New Jersey.

40 Q And followed out in New Jersey?

A Only the principal items.

A. L. SOMMER, F.C.T.D.R.

Q That gives a list of the purpose of the investment?

A Yes, sir.

Q And shows an aggregate for three years of \$5,919,461; is that right?

A Yes, sir.

Mr. Minard. I offer that in evidence.

Commissioner Donges. It will be admitted and marked as an exhibit, subject to the same understanding as the others. 10

(Same is marked Exhibit R-6.)

Re-cross examination by Mr. Sommer.

Q This is simply prepared with a view to the place to which the improvement was made, is it not?

A Yes, sir.

Q It wasn't your purpose to indicate by this statement that these expenditures were made solely for the purpose of facilitating business within the State of New Jersey? 20

A No, sir.

Q This item, "Open Cut, Expenditures to June 30, 1913," \$4,269,300.62; what does that represent?

A It represents the cost of open cut to June 30, 1913.

Q Does it not represent in greater part the loan by the Erie Railroad Company to the Penhorn Creek Railroad? 30

A It does.

Q So the improvement was not an improvement made by the Erie Railroad, but made by the Penhorn Creek Railroad?

A The Penhorn Creek Railroad is a separately organized company, yes.

Q (*By Mr. Minard.*) It is there until we get it back?

A Yes.

Q It is our money? 40

A. L. Sorensen, re-direct.

A It is our money.

Mr. Sommer. It is a loan.

Q I show you another statement, Mr. Sorensen; this statement is entitled, "Erie Railroad Company, Accounting Department, Statement of Additions and Betterments authorized to October 31, 1913, and Expended Balances to September 30, 1913."

10 *Commissioner Donges.* Does this cover the history of the company?

Mr. Minard. No.

Q It simply refers to those improvements which were authorized and uncompleted and are now in the course of completion?

A That is my understanding of it.

Q Is this a regular report?

A Yes, this is a regular report.

Q Made how often?

20 A Each month.

Q This is taken from the last monthly report?

A Yes, sir.

Q That shows the divisions on which the improvement is made, the amount authorized, whether these amounts are charged to additions or betterments or expenses or individuals and companies; is that right?

A Yes, sir.

30 Q And also shows unexpended balances, which means that the work progressed to the point where only part is paid and the balance will be paid when further work is done?

A Yes.

Q In unexpended balances we have sub-divisions, additions and betterments—the same classification as under the first portion?

A Yes, sir.

Q The last column indicates what?

40 A That indicates where the appropriations have exceeded the authorization, that amount is set forth in the last column.

A. L. Sorensen, re-direct.

Mr. Minard. I offer that statement.

Commissioner Donges. What period does this statement cover, Mr. Sorensen?

Witness. This statement covers the additions and betterments authorized to October 31, which have not yet been completed.

Commissioner Donges. But covers what period of time?

Commissioner Daniels. Beginning when the company was reorganized?

10

Witness. No, sir. Well—some of them may be authorized three and four years ago, I can't say that. I would have to get each authority to find the authorization of that. That has not been done.

Commissioner Donges. The statement covers then a period of years?

Witness. Undoubtedly, yes.

20

Commissioner Donges. How many years you are unable to say?

Witness. No, sir. I doubt if it would go over two years, two or three years, for the fact that our authority, when authorization is made it is generally completed as promptly as possible.

Commissioner Donges. That will be received and marked as an exhibit, subject to the same understanding.

(Same is marked Exhibit R-7.)

30

Mr. Minard. Here I have a detailed report that is simply the detail of the last paper. I didn't want to lumber up the record with that. In this statement there is a column with the date authorized. This is the detailed statement of which that summary was worked up; you can see from that the oldest authorization.

Commissioner Donges. Of any of the items that appear on the exhibit last offered?

Mr. Minard. Yes; I don't suppose you want the month?

40

A. L. Suranen, re-direct.

Commissioner Donges. Let him give the date.

Witness. The oldest one I find here is March 1, 1911. However, that is for re-enforcing sixty postal, mail and compartment cars, which is being carried over a period of time. Possibly that would not be a good example of what you require. I have found one in here, June, 1911.

10 Q (*By Mr. Minard.*) What is the oldest date?

A March 1, 1911.

Commissioner Donges. On Exhibit R-7 all the amounts authorized expenditures are since that date of March 1, 1911?

Witness. Represent appropriations authorized since March 1, 1911, yes, sir.

Commissioner Daniels. What are the general items there that seem to bulk so large?

20 *Witness.* They represent almost entirely equipment expenditures, amount authorized in equipment expenditures, which includes \$1,000,000 for equipment of box cars with economy draft arms and friction draft gears and equipping all locomotives and cars with safety devices.

Q (*By Mr. Minard.*) That is required by law?

A And this item of \$324,000, equipping 100 coaches and combined cars with electric lights and ninety of the same with steel underframes.

30 *Mr. Minard.* We offer that in evidence so the commission may have it in detail.

Commissioner Donges. Very well.

Mr. Minard. Unfortunately the commission will have to distinguish that from the New York, Susquehanna & Western, and the New Jersey & New York, which are separately operated; we excluded that from the summary because it was not pertinent to this case. If the commission will take that into consideration—

40 *Commissioner Donges.* Very well.

J. L. Sorenson, re-direct.

Mr. Minard. I offer the part in reference to what this railroad owns.

(Name is marked Exhibit R-8.)

Re-direct examination by Mr. Minard.

Q I show you a paper, Mr. Sorensen, marked, "Erie Railroad Company, All lines, month of October," a statement; what does that represent?

A That statement represents first, for the month of October, gross revenue, operating expenses and taxes, and operating income for 1913 as compared with 1912, showing the increase and decrease. 10

Q On the gross revenue for the month of October as compared with the same month last year, what was the result?

A A decrease in gross revenue of \$47,460.56; in operating expenses and taxes there is an increase of \$387,663.62.

Q Showing an operating decrease of what? 20

A \$435,124.18.

Q What does the statement further show?

A It further shows that included in the expenses is one-twelfth of the entire taxes of the year, also one-twelfth of the annual depreciation of equipment.

Q The last statement?

A Shows that for four months, ending October 31, 1913, as compared with 1912, gross revenue had increased \$36,875.44. Operating expenses and taxes had increased \$1,461,921.22; a decrease in operating income of \$1,424,145.78. 30

Q That refers to the first four months of the current fiscal year?

A The year ending 1914.

Q Is that an official statement?

A An official statement that is sent out for publication in the newspapers and to the directors.

Q A similar statement is made every month?

A Each month.

Mr. Minard. I offer this in evidence. 40

A. L. BURNHAM, re-cross.

Commissioner Dongen. It will be admitted with the same understanding as to verification.

(Same is marked Exhibit B-9.)

Re-cross examination by Mr. Merrey.

Q I think there ought to be given by the witness what he means or what the company means by operating expenses and taxes; whether it is cutting a road
10 through a hill.

Mr. Minard. That has nothing to do with operating expenses; that is property investment.

Q What do you charge under the head of operating expenses?

A What particular things; we have five general heads.

Q What are they?

A Maintenance of way and structures; maintenance of equipment, traffic expenses, transportation
20 expenses, and general expenses.

Q Are any betterments put in that item of operating?

A No, sir; they go to capital account. Cost of replacing something in kind goes to operating expenses.

Q I suppose you put down every rail, do you, and charge the proportion of that to operating expenses?

A Yes, sir.

Q What proportion?

A The proportion of replacing; taking out the
30 rail in kind. In other words, if we put in a ninety pound rail and took out a sixty pound, the thirty pound would go to capital account.

Q No betterments of any kind are in this charge?

A No, sir.

Commissioner Dongen. Additions to equipment?

Witness. No, sir. All the additions to the
40 equipment go to capital account under the commission's order.

A. L. Sorenson, re-cross.

Q All new equipment is charged to capital account?

A Capital account.

Q What becomes of the old equipment?

A When destroyed it is credited to capital account, the cost of the wrecking value.

Q (*By Mr. Minard.*) Do you know, Mr. Sorenson, whether that decrease in income, what the chief items? Does it or does it not include the increase in wages and expenditures made necessary by increasing the number of men and other features?

10

A In 1910 they do include them. Those expenditures in the year 1912, we have not got them all in.

Q This increased operating expenses required by law, in the "Full Crew" law and higher wages in arbitration, would explain very largely, if not quite entirely, the increase?

A It does to increase the cost, and fuel and ties are elements in the last increase.

20

Q I show you a paper marked "Erie Railroad System; Statement showing increase in operating cost, due to increased price of fuel and ties, 1913 over 1910"; did you make that comparison of 1913 over 1910?

A Yes.

Q Just explain what it shows, just the increase?

A It shows, due to increase in cost of price of fuel, the increase was \$473,597.00 in 1913 as compared with 1910, and ties, \$71,991.00.

30

Q The total of those two items alone in 1913 cost \$545,588 more than in 1910?

A Yes, sir.

Commissioner Dongen. In operating the same number of trains?

Witness. This has nothing to do with the increase in cars.

Commissioner Dongen. The same amount of material?

40

Francis M. Graff, direct.

Witness. Yes, sir, supplied in 1913 or 1910; material used. The bulk of the material is the same.

Mr. Minard. I offer that statement in evidence.

Commissioner Donges. It will be admitted, subject to future verification if required.

10 (Same is marked Exhibit R-10.)

Recess from one to two o'clock P. M.

AFTER RECESS.

FRANCIS M. GRAFF, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q What is your occupation?

A Special agent, mechanical department, Erie
20 Railroad.

Q What are your functions in that capacity?

A Well, diversified. I am particularly interested in the rolling stock of the railroad.

Q Is or is not your position in the nature of assistant to the general mechanical superintendent?

A Yes, sir, it is.

Q You have heard the testimony this morning on the amount of expenditures to date or up to the dates mentioned in the statements for equipment and facilities of that sort. Did you prepare a statement of
30 the estimated cost of additions to equipment to comply with certain laws and build equipment to certain standard required by law?

A I did. That is the statement (handing counsel paper).

Q That statement is entitled what?

A Statement showing approximate increase in mechanical department expenses, due to various laws, both State and Federal which effect railroad operation
40 tion to an extensive degree. Also items of an un-

Francis M. Graff, direct.

usual nature which have been undertaken voluntarily to conform to the best operating practice.

Q There are two columns, one appropriate total expense—

A Approximate.

Q This copy is a little dull. Another column approximate amount yet to be expended?

A Yes.

10

Q On those items in this statement for which you have no figures in the approximate amount yet to be expended; what does that mean, the entire amount expended or no part of that item?

A No part. For instance several items there are problematical, there is further work on them.

Q In all cases it means you were going to spend the money on them?

A Yes, sir.

Q How are these items made up, from records in your possession?

20

A Partly from records; some of them are taken from the regular reports of the company, and in several instances we simply estimate.

Q How long have you been in the mechanical department?

A About twenty years.

Q For twenty years you have been handling this kind of business?

A Not all. Of course, my duties have changed. The last eight or nine years, anyway.

30

Q As far as any of these items are estimates, they are based on your experience in the department?

A Yes, sir. Take these first items, replacing of wooden passenger cars. That was worked out in collaboration with the engineer.

Q Made from the actual number of wooden cars in use?

A Yes, and what we know the cost of all steel cars. We figured the cost about \$14,000 apiece.

40

Francis M. Graff, direct.

Q That figure is based either on estimate or price list, is it?

A Yes. The items of seven postal cars, we have got tenders on the seven cars of \$103,000.

Q What do you mean by tenders?

A From the manufacturers.

Q That is, the manufacturers' price?

A Yes.

10

Q There are items here which will show for themselves, especially where there is a figure shown in the column "Approximate Amount yet to be Expended," where there are expended portions of these amounts under the first column, if they were made up at the time the statement we previously offered, they might be included. This might include some of the figures already in evidence?

20

A Yes, they do. For instance, that item right there (indicating); that appears on that statement "additions and betterments."

Q \$1,177,000?

A Yes.

Q The object of this statement is not only to show new information but also to separate all expenses relating to the mechanical department?

A That is the idea.

Q Taking these items; the first item is what?

30

A Replacing all wooden passenger train cars with steel cars. There are several bills now pending in Congress, and the late unpleasantness in the East I guess will bring it about all right.

Q I show you bills which appear on their face to be Congressional bills offered in the first session of the sixty-third Congress.

Mr. Merrey. I object to all this. I can't see it is at all pertinent to this hearing, pending legislation.

40

Commissioner Donges. I can't see the materiality.

Francis M. Graff, direct.

Mr. Minard. I don't think there is any doubt in the minds of the members of this commission with the present temper of Congress and all this sensational newspaper talk about legislative regulations and things like that, where they allege steel cars would save life—whether they would or not is a question—we will almost surely, personally I haven't any doubt but what Congress will put through a steel car law. 10

Commissioner Donges. We must deal with the situation as it now exists.

Mr. Minard. If it hasn't and does next week, where are we at?

Commissioner Donges. If such legislation is enacted and proof of it before this commission in the matter would be material, before there would be a determination of the case you would have a right to come in and ask the commission to put in the facts that have arisen since the closing of your testimony which are material. 20

Mr. Minard. That would do very well, but we operate in six States—of course, there is no Legislature now in session in the six States—in Congress hardly a day passes except there is some legislation detrimental to the railroad's affairs. I am not offering this as evidence of intrinsic value. The statement can go in the record that we know it is not a law, but it is one of the things we are confronted with. 30

Commissioner Donges. The feeling of the board is we have allowed you wide latitude in presenting your case; not limiting you to anything that seems necessary in presenting anything material and helpful to the board. As to this the board is of the opinion it ought not to be permitted.

Mr. Minard. Then I will confine my examination of Mr. Graff to those laws which, in fact, are 40

Francis M. Graff, direct.

passed and which are laws. If I get into anything—

Mr. Merrey. My objection goes to all that.

Commissioner Donges. You may make your objections as the proof is offered and then let us deal with it as the tender is made.

Q What is the next item?

10

Commissioner Daniels. Suppose you did prove that large expenditures had been made and large expenditures were likely to be made, just where do you proceed from that to show that it is financially and physically impossible to spend the amount that might be required on the elimination of grade crossings?

20

Mr. Minard. I might say that the tendency of legislation in this day of popular politics had fallen to a point where there is no economic rule covering enactment. It is just a case of *quid pro quo*, one man votes for a bill perhaps for the support of some bill he is interested in. The time is coming soon when this commission will have to take into consideration the physical impossibility of complying with the law which is not *malum in se*, and those which are *malum prohibitum*. Someone somewhere has got to draw the line between things we do not do or things we do which are wrong in themselves and things we do or do not do which are not wrong in themselves but from politics or other things, are prohibited. We hope some commission in this land of ours will protect us in doing the things we ought to do in justice and the things we are required to do in injustice to placate some special class of people or some special person.

30

40

Commissioner Donges. Is it your thought that unjust imposition of legislative bodies in other States or the National Congress ought to tie the hands of this board in doing for the citizens of

Francis M. Graff, direct.

New Jersey what the Legislature put upon this board as a duty to protect the lives of the citizens of New Jersey.

Mr. Minard. No, I won't go that far. We stand before the bar of justice just as much in one State as the other, and if a State requires us to do something which ties our hands behind our backs and the law of another State says you must shake hands with me, and my hands are tied behind my back by another State, how is it physically possible for me to comply with your laws, or another State?

10

Mr. Merrey. The whole thing is this. I think if all the States of the Union would wake up, and instead of being imposed upon, start imposing on these railroads a little, that is a matter that ought to be presented to the Interstate Commerce Commission and ask them to allow a change in rates which will give them an adequate return. No matter what they are required to do, if they do it, then the logical thing is to go to the commission in charge of the rate fixing and say, here, we are compelled to do these things, let us have an adequate return on them. They are really proving here what ought to go in a rate-making case. It is a question whether the grade crossing elimination should be done considering life and safety and all that, not what it is going to cost. If the State wants this thing to be done, and it ought to be done, the question of cost shouldn't concern this commission; that is for another commission. If the public wants this, the public will have to pay for it in the end. The necessity of increasing the rate and on the fact of expenditures made, and that will have to be made in the future, is for a rate-making case. It isn't of concern in a grade crossing case. That is why I made the objection.

20

30

40

Francis M. Graff, direct.

10 *Mr. Minard.* If the commission has nothing to do with the question of cost, where in the name of heaven do we get off, if we comply with everything and do not defend ourselves from that which some municipality or some individual asks us to do. I assume the board would want to know the cost of everything we do; sometimes it is a defense; the only defense. We are now, under the laws of this land, taken from our right to the courts, which we formerly had, and placed before a commission to decide these things, whom Mr. Merrey says had nothing to do with the cost. If that is true, we haven't any justice anywhere. I don't think that is true. I think this commission will consider the cost. If that argument were good then we haven't any rights anywhere. The commission makes an order which ties our hands and then the public goes through our pockets. On the present increase in rates we respectfully invite the commission to participate in the action for the increased rates; if we can get the rate to spend the money we would just as leave spend the money.

20 *Commissioner Donges.* Your difficulty is not in the financial increased expenditures?

Mr. Minard. It is now.

30 *Commissioner Donges.* Your answer is the rate don't warrant it.

Mr. Minard. Rates are the only medium we have of getting money. If we get increase in rates enough to do it.

Mr. Gourley. I suppose the Interstate Commerce Commission fixes the rates for the country.

40 *Mr. Minard.* If this commission participated in the matter as the Interstate Commerce Commission, with a uniform rule, we wouldn't object to that. New Jersey is the only State we pay all the cost. In New York we pay 50%. The

Francis M. Graff, direct.

law compels us to do things now that take money and prevent us from getting an increase in rates unless we go to another body. The Legislature increases the disbursements—the power of increasing the cost of operation and the power of creating revenue is not in the same body. It ought to be in the same body so that they can handle both things. The board increases our expenses and has absolutely no responsibility with the question of increasing the revenue. It is an economic injustice, though of course, it ought not to be fatal here. It is the explanation why these things should go in. 10

Mr. Hobart has made a suggestion which I will submit to the commission; that is, if we put in the estimate of steel cars and put the bills in subject to be disregarded if not passed or if one is not passed, then the commission can strike it out. Mr. Graff is mayor of Midvale. I can't bring him here every time for the purposes of this case. 20

Commissioner Donges. I think the commission will adhere to the ruling.

Q The second item is what? This is a law on the books?

A Yes.

Q What is that?

A Applying steel underframes to postal cars and re-enforcing the ends. 30

Mr. Minard. In that connection I offer Public Act 336, which was introduced as H. R. 21279, pages 7 to 10, which embraces the requirements covered by this estimate.

Commissioner Donges. This is a copy of the law enacted?

Mr. Minard. Yes, this is a copy as stated in the back, by the proper authorities. It is a copy 40

Francis M. Graff, direct.

by the government printing office of the act as passed.

Commissioner Donges. Is there any objection?

Mr. Herryg. A copy of the law introduced?

Mr. Minard. Passed.

Mr. Herryg. I suppose the commission knows the law.

10 *Commissioner Donges.* It will be admitted.
(Same is marked Exhibit R-11.)

Q This statement shows the expenses of that as—

A \$15,310.

Q How much is yet to be expended?

A \$9,000.

Q The next item?

A Eventual retirement of all wooden or composite postal cars by purchase of seven steel cars which are now under construction.

20 Q Why do you separate the second from the third item on this list?

A It is just that much more expense. This work here of strengthening those cars and applying steel underframes is necessary right now.

Q In other words, the act requires this improvement be made gradually?

A Yes.

30 Q The second item is the part required for the immediate necessity of the law and the third item the eventual complete equipment to conform?

A Yes, meet the ultimate requirements of the statute.

Q That will cost—

A \$103,180.

Commissioner Donges. Within what time is that required?

Q The act says 25% per year?

A Yes, but we are paying the whole business right out.

Francis M. Graff, direct.

Q Doing it sooner?

A Yes.

Q That is the figure given by the manufacturer?

A Yes, that is the authorized appropriation; we have bids on the work.

Q The next item?

A Equipping all cars and locomotives with safety appliances, as required by the act of April 14, 1910, and the order of the Interstate Commerce Commission made pursuant of the act. 10

Q Those acts are enforced and orders of the Interstate Commerce Commission enforced? This item is included in one of the other statements, is it?

A Yes, additions and betterments.

Q The whole amount?

A The whole amount.

Q The next item?

Commissioner Donges. Do I understand you have expended this item \$1,777,175, or but \$225,000? 20

Witness. No, that is a mistake. It is \$225,000 has been expended approximately.

Commissioner Donges. These entries should be reversed?

Witness. Yes. I didn't notice that heading.

Q You mean by that, under the column "Approximate amount yet to be expended," that is a mistake and should be— 30

A This item of \$9,000 is all right. This is wrong here (indicating).

Q \$225,000 for locomotives; that is the amount expended and the balance is yet to be expended?

A Yes.

Q The next item?

A Approximate annual—

Francis M. Graff, direct.

Commissioner Douglas. What is the time to do the work?

Witness. The work must all be cleaned up by the first of July, 1916. The Interstate Commerce Commission modified the order and gave us five years.

10 *Commissioner Douglas.* Is there any percentage to be done in any year?

Witness. No.

Commissioner Douglas. This gives you five years in which to complete?

Witness. From the first day of July 1, 1911, five years.

Q The next item?

A Approximate annual cost of inspecting boilers, due to State and Federal laws.

20 Q That is included in one other statement, is it not?

A I don't recall.

Q I think it is. That is a continuing expense; that much annually?

A Yes; about \$6,800 more than we would expend if it wasn't for the laws. The company always made boiler inspection. Taking into consideration the stationery—we have got to file copies of those reports—the States have been fairly lenient about it, New Jersey and Pennsylvania and Ohio, except the Federal
30 certificate, a copy of it; but there is a lot of stationery and then besides that the actual inspection takes men.

Q Is it or is it not true in fact that every State through which we operate, the six States, have boiler inspection laws?

A Well, New York, Pennsylvania and Ohio have, and New Jersey.

Q That is four out of the six?

A Indiana hasn't. I don't think Illinois has. We
40 don't obey the Illinois; we consider it a bother.

Francis M. Graff, direct.

Q There is a Federal Inspection Law?

A Yes.

Q Is any State law like each other or like the Federal law?

A They are practical identical in this particular.

Q Then it is sufficient if you file an inspection of the Federal law in those States?

A All States except New York; I am not sure—perhaps we would prevail on them to accept the Federal certificate, all the rest have accepted it. I think, as a matter of law, they would have to accept it.

10

Q This item of \$6,800 represents the expense of continuing the inspection merely required by the Federal law over and above the expenses of the inspection which the company makes for its own purposes?

A Yes.

Q The next item?

A Approximate annual cost of inspection and repairs to safety appliances to meet the requirements of the Federal law. That is a continuing expense of about \$75,000 a year.

20

Q That is inspection of safety appliances alone?

A Safety appliances alone.

Commissioner Donges. Required for how long?

Witness. The Safety Appliance Law was originally enacted in 1893, but the railroads didn't get very active about creating a lot of expense complying with it until eight or ten years ago.

30

Commissioner Donges. From that time this item has been included in your operating expenses?

Witness. Yes.

Commissioner Donges. And so with the item of \$6,800.

Witness. Yes.

Q The item of \$6,800 is not as old as that?

A No. We have just met a cost of pretty nearly \$50,000 a year in inspection force in the last sixty

40

Francis M. Graff, direct.

days. We have thirty-one cases pending against us in the United States Court for violations now.

Q That \$50,000 a year is necessary to enlarge your inspection force?

A That is it.

Q The next item?

10 A Approximate cost of equipping 1092 road engines with improved headlights. There isn't any law requiring that just now.

Q There is in some States?

A Yes.

Q Indiana?

A Yes.

Q Pennsylvania?

A It isn't passed there. They didn't pass that.

Q That law is filed. You operate through six States?

20 A Yes.

Q In order to comply with the laws of one State it is substantially necessary to equip the entire line?

A Yes.

Q On account of the trains moving through?

A Yes.

Q What can you say as to this amount being over and above an improved system of headlights?

A It is my opinion that is a pretty good thing.

30 Q I mean the amount of expense over and above the headlights.

A I thought you meant—

Q Just this \$30,000 represents increased cost in order to comply with those laws?

A That \$30,000 would represent the amount required to buy new headlights. We have to throw our headlights away; they are no good anyway—I didn't mean to say that.

Q You mean under the new law—is that—is that what you mean to say.

40 A I mean they are a better headlight than the ones in use.

Francis M. Graff, direct.

Q The ones in use serve the purpose?

A Yes.

Q They are sufficient to guard against accidents and insure safe operation?

Mr. Merrey. The law says otherwise.

Q The next item?

A Replacement of 350 caboose cars to comply with the law of the State of New York.

10

Q What does that law require?

A Well, I guess after they passed the full crew bill they had to get a larger caboose to hold the brakemen.

Q They wouldn't be required on the train so they stay in the caboose?

A Yes.

Q Didn't that provide for berths?

A Yes.

Q So the crew could lay down while performing their duties. 20

A Yes, very spacious on all sides.

Q How many berths?

A Four berths.

Q So four men of the crew can go lie down?

A Yes, frequently.

Q The act requires an ice box?

A Yes.

Q And a toilet?

Commissioner Donges. What State? 30

Mr. Minard. New York.

Commissioner Donges. Within what time?

Witness. We got to have that all cleaned up by 1920. That really means the company is obliged to replace all caboose equipment; so it is hardly fair to charge this all up to New York.

Q There is a caboose law in other States, in Indiana?

A It doesn't amount to much. Any eight-wheel cars meet the requirements of Indiana. 40

Francis M. Graff, direct.

Commissioner Donges. You said with your reasons, general replacement of equipment.

Witness. On account—the New York State caboose law is a good law, nobody can take any objection to it. It will simply mean the other States make the same requirements, and indirectly we will have to replace all caboose cars, about 600 cars.

10 *Commissioner Donges.* With no requirement as to any replacement, as to the number or percentage in any given year?

Witness. No, not in New York.

Commissioner Daniels. What is the life of a caboose car anyway; such as you have at present—do they last more than fifteen years?

20 *Witness.* We have caboose cars that have been on the road for forty, I guess. It is pretty hard to say what the life of a car is. You rebuild them and change them over and still it is the same old car, you know. A caboose car should be structurally pretty strong, especially there—

Q What is the next item?

A Application of steel draft arms to 6,657 thirty-ton box cars.

Q That is required by law?

A No.

Q That is being done?

30 A The expense has been authorized and the material is being put on the ground now.

Q What is the purpose of that improvement?

A These cars are equipped with short draft timber that only goes to the body bolster; in every train in modern service condition it is utterly impossible to keep the draft rigging secure. It pulls out and results in accidents. I included that simply to show that once in a while the railroads do something voluntarily for their own good and also for the protection of the public.

40

Francis M. Graff, direct.

Q That is an element of safety as well as an improvement in structure?

A Yes.

Q And amounts to how much?

A \$948,223.

Q Did we get in the amount of the 350 caboose cars, \$350,000, and equipping road engines with improved headlights, \$30,000?

A No.

10

Q The next item?

A Application of permanent push poles to 330 switch engines. The purpose of that is the same as the other case, to show the voluntary action on the part of the company.

Q That relates to safe operation?

A Yes. It wasn't required by law.

Q And amounts to \$44,480?

A Yes.

20

Q The next item?

A Application of steel underframes and electric lights to 100 passenger train cars, \$324,367.

Q That work is under course of construction?

A The material is assembled on the ground; the work hasn't been done.

Q It will be done when the material is assembled?

A Yes.

Q The purpose of that is what?

A The purpose of that is anticipated what is going to happen in Federal legislation.

30

Q Steel cars?

A Yes.

Q The purpose of that—is it or is it not the safety of the traveling public as well as the convenience of electricity?

A Yes. It is a question now when the work is done whether it will meet the requirements of any of the statutes that will be passed, on all steel cars.

40

Charles Pfitzner, direct.

Commissioner Donges. You have some steel equipment now?

Witness. Very little. We have four mail cars.

Mr. Herrey. No questions.

CHARLES PFITZNER, sworn on behalf of Erie Railroad Company.

10

Direct examination by Mr. Minard.

Q What is your business?

A I have charge of the crossing men.

Q You are supervisor of the crossing men, including Paterson?

A Yes, sir.

Q I show you a statement and ask you if that is a complete list of the crossing protection provided at each in Paterson and the time during which the protection is afforded?

20

A Well, all except Fifth avenue.

Q Fifth avenue is not in this case—that is, all the crossings except Fifth avenue?

A Yes.

Q That actually represents the number of men and whether there are gates or men on the ground?

A Yes, sir.

Q And indicates the hours during which protection is afforded?

30

A Yes, sir.

Mr. Minard. I might say for the information of the Commission, that statement up to that point is the exact number filed with our answer.

Q Can you say the amount paid per man are the figures that represent the amount paid these men in wages?

A Yes, sir. And the total of the protection is \$14,736.87 and the cost of maintenance of the crossings is \$2,101.59.

40

Charles Pfitzner, direct.

Q As to the maintenance, I don't know.

Mr. Minard. I will leave that out.

Q There is a statement down in the bottom of other streets, undergrade crossings, is that right?

A Yes, sir.

Mr. Minard. I will offer this in evidence except the last column showing maintenance. I haven't any maintenance man here to-day.

10

Commissioner Hillery. Where were the figures taken from?

Mr. Minard. They were prepared by the operating vice-president's office. Mr. Pfitzner's statement is he represents that department; another man has charge of the maintenance.

Mr. Merrey. We will accept this statement without bringing anybody here.

Commissioner Donges. That this is an accurate statement?

20

Mr. Merrey. No, that this is a statement they would swear to.

Commissioner Donges. It may go in as part of the exhibit.

Mr. Merrey. Yes.

Commissioner Donges. It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-12.)

Commissioner Daniels. Do you feel for this wage that you get really competent men to protect your gates?

30

Witness. Yes, to a certain extent. The men I have, I doubt that I could better them. Of course, there is, once in a while, a man slips in that is no good. We get rid of him as soon as we find that out.

Commissioner Daniels. Couldn't you get, at two dollars, a very much more efficient man to guard your gates?

40

Charles Pfitzner, cross.

Witness. That is a question. I would consider old men on the gates better than younger men, especially nights. I consider they would take care of the position a great deal better.

Q Isn't it true, Mr. Pfitzner, these gates have a simple operating maintenance by compressed air arrangement, and at other times a single lever, and a one-armed man, they can perform that duty all right?

A Not very well through Paterson.

Q There are no one-armed men through there?

A They are all cranked. I have a one-armed flagman.

Q I notice that statement shows some crossing bells as well as gates?

A Yes.

Q That appears in the statement wherever there is a bell?

20 A Yes.

Cross examination by Mr. Merrey.

Q You get some men for seventy-five cents a day?

A No, only a part of a day, put in part of a day on that work and have another part of the day for something else.

Q Some are paid one dollar and a dollar and a quarter; is there any reason for that; any difference in the character of work they do?

30 A Not a great deal; some of the crossings are a little more important than others.

Q Is Clay and Straight street crossing a very important one?

A Well, Straight street, Clay and Straight are separate, those are separate crossings.

Q They are marked here Clay and Straight streets one dollar.

40 A I know they are marked together. Straight street should be separated there. There is two sets of men on those two crossings.

William H. Willis, direct.

Q You have no trouble with these men, these gate-men, no trouble?

A Sometimes we do; the same as you would with any body of men.

Q Some have been struck there on the crossings, haven't they, lately?

A No, I had one case of a man being struck on Market street.

Q Occasionally they put a gate down when a wagon is on the track, things of that kind?

10

A Not as a rule. You find a majority of the cases of automobiles and wagons going in with the gates partly down; and the man lowers the other gate and they get in between them.

WILLIAM H. WILLIS, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

20

Q Where do you live, Mr. Willis?

A Nutley, New Jersey.

Q What is your position?

A Signal engineer of the Erie Railroad Company.

Q Are you in charge of the signal system of the Erie Railroad, New York to Chicago, and all branches?

A Yes, sir.

Q How long have you been in the civil engineering business?

30

A About twelve years.

Q Have you prepared, at my request, a statement of the signal improvements undertaken in the last years and carried out?

A Yes, sir.

Q I show you a paper and ask you what it is. Just tell us what this statement shows.

A There is three columns of figures there. It shows the appropriations made.

40

William H. Willis, direct.

Q Beginning on the left-hand side the first column shows the division of the road upon which the improvement is made?

A Yes.

Q The second column, the interlocking devices and automatic signals?

A Yes.

10 Q What is the function of both of those features, interlocking and automatic signals?

A The interlocking signals are usually placed at junction points and grade crossings of other railroads.

Q For the sole purpose of what?

A Safeguarding train movement.

Q Automatic signals—the sole function is what?

A Spacing the trains properly.

Q So the two items, interlocking and automatic signals, are entirely for safety appliance purposes?

20 A It is.

Q Go ahead with the next column, the third column.

A The third column is the appropriations made the year ending June 30, 1911.

Q The fourth column?

A The fourth column is the appropriations made the year ending June 30, 1912. The fifth, the appropriations made June 30, 1913.

30 Q Those are appropriations. Have you a note in the bottom corner indicating by an X certain things?

A The percentage worked out.

Q X means what, when opposite a figure?

A 10% of the work completed.

Q It means the other 90% in the course of construction?

A Yes.

Q Where there are two X's?

A 20% of the work completed.

Q Three X's?

40 A 50% completed.

William H. Willis, direct.

Q Four X's?

A 85% complete.

Q Five X's?

A 95% complete.

Q Where there are no X's in front of figures what does it mean?

A The work all completed.

Q All the work in the 1911 and 1912 columns has been completed, is that right? 10

A That is right.

Q The first four items of 1913 are complete?

A Yes, sir.

Commissioner Donges. And the expenditures actually made?

Witness. These are appropriations made and as a rule they cover the exact cost of the work done. I might mention here these figures only cover the amount chargeable to capital account. 20

Q It doesn't cover replacement or renewals?

A It doesn't cover any replacing in kind, anything of that kind.

Q Do you have a surplus over your appropriations or a deficit?

Commissioner Donges. Why not confine it to these figures.

Mr. Minard. What I want to know is about these items that have been complete. Was there a deficit or a surplus? 30

Witness. We had a surplus, very small.

Q How much?

A Take the case of the New York divisions for 1911, that covered work done in the Jersey City yard, three interlocking signals in the Jersey City yard, automatic signals between Jersey City and Bergen. We had approximately \$5,000 out of the appropriations.

Q Out of \$190,000 you had \$5,000 left?

A Approximately that. 40

William H. Willis, direct.

Q Can you say about the rest, whether there was a surplus or not?

A This case (indicating).

Q 1911, the Susquehanna?

A About \$8,000 left.

Q Out of \$234,000?

A Yes.

10 Q Can you tell about Mahoning, 1911?

A We had nothing. That was a contract job; it is the contract figures.

Q What can you say of the New York division, 1912?

A I can't say. I haven't detail figures for that, but I know there was very little left out of the appropriation.

Q When you say "little," what do you mean?

20 A That covers several jobs on the New York division; there might be \$7,000 or \$8,000 left out of the \$40,000.

Q Why didn't you give me to-day the actual expenditures instead of the appropriations?

A The actual appropriations?

Q Yes, showing the surplus and deficit?

A My main reason was my chief clerk was away and I couldn't prepare it.

Mr. Minard. I want to put in the actual expense.

30 *Commissioner Donges.* That should be produced.

Mr. Minard. I am willing to produce that if I may have permission.

Q What does the New York division mean; that embraces New Jersey operation?

A Yes, a part of New Jersey.

Q All of New Jersey operation is embraced in the New York division?

40 A Yes.

R. H. Corson, direct.

R. H. CORSON, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q What is your occupation?

A Telegraph inspector.

Q On the Erie Railroad?

A On the Erie Railroad.

Q Are you familiar with the wires of a telegraph and telephone and signals system through Paterson? 10

A I am.

Q Have you prepared a schedule here showing the wires and stating the points between which they run?

A I have.

Q This statement is entitled, "Wires along the Erie Railroad, Main Line, at certain street crossings in Paterson."

Mr. Merrey. I want to object to offering this table in this way. It will save time to put the table right in as it is. 20

Mr. Minard. I was going to do that; I want him to explain it. I think you have no doubt about his competency to testify.

Mr. Merrey. No.

Q Does this statement show accurately the situation of the wires through Paterson?

A It does.

Q Signals, telephones and telegraphs? 30

A Everything.

Q Does it show the wires of the Erie, or whether they are telephone or telegraph company's?

A Yes.

Q Under the headings of railroad and Western Union?

A Railroad and Western Union.

Q In the last column there are the names of the crossings involved?

A The names of the crossings. 40

Martin Quick, direct.

Mr. Minard. I wish to offer this statement.
Commissioner Donges. It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-13.)

10 Q Those wires operated by the Western Union Telegraph Company, do you know whether they are operated and maintained under an agreement with the telegraph company?

A They are.

Q With the Western Union in 1895?

A 1907.

Q Have you a copy of the contract? It is the same contract that was filed in the Rutherford case. I will file it here. It is the same contract that you identified in the Rutherford case?

A It is.

20 *Mr. Minard.* I will send that to the commission.

Commissioner Donges. It is understood that Mr. Minard may have marked as an exhibit the copy of the contract between the Western Union and the Erie Railroad.

Mr. Murrey. The Western Union filed an answer.

Mr. Minard. I don't think they had a copy with the answer attached.

30

MARTIN QUICK, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q Mr. Quick, what is your business?

A I am chief clerk to the operating vice-president of the Erie Railroad.

Q Recently have you been filling another position?

A For twenty-two months I have been secretary
 40 of the committee appointed by the railroad in the ar-

Martin Quick, direct.

bitration cases with the engineers, foreman, conductors and trainmen.

Q And you were secretary of the managers' committee which represented all the railroads before those two arbitration committees?

A Yes.

Q In that connection did you become familiar with the figures and estimates and all the testimony submitted before those boards of arbitration? 10

A Yes, sir.

Q Did you compile these figures in a statement, "Statement and Estimated Annual Increase in Pay Rolls as follows, and Increases in Wages Awarded by Arbitration Commissions, and Effective since May 1, 1912"?

A Those figures were compiled by individual railroads on instructions issued by this committee, of which I was secretary. 20

Q As secretary, did you receive the figures of the Erie Railroad?

A Yes, sir.

Q Were those figures offered in evidence before that board?

A Yes, sir.

Q Is this a statement of those figures?

A Yes, sir.

Q Just read it, please.

A "Statement of Estimated Annual Increase in Pay Rolls as follows, and Increases in Wages Awarded by Arbitration Commissions, and Effective since May 1, 1912." 30

Commissioner Donges. Are these arbitration commissions established by law?

Witness. The last one, the railroad trainmen, was under the Newlings Act, which was an amendment of the Erdmann Act. It was not in accordance with the Federal law. It was an arbi-

Martin Quick, direct.

tration, an agreement between the railroad and the railroad employees.

Commissioner Donges. Under the Newlings Act it becomes effective under the provisions of the law?

Witness. Yes.

10 Q The first award was voluntary, if you call it voluntary insofar as the department of Commerce and Labor didn't compel the railroad to participate in the award.

A Yes, it was an agreement.

Q The arbitration was brought about through the force and efforts of the Department of Commerce and Labor at Washington?

A Yes.

Q I didn't want it to appear that we voluntarily granted the increase.

20 A No, we were held up.

Q Continue to read the statement.

A Effective May 1, 1912, engineers, the amount of increase as handed down by the arbitrators was \$124,274.40; that is estimated.

Q Per year?

A Per year. May 1, 1913, telegraphers, Erie Railroad, granted an increase per annum of \$47,689.80.

Commissioner Donges. That was the result of arbitration?

30 *Witness.* No, sir. That was the result of negotiations.

Commissioner Donges. Between the telegraphers and the officers of the railroad?

Witness. Yes, sir.

Commissioner Donges. And insofar as it was not required by any authorized body or law, it was voluntary on the part of the railroad?

Witness. Yes, sir.

40 Q Can you say anything about the threatened strike unless these figures were raised?

Martin Quick, direct.

A Yes; the railroad received an ultimatum from the telegraphers that if they didn't have the increase they would leave the service.

Q This was awarded in the matter to save a strike?

A Yes.

Q Can you say whether that first award made by the company under the Erdmann Act was a strike award in effect? 10

A Yes, sir.

Q They voted a strike and this was the alternative?

A Yes. They notified the railroad they would leave the service. Ninety per cent. of the men voted to leave the service if they didn't grant the increase.

Q In other respects it was voluntary?

A Yes. May 1, 1913, firemen received an increase of \$180,353.73. 20

Commissioner Donges. That was the result of negotiations between employees and the company?

Witness. Yes, sir. That was an arbitration under the Erdmann Act, and it was brought about by the same method as the engineers. They took a strike vote.

Commissioner Donges. There was no law compelling it?

Witness. Yes, the Erdmann law. October 1, 1913, the conductors and trainmen were granted an increase amounting to \$339,876.60. 30

Q That was under the Employees Law as amended by the Newlings Act?

A Yes, sir.

Q These figures were all employees on the Erie Railroad?

A Yes, sir.

Martin Quick, direct.

Commissioner Donges. Under the Newlings Act is the railroad obligated to submit itself to arbitration?

Witness. No, I don't think they are.

Commissioner Donges. They may or may not submit themselves?

Witness. Yes, sir.

10 *Commissioner Donges.* But once the question is submitted to the board as provided by the Newlings Act, its judgment is conclusive and becomes effective?

Witness. Yes, sir.

Q What have you to say about the circumstances which brought about this last award. Was there any strike threatened?

20 A Yes; there was the same order of procedure. The conductors and trainmen, through their officers, met and a committee composed of operating officers of the several railroads, representing all the railroads east of Chicago and north of the Potomac River; after negotiation for several days the conductors and trainmen told the railroad they thought they weren't receiving sufficient pay and they took a strike vote and came back with the usual 90% in their pockets and told the railroads if they didn't grant their request they would leave the service of the company; the various companies. It was a collective movement. Then
30 the mediators came up from Washington and entered into negotiations between the conductors and trainmen and the railroad with the result we submitted to negotiations under the Newlings Act.

Mr. Merrey. I object to this testimony.

Commissioner Donges. I don't know whether there is any relevancy or pertinency, but it is permitted to come in.

40 Q Did the Erie Railroad Company attempt to avoid participating in the award?

Martin Quick, direct.

A In the conductors and trainmen's we have got the question up now, whether the Erie Railroad will—in other words the railroad is now trying to defer the effective date of the award until July, 1914.

Q For what reason?

A For the simple reason the financial condition of the company is such we don't see our way out to pay it.

10

Q On these other matters was there any alternative for the Erie Railroad than to go into this increase?

Commissioner Donges. Mr. Minard, this witness testified it is voluntary.

Mr. Minard. If the condition of a man with a pistol to his brain offering to cough up his money is voluntary, I presume this is voluntary.

Commissioner Donges. There was no intimidation from this witness, there was duress.

20

Q Was there any way for the Erie Railroad to avoid this increase?

Commissioner Donges. That is equally objectionable.

Mr. Minard. I don't know; the commissioner seems to have in mind that these awards were all voluntary. I want to explain the circumstances.

Commissioner Donges. Yes, but his explanation, I assume, is the one we should take. Yours is an argument whether the circumstances were voluntary or otherwise.

30

Mr. Minard. Based on the circumstances which brought about the increase; I would now like to know whether there was a way out for the Erie Railroad Company so they needn't pay the money.

Commissioner Donges. The witness said it was voluntary; they participated in it on the judgment of the Erie Railroad, following the better plan.

40

Martin Quick, direct.

Mr. Minard. I think the record will show the payment was voluntary in the sense that the word is used.

Mr. Merrey. There was a way out of it.

Commissioner Donges. It is a matter of argument, I think. Mr. Minard is now seeking to get his argument on the record.

10 *Mr. Merrey.* I think he demonstrated they tried at least to keep it off for one year.

Mr. Minard. I offer this statement in evidence; is there any objection?

Mr. Merrey. No.

Commissioner Donges. It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-14.)

20 Q You are chief to Vice-President Stuart, are you not?

A Yes.

Q And he has charge of all divisions of the road, operating charge?

A Yes, sir.

Q You have a general manager for lines east of what points?

A Buffalo and Salamanca.

Q And a general manager west of that?

A Yes.

Q Who is the general manager?

30 A H. O. Dunkle.

Q Have you any reports in your office from Mr. Dunkle of the cost to the railroad company in repairing damages done by floods done in Ohio this spring?

A I think there is an item in there showing the cost.

Q I show you a paper which purports to be a copy of some correspondence and ask you to refresh your memory—, I will ask you first whether that is correspondence in your office.

Martin Quick, direct.

Mr. Merrey. I object to this.

Commissioner Donges. I think, Mr. Minard, this witness is not competent to testify to a paper made by someone else.

Mr. Minard. We can bring Mr. Dunkle here from headquarters, who sent out the report.

Commissioner Donges. The person who made the record is not here for cross examination; inasmuch as objection is made, I don't see how we can permit this witness to testify to the accuracy of a report made by someone else. 10

Mr. Minard. It was made in the office.

Commissioner Donges. Applying the general rule, it is cross examination of this witness of details of records made by someone else.

Mr. Minard. We have a record made from time slips along this line.

Commissioner Donges. There was objection to this. 20

Mr. Merrey. I object to the whole line of testimony.

Mr. Minard. On what ground?

Mr. Merrey. I object to the testimony on the ground that none of it whatever is pertinent; and I object to the fact, particularly here, there isn't any evidence the witness can tell us the cost of this work repairing the flood damages or making the road twice as good as they had it before. 30

Mr. Minard. We can show all that. The point is whether you object to this witness testifying to this information. We will bring Mr. Dunkle I would like to know when the commission will fix a hearing for Mr. Dunkle.

Commissioner Donges. We will fix it to-morrow, or fix it another day.

Mr. Minard. We can bring him at the time the commission takes testimony at Paterson.

George H. Palmer, direct.

Commissioner Donges. Inasmuch as other hearings are necessary it will be better to confine the testimony of that hearing to the testimony of witnesses, whom, because of physical infirmity, were to be examined at Paterson.

10 *Mr. Minard.* It is one of the elements that go into a hard luck story. It cost a million and a quarter dollars and is something we had to pay for.

GEORGE H. PALMER, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q Mr. Palmer, where do you live?

A New York City.

Q What is your position or occupation?

A Assistant general tax agent, Erie Railroad.

20 Q How long have you been in that land department?

A Thirty-two years.

Q Are you familiar with the records of that department?

A Yes, sir.

Q I show you a paper and ask you what that is.

A That is a statement of the title of the Erie Railroad Company to the property of the Paterson & Hudson River Railroad Company and the Paterson & Ramapo Railroad Company.

30 *Mr. Minard.* Let me say for the information of the commission and to save time: This is a statement along the lines of Mr. Palmer prepared in the Rutherford case. It has attached copies of special acts and incorporation of the Paterson & Hudson River and the Paterson & Ramapo Railroad and all acts supplemental, copies of the lease to the Union Railroad and the lease of the Union Railroad to the Erie Railroad, and the statement gives the subsequent title to
40 the Erie Railroad to-day.

George H. Palmer, direct.

Commissioner Donges. An abstract?

Mr. Minard. An abstract or description of the land affecting the crossings in question. It is a very complete document. I think with that explanation it might be admitted, unless there is cross examination.

Commissioner Donges. Suppose it be marked for identification subject to verification.

10

Mr. Minard. We can offer it in evidence the same as we did before subject to the right of examining the originals.

Commissioner Donges. If that is agreeable to you, this may be marked as an exhibit subject to the right to produce and inspect the originals.

Mr. Merrey. Yes.

Mr. Gourley. Yes.

Commissioner Donges. That will be admitted and marked as an exhibit under that understanding.

20

(Same is marked Exhibit R-15.)

Mr. Minard. The commission asked us to tell where the lines of the Paterson & Hudson River Railroad and the Paterson & Ramapo Railroad were separated. We have done a great deal more than we were asked. We have prepared maps of our entire right of way through Paterson.

Mr. Merrey. Are they to scale?

30

Witness. Yes, 100 feet to the inch.

Q Now, Mr. Palmer, what does this map represent; just explain it in detail.

A It shows the land which is in the City of Paterson which is controlled by the Erie Railroad Company.

Q What do the colors show?

A The different sheets show different colors.

Q Will you take sheet marked No. 7?

A No. 7, the property bounded by the yellow design-

40

George H. Palmer, direct.

nation is the property of the Paterson & Hudson River Railroad and the brown the Paterson, Newark & New York Railroad Company. The green bounds the Erie Land & Improvement Company, the red the Paterson & Ramapo Railroad Company.

Q Does that designation prevail throughout all the sheets?

10 A Yes. There is one more, blue, it is the property of the Erie Railroad Company.

Q And the blue lines appear only on sheets where there is Erie land?

A Yes, sir.

Q What have you to say about these little diagrams in the corner of the sheets; for instance in sheet No. 5, what is that diagram index to parcels?

A In the first column the number of the parcel on the sheet; in the second column, the name of the grantor; third column, date of the deed; fourth column, name of the grantee in the deed, fifth, sixth and
20 seventh columns gives the date, book and page.

Q Register's office of Passaic County?

A Register's office of Passaic County.

Q Each piece of ground on the map is marked with a number in a circle.

A Yes.

Q That number corresponds to the number in the diagram as indicating the grantor?

30 A Yes.

Q Is there anything else on this map you can explain, that requires explanation?

A There has been no attempt made to show where the tracks are; simple enough to locate the center line.

Q Simply the arrangement of the real estate?

A That is all.

Q What is the number up in the sheets here (indicating)?

A These maps were made up from land records
40 and these sheets were numbered in our original record.

George H. Palmer, direct.

Q If this map was required to be verified at any time you can refer to that in the original land record?

A Yes.

Q How old are those records?

A These maps were made two years ago.

Q You have old maps?

A We have old maps and record books.

Q Do these maps show actually the land owned by the several companies, grantors, grantees, books and pages of the record? 10

A Yes, sir.

Q And the colored lines indicate accurately the territory covered by each deed?

A Yes, sir.

Q And the number in the circle represents the separate tracts?

A Yes.

Commissioner Donges. Which is accurate as of to-day? 20

Witness. Yes.

Commissioner Donges. I understand these maps are confined as to the character of the streets.

Witness. Taking in the main line.

Commissioner Donges. And all the streets affected by this crossing.

Witness. Yes.

Mr. Merrey. The entire city? 30

Witness. Yes.

Mr. Minard. Have you any cross examination on this map?

Mr. Merrey. No, I haven't.

Q The tracks mentioned in here and numbered here accurately described in those descriptions attached to the statement which we offer?

A I simply confined the copy of the description attached to the statement with the original right of way. I haven't included outlying property. 40

George H. Palmer, direct.

Q Would that or would not apply only to land were the crossing eliminated, or the entire strip?

A The whole strip, the original right of way.

Q The original right of way of the Paterson & Hudson River and the Paterson & Ramapo?

A Yes.

10 *Commissioner Donges.* That is to say, Exhibit R-15 is an abstract of the history applying only to the main stem.

Witness. Yes. I think that is described on the third page. Most of the tracks lie wholly within the original width of the right of way. There may be a few exceptions; in the majority of cases.

Mr. Minard. Any questions about this map?

Mr. Mervcy. No objection.

Mr. Minard. I offer it in evidence.

20 *Commissioner Donges.* It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-16, including eight sheets.)

Q Mr. Palmer, I asked you to prepare a statement of the assessed valuation of the Paterson & Ramapo Railroad and the Paterson & Hudson River Railroad within the limits of the City of Paterson; have you prepared such a statement?

30 **A** Yes; under my direction.

Mr. Mervcy. How is that material?

Mr. Minard. Mr. Palmer will tell us how it is made.

Q Just explain how it was made up.

A The items in the first and second class were property and franchise made up from the reports of the—or from the rates of the State Board of Assessors, and the third class of property, the statement was made up from tax bills of the city of Paterson.

40 **Q** So all the figures were from the officer either

George H. Palmer, direct.

of the State Board of Assessors or the municipal board?

A Yes; excepting the last item was apportioned on the city of Paterson franchise.

Q Mileage basis?

A Yes; we took the total franchise as fixed by the State Board of Assessors and apportioned and mileage of the city as compared to the total mileage of the companies assessed.

10

Q Then the Paterson & Hudson River Railroad is assessed in the city of Paterson, how much?

A \$593,290.

Q The figures of the Paterson & Ramapo Railroad were made up in the same manner?

A In the same manner.

Q They show an assessment of how much?

A \$495,474.

Mr. Minard. In that connection I want to offer a statement sworn to by Mr. Hansel, who valued all the property in New Jersey under the authority of the State. Mr. Hansel is in Philadelphia to-day and I am offering that; it is sworn to before a notary and all, if the commission is willing to accept it. Those are the Paterson & Ramapo and Paterson & Hudson River Railroads, those statements. I might add, the only manner in which those figures differ from the report, which is a State document, is it is entitled "Report of Valuation of Railroads and Canals in New Jersey," for, as he says, he took the assessed valuation in certain parts, instead of his own appraisal, and it is stated in his affidavit what was accepted as the assessed valuation.

20

30

I offer this statement that Mr. Palmer made of the assessed valuation.

Commissioner Dongra. Is there any objection to the admission of the statement made by Mr. Palmer?

40

George H. Palmer, direct.

Mr. Merrey. No.

(Same is marked Exhibit R-17.)

Mr. Merrey. In looking at Map No. 8, I think that runs through the main station at Market street, is a line with a note to the effect for taxation purposes the property is in two parts, divided at that point.

10 *Witness.* At the time the Paterson & Ramapo was incorporated and laid out, the Paterson & Hudson River had its station at the point on Main street about where Grand street now intersects.

Mr. Merrey. Where the St. John's Church is?

20 *Witness.* St. John's Church and round about—I think part of the Ramapo was incorporated in 1847, or to deeds were taken in 1847, and the railroad build around about that time and the line was laid out at the intersection of the Paterson & Hudson River Railroad just east of what is now Straight street. Subsequently, 1855 or thereabouts the Paterson & Hudson River abandoned their old station and bought a strip of land thirty-five feet wide adjoining the land of the Paterson & Ramapo and has a joint station from that time on up near Market street.

Mr. Merrey. After that there was some agreement made between them?

Witness. No.

30 *Mr. Merrey.* As to the taxable proportion; you notice what I mean?

40 *Witness.* I know what you mean; for accommodation on account of lapping on each other. To give a little history. Our office was moved to New York—we had charge of all property outside of New Jersey, the New Jersey office handled that. We moved down in 1890 and we went into an investigation of the assessments. We found we were doubly assessed. The Paterson & Ramapo was assessed on the main stem from Market street to a point east of Straight street to the in-

George H. Palmer, direct.

tersection of the Paterson & Hudson River, and the Paterson & Hudson River was assessed from the main stem between the same points, and we got an adjustment by which only one main stem was assessed and the division was made at that point, a'out the center of the station.

Q That point was taken for convenience as the company's property line?

10

A Yes, that is all.

Q (*By Mr. Merrey.*) This assessment was made on that agreement?

A That arrangement.

Q Now as the property of each?

A No.

Q The property on the map marked blue which belongs to the Erie Railroad was not included in this table?

A Yes, included in this table; all the property of the railroad company is included. It is assessed by the State as belonging to the underlying company.

20

Q Notwithstanding it is owned outright by the Erie?

A Yes.

Commissioner Donges. What is the Erie Land & Improvement Company?

Witness. That is the company controlled by the Erie; some properties stand in their name.

Q (*By Mr. Minard.*) It is a real estate company?

30

A A real estate company.

Q (*By Mr. Merrey.*) The land is not used for railroad purposes?

A Yes, the land in one case just east of Straight street; it used to be a Paterson Iron Company; on the next street, the upper right hand corner; that is used for railroad purposes.

Commissioner Donges. A yard?

Witness. Yes.

Commissioner Donges. Is that a freight yard?

40

Witness. Yes.

George H. Palmer, direct.

Q (*By Mr. Minard.*) Do I understand, Mr. Palmer, this statement we have just offered, Exhibit R-17, included all the land used for railroad purposes owned by the Erie Land & Improvement Company, the Erie Railroad Company or the Paterson & Hudson River Railroad or the Paterson & Ramapo Railroad?

A Yes.

10 **Q** That is the total valuation of all property used by the Erie Railroad Company in Paterson?

A Yes.

Mr. Minard. I offer that as showing the property belonging solely to the Paterson & Hudson River and Paterson & Ramapo R. R. Companies.

Mr. Merrey. The question is whether a statement supported by a affidavit be taken in lieu of the production of Hansel.

20 *Mr. Minard.* Those figures were accepted by the State and accepted by the Board of Assessors. They are merely public figures.

Mr. Sommer. No objection as to their being received as though he testified to them.

Commissioner Donges. And the summary of what Mr. Hansel would testify to if here. Do you desire to reserve any right of cross examination?

Mr. Sommer. None at all.

30 *Mr. Minard.* I offer the one of the Paterson & Hudson River Railroad.

(Same is marked Exhibit R-18.)

Mr. Minard. This I will have marked for the Paterson & Ramapo Railroad. I would like the privilege of taking them with me and having copies made; I will return them to the commission.

Commissioner Donges. It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-19.)

40 **Q** (*By Mr. Minard.*) Mr. Palmer, did you prepare for me a copy of the assessed valuation of the Pater-

George H. Palmer, direct.

son & Ramapo system throughout and the Paterson & Hudson system?

A Yes, prepared under my direction.

Q How is this statement made up?

A Made up in the same way as former statements?

Q By obtaining the information from the State Board of Assessors and the city valuation and the municipal valuation in the various municipalities? 10

A Yes.

Q The first item covers the assessed valuation of the Paterson & Hudson River Railroad, does it not?

A Yes.

Q \$2,727,044?

A Yes, sir.

Q The second memorandum covers the Paterson & Ramapo Railroad assessed at \$1,616,492, is that correct?

A That is correct. 20

Mr. Minard. I offer that in evidence.

Mr. Merrey. No objection.

(Same is marked Exhibit R-20.)

Q Mr. Palmer, did you make any investigation to ascertain when streets were laid out in Paterson?

A Yes, I had one made.

Q What was the result of your investigation?

Mr. Merrey. I object to that.

Mr. Minard. I will admit you have got the original records. 30

Mr. Merrey. If the witness knows he can testify to it. If you have any records put them in.

Mr. Minard. The only thing I can do is produce the man who examined the county records in Passaic County. After a personal investigation, made under Mr. Palmer's supervision, he reported to Mr. Palmer and Mr. Palmer has an abstract of the result.

Mr. Merrey. What will the county records show you? 40

George H. Palmer, direct.

Mr. Minard. They will show you only two streets were in Paterson when the railroad was laid out and all the rest were laid out afterward.

Mr. Merrey. The county records don't show that.

Mr. Minard. They will.

10 *Commissioner Donges.* If they are extant records, why may they not be produced, or a certified copy?

Mr. Minard. They may. If the commission requires that we will have it done.

Commissioner Donges. I think that is the best proof, in view of the objection.

Mr. Merrey. I may be able to agree with him on this subject if I have an opportunity to investigate it.

20 *Mr. Minard.* I want to know now whether it is our duty to produce certified copies or whether it wasn't the plaintiff's own duty to do that.

Mr. Merrey. You set it up. I say it doesn't matter whether it was before or after.

Commissioner Donges. I think it is a matter raised by the respondent.

Mr. Merrey. I may agree on the fact.

Commissioner Donges. Where it is a matter particularly of public record susceptible of legal proof, unless—

30 *Mr. Minard.* Yes. Do I understand the commission to rule it doesn't make any difference whether a street is opened after a railroad was built and operated or not?

Commissioner Donges. The question hasn't been raised on that.

Mr. Minard. Mr. Merrey says it don't make any difference; I say it does.

40 *Commission Donges.* In your answer you distinctly raise that question. If you desire to have any advantage of that it will be necessary for you to introduce proof that the condition or situation raised by your answer exists.

George H. Palmer, direct.

Mr. Merrey. If Mr. Minard will give us an opportunity to investigate his report we may be able to agree. I think that will save dispute and the necessity of taking evidence. As soon as we are satisfied he is right we won't have any dispute on it.

Mr. Minard. We are very willing to do that. We can produce that man; I don't know as we can produce the certified copy. 10

Commissioner Donges. In view of the objection it is a question whether the production of the man who examined the records is sufficient. There are no objections to submitting a copy of what you propose to prove to Mr. Merrey or Mr. Sommer?

Mr. Minard. In a foreclosure proceeding you may submit a certified copy of title. I don't see why any stricter rules of evidence are required here. The man who made the examination is a lawyer, a member of the bar of New Jersey. 20

Commissioner Donges. That is in an uncontested foreclosure, Mr. Minard.

Mr. Minard. Yes, that is true.

Commissioner Donges. That is under a court rule, I think not under statute, and only in uncontested foreclosure.

Mr. Minard. We can produce the certified copy. I want to go back to that point again. You say if we want to take any advantage of this situation; the best advantage to take of it would be to say nothing about it. If he doesn't sustain the burden of his case he don't win. 30

Commissioner Donges. This is not strictly a law suit where one party wins and loses because of a failure of proof.

Mr. Minard. It isn't strict; yet when we want to take evidence in one case it is a strict court of law and in the other it isn't. 40

George H. Palmer, direct.

Commissioner Donges. Where you tendered something else than the best evidence and substitute it for the best, and it is objected to, then I think we are entitled to the best.

Mr. Minard. On the question of whether we need to offer it, it isn't a court of law.

10 *Commissioner Donges.* That may be a thing for you to determine; whether you are willing to rest your case without having that matter before the commission.

Mr. Minard. We will let that go.

Mr. Sommer. We will agree on it.

Mr. Minard. We can probably get a car and bring the contents of the offices up to a hearing at Paterson.

I believe that is all I have for Mr. Palmer.

20 *Commissioner Donges.* Any cross examination?

Mr. Merrey. No.

30 *Mr. Minard.* Most of these gentlemen here in the court room were engaged in taking the census at the crossing. If we can agree on the evidence going in, as we did in the Rutherford case, we will offer a summary subject to our being called on at any time for the original sheets and we will produce the original sheets and the men who superintended the taking. If there is any question as to how the figures were actually taken we will produce any of the men necessary. It is approaching the hour for adjournment; if we could make an arrangement of that kind, we wouldn't bring these men back.

Commissioner Donges. What have you to say, Mr. Merrey.

Mr. Merrey. That is fair.

Commissioner Donges. That seems to be satisfactory.

40 Adjourned until the following day, Friday, December 5, at the Chancery Chambers, Jersey City, at 11 o'clock A. M.

Discussion.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Jersey City, N. J., Friday, December 5, 1913.

PATERSON GRADE CROSSING ELIMI- }
NATION, ERIE RAILROAD COMPANY. }

Before Commissioners Donges and Daniels. F. H. Sommer, Esq., Counsel.

For City of Paterson appears E. F. Merrey, Esq. 10

For Erie Railroad Company appear G. S. Hobart, Esq., and D. E. Minard, Esq.

For abutting property owners, etc., appears William B. Gourley, Esq.

Mr. Minard. I promised yesterday to produce a copy of the Western Union contract, dated September 25, 1907, and the supplement or amendment, supplemental amendment, dated the third of September, 1913. I offer those in evidence in connection with the wires that are operating along the railroad company's right of way. 20

Commissioner Donges. There is no objection to this being a copy of the amendment?

(No response.)

Commissioner Donges. It will be admitted and marked.

(Contract 1907, marked Exhibit R-21.)

(Agreement 1913 marked Exhibit R-22.)

Commissioner Donges. This is a copy, not the original? 30

Mr. Minard. No, I have a copy in the Rutherford case. It is a printed copy in the one case and a typewritten copy in the other.

Commissioner Donges. Was there anyone appearing yesterday who wishes their appearance entered to-day?

(No response.)

Mr. Minard. We might have an opportunity at Paterson to offer testimony which will be satis- 40

William B. Brameld, direct.

factory concerning damage in the Ohio flood. I told you there was one of our witnesses in Chicago who couldn't get here to-day. I would like permission, if it is desired to do so, to bring the matter up then.

10 *Commissioner Donges.* Yesterday the matter was brought up by you an objection was made by Mr. Merrey; it was then decided the hearing at Paterson was for the taking of testimony of witnesses offered because of infirmities, and any testimony of the Ohio floods, will be presented, if at all, at a subsequent date.

Mr. Minard. That applies to some other testimony which I was going to mention.

20 *Commissioner Donges.* The taking of testimony at Paterson will be confined to those witnesses, and now particularly in view of the fact that it is to be used in the Rutherford case as well.

WILLIAM BRAMELD, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q Mr. Brameld, did you at my request put the siding industries on the sidings through Paterson on a blue print?

A I did.

30 Q Where did you get the map from which the sidings were placed on this map?

A This map is a blue print of a tracing in the files of city engineer's office.

Q Simply a right of way map?

A It shows the tracks generally in the city.

Q This map, I notice is entitled "Erie Railroad Company, Map showing track facilities in Paterson, March, 1903."

40 A Yes.

William Brameld, direct.

Q And for this purpose have you not put on all the industrial sidings which were not already on the map and marked it up with letters in circles at each crossing in accordance with the map offered by Paterson in this case?

A Yes.

Q So these letters in circles correspond with the blue print which the city has offered? 10

A Yes, sir.

Q What does this map show, beginning at one end and going to the other?

A It shows the tracks of the company from a point near Thomas street east of Madison avenue on the main line through to Hawthorne. It shows the Newark branch tracks from the city line to the junction with the main line east of Straight street.

Q Does it show all the yards?

A It shows all the yards in the city and sidings to industries. 20

Q I see on the left hand side of the map one track is marked River street yard; that indicates the yard at River street of the company?

A Yes.

Q And a number of tracks in there?

A Yes.

Q I see a building marked "freight house"; that indicates the Paterson freight house?

A That indicates the freight house at the River street station. 30

Q I see a street marked "River street station"?

A That is the passenger station at River street.

Q Proceeding along I see the Paterson depot; is that the passenger station at Paterson?

A That is the passenger station.

Q The Market street station?

A The Market street station.

Q The freight yard is marked?

A That indicates the Paterson city freight yard, yes, sir. 40

William Brameld, direct.

Q What kind of tracks are in there, for what purpose?

A Team tracks.

Q For teams unloading?

A For teams unloading.

Q Do you know whether the map is drawn to scale or not?

10 A It is drawn to scale.

Q So the different distances or the difference of the distances or objects from each other can be determined from scaling?

A Yes.

Q The scale here is one inch to two hundred feet?

A Yes, sir.

Q I see here an object marked "freight house"; is that the Paterson city freight house?

20 A The Paterson main freight house located just east of Cedar street on Railroad avenue.

Q Down here I see storage yard?

A Where they store and sort cars to be placed at the different industries and also the team yard.

Q It is not a team yard?

A Not a team yard.

Q But for putting cars in the team yard? I see here "D., L. & W. R. R."; those are the tracks of the D., L. & W.?

A Adjacent to the Newark branch.

30 Q They run into the main line somewhere?

A No, they have no connection with the main line at that point.

Q I see an object here marked "station, South Paterson."

A That is the South Paterson station of the Newark branch.

Q That is what street?

A Main street.

Q At Main street there is a grade crossing?

40 A A grade crossing.

William Brameld, direct.

Q With trolley tracks?

A No trolley tracks.

Q Running over it? Then this indicates the Paterson branch on out?

A The Newark branch.

Q And the D., L. & W. R. R. running as far as Getty street?

A Getty avenue.

10

Q At Getty avenue there is a grade crossing?

A Getty avenue is a grade crossing.

Q The Newark branch does not run into the main branch between Clay and Straight street and Madison avenue?

A Yes.

Q I notice here a circle with names of objects; what does that represent, in the orange color?

A The circles with the letters in them and the names opposite, shown in yellow, indicate the crossings at grade, which the petitioner desires eliminated.

20

Q They are lettered and named in accordance with the city's petition?

A Yes, sir.

Q And map?

A Yes, sir.

Q I see a circle with a number in red; what does that indicate?

A The small circles with the numbers in them in red indicate the location of the industries that are served by sidings.

30

Q I see here a table from one to forty-six; what is the circle in red with names opposite; what do the names indicate?

A Indicate the owner of the industry served by sidings on the line.

Q Those are the names of owners of sidings marked on the map?

A Yes, sir.

40

William Brameld, direct.

Q You can readily determine the location of each owner's siding by getting the number opposite his name?

A Yes.

Q I notice that the John Agnew Company is marked two sidings, how do you indicate that; also the Weidmann Silk Dyeing Company at 43?

10 **A** By placing a circle with the number 11 in it, it locates the different sidings.

Q Are there two?

A There are three.

Q There are three sidings they have but you have only put two there, is that right?

A No.

Q There is another siding which continues around No. 11?

20 **A** No. 11 is on Prince street; it is a siding that runs to a storage yard at Prince street; the two circles in No. 11 in the vicinity of Governor street, Tyler and Gardner streets, are sidings to coal yards. There are several sidings.

Q Weidmann Silk Dyeing Company are marked No. 43?

A Weidmann Silk Dyeing Company has two sidings, one on both sides of the main track west of Fifth avenue and one at the coal yard east of Fifth avenue.

30 **Q** (*By Mr. Merrey.*) When you say east you speak in railroad direction?

A Railroad direction, Jersey City is east.

Q East is really south?

A On this map, yes.

Q (*By Mr. Minard.*) Where did you get the information that the Weidmann Silk Dyeing Company and the Agnew Company had two sidings?

A I went out on the ground.

Q Why do you say two sidings there and show three on the map?

40 **A** This list on the map is a copy of what is shown in the respondent's answer.

William Brumfield, direct.

Q That is copied from the answer and afterwards you went on the ground and found there were three instead of two?

A I did.

Q Wherever a company has more than one siding there will be the same number of circles with their number in there as they have sidings, is that right?

A Yes, practically.

10

Commissioner Donga. I notice here two No. 10's in circles; that indicates one of the sidings?

Witness. No; that indicates one of the places where they are served.

Q By the same siding?

A This is a different siding; they have a siding they built, taking off the house track siding. That is located on both sides of Taylor street?

Q That is No. 10?

A No. 10 is the Standard Oil Company.

20

Mr. Minard. I offer this map in evidence.

Mr. Merry. We will have no objection.

Commissioner Donga. Suppose Mr. Gourley asks any questions he wishes first.

Q (*By Mr. Gourley.*) Do these sidings indicate whose property that is, the railroad's or abutting property owners?

A They do not.

Q (*By Mr. Merry.*) Do you know anything about the owners of property?

30

A I do not.

Q Do you know whether these names of owners are correct or not?

A I do not. They were taken from the list that was in the respondent's answer.

Q Then it may be that some of the property which is credited up to the different people belongs to the railroad company?

A It may be.

40

William Brewster, direct.

Q Take No. 18 for instance, Morrison Company, that is at Market street?

A Yes.

Q Isn't that owned by the Erie Railroad Company or the Paterson & Ramapo, one of those companies?

A It is so indicated on the right of way on the map; I don't know by personal knowledge.

Q Why did you put the name, Morrison & Company?

A As an industry that was served by a siding.

Q So that these names that you have on this map in the following circles in which there are numbers, merely indicate an industry and not the ownership of any property there?

A That is correct.

Q As far as you know?

A As far as I know.

Q Might I ask about No. 8, M. Gable; there is no such person, as far as you know?

A I inquired from the freight agent and he said M. Gable had a piece of land where it is marked No. 8.

Q Is that owned by the Erie itself?

A I don't know.

Q Do you know whether or not these sidings were made by any permanent right where they cross the street?

A I do not.

Q You do not know whether or not the city of Paterson has given more than temporary permission to cross the street?

A I do not.

Mr. Merrey. Mr. Barber, were you able to locate G. A. Zabriskie in the Paterson matter? You wrote me you couldn't locate him.

Mr. Barber. No.

Q *Mr. Merrey.* He was one of the parties mentioned to send out notices to.

William Brameld, direct.

Mr. Barber. No, the letter was returned to the office. It was registered; we had notice they couldn't make delivery and didn't find the address in the city of Paterson.

Commissioner Donges. You are speaking about No. 5.

Witness. No. 5 is the location of the building occupied by—it is the building on the northwest corner of Clay and Railroad avenue, according to railroad direction. It is an industry located under the name of G. A. Zabriskie. 10

Mr. Gourley. This shows the McNab & Harlin switch?

Witness. Yes, two of them.

Mr. Misard. I offer that map.

Commissioner Donges. It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-23.) 20

Q (By Mr. Misard.) Mr. Brameld, in going over this ground to check up these sidings did you make any observations, geological observation, as to the streets or structures that would be effected by the depression of the right of way through Paterson, as required by the petition or by the elevation of the strip as mentioned in the alternative, of these obstructions and structures not mentioned in the petition or included in the proceeding; did you make this list of those? 30

A I did.

Q Just point out to the commission the location of the different objects mentioned on the list beginning at the top.

Mr. Hervey. Do these refer to all structures?

Mr. Misard. Yes, railroad structures.

Q Begin at the top?

A The first one is the Passaic river bridge, the bridge shown on the map, known as bridge No. 5. 40

William Brameld, direct.

Q Do you know how high that bridge is above mean water level?

A I have taken no exact measurements.

Q Are you able to say from your observation?

A I should judge it would about fifteen to sixteen feet, not over.

10 Q Do you know anything about the elevation above high water, not unusually high, but ordinarily high water?

A I have known them to put a railroad train on the bridge to keep it from being washed away.

Q How wide is the river between the abutments, can you tell, about?

A About 400 feet.

Q The bridge is about 400 feet long?

A Yes.

Q That is a double-track bridge?

20 A Yes; at Fifth avenue there is a grade crossing.

Mr. Merrey. May I call attention to something here?

Mr. Minard. Yes.

Mr. Merrey. Sixth avenue is an open street, permission to cross at grade has been refused, but permission by the ordinance has never been contested opening that street. We will contend hereafter if the question comes up that Sixth avenue is an open street.

30 *Mr. Minard.* I think you refer to the decision of Vice-Chancellor Howell of the Court of Chancery when he decided it was not an open street.

Mr. Merrey. No; he decided no grade crossing could be put over there and the commission refused to allow a grade crossing.

Mr. Minard. The reason it came to the commission was the vice-chancellor decided it was not an open street.

40 *Commissioner Donges.* I don't know that it is necessary to debate that now.

William Brameld, direct.

Mr. Minard. It won't make any difference about our word in the matter. The evidence of the court will settle the question.

Q The next?

A Montgomery street.

Mr. Minard. Do you want Sixth avenue brought in as objects you have omitted?

Mr. Merrey. I am telling you that is our claim. 10

Mr. Minard. I assume the stenographer will get your statement.

Q The next object?

A Montgomery street.

Q What is the condition of that street?

A Not open across the tracks.

Q What have you to say about that street? Has an application been made to open that street across the tracks? What does your memoranda show of that? 20

Mr. Merrey. I object to what his memoranda shows is the street condition. The original application was made to open that street and it was left out in the amendment.

Mr. Minard. Lawrence street. You applied for elimination and you left it out?

Mr. Hobart. All we have is the amended petition.

Mr. Merrey. We have the original here too. 30

Q Fullerton street?

A Now an undergrade crossing.

Q It will be affected by elevation or depression?

A Yes.

Q What is the next one?

A Harrison street.

Q What is the condition?

A Not open across the tracks.

Q The next one?

A Governor street. 40

William Brameld, direct.

Q What is the condition of that street?

A Not a grade crossing.

Q Tyler street?

A Tyler street is not open across the tracks but is included in the original petition.

Commissioner Donges. Is that one of the streets not included in the amended petition?

10 *Mr. Merrey.* It was included in the original petition but not in the amended petition.

Witness. Grand street and Essex street are undergrade crossings.

Mr. Minard. I would like, just for my own information, to inquire at this point, did the original petition consider it part of the proceeding, or was it returned and a new one substituted?

20 *Commissioner Donges.* My impression is the original and amended petitions are part of the files.

Mr. Minard. Part of the files. We were never served with a copy of the original petition and never answered or filed an answer.

30 *Mr. Barber.* It is unnecessary to consider it part of the record for this reason, a petition was filed within a few days after the passage of the law and the commission, before considering it, took up the question of rules and adopted the present rules concerning petitions. The original did not comply with these rules and it was declined.

Commissioner Donges. The petition is taken as a new petition and the original petition is withdrawn?

Mr. Barber. Practically.

Mr. Minard. We will offer the original petition in evidence on our behalf.

Commissioner Donges. Was the original petition withdrawn and returned to the petitioner?

William Brameld, direct.

Mr. Barber. My recollection is the original petition was returned by the board to the petitioner with the statement it didn't comply with the rules and they were told what to do.

Commissioner Donges. And not filed?

Mr. Barber. That is my recollection; I am not positive about that. The only point is, I didn't want it to go on the record that would be a part of the record in this proceeding if I didn't have a copy of the petition in our office; but I will look. 10

Commissioner Donges. It may appear that the so-called amended petition is really the only paper filed and the only paper to be acted on by the board.

Mr. Barber. That is true. The other petition was not accepted.

Mr. Minard. We will offer it in evidence as part of our case; if you haven't a copy, we will send you a copy. 20

Mr. Merrey. Then how will you send a copy?

Mr. Minard. Mr. Merrey, I assume, will send a copy.

Mr. Merrey. If I can get a copy I will furnish it.

Mr. Minard. We will get one some way and present it to the board.

Commissioner Donges. How does the introduction of the petition which has not been received by the board, never acted on, and because of failure to comply with the rules of this board was not received, become material? 30

Mr. Minard. It becomes material in showing—it will show, for instance, that these streets here, which will be affected one way or the other, were not included in the second petition but were in the first. 40

William Brameld, direct.

Commissioner Donges. How does that become material, if the second one is the one we are acting on and the fact that they are not part of the record in this case.

Mr. Minard. I know. I do not understand this discussion is directed to the question as to whether they are part of the record in this case.

10

Commissioner Donges. No. You call upon Mr. Merrey, in fact you call upon Mr. Merrey, to produce a petition sent by him in behalf of the city of Paterson to initiate a proceeding before this board for the elimination of certain crossings at grade in the city of Paterson. That petition was returned by the secretary of this board with the statement that it did not comply with the rules of this board covering the matter and would not be accepted. Then the situation was as if no petition had ever been forwarded. Apparently erroneously the petition afterwards sent to the secretary of the board and received and filed has been referred to as the amended petition.

20

Mr. Minard. It calls itself an amended petition.

Commissioner Donges. When, as a matter of fact, it is an original petition.

Mr. Minard. That in itself considers the other petition part of the record which this pretends only to be an amendment.

30

Commissioner Donges. If the so-called amended petition contains all the matter that would be contained in a petition and the necessary matter, it don't make any difference what it calls itself.

Mr. Minard. If it changes all the matter, it is intended to amend.

Commissioner Donges. No; all the matter necessary to initiate proceedings and notice to parties.

William Brameld, direct.

Mr. Minard. It may contain all the essential information. Lots of information in the pleadings is not essential, nevertheless the importance of it develops.

Commissioner Donges. That would be true, Mr. Minard, if the original petition had been filed.

Mr. Minard. Where did you get the information that these streets you have mentioned in this list were included in the original petition? 10

Witness. In the files of the assistant to the president's office I found a copy of such petition.

Mr. Minard. Do you know how that petition came to be there?

Witness. I do not.

Mr. Minard. That appears, evidently, that the petition came to us. I will offer that copy that came to us in evidence. It must have had some authority. 20

Commissioner Donges. It is this reference to amended petition—I rather assumed, without knowing the state of the files, the petition was filed and an amendment made. It had better be left until we find what the state of the files is.

Mr. Minard. We can take care of that later.

Mr. Barber. As far as the railroad company is concerned with respect to that petition its position would be just about the same as though someone would write, making a complaint against the Erie Railroad Company, and should address it to the Railroad Commission of the State of New Jersey. That could not be accepted as a complaint. It is not the Railroad Commission, it is the Public Utility Commissioners. In such a case the original petitioner would be advised that he should send communications addressed to the Board of Public Utility Commissioners and no copy of that communication would be forwarded 40

William Brameld, direct.

to the railroad. This petition which came in in the first instance was not in proper form, therefore it was not accepted or recognized by the board and no copy was ever sent to the railroad company. It has no position before the board.

Mr. Minard. I assume it was properly addressed.

10 *Mr. Barber.* That may be.

Mr. Merrey. Whatever I put in that was abandoned by the petitioner and this substituted in place; it is practically a new petition.

Mr. Minard. You can change the amended petition by striking out the words, referring to the previous petition?

Mr. Merrey. No, we want to show we brought it in at the beginning.

20 *Mr. Minard.* We will proceed with this list and take that matter up later.

Commissioner Donges. It refers to it as an amended petition.

Mr. Merrey. I drew the petition and I thought the original petition was on file. To differentiate them I put that word.

Mr. Minard. You can't object to our putting that in evidence.

Mr. Merrey. I don't object to it. It doesn't help anything or hurt anything.

30 *Commissioner Donges.* If it is desired, and there is no objection, it will be admitted when offered.

Q What is the next item?

A Taylor street.

Q Just locate that for the commission.

A There (indicating).

40 *Mr. Merrey.* The street was opened formally by ordinance. The ordinance is effective and application has been made, or is about to be made to the Court of Chancery to compel the railroads under their charter obligations to build a bridge.

William Brameld, direct.

Mr. Minard. You want a crossing.

Mr. Merrey. An actual crossing.

Mr. Hobart. Overhead?

Mr. Merrey. Overhead.

Q The next?

A Dakota street, not opened across the tracks.

Q And Hazel?

A Hazel street is an overhead crossing. 10

Q Where the street is now over the tracks by a viaduct?

A Yes.

Q That is the city line, according to this map.

A Yes, sir.

Q As a general proposition, in case of depression as requested by the city, how will these various obstructions or streets be affected?

A That is with reference to the streets they request to have eliminated? 20

Q The streets and obstructions mentioned in your list that will be affected by depression of the tracks to such an extent the grade or the street left at in its present status, as required by the petition.

A You mean if the tracks are depressed to enable the crossing eliminated in the petition.

Q That is right.

A It will affect them.

Q (*By Mr. Hobart.*) What will happen to these other streets? 30

A As far as the Passaic river bridge and Fifth avenue is concerned, I don't believe they will be affected.

Q (*By Mr. Minard.*) Providing the depression is confined down there and the grade crossing left at Fifth avenue?

A Yes.

Q Would Sixth avenue be affected in view of what Mr. Merrey informs us of their intention to open a street there?

A Possibly, a little. 40

William Brameld, direct.

Q Provided, of course, they open the grade crossing there?

A Yes.

Q Referring to those undergrade crossings you have mentioned here, what would become of them if there was depression?

A You would destroy the undergrade crossing.

10 Q And reduce them to grade crossings?

A Or take some other method of eliminating those.

Q As to the station and grounds and tracks of the company, that, of course, would be left up on the bank by depression unless they were changed, the grade.

A We would have to change them to make them connect with the tracks.

Q Other obstructions. The Newark branch would be affected between A and B.

20 A The entire line within the city limits would be affected.

Q The whole thing from the Main Line to the end of the map would be affected and would have to be changed?

A On a depression scheme.

Q Would be or might have to be?

A Would have to be, on a depression scheme.

Q The existing overhead crossings—what would have to be done with them in case of depression?

30 A The abutments would have to be underpinned, partially reconstructed.

Q In the case of elevation would these general obstructions be affected?

A In the case of elevations I believe it would be affected all the way to the Passaic river bridge.

Q Including the raising of that bridge?

A Including the raising of the bridge, and Fifth avenue would be affected and Sixth avenue.

40 Q The line beyond the river it would be necessary to build it down to grade.

A Yes.

William B. Ameld, direct.

Q That would affect it down to the intersection of the New York, Susquehanna & Western Railroad and the main line of the Erie?

A I don't believe it would go as far as that.

Q To what extent would the bridge have to be built; I mean reconstruction of the bridge?

A No, I don't believe so.

Q Simply reconstruction of the foundation and abutments? 10

A No, simply raising it.

Q Would the undergrade crossings be affected by elimination?

A Yes, they would have to raise the bridges and build the abutments higher.

Q And the stone wall along the side of the street and building?

A Yes.

Q In the case of elevation what would happen to the various overhead crossings that have been mentioned? 20

A I believe on the Newark branch, Passaic street and Hazel street bridges would have to be raised.

Q Or else a grade crossing accomplished?

A No, I think you could get out of it without a grade crossing.

Q What about the connection between the main line and the Newark branch in case of elevation?

A Both would have to be raised to get the connection. 30

Q That change would be necessary to an extended distance towards Newark, sufficient to get to the grade again?

A Yes.

Q That would affect several streets in there?

A It would affect Getty avenue and Main street.

Q In that case would or would not all the freight stations and passenger stations and freight yards and 40

William Brameld, direct.

sidings and switches, dwellings and so forth, have to be elevated?

A They would.

Q What would happen to the industrial sidings in either case?

A They would have to be raised; the track would have to be raised or the track would have to be lowered to get the connection to the industries.

10 Q Is that possible, do you think, in all cases?

Mr. Merrey. If the commission please, I object.

Mr. Minard. I withdraw the question.

Mr. Merrey. I mean to the whole line. It is all supposition and it don't appear that any plan was worked out by the witness testifying. He is saying if they are raised it will be affected; if they are lowered, they are lowered. I don't think it is competent unless there is some plan worked out. We know a lot of tracks will be affected if we raise them.

20

Mr. Minard. We must get them on the record.

Commissioner Donga. You may proceed.

Q You are familiar with the locations here where there is a number of streets that come parallel to the tracks?

A Yes.

30 Q In case of depression the highway would have to be tunneled or dug out?

A In case of depression of the tracks, yes. You would have to go under the highway to get to the different coal yards.

Q In case of elevation you would have to build a bridge or trestle over the street?

A Yes.

Q To get into those lines?

A Yes.

40 Q What would have to be done in the case of streets running along the tracks, Ramapo avenue,

William Brumfield, direct.

Waite street, and several other streets, in case of elevation or depression?

A You would have to build a retaining wall to keep the railroad out of the street.

Q Or the street out of the railroad?

A Yes.

Mr. Minard. I offer the statement.

Commissioner Donges. Any objection?

10

Mr. Merrey. No objection, except the lumbering of the record with things immaterial.

Commissioner Donges. It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-24.)

Q I hand you a paper, schedule of the cost of abolition of grade crossings. I ask you if you compiled that statement?

Mr. Merrey. Pardon me. The question is this particular grade crossing.

20

Mr. Hobart. Between New York and Chicago.

Mr. Merrey. You might qualify him as to what he knows about the estimates or the information it is based on.

Q Did you compute those figures?

A I did.

Mr. Merrey. I object. This witness is not qualified to estimate the cost of the elimination of grade crossings.

30

Commissioner Donges. I don't think he has qualified.

Q Can you add and subtract and multiply?

A Yes.

Q Can you divide?

Commissioner Donges. Mr. Minard, the objection is the witness has not qualified as an expert who is competent to testify as to the cost of

40

William Brameld, direct.

grade crossing elimination. If you desire to qualify him, qualify him along that line.

Mr. Minard. I wanted to begin at the beginning.

Q Are you an engineer, Mr. Brameld?

A I am.

Q As such do you work for the Erie Railroad Company in the engineering department?

A I do.

Mr. Minard. Do you want any more?

Mr. Merreg. Of course.

Commissioner Donges. If Mr. Minard wishes to qualify this witness he may proceed to qualify him. The witness is not qualified to testify to the subject matter contained in this schedule.

Q How long have you been an engineer?

A Since 1899 I have been working in the engineering department of the Erie Railroad.

Q Are you familiar with the geography of the grade crossings of the Erie Railroad from New York to Chicago?

A In a general way, not each specific instance.

Q Have you visited most of them on one occasion or another?

A I couldn't say; I visited most of them.

Q Do you know what they are and where they are and how many there are?

A Only from lists prepared by different superintendents of the railroad.

Q Did you cause such a list to be prepared and sent to you?

A Yes, sir.

Q For the purpose of preparing this statement?

A I did.

Q For whom was this statement prepared?

A Prepared for Mr. Tucker, First Assistant General Manager.

William Bramfeld, direct.

Q To be filed with the Bureau of Railroad Economics at Washington?

A Yes, sir.

Q They prepared it on this form?

A They did.

Q These figures were prepared in pursuance to special questions asked by them of which these were answers?

10

A They were.

Q Have you been associated or connected with the elimination of any grade crossings?

A I have, for fourteen years on the Erie.

Q Of the amount of grade crossing elimination testified to yesterday, which has been done, several hundred thousand dollars, have you had anything to do with it?

A I have.

Q With it in all cases?

20

A Not all.

Q Most of them?

A I couldn't say just how many, but a great many of them.

Mr. Minard. I offer this witness as competent to testify to these figures such as this and cross examination as to his qualifications or accuracy of the figures.

Mr. Hervey. I took it from the statement of the commission it wasn't necessary to cross examine if he hadn't qualified. 30

Commissioner Donges. I think this witness is not yet qualified to testify on the matter contained in this schedule. You may, however, ask him any questions concerning which he has qualified himself to testify to. I don't think he is qualified.

Commissioner Daniels. Have you in special cases made plans for and estimates on proposed grade crossing eliminations? 40

William Brameld, direct.

Witness. I have, for practically all the eliminations east of Buffalo, Salamanca, New York, those are my duties.

Commissioner Donges. Both plans and estimates?

Witness. Plans and estimates.

10 *Q (By Mr. Merrey.)* I might ask now; have you made plans and estimates on the grade crossings between New York and Buffalo?

A No, sir.

Q You have not?

A No, sir.

Q Is it not a fact that different plans would cost different amounts of money?

A They do. We have taken an average figure.

20 *Q* Have you made an estimate of the cost of eliminating the Paterson crossings which are now in question?

A Not any detailed estimate, just from a general knowledge of the situation as to the cost of such kinds of work. That is, I have no detailed plan.

Q Is there a wide range in the cost of elimination on crossings?

A There is.

Q One plan costs five or six times as much as another?

30 *A* That is a fact.

Q Until you come to the detail and agree on the plan it is impossible to estimate the cost of the work?

A It is, in a specific manner. Roughly we can judge from previous experience about so much.

Q But actually it may turn out one-third of your estimate, or it might be five times the amount of the estimate?

A That depends on the man's judgment in the matter, whether he is off that much.

William Brameld, direct.

Mr. Merrey. My theory is the Bureau of Railroad Economics is a railroad bureau for the purpose of influencing public opinion.

Mr. Minard. No, what I had in mind was to take each item as we go through and testify to it. I surmise Mr. Merrey's chief objection is to that cost of elimination.

Commissioner Donges. I gather from Mr. Merrey his chief objection is to this witness testifying to matters that are not within his knowledge. 10

Mr. Merrey. That is all, of course.

Commissioner Donges. As to any matters within this witness's own knowledge he may testify to; as to matters not within his knowledge, or taken from reports or schedules or approximations he may not testify to. I think to that extent Mr. Merrey's objection will be taken and sustained. 20

Mr. Minard. To what?

Commissioner Donges. To this witness testifying to matters not within his knowledge.

Q Mr. Brameld, do you know how many grade crossings there are on the Erie Railroad between New York and Chicago?

Mr. Merrey. I object.

Q Do you know?

A Only as taken from the records; if the records are correct, I know. 30

Q You are the engineer in charge of this kind of work in the engineering department?

A I am.

Mr. Merrey. I haven't any objection to this witness testifying as to how many there are.

Q How many are there?

A The number of public grade crossings on May 1, 1913, was 2410.

Q On the Erie Railroad?

40

A On the Erie Railroad.

William Brameld, direct.

Q How many in each state, do you know?

A I haven't a list before me.

Q There it is (handing witness paper), under No.
5.

A That is the number of public grade crossings to be abolished under such legislation. That doesn't cover them all.

10 Q This is the number required by law to be abolished?

A That would be abolished under law.

Commissioner Donges. How do you get 256 for New Jersey?

Witness. On the Erie Railroad. That doesn't include the New York, Susquehanna & Western and the New Jersey & New York Railroads.

20 *Commissioner Daniels.* That proposes to show the number of public grade crossings to be abolished under such legislation?

Witness. Yes.

Commissioner Daniels. By the Erie Railroad?

Witness. By the Erie Railroad, yes.

Commissioner Daniels. How do you get that number for this State?

Witness. Under the legislation they have to be eliminated.

Commissioner Daniels. That includes all the grade crossings?

30 *Witness.* All the grade crossings in this State.

Commissioner Daniels. That is on the assumption the law requires the elimination of them all?

Witness. At some time or other.

Commissioner Donges. So this estimate covers not the present, but the future.

Witness. All the grade crossings we have in New Jersey at the present time.

Q How many in each State?

A New York 931, New Jersey 256, Pennsylvania
40 417, Ohio 589, Indiana 189.

William Brameld, direct.

Q (*By Mr. Sommer.*) That is, you have that number of grade crossings in these several States?

A That are to be eliminated under the law. In Indiana they don't all come under the law at the present time.

Q What does New York include, all?

A All.

Q (*By Mr. Minard.*) In other words, where the law would not apply to that particular location or municipality you put them all in, is that right? 10

A No. In some States the law provides the crossings shall be eliminated within certain districts, municipalities, those are not in on this statement if there is no grade crossing to be eliminated under such legislation.

Q You excepted where the act did not apply to certain portions of the State?

A Yes. 20

Q You have put all the crossings in?

A Yes.

Q Take New York, did you include all the grade crossings on the system in that State?

A All the grade crossings on the system, because the law covers all.

Q In New Jersey? ———

A All of them.

Q In Pennsylvania?

A All of them. 30

Q In Ohio?

A All.

Q Indiana?

A In Indiana there is a restriction inside of incorporated villages.

Q It only includes those crossings in Indiana which are in incorporated limits or incorporated villages?

A Yes.

William Brameld, direct.

Commissioner Daniels. In this State you have taken all the grade crossings, because you think possibly some time in the future all the grade crossings may be subject to elimination?

Witness. Yes, sir.

Commissioner Daniels. Not because the law at present time requires that they shall be?

10 *Witness.* No, that will come at some time under the provisions of the law.

Commissioner Daniels. Haven't you perhaps neglected to notice the law provides the elimination of crossings where they are a menace to life and an obstruction of the public highway sufficient to warrant their elimination?

20 *Witness.* It is impossible for me to decide which of the crossings come under that category. We assumed they came under this provision of this law because we were unable to determine whether five did or fifty did.

Q I suppose you object to this cost. This note at the bottom shows what?

A Per cent. of cost required by law to be paid by the railroad.

Q For the different States, what is it?

A New Jersey 100%.

Q The law requires the railroad to pay 100% of the elimination?

30 A Yes.

Mr. Merrey. Not always.

Commissioner Donges. Suppose you wait until cross examination.

Mr. Merrey. I thought I would merely get it straight. The law doesn't put 100% on the railroad where there is a trolley crossing.

Mr. Minard. Where there is.

Q The next?

40 A New York, 50%.

William Brameld, direct.

Q Pennsylvania?

A 80% ; it was an estimated amount. The law doesn't specify ; it gives the commission power to assess the amount and we have estimated about 80%. Ohio, 65% ; Indiana, 75%.

Q Those are in every case the amount required by law to be paid by the railroad?

A I believe so.

Q With the exception of Pennsylvania?

A Yes, sir.

Q Did you estimate the uniform cost of eliminating all the crossings on the Erie system?

A An approximate estimate, yes.

Q That is what I meant.

Mr. Merrey. I object to that.

Mr. Minard. I want to state we offer to prove—or to show to the commission that the estimated cost by the engineers of the railroad—

Mr. Sommer. It is offered to show by this witness.

Mr. Minard. We offer to show by this witness, who is a member of the engineering department, that the estimate—

Commissioner Donges. Make your offer without stating figures.

Mr. Minard. Not without stating figures.

Commissioner Donges. You offer to show by this witness what the cost of eliminating the crossings, public grade crossings—to show by this man what the cost is.

Mr. Minard. I offer to show by this witness the cost of eliminating the grade crossing—I offer to prove by this witness the cost. (Mr. Minard makes statement of what he intends to prove.)

Mr. Merrey. I move this be stricken from the record.

Commissioner Donges. It will be stricken from the record and Mr. Minard will be given an oppor-

10

20

30

40

William Brameld, direct.

10 tunity to prove by this witness any matter he desires that is material. I told you you could proceed to prove by this witness whatever is within his competency as a witness, and if the witness is competent to testify to it no doubt you may prove it. You were neither denied the right then nor now denied the right; but your statement as to what this witness will testify to, the witness not being asked, will not be permitted to go into the record. You may proceed to examine this witness and he can proceed to answer any questions the board has already ruled competent. Anything in addition he is competent to testify to, you may examine him on. You now ask to put into the record an offer containing a lot of figures without having asked this witness regarding them.

20 *Mr. Minard.* I will ask the witness about each separate one.

Q Do you know how much it would cost to eliminate the grade crossings on the Erie System in New Jersey?

Mr. Merrey. I object.

Commissioner Donges. What is the objection?

Mr. Merrey. The objection is the witness is not qualified to answer the question. He doesn't know what it will cost.

30 *Commissioner Donges.* He is asked whether he knows.

Mr. Merrey. I withdraw the objection.

Mr. Minard. Answer the question.

(Question read.)

A I don't know.

Q Have you estimated the amount of cost?

A I have estimated the amount.

Q What is the basis taken for your estimate?

40 **A** In the State of New Jersey I took each individual crossing and classified that according to my

William Brameld, direct.

general knowledge of such matters as to whether it would cost \$30,000 or \$50,000 to eliminate it, as far as I could according to my previous experience, and so classified them.

Q On the basis of your experience and of your classification what amount have you estimated it will cost to eliminate the grade crossings on the Erie System in New Jersey?

10

Mr. Merrey. I object. It appears from the previous examination of this witness he is not familiar with the crossings to be removed or the plans to be adopted.

Commissioner Donges. I think, in view of the witness's previous testimony, he has not gone over and familiarized himself with the details of the crossings, that an estimate made by this witness will not be permitted.

Mr. Minard. Of course, the commission has taken into consideration what he just said. That is the ruling.

20

Commissioner Donges. That is the ruling.

Q Based upon your experience and the classification that you have made, what is your estimate of the cost of eliminating the grade crossings of the Erie System in New York under the laws of New York, requiring us to pay 50% of the cost of each crossing?

A The cost to the Erie Railroad—

Mr. Merrey. I object on the same ground.

30

Commissioner Donges. Sustained.

Q Based upon your experience and classification you have made, what amount will it cost to eliminate the Erie Railroad crossings in the State of Pennsylvania under the laws of that State which cover an estimated amount of 80% chargeable to the railroad.

Mr. Merrey. I object.

Commissioner Donges. Sustained. This is because the witness testified his familiarity with

40

William Brameld, direct.

the crossings comes from reports and records made and not his personal knowledge.

Mr. Minard. All right.

Q Based upon your classification and upon your experience, what is the cost to the Erie Railroad Company of the elimination of its crossings in Ohio under the Ohio law which requires the railroad to pay 60%?

10

Commissioner Donges. What do you mean by "your classification"? Tell us the classification he made.

Mr. Minard. His classification, that he made.

Commissioner Donges. I don't recall he said he made any classification.

20

Witness. I said according to my experience and general classification. What I meant by my classification; quantity record of cost; I know we have eliminated them for approximately \$20,000; I put that \$20,000. If it is in a town where we had to spend probably \$125,000—taking Buffalo, for instance—I have put them in that classification. In that way I have arrived, as near as I could, at the cost approximately.

Commissioner Donges. Did you classify these crossings from personal observation?

30

Witness. Some of them, that I am familiar with. I have been over every crossing in New Jersey. I have been over every mile of line in New Jersey and from travel over the country.

Commissioner Donges. Outside of New Jersey?

Witness. Outside of New Jersey, I have been over practically every mile of track. I can't remember distinctly every crossing.

Commissioner Donges. So you take other people's reports?

40

Witness. As far as the number of crossings is concerned, yes. I took as an average cost in Jersey City; I didn't take any average; I took as

William Brameld, direct.

the crossings classification crossings from \$20,000 to \$40,000 to \$50,000. That is the way it was done in New Jersey. In other States I took the average. I divided the number in New Jersey, or \$54,000 per crossing, used that as a basis on the Erie system—\$55,000. To see how close I was on this other report I read, the reports of Massachusetts and also the State of Pennsylvania.

10

Commissioner Donges. You did not take each crossing?

Witness. No plan or general scheme of elimination.

Commissioner Donges. Or detail plan for each crossing or a general plan, any such plan.

Witness. No, just arrived at the figure \$55,000.

Q (*By Mr. Merrey.*) How many crossings eliminated in New Jersey coming under your observation from which you average the \$54,000?

20

A It wasn't taken in the elimination in New Jersey of any particular crossing. It was from my general knowledge of the eliminating of crossings along the line.

Q You said you had estimated the cost in New Jersey at \$54,000?

A It was \$54,820, some odd.

Q That wasn't actual work?

30

A It was from my judgment of what it would cost to eliminate the crossings. I had this grade crossing matter for something like forty years. I started from the ground up; made surveys; made our plans and paid contractors. I have had charge from beginning to end; in the field from my general observation that way I have roughly—sufficiently, in my judgment—I can estimate, come pretty near hitting it right when I check with the detailed work.

40

William Brunold, direct.

Q How many of the crossings eliminated in New Jersey were under your jurisdiction—under your observation?

Commissioner Donges. Under his observation or under his direction?

Mr. Merrey. Either direction or observation.

10 **A** Under my direction there is Broadway, Warren Point; there is four grade crossings eliminated at Beaver Lake. I guess that is about all we have eliminated in the State of New Jersey.

Q You did eliminate a great many in Jersey City?

A That was before 1899; that was when I came with the road.

Q As far as your observation goes in New Jersey there is only the three or four or five or six crossings that you have now mentioned?

20 **A** Yes; I have also eliminated them in New York.

Q The Broadway crossing and Warren Point you struck very unusual conditions?

A Sand, struck water there.

Q It was a very difficult proposition to get rid of the water; besides that it was a trolley crossing?

A It was a trolley crossing. I think that is the basis that is used in arriving at these figures. I checked it up and found—by the other ones used—and found they matched up with the other fellow.

30 *Commissioner Donges.* But after all it is an estimate.

Witness. After all it is.

Commissioner Donges. It is not an estimate based on any actual figures?

Witness. Not based on any actual figures or drawings.

Recess from one to two o'clock P. M.

William Brameld, direct.

AFTER RECESS.

(Before Commissioners Donges, Hillery and Daniels.)

WILLIAM H. BRAMELD, resumes the stand.

Further direct examination by Mr. Minard.

Q Just before the noon recess you were asked about the number of crossings you had eliminated or superintended the elimination of in New Jersey. Can you say whether the conditions surrounding that sort of work in New Jersey differ from similar kinds of work over in Indiana, New York, Ohio or Pennsylvania? 10

A No two conditions are alike.

Q I mean are any of the conditions in which the crossings in one State differ from the crossings in another State because of the State, except the participation in the cost? 20

A Why, as far as being on one State or the other; it may be through the lowland out in Indiana you might have drainage conditions that would cost more.

Q But similar conditions in New Jersey would cost substantially the same?

A If conditions were the same.

Q The fact that the crossing eliminated was in Pennsylvania doesn't distinguish that crossing, as far as elimination is concerned from any crossing in the other States? 30

A No, sir.

Q I had asked a question which wasn't completed when we got into a controversy between Mr. Brameld and the commission. Referring to that statement: What is the amount that it would cost the Erie Railroad Company under your estimation based upon your experience and classification you made to eliminate the grade crossings in Ohio, taking into consideration the 65% required to be paid by the railroad company? 40

A \$21,956,750.

William Brunfeld, cross.

Mr. Merrey. My objection went to all this.
Commissioner Donges. The objection was made
Mr. Merrey, after the answer.

Q What would be the cost of eliminating the grade crossings in Indiana on the Erie Railroad in accordance with your estimate and based upon your experience and classification, taking into consideration the fact that the railroad company is required to pay 75% in Indiana?

Mr. Merrey. I object.
Commissioner Donges. Sustained.

Cross examination by Mr. Gourley.

Q In the estimates you have made or information you gave the commission concerning the elevation of the tracks at River and Putnam streets; what elevation did you calculate upon?

20 A I haven't calculated any special elevation. The value was taken into consideration, it is down hill from River street to the river, therefore raising and maintaining the grade going to the river; the river is the low part.

Q As a preliminary to that, I desire to get the elevation calculated; can you give me that result?

A I haven't figured on anything definite.

Q It depends on that, of course?

A Yes, the elevation; I haven't definitely figured.

30 Q Have you in your mind that probable height?

A Different cases at different heights.

Q I am speaking of River and Putnam streets?

A It depends on the municipality.

Q It is the extreme northerly point in the petitioner's petition?

A It depends entirely on what the municipality determines or what the commission determine. Cases differ; sometimes you might want fourteen feet.

Q Yes. You haven't the precise elevation?

40 A No, sir.

William Braumfeld, cross.

Q Suppose it was elevated twenty feet, would that be a fair height?

A I haven't figured it out. Crossing streets might require a greater floor difference, on account of the elevation of the street. That would have to be determined.

Commissioner Donges. You mean twenty feet clearance in accordance with food railroad practice? 10

Witness. From a clearance depth underside of the bridge.

Q And the grade of the street?

A Raising the railroad tracks above the street?

Q Yes.

A It depends on the bridge structure.

Q Let me put it sharply: Would an elevation of twenty feet, the railroad be raised twenty feet from the grade of the highway at River and Putnam streets be a fair elevation for the physical conditions at that point? 20

A It might be and might not be. It might be excessive and it might not be enough.

Q My point in asking that is whether if it was twenty feet high or approximately that, how far would that carry your grade on your tracks north from that point?

A I couldn't say; I haven't figured.

Q Would you say to the river? 30

A That depends on the grade that is established on the railroad tracks. You could get to the river; whether that would be the proper grade to use, I don't know.

Q You can't give any information on that subject?

A No, because I haven't investigated.

Q What is the grade of the railroad at River and Putnam streets?

A I couldn't say. 40

William Brameld, cross.

Q You haven't any data or map showing that?

A I haven't any data with me.

Q (*By Mr. Merrey.*) You said the tracks might be affected as far as the Passaic river?

A Yes.

Q What percentage of grade do you intend to put in to cause that?

10 A Well, I haven't figured on that. It is from my general knowledge of the situation, I believe it would be affected.

Q That isn't founded—

A No actual figures, no.

Q Mr. Gourley spoke of an elevation of twenty feet. That is rather high to elevate the railroad tracks?

20 A You see the skew of the street sometimes requires a long girder; on account of the length of the girder and extensive floor depth. If you built the structure, on account of the station, you couldn't extend the girder along on account of the station platform. It would be necessary to take in the structure; and taking in the structure they take up six or seven feet, which will give you only six or seven—well, three or four feet clearance, enough for trolley cars—I couldn't say.

Q Can you tell about the average amount the railroad has been elevated in places you have been where the track was elevated?

30 A Different amounts. Sometimes lower the street, sometimes lower the street so the railroad would be raised all the way from three to ten or eleven feet.

Q You haven't any idea of an average depth?

A Not an average for raising the railroad, but an average clearance underneath. That is the height in some cases of twelve, thirteen and fourteen feet. Then, of course, the rest of the height you raise the bridge depends entirely on the length of the span and the type of construction used.

William Brameld, cross.

Q What is the average clearance that you give ordinarily?

A Twelve, thirteen and fourteen feet.

Q You spoke about the River street bridge over the Passaic river; what is the condition of that bridge?

A I don't know.

Q Isn't it quite likely you will have to rebuild that bridge in the near future?

A Not to my knowledge.

Q Hasn't there been a lot of increase in weight in equipment, very considerable?

A The only thing I know about is just through rumor; I don't know definitely.

Q You haven't been called upon to strengthen your bridges lately?

A Not in my department.

Q Would your department look into that?

A No; it is handled by the engineer of bridges and buildings.

Q You do not know the conditions on other structures you spoke about this morning, whether they are likely to be removed in the near future; whether there is any change of grade or not?

A No, that doesn't come under my jurisdiction.

Q You said the highest elevation you used was twelve to thirteen feet?

A That is the clearance of the underside of the bridge to the street.

Q The clearance?

A Yes.

Q How high an elevation to the tracks?

A That varies from thirteen to sixteen or seventeen feet.

Q Does that include the lowering of the grade of the street, or above it?

A Above the grade as it was originally.

Q (*By Mr. Sommer.*) Can you submit data in your office of the changes in the grade on this map you furnished?

Robert Hoppen, Jr., direct.

A No, no profile is attached to that.

Q Is there any data in your office to furnish the information?

10 A I don't know whether we have profiles covering that territory or not; a profile that I know is right, anything like that. A great deal of the information we have in the office is compiled from profiles of years ago; whether they are changed or not, I can't say.

Q Will you look in the office and see if you have the information? I presume the board would like to have it.

A Covering the territory you mean?

Q Yes, covering the territory.

Mr. Minard. I think we can furnish that.

Mr. Minard. I am prepared to prove the census of travel at these crossings. I have here the original records. I let the persons who actually took the census go subject to be called.

20 *Commissioner Donges.* Yes.

Mr. Minard. We have prepared a summary.

Commissioner Donges. Subject to verification.

Mr. Minard. Which is classed in letters according to the city's map so that it will facilitate the investigation of that map.

Commissioner Donges. That is to say you have marked these summaries A, B, C, and so on with the same letter as indicates the crossings on the city map?

30 *Mr. Minard.* Yes, that is the summary.

ROBERT HOPPEN, JR., sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q Mr. Hoppen, you are an engineer?

A Yes, sir.

Q Did you have supervision of the taking of the census of traffic records at the different streets embraced in the petition in this case, fourteen streets?

40 A Yes, sir.

Robert Hoppen, Jr., direct.

Q I show you a bundle of papers, blue prints, and ask you whether that is a summary taken from the original records and whether the two sheets pinned together in each case are not the records of the two separate days with the day and date at the top of each sheet, is that right?

A They are, yes, sir.

Q Does this record also show at the top each street at which the record is taken? 10

A Yes.

Q The top column, taking the first one, does it show the hours during which the census was taken?

A Yes.

Q The second column shows what?

A Pedestrians.

Q In each hour?

A In each hour.

Q The third column? 20

A Horse-drawn vehicles each hour.

Q The fourth column?

A Autos.

Q The fifth column?

A Bicycles.

Q The sixth column?

A Motor cycles.

Q The seventh column?

A Gates down.

Q What does that mean? 30

A It means the number of times the gates were lowered.

Q The next column?

A Passenger trains.

Q The next?

A Freight trains.

Q The last column?

A Drill engines.

Q The total is under each column?

A Yes. 40

Robert Hoppen, Jr., direct.

Q On the first page of each sheet is the day of the last date of taking the census at that particular crossing, each statement shows a line of figures which indicates the amount under each column for each day?

A Yes, sir.

Q They are added together?

A Yes, sir.

10 **Q** Then, what did you do after they were added together?

A Took the average.

Q Per day?

A Per day.

Q For those two days?

A Two days.

Q All the crossings a census was taken for two days?

20 **A** Some of the crossings the census was two days and others three days.

Q Which were taken for two days?

A Madison avenue, Cedar street, Ellison street, Van Houten street, Fair street, Hamilton street, Lafayette street, Franklin street, Keen street, Warren street.

Q Now then, those you took two days?

A Two days.

30 **Q** Referring to those extended out there, those that were continued three sheets. Read the list of those.

A Straight street, Clay street, Market street, Broadway, and River street.

Q Those were taken for three days?

A Three days.

Q With the dates marked on them?

A The date marked on the top of the sheet.

Q Where the census is taken three days you take an average also?

A An average for three days, yes, sir.

Robert Hoppen, Jr., direct.

Q You have the original records of these with you here?

A Yes, sir.

Q They show the entries on the ground at the time?

A Yes, by each man.

Q Does each show the man who took the record?

A Yes. 10

Q At the crossing?

A Yes.

Q Bearing his signature?

A Yes.

Q And the time he took it?

A Yes.

Q This letter down in the right hand corner, A in a circle, at Madison avenue; what does that refer to?

A That refers to the letter for the different crossings. 20

Q Down where?

A Shown on the maps presented.

Q By whom?

A By the city.

Q In the case of Clay and Straight street you found on the map for the city it covered both?

A Covered both crossings.

Q So you put the B on the Straight street record as well as the Clay street? 30

A As well as the Clay street.

Q In no other case is there a duplicate of the letters, you know of?

A No, sir, that is the only one.

Commissioner Donges. How about Warren and River streets?

Mr. Minard. Putnam and River?

Commissioner Donges. Warren and River?

Witness. Warren is a separate street. 40

Robert Hoppen, Jr., direct.

Q You made a separate sheet for that?

A Yes, sir.

Commissioner Donges. Are not the records for Warren street and River street both given the designation M, or is it M and N?

Witness. N and M. River street is N and Warren street is M.

10 *Mr. Minard.* I offer these in evidence.

Commissioner Donges. They will be admitted and marked as exhibits.

(Seventeen blue prints of counts marked Exhibit R-25.)

20 *Mr. Minard.* I offer the original records taken on the ground by the persons who took the census of the traffic and hold these in readiness for production whenever requested, and also hold ourselves in readiness to produce the persons who took these records whenever required.

Commissioner Donges. Have this witness identify these as the originals.

Q Do you know anything about these original records?

A I know they are original records.

Q Did you prepare those forms from them?

A I prepared some of them and some were prepared under my direction.

30 Q Were these forms prepared under your direction?

A Yes, sir.

Q Was or was not all this traffic record taken under your supervision for this proceeding and didn't you look after this personally?

A Yes.

Q During all the time they took the traffic record?

A Yes, sir.

40 *Commissioner Donges.* It had better be marked for identification; there is no objection to mark-

Robert Hoppen, Jr., direct.

ing the originals as exhibits, they better be marked for identification.

Mr. Minard. We don't want to put them in this record unless it is necessary.

Commissioner Donges. Mark them for identification.

(Same are marked R-26, for identification.)

Commissioner Donges. Are there any questions about the census? 10

Mr. Merrey. No.

Q Did you make a series of view maps?

A Yes, sir.

Q You have before you Mr. Hoppen a series of maps; what do they represent, in a general way?

A They represent the views taken at the center of the street and the center of the sidewalks looking both ways up and down the railroad.

Q At the various crossings in this proceeding? 20

A The various crossings in this proceeding.

Q How are these maps distinguished one from another?

A They have the letter A in a circle or ought to have a letter which designates the crossing as well as the name of the crossing.

Q How did you get that map?

A This map was traced from the city engineer's map.

Q In other words you traced the map produced by the city in this case? 30

A Yes, sir.

Q And used those as a basis for your view map?

A Yes, sir.

Q You used the similar letters designating the different streets they used?

A Yes, sir.

Q That conforms to that the same as your census of travel conforms?

A Yes, sir. 40

Robert Hoppen, Jr., direct.

Q Is there a schedule on this map?

A Yes, sir.

Q What does that schedule show, or table; explain all the details?

10 A The table shows the point at which the view was taken and the direction in which the person was looking taking the view and the length or distance away from the center of the crossing of that view either up or down the railroad.

Q It also shows the distances to the points of view?

A Yes, sir.

Q The length of view. On that map the word "clear" appears somewhere?

A Down at the bottom of the table indicates what the word "clear" means. We designate as one thousand feet or over indicates clear.

20 Q Anything above one thousand feet?

A Yes, sir, anything above one thousand feet.

Q Any place clear is used it is explained by a little note on the map?

A On the map, yes, sir.

Q I see here three lines of dots; what does that represent?

30 A The one in the center of the street represents where the person stood making the observation. The one in the center of the sidewalk on the east side and the center of the sidewalk on the west side.

Q So that each map shows the view on each sidewalk as well as the center of the street?

A Yes, sir.

Q And the little mark leading from these dots indicates the range of vision in the direction of the view?

A Yes.

Q The little dots indicate what? The row of little dots?

40 A Indicates the distance.

Robert Hoppen, Jr., direct.

Q No. These little dots signify a particular thing, do they not?

A Yes.

Q What do they signify?

A They signify the view; that is, a person standing at the station.

Q What do the larger dots signify?

A The larger dots signify where the photographs were taken. 10

Q That appears on the map?

A Yes, there is the table.

Q Here is a legend down here explaining the different dots and marks?

A Yes.

Q Each one of the large white marks or dots indicate the position of the camera when taking the view?

A Yes, sir. 20

Q On this map does there appear a schedule of the views taken at each of the crossings?

A Yes, sir.

Q What does the schedule show?

A The schedule for the photographs?

Q Yes, on each map.

A It shows the number of photograph—

Q Just wait. That corresponds to the number opposite the dot on the street?

A Yes. 30

Q The next column shows what?

A The direction of the view; the direction in which the camera was pointed.

Q The direction of the view speaking in railroad terms, not the points of the compass?

A Speaking in railroad terms.

Q The third column indicates—

A The distance from the nearest rail to the camera.

Q The fourth column? 40

Robert Huggan, Jr., direct.

A The fourth column the distance. The third distance column is the distance from the center of the crossing. The fourth column is the distance from the near rail.

Q The center of the crossing is indicated by a circle?

A Yes, by a circle.

10 *Commissioner Donges.* Do you mean the center of the crossing exactly, or a point in the middle of the track?

Witness. The center of the two operating tracks.

Q The other figures indicate the distance from the camera to the nearest operating rail?

A The nearest operating rail, yes, sir.

20 Q Taking the same list of maps the same is true of the tables and schedules?

A Yes.

Q You have a map for each one of the crossings?

A Yes, sir.

Q Just as the city offered them?

A Yes.

Q From A to M, inclusive?

A To N, River street.

Q Those views are correct and the distances are correctly designated on those maps, are they?

A Yes.

30 *Mr. Minard.* I offer them in evidence.

Commissioner Donges. No objection, Mr. Gourley?

Mr. Gourley. No.

Mr. McCreary. No.

Commissioner Donges. They will be admitted and marked as exhibits.

(" " N " " R-40.)

10

Mr. Merry. No questions.

J. E. BAILEY, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q Mr. Bailey, where do you live?

A Midvale, New Jersey.

Q What is your occupation?

A Photographer for the Erie Railroad.

Q How long have you been photographer?

A Since 1902, for the Erie.

Q Did you take a list of photographs at Paterson in connection with this case?

A Yes, sir.

Q Did you take it in collaboration with Mr. Hoppen and the view maps?

A Yes, sir.

Q Do you know whether the points marked on these maps in large round dots you have heard testified to indicate the points of your camera in the views?

A I don't know about the maps.

Q In each case your camera was set up in position was the position fixed by Mr. Hoppen and his men?

A Yes.

Q I show you seventeen envelopes containing pictures; what pictures are they?

40

J. E. Bailey, direct.

A Pictures of the crossings in the city of Paterson.

Q On each of the envelopes is the name of the crossing on which the picture was taken?

A Yes, sir.

Q Each photograph contains some printed matter at the bottom; can you tell us what it is?

10 A Yes. First the print, Paterson, N. J., the name of street below it. Then comes the number of the photograph, next the number of same, north or south indicated by a letter N or S; then the direction in which the camera was looking by the letter E or W, and the date.

Q Then N-E in this case means your camera was located on the north side of the track and you were looking in an easterly direction?

A Yes, sir.

20 Q According to railroad terms?

A Yes, sir.

Q Any photographs where the letters are S-W, for instance, that means that your camera was on the south side of the track and pointed in a westerly direction, would it not?

A Yes, sir.

Q This explanation applies to all the pictures?

A Yes, sir.

30 Q (*By Mr. Merrey.*) West is toward Buffalo and east toward Jersey City?

A Yes, sir.

Q (*By Mr. Minard.*) These pictures are in groups of each street or numbered consecutively throughout?

A Each street separately.

Q So we have Fair street, 1 to 10, inclusive?

A I believe so, yes.

Q Each of the other streets you have one to whatever number you take?

A Yes, sir; each street is numbered separately.

40 Mr. Minard. I offer these in evidence; they speak for themselves, as you might say.

J. E. Bailey, direct.

Commissioner Donges. They will be admitted and marked as exhibits.

Mr. Minard. Mark each envelope; each envelope shows the number of photographs in them.

Commissioner Donges. Mark them one exhibit with the number of pictures in each envelope.

(Same are marked R-41, respectively, as follows:)

19

(A, Madison avenue, 1 to 12 pictures inclusive.)

(B, Straight street, 1 to 14 inclusive.)

(B, Clay street, 1 to 15 inclusive.)

(C, Cedar street, 1 to 11 inclusive.)

(D, Market street, 1 to 13 inclusive.)

(D, Park avenue, 1 to 7 inclusive.)

(E, Ellison street, 1 to 6 inclusive.)

(F, Van Houten street, 1 to 4 inclusive.)

(G, Broadway, 1 to 9 inclusive.)

23

(H, Fair street, 1 to 10 inclusive.)

(I, Hamilton avenue, 1 to 9 inclusive.)

(J, Lafayette street, 1 to 10 inclusive.)

(K, Franklin street, 1 to 9 inclusive.)

(L, Keen street, 1 to 8 inclusive.)

(M, Warren street, 1 to 9 inclusive.)

(N, River street, 1 to 8 inclusive.)

(N, Putnam street, 1 to 8 inclusive.)

Q How high was the lens of your camera from the ground at the time you took the pictures?

30

A Six feet, six inches, in every photograph.

Mr. Merry. No cross examination.

James C. Patterson, direct.

JAMES C. PATTERSON, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q You have produced here two maps which are maps offered by the city of Paterson as alleged proposed elimination schemes?

10 **A** I don't know them to be maps of the city of Paterson.

Mr. Minard. They are; I guess there is no dispute about that.

Commissioner Donges. These are copies of exhibits.

Mr. Minard. Copies of exhibits.

Mr. Merrey. These are maps that the Erie Railroad furnished us.

Mr. Minard. The 1910 map?

20 *Mr. Merrey.* I don't know when it was made.

Mr. Minard. The map you offered in evidence.

Mr. Merrey. As having been furnished us by the Erie Railroad.

Mr. Minard. However you put it. The map was offered by you in evidence which it was alleged was given by some officer of the company to Mr. Muzzy.

Mr. Merrey. Yes.

Mr. Minard. A profile?

30 *Mr. Merrey.* Yes; that map is in evidence and in the custody of the commission.

Mr. Minard. That is a copy.

Commissioner Donges. There is no objection to using that as a copy of the exhibit?

Mr. Merrey. None as a copy.

Q What is your occupation?

A Civil engineer.

Q Are you a graduate of a college?

A Yes.

40 **Q** What college?

James C. Patterson, direct.

A Pennsylvania State College.

Q What experience have you had as a civil engineer?

A I have had about eight years and a half experience.

Q Where?

A I have been with the Pennsylvania Railroad.

Q For how long?

10

A With the Pennsylvania Railroad about fourteen months.

Q In what kind of work?

A Civil engineering work; engaged in the maintenance and way department.

Q Where else?

A I have been with the New York Central Railroad.

Q In what kind of work?

A Designing engineer's office about eight months. 20

Q Where else?

A I have been also with the Big Four Railroad.

Q Where is the Big Four Railroad?

A The Cleveland, Cincinnati, Chicago & St. Louis Railroad.

Q For how long?

A I should say four or five months.

Q In what kind of work?

A Railroad location.

Q Where else?

30

A I was engaged in drainage and levy work in southeastern Missouri.

Q For how long?

A About a year and a half.

Q Was there any other company you worked for?

A The Northern Pacific Railroad Company.

Q What kind of work?

A Resident engineer in charge of construction.

Q Any other company?

A The Chicago, Great Western Railroad.

40

James C. Patterson, direct.

Q In what kind of work?

A In charge of drafting.

Q Where next?

A Next with the Erie Railroad Company.

Q Now you are what?

A Chief draftsman in the Erie Railroad.

10 Q Did you examine this map and profile for the purpose of ascertaining whether it presented a plan for the elimination of the grade crossings?

A I did.

Q Did you find that it was a plan from which the elimination could be made?

A It is not a plan that the practicability of the elimination could be determined.

Q What are the defects of the plan?

A It is not really a plan, it is merely a scheme.

20 Q Did you prepare a memoranda of the defects of these two blue prints as a plan for elimination of the crossings or series of crossings?

A Yes.

Q Will you just read the items of what your memoranda indicates the objections or defects of the plan as a plan?

30 A First, the profile shows a proposed 2% east-bound grade, approximately 2,000 feet long; 500 feet of this grade would be equivalent to 2.14% since it is located on a four degree curve, or what appears to be a four degree curve from the map. As .035 per degree is allowed for the resistance of the curve, .14% which added makes 2.14% which a portion of this grade would be equivalent to.

Q What have you to say about the practicability of that from a railroad proposition?

A I should say the grade was prohibitive.

Q What is the ruling grade now of the New York division?

40 A The ruling grade of the New York division at the present is a little over 1%.

James C. Patterson, direct.

Q When you say the ruling grade, what do you mean?

A The ruling grade is the one that limits the tonnage of a division.

Q What limits this division?

A The limits of the New York division are Port Jervis and Jersey City.

Q And the ruling grade is the one which determines the tonnage which trains can carry over the division no matter where the grade is located? 10

A Or between the terminal points; the train might not necessarily go over to the end of the division.

Q That means the greatest grade over any point over that particular area?

A It is necessarily the greatest grade.

Q How do you distinguish that?

A There might be greater grades yet a shorter one and a train would pass over them. 20

Q Then the controlling grade is determined not only by the grade itself, but the length of it?

A Yes, sir.

Q Have you made any estimates of figures showing the difference in tonnage between the controlling grade now of the division and this proposed grade here?

A Merely as a comparison.

Q The type of engine operated over this division is what is called the Erie Class N-1 engine, Mikado type, draw bar pull, 57,543 pounds. Computing from your rate—tons? 30

A No; draw bar pull of 57,543 pounds. Computing from the formula just passed on it appears on a 1% grade the engine could haul 1,814 tons, that is net tons exclusive of the weight of the engine; and 905 net tons on a 2% grade; that is exclusive of the weight of the engine. Or on a two-tenths per cent grade, which is the grade at which the Erie is now reducing to, the engine could haul 5,550 tons net. 40

James C. Patterson, direct.

Q Have you given the percentages now?

A The 905 tons would only be 16.3% of the 5,550 tons.

Q In other words, the tonnage capacity of that engine on the grade proposed on this blue print would only be 16%, or 16.3% of the present capacity of that engine?

10 A No. The present ruling grade is about 1%. The 2% grade would give a tonnage which would be only 49.9%.

Q Do you know whether or not the Erie Railroad is now adopting a standard grade of two-tenths throughout its entire system?

A They are reducing the grade where practicable to two-tenths and three-tenths per cent.

Q Do you know they have gone to thousands, even millions, of dollars expense for the reduction of grade?

20 A I understand they have.

Q To reduce it to two-tenths of one per cent.?

A Yes, two-tenths of one per cent.

Q Throughout a very large portion of its territory two-tenths of one per cent. grade has been established, has it not?

A Yes.

Q And accomplishing that by laying new tracks or making new cuts or new routes, is that not true?

30 A Yes, sir.

Q So that instead of accomplishing a two-tenths of one per cent. grade, which is now in the course of development, that there would be restoring a grade back from 1% to 2% and a fraction?

A Yes.

Q What is the next item you found on the map?

A No profiles of the street is shown.

Q What is the necessity for that?

40 A It is impossible to determine whether the proposed rate of grade shown on streets to be depressed

James C. Patterson, direct.

could be attained, and if so, the beginning and ending. It might be the grade existing at the present time with the street depressed would be very close to the proposed grade. There is no way to show that.

Q The next item?

A Nothing is shown regarding drainage. It is impossible to determine whether the streets to be depressed could be properly drained or whether they would be below the grade of the sewers. 10

Q Do you know whether such depression might not be below the water line of the Passaic River?

A There is nothing to show whatever.

Q The next item?

A Nothing is shown in regard to taking care of the spurs or sidings to industries that would be affected by changes in grade; it might be necessary to abandon some.

Q The next item?

20

A Nothing is shown in regard to details or type of construction. It is impossible to estimate the cost.

Q The next item?

A It is impossible to determine the damage to property from the data furnished on the plan. The damages might be so large as to render the scheme prohibitive.

Mr. Merrey. This was not offered to show a complete plan. It was never claimed it was a complete plan. It was simply offered to show the matter was considered by the railroad company and that they had gone far enough to make sketches. We don't say now it is a complete plan of the elimination of crossings; we never claimed that. 30

Commissioner Donges. Now this witness is pointing out what, in his judgment are the defects of that plan, or rather, the respect in which that plan fails of being a complete plan.

Mr. Merrey. He is negating something we have not confirmed. 40

James C. Patterson, direct.

Commissioner Donges. He is pointing out what is necessary in addition to this to deal with the situation fully.

Q The next item?

A It being the only plan presented, or only sketch, there is no comparison with other schemes, for that reason no assurance that scheme is the best, either as
10 regards cost or convenience to traffic.

Q The next item?

A The clearance of the subways is not shown in every case. It is impossible to determine whether they are adequate or whether sufficient depth has been allowed for the overhead structure to carry the tracks.

Q The next item?

A No ground line is shown on profile of Erie tracks. It is impossible to determine whether the tracks are in a cut or fill and whether overhead cross-
20 ings might be advisable in some cases in which subways are shown, or where it is overhead there is no information furnished on the plan that it might not be advisable to have it in a cut.

Q Your estimate of the ineffectiveness or inefficiency of this map was based entirely on examination of the map, or also on examination of the ground?

A I had nothing further than the map. I know nothing about the situation except what I have seen on the map.

30 Q Then your criticism is from the viewpoint of a person receiving these maps for the purpose of carrying out some scheme which they purport to show?

A Yes, sir.

Q Do you know anything about engineering conditions of 1910 and now as far as the cost of construction work and that sort of thing?

A I know that construction is higher probably than then.

40 Q Do you know what percentage higher?

James C. Patterson, cross.

A No, I do not.

Q The general conditions are different?

A The cost of labor is perhaps a little higher.

Q And material?

A Yes, sir, material is perhaps higher.

Cross examination by Mr. Merrey.

Q Did you investigate the files of the company to
find what data and plans were made? 10

A Nothing further than the plan before me.

Q Did you investigate and try to get other data?

A No, sir.

Q Do you know whether the company has in its
possession or not data upon which this plan was
made?

A I do not.

Q You knew it was a plan offered by the Erie Rail-
road, didn't you? 20

A No. I never knew that. I heard a rumor it
was; I never knew it from my own knowledge.

Q Didn't you try to ascertain whether that was
true or not?

A No, sir.

Q You spoke about the grade, the ruling grade
shown; can you tell us the grade of the passen-
ger service from the ferry at Jersey City up over the
hill at the Bergen cut?

A No, I couldn't tell you that grade exactly. 30

Q Is that more than 2%?

A I am sure it is not more than 2%. The main
line of the Erie, as far as I know, has no 2% grade.

Q You are talking of the tracks over which the
freight is hauled?

A Not necessarily.

Q You do not know, you say, what the grade is
from the ferry up over the cut, the Bergen cut?

A No, sir.

Q It is quite steep, is it not? 40

James C. Patterson, cross.

A I don't know.

Q Haven't you ridden over it?

A Yes, sir, I have ridden over it.

Q You haven't any idea as to what that is?

A I know there is a grade there. I have no idea what the per cent. is.

Q Do you know anything about the operation of the road, of the Erie?

10 A Not to any large extent; I am not an operating man; I am an engineer.

Q Do you know whether they carry freight through Paterson?

A I couldn't say as to that.

Q Do you know the great bulk of it is diverted over the Bergen Short Cut?

A No, I don't know that.

Q And that any train of any weight going over the proposed change will be that of passenger service?

20 A No, I don't know that.

Q You haven't made any study of that condition?

A No, sir.

Q Would you say now, taking into consideration the use made of these tracks, whether a 2% grade would interfere with the operation of the road at this point?

A A 2% grade could be prohibitive either for passenger or freight, I should say.

30 Q It would be?

A It could be.

Q It could be?

A Yes.

Q There is not a 2% grade on the road?

A I know of no 2% grade.

Q Do you know of a grade where—

Commissioner Donges. You say you know of no 2% ruling grade?

Witness. Yes, sir.

40 *Commissioner Donges.* How does that differ from a 2% grade?

James C. Patterson, cross.

Witness. A 2% ruling grade is a grade long enough to limit the tonnage hauled by the train.

Q Freight train or passenger train?

A It might be either.

Q You mean to say that a grade that would interfere with a freight train, a long heavy freight train, would interfere with the operation of a light passenger train?

10

A It might or might not. There are a number of elements that might enter into that question.

Q Can you tell me about the grade of the passenger service between the ferry and Paterson?

A No, sir.

Q Do you know what is the ruling grade there?

A I know the ruling grade is about 1% each way.

Q Where is that? Where is the grade you call the ruling grade located?

A I couldn't tell you the exact position.

20

Q You mean the ruling grade is the extreme grade?

A No, I mean the ruling grade. The grade long enough and heavy enough to limit the tonnage that is hauled over the division. That is the greatest grade that limits the tonnage.

Q You know that is about 1%?

A Yes, sir.

Q Whereabouts is that located?

A I couldn't tell you the exact position of the grade.

30

Q You know it is 1%?

A I merely know it from the records in the office.

Q Do you know from the records where that grade is?

A The records show the approximate position of some of the grades. We have a chart that indicates the ruling grade on the division.

Q That chart shows the location of that grade?

A Only approximately.

40

James C. Patterson, cross.

Q My point is; it is near what point?

A The chart approximates the position of those grades.

Q If you know it is about 1% between Patterson and Jersey City, why can't you tell where that point is?

Mr. Minard. He didn't say that.

10 A I can't tell you that, because I haven't the chart from which to check it off.

Q What was your longest experience with any particular road?

A Any particular road?

Q Yes?

A I was four years with the Chicago, Great Western Railroad Company.

Q How long did you say you have been engaged in the railroad business?

20 A About eight and a half years.

Q How many companies have you worked for from that time?

A Worked for six railroad companies.

Q Most of the changes were made at your own initiative?

A Is it necessary to answer that question?

Q Don't answer if you wish.

A Every change was made at my own initiative, my own betterment, too.

30 Q (*By Mr. Minard.*) In your experience with other roads where you were in charge of maintenance and way and resident engineer, do you know what the rules are on those systems with regard to reducing grade?

A Reduction in the grade and increase in tonnage.

Q What is the standard grade adopted or sought, generally?

A The standard grade—that is a question that is a little hard to answer. It depends on the topographi-

40 cal condition of the country.

James C. Patterson, cross.

Q What can you say as to the uniform custom to reduce grades below 1% ruling grade?

A Almost all grades are below 2% where possible.

Q You know, Mr. Patterson, the through trains, the Chicago trains, go through Paterson?

A Why, I have understood they do.

Q You have ridden through on some of them?

A I have been over the line, yes, sir.

10

Q Those trains are heavy trains?

A Yes, they would be, through trains.

Q They stop at the Paterson station, do they not?

A Yes.

Cross examination by Mr. Merrey.

Q Do any of those trains approximate the weight of a freight train, the passenger trains?

A I should say, as a rule they are somewhat lighter, but they operate at a higher speed.

20

Q There are somewhat lighter?

A Yes, sir.

Q What is the weight of the heaviest freight train?

A The weight of our heaviest freight train depends on the ruling grade over which it is handled.

Q Over the ruling grade on the New York division?

A On the New York division?

Q Yes?

A It depends entirely on the weight of the cars. If loaded cars they could haul more tonnage than empty cars.

30

Q When you start out a freight train you put about as much weight as you can move safely, don't you? How much can you put behind one of the largest engines in the way of freight?

A The tonnage depends on whether they are empty or loaded.

Q If loaded; what is the extreme weight?

A Well, what grade?

40

James C. Patterson, cross.

Q On the ruling grade of the New York Division?

A I have already stated 1% is the ruling grade, limiting it to 1,814 tons to the engines of the class I mentioned.

Q N-1 Class I think you said, is it?

A Yes, sir.

Q How much do your express passenger trains weigh?

A I can't tell you that.

Q Does it go over 500 tons?

A I can't tell you that I said.

Commissioner Donges. What is the steepest grade you go up on the railroad right of way on the New York division?

Witness. On the New York division?

Commissioner Donges. Yes?

20 *Witness.* I don't recall any over one and a half per cent. for a very short grade, which of course does not limit the tonnage in any way.

Commissioner Donges. What is the greatest grade, steepest grade, on the New York division?

Witness. I say I don't recall any over one and a half per cent.

Commissioner Donges. Is it short or long?

Witness. The longest grade, I don't recall any over 1.1%.

30 *Commissioner Donges.* So there is no grade on that division in excess of one and a half per cent.?

Witness. Not to my knowledge.

Commissioner Donges. And the short grade exceeding one and a half per cent., would that interfere with the hauling of such loads as are commonly hauled over this road?

Witness. It would depend entirely on the loca-

40 A *tion* of the grade. A short grade at the top of a a little hard steep grade might stop a train and might cal conditionuling grade, but at the foot of a grade

James C. Patterson, cross.

where the train was traveling at a high rate of speed it would probably pass it all right.

Commissioner Donges. So the mere fact of a grade in excess of one and a half per cent. in itself would not prevent the operation of a heavy train?

Witness. No noticeable effect on the train.

Q (*By Mr. Minard.*) That would depend on the length of that train? 10

A Depend on the length and position.

Q Also depend on the rate of speed the train was required to pass in approaching the grade?

A And whether there was a signal on the grade to stop the train.

Q A semaphore?

A Yes.

Q A train approaching a passenger station? 20

A Yes.

Q And a train in the station discharging passengers?

A Yes.

Q And if they struck a two and a half per cent. grade with the semaphore against them and had to stop, there might be trouble starting again?

A Yes.

Q There might be some trouble hauling the train on that grade if you stopped it?

A Yes. 30

Commissioner Donges. Would there likely be?

Witness. Not so likely to be as trouble starting the train once it stopped.

Q In the case of the City of Paterson, if there were rules and regulations limiting the speed of trains through there, it would make a difference about the percentage of the grade?

A Yes, sir.

Mr. Minard. I have been trying to gather the siding agreements, Paterson sidings; there are 40

James C. Patterson, cross.

10 fifteen some. I have been unable to get them all at this time, but I expect to be able to get them by the time we close the testimony. I have here a bundle of them, most of which are original, the remainder are true copies, which I have obtained from the secretary's office and bear his notation, a true copy, with the secretary's initials or signature to that effect. I don't suppose Mr. Merrey will object to these documents?

Mr. Merrey. What are they?

Mr. Minard. Agreements with siding owners.

Mr. Merrey. We don't object to putting them in.

Commissioner Donges. Mr. Gourley?

Mr. Gourley. We want them in.

20 *Mr. Minard.* The gentlemen I have brought in from the division engineer's office who negotiated these agreements and keeps them there.

The first agreement I have is the agreement with the Weidmann Silk Dyeing Company.

Commissioner Donges. Between the Erie Railroad—

Mr. Minard. Between the Erie Railroad and the Weidmann Silk Dyeing Company, the twelfth of July, 1911. They will show in themselves how many sidings they cover and the length of the sidings. I would like to offer them.

30 *Commissioner Donges.* They will be admitted and marked.

(Same is marked Exhibit R-42.)

Mr. Minard. The next one is between the Erie Railroad Company and David G. Rogers Company, dated the twentieth day of October.

Mr. Merrey. The original copies will be furnished the commission.

Mr. Minard. I will bring the original as if you want them.

40 *Mr. Merrey.* I would like to have you do that.

James C. Patterson, cross.

Mr. Minard. I would make this arrangement; they will be available to any party any time you want them. I will bring them next hearing if you desire.

Mr. Merrey. There is no time at the hearing.

Mr. Minard. Come to my office.

Commissioner Donges. Would it be possible before the next hearing to have copies made and submit them to counsel on the other side? 10

Mr. Minard. Yes.

Commissioner Donges. And produce at the next hearing the originals and have them marked? If at that time counsel desires the originals, it may be done.

Mr. Merrey. If he left copies with the commission, one copy is sufficient.

Commissioner Donges. Mr. Minard is going to furnish you copies before the next hearing. Between now and the next hearing copies will be supplied also, so that any questions may be asked about them and the originals brought here for marking. 20

Mr. Minard. In the view of the development in yesterday's testimony in regard to the opening of the streets, we will have a man in the county register's office and various places make a complete search of that matter and we will be able to furnish certified copies of the record. We couldn't get ready to-day, but next hearing we hope to have the office record of all the streets in Paterson. 30

Commissioner Donges. I understand that concludes all you desire to offer to-day.

Mr. Minard. That testimony about the Ohio flood I am endeavoring to arrange about.

Commissioner Donges. Mr. Gourley, are you prepared to say what your position is in regard to this testimony? 40

James C. Patterson, cross.

Mr. Gourley. I have no objection to the fact that I was not made a party.

Commissioner Donges. You make no objection to it, that you were not made parties originally or given notice originally?

Mr. Gourley. Yes.

10 *Commissioner Donges.* They submit themselves now.

Mr. Gourley. To the same jurisdiction as if they had been present then.

Commissioner Donges. They waive nothing, but raise no question of jurisdiction because of failure to give you notice.

Mr. Gourley. Yes.

20 Adjourned until Thursday, December 11, 1913, at the City Hall, Paterson, and after Thursday, to December 26, 1913, Friday, at the Chancery Chambers, Jersey City, at 10.30 o'clock A. M.

30

40

William McGill, direct.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Paterson, N. J., Thursday, December 11, 1912.

PATERSON GRADE CROSSING ELIMINATION, }
 ERIE RAILROAD, *et al.* }

Before Commissioner Hillery.

For the City of Paterson appears E. F. Merrey, 10
 Esq., and Randall Lewis, Esq.

For the Paterson & Ramapo Railroad and the Paterson & Hudson River Railroad appears W. I. Lewis, Esq.

For the Erie Railroad Company appears Duane E. Minard, Esq.

WILLIAM MCGILL, sworn on behalf of Erie Railroad Company.

Q Please give your name in full? 20

A William McGill.

Q Where do you reside?

A Church and Ellison streets.

Q In the City of Paterson?

A Yes, sir.

Q How long have you lived in Paterson?

A Fifty-seven years; I was born here.

Q Where did your father live at the time of his death?

A Until a week or so before he died he lived in 30
 the same house, three hundred and seventeen (317)
 Summer street.

Q In the City of Paterson?

A In the City of Paterson, yes, sir.

Q Did you find among the papers that he left anything relating to the railroad which runs through the City of Paterson to the City of New York, now known as the Erie Railroad?

A I found a time-table left by my grandfather, not by my father. 40

William McGill, direct.

Q Among your father's papers?

A Yes, sir.

Q Will you please produce it for the inspection of the commission?

(Same is produced.)

10 *Mr. Minard.* We will have a photograph taken of that if Mr. McGill will let us, and said photograph will be offered as Exhibit No. R-43.

Q Will you please read the contents of the timetable which you found?

A "Summer arrangement, Paterson and New York Railroad Line from Paterson. Morning at 6½ o'clock by steam, 10¼ o'clock by steam; afternoon, 2½ o'clock by horses, 5¼ o'clock by steam, 6½ o'clock by horses. From New York, morning 5½ o'clock by horses, 8 o'clock by steam, 11½ o'clock by steam. Afternoon, 3 o'clock by horses, 6½ o'clock by steam.
20 On Sundays, from Paterson, 6½ o'clock A. M. by steam, 3½ o'clock P. M. by horses, 5 o'clock P. M. by steam. From New York, 8 o'clock A. M. by steam, 9½ o'clock A. M. by horses and 6½ P. M. by steam. June 15, 1835."

Q Mr. McGill, will you please tell the commission with particularity as to where you found that timetable?

A In an old hair trunk in the garret of our house.

30 Q Had you ever seen it before you took it out of the old hair trunk?

A Never, it was down in the bottom of the trunk.

Mr. Merrey. We will admit that.

Mr. Lewis. You will admit this was a timetable of that road at that time, of the Paterson & Hudson River Railroad at that time?

Mr. Merrey. Yes.

William H. Levi, direct.

WILLIAM H. LEVI, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. W. I. Lewis.

Q Where do you live, Mr. Levi?

A Paterson, N. J.

Q What place?

A 61 Pearl street.

Q How long have you lived in the City of Paterson? 10

A My parents moved here about 1841 and I have lived here ever since, except four years.

Q Where were you during those four years?

A In the service of my country in the war of the Rebellion.

Q Do you remember when you came to Paterson in 1841, whether there was any railroad running at that time from Paterson to New York? 20

A Yes, sir.

Q How old were you when you came to Paterson in 1841?

A About three and a half to four years old.

Q What year were you born in?

A 1837.

Q When you came to Paterson, was there a railroad running from Paterson to New York?

A Yes, sir, as far as I know. I know there was a railroad in Paterson proper. 30

Q When did you first learn where that railroad ran to?

A About 1847 or '48 I went down to New York with my parents.

Q You were then ten or eleven years of age?

A Ten or eleven years of age.

Q Where did you start from?

A We started from Main street depot.

Q Where did the road run to from that point out to the junction, how did it run to the junction? 40

William H. Levi, direct.

A The road started at the depot and before it got to the gate, the fence enclosing the yard, there was an S curve, which started from the depot in this way and curved this way and another curve that way (indicating) and ran direct from the entrance to the yard to the junction.

10 Q How would you describe the location of the junction?

A I don't know it is exactly on the ground where the Lambert Mills stand, but in that locality.

Q That is in the vicinity of Clay street?

A Yes, sir. There was no Clay street there then, in the vicinity of Straight street.

Q In the vicinity of what would be the Straight street crossing now?

A Yes, sir.

20 Q Whereabouts did you start from on that trip to New York?

A Started from the Main street depot.

Q And where was that located?

A Located on Main street and on the corner which is now De Grasse street, but no De Grasse street then; the main entrance to Colt's Garden.

Q Do you recall whether there was any railroad then running from Market street out to New York, to the junction, and then to New York?

A At what time?

30 Q At about the time you are speaking of in the trip to New York?

A No, not when I was ten years old, no road run through there then yet.

Q Do you remember the construction of the Patterson & Ramapo Railroad?

A I remember of its being built.

Q Do you remember having a ride on that railroad to Sufferns?

40 A Yes, sir. When I was a boy, I was going to school then yet, I went up on the locomotive in company of the fireman, up as far as Sufferns.

William H. Levi, direct.

Q Was that before or after your trip to New York with your parents?

A That was a short time after or previous to that, I don't remember which.

Q You cannot tell whether it was before or after?

A After that, I think.

Q But about that time?

A Yes.

Q Before your trip to New York in 1847 or '48, had you been familiar with the railroad as it went from Paterson toward New York?

10

A Yes, sir.

Q Tell us how you became familiar with it?

A It was a common playground in the neighborhood of what we called old Paterson, Cross street, Allen street, Ward street, a great playground for the boys. We used to go there to play after school hours or on Saturday, and the playground was generally on the southwest section of the yard, which would be in the neighborhood of where Slater street goes through, crosses now, and if we would forget ourselves and go out of that section, out of that neighborhood, we would be apt to be chased out of the yard by old Dody Claxton, who was the general yardmaster. If we got thirsty we would go to the railroad spring and get a drink of water.

20

Q Do you remember the building of the station at Market street and the railroad?

30

A I don't remember of its building, but I remember after its being there, after built and being used.

Q What is your earliest recollection of that railroad station?

A Young men, fourteen, fifteen, sixteen years old, a common place to go there and see the train go through.

Q The station at Market street was maintained at the same time that the station on Main street was maintained?

40

Peter Doremus, direct.

A Yes, sir.

Q For how long a period of time?

A The last I remember of using the railroad from the old depot was in 1861 when three hundred of the boys went down to join Sickle's brigade in New York, the fifth of May, 1861.

10 Q When you say you watched the trains go through, where would you be standing?

A We would be walking around on the platform. That station was built of brick, probably eighteen or fifteen feet to twenty feet square.

Q Where did the trains come from then?

A From Sufferns.

Q And go through—

A As a rule—

Q Go through to New York?

20 A I don't know what year the Erie Railroad got possession of the old Paterson & Hudson River Railroad, but previous to that the trains ran to the junction and there the passengers and baggage would be transferred to the Paterson & Hudson River Railroad because the Paterson & Ramapo was a six-foot gauge roadbed and the Paterson & Hudson River is a four-foot eight and a half. That is why the junction was built there, to transfer passengers and freight to the old line.

30 PETER DOREMUS, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. W. I. Lewis.

Q Where do you live, Mr. Doremus?

A 581 East Twenty-fifth street.

Q In the City of Paterson?

A Yes, sir.

Q How long have you lived in the City of Paterson?

40 A Since 1844.

Q How old are you now?

Peter Doremus, direct.

A Past eighty-five.

Q You still attend to business affairs?

A Oh, yes.

Q You are a director of the Second National Bank of Paterson at the present time, are you?

A Yes, and have been for the past fifty years, nearly.

Q When you came to Paterson, do you recall whether there was any railroad here at that time? 10

A Yes, there was the Hudson River Road.

Q And where did that road run from at that time?

A The depot was down near the Court House. They used to run the cars from there up to the corner of Main street with the horses.

Q That is to say, at that time they ran from the site near the Court House with horses down to the corner of Main and Market streets?

A Yes, sir. 20

Q That was then known as Congress Hall?

A Yes.

Q Starting from the Court House in the other direction, where did the road run to?

A It ran down in connection with the Pennsylvania road.

Q At what point?

A I don't know exactly what point it was.

Q Where did it take you to?

A To Jersey City. 30

Q Do you remember the construction of the Paterson & Ramapo Railroad?

A Yes.

Q Where did that road run from?

A It formed the junction with the Hudson River Railroad. Mr. Coult made an exchange of lots on Main street for the lots that were occupied by that road.

Q Where did it run from the junction?

A I don't know just exactly where it was. 40

Peter Doremus, cross.

Q Did it run out towards Sufferns?

A Yes, it ran up to Sufferns, that is, it ran as far as the Jersey line, then it became the Union road from there up to Sufferns to connect with the old Erie.

Q Do you recollect what time that road began to run from Sufferns to the junction?

A No, I think it was about 1849.

10 Q You are not quite precise about that in your recollection?

A I know when it was in building.

Q When was it building?

A It was building from 1847 to '49.

Q You would say then it was running at a time no later than 1850?

A How is that?

Q You would say it was running at a time no later than 1850?

20 A Yes.

Q At the time you first remember that Paterson & Hudson River Railroad running, do you recall what streets the Paterson & Hudson River Railroad crossed in the City of Paterson?

A I don't think it crossed any street.

Q In the City of Paterson?

A In the city. It started from there and went right down and there were no streets laid through.

30 Q At the time the Paterson & Ramapo Railroad started to run, what street did it cross in the City of Paterson?

A It crossed Market street, Broadway and River street.

Q Did it cross any other streets at that time?

A There were no other streets to cross, the only three outlets in the city.

Cross examination by Mr. Merrey.

Q Do you remember when Straight street was laid out?

40 A I don't remember the time. It was laid out in the first place from Broadway just north of Broad-

Peter Doremus, cross.

way some three hundred feet or four hundred feet through to Market street, then afterwards, it was opened from there down to River street.

Q Do you remember when it was opened south from Market street to where it now crosses the Erie Railroad?

A Yes, it must have crossed the Erie Railroad, it must have run down there to connect with the Erie. 10

Q Are you sure Straight street was not laid out before the railroad was laid out on its present right of way?

A I am not sure of it below Market street.

Q You are not sure of the conditions south of Market street?

A No.

Q When you say below Market street you mean south?

A Yes. 20

Q You were not so familiar with that section of the city?

A No, at that time it was all really a wilderness.

Q So it is possible, however, that Straight street or some other street may have been laid out over the railroad?

A Yes, so far as I know.

Q And may have been laid out before the railroad started to operate?

A It might have been, I am not positive about that. 30

Q It is a long time ago and you cannot be sure of your recollection?

A No.

Q There may have been some other streets, so far as you know, laid out to the north crossing what was afterward the Paterson & Ramapo Railroad, besides the three you mentioned?

A I didn't quite get that.

Q May there not have been other streets beside Market street, Broadway and River street that were 40

Peter Doremus, cross.

open before the railroad was laid out, so far as you know?

A I cannot say positively, but I think there was. I think Godwin street was.

Q Was Van Houten street and Ellison street?

A Van Houten street was not opened, Ellison street was opened from Main street out.

10 Q And crossed where the railroad now runs?

A I don't know, it didn't cross there. It was merely opened from Main street to Church.

Q Was it opened from Church to Straight?

A No.

Q It was not?

A No, there was a pond there, the button mill pond, it was called, where Market street is now located.

20 Q How far from Market street did that run?

A How far from Market street?

Mr. Lewis. What, the pond?

Mr. Merrey. Yes.

Q How far from Market street did that button mill pond extend to the north?

A To the north, to Ellison street. That was a pond fed by streams from that section of the city.

Q Did that cross Ellison street, where Ellison street now is?

30 A Yes.

Q Did it go as far as Van Houten street?

A The pond?

Q The pond.

A No, the pond ended at Ellison street, but the water went through Van Houten street and Broadway.

Q Did it run off in a brook?

A The water ran from this pond down to the river, it was called Dark Brook.

40

Peter Doremus, cross.

Q Was that stream of any size, Dark Brook, was it a large stream?

A It was quite a stream at the time.

Q It wasn't necessary to bridge it, not necessary to put a bridge across it?

A They had a temporary bridge across.

Q Where Ellison street now is?

A Yes. 10

Q Did they have one at Van Houten street?

A No, I think not.

Q (*By Mr. W. I. Lewis.*) When you speak of Godwin street crossing the track, Mr. Doremus, as a matter of fact Godwin street doesn't cross the track to-day, does it?

A It goes under. There is no claim there. That has its underground passage at Godwin street. Godwin street is where Katz' brewery is.

Q When you speak of Godwin street going under, 20 is what we call Straight street now going under?

A Yes.

Q Did they use to call that Godwin street?

A Yes. Godwin street runs from—

Q From Bridge street, doesn't it?

A Yes.

Q Up to Agnew's coal yard?

A Yes, and the railroad runs over that.

Q Over what is now Straight street?

A Yes. 30

Q Down by the brewery?

A Yes, down by the brewery.

Mr. Minard. I want this testimony as far as it relates to the Paterson & Hudson River Railroad to be used in the Rutherford case. That was understood before the commission when we arranged for this hearing.

Commissioner Hillery. I understand that to be true. 40

A. L. Sorensen, direct.

SEVENTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS.

Jersey City, N. J., Friday, December 26, 1913.

PATERSON GRADE CROSSING ELIMINATION, }
ERIE RAILROAD COMPANY, *et al.* }

- 10 Before Commissioners Donges, Hillery and Daniels.
F. H. Sommer, Esq., Counsel.
For petitioners appears E. F. Merrey, Esq.
For respondents appear G. S. Hobart, Esq., and
D. E. Minard, Esq.
For various siding owners, etc., appears W. B. Gourley, Esq.

- 20 *Mr. Minard.* Mr. Gourley is here with a large number of siding owners. They, perhaps, should go ahead; they are business men and delay would evidently interfere with them. I would like to put Mr. Sorensen, chief clerk, on to-day, because his duties in New York require his early return. I have also a gentleman here from Cleveland.
Commissioner Donges. If that is agreeable, Mr. Gourley?

Mr. Gourley. Very satisfactory.

A. L. SORENSEN, recalled on behalf of respondent.

- 30 *Direct examination* by Mr. Minard.

Q During one of the previous hearings Commissioner Daniels raised the question of the per ton mile. I have taken the liberty of working that up so his question might be answered. Mr. Sorensen, I hand you a statement; what does this statement show?

- A This statement shows the operating revenues, operating expenses in detail and operating income for the period 1903 to the period 1913, expressed in mills per traffic unit, namely, revenue ton miles plus passenger miles. It shows these various items for years
- 40

A. L. Sorensen, cross.

in mills, 1903, 1910, 1913 and then five years' average, 1903, 1907, and five-year averages, 1908, to 1912, in mills, worked down to operating income.

Q 1903 to 1913, this statement shows that operating income per ton mile, including freight and passenger has been reduced from 2.77 down to 2.03, is that right?

A It is.

10

Mr. Minard. I offer that in evidence.

Commissioner Donges. Is there any objection?

It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-44.)

Cross examination by Mr. Merrey.

Q Will you kindly explain the meaning of this table. I notice in the first place you say that it is revenue ton miles plus passenger miles.

A This is the revenue tons one mile plus the passengers carried one mile; resolving the figures to the one-mile unit basis.

20

Q That means then that the total operating expenses for transporting a ton of freight one mile and the passengers one mile is so much; that is what I understand?

A Yes, sir, as here expressed.

Q Just tell me how you combined those two things?

A We have combined the revenue—taken the revenue tons carried one mile, which is arrived at by taking the revenue tons and multiplying by the total tons carried and passengers carried one mile, and arriving at that on a one mile basis and adding the two together.

30

Q Is there any separation showing the revenue of carrying a ton of freight one mile, separating the revenue received from the passengers carried one mile?

A There is not, no, sir.

Q You have those figures, have you?

A We could arrive at those figures, yes, sir.

40

James Burke, direct.

Mr. Merrey. This table, as I understand, was prepared in answer to a question you propounded.

Commissioner Daniels. It is so stated. I assume I did so ask the question. I think I probably did.

10 *Mr. Minard.* Commissioner Daniels made an inquiry in that room when we had the hearing on figures, the figures per ton mile. The statement went in and we didn't show it. It occurred to us as a good suggestion to show the earnings per unit for one person and a ton mile. It is a concrete clear way of showing the earnings of one to the other and to avoid confusion of millions of dollars.

Mr. Hobart. It is standard; I think it is the same statement made before the Interstate Commerce Commission.

20 *Mr. Minard.* This statement is taken or copied from a statement of Comptroller Crawford before the Interstate Commerce Commission on the five per cent. rate increase.

Witness. It was taken from the testimony.

Mr. Minard. We copied it out after the commissioner made the inquiry about it.

Mr. Merrey. I have no further questions.

30 *Mr. Minard.* I have put the photographs in a convenient book form. This is all the photographs we have offered.

JAMES BURKE, sworn on behalf of respondent.

Direct examination by Mr. Minard.

Q Give your full name and address.

A James Burke.

Q Where do you live?

A Cleveland, Ohio.

Q When did you come here?

A I came here this morning.

40 Q When?

James Burke, direct.

A This morning.

Q What is your business?

A Superintendent of roadways, bridges and buildings.

Q On lines west?

A On the Erie Railroad on lines west of Salamanca, New York.

Q The question of replacement of any damage done by a flood, does that come under your personal supervision? 10

A Yes, sir.

Q Do you have all the reports and data on the subject?

A I do.

Q And from that date have you compiled a statement and presented it here by divisions of the cost of repairing in kind damages to track, roadway, bridges, structures and so forth, also the expense involved in cleaning creeks, channels, track ditches, and so forth, as a result of the flood condition in March and April, 1913? 20

A Yes, sir.

Q That is more conspicuously known as the Dayton flood?

A Yes, sir.

Q Are these statements compiled by yourself from original data and memoranda?

A They are given by divisions by the Division superintendents to my office. 30

Q On their official reports.

A Yes, sir.

Q With which you are familiar?

A Yes.

Q And in the line of your duties in this office?

A Yes, sir.

Q Just read the figures on it.

A Meadville division \$33,787.85.

Mr. Minard. We can save a little time, as everybody has a copy of this memoranda— 40

James Burke, direct.

Q Are these figures correct?

A They are.

Q I notice a note at the bottom: "The above cost does not include loss of gross revenue sustained during the months of March and April as a result of flood conditions, which was very heavy, but difficult to arrive at in figures." Have you any figures of loss of revenue during that time?

10

A I have.

Mr. Merrey. This seems to be a new way of testifying; to come with a statement and hand it to the witness and ask one question about it. I have no particular objection at this time.

Mr. Minard. This has been the practice ever since the case started.

Mr. Merrey. With our sufferance.

Commissioner Donges. The purpose is to save time.

20

Mr. Minard. You can ask any questions you want.

Mr. Merrey. It is immaterial.

Q What figures have you on loss of traffic, and how did you get them?

A It is arrived at by taking the number of trains that were put over the road for the previous twenty days before the flood season came on.

Q Using as a basis the previous twenty days before the flood—it was not anticipated so the traffic wasn't heavier than usual?

30

A No heavier. It was assumed the same as in the flood season.

Q Which is a reasonable assumption in your opinion?

A Yes, sir.

Q What are the figures; can you give the first month for loss of revenue?

40 A In the month of March it was figured \$722,815 loss in earnings.

James Burke, cross.

Q Based on the twenty days previous?

A Yes, sir.

Q What was it in April?

A \$308,736.

Q Have you got that totalled up?

A I have; \$1,247,361.89.

Q That includes the addition of your statement
of physical damages?

10

A Yes, sir.

Q That applies on the road east of Salamanca?

A It does—west of Salamanca.

Q West of Salamanca?

A Yes.

Mr. Minard. I offer that in evidence.

Mr. Merrey. How far is Salamanca from Pat-
erson?

Q Did you ever hear of Paterson?

20

A Yes. It is four hundred and fourteen miles
from Jersey City, and Paterson is something like
eleven or twelve miles I think.

Cross examination by Mr. Merrey.

Q So none of this loss has anything to do with the
division of which Paterson is a part?

A No, sir.

Q You say there was some loss in traffic while this
flood was on?

A Yes, sir.

30

Q Was the traffic augmented after the flood was
over?

A I don't think it was augmented to the extent it
was before, for the reason a great many of the factories
were idle on account of the inability of the railroad
to serve them and so forth.

Q Have you deducted from this table of loss of
traffic the amount the traffic was later augmented from
the fact that the flood was over and the stuff delayed
was being sent over the road?

40

James Burke, re-direct.

A I didn't quite understand the question.

Q I understood from your testimony you say after the flood subsided and the road began to operate you carried a lot of traffic that had been delayed?

A Yes.

Q Have you deducted that from the amount lost during the flood period?

10 A I think that was deducted.

Q Do you know?

A No, I do not know. I am not in the traffic department.

Q This table you gave us was based on something you don't know of?

A It was made from figures that the traffic department had.

Q You don't know whether your road lost that amount of traffic or not?

20 A I couldn't actually swear to it. It is only an estimate.

Re-direct examination by Mr. Minard.

Q Any traffic that was delayed of that nature on account of the flood—wasn't there a large amount of traffic on account of the flood that otherwise would have gone to take its place?

A Yes.

Q Very large?

A Yes.

30 Q And for months after the flood there was large amounts not shipped?

A Yes, sir.

Q I understood this statement specifically states it does not include loss of traffic; that is the amount actually spent on the several divisions?

A Yes.

Mr. Minard. I offer that statement.

Commissioner Donges. It will be admitted and marked.

40

(Same is marked Exhibit R-45.)

H. W. McGrath, direct.

Re-cross examination by Mr. Merrey.

Q Do you know whether the road is in as good condition after these repairs were made as before? Was it not in as good condition as it was before?

A It was in many places.

Q Wasn't it better?

A No, I don't think it was any better.

Q Did you build any stronger bridges where they had been washed away? 10

Mr. Minard. This statement says, "in kind."

Commissioner Donges. Let the witness answer.

A We didn't lose any bridges in that district; the statement don't show any bridges.

Q You had damages to bridges?

A Yes.

Q When they were repaired were they made better than before? 20

A No; made as good.

Q Do you know that?

A I do.

Q When you cleaned out the creek channels, did you make them a little deeper than before the flood?

A No; we didn't go any further than we had to.

H. W. McGRATH, sworn on behalf of respondent.

Direct examination by Mr. Minard.

Q What is your position? 30

A I am engaged in special work in the office of the general manager.

Q Did you undertake to make up an estimate of the amount of damages due to floods in March and April, 1913?

A Yes, sir.

Q On the various divisions?

A Yes, sir.

Q How did you reach that statement?

A I went to each one of the division offices and from their time books and material books and records 40

H. W. McGrath, direct.

of vouchers issued, took the information in figures that is represented in this statement.

Q Then these figures were taken from the original time slips?

A Yes, sir.

Q And vouchers that are in the offices of the company?

10 A Yes, sir; offices of the districts.

Q The figures set forth in this statement are true and accurate?

A Accurate.

Q It does not include any estimate for loss of traffic?

A They do not.

Q Can you explain why it does not?

20 A There were no records available now. These records available are not in such shape or condition and we took the figures we had at the time as absolutely correct.

Q Were any divisions taken east as to that?

A No.

Q What about the Susquehanna division?

A They had figures amounting to \$1700. When I went to go to the very records to find out if they were exact there wasn't enough proof of it.

30 Q In other words, in the divisions mentioned in this statement they did not maintain a twenty-day previous record, anything of that sort to ascertain the loss of traffic?

A No, sir.

Mr. Merrey. He has nothing more than his general observation; as a matter of fact that is all you are testifying to.

Mr. Minard. I offer this statement in evidence.

Commissioner Douges. It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-46.)

40

Recess from 1.10 to 2.10 o'clock P. M.

AFTER RECESS.

Mr. Minard. We set up in our answer a certain number of sidings in that section. That information was taken from our files at the time. Since that time I have given personal attention to it and have gone over the ground personally with our engineer and with the division freight agent and have gone over the result with the local freight agent at Paterson. We find certain conditions. Some of the siding owners mentioned in that list—the sidings are there and enjoyed under an agreement which gives them the benefit and to their heirs and assigns and successors and assigns, so our obligation is the same and theirs is. But there are others where the sidings were built to accommodate one concern and another concern built a plant on adjoining land and we extended that siding; so, while the siding is one siding, yet we have an agreement or understanding with three or four more concerns on the same siding. I thought it better to have that absolutely clear; all these different things clearly explained and the detail about the different sidings and that pointed out, and I have gotten up a statement to that effect, which I find adds considerably to those which we have in the answer. We have sixty-two such concerns which are served by an arrangement which the railroad company is not at liberty to break.

10

20

30

Commissioner Donges. Sixty-two concerns affecting twenty-eight or twenty-nine sidings?

Mr. Minard. Yes; I show this by a letter or legend, which is explained at the end, showing how they are affected. I make this statement so these additional people may have notice—perhaps they ought to have notice before another hearing. I don't know whether the other siding owners will take the rest of the day. This list ought to go up to the secretary, who ought to

40

Discussion.

make notices and give them notice. I can prove this by the freight agent who is here.

Mr. Mervey. This gives the name of the siding?

Mr. Minard. Yes.

Mr. Mervey. It doesn't show from these names of the parties who owns the siding.

10 *Mr. Minard.* That is our record. If you don't like it, prove it. That is our record.

Mr. Mervey. For instance, No. 8, record of Martin Goble, does he own it?

Mr. Minard. Yes, that is our arrangement.

Mr. Mervey. Do you know whether the Erie Railroad owns that and Martin Goble has left?

20 *Mr. Minard.* We don't know anything of that sort. We have an arrangement with Martin Goble to provide a siding on our own land, but the obligation is the same.

Mr. Mervey. Haven't you evicted him from the land for non-payment of rent?

Mr. Minard. I never heard of it.

Mr. Mervey. I did.

Mr. Minard. That is part of your case; take your oath and go ahead.

Mr. Mervey. You are going to swear these are sidings owned by these particular people?

30 *Mr. Minard.* Suppose we let this matter go through the usual method.

Mr. Hobart. We undertake to furnish what perhaps we are not legally required to do, a complete list. We feel in honor bound, not legally bound, to submit what we can.

Mr. Minard. We will have to prove it later. I think the commission should give notice to these other people.

40 *Mr. Mervey.* That is just the trouble. I am not asking you to go to proof. I asked you if

Discussion.

the people named own the sidings; I have my doubts.

Mr. Minard. There is doubt about whatever we prove. We are doing this for him.

Commissioner Donges. You raise the point in your answer?

Mr. Minard. Yes.

Commissioner Donges. Perhaps, if you expect benefit from failure to give notice, or expect your case is affected by the fact that you are called upon to furnish certain service to switch owners, you ought to prove just what the relation is, what your obligations are and how you may be affected. 10

Mr. Minard. We will do it as far as we can. We ask an opportunity to offer acceptable proof on that. I am doing it to the best of our information. If somebody ought not to be there or somebody is left out, Mr. Merrey is at liberty to ask the commission to serve the notice on somebody else. 20

Mr. Merrey. For instance, if the Erie Railroad owned a property which they used to lease to an individual and the name is down there, how will we get that information?

Mr. Minard. You suggest the information?

Mr. Merrey. I suggested this particular case.

Commissioner Donges. If you and Mr. Minard are not agreeable to agreeing that the statements contained in this paper are accurate, then you may call on Mr. Minard for proof and have the right of cross examination. If the proof is in the hands of the railroad company, you may call upon them to produce any agreement or writing they may have. 30

Mr. Merrey. The reason I am making this statement—I don't understand this is in evidence? 40

Discussion.

Commissioner Donges. It is not now in evidence.

10 *Mr. Merrey.* I understood Mr. Minard was offering it to the commission for the purpose of informing the commission of other parties interested, in order that they could serve notice. I am endeavoring, rather than objecting, endeavoring to find out whether the persons concerned are parties who should be notified.

20 *Commissioner Donges.* Mr. Minard's statement, as I understand it, is he here submits a list of persons who appear by the records of the railroad company to have rights in sidings. Mr. Minard suggests, although it hasn't been proved or offered or admitted in evidence, that these parties might be notified before the next hearing, in order to save time, and then proceed with the proof formally in the matter.

Mr. Merrey. This discussion was brought about by the question put to Mr. Minard whether the list was an accurate list. I notice one or two instances in which names are not given accurately and are not the owners of switches. I want to know from him to be sure about it.

30 *Mr. Minard.* It may be necessary to amend a section of the answer to add additional names. I assume there will be no objection to that. It won't change the section, but add additional names for the purpose of the pleading. Another point is, in order that this may be the list which we will prove—we can prove it now—I suggest that it be marked for identification so it can be identified.

Commissioner Donges. It will be so marked.

(Same is marked Exhibit R-47, for identification.)

40 *Mr. Minard.* Mr. Martin spoke to me during

Discussion.

the noon recess. He represents Armour & Company.

Mr. Martin. My attention was called to this a short time ago, but my principal was in Chicago. I have received authority to file an answer with the commission, but the answer is not yet prepared. I would plead an extension of time to have an answer prepared and filed with the commission. 10

Commissioner Donges. How much time do you need?

Mr. Martin. Say Monday.

Mr. Merrey. May I ask, if that be done, that the testimony already taken be admitted?

Commissioner Donges. You consent that the testimony already taken shall be binding on you?

Mr. Merrey. Subject to the right of cross examination. 20

Commissioner Donges. Yes; cross examination and calling back any witnesses you wish to examine. The point is you submit yourself to the jurisdiction of the board and also to be bound by the testimony that has been already taken?

Mr. Martin. Yes.

Commissioner Donges. Very well; upon that understanding you may file your answer.

Mr. Gourley. I file an answer for Fuller's Express Company and the National Silk Dyeing Company. 30

Commissioner Donges. On the same conditions.

Mr. Gourley. On the same conditions.

Mr. Minard. Fuller's Express Company was one of the concerns not in the original answer.

Mr. Merrey. I think the stenographer didn't get Morris & Company's name correct. It is here Nelson Morris Company. 40

Daniel O'Connell, direct.

DANIEL O'CONNELL, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

Q You are president of the McNab & Harlin Company in Paterson?

A Yes, sir.

10 Q What business is your company engaged in?

A The manufacture and sale of brass and iron goods for steam, gas and water requirements.

Q How long has that company been engaged in business in Paterson?

A It has been engaged in business altogether fifty-eight years about.

Q How much of that in Paterson, about, broadly?

20 A I really can't say. I have only been in the company twelve years myself. But I should say they have been in Paterson thirty or forty years, perhaps, altogether.

Q Where is their place of business?

A Their factory is on Straight street and runs through to Railroad avenue. We have what we call the old plant and the new plant.

Q The old plant then—

Mr. Merrey. Pardon me. Railroad avenue wouldn't be right.

Witness. Ramapo avenue.

30 Q What manufactory have you on the south side of Taylor street or Bond street?

A The new plant?

Q No, the old plant?

A The old plant consists of a brass foundry and finishing shop.

Q How many men are employed altogether, about?

A Between six hundred and seven hundred men.

Q You spoke of the new shop; where is the new shop?

40 A After you pass Cedar street, then you come to the Graham brewery, then you come to what we call

Daniel O'Connell, direct.

the National Biscuit Company's property, and then our iron foundry, new plant, follows that. The switch runs the whole length in front of the Graham brewery and the National Biscuit Company's property.

Q And the old plant adjoins the Erie Railroad's property?

A Yes.

Q Isn't there any ground between your property and the railroad property on the south side of the street, of the old plant? 10

A None I know of that doesn't belong—as I understand, our property runs up to the railroad property, but our switch is on our own property.

Q You have a deed to your property?

A Yes; in the safe deposit box in New York.

Q What switch have you connecting your property with the railroad?

A We have a switch that runs from the main line and away out the whole length of the property, both to the old plant and the new plant. 20

Q What do you use the switch for?

A We use the switch facilities, one of the uses, the main one, is to get raw material, pig iron, coal and coke and other raw materials that we want.

Q You use it for outgoing cars?

A Some outgoing cars, but the great volume is incoming freight.

Q The new yard or the new shop, have you switching privileges? 30

A Yes, that is where the switch runs in.

Q The switch continues down?

A Continues down.

Q What is the switch used for on the new plant?

A The same; raw material, coal, coke and pig iron.

Q Have you any idea the number of cars per month you use, or per year?

A I think last year the incoming freight was something over 500. 40

Daniel O'Connell, direct.

Q Last year?

A I think last year I made the calculation. The average was about that.

Q What have you to say, Mr. O'Connell, as to the adaptability of your property in a manufacturing relation to the railroad; what use is the railroad to your property for manufacturing purposes?

10 A We consider the contiguity of the railroad company to our property a very favorable asset.

Q You may state why?

A In connection with switching facilities and for the reason that it makes a short haul to the metropolitan district, which is our great market and brings our material in from the west.

Q How would you take care of that volume of incoming business without the switch?

20 A Well, we would simply have to buy a large trucking outfit and have that large amount carted by horse and wagon from the depot.

Q Where would you have to go to get it?

A Go to one of the Erie freight depots, wherever that might be situated, if this improvement is made. This, of course, we know nothing about.

Q Would that be of materiality in the cost to you in the price of the goods?

30 A It would be a very large sum of money and aside from the inconvenience and delay of it, it would add to the overhead expenses of billing and add to the cost of our product. In close competitive bidding in some pieces of business it would be a very important item. We might lose a lot of business on an overhead of that kind.

Q Have you considered the condition of depression or elevation through there?

A I am not an engineer—I don't know as I am competent to pass judgment in such a matter—from what I have heard.

40 Q Perhaps you may go on.

Daniel O'Connell, direct.

A The sentiment in Paterson—

Q No. Have you any knowledge of your own, how it can be adapted?

Mr. Gourley. Mr. Hobart calls attention to the fact that the plaintiff's case is based entirely on sentiment.

Mr. Minard. I don't know why the witness should be headed off. 10

Commissioner Donges. I don't know as there was any sentiment.

Witness. From my knowledge of the surroundings and without being an engineer, I would say elevating the track, if it has got to be done, it would be preferable to depression as far as our mill is concerned.

Q How would you adapt your mill to that elevation? 20

A I don't know as we could. It looks like a very important and very serious thing to determine just where we are going to be left if the tracks are elevated and what, if any—how any switch can be put there, if a switch is put in, if such a switch can be put in. .

Q Your property abuts on Bond street near the railroad?

A Our entire plant runs along what we consider the railroad tracks and crosses one public street, namely, Cedar street, I think that is what they call it. 30

Q Would elevation of your structure allow—crossing that street at right angles interfere with you?

A I should think it would, absolutely. If you are going to elevate that street, Cedar street, which separates one mill from the other, I can't conceive how you can get a switch from such elevation into the old plant.

Q In making that obstruction, and remembering that your property abuts directly on the railroad, the 40

Daniel O'Connell, cross.

property south of Bond street, would that affect the elevation of the railroad, damage or increase the value of that property?

10 A We would consider it a very serious damage to have any change in this switch, or elevation or depression of the tracks. We haven't seen any detailed map of how it is to be done or what they will put us in; looking over the situation as well as we can, without being an engineer, that is the way it impresses me.

Q That situation will affect your light and air?

A Yes, it would affect our light and air.

Q I mean the plant property, where it crosses the street?

20 A Yes; the light in the main plant would be affected, and I don't know but what the light in the new plant; it would darken up the rooms where the hands are working.

Cross examination by Mr. Merrey.

Q That altogether depends on the height the track is elevated?

A It depends on this contemplated improvement, whatever it is going to be.

Q I understand the bulk of your business with the railroad was receiving raw material, coal and coke?

A Pig iron and coke and all raw material.

30 Q Isn't that much more cheaply handled from a trestle than a ground track? In other words, don't you think it an advantage to you to have an elevated track into your plant so the coal could be dropped through the bottom of the cars into pockets?

A Well, I don't know. Before I should want to answer that question I should want to see a blue print how this is going to be. I don't think that feasible.

Q If it were it would be an advantage?

40 A I don't say it would be an advantage. I couldn't with the data at hand, I couldn't pass on such a subject.

Daniel O'Connell, cross.

Q (*By Mr. Hobart.*) Do you know that your company has an agreement with the railroad company?

A Yes. I intended to bring that along. Mr. Gourley got me out of bed pretty early. It is available to the commission. I will bring it along. We have the correspondence and agreement, whatever it is, with your railroad.

Mr. Hobart. Just so it is understood that 10
that can be offered later.

Mr. Gourley. Yes.

Q (*By Commissioner Daniels.*) Do you incline in any way to offset the advantage you and others derive as citizens as against the loss suffered as a manufacturer by the separation of the thoroughfare from the railroad?

A You ask me my sentiment as a citizen to see the improvement made.

Q Is there any offset? Do you regard it a net 20
loss or is part of that loss compensated by the elimination of the possible danger?

A I'll tell you frankly what I feel about it. I suppose my Paterson friends would think I am trying to throw cold water on it. I have run along those tracks for the past ten years. I really don't see the great necessity, as far as public safety. It seems to me there might be a middle ground by which you could still maintain those crossings by devices and better protection, perhaps. It is a question in my mind 30
whether such an improvement is needed with all the uncertainty about these mill owners and switches. As a general proposition I am very much in favor of improvements that make life and property safer. Do I answer your question?

Q Yes. I wanted to know if you had weighed the two things?

A Yes, I have, thoroughly. I don't know what the record is for the last ten years, the element of public safety as shown on the tables, I don't know about 40

Daniel O'Connell, cross.

that. It doesn't seem to me there should be any serious accidents crossing those crossings in the City of Paterson with any care on the part of the passenger, passerby.

By Mr. Merrey.

Q Where do you live?

A In Passaic.

10 Q What part of the business do you attend to, manufacturing or sales?

A Both. I attend to the manufacturing and I attend to the executive part of the company.

Q Most of your time is spent in the office in New York?

A No. I spend usually three days in the manufacturing department in Paterson and three days in the executive offices in New York.

20 Q How do you travel between Paterson and Passaic?

A On the Erie Railroad; sometimes on the D., L. & W.

Q When you travel on the Erie Railroad you get off at the Market street station?

A In Passaic?

Q In Paterson.

30 A Yes, I get off at the depot, you call the Market street station, and I walk back along the track to the mill. I don't ever go on the street. I walk back on the track.

Q You get off the rear end of the train?

A I get off whatever car I am on and walk back.

Q The rear end would be nearer your plant?

A Yes. It is quite a walk from the depot to our plant along the track.

Q You don't cross the crossings, or any of them?

A Not as a rule, I do not. I walk along the track.

40 Q (By Mr. Hobart.) You are a member of the Board of Trade?

A No, I am not a member of the Board of Trade.

Charles Agnew, direct.

CHARLES AGNEW, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

Q Mr. Agnew, you are president of the John Agnew Company?

A Yes, sir.

Q And you have been in business and your father for a great many years, I think? 10

A Nearly fifty.

Q You occupy what places in Paterson?

A Our coal yard—

Mr. Gourley. It is marked No. 11.

Mr. Minard. There are three.

Witness. We have one yard at Slater street; a switch running from the Erie tracks up Green street, crossing the D., L. & W. tracks.

Mr. Minard. Suppose Mr. Gourley points that out on the map. 20

Witness. Coming from the Erie tracks up Green street to our yard and runs down through the yard to Slater street. Then we have one north of Hamilton avenue.

Commissioner Donges. Crossing Godwin street?

Witness. Crossing Tyler street down to Governor street. I think there is in the neighborhood there of—I should say nine hundred feet of track all told. 30

Q (*By Mr. Gourley.*) In the coal yard?

A In the coal yard, what we call the Ann street yard.

Q From Hamilton avenue down?

A From Hamilton avenue north. Here (indicating.) We have a switch running about one thousand feet down here.

Commissioner Donges. Prince street?

Witness. Prince street. That (indicating) is what we call the Slater yard; parallel to Prince 40

Charles Agnew, direct.

street. Not in the street; it is in our yard, right in the center of the yard.

Commissioner Donges. They are all coal switches?

Witness. Yes, sir.

Q This Prince street is for what purpose?

A Handling mason materials.

10 Q Hamilton avenue is for coal, I think?

A Yes, sir.

Q This immediately adjoins the property of the Erie Railroad?

A Yes.

Q Prince street is some distance off?

A Yes, we are a block from the Erie Railroad tracks.

Q Where does this switch that supplies your Prince street property connect with the Erie Railroad?

20 A Just north of Cedar street.

Q Would that interfere with you in the operation of the Prince street property if that switching privilege was destroyed, taken away?

A Yes; deprive us of that switch altogether?

Q Yes; what is your reason for that particular place? Not Hamilton avenue, just Prince street?

A If you took the switch away?

Q Yes. Would it embarrass you in the cost of materials?

30 A Now, you see we run cars right into the storehouse and unload material, everything from them, like stone and brick, that kind of stuff, into the warehouse. That would necessitate hauling from the railroad.

Q That would seriously add to your overhead cost?

A Yes. It would make the difference on the margin. Those things are handled close; it would cost

40 fifty cents per ton.

Charles Agnew, direct.

Q In handling?

A Handling.

Q Extra handling?

A Yes.

Q Take the yard adjoining the railroad; that is entirely used for coal?

A Yes.

Q The Hamilton avenue yard?

10

A Yes.

Q In depression or elevation of the tracks—there is no doubt depression would seriously interfere?

A If they depressed the tracks it would kill our place altogether.

Q If they elevated?

A On elevation it would depend entirely on what plan they made, whether we could connect with it or not.

Q In other words, if a plan was made that permitted you to dump your cars on a trestle it wouldn't seriously interfere with you? 20

A No; if we could connect with the main track after elevation, such kind of elevation.

Q What way could that be done? Is there any way without interfering with you?

A Yes; if they elevate beyond a certain height it is almost useless; if it were too high we couldn't connect.

Q What about your other property still north of Hamilton avenue; what do you use that for? 30

A At the present time it isn't used at all.

Q It immediately adjoins the railroad track?

A Yes, immediately abutting on the main tracks. I forgot about that switch. My brother and I own it.

Q Have both Fulton street and Hamilton avenue property, or not, additional value because of abutting on the property of the Erie Railroad?

A Yes.

Q They are worth more money?

40

Charles Agnew, cross.

A Yes. Without the tracks there they wouldn't be worth—it is hard to tell—merely nominal.

Q Any plan that would seriously interfere with that would depreciate the value of your property?

A Yes; anything that removes our rights, or in the elevation of the track that causes a large amount of money to develop our property to meet that.

10 Q Have you made a contract with the Erie?

A I suppose we have. That yard has been a yard for nearly fifty years and I really have forgotten it. I suppose there is an old arrangement, we have some contract somewhere?

Q You feel as though you were actually running the railroad itself.

A We kind of work together as agreeably as we can along those lines.

Q Will you look for the agreement if you have it?

20 A Yes, I will.

Cross examination by Mr. Mervey.

Q Your Prince street property is connected by a switch which runs through Green street?

A Yes.

Q That is at grade at Green street?

A Yes.

Q Also crosses Railroad avenue at grade?

A Yes. That is at grade all through, all the way through.

30 Q Do you own that switch or does the Erie Railroad?

A That switch is ours.

Q For how many years were you given permission to keep that switch in the street?

A There was no definite period; we were given the right to lay the switch.

Q You are not organized as a railroad company?

A No, sir.

40 Q You don't know whether any change of plan would necessitate the removal of that or not?

Charles Agnew, cross.

A If it was either depressed or elevated it would necessitate the removal of that switch. It would leave it useless to keep. They couldn't, of course, elevate through the street, nor they couldn't depress through the street.

Q If they do elevate through the street it would be useful to you?

A No. In that class of material we couldn't handle it elevated. They would have to elevate through the yard or we couldn't handle that class of material. 10

Q You haven't any copy of the order of the Board of Aldermen giving you the right to maintain your tracks through the street?

A Pardon me?

Q Have you any order of the Board of Aldermen to maintain that switch through the street?

A No, we haven't any order, but we got permission from the Board of Aldermen to place the switch there. 20

Q You don't know whether it was limited or not?

A It wasn't limited.

Q You haven't a copy of the paper to show what it was?

A No. The permission was put in a general way, without time, giving us the right to put the switch there.

Q How long ago was it given to you? 30

A I should say twenty years ago. Our switch is parallel to the D., L. & W. tracks. We own half the block and the D., L. & W. owns the other half. Their freight yard adjoins our yard.

Q You could get service over the D., L. & W. at that point?

A Not service from this switch.

Q If you hadn't any connection you could get service from the Delaware, Lackawanna & Western?

A No; no more than we could from the Erie; go to their yard and cart it. 40

Charles Agnew, cross.

Q Is there a siding there you could use for conveying material?

A No, sir; not without carting. We would have to cart the material from the D., L. & W. yard.

Q What material do you stock in that yard?

A Lime, cement, lath, loose stone, brick, all kinds of drain pipe.

10 Q Have you a large storage capacity?

A Yes; we have a yard I suppose, I think, eighteen city lots.

Q It is practical to stock all your wagons direct from the cars?

A No, sir. We have got to keep a large amount of material in stock.

Q You don't know whether elevation of the tracks would injure your Ann street yard or not, or your Hamilton street yard?

20 A Yes; it begins at Hamilton avenue and ends at Governor street.

Q That includes three switches?

A Three switches in the yard; two frogs from the main tracks.

Q You have an extension to some other property you and your brother own?

A Yes; running about two hundred feet from the main track.

Q That runs separately?

30 A That is north of Governor on Fulton street.

Mr. Merrey. Will you file an answer for Mr. Agnew and his brother?

Mr. Gourley. I will do it if you want.

Mr. Merrey. John P.

Witness. Yes.

Q Do you know whether this property on Hamilton avenue or Ann street would be injured by elevation of the tracks?

40 A I couldn't say that until I see the plan.

Charles Agnew, cross.

Q You already have a trestle and pockets?

A We have a trestle; no pockets.

Q You receive coal from the bottom of the cars, it drops into heaps and you shovel it on the wagon?

A Yes; from a trestle.

Q The height of that trestle at that point isn't sufficient to allow you to use pockets?

A Yes; we could use them.

10

Q It is not convenient for you?

A Yes, we could use them.

Q If you had twelve or fourteen feet more you could use it more conveniently?

A No; that would be too high to drop the coal; anthracite coal.

Q Break the coal?

A Yes, injure the coal.

Q Are you familiar with the pockets of the Delaware, Lackawanna & Western shed?

20

A Yes.

Q It is a great deal higher than yours with twelve feet added?

A No.

Q Do you know how high it is?

A No.

Q Do you know what the drop is?

A They have it ten feet from the ground before the pocket comes.

Q So you can load it from the pockets into wagons?

30

A Yes, sir.

Q You could do that?

A We could but don't. We dump it on the ground and we gain that much storage room.

Q That makes your system of loading more expensive?

A No, I think not; the way we have it arranged it doesn't. We have a conveyer underneath the coal to load it into wagons.

40

A. A. Beekman, direct.

Q You think that it is not more expensive than pockets?

A Pockets are very expensive.

Q You use power to operate the conveyer?

A Yes.

Q What power.

A Steam power.

10 Q That is more expensive than the gravity system where the coal runs out by its own weight from the pockets into the wagons.

A There is an off-set; the additional cost of the pockets and the maintenance, upkeep, is very costly.

Q (*By Mr. Gourley.*) I forgot to ask Mr. Agnew the number of cars in and out per month or year?

A I should say about 3,000.

A. A. BEEKMAN, sworn on behalf of switch owners.

20 *Direct examination by Mr. Gourley.*

Q You represent Morris & Company?

A I do.

Q Who are they?

A A Chicago beef concern, the so-called beef trust.

Q You are in charge of the Paterson branch?

A I am the local manager of that concern.

Q Your place of business in Paterson is where?

A Market street, the Erie depot, north side.

30 Q What kind of a building have you there?

A We are in an old brick building.

Q How long have you been there?

A We have been there twenty-seven years, going on twenty-seven.

Q How do you get your supplies?

A On the Erie Railroad, on our switch.

Q Through box cars?

A In refrigerator cars.

Q Have you a siding there?

40 A Yes.

A. A. Beekman, direct.

Q Is it on the property close to the building?

A Yes; it makes what we call a big switch; they come in and back up to the street on account of not crossing the street.

Q How near is the switch to the building?

A Possibly ten feet.

Q Ten feet from the building?

A Yes; I couldn't say exactly. 10

Q How many cars can you store there at a time?

A Three.

Q How many cars a month do you use coming and going?

A We received about nine—eight to ten cars a week.

Q Do you send any cars out?

A About once a week we load a car and ship it up the road.

Q What value is that to you in handling your business? 20

A It is the only way we could do it. We have a bar that we let down from our box that runs into the car. It comes in refrigerator cars and we have a little vestibule running the length from the box into the car. We put that up and run this beef in that way on the switch.

Q What relation to operating your business would depressing the tracks or elevating them have upon you? 30

A Well, depressing them would put us out of business. We would have to move to some other place.

Commissioner Donges. Why?

Witness. Because there is no way we could get our meat from the track to our place. If it was depressed I don't think we could get a switch. Our building is about thirty-five or forty feet from the main line and there wouldn't be room to put a retaining wall and still get the service in. 40

A. A. Beekman, direct.

Q And elevating would affect you how?

A There is an arrangement comes for dropping—like an elevator. If it was elevated we could get an arrangement to do it. It is slow and more inconvenient. I have never seen one used; it works like an elevator.

Q That would add to the cost of the work?

10 A Yes; it would cost considerable.

Q A great deal more than at the present time?

A A great deal more. It would take a great deal longer to elevate with that service.

Q Are you interested in the Paterson Beef Company?

A We have that. It is Morris & Company; we closed it up. At the present time we are doing all the business from the Market street plant.

Q Morris & Company doesn't own the property?

20 A Morris & Company owns the building and rents the ground from the Erie Railroad.

Q The building and property is Morris & Company's?

A The building and all the equipment is Morris & Company's.

Commissioner Donges. The land is land owned by the Erie Railroad?

Witness. Is leased from the Erie Railroad.

30 Q Have you a copy of the lease?

A No, sir, I have not.

Q Where is that lease?

A I presume it is in Chicago, but I couldn't say.

Q Can you get it for us?

A It is sort of a perpetual lease; I couldn't tell you about it; while at the time you were talking about it—

Q This Paterson Beef Company is situated where?

A Ellison street.

40 Q How far back from where you are?

A. A. Beckman, *direct.*

A One block back. The same switch leads from the main line to ours runs through to the Paterson Beef Company?

Q How does that add to their facilities in handling that material?

A That is, having the switch there?

Q Yes.

A The beef house; it is next to impossible for a beef house to run a business without tracking facilities. There is some places that cart it. You take it out in the air and keep it a few minutes and it takes the bloom off the meat. It is impossible for those people to compete with those having facilities for unloading it. 10

Q I suppose depression of the tracks is out of the question as far as the Paterson Beef Company is concerned?

A There is no method of getting it up. 20

Q How about elevating the tracks?

A That applies the same over there as it does in our other plant.

Q In other words, run a trestle over to this property?

A Yes.

Q On the same level the Erie tracks are elevated?

A Yes.

Q And take it over to the Paterson Beef Company? 30

A That is the only way I understand you can get a switch in there.

Q That is the only way you can see from the point of an operating man?

A Yes.

Q How far is that; how many feet?

A Three hundred or four hundred feet; that is a long block.

A. A. Beckman, cross.

Cross examination by Mr. Merrey.

Q You say that the building is owned by Morris & Company or Nelson Morris?

A Which building?

Q Where you operate.

A Market street?

Q Yes.

10 A Market street is an old round house which the Erie people had and we rebuilt everything inside and built an entirely new loading platform and storage room on the west side.

Q Did I understand you to say Morris & Company owned the building and equipment?

A Morris & Company own Market street?

Q The Paterson Beef Company?

20 A The Paterson Beef Company, Morris & Company own.

Q Not the one on Market street?

A They don't own the shell on Market street, everything else but that.

Q That building isn't occupied entirely by Morris & Company?

A The Erie has a store room upstairs in the rear.

Q How many stories do you occupy?

A It is one and a half stories, you might say. It is the first story and ice on the upper story.

30 Q That is, all in front upstairs is ice?

A Yes.

Q The land where the Paterson Beef Company is is land of the railroad company?

A Yes.

Q You don't know whether the Erie Railroad or the Paterson & Ramapo Railroad Company?

40 A That I couldn't say. I couldn't swear it was owned by the Erie Railroad Company, because it is an offset on the land they own. The Paterson Beef Company sets in a little.

A. A. Beckman, cross.

Q The Paterson Beef Company's interest in that land is subject to this lease?

A All the Erie Railroad Company owns is the shell, just the brick walls. The installation is put there by Morris & Company.

Q You had a fire there a year ago?

A No, sir; this last summer.

Q Did Morris & Company collect any insurance on the building? 10

A On the building?

Q Yes.

A No, sir; not on the outside, framework. They did on the fixtures, such things as that.

Q Do you count the fittings inside as fixtures on part of the building?

A That is built as part of the building.

Q The Erie collected on that?.

A No, Morris & Company collected on that, too. 20

Q (*By Mr. Gourley.*) When you spoke of the lease of Morris & Company it is the lease of the Paterson Beef Company?

A Morris & Company owns both of those.

Q (*By Mr. Merrey.*) This was the Paterson Beef Company. Is that an independent company?

A The Paterson Beef Company is a concern that used to handle Hammond beef from Hammond, Indiana. Then they were bought out by the National. When the Government compelled the National to dis- 30
solve it fell to Morris & Company's share to take over the Paterson Beef Company.

R. J. Stell, direct.

R. J. STELL, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

Q You represent P. S. Van Kirk Company?

A I do.

Q The Diamond Coal Company?

A The Diamond Coal Company and the Olive Oil Soap Company.

10 **Mr. Mervey.** I would ask you, Mr. Gourley, to file an answer for these two.

Mr. Gourley. I think they are in the answer of the Van Kirk Company.

Witness. They are in the same answer.

Mr. Mervey. That switch is through to the Diamond Coal Company?

Witness. No, to our people.

Q What is P. S. Van Kirk Company?

20 **A** General contractors and lumber.

Q Where is their place of business?

A Fulton street, Summer street, Lawrence and Erie Railroad.

Q Where is the Diamond Coal Company?

A At Fulton street and Erie Railroad.

Q Who owns that company?

A The land or the company?

Q The land.

A P. S. Van Kirk.

30 **Q** And the Olive Oil Soap Company?

A P. S. Van Kirk.

Q Does this land abutt on the property of the railroad, adjoin the Erie Railroad?

A Yes.

Q How far does your property abutt the Erie Railroad, how many feet?

A Approximately, I should say, two hundred feet. I am not certain of those figures.

Q How do you get your supplies?

40 **A** By the Erie Railroad.

R. J. Stell, direct.

Q By a switch?

A By a switch.

Q The switch of the Erie Railroad Company is direct to your property?

A Yes.

Q There is no street between?

A It crosses Lawrence street to get there.

Q I mean where your property adjoins? 10

A No.

Q How many cars do you receive?

A About three hundred cars of lumber a year.

Q What about the Diamond Coal Company?

A Five hundred cars a year or six hundred.

Q What about the Olive Oil Soap Company?

A Five hundred cars a year.

Q They are tenants?

A The Olive Oil Soap Company get their cars on the Van Kirk switch? 20

Q They are tenants on the Van Kirk land?

A Yes.

Q The Diamond Coal Company, I suppose, is a coal yard?

A Yes.

Q Is Mr. Van Kirk interested in that?

A He is.

Q Interested in the Olive Oil Soap Company?

A He is.

Q Their yard runs to the Olive Oil Soap Company's? 30

A That simply is an unloading platform on the Van Kirk switch.

Q How many switches have you?

A Two; one for the Diamond Coal Company and one for Van Kirk.

Q How long is that?

A The Van Kirk is approximately 240 feet—I haven't gone over these figures at all. 40

R. J. Stell, direct.

Mr. Minard. We have a copy of the Van Kirk agreement that gives the exact length.

Mr. Gourley. That will do.

Q How would you get your material in your place if there was no switch there?

A It would necessitate carting from the public yard.

10 Q Where is the yard now?

A Market street or right back of the passenger depot—Market street.

Q How far from your place?

A I should say between half and three-quarters of a mile.

Q Would that seriously affect you in carrying on your business?

A Yes, it would.

Q Add to the cost of your products?

20 A Cost of handling.

Q I suppose you haven't figured how much?

A In the neighborhood of one dollar a thousand on lumber; add one dollar a thousand on the lumber straight through.

Q For hauling?

A Yes.

Q Is there any defined margin in the selling price of lumber that a lumber man regards as safe?

A Not that I know of.

30 Q No decided percentage in sales margin recognized in the trade?

A No.

Q That would be a serious impairment of your present prices?

A It would.

Q About depression or elevation of the railroad there so as to affect your property, what have you to say about that?

40 A Inasmuch as the road is somewhat elevated at our switch, depressing from there would be entirely out of the question, from our point of view.

R. J. Stell, direct.

Q What about elevating?

A Elevating would hinder us to a great extent in our yard.

Q Would elevating the tracks or depressing them affect, as far as you know, the value of your property as land?

A It all depends upon how much you elevate them.

Q If you elevated them enough to add to the cost of your material? 10

A You couldn't do that.

Q In other words, you think if the cost of the structure was added to that you would have the same facilities for handling material afterward?

A We would, yes.

Q The cost would only be the cost of the original adaptation to this plan?

A That is all, in our case that is all, putting in the structure. 20

Q Does that apply to the Olive Oil and coal company?

A That applies to those, all of them.

Q How would it be with the lumber company?

A That is the one you are asking me about?

Q Yes; elevating that structure in that way, how would you get the coal down?

A Most of our lumber is unloaded at the cars from a derrick, necessitating a hoisting derrick. Unloading from box cars it would hinder us to some extent, because we would have to shoot the lumber down in piles. It wouldn't materially hurt us. Depression would put our yard out of business; we would have to move somewhere else. 30

Q Your building is up to the street line?

A Yes.

Q Up to the street line?

A Yes.

Q Elevating the track would interfere with you?

A It would not, going in front. 40

R. J. Stett, cross.

Q Elevating near your building would interfere with your light and air?

A I can't see as it would, Mr. Gourley.

Cross examination by Mr. Mervey.

Q Fulton street runs under the railroad right at your place?

A Yes.

10

Q There is quite an elevation from the railroad up to the Van Kirk yard; there is quite a climb to get up to the yard?

A It is about on a level now. You mean from the main tracks into your switch?

Q No; from where Fulton street goes under the railroad up to the entrance of your railroad yard.

A There is a slight grade from the Erie Railroad.

20 Q The Diamond Coal Company lies between the lumber yard and the railroad?

A Yes.

Q The switch going to the lumber yard goes over the coal company's property?

A No; back of the coal company's property. The entire block, whether coal company or soap company, the land is owned by Mr. Van Kirk; the coal company, soap and lumber company lease the land from Mr. Van Kirk.

Q The lumber company leases the land?

30

A Mr. Van Kirk owns the land, yes.

Q Has he owned it long?

A It must be twenty years. It was owned formerly by Mrs. Hope.

Q Do you know about that?

A He owns the land.

Q He owned it for twenty years?

A No; I am mistaken. It is ten years exactly, because we have just wiped the mortgage out on it.

Q You are not sure of that?

40

A Quite positive. The company has been there for twenty years.

Elmer E. Hassan, direct.

Q You know when they made the agreement with the railroad company?

A I can't say as to the date.

Q That is about five or six years ago?

A I couldn't say without seeing the agreement.

Q You don't sell lumber, do you?

A Yes; lots of it.

Q Most of it is used in contracts for buildings? 10

A We sell most of it used in the building part.

Q In your building, don't you have much lumber delivered at the point?

A I haven't taken those cars into consideration when I said three hundred cars a year.

ELMER E. HASSAN, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

20

Q You are president of the Herman Company?

A Yes.

Q Where is your place of business in Paterson?

A Ellison street and the Erie Railroad.

Q What kind of a building do you occupy?

A On one side of the street a three-story brick building, on the opposite side a two-story concrete building.

Q Are both of these properties built close to the line of the Erie Railroad? 30

A Yes, near the line of the Erie Railroad?

Q What space is there between your northerly building, built on the northerly side of Ellison street and the Erie Railroad line?

A About half the distance from the side track.

Q Half the distance from the switch?

A The switch, of the side track, about half the distance.

Q Is the switch on your property and the Erie Railroad Company's? 40

Elmer E. Hassan, direct.

A Half on our property and half on the Erie Railroad's property.

Q How long is the switch?

A I should say one hundred and thirty or one hundred and forty feet.

Q What do you get in over that switch?

A Merchandise, groceries.

10 Q What quantity, how many cars a month?

A I should imagine we get in between three hundred and four hundred cars a year. Probably more; it varies.

Q And going out, do you do any shipping that way?

A Very seldom ship anything. Not over a dozen cars a year.

Q What class of goods do you get in that way?

A A full line of groceries; canned goods.

20 Q How do you get them in from the car to your house?

A From a platform that connects our unloading doors and the door of the freight car.

Q On a level with the door of the car?

A Yes.

Q Room for a vehicle to go in and out?

A Hand trucks, yes, sir.

Q What difference would it make if there was elevation or depression of the tracks there?

30 A Quite considerable.

Q How?

A Necessitate putting in, if you elevated the tracks, we would have to change our inside arrangement and put unloading facilities to deposit goods on the various floors where they are stored. If you lowered the track we would have to put in additional elevator service to get the merchandise to the convenient floors. In other words, we would have to carry the elevators as high as the next story to do that.

40 Q And unload from the next story?

Elmer E. Hassan, cross.

A If the tracks are elevated.

Q How high is that?

A I should say, about sixteen feet.

Q Have you a lease from the Erie?

A I think we have.

Q You haven't it with you?

A I have not.

Mr. Gourley. Have you a copy of that lease? 10

Mr. Minard. I haven't located that.

Witness. I have diligently tried to locate these leases.

Q This building on the northerly side of the street is built up on the line of the property?

A Yes, sir.

Q Suppose the Erie Railroad elevated across this street at right angles, would that interfere with the light and air of your first story?

A Very seriously. 20

Mr. Merrey. No questions.

By Mr. Hobart.

Q Suppose the tracks were elevated to the line of the railroad property, what would you have to do then in order to connect up?

A Go out of business, or else move.

Q Or else change your tracks to correspond?

A Or build along the line of the D., L. & W.

Q (*By Mr. Minard.*) Your concern is a whole-sale grocery house? 30

A Yes, sir.

Cross examination by Mr. Merrey.

Q What did you say would cause you to go out of business?

A If the tracks were left at the line of the property owned by the Erie Railroad.

Q Where is that line?

A Half the distance from the side track, from the westerly wall of our building. 40

Elmer E. Hassan, cross.

Q In answer to Mr. Gourley you said elevation would only require your changing your elevating facilities?

10 A I referred not to the elevation of the railroad proper; the side track is half on the Erie Railroad and half on our property. If it were extended to the line of our property that would necessitate putting our half of the side track out of commission.

Q Couldn't you build that up to the same extent that was elevated?

A I don't know that we could.

Q Why not?

A Pardon me. I am a wholesale grocer, not a builder or engineer. I can't answer that question. I can say we wouldn't do anything with our half of the side track.

20 Q That is all you mean. You couldn't operate unless you elevated your grade as well?

A Not half the side track.

Q If any was elevated you would have to elevate your side track?

A Yes.

Q As long as that was done you wouldn't go out of business?

A I am not prepared to say, because it would add materially to the cost of handling the goods.

Q How tall are your buildings?

30 A Three stories.

Q If you should load into the second story, it would cost more than the first?

A Yes. Increased labor.

Q When you load now you have to bring the stuff to the second and third story?

40 A Not altogether. If you will permit, I will make a suggestion. If we put the loading or unloading facilities on the second floor, we must take part of our storage space away to provide for unloading facilities, whether it is an elevator or whatever device is used

Elmer E. Hassan, cross.

for distribution or handling the merchandise from one floor to the other. Consequently we lose certain valuable storage space which we figure out in square feet. You take a car of goods that goes into a certain section of our warehouse and occupies so much space, and it costs us so much. Whether we figure one month or one year or a day or a week, it costs so much to put it there. If we take away from our valuable storage room for unloading it must necessarily cost more money. 10

Q What you lose on the second floor wouldn't be gained on the first?

A What will we do with our cellar?

Q Use the cellar as you are doing now. If you had to change your loading from the first floor to the second floor you gain in the first floor what you lose in the second for storage space? 20

A Not necessarily.

Q You might.

A For instance, we have got to put that additional loading device in there, which means extending it from the second floor to the third floor and from the second floor to the first floor and then the basement.

Q You already have a device for carrying your stuff from the first floor to the second floor and third floor?

A We have, which is one elevator.

Q All that is stored on the second floor at the present time must first come into the first floor and be elevated and then taken out; and then to take it out you have got to take it to the first floor and deliver it to your customers? 30

A Yes, but—

Q If you unloaded that stuff on the second floor you would only have one operation, taking it down and out; isn't that true?

A We have to distribute it to the various storage places. 40

Elmer E. Hassan, cross.

Q So the thing is as broad as it is long?

A No, I don't quite agree with you.

By Mr. Minard.

Q The fact is, the ground floor of a storage warehouse is used for heavy material like salt, and those things that are very heavy and bulky; you use the ground floor?

10

A No.

Q Where do you put them?

A Cellar. We use a large portion of our first—that is the storage portion of our first floor, for the putting out of orders. We must collect those goods in order to ship them and deliver them to the various clients of the concern. I might further explain we have on our present unloading facilities the heavy articles are deposited from a chute from the car door.

20

Q Where you would have to handle those with an elevator, now you chute them in?

A Yes, sir.

Q Could you chute them in the second story?

A No; not very well; not without putting in a very expensive device.

Q What has been said of elevation of the crossing, applies with a little more force to depression. There you would have to excavate yourself to get a track; if an excavation was made at the Erie property line in case of depression?

30

A Yes.

Q In order to substitute for that situation, only a more expensive situation, in front?

A Yes; it would probably mean the abandonment of the building for our purpose. I am not sure our foundations are built to stand additional excavation underneath to connect.

By Mr. Merrey.

Q That could be reinforced for that purpose?

40

A Possibly that might. I can't answer that question.

James Wilson, Jr., direct.

Q (*By Mr. Gourley.*) That could be torn down and built again?

A Yes; we could tear down the building and rebuild.

JAMES WILSON, Jr., sworn on behalf of siding owners.

Direct examination by Mr. Gourley.

10

Q You are a member of James Wilson & Sons, corporation?

A Yes, sir.

Q Your business in the City of Paterson is that of coal merchant?

A Yes, sir.

Q Your place of business is where?

A Railroad avenue and Slater street, eastward to Dale avenue.

Q You are across the street from the Erie property? 20

A Yes, sir.

Q Railroad avenue is between your property and it?

A Yes.

Q How do you supply your coal yard with coal?

A Our pockets run parallel to the Erie tracks and we operate a conveyer by means of a bridge crossing the street.

Q Do you say conveyer or purveyor? 30

A Conveyer.

Q What size is that?

A It is capable of handling one hundred tons car an hour, about.

Q On the outside it is apparently a frame with wood and runs upward some distance?

A Yes.

Q How high above the level of the Erie tracks?

A About forty-five feet.

Q Straight up?

40

A Yes.

James Wilson, Jr., direct.

Q And then runs straight over to your property?

A Yes, sir.

Q It is a continuous winding arrangement?

10 A Not exactly. It is rather complicated. The coal is unloaded at the side of the public yard, the westerly-most track; what is known by the Erie people as No. 5 track. On the track is the derrick hopper. Through this hopper the coal is dumped and carried by means of a conveyer up and across the street and deposited in the predetermined coal bin on the opposite side of the street.

Commissioner Donges. There is no switch between Railroad avenue and Dale street and between Slater and Grand street?

Witness. No.

Commissioner Donges. That is where your yard is located?

20 *Witness.* Yes.

Commissioner Donges. There is no switch running into your property?

Witness. There is none.

Q How would elevation or depression of the tracks affect your present situation?

A If by elevating the tracks you involve the abandonment of the present public yard through which we are switching, I would say track elevation would absolutely preclude the use of our plant.

30 Q Depression, I suppose—

A Depression would have very much the same effect.

Q Of course, if the yard was maintained there, and only the two main tracks elevated, that wouldn't make any change?

A That would not seriously hamper us; I don't think, at all.

Q Your objection is only in case the whole yard is elevated?

40 A Yes.

James Wilson, Jr., direct.

Q If the whole yard were elevated how would that embarrass you; wouldn't it only be the additional hauling of the coal up?

A I can't conceive of an elevated freight yard being the slightest use to the neighborhood.

Q There wouldn't be any use getting into the yard?

A Yes.

10

Q Assuming it could be done, as far as your conveyer is concerned?

A If they simply raised two or three tracks, we would raise our machinery entirely.

Q It is only in the view that they wouldn't raise that great wide yard, there wouldn't be any occasion for the yard?

A I can't see any occasion for raising the yard. What use would a great yard up in the air be to the public?

20

Commissioner Donges. It wouldn't affect your operation?

Witness. No, it would not.

Q You can't see how they could have a yard under such circumstances?

A Not unless the engineers could elevate the right of way, the main tracks, east and westbound tracks, and leave the present switch service at grade. If they were practical it seems to me everybody's interests would be conserved. The community, because high speed trains would be running on an elevation, not at grade crossing. Switch service can be done at night or at lower speed or with a greater degree of caution, and thus safely. I am not an engineer; it seems to me if some such plan were devised the interests of both the community and the railroad company and the switch owners would be conserved.

30

Q How much money does your conveyer represent?

40

Jacob Meyer, direct.

A I suppose I have invested in the plant about \$60,000.

Q And the coal chutes?

A The pockets and equipment.

Q That, of course, would be useless without the conveyer?

10 A Perfectly useless. It wouldn't be useful in any other purpose whatsoever.

Q And the yard itself, independent of the overhead structure, the yard itself without the connection with the railroad, would that fact increase or decrease the value of your land?

A It would very seriously decrease it.

Mr. Merrey. No questions.

By Mr. Hobart.

Q You are a member of the Board of Trade?

A I am.

20 Q You voted in favor of this proposition some time ago to elevate the tracks?

A No, I did not.

Commissioner Daniels. Was there a vote, a formal vote, by the Board of Trade?

Witness. I don't recall. There was more or less agitation some years ago; I don't know as it ever came to a formal vote.

30 Q As far as you know no formal action was taken by the Board of Trade?

A I believe not.

JACOB MEYER, sworn on behalf of siding owners.

Direct examination by Mr. Gourley.

Q What firm do you represent?

A Meyer & DeVogel.

Q Your place of business is on what street?

A Corner of Franklin and Summer street and the railroad.

40 Q How much property have you there?

Jacob Meyer, direct.

A We have sixty-five feet on Franklin street, one hundred feet on Summer street and one hundred feet on the railroad. The other building don't come in, on Spring street. It comes in at a point; that is about twenty-three feet on the other end and sixty-five feet at one end.

Q What business are you engaged in?

A In the feed business.

10

Q How long have you been engaged in that business?

A We have been in business at least twenty-four years next May, but I lived there about twenty years.

Q Why did you buy the land there?

A We bought it so we could put in an elevator to raise my grain.

Q Was it because of the railroad facilities?

A On the railroad to unload our cars directly into the building.

20

Q Does your property abut on the railroad?

A Yes.

Q No streets between you?

A No, sir; there are two switches there.

Mr. Gourley. Just point it out to the commission on the photograph.

(Witness complies.)

Commissioner Donges. You are now referring to a photograph marked "Paterson, N. J., Lafayette Street, No. 7, 19 feet, S. W. 11-13," are you?

30

Witness. Here is the building.

Commissioner Donges. That is the one you refer to?

Witness. That is the one.

Q Describe that?

A This is the main railroad and there is the switch laid there before we come. They put in another switch for us, to accommodate us alone.

Q Is that in writing, your agreement or lease?

40

Jacob Meyer, direct.

A Yes, sir.

Q You haven't that with you?

A No, sir.

Commissioner Donges. That agreement will be put in later?

Mr. Gourley. I presume you people had a copy.

10 *Witness.* The switch passes around here (indicating). Here it is inside and only runs as far as Franklin street; comes in from back here to our place.

Commissioner Donges. Back here; where is that?

Witness. North end.

Commissioner Donges. From what street?

Witness. From Keen street, but don't touch Keen street.

20 Q What material is that building?

A Brick.

Q How much money have you invested there?

A That building cost \$13,000. I put in \$2,700 in machinery besides.

Q You adapted it to its present situation?

A Yes.

Q Could you use that property for that purpose if the tracks were depressed?

A We could never use it.

30 Q What objection have you to elevating the tracks?

A Our objection is it would throw the building out of shape and cost quite a lot of money to put it in condition.

Q Suppose it was raised and they break through at the second story?

A You couldn't cut in the second story. If the Erie brings the switch to that position then it could be done.

40 Q What about your walls?

Jacob Meyer, direct.

A My walls would have to be broken out on the railroad.

Q Are your walls thick enough above, on the second story?

A Yes.

Q You think you could do that?

A Yes.

Q The line of your wall is how close to the Erie Railroad? 10

A About fourteen inches, a little over a foot, I guess.

Q How thick are your walls on the first story?

A Twenty-four inches, the bottom floor.

Q And above, how thick is your wall?

A It runs to a two-brick on the top.

Q How many?

A Twelve inches.

Q On the second story? 20

A Yes, the most it is eighteen inches on the side.

Q Would that in any way impair the strength of the wall, in case you cut in the wall a place large enough to permit the handling of material?

A I guess it would.

Q Would you say it was the thing to do?

A I don't think so, because the floor would have to be altered to get my supplies in shape to unload in my car.

Q Have you any knowledge of what it would cost, independent of the insecurity of the building, what it would cost to adapt your building to that purpose, if it can be done? 30

A A good \$3,000 or \$4,000.

Q What do you use your first storage for in such cases?

A We have to elevate our stuff from down below, up? Understand we have the first floor level with the car, the floor of the car. We run our oats out of the car into a bin and that elevates it up above, way up on 40

William Kearns, direct.

the top and it is dropped down on the scales, from the scales it is dropped in the granery.

Q Where are the scales?

A The top. The granery is on the second floor. Then it is dropped from the second floor to the cellar and then from the cellar an elevator takes it to the top. Then an elevator at the top takes it to each bin
10 wherever we need it. Then it takes the oats out afterward. Those bins hold eighteen hundred bushels, some hold twelve hundred.

Q That would all have to be changed?

A The bins would have to be changed. We would have to fix it so the oats go to the cellar and work it
up.

Commissioner Donges. You do that anyway?

Witness. We do that from the bottom floor.

Mr. Merrey. No questions.

20

WILLIAM KEARNS, sworn on behalf of siding owners.

Direct examination by Mr. Gourley.

Q You are a member of the National Silk Dyeing Company?

A Yes, sir.

Q I believe that company has some property along the line of the railroad for the purpose of supplying
30 itself coal, what street is your property at?

A Wait street on the east, East Seventh on the west, Bleecker on the north and Woods on the south.

Q Wait street is between your property and the railroad?

A Yes, sir.

Q Why did you buy your property where you did?

A On account of the company's facilities with our coal.

Q Or in consequence of the nearness of the railroad?
40

A Yes.

William Kearns, direct.

Q You have an office across the street?

A Yes.

Q I assume the depression of the tracks would be a serious embarrassment to you?

A It would be useless.

Q But elevating the tracks; you have been in the coal business; how would that affect you?

A That would improve our facilities in regard to the pockets and storage. 10

Q In other words, it wouldn't do you any harm at all?

A Other than the expense.

Q If somebody did it for you?

A We are contemplating putting a store room in there. That was on the grade; that means instead of one story it would be two stories; you would have to elevate to load the wagons, which means an increase in regard to the cost. 20

Q If you had an overhead structure there, would that, other than the cost of erecting it, would the handling of coal be any more expensive?

A It would be less.

Q It would improve things?

A Yes; you would get more storage.

Q That would depend on your right to construct an elevated structure across the street?

A Yes.

Q And being subject to indictment or subject to prosecution by the Board of Aldermen and other things? 30

A Yes.

Mr. Mervey. I have no questions.

William Elliott, Jr., direct.

WILLIAM ELLIOTT, JR., sworn on behalf of siding owners.

Direct examination by Mr. Gourley.

Q You are a member of Leslie Elliott & Company?

A Yes.

Q You are at what street?

A East railroad and Sixth avenue.

10

Mr. Gourley. Leslie Elliott is probably not affected.

Mr. Minard. They are not in the sphere between Madison avenue and Straight street.

Mr. Gourley. No, beyond Madison avenue. The witness is here in answer to a formal notice.

Q What is the character of your business?

A Boiler business.

20 Q In the boiler machinery business you have invested considerable money?

A Yes.

Q How long have you been there?

A Eight years.

Q How many people do you employ?

A Fifty.

Q A switch runs across the street and connects you with the railroad?

A Yes.

Q How many cars a month do you get in?

30 A Five or six.

Q And send out how many?

A I guess four or five.

Q Had the fact of the closeness of the railroad anything to do with your purchase of the property?

A If we couldn't have a switch around there we wouldn't have bought the property.

Q Have you a lease with the Erie Railroad for your switch?

40 A Part of the ground, most all the ground, two-thirds, it runs on land we own. I guess one-third of

William Elliott, Jr., cross.

it is on Erie property itself. We pay for everything we can.

Q Of course, depression of the tracks would be a very serious evil?

A Yes.

Q What about elevation?

A The same thing.

Q Any disturbance about the present conditions would affect you? 10

A Just the same.

Q Add to the cost of handling your material and all that?

A That is it.

Q Would it affect your property for present purposes?

A Yes. I don't suppose the property would be good for what we are using it for.

Cross examination by Mr. Merrey. 20

Q How long have you been in business?

A Eight years.

Q How long have you had the switch?

A Two years. I guess the switch we have had going on two years, a year and a half.

Q Didn't you petition the Board of Public Utility Commissioners to put that switch across the street?

A Yes, about a year and a half ago.

Q Isn't the railroad a little lower than your ground at that point? 30

A I suppose the grade of the street there might be eighteen inches.

Q More than that, isn't it?

A I don't think so.

Q An elevation of six or seven feet would be the same to you, an elevation of the railroad?

A It would be impracticable; you couldn't go across the trolley tracks if that were the elevation. They would have to have the same amount of grade to run the cars. 40

Robert H. Smith, direct.

Q They run now on two or three feet.

A Not on the level.

Q The switch is on the level.

A It drops in 150 feet, maybe eight or ten inches.

Q More than that?

10 A No. You have in mind, right along the railroad there is quite a bank of dirt. We dug through that bank of dirt that was piled up from years of cleaning the railroad and throwing rubbish and old stores; we dug through that. If it is eight or ten inches, that is the most of it is in the whole length.

ROBERT H. SMITH, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

20 Q You are a member of the firm of Samuel Smith & Sons?

A No, I am employed by the firm.

Q Was Samuel Smith your father or grandfather?

A My grandfather.

Q Your place of business is on the westerly side of Railroad avenue and there is a switch connecting your property with the property of the Erie Railroad, running across the street?

A Yes.

30 Q How long has Samuel Smith & Sons been in business there?

A I think we moved up there about 1890.

Q There? You have been in Paterson a long time?

A Yes; since 1884.

Q Your business is what?

A Making boilers.

Q What advantage is this switch for the purposes of your business?

40 A We receive all our raw material and ship practically all our boilers over that switch. Probably

Robert H. Smith, direct.

ninety per cent. of our trade is outside of Paterson; very close to that.

Q And outgoing is what?

A We ship our boilers out.

Q No way to handle them any other way than that?

A No crane for handling there and we couldn't handle them any other way.

10

Q I suppose there are some local shipments?

A The same all the way through.

Q But supplies even for those come over the railroad?

A Yes. If there is any possible way of sending on the railroad, we do it.

Q What advantage would that property be to you without the switch?

A We would have to abandon it for that purpose.

Q I presume you would have no objection if the freight yard were left at grade?

20

A Yes.

Q As long as present conditions were not disturbed?

A With the track elevated at our factory we couldn't load our cars. We load them with a traveling crane; by the time you put ten boilers weighing twenty-five tons, nine or ten feet in diameter, we couldn't lift them more than five or six feet from the ground. Of course, with depression we could not load and unload the cars.

30

Q Have you a lease?

A I couldn't tell you.

Q Will you find out from your uncle and let me know about it?

A Yes.

Q When you are busy how many cars do you get a month?

40

Robert H. Smith, cross.

A Probably three cars a week and turn out three or four a week.

Cross examination by Mr. Merrey.

Q Where is your plant situated?

A Railroad avenue between Center street and Green street.

10 Q Haven't you a place below Slater street?

A No, that is all the property we have, Railroad avenue.

Q Your switch crosses Agnew switch?

A No, I think it doesn't cross any switch. It crosses the street into the yard.

20 *Mr. Gourley.* That takes in all the witnesses I have, except H. H. Post and the Paterson Brewing & Malting Company, who are not here. I would like to have an opportunity, in case you have a moment, to let us have some other day to put them on. There is an answer of Morris & Company who testified; that is not here; I will file that.

Commissioner Donges. We will take an adjournment now and Mr. Gourley will be given a continuance until the next hearing.

30 Adjourned until Friday, January 9, 1914, at the Chancery Chambers, Jersey City, N. J., at 10.30 o'clock A. M.

Discussion.

EIGHTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Jersey City, N. J., Friday, January 9, 1914.

PATERSON GRADE CROSSING ELIMINATION, }
ERIE RAILROAD COMPANY. }

Before Commissioner Ralph W. E. Donges.

For City of Paterson appears E. F. Merrey, Esq.

For Erie Railroad Company appears G. S. Hobart, Esq., and D. E. Minard, Esq.

For siding owners, etc., appears W. B. Gourley, Esq.

10

Mr. Minard. I have ready the amended answer which we arranged at the last hearing, regarding the additional siding people. The rules require the filing of two copies; I assume one of those is for Mr. Merrey.

20

I assume notices have been sent out to all these people since the last hearing, that weren't sent out before.

Commissioner Donges. You have filed an answer.

Mr. Gourley. Some already appear here.

I wish to file an answer for Armour & Company and Morris & Company.

30

Commissioner Donges. They will be filed subject to the same stipulation.

Mr. Gourley. Yes.

Mr. Merrey. I think the commission ordered that notice be sent to those parties.

Commissioner Donges. I think we had no list before.

Mr. Minard. We gave you a list at the last time for that purpose. The commissioner may recall that. I gave a list like this.

40

W. H. Brameld, direct.

I have taken the map and have added these other siding people and indicated their sidings on the map.

Commissioner Donges. You had better formally prove it.

10 *W. H. BRAMELD, re-called on behalf of Erie Railroad.*

Direct examination by Mr. Minard.

Q You are the engineer who prepared this original map showing sidings?

A Yes.

Q The one introduced previously?

A Yes.

20 Q Did you, at my request, locate the sidings of the additional concerns which we have found to have loading or unloading platforms at Paterson on this map and make a list of their names?

A I did.

Q And given them each the number in a circle on the map; included in that number the location of their sidings?

A Yes.

Q This was the same map originally used?

A Yes.

30 Q As the basis?

A Yes.

Q You simply added the names and locations?

A Yes.

Mr. Minard. I would ask that this be marked.

Commissioner Donges. It may be marked.

Mr. Minard. For the record's sake it might be just as well to put the same number as the other map.

Mr. Merrey. I have no objection to that.

William H. Willis, direct.

Commissioner Donges. My thought was to give it the same number designation as the other and mark it A. This may be marked R-23A.

(Same is marked Exhibit R-23A.)

Commissioner Donges. Any cross examination of this witness?

(No response.)

Mr. Minard. I offer now what we promised at the previous hearing, a copy of the petition filed by the City of Paterson originally. 10

Commissioner Donges. It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-47.)

Mr. Minard. There is one other matter I would like to offer. Mr. Willis, our signal engineer, was at the hearing before. His statement he provided at that time showed improvements authorized, but the commission desired not the improvements authorized, but the amount actually expended should be shown. I have that statement revised. He is a man who travels all over our line; it is hard to locate him sometimes. If I may use him now I should like to do so. 20

Mr. Gourley. No objection.

WILLIAM H. WILLIS, re-called on behalf of Erie Railroad. 30

Direct examination by Mr. Minard.

Q You remember the hearing the last time; did you prepare a statement along the lines suggested at that time?

Mr. Merrey. What was that about?

Mr. Minard. This shows an expenditure for interlocking and automatic signals.

Mr. Merrey. Well, my objection is, of course, noted. 40

William H. Willis, direct.

Commissioner Donges. It is entitled statement of signal and interlocking expenditures. Was that compiled by you or under your supervision?

Witness. Compiled by my chief clerk under my direction.

Q Has that been corrected?

A It is corrected by lead pencil.

10 Q Those corrections in pencil are the actual figures?

A Yes, sir.

Q I understand that was made necessary by contemplated improvements left out, in setting the total.

A It wasn't understood by the chief clerk whether that should be included in the total or not; he didn't include it in there.

20 Q This shows the division on which the work is done in the first column?

A Yes.

Q Then it shows also whether the expenditure was for interlocking signal or automatic?

A Yes.

Q In the second column. The third column shows the expenditure for each at the end of the fiscal year 1911?

A Yes.

30 Q The next column, for the end of the fiscal year 1912?

A Yes.

Q The third column for the fiscal year ending 1913?

A Yes.

Q The next column, the sixth column it will be, shows the expenditure actually made for these proposed ~~sums~~ on June 30, 1912?

A Yes.

40 Q The seventh column shows the contemplated expenditures that are authorized and in the course of construction?

Frank Vance, direct.

A Shows the amount we contemplate spending in order to finish up the work that has been authorized.

Q This work is in the course of construction?

A Yes, sir.

Q And the next column shows the total of interlocking expenditures, is that right?

A Correct.

Q The next column shows the total of the automatic? 10

A Yes.

Q And then your recapitulation of that appears here (indicating); is that right?

A Correct.

Mr. Minard. I offer that statement.

Commissioner Donges. It will be admitted and marked as an exhibit.

(Same is marked Exhibit R-48.) 20

Mr. Merrey. No cross examination.

FRANK VANCE, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

Q You are a representative of Armour & Company, Paterson?

A I am, yes, sir.

Q What is your office?

A Manager. 30

Q What is the nature of your business in Paterson?

A Beef and provisions, specialties.

Q Where is your place of business?

A Hamilton avenue and the Erie Railroad.

Q This is No. 25 on the list. What buildings have you there?

A Just one building; that is the beef and provision house facing on Hamilton avenue. 40

Frank Vance, direct.

Q What is the material of that building?

A Brick.

Q What is the size?

A It is about twenty-five by one hundred and fifty.

Q How many stories?

A Two stories and a basement.

Q Is it all used for your purposes?

10 A Yes.

Q What do you use the first story for?

A The first story is used as a beef and provision cooler.

Q And the second story?

A Ice bunkers and storage rooms.

Q Where do you get your meat from?

A Western points, Chicago, Kansas City, and western points particularly.

20 Q There is no killing done near Paterson?

A No killing there.

Q All your supply is shipped over the road?

A Yes.

Q Over the Erie Railroad?

A Yes.

Q How do you get it from the Erie Railroad to your property?

A A switch runs in there and we simply unload right on the first floor.

30 Q How close is your building to the switch coming in?

A About within three feet.

Q How do you handle your meat?

A Carry it out and have trucks that run right to the car.

Q How do you unload it, what is the process?

A Carry it out.

Q From the car?

A Yes.

40 Q Where do you store it?

Frank Vance, direct.

A Store it on the first floor.

Q How long do you usually keep it in the house?

A From three to four days.

Q Then how do you ship it out?

A Cart it out in trucks.

Q Suppose the tracks of the Erie Railroad were elevated say ten, twelve, fifteen or twenty feet, as the case may be, how would that affect the operation of your plant? 10

A Do away with our unloading altogether from there.

Q What could you do; how could you adapt your building to the new conditions?

A Practically no way we could adapt that building.

Q I suppose you could make it of some use, couldn't you; or not?

A We could; but considering the way we are hooked there with ice refrigeration, if we put in an elevator we would have to change two or three ice bunkers. 20

Q The upper part of your building is adapted entirely to refrigeration purposes?

A Refrigeration, with the exception of the front portion.

Q Couldn't you bring the meat in one part and use the other part for storage?

A No; we couldn't get a switch out to the other part at all. 30

Commissioner Donges. The front part?

Witness. Out to the front part at all.

Q I don't understand that.

A The rear end of the building is all ice, about ten, twelve feet in front they use for storage, on the second floor, with no ice. We couldn't get a switch, it is too far to take it away from the loading platform, and there is no place to load. 40

Frank Vance, direct.

Q What other disability, if any, would there be if you used the upper part for unloading; what is the lower floor for?

A There would be no place to put the beef, because you would have to have the refrigeration on the upper floor.

10 Q If you couldn't adapt it to that new purpose, or the old purpose to the new conditions, how would you get the beef there?

A There is only one way to get it there, cart it from the freight yard. That depreciates the value, outside the cost of hauling.

Q How do you prove that?

A Weather affects fresh beef. The more it is handled the more it depreciates.

20 Q That, I assume, would be a serious matter for you?

A Yes.

Q Do you know anything about the value of the property?

A There?

Q Yes.

A No, I couldn't say.

Commissioner Douglas. Who owns the property, if you know?

Q Do you own it?

20 A Armour & Company, yes, sir.

Q What shipments are made daily or weekly?

A We deliver from four to five cars a week, average about sixteen cars a month, probably about two hundred cars a year.

Q How long does a car remain on your siding from the time it arrives, as a rule, until it is unloaded?

A From one to forty-eight hours.

40 Q It depends on the season?

Frank Vance, cross.

A It depends on the conditions, the goods we have ahead of it.

Q Are these refrigerator cars?

A Refrigerator cars, yes.

Q They do nearly as well in the car as in your—

A Better.

Q Better in the cars?

Cross examination by Mr. Merrey.

10

Q Your building is situated a little above the tracks, is it not?

A How is that?

Q Your building is situated a little above the tracks?

A Back from the tracks.

Q Above the elevation?

A There is a slight elevation.

Q The street rises east and comes toward your building on a slope? 20

Commissioner Donges. Away from the track?

A A trifle, not much; most of it comes below the track.

Commissioner Donges. Where do you take your beef in?

Witness. At the rear end.

Commissioner Donges. To the first floor?

Witness. To the first floor, yes, sir.

30

Q Then what do you do with it?

A Simply distribute it on the tracks there, or it stays on that first floor.

Q When you speak of the refrigeration being on the floor above, that is the ice?

A That is the ice.

Q The cold air is brought down?

A It comes through the cold air chamber each side.

Q The beef doesn't go upstairs at all?

A Doesn't go upstairs at all.

40

Frank Vance, cross.

Q This part, I suppose, is partitioned off, where the beef is stored in front, or is the entire lower floor kept cold?

A Yes, sir, with the exception of the shipping room in front, ten or twelve feet back, maybe fifteen.

Q Is there no way that the beef could be lowered from the elevator about ten feet so you could get it in the rear?

10 A Not without breaking up the ice bunkers on the second floor. We have about two hundred tons of ice stored up there when we have it full.

Q Have you any room in the rear of your building?

A No, sir.

Q That would allow a runway of some kind so you would come on an elevated car to the second floor?

A No, right on the line in the rear.

20 Q No means by which you could drop the meat from a car up in the air down?

A No, not that I know of at the present time.

Q Couldn't you devise some simple means for that purpose?

A It would do away with the refrigeration we have got and then the plant would be no good to us.

Q Is it possible to devise a means without doing away with the refrigeration?

30 A Not without doing away with the ice refrigeration.

Q It is usual for your plants to have ice refrigeration or ice machines?

A We have both.

Q Do you know which is in the majority?

A At the present time, ice.

Q You are gradually doing away with ice?

A In the smaller houses. That sized house we have mostly ice.

Q Have you had some difficulty in getting ice?

40 A No, we haven't witnessed any great difficulty.

Frank Vance, cross.

Q Do you get it from local supply?

A We get ours sometimes from Paterson and sometimes from New York. It is in cars; that has to be unloaded.

Q Could you unload cars if a system of machine refrigeration was put in?

A That would be considerable expense.

Q Could you arrange it?

10

A We could arrange it.

Q You do put in machine refrigeration in various other plants?

A Not of this size.

Q You put it in larger plants?

A Larger plants.

Q Have you considered the question of taking care of the plant there if an elevation was made?

A We haven't as yet, no.

Q If there was an elevation of the tracks above their present level about five feet, would it be possible to arrange it there?

20

A That I couldn't say.

Q Well, could you say it would be possible if it were increased to a height of ten feet?

A Ten feet we couldn't get in there.

Q Well, at eight feet?

A Well, that I couldn't say. Getting up to that height, whether you could get into the first floor.

Q You really are not sure what could be done there?

30

A I know if we had the elevation there spoken of at first we can't get there.

Q Ten feet?

A You spoke of twelve to fourteen feet. That takes you up to the second story.

Commissioner Donges. May I ask how close your property is to the right of way of the railroad?

Witness. About fifteen feet.

40

Frank Vance, cross.

Q How much space have you in the rear of your lot and building?

A No space at all.

Q Your building runs to the rear line?

A Yes.

Q Is there any vacant property back of that?

A There is vacant property there, yes, sir.

10 *Mr. Minard.* I think, Mr. Commissioner, in your question you meant, building?

Commissioner Donges. I meant building. Please read my question.

(Question of Commissioner Donges read.)

Witness. That is what I meant.

Q Your plant is a little out of the business center of the city?

A Yes, sir.

20 *Re-direct examination by Mr. Gourley.*

Q What would it cost to put in a refrigerator plant?

A I am not familiar with that. That is all up to the engineering department.

Q Do you use part of this first story for an office?

A Yes, sir.

Q Do customers from the office go into the refrigerator and select their meat themselves?

A Yes.

30 Q Or do they take what you give them?

A They make a selection, generally.

Q Pick it from the hooks, what you give them?

A Yes.

Q That is used for that purpose.

William M. Decker, direct.

WILLIAM M. DECKER, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

Q What is your business?

A Brewing business.

Q Representing what company?

A The Paterson Brewing & Malting Company. 10

Q There are three different branches of that company in Paterson?

A Yes.

Q What branches are served by the Erie?

A The Katz and Hinchcliffe branch.

Mr. Gourley. The Hinchcliffe is represented by twenty-six on the map.

Mr. Merrey. And the Graham?

Witness. Yes; Graham. I don't know whether that is on the company's property or the Erie's; 20 that I couldn't say.

Q James W. Graham & Company, No. 16, that is also part of your branch at Paterson?

A Yes.

Mr. Gourley. Katz is No. 27?

Q Those three branches are supplied by the Erie Railroad?

A Yes.

Q Where is the Graham property? 30

A By Cedar street.

Q Is that supplied by a switch from the Erie?

A Yes, sir.

Q That crosses a street, Ramapo avenue, that is right?

A No, I don't believe there is any street in between them.

Q It don't appear so on the ground. There is a street there?

A Yes. 40

William M. Decker, direct.

Q The Katz property is where?

A Corner of Straight street and Governor street.

Q Is that property adjoining the Erie Railroad?

A No, a street in between.

Q Has the Katz branch some real estate adjoining the railroad?

A Yes.

10 Q Where is that?

A Corner of Straight and Governor streets.

Q That property abuts on the Erie property?

A Yes.

Q What have you in that ground; how much ground is there?

A I don't know; about one hundred feet or so in length.

Q What do you use it for?

A Unloading purposes.

20 Q How do you connect with the railroad?

A With a switch.

Q What do you get over that road there?

A Brewing material and coal.

Q The Hinchcliffe branch the same?

A Yes.

Commissioner Donges. Do you mean you unload at the same point for Hinchcliffe?

Witness. No, a separate place.

30 Q The Hinchcliffe property abuts on the railroad property too?

A Yes.

Q Both of those branches get their supply over the Erie Railroad?

A Yes.

Q What supplies?

A Brewing supplies, barley, coal, supplies for use in the brewing property.

40 Q How frequent are the shipments to your company, either branch?

William M. Decker, direct.

A Quantities of cars per day or month?

Q Any way.

A Why, I should say, unloading and loading, possibly the two branches, seventy-five to eighty cars a month.

Q Has the Graham branch much to your knowledge?

A They haven't much. I should judge they handle possibly three or four cars a week. 10

Q If the tracks of the Erie Railroad were elevated at that point say ten to fifteen feet, what effect would it have upon this property?

A As far as the property is concerned it would mean—in the first place we couldn't unload there.

Q Why not?

A The only possible way of unloading would be by conveyer, which is an awful big expense, which we had in view previous to this; and it is a question of going to the lower or upper Erie to load or unload. The way we have it now we load on our switch and unload. 20

Q Do you store where you unload or do any carting from there?

A Yes.

Q From the Hinchcliffe branch or the Katz branch?

A They are a little handier than we are.

Q You distinguish between we and they. This is all one company, as far as the law is concerned. Does the Hinchcliffe store where they unload or not? 30

A They store on a platform on the property.

Commissioner Donges. The point of unloading?

Witness. Yes.

Q What change would it make in the Hinchcliffe branch if the tracks were elevated from ten to fifteen feet?

William M. Decker, direct.

A It would be a question of the height. I presume we could get along as far as unloading is concerned; that is, for their coal, we could drop the coal, drop it right down to the platform. As to loading malt and unloading barley, the question of the extra expense is the conveyer and so forth. Now it is shoveled out from the level of the car right there at the plant.

10 Q When you spoke of shipments to your company or shipments out—

A I spoke of the Katz branch. The Hinchcliffe is more receiving, but the Katz is both.

Q There is more malt at the Hinchcliffe house because the malt house is on their property?

A Yes.

Q What shipments do you use from your various branches?

A We ship to Jersey City and Littletown.

20 Q Did you say how many cars a week your three branches would ship?

A I should say possibly five or six a week.

Q How could that be handled if these tracks were elevated?

A It would be a question of loading it into the upper or lower Erie.

Q Could your property be adjusted to the new conditions without that? In other words, could you, in any way, use the property for the elevated service?

30 A It would be a question of height. If it was too high it would be a question of conveying it by hoist; in some way hoisting it to the level of the car. The way it is now it is level with the wagon. We can get the cars loaded and unloaded at the same level as our wagons. Our roadway is on the level.

Q I gather from your evidence there would be the initial cost of the reconstruction of the property to meet the new conditions and the added handling as well?

40 A Yes.

William M. Decker, cross.

Q And make the cost greater. Have you deeds of the property with you?

A Yes.

Mr. Gourley. I offer in evidence deeds of the Hinchcliffe Brewing & Malting Company to the Paterson Brewing & Malting Company, dated the first of July, 1899, recorded in Book U-13 of Deeds of Passaic County, page 483.

10

Commissioner Donges. It will be admitted and marked.

(Same is marked Exhibit 80-1.)

Mr. Gourley. Also deed from the Paterson Consolidated Brewing Company to the Paterson Brewing & Malting Company, bearing date of the first of July, 1899, and recorded in book U-13 of Deeds of Passaic County, page 407, and especially refer to the twelfth tract in the description in that deed.

20

Commissioner Donges. It will be admitted and marked.

(Same is marked Exhibit 80-2.)

Cross examination by Mr. Merrey.

Q You say you know very little about the Graham plant?

A That is, as far as their business is concerned, their daily business. I know where it is situated and so forth, and the condition of it.

30

Q Is that operated now to its capacity?

A As far as I know, yes, sir.

Q The other two plants which you refer to as the Katz branch and the Hinchcliffe plant are very close together?

A They are across the track.

Q One on one side of the track and the other on the other side of the track, is that right, opposite each other?

40

William M. Decker, cross.

A Yes.

Q The Katz plant is separated from the railroad by a street between?

A The brewing plant?

Q Yes.

A Yes.

Q The main Katz brewing plant does not abut on the railroad property at all?

10

A No, sir.

Q But a public and well-traveled city street is between it and the railroad company?

A Yes.

Q And then right opposite the plant is a small triangular plot containing less than one city lot, that you refer to as the place at which they unload?

A Yes.

Q The plot is quite a little above the Straight street level?

20

A Yes.

Q How far a distance from the railroad right of way?

A It abuts on the railroad right of way.

Q The small triangular plot lays between Straight street and the railroad and right opposite the brewing plant?

A Yes, sir.

Q The railroad itself has quite an elevation above Straight street at that point?

30

A Yes, sir.

Q On this little plot there is a switch?

A Yes, sir.

Q And a roadway leading up from Straight street?

A Yes.

Q You unload your coal at that point?

A Yes.

Q How do you unload it? By what means?

A The coal?

40 Q Yes.

William M. Decker, cross.

A By shoveling.

Q You must put men in the cars and shovel it out in the wagons?

A Yes.

Q Then you cross the street with it?

A Yes.

Q Do you know whether, if the tracks were elevated at this point, it would be cheaper for you to build some means of conveyance by which the coal could be taken over by a conveyer? 10

A It wouldn't offset—

Q Do you know?

A Yes.

Q Have you figured that out?

A Yes, I haven't figured it out, but it was figured out for the concern.

Q That is if the track was elevated?

A Not for elevation. 20

Q Do you know whether, if the tracks were elevated, it would be cheaper to handle that coal than it is at present or not? You don't know about it?

A No, I have never figured it.

Q That isn't in your line of business, calculating matters of that kind?

A No, sir.

Q What is your occupation with the company?

A Shipping clerk of Katz' brewery.

Q You ship out from this plot some goods? 30

A Yes.

Q You have already stated what?

A Beer.

Q Have you ever considered, with the elevation of the tracks, that could be taken across the street if permission were given to that property on some sort of elevated structure?

A No, sir.

Q You don't know whether it would add to the cost 40

William M. Decker, cross.

of conducting your business, whether it was elevated or not, with that plan?

A Yes, sir.

Q You haven't figured that out?

A No, sir.

Q You surmise it would?

A No, sir.

10 Q You haven't any figures on which to base that surmise?

A No, sir.

Q The Hinchcliffe plant is located quite a distance below the level of the railroad?

A Yes.

Q How much, would you say?

A Twenty to thirty feet.

Q How do they get their material up to the railroad for the purpose of loading?

20 A They only load malt.

Q How do they load that?

A They have a building that is on the level with the track. In fact, the floor where they load on is practically the same level as the track. That is conveyed through pipes of some kind and conveyed into the cars.

Q Are you familiar with the operation of that?

A I know a little about it, yes, sir.

30 Q You didn't design it or have anything to do with the designing of it?

A No, sir.

Q Do you know whether changes could be made on that if the tracks were raised?

A No, I do not.

Q Do you mean to say the Hinchcliffe plant does not ship barrels or casks?

A They cart them from the depot. They couldn't load them.

Q Why not?

40 A They couldn't without extra expense, putting in

William M. Decker, re-direct.

extra machinery, making changes or alterations to meet the demand; that is, the beer.

Q That is what I mean. They cart that from the freight station?

A No.

Q They don't bring it under the railroad track and on this little plot that belongs to the Katz branch?

A No, sir.

Q What street is that that crosses the railroad at the Hincheliffe plant?

A Crosses the railroad?

Q Goes under?

A Governor street.

Q That is an under crossing street?

A Yes, sir.

Q You state it would be very convenient for the Hincheliffe plant to go under there and unload on this switch you refer to?

A Yes.

Mr. Gourley. If the tracks were left as at present.

Q At the present time with the present conditions your company has a switch on which they can unload this Hincheliffe material if you desire?

A Yes, under present conditions.

Q Instead of doing that you take it to the freight depot?

A They do that, or we do, the same thing.

Re-direct examination by Mr. Gourley.

Q What effect would the depression of the tracks have on that property for the use which they now use it?

A What is that?

Q What effect would depressing the tracks have on that property—suppose they lowered the tracks five or ten or fifteen feet?

A Lowering it?

William M. Decker, re-direct.

Q Lowering the Erie Railroad.

Commissioner Donges. What property?

Mr. Gourley. I take it all. They are both opposite each other, Katz and Hinchcliffe plants.

A I should say, improve the property, make it easier for us.

Q Depressing?

10 A Yes.

Q Depressing it fifteen feet, how would you get your supplies in then?

A That would be better for us; we would still be on the level.

Q The Hinchcliffe or Katz branch?

A Both.

Q Would it be for the Hinchcliffe?

A Better for the Hinchcliffe and for us too.

Q Would it be for the Katz?

20 A Yes.

Q What difference would there be in the grade between the lot which is now on the street and the tracks of the Erie if they were fifteen feet lower than they are now?

A I don't know the height from the street up to our tracks at the present time; I haven't any idea. From the street up to the track we have a driveway from Straight street around to their tracks and on the same street again, but it is up grade.

30 *By Mr. Merrey.*

Q That little triangular plot is not occupied by your switch entirely?

A No, sir.

Q There is a saloon on that corner?

A Yes.

Q Quite a large building?

40 A I don't know, I never measured it. I presume it is a house of the ordinary size, a house of twenty-five feet, facing Straight street.

William M. Decker, re-direct.

Q Are you sure the switch is on your property or the railroad's?

A Katz, Paterson Brewing and Malting Company, that is, the triangular piece of property.

Q But is the switch entirely on that or partly on that and the land of the railroad?

A I am pretty sure it is on the property of the Paterson Brewing and Malting Company.

10

Q How long is the switch?

A The length of four cars, whatever that is. I never measured it. We can put four cars on it without interfering with the main line.

Q Some of that portion that the four cars would rest on would be on the property of the railroad?

A What is that?

Q Some of the switch on which these four cars would be, four cars on this switch at one time—

A Yes.

20

Q —part of that must be on the railroad company's property?

A I don't know just where the line runs.

Q You know the street length of your plot?

~~A About one hundred and twenty feet; that is on~~
Straight street as far as it goes.

Q That includes the house?

A Yes.

Q So you have something less than one hundred feet in the clear?

30

A Yes; that is the difference of the house; I don't know what it is.

Q Four cars couldn't rest on one hundred feet?

A I know we can put four cars on the switch. Whether it interferes with the railroad company's land or not I don't know. It holds four cars, that is the ordinary sized cars.

By Mr. Hobart.

Q In case of depression wouldn't you have to change the switch.

40

William M. Decker, re-direct.

A You mean if they lowered the bed?

Q If the bed of the railroad was lowered?

A We would have to lower the switch.

Q Lower everything, dig a hole in the property, or ditch, to run the tracks?

A Yes.

10 Q What effect would that have on your plant in the unloading of coal?

A If we had the ground fixed with the track, or level with the track, I don't see as it would make any difference.

Q Provided you changed your switch to correspond with the new level?

A Yes.

By Mr. Gourley.

Q How many feet is the railroad above you now?

20 A Above the switch we run now?

Q Yes.

A One foot or two feet. From the Paterson Main Line our switch runs down an incline.

Q Where you usually unload your material, at that point it is how much lower than the bed of the Erie Railroad property?

A I say again about two feet.

30 Q When I put the question, if the Erie tracks were dropped fifteen feet, you said it wouldn't interfere with you, do you mean that, or ten feet?

A I don't know the height of the level of the street to the Erie Railroad. Therefore, I can't actually say.

Commissioner Donges. Do I understand the point at which you do your unloading, that is to say the switch—

Witness. Yes.

Commissioner Donges. —is above the level of the street?

Witness. Yes.

40 *Commissioner Donges.* How much?

William M. Decker, re-direct.

Witness. I don't really know.

Commissioner Donges. But it is below the bed of the Erie Railroad?

Witness. At the lowest point it runs down. It goes from the main line; it is on the level and runs on an incline.

Commissioner Donges. At the extreme end of the switch, away from where it joins with the railroad tracks, it is how much below the roadbed of the Erie Railroad? 10

Witness. At that point I guess it is two feet, three or four feet; I couldn't just tell you; about.

Q When you said it wouldn't interfere with you, you meant if you adjusted your property to it?

A That would depend on how near it was to the grade of the next street.

By Mr. Hobart.

Q How do you unload coal at the present time at the Hinchcliffe plant? 20

A By opening the pockets under the cars and dropping it.

Q Is there a chute leading into the plant?

A There is at present a chute for sending coal right there. I think it is so arranged that you drop it in their boiler room.

Q Then the lowering of the switch to correspond with the lower level of the railroad company, you wouldn't be able to use that system? 30

A That doesn't affect the Hinchcliffe system.

Q Why not?

A Their switch is on the same level as the main line.

By Mr. Gourley.

Q How high is the Hinchcliffe switch

A From the ground?

Q Yes.

A I say about twenty feet. You spoke of the switch, I say that is on the same level. 40

Henry M. Post, direct.

HENRY M. POST, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

Mr. Merrey. What is the number?

Mr. Gourley. Thirty-nine.

Q Mr. Post, you are a coal merchant in the City of Paterson?

10 A Yes.

Q Do you deal in any other supplies?

A Yes, all kinds of mason material.

Q You are a corporation?

A No.

Q You are carrying on business in the name of—

A Henry M. Post, only.

Q Where is your place of business?

A The property is situated on Leon, East Seventh and Wait streets.

20 Q What property have you there?

A I have twelve city lots.

Q Is there a street between your property and the Erie Railroad?

A Yes.

Q What street?

A Wait street.

Q How are supplies brought to your yard?

30 A After the switch leaves the Erie switch it comes in a semi-circle until it strikes my property, then it goes in my property—

Q The switch crosses the street?

A Crosses the street.

Q That switch runs to your property at grade?

A Yes, at grade. And then has a raise of about four feet running on a trestle.

Q What do you do with it then?

A We dump our coal under this trestle.

Q Have a drop of how much?

40 A From eight to twelve feet.

Henry M. Post, direct.

Q Have you adapted your property to that purpose?

A Yes; my property is situated from East Seventh to Wait street, there is a raise of about twelve feet. We start in on East Seventh street and come on a level one hundred and eighty feet, giving us a drop for the coal.

Q Suppose that track was depressed five to ten feet; what effect would that have on your property? 10

A It would have a great effect upon our storehouse, where we unload mason materials. The storehouse is now that much above the tracks.

Q That would seriously affect the value of your property?

A Yes, sir.

Q For your purpose?

A It would ruin it entirely for that purpose.

Q Suppose the tracks were elevated five to ten feet? 20

A Just as bad.

Q What would you have to do then?

A Have to dispose of the building, because this is very heavy material and is all handled at grade from the tracks to the building.

Q Suppose the tracks were only elevated five feet, how would you construct a switch across the five-foot grade?

A How do I understand that? 30

Q How would you get your supplies if the tracks were only elevated five feet?

A I don't know as that would harm so much on unloading of material and handling, hurt so much, or coal, five feet. When you talk about ten to fifteen feet, very much.

Q If it was only five feet at that point you would have to have some obstruction at the same grade?

A We would have to do away with these buildings, because the buildings are solid on the ground. This is 40

Henry M. Post, cross.

very heavy material—lime, cement, fire brick, and fire clay, and so the brick is piled out of the cars on the level.

Q What shipments do you get there by the week?

A One car a day, if not more. Sometimes more.

Q Outgoing shipments are by wagon?

A All carted by wagon.

10 Q All wagon?

A Yes.

Q How many wagons have you?

A We keep fourteen horses; that is seventeen wagons.

Q If these changes were made as suggested would your property be as valuable for your purpose as it is now?

Q Why, no. The way it looks to me it would ruin it so I don't know where I would be at.

20 *Cross examination by Mr. Merrey.*

Q Suppose the switch across Wait street, the switching privilege was revoked, what effect would that have on your property?

A I don't know why it should be revoked. The city gave us the privilege to go there.

Q "He that giveth may take away"? Suppose it was taken away, what would you do?

A We don't propose to let them take it away.

30 Q You will answer the question; rather, try to answer the question. What effect would it have on your property?

A We would be very much put out.

Q It would be probably a little more work than if the tracks were elevated or depressed?

A Well, I don't think that will happen, because a lot of others are being put in every day or every year.

40 Q That isn't the question I am asking you. We will not proceed very rapidly if you don't answer the questions. Have you had anybody examine your plant

Henry M. Post, cross.

to find out whether an elevation of ten feet or so of the railroad tracks would injure your property?

A No more than my own examination.

Q Have you got pockets on your property?

A We have got a trestle.

Q You have a trestle and then the coal is dropped through the bottom of the cars on the ground?

A Yes.

10

Q You load your wagons by shoveling the coal in the wagons?

A Yes.

Q Do you know whether or not it would be more economical if that trestle was raised ten feet so you could erect pockets and unload your wagons by gravity, letting the coal run out of the wagons?

A At very great cost.

Q Do you know whether, after going to that cost, it would pay in the saving of labor?

20

A I don't feel so, for me at my age.

Q At your age?

A Yes.

Q How about your plant, considered apart from yourself?

A That would be a big expense.

Q We understand that; the question is whether it would be a saving that would pay to going to that expense?

A I don't think it would for me.

30

Q Do you know?

A I feel it would.

Q You haven't examined the question or had any figures on it?

A No, nothing more than my own knowledge in the matter.

Q You know a great many people have pockets of that character?

A I know, at the present time.

40

Henry M. Post, re-direct.

Q They evidently did that because it would save them some money?

A Yes. In my case, how about coming across the street?

Q You would have to come across elevated.

A That would be a very big expense then.

Q You don't know whether the saving in labor and expense on your present situation would compensate you for that or not?

A I don't know.

Q You don't know?

A I don't feel so.

Re-direct examination by Mr. Gourley.

Q When did you buy your property?

A About twenty-two years ago.

Q Did you buy it for this purpose?

20 A Yes.

Q Did you buy it with the understanding that the city of Paterson granted the privilege to haul coal and merchandise at grade across the street?

A They granted me the privilege. I went to the Board of Aldermen and they granted me that privilege.

Q Is that a common or an uncommon thing to do in Paterson?

A It is a common thing.

30 *By Mr. Hobart.*

Q In case that railroad track was depressed, you would have to depress your switch to correspond with any lowering of the grade, would you not?

A Yes.

Q In order to do that how would you get across the street; dig a hole in the street?

A I would come on the level the street is now.

Q But if you had to lower your switch to correspond with the lower level of the railroad, how would you get across the street?

40

Henry M. Post, re-direct.

A Go under.

Q By a tunnel or ditch? If the tracks were elevated you would have to change your switch elevation?

A Everything would have to be changed.

Q Then you would have to build an abutment in the street for the elevated switch?

A Yes. We are too far away to make a change of that sort.

10

Commissioner Donges. How far away are you from the tracks?

Witness. From where it leaves their track and comes in a semi-circle, it must be a hundred and twenty-five feet before it strikes my property.

Commissioner Donges. It runs on the property of the railroad company before it reaches the street?

Witness. Yes. They have a switch lying there for public use; when I located there they extended that right around to my property.

20

Q You built the switch in the street; did you build it or the railroad?

A I built it across the street.

Q And on your own property?

A And keep it repaired every year.

Q How much of an investment have you there?

A Between twenty thousand dollars and twenty-five thousand dollars.

Q How long has the switch been in the street?

30

A Ever since I have been there.

George P. Carroll, direct.

GEORGE P. CARROLL, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

Q What position do you hold with Fuller's Express Company?

A General manager.

10 **Q** What is the business of that company?

A Handling express and fast freight matter between New York and Jersey City, Paterson and Passaic.

Q How long has your company been in that business?

A Forty-two years last October.

Q Where is your place of business in Paterson?

A The corner of Erie Railroad and Ellison street.

Q What kind of a building have you?

20 **A** A frame structure, I judge, two hundred feet long, probably fifteen feet wide at one end and twenty feet at the other.

Q Have you a lease from the Erie Railroad?

A Yes.

Q What shipments do you ship weekly, how many cars?

A Between twenty and twenty-five carloads a day.

Q Of course, you have no outgoing shipments?

30 **A** Yes, we have them both ways. Twenty or twenty-five in and out of Paterson a day.

Q How is that handled?

A It is handled by truck to this freight house; just at the cars, and from there loaded into the cars. The siding we have runs parallel with the main line of the Erie Railroad. Our siding is between our freight house and the main line of the Erie.

Q What is the length of the track in there?

A The track, I should judge, is pretty near three hundred feet long.

George P. Carroll, direct.

Commissioner Donges. Is the freight house which you refer to fifteen feet wide and twenty feet at the other end?

Witness. Yes, and about two hundred feet long.

Q How far is that from the main line of the Erie, along your switch?

A It joins the main line, the building and the switch. 10

Q How far from the point it leaves the main line; how long is the switch?

A About three hundred feet.

Commissioner Donges. And is how far distant in its location from the tracks?

Witness. Runs parallel to the tracks.

Commissioner Donges. How far distant from the tracks?

Witness. The distance, I should say, is about five feet. 20

Q From the main line of the railroad?

A Yes, and the building is five feet from that. It is just an engineer's allowance between the track, both the building, main line and switch; they run parallel.

Commissioner Donges. Your freight house is five feet from the nearest rail of your switch?

Witness. That is the idea. Between the switch and the main line is about five feet. 30

Q Suppose the tracks of the Erie Railroad were depressed five or ten feet; what effect would that have on your business?

A In the first place that building couldn't be used. The building would have to be destroyed. The property is adapted to that; you can't drop the tracks too. There isn't enough ground to drop the tracks to be on the level, as the express company couldn't work only on a level with the platform.

Q Why? 40

George P. Carroll, direct.

A Because we have to work with a certain amount of speed in order to handle the quantity of freight we do.

Q Is there a limit to your carrying capacity in weight? Is the express company limited to weight?

A We handle anything, we do. Our rate into Paterson is less than one-third of the large companies. They are restricted to certain classes. We don't restrict ourselves. We would handle a brick house if necessary. All kinds of machinery, heavy freight.

Commissioner Donges. Do you handle anything other than express matter?

Witness. Other than express matter? Any kind of freight at all.

Q If it were elevated, what effect would that have?

A About the same effect. We had an experience some time ago in Jersey City.

20 Q I want you to tell us about that?

A The Erie Railroad, when they elevated the tracks in Jersey City, had what they called the old local station at Tenth and Grove streets. At that time I wasn't with the Fuller's Express Company, but I used to be with the United States Rendering Company. After the Erie elevated the tracks they got freight from the cars to the tracks and *vice versa* out on slides and hoists. They found it very slow, so much so that they had to give up the building and go elsewhere. Shortly after that I went with the building officer of Fuller's Express Company. I looked over the express office; I had the Chicago Conveyor Company's representative go with me to see what could be done. They had a chute there then to try handling the freight. We found we could not do it. Not only it costs twice as much but it could not be done in half the time as to handle it straight across from the car to the truck. If the track was elevated or depressed we would have to seek some other method.

40

George P. Carroll, cross.

Commissioner Donga. Have you all heavy freight?

Witacaz. We could not separate our freight. We work on such a small margin we couldn't separate it.

Q The cost on small articles would be higher?

A Yes; all our freight.

Cross examination by Mr. Merrey.

10

Q Your company is incorporated by a special act of the Legislature?

A I don't know whether it is a special act of incorporation; it is incorporated under the laws of New Jersey, a New Jersey corporation.

Q How long ago?

Mr. Merrey. Your answer shows that?

Mr. Gourley. No.

Mr. Merrey. I think we ought to have that information.

21

Mr. Gourley. What is wanted?

Mr. Merrey. The incorporation of this concern. I imagine it is limited.

Mr. Gourley. It may be in my office.

Mr. Merrey. I don't know, but I think at the time they got their charter, the Legislature was apt to limit them then.

Mr. Gourley. I will send you the lease.

Mr. Merrey. The information will be put in later as to that.

30

Mr. Gourley. Yes.

Q You operate under a lease from the Erie Railroad?

A Yes.

Q Have you a copy of that lease here?

Mr. Hobart. We have it, we will put it in.

Commissioner Donga. It is the purpose of the Erie Railroad to put in all the leases covering the switches.

40

George P. Carroll, cross.

Mr. Minard. All we can find. We haven't that.

Q Have you a copy of the lease with the Erie?

A I haven't it with me.

Q You have one?

A Yes, so has the Erie.

10 *Mr. Merrey.* We will ask you to produce it; that is agreed to?

Mr. Hobart. Yes.

Commissioner Donges. It is understood that lease will be produced?

Mr. Gourley. Yes.

Q Do you know how long it was to run?

A It is indefinite. You speak of a lease, it is a contract. It covers the entire arrangement with the Erie Railroad and has no terminating clause.

20 Q Is it such that your people can put an end to it?

A They have got to give us a year's notice and we them.

Q How long have you been located at your present place?

A Quite a considerable time before I came with the Fuller's Express Company.

Q How long have you been with them?

A Six years; between five and six years.

30 Q You don't know how long before they were at this place?

A I know they had been there over ten years.

Q It is probably ten years at the present location?

A It is more than that.

Q Have you any record to show when they moved there?

A I don't whether we have or not. I think Mr. Burdan, of Paterson, was with the company when I moved there. He would know about the time.

40 Q Do you know where they were located before the present location was taken up?

George P. Carroll, cross.

A No, sir.

Mr. Merrey. I think it is agreed it was south of Market street.

Mr. Gourley. Yes.

Mr. Merrey. On the west side of the road.

Mr. Gourley. Yes.

Q Do you know who built the building you now use? 10

A I don't know; I think the Erie did.

Q It is an old building?

A Yes.

Q On the property of the Erie?

A Yes.

Q Was it an old freight station?

A It was their local freight station years ago before they built the present freight station.

Q You get how many cars a day?

A We handle between twenty and twenty-five cars a day at this time of the year, but there are times of the year we handle more, when the perishable freight is running from the south. 20

Q The cars you get come up on the regular passenger service of the road?

A Some; and some by fast freight.

Q And during the day one of your cars is put on the passenger train that stops at the Market Street Station?

A There are a number of trains, one or two, sometimes four stop there during the day. 30

Q And then the passenger coaches remain at the station and the engine crosses Market street and Ellison street with the cars consigned to you?

A Yes; sometimes they are handled that way and other times they are handled by a switch engine.

Q And the engine must back up again, causing several crossings of Market street?

A Only some trains.

Q And that happens many times during the day? 40

George P. Carroll, cross.

A Not many times.

Q How many times?

A I should say it happens more than once a day.

Q What time does it happen?

A I don't know; one is on there at nine o'clock; I think the morning train is about eleven.

Q I think there is a train about three o'clock
10 where that happens?

A I am not sure. I know the yard engine handles some cars across there.

Q You do not know how often you get cars during the day on passenger trains?

A How often we get cars?

Q Yes?

A Four times; that is counting both ways.

Q What do you mean by "counting both ways?"

A Trains from Passaic as well as to Passaic.

20 Q Received at Passaic?

A Our receiving of the cars.

Q Then they are shipped across twice?

A No; ship cars once and twice into Paterson.

Q That shipment requires several movements across Market street, does it not?

A It wouldn't require more than one, the engine taking them up and going back to its train.

Q The switch engine comes back a distance over Market street on the other track?

30 A When the switch engine handles it, yes.

Q Under those conditions it would take three movements?

A That depends on where the engine would pick up the cars.

Q Two movements at that time would require the gates down three times?

Mr. Minard. Are you trying to qualify him as a railroad operating expert?

40 *Witness.* I was twenty years with the Erie.

George P. Carroll, cross.

Q You are not familiar with this?

A All in a general way.

Q Two movements across Market street requires the gates down three times; once when the train comes in the station and a second time when the engine goes across the street and the third time when the engine comes back?

A A number of times it would be only twice. 10
Trains that come—if the engine hasn't gone to the crossing it don't require the gates down.

Q It is the rule of the company that gates be lowered when a train comes into the station?

A No.

Q Is it your observation as to that; you have no office in New York?

A No; but I travel over the line.

Q Have you observed that?

A I have observed them put down; I have been 20
there at times getting off, when they didn't.

Q I said three times; it would be four times. You haven't noticed that?

A No.

Q The gates then are lowered four times —

Commissioner Donges. The witness said he hadn't noticed that.

Mr. Merrey. That is all.

Mr. Gourley. That concludes the testimony of our switch owners. I desire to put in some deeds 30
later, which I haven't here.

F. G. Hopper, Esq., represented by J. Kushner, Esq.

Frederick G. Hopper, direct.

FREDERICK G. HOPPER, sworn on behalf of siding owners.

Direct examination by Mr. Kushner.

Q You are connected with D. Fullerton & Company, Paterson?

A I am.

10 Q What is your business?

A Wholesale beef and provision.

Q What relation do you hold to that company?

A Acting secretary.

Mr. Minard. That is No. 33 on the list.

Q How long have you been connected with D. Fullerton & Company?

A Thirteen years.

Q You know the various business transactions of the company both coming and going?

20 A I do.

Q Does the D. Fullerton & Company act as agent for some other corporation?

A They do.

Q What corporation?

A Swift & Company.

Q Do you receive meats?

A Dressed beef only.

Q How many cars do you receive per week?

A Ten.

30 Q An average of ten; sometimes more?

A Sometimes more and sometimes less, depending on the season.

Q And your outgoing shipments?

A Most of it goes in wagons, about one.

Commissioner Donges. Ten cars coming in and one going out?

Witness. Yes; most of the shipments out are done by wagons.

Frederick G. Hopper, direct.

Q The main track of the Erie Railroad is how far from your building?

A It is within three feet, by the usual engineer's scale.

Q I mean the main track?

A The distance of one switch track, and our building is probably ten feet.

Commissioner Donges. One switch track and ten feet? 10

Witness. No; one switch is included.

Q In relation to the siding and switch track, how far is your building from that?

A Three feet; just enough to allow the cars to clear.

Q How long has the building been in there?

A To my knowledge, twenty years; personal knowledge. The firm has been in business thirty-five years. 20

Q On this spot?

A On this spot.

Q Do you know whether or not the firm has been using this switch continuously for that period?

A Continuously.

Q They built the building in conformance with the switch?

A Absolutely.

Q Has the building been remodelled in late years? 30

A Remodeled to conform to switch conditions.

Q How big a building have you?

A On the railroad, one hundred and eight feet.

Q How deep is the property away from the railroad?

A Away from the railroad?

Q Yes, sir.

A Three feet from the switch.

Q The property; how far does it run away from the railroad toward River street? 40

Frederick G. Hopper, direct.

A One hundred and twenty feet.

Q What streets bound it?

A Bounded on the north by Wayne street, on the east by the Erie Railroad, on the south by Franklin street and on the west by River street.

10 *Commissioner Donges.* It has a frontage of about one hundred and twenty feet on each street?

Witness. It runs to a kind of triangle; a hundred and thirty-four feet in front, one hundred and eight feet in back on the Erie Railroad.

Q Have you a copy of your deeds there?

A Yes.

Mr. Kushner. I offer this deed in evidence.

Commissioner Donges. It will be admitted and marked. You had better read the title.

20 *Mr. Kushner.* It is given by Emmet F. Fullerton and Annie H. Fullerton, his wife, and Albert G. Fullerton and Susan B. Fullerton, his wife, to D. Fullerton Corporation, by deed of April 9, 1904, recorded in the office of the clerk of Pascaic County in Book L-16 of Deeds, Page 297, and is the first tract mentioned in aforesaid deed.

(Same is marked Exhibit DF-1.)

Q Have you any idea as to the value of the buildings there?

30 A Over one hundred thousand dollars.

Q What is the first floor used for?

A The first floor is used for a beef cooler.

Q The front or the rear of the first floor?

A The rear. The front part is used—

Q A shipping department?

A And office.

Q What is situated on the second floor?

A Refrigerator pipes, cooler.

40 Q Have you a receiving platform on the rear of your building?

Frederick G. Hopper, direct.

A Yes.

Q Your platform is about three feet from the switch?

A Yes.

Q Does the building run parallel with the main line and switch?

A Yes.

Q If that switch was depressed say five or ten feet how would that affect the value of your building as well as business? 10

A As far as the building, absolutely worthless.

Q Why?

A Because you would have to build the switch conditions to conform to the depression of the tracks. Not only that, you would probably have to elevate, to raise the beef from the cars, which would be a continuous expense. The building, if that is done, would be worthless, if your track was depressed or elevated. 20

Q How would that affect the foundations of your building?

A Absolutely worthless, because it is permanent with the other switch; that would loose all the bearings.

Q Where D. Fullerton's plant is, of course, perfectly level?

A Yes.

Q Practically level?

A Yes. 30

Q No grade on that side?

A No.

Q If the tracks were depressed fifteen or twenty feet—

A It would make it just as ridiculous as if depressed five feet.

Q It would actually destroy the entire plant?

A Not the entire plant; the front wouldn't be, but the back.

Q Isn't it built the same size? 40

Frederick G. Hopper, direct.

A Yes.

Q The same cellar and basement?

A Yes.

Q Wouldn't all the foundation become weakened, all around?

A Yes.

10 Q Suppose the tracks were raised, elevated say ten or fifteen feet?

A Then the building would have to be changed to conform with the elevation and practically the same condition would exist as if depressed.

Q How would that interfere with the handling of the meat?

A By putting the cost of receiving it half again as much by changing, elevating and lowering the beef.

Q More expensive handling it that way?

A Yes.

20 Q What is the effect of too much handling of the meat?

A It would make too much expense.

Q As a matter of fact it is taken from the cars at the present time—how far is the store room from the freight cars?

A About ten feet.

Q From the refrigerator room?

A Yes.

30 Q What effect would delay in handling the meats have on the meats?

A Deteriorate in value, absolutely, yes.

Q Could you say in round figures the amount of business you do?

A Last year \$2,121,000.

Q In handling of meats?

A Yes.

Q Do you think you would handle that much meat if the tracks were lowered or raised?

A No.

40 Q You would find no market for it?

Frederick G. Hopper, direct.

A No.

Q I show you a map; it shows the lines of the Erie Railroad?

A Yes.

Q Is this the situation of your plant?

A Yes.

Q This is the section here (indicating)?

A Yes.

10

Q Is this the switch (indicating)?

A Yes.

Q Runs along here?

A Yes.

Q Parallel with the building?

A Parallel with the building.

Q How do you deliver your meat to the consumers?

A By wagon.

Q You don't ship much meat away?

20

A Occasionally, probably one car a week.

Q How many wagons have you in your business?

A Twenty.

Q I show you this mark on the map, what is that mark?

A That is the sewer that connects back of our building to allow the sewerage from the bologna kitchen to empty into the Summer street main sewer.

Q If the tracks were depressed say fifteen or ten feet, what effect would that have on the disposal of your sewer?

30

A That would make that sewer absolutely worthless.

Q If that track were raised?

A It wouldn't have any effect.

Q Would you have to have a pump to pump the sewerage?

A No, not if it was raised, because it would still be on the ground.

40

Frederick G. Hopper, cross.

Cross examination by Mr. Merrey.

Q You get all your beef from the west?

A Not all.

Q Where do you get the rest?

A We kill two loads of cattle a week. They come in live and we kill and dress them.

Q How many cars of live meat come in?

10 A Straight beef, probably eight cars.

Q Where do you put that beef?

A Right in the cooler.

Q What floor is the cooler on?

A The first floor.

Q What system of refrigeration have you?

A The ammonia.

Q That is machinery refrigeration?

A Yes, sir.

Q Is your plant larger than the Morris plant?

20 A Yes, sir.

Q How much larger in size and amount of beef you handle?

A I really couldn't say. I suppose our building is half again as large. I really do not know what they do.

Q Do you do anything else besides selling the beef and poultry?

A We do pork packing and general provision business.

30 Q You say you remodeled your plant a short time ago?

A Just the front.

Q You made various other changes at the request of the United States Government?

A Yes.

Q Or the commonly called Interstate Commerce Commission?

A Yes.

40 Q Have you had an architect advise you whether

Frederick G. Hopper, cross.

your building could be changed to conform with the change in the railroad tracks?

A Not to my knowledge.

Q You have had no architect?

A No, sir.

Q You have had no experience in building yourself?

A No, sir.

Q It is merely an expression of your own inexperienced opinion? 10

A To a certain extent.

Q Whether elevation or depression of these tracks would make your building worthless?

A No.

Q What sort of an opinion is it?

A More or less of common sense.

Q But you are not an expert on that question?

A No.

Q Do you know whether your feeding floor could be raised? 20

A I do.

Q You know it could?

A It could not, no.

Q Why not?

A The reason we have the ice bunkers or refrigeration pipes on the top floor is as cool air is heavier than warm air we would still have to have the cold air pipes above the beef.

Q What is it, a wooden or brick building? 30

A The beef building it.

Commissioner Donges. Is what?

Witness. Wooden.

Q The part adjacent to the railroad tracks is wood?

A With the exception of the engine room, probably twenty-five feet is wood.

Q Do you know whether or not it would be expensive or not to raise that building? 40

Frederick G. Hopper, cross.

A It would be expensive.

Q You don't know how much it would cost?

A I do not.

Q If that were raised would it interfere with the raising of the plant?

A It would.

Q In what way?

10 A In loading and shipping out.

Q From what part of the plant do you load or ship?

A We ship from the wagons, from the floor part.

Q Do you ship any into the cars?

A Yes.

Q What do you put into the cars?

A Lard.

Q How much?

20 A Probably one car a week. It is lard and sweet pickled goods.

Q How do you load that?

A That is loaded from the pickle cellar on trucks through our cooler into the cars.

Q It isn't necessary to put it through the cooler for refrigeration purposes?

A Not at that point, not the shipping point.

Q You have to elevate that stuff from the cellar to get it into the cars?

A Yes.

30 Q As far as that is concerned you could still elevate it ten or fifteen feet more if necessary?

A No, you could not.

Q Why not?

A Then it would throw the whole building out of conjunction. The receiving of the goods is far more important than the shipping of them, in that respect.

Q You could make no other arrangement for shipping that other kind of material?

A Possibly we could.

40 Q Do you receive any coal there?

Frederick G. Hopper, re-direct.

A Yes, we do.

Q From the railroad?

A From the railroad.

Q How is that handled?

A That is handled by a man throwing it on the trestle.

Q Most of your stuff is taken away from your plant by wagon? 10

A It is.

Q That could be arranged for some elevation of the tracks by elevating your driveway, it could be elevated?

A No. Our driveway is right on Lafayette street level.

Q There is some distance from there back to the building?

A Probably one hundred and twenty-five feet.

Q In that elevation you could probably elevate ten or fifteen feet? 20

A The whole building?

Q No, the driveway, if your building in back was raised?

A I don't know how that would work with the wagons standing; they would be constantly sliding.

Q You said you hadn't considered this question with a view of the construction or possibility of doing it at all?

A No. 30

Re-direct examination by Mr. Kushern.

Q You do know if the tracks were depressed it would mean interference with the foundations of your building at the railroad side?

A I do.

Q An entirely new wall put there?

A Yes.

Q If the tracks were raised there would be a new conveyer to convey your meat? 40

George R. Wheeler, direct.

A Absolutely.

Q And move your refrigerator back to the store?

A Yes.

Q The shipping room for the platform?

A Yes.

Q And the receiving room?

A Yes.

10 Q If the tracks were lowered you would have to raise the meat once and drop it?

A Yes.

Q Making two handlings of the meat rather than one?

A Yes.

Q If you lowered the tracks you would have to move the meat up by machinery?

A Yes.

20 Q Besides tearing out the foundations?

A Absolutely.

Q How would the meat be affected?

A It would depreciate in value. The more handling of meat the more it depreciates.

By Mr. Hobart.

Q This extra handling would cost something?

A It would, absolutely.

Q How much would it add to the beef for that?

A It depends on the quantity you get.

30

GEORGE R. WHEELER, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q Mr. Wheeler, what is your full name?

A George R. Wheeler.

Q What is your position?

A Division freight agent, Erie Railroad.

Q Your division covers Paterson?

40

A It does.

George R. Wheeler, direct.

Q I show you a paper entitled "Erie Railroad, Industrial Sidings in Paterson, N. J.," and ask you whether that list was prepared under your supervision?

A Yes, it was.

Q I understand that these siding owners are numbered as they appear in the plan in the answer filed by the company?

10

A I haven't seen that.

Mr. Minard. That will appear from the evidence.

Commissioner Donges. They are numbered in accordance with the map?

Witness. That was not put up with the map.

Mr. Minard. I put the numbers there myself.

Q The first column represents the names of the industries having loading or unloading facilities at the Erie Railroad?

20

A It does.

Q These initials along in the next column, V, XV, are illustrated in the legend at the bottom?

A Yes.

Q V is exclusive sidings, X not in use, Y yard tracks?

A Yes.

Q The letters B, F, C, D and A represent other sections of joint sidings?

30

A They do.

Q When you say exclusive siding, there is a single concern alone uses the siding exclusively?

A Yes, sir.

Q When you say joint siding, you mean all concerned opposite which that individual letter is given use that siding, is that right?

A Yes.

Q For instance, all A's use one siding, and all B's use another siding, and all F's, and so on, do they not?

40

George R. Wheeler, direct.

A Yes.

Q What is a yard track; what does that mean?

A Why a yard track is a track in the yard.

Q In this case it means that these particular industries have been assigned facilities on yard tracks on which all their goods will be received or shipped?

A Yes.

10 Q In many cases these arrangements are by agreement, are they not?

A Yes.

Q What is team delivery track?

A Team delivery is a public track which anyone can use.

Q Is or is there not arrangements with any of these concerns with facilities on team tracks for their use?

A Yes.

20 Q In many cases those arrangements are not covered by agreement?

A In many cases.

Q The next column, commodities, illustrates the material loaded or unloaded there principally?

A Yes. The industries, what they are doing, the manufacturers' output.

Q It doesn't include the names of the special materials they receive?

A No.

30 Q The length of the sidings?

A The length is estimated by the number of cars. It isn't actual measurement; an estimate; possibly it may be wrong; an estimate of the number of cars, estimated thirty-six to forty feet per car. This doesn't include what we call the lead. In other words, just the clearance, the number of cars that can be unloaded on the tracks exclusive of the lead from the siding or main track.

40 Q I understand, Mr. Wheeler, in the next column marked "Agreement" the date—those figures under

George R. Wheeler, direct.

agreement are the dates of the agreements of the concerns opposite whose names they appear?

A They are.

Q Wherever there is an agreement the length of the siding is taken from the agreement and those are the numbers which are not in brackets.

A Yes.

Q The legend down here says that figures in brackets represent the estimated length? 10

A Yes.

Q In the estimated length did you confer with anyone?

A No, sir.

Q Did you go over the length with Mr. Rigdon, agent at Paterson?

A After I had my list prepared.

Q It was also prepared by Mr. Palmer, the railroad engineer, who was there at the time you went over there? 20

A Yes.

Q Between you you took your estimates together in order to confirm those figures?

A Yes.

Q The next column marked "Average cars per month"; how did you arrive at that?

A With the exception of the Fullers Express Company's cars, this is taken from office records, Paterson office, or rather a report that he rendered me monthly, showing the number of cars handled by each concern. This was taken from a certain month, which we call an average month. 30

Q What month?

A The month of May.

Q That month was selected because it was a representative month?

A A representative month.

Q Fullers Express Company, where did you get that record? 40

George R. Wheeler, direct.

A The agent at Paterson gave me that. The four hundred and twenty cars, that wasn't embodied in this report; that comes to me. There was one hundred and seventy cars what we call eastbound, and I estimated two hundred and thirty cars westbound.

Q Per month?

A Per month, yes, sir.

10 *Mr. Minard.* I will offer this statement in evidence to show what it purports to show.

Commissioner Donges. If there is no objection it will be admitted and marked as an exhibit.)

(Same is marked Exhibit R-49.)

Q Mr. Wheeler, have you agreements with all these concerns?

A On the list?

20 Q Have we an agreement with all the concerns on that list?

A No, sir; I believe not.

Mr. Minard. There are siding agreements here for all so indicated under the word agreement.

Commissioner Donges. All those were the dates are given as being the date of the agreement?

Witness. Yes, sir.

Q Do you know whether we have an agreement with all the siding people in Paterson or not?

A No, we have not.

30 Q Can you say anything about why we haven't agreements with all these people? Can you give me that in a general way? I am free to admit that with some we haven't; I think Mr. Wheeler may state that.

Mr. Merrey. I don't care to object. It seems to be unnecessary.

40 *Mr. Minard.* It was only to explain to the commission why we haven't. This system of obtaining agreements is the modern method of handling the situation. Years ago sidings were put in at

George R. Wheeler, direct.

the request of people without agreements. Those people, of course, have been reluctant to sign an agreement to put any responsibility on them for accidents and so on. All these agreements contain a liability clause and some have never got an agreement. If changes and repairs are necessary, then we get an agreement. There are some we don't have. About Fuller Express Company, we have an agreement evidently there. We couldn't locate it. My conclusion is it was given out to an attorney when that litigation was on and never returned. We will try to look it up. I have produced here in each case the original agreement.

10

Commissioner Donges. Suppose you just read into the record and have each one marked and produce the copies.

(No. 1, Leslie Elliott Co., dated June 8, 1912, agreement marked Exhibit R-50.)

20

(No. 6, Commercial Lumber & Mill Wk. Co., dated Sept. 14, 1912, agreement marked Exhibit R-51.)

(No. 24, David G. Rogers, dated October 20, 1905, agreement marked Exhibit R. 52.)

(No. 28, P. S. Van Kirk, June 25, 1907, agreement marked Exhibit R-53.)

(No. 49, Auger & Simon Silk Dyeing Co., February 14, 1906, agreement marked Exhibit R-70.)

(No. 50, Paterson Consolidated Ice Co., November 14, 1910, agreement marked Exhibit R-71.)

(No. 51, Van Winkle-Bromley Lumber Co.)—

30 *Mr. Merrey.* Is that switch on this road or on your Newark road?

Mr. Minard. I don't know. It is within the zone covered by the testimony.

(Van Winkle-Bromley Lumber Co., May 11, 1911, agreement marked Exhibit R-72.)

(No. 52, Gulf Refining Co., February 15, 1911, agreement marked Exhibit R-73.)

Q Now, Mr. Wheeler, what is the condition on which these sidings are used? Of course, those covered by the agreements, the agreements speak for them-

George R. Wheeler, direct.

selves. These agreements are standard forms of agreements used for this kind of work?

A They are.

Q Whether a concern is covered by an agreement or not, is there any difference in who pays for repairs or changes in the sidings?

A Not to my knowledge.

Q Who pays for them?

10

A The users of the sidings.

Q So that any change made by reason of depression or elevation of the tracks, the expense falls—

Mr. Merrey. I object to that question.

Commissioner Donges. That is a conclusion of law.

Mr. Merrey. You can't have any rule on this Paterson situation.

Commissioner Donges. I understand it is not intended to cover elimination under order of this board.

20

Mr. Minard. These agreements?

Commissioner Donges. Your question.

Mr. Minard. I am speaking generally.

Q If you found it necessary to change the grade of the railroad up or down whether ordered by the court or whether you did it for your own purposes, where would the expense of changing the sidings fall under your rules?

30

Mr. Merrey. I object.

Commissioner Donges. What is the objection?

Mr. Merrey. He is one party to the agreement. He can't say what the thing is, because it must be fought out between them.

Commissioner Donges. Might he not say what is the rule? If there is a common practice and this witness testifies, not regarding both parties, but the practice between them, what it is that one

40

George R. Wheeler, direct.

of the other parties pay for the changes, it seems to me he is competent to testify to it.

Mr. Merrey. There couldn't be any such procedure.

Commissioner Donges. I think he is competent to testify to it.

10 *Mr. Merrey.* The company itself insists on it as far as it is able.

Commissioner Donges. It may or not be the fact. We will take the testimony.

Witness. It is the custom for industries or siding owners to pay for any changes made in the sidings.

Commissioner Donges. Are there any exceptions to that?

Witness. Very few of late years.

20 Q How long has that been the rule of the company?

Commissioner Donges. He hasn't said it is the rule. He said it was the custom.

Q Is it the rule?

A It is the rule of the company.

Q If a siding owner asks for a change in a siding or repairing, what is the practice regarding payment?

A The siding owner pays the cost of maintenance.

30 Q Is it or is it not true that the operating department send out an engineer and make estimates on the cost of changes or repairs?

A Yes.

Q Is or is not the siding owner required to deposit the estimated cost of repairs before the work is undertaken?

A We customarily do so, yes, sir.

Q How long has that been the custom?

A I can't give you an exact date, I think over five or six years.

40 Q The conditions under which these agreements

George R. Wheeler, cross.

are made, where agreements exist, are they or not the same as those in practice where you have no agreement?

A Yes, sir.

Q They are the same.

A Yes, sir, the same.

Cross examination by Mr. Merrey.

Q Have you had any experience on the Erie with the changing of the grade of the road as far as sidings are concerned? What has been your experience in connection with the changes in grade of the railroad with respect to the owners of sidings?

10

A Any change that is made is submitted to me.

Commissioner Donges. No, the question is what experience you have had or the extent of your experience.

Witness. I am not an engineer.

20

Q You do not know of any instances where the grade of the Erie has been changed, coming under your observation and knowledge, where it affected a siding?

A I don't know any at the present time.

Q So you don't know what the rule of the company is in regard to that?

A Speaking of the ruling of the handling of sidings?

Q Yes.

A I do not know what that is.

30

Q So there is no practice concerning the change of a siding of private parties where the grade of the road is changed?

Mr. Minard. I don't think that is fair.

Commissioner Donges. He testified to a practice; this, I think, is admissible.

A I know of no case, but I would say the rule of the road would apply there too.

Q How do you know the rule of the road?

40

George R. Wheeler, cross.

A Because I am handling these weekly, monthly.

Q What propositions of this kind have you handled?

A Nothing of an elevation or depression of the tracks.

Q Then your experience has been with other changed, changes of another character?

10 A With construction of sidings for private industries.

Q You can't tell us what the result would be in this case of old sidings that have been there many years, whether the siding owners were charged or not?

Mr. Minard. The provisions of that act require this be placed on the siding owners.

A The contract—our contract with them, the siding owners, this agreement covers the repairs to sidings.

20 Q I am now referring to those cases we have no contract for, the older cases.

A I don't think we would go to the expense of putting them up, elevating or depressing.

Q You don't know about the thing?

A I am not the Erie Railroad.

30

Opening.

SIXTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Newark, N. J., Friday, January 29, 1914.

PATERSON GRADE CROSSING ELIMINATION, ERIE RAILROAD COMPANY. }

10

Before Commissioners Donges, Hillery and Daniels.
F. H. Sommer, Esq., Counsel.

For City of Paterson appears R. B. Lewis, Esq.

For Erie Railroad Company appear G. S. Hobart, Esq., and D. E. Minard, Esq.

Mr. Minard. We put in evidence before a financial statement, that was for four months of the fiscal year. This (handling commission paper) brings it down to the end of six months, income statement. It is compiled in the same way, with the same figures and has the comptroller's official stamp. I couldn't get Mr. Sorensen, to prove it formally as was done before. I thought there wouldn't be any objection.

20

Mr. Lewis. I am willing to take Mr. Minard's word that those are the facts.

Mr. Minard. The commission can investigate it and verify it at any time, or Mr. Merry.

30

Commissioner Donges. We don't want the burden put on us of verifying it.

Mr. Minard. What I meant, the commission has the same right and the opposition has the same right to examine the original figures from which this is compiled.

Commissioner Donges. Subject to verification, this, it is agreed, shall be admitted.

Mr. Lewis. Yes.

40

W. M. Dawley, direct.

Commissioner Donges. It may be marked as an exhibit.

(Same is marked Exhibit R-74.)

Mr. Minard. I offer that timetable, the same timetable that was offered in the Rutherford case.

Commissioner Donges. It will be admitted and marked.

10

(Same is marked Exhibit R-75.)

Mr. Minard. At the last time this statement, previously in evidence, and offered in evidence, I agreed to take it away and have copies made.

Commissioner Donges. This was marked?

Mr. Minard. I don't know. Mr. Willis made the statement. It refers to signals and interlocking.

20

W. M. DAWLEY, sworn on behalf of Erie Railroad Company.

Direct examination by Mr. Minard.

Q Where do you live, Mr. Dawley?

A Passaic, New Jersey.

Q What is your occupation?

A Civil engineer in the general land and tax department of the Erie Railroad.

30

Q Have you spent some time attempting to locate the original locations of the streets in Paterson?

A Yes.

Q Did you locate a map or maps on the subject?

A Yes.

Q What maps did you find?

A I found a map, 1850.

Q Where did you find the map?

A In the office of Michael Dunn, Paterson.

Q Did you obtain permission from him to produce this map?

40

A Yes, sir.

W. M. Daerleg, direct.

Q For the commission?

A I don't know as it was for the commission.

Q You borrowed it?

A I said I wanted to use it for grade crossings.

Q This is entitled, "Map of Paterson, New Jersey, from actual surveys by J. C. Sidney, published by M. Dripps, 103 Fulton Street, New York, J. C. Sidney."

Mr. Minard. I will offer this map in evidence. 10

Mr. Lewis. What is the value of it?

Mr. Minard. It shows the City of Paterson in 1850 and we are making the point in this case, as you know, to distinguish the streets that were opened before the railroad was built and those opened afterward. Our constitutional rights are different.

Mr. Sumner. Doing it under the opinion of Vice-Chancellor Leaming, I suppose? 20

Mr. Minard. We have tried to get the oldest maps we could find as a basis for a beginning, then follow it down from this to show the history of the streets.

Mr. Lewis. I don't want to interpose any frivolous objections; what proof is there of the authenticity of the map?

Mr. Minard. Mr. Lewis, the situation is that: In all antique matters we can't produce the man who made the map. In all maps of this sort it is necessary to have respect for the antiquities in some things to the extent of allowing them to go in evidence— 30

Mr. Lewis. Michael Dunn isn't antique?

Mr. Minard. I don't suppose Michael Dunn prepared the map or had anything to do with it. This really is the city's business. As far as the record shows now there isn't any evidence that any street in Paterson exists. They are called streets by name, there isn't anything in that rec- 40

W. M. Dawley, direct.

10 ord to show that any of the streets mentioned were officially laid out or existed legally. When we made that point in our answer, that certain streets were laid out after the railroad, the commission called upon us to prove it, a thing which was part of the city's proof. If we quit now and the commission were to find that Market street actually existed and would like to eliminate it, there isn't anything in the record. The commission asked us to undertake to prove that and we are endeavoring to do it the best we know how. If we can't satisfy the commission when the evidence is in, that is another thing. We are doing the best we can to fulfill what the commission asked us to do, and supply a defect in the testimony.

20 *Commissioner Donges.* Do you have any objection?

Mr. Lewis. No, I have no objection that it go in as an exhibit.

Mr. Minard. We can't leave it with the commission; we can produce it at any time, but we are required to bring it back to him.

Commissioner Donges. Have it marked as an exhibit.

30 *Mr. Minard.* We have a photograph of it. We have an exact reproduction, if that will serve for the purpose of the files, and we will take this away and give it to Mr. Dunn and produce it at any time you need it. If we leave it knocking around among the records, it is likely to get destroyed.

Commissioner Donges. Who was Mr. Dripps?

Witness. The publisher.

Commissioner Donges. It says on the map.

Mr. Minard. That was before my time.

40 *Commissioner Donges.* No effort has been

W. M. Darley, direct.

made to find out who published this or by whom made.

Mr. Minard. Yes, it was surveyed by J. C. Sidney.

Commissioner Donges. Who was Mr. Sidney?

Witness. Here are the copies.

Mr. Minard. It was so fine it was impossible to trace it. We have had it photographed and we thought it a good reproduction. It is photographed in pieces and pasted together. 10

Commissioner Donges. I presume there will be no objection to substituting for use the photograph, Mr. Lewis?

Mr. Lewis. Not on my part.

Commissioner Donges. With the right to have the original produced whenever required?

Mr. Minard. Whenever required.

Mr. Lewis. Have the original marked now. 20

Commissioner Donges. The original will be marked as an exhibit.

(Same is marked Exhibit R-76.)

Q Have you got another map?

A I have (produces map).

Q Read the legend.

A "Map of the City of Paterson, N. J."—

Mr. Minard. This is a map entitled, "Map of the City of Paterson, N. J., surveyed by order of Council; President, Philemon Dickerson, Jeremiah Stalter and Charles Inglis, Jr., S. Ward (I suppose that means South Ward), Andrew Derrom and Patrick MacEnnis, West Ward, Edward Clark and John Schoonmaker, East Ward." Date of the map is October 20, '52. J. W. Allen, City Surveyor, Date of ordinance, March 30, 1853. 30

Commissioner Donges. "Copied from the original map on file in the office of the city surveyor, December, 1881 (I think), W. Ferguson, C. E." 40

W. M. Dawley, direct.

10 *Commissioner Daniels.* "Starting point of levels, corner of Mill and Goudinot streets. Monument levels are designated by red figures. Distances, courses and angles by black figures; center lines of streets are designated by black (on map); side lines of streets are designated by red (on map). Meaument corner of River and Mulberry streets is 5.50 below grade. Monument at intersection of Wills and Market streets is 5.00 below grade. Monument at intersection of River and Lawrence streets is 200 (I presume they forgot the decimal there). Monument at intersection of Vine and Market streets 1.20. Elevation on Culvert; street is four feet below grade. Elevation on culvert in Market street, marked 11.04, is one foot below grade. Monument corner of Straight and Cedar streets is 3.43 above grade."

20 Q Where did you get that map?

A First, I would like to call attention to the fact that the colorings are fixed by Mr. Ferguson; the side line is black and the center lines red in his tracing.

Commissioner Hillery. The legend said that side lines were in red.

30 *Witness.* Yes; I mentioned that because the red of the road was made and filed in the county clerk's office in Paterson. The side lines there are red and the center lines black to agree with the original map. This map was presumably destroyed by the fire, the original. We have traced this map and have blueprints of the tracing.

Commissioner Donges. Your original map was made by Mr. Ferguson in 1851?

Mr. Minard. Yes; this is a copy of the original map, since destroyed by fire. I understand this is the only copy of the map in existence?

40 *Witness.* Yes.

W. M. Dawley, direct.

Q Just describe to the board how you got, or where you found this map, so as to establish its authenticity.

A I may get myself in trouble. I asked Mr. Ferguson, county engineer, if he knew of any such map. He said he had one, a copy of it, and he could get it over to his father's old office.

Q Who was his father? 10

A William Ferguson.

Q He was also city surveyor of Paterson?

A I presume so.

Mr. Lewis. I think he was at one time.

Witness. He traced this map, his father traced the map according to notation.

Q So the man you got it from was the son of the Ferguson signed on this map?

A No, sir. Mr. Ferguson said he was unable to locate it; after going over all the office files he could not locate the map and he must have loaned it to someone, he couldn't remember who. So I started around and inquired at the various engineer's offices in Paterson for a copy of the map spoken of by Mr. Ferguson; and I found it in the office of the city engineer, Mr. Harder. 20

Q Then did you take it from there?

A Mr. Harder loaned it to me.

Q This is it? (Indicating.) 30

A Yes.

Mr. Lewis. The city really furnished the information.

Q What is the arrangement about the return of the map?

A It is to be returned to Mr. Harder.

Mr. Minard. For that reason we have made a blueprint and would like to make the same ar-

40

George A. W. Achenback, direct.

rangement with this one as the other one. It is in the possession of the city and they can produce it at any time.

10 *Witness.* The understanding was we would re-trace this map and make blueprints from the tracing, the object being to have a tracing from which we could make additional blueprints in order to duplicate that tracing so as to maintain one in existence.

Q You made the same notation?

A The same notation, an exact copy.

Commissioner Donges. It is an exact copy of this?

Witness. It is an exact copy, compared.

Mr. Minard. I ask that this be marked and we may offer the blue print.

20 *Commissioner Donges.* It may be marked as an exhibit and the blueprint offered.

(Original tracing marked Exhibit R-77.)

Mr. Minard. Do you want to cross examine?

Mr. Lewis. No.

GEORGE A. W. ACHENBACK, sworn on behalf of
Erie Railroad Company.

Direct examination by Mr. Minard.

30 Q Mr. Achenback, what is your address?

A Newark, New Jersey.

Q What is your profession?

A Attorney at law.

Q A member of the bar of New Jersey?

A Yes.

Q And your official connection now is what?

A I am connected with the general land and tax department of the Erie Railroad, subsidiaries and leased lines.

George A. W. Achenback, direct.

Q You have been conducting, with the assistance of Mr. Dawley, a record as to the history of the streets in Paterson?

A I have.

Q Where do you conduct your investigation?

A In the clerk's and register's offices of Essex County and in the clerk's and register's offices of Passaic County.

10

Q Why did you conduct it in Essex County?

A Because Passaic County was at one time part of Essex County.

Q During the period over which this investigation covered?

A Yes.

Commissioner Donges. When was Passaic County set off?

Witness. Passaic County was set off from Essex County in 1837, I believe.

20

Q A map has been offered here in evidence and refers to an ordinance of the city of Paterson; did you find any ordinance to which this map refers?

A I did.

Q Where is it?

A It is recorded in miscellaneous records in the Passaic County register's office.

Q Have you a certified copy of that?

A I have.

30

Q And this is it? (Indicating.)

A This is it.

Mr. Minard. I offer this in evidence.

Commissioner Donges. This is an ordinance of the city of Paterson?

Mr. Minard. Paterson.

Witness. It covers all the streets as laid out by the Allen map, which is made under the direction of council.

40

George A. W. Achenback, direct.

Commissioner Donges. Is there any objection, Mr. Lewis?

Mr. Lewis. No.

(Same is marked Exhibit R-78.)

Q I understand this ordinance vacated in Section One, something like seventy or eighty streets in the city of Paterson, did it not?

10

A It did.

Q Including all the streets then existing which are mentioned in this petition?

A Yes.

Q And after it vacated all the streets it proceeded then to relocate and relay out those streets according to this map which has been offered here in evidence? Is that right?

A Yes, it did.

20

Q Have you prepared a statement of the history of each of the streets mentioned in this proceeding and based upon the map of 1850 and the map of 1852, which we have offered here this morning, embracing the facts which you ascertained in your investigation?

A I have.

30

Mr. Minard. This is prepared in what we considered a convenient form to offer. We can examine him on each of the streets separately and give you the data at any length that you may desire, and perhaps Mr. Lewis will have some suggestion to make, or agree to go ahead with that—or just hand in this statement.

Mr. Lewis. I would suggest if the witness will identify this as being his report, it be submitted subject to our investigation.

Mr. Minard. All right.

Commissioner Donges. Offer it, and if Mr. Lewis has no objection—

George A. W. Achenback, direct.

Q Is this your report on that investigation?

A It is.

Q All the facts set forth in this statement are true?

A Yes.

Q The dates shown have been checked up and verified have they not?

A They have. In the case of each street mentioned I have certified copies of the returns. 10

Q What is this other paper?

A It is a certified copy of an ordinance entitled, "An ordinance providing for the taking up, vacating and relaying of Clay street in the city of Paterson, passed July 24, 1886, and recorded in Miscellaneous Record, Book B, page 78, of the Register's Office.

Mr. Minard. I will offer that in evidence.

Mr. Lewis. No objection.

Commissioner Donges. It may be admitted and marked. 20

(Same is marked Exhibit R-79.)

Q I notice in this report you refer frequently to the 1850 map; for instance, at the beginning of the statement regarding Clay street, it appears on the 1850 map; by that map do you mean the old map which we have introduced here this morning?

A Yes.

Q When you refer to the Allen map, as you do in cases, you refer to the second map introduced here this morning? 30

A I do.

Commissioner Donges. The summary of witness may be marked as an exhibit subject to verification and cross examination.

(Same is marked Exhibit R-80.)

Q I have a batch of returns. These are returns which you found in the county clerk's office, relating 40

George A. W. Archenback, direct.

to this situation, affected by this ordinance, is that right?

A Not all in connection with that ordinance. These returns are official returns of the courses and distances of each street as I found it, official returns used, in the vicinity of the right of way of the railroad company.

10 Q And the date of recording?

A Yes, sir; most of them refer to the Allen map of 1852.

Q Will you just read the title of those returns? I don't suppose you need to read anything else into the record.

Commissioner Donges. Let each be marked separately.

20 *Witness.* Certified copies of the returns of courses and distances of Madison avenue in the vicinity of Paterson between Main street and Erie Railway.

Commissioner Donges. There is no objection?

Mr. Lewis. No objection.

Mr. Minard. Is there a date when it is recorded; put in the date of recording.

Commissioner Donges. Then all may be marked.

Mr. Lewis. All are certified copies.

30 *Witness.* The date is March 27, 1871.

(Same is marked Exhibit R-81.)

Witness. Certified copy of returns and courses and distances of Straight street in the city of Paterson, dated October 20, 1852.

(Same is marked Exhibit R-82.)

Witness. Certified copy of returns and courses and distances of Clay street in the city of Paterson, dated February 11, 1870.

40 (Same is marked Exhibit R-83.)

George A. W. Achenback, direct.

Witness. Certified copy of returns and courses and distances of Clay street in the city of Paterson, dated July 14, 1856.

(Same is marked Exhibit R-84.)

Witness. Certified copy of return of courses and distances of Cedar street in the city of Paterson, dated October 20, 1852.

(Same is marked Exhibit R-85.)

10

Q Is the date of return and date of recording different?

A Well, the date of recording is subsequent to the date of return. In several cases the date of recording doesn't appear, just the date of return is given.

Witness. Certified copy of return of courses and distances of Market street in the city of Paterson, dated October 20, 1852.

(Same is marked Exhibit R-86.)

20

Witness. Certified copy of return of courses and distances of Willis street, which is now Park avenue, in the city of Paterson, dated October 20, 1852.

(Same is marked Exhibit R-87.)

Witness. Certified copy of return of courses and distances of Ellison street in the city of Paterson, dated October 20, 1852.

(Same is marked Exhibit R-88.)

30

Witness. Certified copy of return of courses and distances of East Van Houten street in the city of Paterson, now Van Houten street, dated October 20, 1852.

(Same is marked Exhibit R-89.)

Witness. Certified copy of return of courses and distances of Broadway in the city of Paterson, dated October 20, 1852.

(Same is marked Exhibit R-90.)

40

George A. W. Achreback, direct.

Witness. Certified copy of return of courses and distances of Fair street in the city of Paterson, dated October 20, 1852.

(Same is marked Exhibit R-91.)

10 *Witness.* Certified copy of return of courses and distances of Fair street in the East Ward, city of Paterson, between Bridge street and Straight street, dated March 7, 1864.

(Same is marked Exhibit R-92.)

Witness. Certified copy of return of courses and distances of Division street, now Hamilton avenue, east of Bridge street in the East Ward, city of Paterson, dated December 19, 1859.

(Same is marked Exhibit R-93.)

20 *Witness.* Certified copy of return of courses and distances of Division street, now Hamilton avenue, dated October 20, 1852.

(Same is marked Exhibit R-94.)

Witness. Certified copy of return of courses and distances of Lafayette street in the city of Paterson, dated October 20, 1852.

(Same is marked Exhibit R-95.)

30 *Witness.* Certified copy of return of courses and distances of Franklin street in the city of Paterson, dated February 11, 1870.

(Same is marked Exhibit R-96.)

Witness. Certified copy of return of courses and distances of Keen street in the city of Paterson, dated February 11, 1870.

(Same is marked Exhibit R-97.)

Witness. Certified copy of return of courses and distances of Warren street in the city of Paterson, dated February 11, 1870.

(Same is marked Exhibit R-98.)

40 *Witness.* Certified copy of return of courses

George A. W. Achrauback, direct.

and distances of River street in the city of Paterson, dated October 20, 1852.

(Same is marked Exhibit R-99.)

Witness. Certified copy of return of courses and distances of Putnam street in the City of Paterson, dated February 11, 1870.

(Same is marked Exhibit R-100.)

Q What have you to say as to these returns being all the returns affecting the streets involved in this proceeding? 10

A The certified copy is the first return of the record covering the streets in the location of the right of way. There are subsequent layouts of these streets which change various courses and extend them.

Q Were there any that you were unable to find in checking these streets?

Mr. Sumner. Any original returns? 20

Mr. Minard. Yes.

Q Or if so, are they stated in there, any you weren't able to find?

A Any that I was unable to find are set forth in here (indicating).

Q Do you recall any now?

A No, I do not.

Mr. Minard. I ask permission to take the certified copies and have copies made for the different parties, for the city, and so on, which we haven't been able to get copied yet; the same as the ordinances. 30

Commissioner Donga. Very well.

Q When you speak of an ordinance in this resume of yours, or statement, do you refer to this ordinance here which we have offered in evidence, Exhibit R-78?

A I do.

Mr. Minard. Cross examine.

Mr. Lewis. No questions.

George A. W. Achenback, direct.

Q Wherever this statement of yours refers to maps other than the two maps offered in evidence to-day, is the statement based on your personal examination of those maps?

A It is. I have copies with me of two maps that are referred to in this statement.

Q They are on record?

10 A No, those two maps are not on record. Those are old maps that were found.

Q (*By Mr. Lewis.*) Do you refer to any maps except those maps in evidence now?

A With the exception of these two. These maps are entitled on the maps, property of John N. Terhune.

Q (*By Mr. Minard.*) Those maps haven't been recorded, and there is nothing to stamp them as official?

20 A No. They were maps I found in the office of the Erie Railroad Company.

Q Probably real estate sales maps?

A Yes.

Q (*By Mr. Lewis.*) Isn't the map of John N. Terhune on file in Passaic County?

A I couldn't find it, not this particular map.

Q (*By Mr. Minard.*) Your object in this matter was to get the earliest evidence of existing streets at their original laying out?

A It was.

30 *Mr. Minard.* That is all.

GEORGE A. W. ACHENBACK, recalled on behalf of Erie Railroad Company.

Q Mr. Achenback, on the 1850 map you found dotted lines?

A Yes.

Q What does that refer to?

40 A The dotted lines are merely proposed streets. I found from searching the title of the various properties through the Paterson & Hudson River Railroad

George A. W. Achenbach, direct.

and the Paterson & Ramapo Railroad rights of way, those streets shown by dotted lines did not exist; there was no record in the surrogate's office or the clerk's office of those dotted lines.

Q The property description did not refer to them?

A No; just proposed streets.

By Mr. Lewis.

Q You merely concluded the dotted lines did not indicate streets because there was no reference to it? 10

A No reference in the deeds.

Q That is the only reason?

A The streets I found referred to in the deeds were shown in solid lines.

Q That is the only way you did reach that conclusion?

A Yes.

Q There was no reference in the deeds. How many deeds did you look over? 20

A I couldn't tell you the number; an enormous amount.

Q A great number?

A A great number, yes. I tried to cover all the property along the right of way, straight through the City of Paterson and outside the City of Paterson in Acquackanonk Township, which was at one time a part of Paterson. Practically all that property, or a great part I mean to say, was part of the Society of Useful Manufacturers. It is an interesting fact, in running down these records, a great majority of these deeds were not recorded until 1879. 30

Q (*By Mr. Misard.*) That indicates there were no sales of that property in the meanwhile?

A Practically none.

Q How many deeds did you examine, Mr. Achenbach, approximately?

A I haven't any idea. I never counted them. I examined every deed. 40

George A. W. Achenback, direct.

Q Roughly speaking, ten or one hundred or fifty or sixty?

A I should say it was more like two hundred.

Q In all those cases you found you could rely on the 1850 maps where the solid lines were as showing streets, that description in the real estate deed referred to those as streets?

10 A I did.

Q All cases you noticed dotted lines in the 1850 map, the real estate abutted what would be those streets if they existed, did not mention it, is that right?

A I found in the 1850 map reference to descriptions as shown by the deeds very accurately.

Q In the solid lines?

A In the solid lines.

20 *Commissioner Donges.* Conveyances on those streets by name?

Witness. Yes.

Commissioner Donges. And you found no conveyances—no description in conveyances on streets marked by dotted lines?

Witness. I did not.

Mr. Minard. That is as far as we are prepared to go on to-day.

Commissioner Donges. There will be something further?

30 *Mr. Lewis.* The city now has a plan to submit, which isn't ready yet, of course. I think it would be agreeable to Mr. Hobart and Mr. Minard to meet some day in the future when we could tell about when we could submit the plan. Fix a day when you are ordinarily going to sit, and then we will appear and say when we will be ready to submit the plan.

40 *Mr. Hobart.* Mr. Merrey talked to me of that yesterday that he has some plan that was not

George A. W. Achenback, direct.

ready. I suggested to him, subject to the board's correction in the matter, that that might be done on the thirteenth of February. Just say what he would have to say, and they wouldn't have any testimony at that time.

Commissioner Donges. We could give your case a place now.

Mr. Lewis. We could say on February 13th.

Commissioner Donges. It is understood at that time that it will be necessary to take an adjournment.

Mr. Lewis. There will be no hearing?

Commissioner Donges. No hearing at that time.

Adjourned until Friday, February 13, 1914, at the Court House, Newark, N. J., at 10.30 o'clock A. M.

Opening.

TENTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Newark, N. J., Thursday, May 21, 1914.

10 PETITION—PATERSON FOR ALTERA-
TION OF GRADE CROSSING ON LINE
OF ERIE RAILROAD COMPANY. }

Before Commissioner Ralph W. E. Donges. F. H. Sommer, Esq., Counsel.

For the City of Paterson appears E. F. Merrey, Esq.

For the Erie Railroad appears George S. Hobart, Esq., and D. E. Minard, Esq.

20 For the Switch Owners Association appears W. B. Gourley, Esq.

30 *Mr. Merrey.* On behalf of the City of Paterson we intend to offer this morning a plan providing for the elimination of the grade crossings petitioned for by that city. We don't think it is our duty that we are obliged to submit a plan of this kind and we don't say it is the best plan that could be devised. However, it is a workable plan and it would be serviceable if the company desired to use it. If they can produce a better plan we would be delighted to have them do it and we only offer this as a suggestion to the commission as to what can be done.

Commissioner Donges. You offer it as a feasible and workable practical plan?

40 *Mr. Merrey.* Yes. We don't say the man who has prepared it has had the greatest experience in railroad work, we don't say the estimate we will give you as to the cost is an absolutely certain one. However, all these matters are open to criticism by the company, who have in their employ

Henry Ryon, direct.

a great number of engineers with long experience in this matter and also some experience probably as to the cost of doing the work, but we felt the hearing had come to a point where it would be well for us to offer such a plan as this as an assistance to the commission in solving this question and I make these remarks to show the character of plan we offer and the reason for which we offer it. 10

HENRY RYON, sworn on behalf of petitioner.

Direct examination by Mr. Merrey.

Mr. Merrey. A copy of the plan was furnished to counsel for the railroad company only a short time ago, within the last two or three days.

Mr. Hobart. Yesterday.

Mr. Gourley. I didn't get any at all.

Mr. Merrey. We will furnish Mr. Gourley with a blue print and will also furnish the commission with an extra copy, or if you say how many you desire— 20

Commissioner Donges. Two, I think, will be sufficient.

Q Mr. Ryon, what is your profession?

A Civil engineer.

Q How old are you?

A Thirty-four.

Q Have you graduated from any technical school or college? 30

A Cornell.

Q Have you a degree?

A A degree of C. E.

Q When did you get that?

A In 1905.

Q Have you had some experience in railroad work?

A I worked on the Erie for a short time. 40

Henry Ryon, direct.

Q Whereabouts?

A On the cut-off at Middletown.

Q What other work have you done?

A Principally municipal work, street paving, sewers and water works in different parts of the eastern section of the United States.

10 Q How long have you been engaged in that character of work?

A Since my graduation, about nine years.

Q Have you made a plan for the elevation of, or for the elimination of certain grade crossings in the City of Paterson on the line of the Erie?

A I made a survey of the present conditions and suggested the changes to eliminate the grade crossings.

Q Under whose supervision were you working?

20 A The supervision of the city engineer of Paterson, Mr. Harder.

Q What force did you have?

A There were three men working under me, an instrument man and two rod men.

Q Who was the instrument man?

A Mr. Fuller.

Q Is he a graduate of any school?

A I believe so.

30 Q I show you a series of blue prints fastened together and marked "Erie Railroad, Paterson, N. J., Present" and ask you what that is?

A That is a blue print map showing the present conditions of the Erie Railroad tracks through Paterson, New Jersey.

Mr. Merrey. I ask that be marked as an exhibit.

Commissioner Donges. It will be admitted and marked.

40 (Map marked Erie Railroad, Paterson, N. J., Present received and marked Exhibit P-45.)

Henry Ryon, direct.

Q I show you a second series, marked "Erie Railroad, Paterson, N. J., Proposed" and ask you what that is?

A That shows a proposed layout of the road to eliminate certain grade crossings.

Mr. Merrey. I ask that be marked.

Commissioner Donges. It will be admitted and marked.

10

(Map marked Erie Railroad, Paterson, N. J., Proposed, received and marked Exhibit P-46.)

Q I show you a third set of blue prints marked "Erie Railroad, Paterson, N. J., Profile"; what is that?

A That shows the profile of the present railroad as it is at present, also the proposed, on the same sheets.

Mr. Merrey. I ask that be marked.

20

Commissioner Donges. It will be admitted and marked.

(Map marked Erie Railroad, Paterson, N. J., Profile, received and marked Exhibit P-47.)

Q I ask you to explain the changes that you propose in these plans. Start at the south end of the city and proceed toward the northern end.

Mr. Gourley. May I ask how many plans there are?

Mr. Merrey. There is one plan.

30

Q I ask you if there are alternate plans included in this?

A There are alternate plans.

Q As I understand, there is a method by which the elevation could start nearer the center; instead of starting and taking in Madison avenue at the south end, it may just miss Madison avenue and start in where the Newark Line Railroad runs in?

A Yes.

40

Henry Ryon, direct.

Q And the larger plan includes running down to grade across the Passaic River at Hawthorne at the northern end?

A Yes.

Q The alternate plan running to grade in the vicinity of Fifth avenue?

A Yes.

10 Q (*By Commissioner Donges.*) Are the plans shown on separate sheets?

A On the same sheet.

Mr. Merrey. But it is cut into sections, I understand.

Q So each plan is easily distinguishable?

A The lines are made different, one in a dashed line and one in a dotted line.

20 Q (*By Mr. Merrey.*) Taking up the plan marked "Profile," since we start at the southern end of the city, Exhibit P-47; there is a line marked here "Profile," showing the present grade; it is a solid line with cross hatching; that is the present profile of the road as it now runs?

A Yes, sir.

Q That runs through, your line shows from the city line at Crooks avenue?

A Yes.

30 Q The first sheet runs down as far as the point where the Newark Branch of the railroad joins the main line, that is so?

A Yes.

Q At a point near Gould avenue, breaking away from the profile, is another line which is a long dash line, underneath shaded with pencil, what is that?

A That shows the proposed grade for the elimination of the Madison avenue grade crossing.

Q I notice another line, a siding?

40 A That one shows a possibility of a siding reaching the Leslie Elliott Company.

Henry Ryon, direct.

Q (*By Mr. Minard.*) That is indicated slightly west of Thomas street on the map?

A Yes.

Mr. Minard. The southern end is known as east and the northern end is known as west?

Commissioner Donges. They are the railroad directions?

Mr. Minard. Yes.

Q (*By Mr. Merrey.*) You have marked where each street of the City of Paterson crosses this profile, have you not? 10

A Yes, sir.

Q Showing Grove street, Goshen street, Gould avenue, George street and Thomas street?

A Those are not necessarily physical crossings.

Q But show the position of the map of the city?

A Yes.

Q These streets mentioned there run to the right of way? 20

A Run to the right of way.

Q And I think, in the case of one, Gould avenue—

A Gould avenue, and I think Grove street have actual physical crossings.

Q When we go west and reach Madison avenue shown on the map, you have an elevation there; what is that?

A In order to avoid cutting too deeply with the railroad, the plan shows the street itself elevated to some extent, about twelve feet, I should say, roughly. 30

Q Below this profile line you have shown several street crossings that shows the physical condition going away from the railroad?

A Those show the profiles of the street running to the railroad, and in the case of Madison avenue and Crooks avenue, across the railroad.

Q And showing the elevation proposed for Madison avenue to carry it across?

A Yes, sir.

Henry Ryan, direct.

Q The alternate plan for the eastern end of the right of way is shown on this first sheet, is it not, of this exhibit we are considering?

A This sheet shows the elimination of Madison avenue by a cut. This cut will run out somewhere near the Newark branch.

Q On the west, and on the east it would run out?

10 A Out about Gould avenue. That would be entirely independent of the other elimination.

Q So the plan as proposed by you might be carried through either by making a cut for the railroad crossing where Madison avenue now is or by raising Madison avenue entirely?

A Leaving Madison avenue as a grade crossing, not eliminating it.

Q Marked on this map you have proposed, with a per cent. sign after them, along the profile; what is
20 that?

A They give the per cent. of grade of the track.

Q It occurs on the present line, the present profile and the proposed one, does it not?

A Yes, sir.

Q So that under your plan the work may be done without making any change, on sheet 1, except on the western end of it?

A Yes, sir.

Q Taking up sheet two, proceeding there to the west; that shows on the west side of the sheet where
30 the Newark branch comes in to the main line, joins the main line?

A Beginning about where the Newark branch comes in.

Q And also shows Straight street; is that part of the alternate plan or the plan itself?

A This would be necessary to all the plans.

Q How does it show Straight street treated?

A Straight street, the street itself is cut down and
40 the railroad raised.

Henry Ryon, direct.

Q How deep, how much of a cut?

A The cut is about seven feet, I should say by looking at it. I can tell by scaling, the cut is about five and a half feet.

Q How much is the railroad raised at that point?

A About nine feet.

Q This sketch also shows the profile as at present and as proposed by you?

A Yes, sir. 10

Q And is indicated in the same way on all these sheets?

A Yes, sir.

Q Clay street; what is done at that point?

A Clay street is treated in the same manner as Straight, the street is cut about five or six feet and the track elevated about nine feet.

Q At Taylor street, I understand Taylor street is not now opened?

A No, sir. 20

Q You propose to open it, do you?

A I propose to open Taylor and close Cedar street.

Q Is that necessary for any reason?

A Not necessary, but convenient if the yard is to be kept where it is at present.

Q (*By Commissioner Donges.*) The railroad freight yard do you mean?

A The freight yard lies between Taylor and Market street. 30

Q (*By Mr. Merrey.*) That will appear more clearly, will it not, from the plan?

A It will show on the plan and shows here. We have got to come down from the main track elevated, to the yard at the present level, and if Cedar street is left where it is, it will give a shorter incline to come down.

Q How high would be the roadbed above the present grade at Taylor street?

A Eight feet. 40

Jerry Ryan, direct.

Q How much below the present grade of the street will it be cut?

A There is no street there, you cannot exactly give that.

Q Comparing it—it is open however to the line of the railroad, is it not, at present?

A Yes.

10 Q How far will it be below the present grade of the railroad?

A Eight feet approximately.

Q Going down to Essex street?

A Essex street is the present overhead crossing, that is, the railroad goes over the street.

Q What do you do there?

A Simply raise the bridge.

Q How high would the bridge be raised at that point?

20 A Eleven feet.

Q Would there be any change made in the street itself?

A The idea was to widen out the street there. Essex street at present is very narrow.

Q Market street; what do you do there?

A The street is cut down a little less than three feet and the railroad rails raised sixteen feet.

Q Ellison street?

30 A Ellison street is cut a little less than a foot and the rails raised about sixteen feet.

Q Van Houten street?

A Is treated in the same manner as Ellison.

Q Broadway?

A Broadway, the same manner as Ellison, except that the cut for the street is approximately two feet and the raise of the railroad about fifteen feet.

Q Fair street?

A Fair street, the street is cut a little less than a foot and the railroad raised fifteen feet, about.

40 Q Hamilton avenue?

Henry Ryan, direct.

A In the same manner as Fair street.

Q Governor street?

A Governor street is at present an overhead crossing, the railroad goes over the street.

Q Any change made in the street anywhere?

A The street is not changed, the grades are simply raised.

Q How much?

10

A Seventeen feet.

Q Fulton street?

A Fulton street, the same as Governor, at present an overhead crossing.

Q Go onto sheet three. Montgomery street?

A Montgomery street is not opened across the railroad at present.

Q Do you open that street?

A That street is shown to be opened, Franklin street being closed.

20

Q How high is the railroad raised at this point?

A Seventeen feet.

Q At Lafayette street?

A At Lafayette street, the railroad is raised about fifteen feet and the street cut about four and a half feet.

Q That street is now opened, is it not?

A That street is now opened.

Q You intend to close Franklin street?

A Franklin street is shown closed.

30

Q Why do you show that?

A It was a little more convenient there, the way the tracks were laid out, and also due to the fact it gave a better distribution of streets to open Montgomery street and close Franklin street. Franklin street, according to the census given in the testimony before this commission has the least number of people crossing of any street in the city.

Q Keen street?

40

Henry Ryan, direct.

A The street is cut about one foot and the track elevated sixteen feet.

Q Warren street?

A Warren street is treated in the same manner as Keen.

Q River street?

A River street is cut three and a half feet and the tracks elevated fourteen feet.

10 Q From this point on you have two plans going to the west, have you?

A Yes, sir.

Q Take up plan one first; what do you do at Sixth avenue?

A Plan one cuts the street at Sixth avenue about eight feet and raises the railroad about seven feet.

20 *Mr. Minard.* I will call to the attention of the commission that those streets up there are not in this proceeding at all.

Commissioner Donges. Very well.

Q Fifth avenue?

A Is treated in the same manner as Sixth avenue, the street is cut nine feet and the railroad raise, I think, eight.

30 *Mr. Herrey.* Sixth avenue, although opened by city ordinance, is not actually opened, because the commission refused to the city permission to put in a grade crossing at that point. Fifth avenue is actually opened and used.

Q Would that plan call for changing the bridge across the Passaic river?

A This plan would necessitate the raising of the bridge across the Passaic river.

Q How much?

A About seven feet.

Q Where would you run back to present grade?

40 A Strike present grade just a little east, you call it, of the New York and Susquehanna Railroad.

Henry Rogers, direct.

Q And the same distance west of the river?

A Yes, sir.

Q The second plan calls for what?

A The second plan runs from a little beyond River street directly down to present grade at Fifth avenue. It gives a grade on the railroad of almost one per cent.

Q Taking up the question of your plan, did you consider excavating, lowering below street levels?

10

A Not to any extent. It didn't seem to be feasible at reasonable expense. There is no way of lowering, for instance, the river bridge, and to go below grade in the main part of town would necessitate cutting out several of the intermediate streets.

Q And those are important streets, are they?

A Yes, sir.

Q Where does the road reach its highest elevation?

A Just east of Madison avenue at the Cooke Locomotive Works.

20

Q Where is it lowest?

A It is lowest, I think, at Keen street.

Q Probably lowest at the river, is it not?

A Lowest at the river, yes, sir.

Q Are there many hills below that, or is there a gradual slope from the river up to Madison avenue?

A Several breaks in grade.

Q What is about the average grade from the river to Madison avenue at the present time?

30

A About one-half of one per cent. I should say.

Q What is about the highest grade?

A The grade of 78/100%.

Q In your proposed plan, do you make a higher grade at any place than that?

A Yes, sir.

Q In the second plan you have I understand, you did not?

A In the second plan, in raising the bridge there is one grade of 95/100%.

40

Henry Ryon, direct.

Q If you were to lower the railroad considering the condition of things, you would strike level grades somewhere around Broadway, would you not?

A What do you mean by level grade?

Q You strike present grade again of the streets, about at Broadway?

10 A That would depend upon what method you took to depress.

Q You consider, you say, that it would be a very expensive proposition to cut instead of elevating the railroad?

A Yes, sir, practically impossible.

Q Take up the set of prints called present plan, Exhibit P-45; this shows a plan, does it, of the streets and railroad at present?

A Yes, sir.

Q Showing every switch and siding?

20 A To the best of my knowledge, yes, sir.

Q Where does it begin?

A Begins at Crooks avenue at the southern end of the city.

Q You have put a little insert on the sheet in order to show from Crooks avenue to Knickerbocker avenue?

A Yes, sir.

Q And then the main plan—

A The insert fits directly from the end of the main plan.

30 Q From Knickerbocker to about Iowa avenue?

A Yes, sir.

Q This is to the east of Madison avenue, is it not?

A Yes, sir.

Q Have you shown the outline of buildings near the right of way on this plan?

A Yes, sir.

Q Pass then to sheet two; that commences at Madison avenue does it, or Iowa avenue?

A A little below Madison avenue, yes, sir.

40 Q And runs on from there?

Henry Ryon, direct.

A Up to Clay street.

Q Or Straight street?

A Yes, sir.

Q That shows the Newark branch of the railroad coming in and joining the main line, does it not?

A Yes, sir.

Q It also shows a large yard?

A Yes, sir.

Q Do you interfere with that yard by your proposed plan in any way? 10

A We do to some extent at the northern end—at the western end, I believe, is the term used.

Q In what way do you interfere with it?

A Interfere with the ladder track at the north end of the classification yard.

Q The third sheet shows the right of way from Clay street at the west to Van Houten street in the east, does it not?

A Yes, sir. 20

Q And shows the present situation of buildings—

A Yes, sir.

Q Near the right of way, also the depot at Market street and the property marked Morris & Company, which I understand is owned by the railroad company?

A According to the right of way map,

Q And also the Fuller Express?

A Yes.

Q And the Hammond Beef Company?

A Yes. 30

Mr. Merrey. I understand it was testified, that was owned by the railroad.

Q Sheet four shows the present plan of the road from about at Van Houten street at the east to Warren street on the west?

A Yes, sir.

Q Showing the buildings in the vicinity outlined on the lots?

A Yes, sir. 40

Henry Ryon, direct.

Q Then passing to the next, sheet five shows the present condition from Warren street on the east to the Passaic River on the west?

A Yes, sir.

Q And the last sheet shows the Newark branch?

A Yes, sir.

10 Q And shows it there—you show there where it joins the main line on the west?

A It is actually the east end of the line, the west end is out at Hazel street.

Q (*By Commissioner Donges.*) For the purpose of your testimony you are following the railroad directions instead of actual directions?

Mr. Merrey. The last sheet is reversed, and what we have been calling the east is shown on the west side.

20 Q Taking up Exhibit P-46, does this show a plan of the road as it will be if the proposed changes are made?

A The suggested plan for eliminating certain grade crossings, yes, sir.

Q This begins the same as the old plan and each sheet corresponds to the same sheet in the old plan?

A Yes, sir.

30 Q Except in the alternate plan there is no change on sheet one of this exhibit, is there; the first alternate plan showing the elimination of Madison avenue?

A The only change on this plan is, that necessary for the elimination of the Madison avenue grade crossing.

Q Would there be any changes in switches or sidings?

A If the Madison avenue crossing were eliminated it would affect the Leslie Elliott Company's switch.

Q In what way?

40 A The cut at their building would be approximately nine and a half feet. They would either have

Henry Ryon, direct.

to abandon their siding or else lengthen it so as to come up to grade.

Q That can be done?

A That could be done by lengthening the switch.

Q Do you show the change on your plan?

A Yes, sir.

Q Where is that—that runs back to near Maryland avenue?

10

A Yes, sir.

Q Any other change made on this sheet?

A No, sir.

Q Take sheet two. Is there any change made on sheet two?

A On the plan eliminating Madison avenue it shows a cut up to the point marked cut-fill, about the centre of the sheet.

Q If you did not eliminate Madison avenue then there would be no change whatever east of that point?

20

A East of that line, no, sir.

Q The plan then contemplates the beginning of the elevation at that point?

A Yes, sir.

Q How much—do you elevate all the tracks, sidings and switches or principally the main track?

A Elevate the main tracks.

Q And your profile refers to the main tracks?

A Yes, sir; they also show some of the sidings, the principal sidings.

30

Q Is there any change made in this yard, shown on sheet two?

A One track is left out, one track on the side of the yard next to the main track, in order to get a back from the main track down to the present elevation.

Q Otherwise that yard is retained?

A No, the ladder at the north end is moved, so as to come up to the main track; it shortens the classification tracks.

40

Henry Ryon, direct.

Q Is there any change made in the Newark branch road?

A For a short distance in order to get down to grade. The Newark branch at present raises from the main tracks.

10 Q So it would be necessary to elevate it slightly to get it up to the contemplated grade of the main track?

A Yes, sir.

Q Is there any other change made in the vicinity of Clay street so far as it affects sidings?

A So far as it affects sidings; the siding of Robert McDonald is eliminated. That is necessary, because Straight street is cut down, no way of crossing the street.

Q The siding into the Commercial Lumber and Millwork Company?

20 A That could be gotten in. That would have to be depressed from the present elevation, on account of the cut in Clay street.

Q Any changes of sidings into the Passaic Steel Company?

A They are not affected; they come off the Newark branch.

Q Are there any other sidings on this map affected in any way, this sheet two?

A No, sir; I believe not.

30 Q Is there any service to the Dexter Lambert & Company, shown here?

A They have no siding I know of.

Q Going to sheet three, starting on the western line, are there any changes made there? I notice another siding of Robert McDonald, that is not the same as mentioned on sheet two?

A That is not the same siding. I believe that name is different on the Erie map.

Q What name is on there?

40 A I have taken the name of the siding, it is the

Henry Ryon, direct.

same building. The name on the building is Robert McDonald; marked Zabriskie on the railroad map.

Q That siding is not interfered with?

A That siding will be interfered with. It will be necessary to raise it and probably relocate it, the same as all other sidings in the same block.

Q Between Clay and Taylor streets?

A Yes, sir.

10

Q That will refer to the one running into the Standard Oil Co.?

A The Standard Oil Company, the National Wood Company, M. Goble and C. Kelley.

Q Are there other sidings there?

A The present tracks serve all the properties at grade. They would have to be raised and relocated.

Q Will it make any change in the switch that runs into their property?

A Yes, sir, they cannot get down to grade.

20

Q I notice here west of Taylor street some more service to the Standard Oil Company; is that interfered with?

A It will necessitate their going across the house tracks of the freight house.

Q Any change made in the freight house?

A No change made in the freight house, except the tracks must be approached on a zig-zag instead of direct from the main tracks.

Q I notice a switch running from Greene street; any change? 30

A Not affected.

Q The siding to Samuel Smith & Sons Company?

A Not affected.

Q I notice a dotted line showing a building apparently marked Morris & Company; what is that?

A That is simply a suggested location for Morris & Company. In laying out the new depot, it eliminates Morris & Company's building.

40

Henry Ryon, direct.

Q They will have to seek a new location, and that is the suggested location.

A That is simply the suggested location.

Q Are there any other sidings affected on that side of the right of way, between Greene street—

A No siding, except the tracks of the yard will have to be rearranged.

10 Q Will it interfere with the service of this yard?

A Not materially; it may shorten their trackage.

Q Does it elevate it?

A Elevate it about a foot.

Q What change is made as far as James Wilson & Son is concerned?

A James Wilson will not be affected.

Q There is no service now to the Watson Machine Company?

A No, sir.

20 Q Nor to the Barnett mills or the Dale mills?

A No, sir.

Q Taking the other side of the right of way, McNab & Harlan have some service?

A The switch leading from the main track to their tracks will have to be lengthened in order to get down from the new grade to the present grade.

Q They can be served at present grade?

A Yes, sir.

30 Q The Graham Brewing Company, the Bon Arbor Chemical Company, the National Biscuit Company and McNab & Harlan's second place?

A All on the same plan.

Q The Paterson Consolidated Ice Company?

A All on the same siding.

Q All will be served as at present?

A Yes, sir, except the lengthening of the switch.

Q They will be served at the present grade?

A Yes, sir.

40 Q Most all their switches are in Ramapo avenue, are they not?

Henry Ryon, direct.

A I don't know whether that is a public street or not. It would be Ramapo avenue according to the maps.

Q Would the Standard Oil Company be served at the same grade?

A No, sir, cannot be.

Q Will the freight house be served at the same grade?

A Yes, sir. 10

Q Eastward, the other places along Ramapo avenue from Essex street to Market, are not served at the present time?

A They have no sidings.

Q I notice near Market street at a point about where the present passenger station is, you have marked "Fullers Express"?

A That is the same as Morris & Company, a possible location for Fullers Express Company. They will necessarily have to move because no siding can be put in for them. 20

Q Do you think it is possible to maintain the present depot with this elevation?

A There is a difficulty in maintaining the present depot at that location on account of the fact that no platform can be obtained on the east side of the track. The street is only twenty-five feet wide, and there is no possible means of having a platform on each side of the track. It would mean that all the passengers for westbound trains would have to walk across the track, walk across the track of the eastbound train to get to the train. 30

Q Where do you suggest for the depot?

A We have therefore located the depot on what in railroad direction is the west side of Market street.

Q Just change it across the street?

A Just across the street. That allows a platform on each side of the track and allows a rail between the tracks. 40

Henry Ryon, direct.

Q That is right at the point where the New York, Susquehanna & Western Railroad touches the Erie?

A Yes, sir, practically.

Q Right at their station?

A Right near their station.

Q There might possibly be a combination of stations there, might there not?

10 A It is possible, yes, sir.

Q That would cause the elimination of Morris & Company's present building?

A It would, yes, sir.

Q The right of way then at the west of Market street is not any greater than it is east?

A The right of way, no, sir.

Q But there is more room at the side towards Ramapo avenue, west of Market street?

A Yes, sir.

20 Q Will there be an interference with the service to the Paterson Beef Company?

A Yes, sir, that siding will be eliminated entirely.

Q How about the service to the Herrman Company and the Daisy Canned Goods?

A They can be served but would have to be served about fourteen or fifteen feet higher than the present elevation.

Q There is a mill marked Rodgers Mill, how would that be served?

30 A It will have to be eliminated, unless the building is reconstructed. At present the siding comes under the building.

Mr. Merrey. It isn't used at all, it is a vacant building now.

Q Sulzberger & Sons Company?

A In the same condition; it would be necessary to raise the siding about fifteen feet.

40 Q Passing on then to west of Van Houten street; there is no service between Van Houten street and Broadway?

Henry Ryan, direct.

A No, sir.

Q And none between Broadway and Fair street?

A No, sir.

Q A little west of Fair street there seems to be a siding running off to John Agnew Company?

A Yes, sir.

Q Is that changed?

A It would have to be raised.

Q That can be done without difficulty, can it not? 10

A I don't know about the difficulty, it would be necessary to raise the coal trestle.

Q And give them room for larger pockets if they raised it?

A They have no pockets there now, possibly could put pockets under them.

Q How much would it be raised?

A About ten feet.

Q There is another switch running off, is that part of the Agnew switch running near Governor street? 20

A Yes, sir.

Q That would have to be raised?

A Yes, sir.

Q And now elevated?

A About twenty feet.

Q That would have to be raised how much?

A That depends on the grade they would run into it on; probably raised about ten feet.

Q Any interference with the Brewing & Malting Company? 30

A That siding would be raised fourteen feet.

Q Would that interfere with the service to them?

A I don't know exactly what their requirements are.

Q Armstrong & Son?

A Armstrong & Son would have to be raised and put on a trestle. They are a coal yard, at grade now. That would be raised about fifteen or sixteen feet.

Q Fullerton & Company?

Henry Kyon, direct.

A Would have to be raised about sixteen feet, a meat house.

Q Leydecker?

A A grain house, would have to be raised about fifteen feet.

Q You have gone over the testimony given in this case by the various switch owners, have you not?

10 A Yes, sir.

Q And tried to accommodate their wants as well as you could?

A When it was possible.

Q There is a siding here to Armour & Company near Hamilton avenue; any change made there?

A That will not be affected if a long siding is put in to serve all the sidings along there.

Q Katz Brothers Brewing Company?

A The siding will be moved nearer the street.
20 May make some difficulty in getting up there.

Q How high will it be raised?

A Not raised at all; pushed out thirteen feet nearer the street.

Q The Diamond Coal Company?

A The siding raised about five feet.

Q There is another one, the P. S. Van Kirk Company?

A The point of switch of that siding will be raised about two feet.

30 Q Will be served practically at the same level as they are now?

A Yes, sir.

Q One in to A. H. Smith?

A That will have to be raised, I think, about twelve feet.

Q Meyer & DeVogle?

A Meyer & DeVogle will be raised about fifteen feet.

Q That is a grain house?

40 A A grain house, yes, sir.

Henry Ryan, direct.

Q Is the Sipp Machine Company served at present?

A They have no siding.

Q Ashley & Bailey?

A No, sir.

Q Sheet five; I notice two switches into the Public Service Corporation between Putnam and Lyon street; are they interfered with?

A They will have to be altered somewhat in their line near the street. 10

Q There is a depot at River street, is it not?

A Yes, sir.

Q Called the River street depot?

A Yes, sir.

Q You make a change in that, do you?

A We simply raise the depot up and put a platform on each side of the tracks.

Q And one of those platforms interferes with the present freight station? 20

A Does not interfere with the present freight station, interferes with the siding running off to the Public Service Corporation.

Q That would have to be changed a little?

A Would have to change part of that siding.

Q They could be served at the same grade?

A Yes, sir.

Q The switch running into J. Van Den Hendel?

A Not affected at all. 30

Q Swift & Company?

A Not affected.

Q Henry M. Post?

A Not affected.

Q The National Silk Dyeing Company?

A The same as at present.

Q Ashley & Bailey?

A Not affected.

Q The Grasselli Chemical Company?

A The siding will be affected. It comes in at present. 40

Henry Ryan, direct.

ent from the west and runs along the south side of their building. To reach them at present, would have to come in from the east and run along the east side of the building, and would necessitate some changes in their construction.

Q One shown running into Auger & Simon?

10 A There was one but it must be eliminated on account of the depression of Sixth avenue.

Q It is not used at the present time?

A The switch stand is not there.

Q They are to be changed up to the National Silk Dyeing Company?

A I believe it is the same concern.

Q The same concern and getting ready to change. The present switch you spoke of, Auger & Simon, has been abandoned, has it not, the one near Sixth avenue?

20 A From appearances it seems to be abandoned, yes, sir.

Q One running in here below the Center Paper & Box Company?

A That will be raised about four feet.

Q The service to the Weidman Silk Dyeing Company?

A Left at the same line, raised about seven feet.

Q Is there a switch into LaPat?

A A switch to that property.

30 Q Is that affected?

A Not materially; shifted a little to the east.

Q The Nicholson File Company?

A The switch would have to come in from the west instead of the east and raised about two feet.

Q On the same side of the road there is some service into the Weidman Silk Dyeing Company; a coal yard?

A The coal yard, yes, sir.

Q Any change in that?

40 A The switch where it leaves the main track will

Henry Wiggin, direct.

be raised a little bit, the siding proper will not be affected.

Q West of Fifth avenue, there is one on the same side, to Weidman?

A Yes, sir.

Q Is that changed any?

A Raised about seven feet.

Q The Cooke Locomotive Company isn't changed any, is it? 10

A Not affected, they may have to rip-rap one of their banks to prevent it from sliding down.

Q The switch to Rogers Locomotive Company; is that affected in any way?

A No, sir.

Q That runs down Market street?

A That goes to the trolley tracks on Market street.

Q The National Biscuit Company, is that affected in any way? 20

A No, sir.

Q One marked E. M. Stiles on the company's map; is the one you had Commercial Lumber & Mill Work Company?

A Yes, sir.

Q There are two switches on the company's map, marked A. H. Smith. I think you only spoke of one; look at it and see if there is any change made in the second one?

A There is a switch to the north side of Franklin street, that will have to be raised about fourteen feet. 30

Q That is adjoining Fullerton Company?

A Next to Fullerton Company, marked on the Erie map as A. H. Smith.

Q Where is the switch of the Passaic Water Company?

A They are down near the storage yards.

Q Is that interfered with?

A No, sir.

Q The Hamilton Lumber Company? 40

Henry Ryon, direct.

A Down near the storage yard, not interfered with.

Q The one you referred to as Van Kirk?

A The point of junction with the main track is raised about two feet, gives them a little steeper grade.

10 Q The Paterson Vehicle Company, that is practically eliminated?

A Eliminated, yes, sir.

Q Did you refer to the switch of Swift & Company?

A Yes, sir; not affected.

Q The one referred to on the company's maps as Southerland & Edwards Company; is that affected?

A No, sir.

Q There is a switch into Puglia & Gramatica?

A Down near the storage yard, not affected.

20 Q The Paterson Consolidated Ice Company?

A On the same switch as McNab & Harlan, not affected.

Q Van Winkle, Bromley Lumber Company?

A That is on the Newark branch.

Q East of Main street?

A Near Main street.

Q Is that affected?

A The Newark branch is not affected, no, sir.

30 Q The Waldo Silk Ribbon Company, do you know where that is?

A I mentioned that before.

Q That is not affected, is it?

A It is raised about four feet.

Q Have you made up any estimate of the quantities of excavation and other work that would be necessary in connection with this change?

A Yes, sir, we took all the quantities of excavation, fill and concreting and other material.

40 Q That is a matter with which you are quite familiar?

Henry Ryon, direct.

A Yes, sir.

Q Did you attempt to get the cost of this work in any way?

A We used unit prices to figure out approximate cost.

Q Where did you get those unit prices?

A Most of the prices were taken from the city engineer's office, for similar work around the City of Paterson. 10

Q Mr. Harder?

A Yes, sir.

Q Any other unit prices taken from similar work of this kind?

A The prices for bridges were taken from reported contracts and the same with some of the track work.

Q Did you take the price for any similar work of this character?

A We compared them with the reported prices for the elevation of the P. & R. in Philadelphia. 20

Q How long ago was that done?

A About three or four years, if I remember rightly.

Q Have you made up an estimate as to the cost of this work?

A Yes, sir, on that basis.

Q Will you produce it for us? Have you a summary there of the cost of the work?

A Yes, sir. 30

Q How is it made up?

A Made up in sections, from street to street, giving the cost, that is the estimated cost approximately, of the railroad work and street work and the total.

Q For your complete plan, what is the estimate?

A A total of \$2,587,000.

Q That is made up for railroad work, how much?

A \$2,302,850, and the street work about \$284,000. 40

Henry Ryon, direct.

Q If you were to leave Fifth avenue at the present grade?

Commissioner Donges. Is this under plan one or plan two?

Witness. This is a complete summary, that includes the elimination of Madison and Fifth avenue and the raising of the bridge.

10 Q Have you made an estimate of the plan leaving Fifth avenue at grade?

A Yes, sir.

Q How much is that?

A The total is \$2,351,000.

Q Leaving both Fifth avenue and Madison avenue at grade, the total?

A \$2,038,000.

Q The plan leaving Madison avenue at grade but raising Fifth avenue?

20 A \$2,273,000. That is round numbers, does not include the smaller figures.

Q Does this include property damage or operating cost due to interference with present schedules?

A No, sir.

Q Under the plan, will there be much property damage?

A That is a thing I am not competent to state.

Q The change of grades of streets is very little?

30 A The streets are cut in some instances but to no large extent.

Q You have the summary there and the detail?

A I have a detailed estimate.

Mr. Merrey. I would like to offer this summary and also the detail, and as this one is in pencil, I would like to take it with me and furnish you and the other side with a copy of it.

Commissioner Donges. Very well.

Mr. Merrey. I offer them now in evidence.

H. J. Harder, direct.

(Summary, cost of elevation, Erie Railroad, Paterson, N. J., and detail, received and marked Exhibit P-48.)

Commissioner Donges. A typewritten copy will be substituted.

Mr. Merrey. Yes, we will furnish them with that.

Mr. Hobart. If the commission please, it is quite obvious this is a matter of great magnitude, costing over two million dollars at least. Mr. Merrey was good enough to furnish us with a copy of the plans but our engineers did not get them until four o'clock yesterday. They made a hurried examination in the short time they had. This is the first time we saw the estimates at all and a matter of such great importance to both the railroad and the city, I was going to make the suggestion that it would seem to be proper that we might delay the cross examination until our engineers have had an opportunity to make a study of this situation. It is a matter of vital importance, it is very important, and I make a somewhat unusual request for that reason. 10 20

Commissioner Donges. It seems as if it is a reasonable request, under the circumstances.

Mr. Gourley. I have not seen them until this morning. 30

H. J. HARDER, recalled on behalf of petitioner.

Direct examination by Mr. Merrey.

Q Mr. Harder, have you examined these estimates made by Mr. Ryon?

A Yes, sir.

Q The unit prices there, are they, what can you say about them?

A Do you mean how they were arrived at?

Q No, the unit price per yard and so on, for excavating; from your experience, are they fair prices? 40

H. J. Harder, cross.

A They are fair prices, in fact, they are a little larger than we have been paying for similar class of work.

Q You do a great deal of excavating, concreting and filling, do you not?

A Yes.

Q Building walls and so on?

10 A Yes.

Q Work of this character, outside of the bridge work?

A Yes.

Q You say these prices are high as compared with what the city has been paying for similar work?

A Yes, the prices were used in that way, so as to make the estimate on the safe side.

20 Q (*By Commissioner Donges.*) In your judgment they are higher generally than probably would be paid for the work?

A Yes.

Q (*By Mr. Merrey.*) For instance, I notice there we have on cut, \$2 a yard?

A That is a rock cut in that section.

Q A concrete wall, \$7.50?

A Yes, the last concrete wall we built was \$6.50, around the cemetery.

Q You have gone over all these prices submitted by Mr. Ryon?

30 A Yes, sir.

Q And you think they are high enough to be on the safe side in estimating the work?

A Yes, sir.

Cross examination by Mr. Hobart.

Q Mr. Harder, you have not included in the estimates, any allowance at all for property damage?

A No, sir.

Q Have you made any such estimate?

40 A No, sir.

H. J. Harder, cross.

Q Haven't gone into that feature of it at all?

A No, sir.

Q You have not included any allowance for operating cost by reason of interference; anything of that kind?

A No, sir, I didn't think we were competent to arrive at that.

Q You never had any experience in that particular line? 10

A No, not in that line of engineering.

Q (*By Mr. Merrey.*) As far as property damage is concerned, will that amount to much?

A What I was going to say—

Q You are familiar with the expense, the property damage, and grading of streets, are you not?

A You refer to the change of grade of streets? These grades of streets are not changed materially except in one or two cases. 20

Q The city is constantly engaged in changing grades of streets, grading and filling?

A Yes.

Q And you are very familiar with the amounts allowed for that, are you not?

A Yes, we have done a lot of that work.

Q You are familiar with this plan as to the amount of changes of grade. Is there any material damage done to property by the change of grade?

A As I said, only in one or two cases where the grade is changed. 30

Q So far as the grade of street is concerned, the amount of damage is very small?

A I think it would be slight from that source.

Q Can you imagine any other kind of property damage done here by this plan?

A No, I don't know of any other.

Q (*By Mr. Hobart.*) You said you had not made any estimate of the property damage, and I understand now from Mr. Merrey's examination, that you 40

H. J. Harder, cross.

referred particularly to property damage due to the grade of streets. May I ask if you have included in these estimates any allowance for damage to the property of sidings, and owners of sidings, due to necessary changes in the sidings?

10 A No, those figures show—the first column here shows, the cost of the work to be done on the railroad, the second column shows the cost of the work to be done on the street. What the damages would be to property facing on the streets where these changes were made, I don't know. I could not arrive at that.

Q You have not attempted to figure out at present, what the damage would be in case certain sidings were eliminated?

A No.

20 Q Such as damage to business by reason of the elimination of the sidings?

A No, I could not arrive at that.

Q And haven't attempted to figure how much it would cost to make the changes in the sidings to conform with the new change in the railroad?

A That is all in the statement, the cost of making the changes of sidings.

Q All charged to the railroad?

A The statement of what we estimated it would cost.

30 Q Is it separated from the cost of the main line tracks?

A Yes, sir.

Q That appears?

A Yes, sir, that will all appear in this statement.

Q (*By Commissioner Donges.*) In the detail?

A Yes, sir.

40 Q (*By Mr. Hobart.*) Have you included in that any allowance for any necessary changes that might have to be made in the buildings of the various owners of these sidings?

H. J. Harder, cross.

A No, it was the cost of the sidings.

Q Just the siding alone?

A Just the cost of the siding.

Q Whatever buildings of the railroad company are changed, there is an allowance made for?

A Yes. You mean buildings like the Rodgers building spoken of?

Q Yes?

10

A No, no allowance for that.

Q Have you a detail there of the necessary changes in the Market Street Station of the Erie Railroad Company?

A It is in a lump sum.

Q How much is it? On the summary it shows \$140,000 for depot? Mr. Harder, do I understand that this estimate of \$140,000 for the depot includes both the Market street and River street depot; is that your understanding?

20

A Mr. Ryon made those estimates. It does.

Mr. Hobart. We may want to ask Mr. Harder some further questions at the next hearing. With that understanding, I think we will not go any further at this time.

Adjourned until Thursday, June 18th, at Kinney Building, Newark, at 10.30 A. M.

30

40

W. H. Brameld, direct.

ELEVENTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS.

Newark, N. J., Thursday, July 9th, 1914.

PATERSON GRADE CROSSING ELIMINATION, ERIE RAILROAD. }

10

Before Commissioner R. W. E. Donges.

F. H. Sommer, Esq., Counsel.

For petitioner appears E. F. Merrey, Esq.

For respondent appears G. S. Hobart, Esq.

For switch owners appears W. R. Gourley, Esq.

20

Mr. Hobart. At the last hearing I believe it was understood that we might have an opportunity to cross examine the city's engineer if we so desired. We have considered that question further and have decided not to cross examine.

Mr. Gourley. I have no questions.

Commissioner Donges. Is there anything further you wish to offer?

Mr. Merrey. No, sir.

30

Mr. Gourley. I would say on behalf of the switch owners I understood from the attorney of the Erie Railroad that his witnesses would take the greater part of the day. I will ask a further time when I may be heard.

Commissioner Donges. Yes.

W. H. BRAMELD resumes the stand on behalf of respondent.

Mr. Hobart. He had been sworn in this case.

Direct examination by Mr. Hobart.

Q You have already been sworn in this case?

A Yes, sir.

40 Q I believe you have already given your experience in the line of grade crossing work?

W. H. Braumfeld, direct.

A Yes.

Q I will ask you whether or not you have examined the plans and the scheme of elimination of the grade crossings in the City of Paterson as proposed by the engineer of the city at the last hearing in this matter?

A I have.

Q When did you receive the detailed report of the estimates and plans?

10

A I can tell you exactly from my correspondence.

Mr. Merrey. I presume that don't make any difference.

Mr. Hobart. I want to show how much time was spent on it.

Mr. Merrey. I think the results would show the time taken.

Commissioner Donger. We will permit him to state.

20

A I received it on June 24th.

Q And since that time how much time have you spent in the examination of the plans and estimates?

A Considerable. All that I could possibly get in and keep my regular work going, which probably amounted to several hours a day.

Q Now, will you kindly examine the plans which you have before you and refer to them in the course of your further testimony? I will ask you first with special reference to the profile plans; have you examined the profile plans with special reference to see whether it was a completed plan or otherwise?

30

A I have.

Q With what result?

A There are various changes which I think will have to be made.

Q Will you kindly take those up in detail as you examined them?

A In the first place, the profile—in investigating the plan the profile doesn't indicate, I do not believe, 40

W. H. Brumfield, *direct.*

the base of rail or top of rail which the profile shows. Of course, that would vary the floor depth that they show on the bridges.

Q What difference would it make?

10 A Probably five or six inches in the floor depth and the plan scale and figures of three feet floor depth, which would be a proper floor depth in most instances if the figures were on the base of rail, the clearance line of three feet from top of rail would only leave two feet six inches; it would not be sufficient to give a solid waterproof floor bridge.

Q Three feet is the recognized standard length?

A Usual depth where no other complications we would adopt as a standard and we are putting them in at that.

20 Q With particular reference to the depression of the tracks at and near Madison avenue, what have you to say as to that?

A As to the profile, I believe that most of the excavation will be in solid rock. That being the case, it is rather expensive. I believe it is possible to eliminate Madison avenue at much less expense by leaving the tracks as they are and raising the street entirely over the railroad.

Q In other words, elevating the street instead of depressing the tracks?

30 A Yes. In doing that I believe it is more advisable to move the crossing further west. The land is undeveloped on both sides and using a five per cent. grade would probably land you out the same place with the approaches, as they do with two and three per cent. grade they show; but by moving it further west the traffic, where the trolley is now, would go along just the same and it wouldn't disturb the general trend of traffic, only across the railroad track, but I believe it could be moved further west and I believe it could be done at considerable less expense. Roughly, I figured
40 that several years ago, and according to my recollection

W. H. Braumfeld, direct.

tion I don't believe it would come to more than \$100,000 or \$110,000.

Q Which is much less than the method proposed by the city?

A Yes.

Mr. Merrey. There are two methods.

Witness. For Madison avenue?

Mr. Merrey. Yes.

10

Witness. Not on the plan.

Mr. Merrey. One lets it alone.

Mr. Hobart. We were speaking of depression.

Q Of course, if you leave the crossing there it wouldn't be any expense to anybody, would it?

A No, sir.

Q (*By Mr. Merrey.*) Did you say the property was undeveloped on both sides?

A Both sides west of the railroad; the west side where the new viaduct would go.

20

Q Both sides of the railroad or both sides of the avenue?

A No, both sides of the railroad; parallel to the avenue on the westerly side the property isn't built up, just vacant lots.

Q It is built on the easterly side?

A Easterly side, the locomotive works and a dwelling.

Q (*By Mr. Hobart.*) Is the five per cent. grade of the street anything unusual or out of the ordinary?

30

A No.

Q For the street purposes do you think the modified plan you propose would answer the same purpose as the city plan for depression?

A I believe so, yes.

Q Now, calling your attention further to Madison avenue, what distance, according to the plan, was provided from the centre of the track to the side of the wall?

40

W. H. Brameld, direct.

A The plan shows nine feet six inches.

Q That is for depression?

A For the depression.

Q What have you to say whether it is sufficient or not, and if not, why not?

10 A I do not consider it sufficient to accommodate the drainage; putting a track in a rock cut, naturally all the drainage will follow along the track and a cut the length of this will accumulate considerable water. I believe sufficient room should be left for a ditch, probably between eleven and twelve feet and also the track into the locomotive works, and also the approach of the track to the Leslie Elliott Company's property. The distance from the centre of the track to the outside wall is shown as seven feet; with the railing that would have to be erected on the wall to protect the switch-
20 man, it would probably take six inches from that; considering a car ten feet wide would only leave one foot six inches for the switchman to do work between the railing and the car, which I don't think is sufficient.

Q Why is that insufficient? Unsafe?

A Unsafe.

Q With further reference to Madison avenue, what is the clearance as indicated on the plan of depression?

30 A The clearance is indicated as twenty feet for the under side of the bridge, but I, on account of not knowing whether the profile shows the top of the rail or base of the rail—our standard is twenty-two feet above base of the rail, the under side of the bridge.

Q That is twenty-two feet of clear space between the base of the rail—

A Base of the rail and under side of the bridge, the clearance for steam territory, and twenty-four feet six inches for electrified territory.

Q So, if we ever have a trolley line at that point the clearance should be even more?

40 A If the railroad company should be electrified it should be more.

W. H. Brameld, direct.

Q Referring to the section on the Newark branch junction shown by these plans, what would be the effect of the carrying out of the plan as proposed with reference to the track of the Newark branch at the west of Clay street?

A That eliminates one track from Newark branch junction into the yard west of Clay street.

Q And about what would be the length of track that would thus be eliminated? Have you figured that? 10

A No, only between those two points. Probably twelve hundred or thirteen hundred feet.

Q Now, referring to the same neighborhood, I would like to ask, the property on the other side is Robert McDonald's?

A The property of Robert McDonald's, as testified by the city engineer, is eliminated.

Q Now, referring to the profile map again with reference to the sidings east of Straight street, what have you to say as to the clearance as shown on the profile map? 20

A Evidently the profile is drawn without any provision for a vertical curve; the grade being shown as starting at about the point of the frog on a change of grade of one per cent. for one track and two per cent. for another. It is absolutely necessary to provide room for a vertical curve.

Q Why is that necessary?

A On account of the cars uncoupling.

Q Well, on the map as it stands, could the cars be operated? 30

A No, they would break apart. This train would break apart just as you went over the joint.

Mr. Merrey. If the commission please, I make this objection at this time so we may save time. The witness is starting to criticize a preliminary set of plans as if they were working drawing plans for the construction. Little details of this kind are expected to be intelligently worked out in the 40

W. H. Brameld, direct.

working drawing. It seems to me we shouldn't go into inconsequential details. From the amount of notes the witness has before him, it will take several days. As the commission's time is limited, too, and this will be protracted over months, we object to that.

10 *Commissioner Donges.* If you mean that the objections or criticisms of this witness are directed to those things which occur to him as he found them in the plan submitted by the city, I don't see how very well, in view of the fact that the city submitted the plan in the first place as a workable preliminary plan at any rate, we should say to this witness he could not point out what appears to him as defects. Particularly as this commission outlined the plan to be adopted if the grades were to be separated at this point, it must have
20 the benefit of all suggestions it can get.

Suppose the commission should conclude the grades should be separated and should adopt the plan submitted by the City of Paterson—

Mr. Merrey. I don't pretend this is a working plan. It is a scheme that an architect who, wishing to make the plan of a house, would leave the details of the ornaments and so forth to be worked out. The witness says in going around a curve one track is a little higher than the other.

30 *Witness.* No.

Mr. Merrey. That isn't the fact.

Mr. Hobart. He says he can't operate over it.

Commissioner Donges. I think that proper examination, but we hope it won't be more extended than necessary and matters that would properly be taken up in working plans will not be covered more than necessary.

40 *Mr. Hobart.* That is the whole purpose of the examination. If we had more time we would find more criticisms. These occur at first blush.

W. H. Brameld, *direct.*

Q Now referring to the plan for the change of grade of the main tracks and side tracks at the west end of Clay street bridge, is there any difficulty there in regard to vertical curves?

A Yes.

Q What is the trouble?

A West end of Taylor street bridge?

Q Clay street?

A Yes; the main track there is a five-tenths grade, in fact a level grade across the bridge, without provision for a vertical curve. None is provided.

10

Q None is provided on the face of the map?

A No. In providing that vertical curve it would be necessary either to lower the street a little more or raise the tracks west of this point.

Q In regard to Taylor street, is there any similar difficulty there?

20

A Yes, on the siding to the yard there is very little—the break in grade doesn't start exactly at the bridge, but it does start sufficiently away to get a vertical curve. The easterly side of Taylor street, the siding profile to the warehouse shows it runs down a two per cent. grade and coming across the bridge the scale is approximately three-tenths on the siding there, which means a change of 2.7 per cent. grade and there is an approximate allowance of about forty feet. I think for a 2.7 per cent. change of grade a vertical curve of almost in the neighborhood of 400 feet on the vortex where the siding grade meets the warehouse grade would be 200 feet, from the point they show it, which would necessarily raise the siding to a considerable greater height than shown, probably three or four feet, which would keep the tracks up so high at Clay street they couldn't get across to the Commercial Lumber Company. It is practically cutting out the Commercial Lumber Company. That would show the necessity for considerable vertical

30

40

W. H. Brameld, direct.

curve on the grade on account of the complications that might arise with the siding.

Q You say the curve, as it is shown on the map, is only forty feet, where it should be four hundred.

A It is shown about forty feet and it should be almost four hundred.

10 Q Referring to the plan for Straight and Clay streets, have you any suggestions to make as to the elimination of those crossings?

20 A Why, as near as I can tell from scaling the map, using the profile—as the profile of Straight street and using the plan and scaling from that, working according to that profile would give an underclearance to the clearance line of the outside girder of only eleven feet five and one-eighth inches instead of thirteen feet, the clearance shown. The tracks must be raised to change the eleven feet five and one-eighth inches, or the street south of the tracks lowered the same amount to provide the thirteen-foot underclearance as shown; this would make the cut at the corner of Straight street and Clay street, instead of 1.8 feet between four and five feet, and the grades run out considerably further than shown on the plan.

30 Q Have you examined those plans and have you examined the ground also with a view to see whether it is practicable to combine those two streets, Straight and Clay streets, instead of having them separated?

A I haven't made a thorough examination. From my knowledge of the situation I believe the proper thing would be to combine Straight and Clay streets into one crossing.

Q Would that be less expensive?

A I haven't figured it out. In my opinion, yes.

40 Q Would it have any material effect, as far as you can tell from your examination on the ground, on the traffic of the street?

W. H. Brameld, *direct.*

A Not serious, no.

Q Turning to the siding that leads to McNab & Harlin, what have you to say about that?

A The vertical curve situation is the same here as at the other siding. There has been no provision made for the vertical curve; the grade showing a drop of two per cent. practically from the frog, which we couldn't operate, and to put in the proper vertical curve would raise the siding and move the present connection with the lower siding further east. 10

Q As it stands on the plan is it at all practicable or feasible?

A No. It could be made to operate by making allowance for a vertical curve, raising the grade and increasing the cost of the work. Also the same criticism would apply to this siding and also the approach from the main track to the yard, the present siding at Market street station. That is only allowing seven feet from the center of the track to the outside of the wall and leave, by putting a railing would take off six inches, leave about eighteen inches for the purposes of the man standing alongside the track for doing switching. 20

Q Is there room enough to build a siding and get the standard clearance?

A No, I don't believe so. You would have to give concessions. You couldn't get the standard, but it would be a tight squeeze to get it in. 30

Q What is the standard clearance?

A Our standard clearance is—that is, the width of the road is nine foot six inches from the center of the track. But if you take a car five feet from the center of the track to the outside of the car, and a man ought to have at least three feet to stand for switching, uncoupling and making switches, which would make eight feet, and six inches, then I don't think there ought to be less than eight feet six inches; 40

W. H. Brameld, direct.

there should be nine feet, if you could get it. The suggestion made that we have that same situation at other places; that is no reason why we should perpetuate and increase the number of dangerous spots on the railroad.

Q We are trying to get rid of those dangerous places as far as practicable.

10 A Wherever we do new work we try to make the work so it will be safe for the men to work in.

Q What did you say the standard clearance was?

A Our standard clearance is nine feet six inches from the center of the track.

Q Now, referring to Taylor street, I call your attention that according to the plan there appears to be a five-tenths grade on the approach to Taylor street on Railroad avenue. Is it necessary to have that kind of a grade for the street?

20 A The only reason for using it might be for the purpose of drainage, avoiding putting in a sewer. It seems to me it would damage the property more than if you put a five per cent. grade and had a short approach instead of a long approach.

Q (*By Mr. Merrey.*) You said five-tenths. It is five per cent., isn't it?

30 A No, this is on Railroad avenue. On Railroad avenue shown on the plan, not the profile. It is on Railroad avenue, the approach to Taylor street at Railroad avenue; it doesn't show on this profile; it is indicated on the plan.

Q (*By Mr. Hobart.*) Of course, if you use a heavier grade there is just that much less property affected?

A Yes, that much less work.

Q I see on your memoranda a reference to Rodgers Mill siding. Which siding is that?

40 A On Van Houten street.

W. H. Brameld, direct.

Q Is there any provision made for taking care of that siding?

A No.

Q As far as the plan indicates. I want to call your attention to the fact that there is no allowance for a vertical curve in the neighborhood of Ellison street; what have you to say about that?

A No allowance for a vertical curve in main tracks at Ellison street, the break in grade being shown at edge of bridge. 10

Q What you have already said in regard to the other vertical curves applies to this location?

A To get a vertical curve you must raise one grade or the other, or lower one grade. It will change the elevation of the tracks, or lower the streets, to get the proper vertical curve to operate.

Q You have testified that they haven't any allowance for a vertical curve at Lafayette street? 20

A No.

Q You didn't find any such?

A No, I find, in general, there has been no provision made for a vertical curve throughout.

Q Referring to Van Houten street, what is the clearance provided for according to the plan?

A Fourteen feet.

Q Is that more or less than is really necessary?

A I believe it is more. There is no trolley road that uses Van Houten street. Thirteen feet is used for Ellison street, I believe. Thirteen for Ellison street and fourteen for Van Houten. 30

Q Is there any difference in the cost if you used one or the other?

A Well, it would probably cheapen the city's work. It would increase our work on account of higher abutments and also on account of the amount of excavation that has to be taken out of the street. 40

W. H. Brammell, direct.

It would increase a little, lengthen the pavement and curve. It is not a serious matter.

Q That is a matter that could be obviated without much difficulty. Referring to the team track between Lafayette street and Franklin street?

A That used to be A. H. Smith's siding. I understand we use it as a public siding now. It is between
10 Lafayette street and the next street west.

Q Franklin street?

A Franklin street. We probably couldn't use it on any plan of elevation.

Q Do you know whether it is on the right of way?

A It is on the right of way.

Mr. Merrey. What is the number?

Witness. On A. H. Smith. I haven't the map.

Mr. Hobart. Twenty-nine, I think.

Q The plan apparently provides for raising that
20 a certain number of feet. Would it be practicable to make deliveries as you do now in case it was raised?

A No, they couldn't use it. The plan showing the siding runs off the property of Mr. Smith, but he doesn't use it very much now. We couldn't use it as a public siding as we do now. It depends on whether the owner wants to go back in the coal business or not whether he would want that siding put in.

Q Now, referring to the provision according to
30 the plan for the platform at River street, have you any suggestion to make as to the length of the platform at that point?

A The platform was about six hundred feet. I think we should have eight hundred feet.

Q Why?

A Practically the length of the train. We stop the same length at River street as Market street, twelve or thirteen cars in a train and the platform wouldn't be long enough. People would have to walk
40 through the train to get off at the platform.

W. H. Brameld, direct.

Q Or get off in the ditch?

A Yes.

Q Or climb on the wall. Now, referring particularly to the plan described as Plan No. 1, with reference to the locality west of River street; what have you to say of the provision for a vertical curve and siding?

A As I said before, there is practically no provision made for vertical curves at any of these sidings. The same applies, I believe, to all. 10

Mr. Merrey. We admit that. We say that is a detail to be worked out with the construction and it makes very little difference.

Mr. Hobart. It is a very important detail.

Mr. Merrey. We simply say there is no provision made for vertical curves. It may be an inconsequential thing even in your mind; it may mean a change of grade of half an inch or an inch, in some places it may mean more. 20

Mr. Hobart. You admit the plan in that respect at least is defective and impracticable?

Mr. Merrey. No, we say that is a matter of construction.

Commissioner Donges. You say the plan don't deal with that question?

Mr. Merrey. It is a matter that isn't dealt with in the plan in this case; a mere matter of working out. They will find when their own plans are drawn there are some little details to be worked out afterward. 30

Q For Mr. Merrey's benefit, won't you tell us just what a vertical curve is?

A A vertical curve is an easement curve where there is a change in the grade.

Q (*By Mr. Gourley.*) Will you please explain the explanation?

A If I had a diagram I could show you here. You 40

W. H. Brameld, direct.

- have a grade here and coming this way (indicating); you have a peak and summit. I think if you rode your automobile over that you would probably feel something if it was excessive. If we ride cars over that one box car is this way (indicating) and one box car that way (indicating). Naturally it has a tendency to pull off the couplings. There is a certain amount of play. I put in some vertical curves at Buffalo using a rate of change of three-tenths, a change of three-tenths grade in one hundred feet. The last time we went over there a freight conductor told me he pulled trains apart every day getting over.

Q (*By Mr. Hobart.*) You make the approach up and the descent down of each grade as easy as possible?

A If there is an excessive change at one point you break the train apart, the coupling.

- Q** Instead of a vertical angle you make a vertical curve, ease it off?

A Yes. You build them on the highway. They are more necessary on a highway than a railroad.

Q Now looking at the plan the other siding is the Waldo Silk Ribbon Company?

A That is a siding on the right of way.

Mr. Merrey. If you will refer to the number it will indicate it on the record better.

- Mr. Hobart.* Number 57.

Witness. Both 56 and 57. I believe the Center Paper & Box Company, they use the same mill. I don't know positively. They do drive now parallel to the railroad and up to this mill. I don't know whether the road is used as a public street or not. If it is laid out as a public street to raise it that way four feet you have to grade up and down both sides.

Mr. Merrey. It isn't a public street.

- Witness.* Then you have to raise on a full

W. H. Brumeld, direct.

about four feet high. If it is not a public street, you can do anything you want.

Mr. Merrey. It isn't a public street. Waite street stops just east, comes to that property.

Witness. If it isn't a public street you can do anything to the siding.

Q Now, then, there is another siding which you have indicated on your memorandum as being east of Fifth avenue. Do you know which one that is? 10

A The one into Nicholson's file works.

Q What have you to say of the proposed plan of that siding?

A Scaling from the map indicates a two per cent. grade starting down in the middle of the turnout. That is the same criticism of the vertical curve; they will have to change the elevation of those sidings to put in the proper vertical curve.

Q On Plan number two west of River street there is another siding which apparently has the same difficulty about the vertical curve? 20

A Yes, it is the same all the way through.

Commissioner Donger. Do you see any reason why those difficulties shouldn't be overcome?

Witness. No, absolutely not. I think they can be overcome. I haven't investigated each case. I believe it is possible to do it. It will change the elevation of the siding and probably add a little expense and may mean more difficult— 30

Commissioner Donger. To change the grade?

Witness. Yes. I think it can be changed and made right.

Q Now, will you kindly refer again to the plan in the neighborhood of Straight street with particular reference to the proposed bridge. What have you to say about that?

A I believe I explained that before.

Q As to the clearance line particularly. 40

W. H. Brumfield, direct.

A The break in grade is too close, is under the bridge and it doesn't give sufficient clearance to the outside girders.

Q Which bridge is this?

A The Straight street, which is the next one to Clay street.

10 Q Have you examined the plan in connection with the proposed bridge at Clay street?

A Yes, I find the same condition. The grade on the south side of the track hasn't started far enough from the track to give the clearance that it ought to of the outside girders. The track would have to be raised nine inches or the street south of the track lowered an additional nine inches to get the clearance. That is approximate.

20 Q How about River street bridge as shown on these plans; what have you to say about that?

A The River street bridge scales three feet floor depth, if the line shown is the base of rail.

Mr. Merrey. It is the top.

30 Witness. It is the top of rail. The engineer for the city makes a statement it is the top of rail. That being the case, there is only two and a half feet allowed for solid floor, which is not sufficient. We can put a bridge with that floor depth, but it wouldn't be a watertight, waterproof floor bridge. It is not a thing the company is putting in.

Q What is the purpose of a floor depth of that kind?

40 A Three foot ordinary bridge of that kind where the span isn't too long to give a clearance above track, probably for a fifty foot span, three feet would be sufficient; to get over that you would have to spread the girders or track. At River street they show the difference between the girder and the eastbound track as twenty feet. This provides a space for a platform.

W. H. Brumfield, *direct.*

A structure of this type requires a floor depth from base of rail to clearance line of about four feet three inches, therefore the track will have to be raised an additional one foot three inches or the street depressed an additional one foot three inches for the clearance of fourteen feet.

Q Why is it necessary to have a larger depth of this kind of bridge?

10

A The girders are twenty feet further apart. You have a deeper floor beam to carry the loading and outside girders.

Q The girders stronger?

A The girders stronger and the floor beams and I-beams stronger and deeper on account of the location of the track with reference to the girders; twenty foot span instead of fourteen foot span.

Q In view of the suggestion that has been made, perhaps off the record, by the city engineer that these measurements are from the top of rails instead of from the base, does that make any difference as to any of the other bridges?

20

A It makes a difference on all the bridges; of course, if they are willing to accept the type of flooring we could put it in two and a half feet.

Q Would it be good engineering?

A Not with the trouble we have afterwards in municipalities coming back and wanting us to spend more money to make waterproofing on a bridge where we can't make it waterproof. It is something I don't believe I should recommend doing.

30

Mr. Hobart. I might say here, Mr. Commissioner, that this is all we will have to present, at least in regard to their plan. We have considerable more testimony about the estimates put in. If Mr. Merrey cares to cross examine on this subject before I take up the further subject of the estimates.

40

W. H. Brameld, cross.

Commissioner Donges. Very well, we will adopt that course if Mr. Merrey is agreeable.

Mr. Merrey. Yes.

Cross examination by Mr. Merrey.

Q I might ask, Mr. Brameld, if you are familiar with the Reading elimination of grade crossings in Philadelphia?

10

A I am not.

Q Do you know all these figures there are two feet eight inches from the top of rail to the top of girder?

A I don't know they are. I am only judging the situation from the practice of the railroad—the trouble we have had.

Q You know the Reading is the latest to eliminate in Philadelphia?

20

A I didn't know it was. I thought the Big Four & Crescent was.

Q The criticism you made of the road under Straight street could be changed so as to obviate the difficulty you say is there?

A Yes, sir.

Q Without much trouble?

A Yes, sir.

Q As a matter of fact all the criticism you make can be corrected without a great expense or trouble?

30

A I haven't gone far enough to say whether they can be corrected without causing so much trouble. I have looked at the plans with an idea of what I would have to do if I was going to make a plan and a plan that we could work by. In other words, if I was going to work up the details of these things I would have to try to get out details. That is what occurred to me. Of course, I haven't worked up the detailed solution of everyone of them, but from my general knowledge of the situation I think they could be taken care of.

40

Q You referred in your testimony to certain

W. H. Brameld, cross.

standards of the road. I will ask you if the road is in all places up to those standards?

A No. We wish it was.

Q So when you speak of nine foot six inch clearance that would be an improvement on the present condition at these points?

A No. At some places; not all. McNab & Harlin I believe all the points I have pointed out we have no such condition of that kind, although there are places you might find them. It is no argument if there are places with them why we shouldn't do away with them.

10

Q You can get sufficient clearance if you widen out the fill at that point?

A I believe you can, all except McNab & Harlin, on account of lowering the siding you might have to spread one and a half to two feet. In the other tracks you can take care of it.

20

Q There is a public street between McNab & Harlin's and your right of way?

A There is.

Q So it would mean a slight encroachment on the street?

A I believe your plan shows the wall encroaches on the street.

Q A slight additional encroachment?

A Yes.

Q The street is used only by McNab & Harlin?

30

A Practically, and the brewery and the chemical company up there.

Q It is not a street used by the general public?

A It is not a public thoroughfare, I believe.

By Mr. Hobart.

Q Does this plan of the city with principal reference to McNab & Harlin, contemplate the use of the street as well as the right of way?

A It does. They use the street now.

Q Would it take practically the entire street?

40

W. H. Brameld, further direct.

A Why, yes. The siding is practically the entire street, up there. There is just about room enough to get by with a wheelbarrow in some places now, I believe.

Further direct examination by Mr. Hobart.

10 Q Now, Mr. Brameld, with reference to the estimates of the cost of this work: Have you examined the city's estimate as offered in evidence?

A I have.

Q I will ask you first if you have prepared an estimate covering the same items as the estimate of the city?

A Yes.

Q Have you it before you?

A I have.

20 Q Is this paper which you have before you a summary of your estimate?

A Yes. I estimate the same as they do, as the city's estimate, leaving out property damage and operating cost due to interference with regular schedules and rearranging industries on the railroad right of way.

Q On page two of your estimate have you put down comparative figures?

A I have.

30 Q In your estimate as compared with that of the city?

A I have.

Mr. Hobart. I would like to offer that in evidence.

Commissioner Donges. Is there any objection?

Mr. Mccrrey. No.

(Same is marked Exhibit R-101.)

Q Have you the details upon which this summary is based?

40 A Yes, the detailed estimate is attached to the

W. H. Brameld, further direct.

total estimate. This is a summary just of the items that were included in the city's as a comparison.

Q Please refer to that, I want to offer that in connection with the others.

A Here are copies of the total estimates.

Q Have you also prepared an estimate of the total cost of doing this work?

A I have.

Q Including the items omitted from the estimate of the city? 10

A Yes.

Q Is this paper I show you, dated July 8th, 1914, and headed "Summary, cost of elevation, Railroad Company's estimate of city's plan, dated 1914, estimate of total cost," is that the summary with the detail attached?

A It is.

Mr. Hobart. I offer that in evidence. 20

Commissioner Donges. It will be admitted and marked.

(Same is marked Exhibit R-102.)

Q Without going over all these figures, because this will be in evidence, and can be referred to; what is your estimate for the total cost of the complete plan as proposed by the city?

A Total cost, \$3,384,084.88.

Mr. Merrey. What page?

Witness. Second page of total estimate. 30

Commissioner Donges. The first two pages of the second exhibit just offered by the respondent are the same as the exhibit previously offered this morning?

Witness. No. Included in this summary is the items the city didn't figure on.

Commissioner Donges. I see you have included on the second page of the last exhibit some estimates which were not put on the first exhibit.

Witness. Yes. 40

W. H. Brameld, further direct.

Q (By Mr. Hobart.) You have tried to include in this second exhibit all possible costs including various items not in the city's estimate?

10 A Yes, that was what I tried to do. The total cost for the complete plan \$3,384,084.88. The railroad work amounting to \$2,881,417.63; street work amounting to \$356,120.25; rearranging industries on right of way amounting to \$146,547.

Q Now, have you made a study of these plans and of the situation on the ground in Paterson with a view of determining whether or not the work proposed by the city could be divided up into sections and part of it done at one time and part at another time without affecting the general scheme?

A Yes.

Q With what result?

A I believe it can be divided into five sections.

20 Q Can you point them out or describe them?

A In the profile I have shown in red the different sections. Section A would be the section that would eliminate the crossings at Market street, Ellison street, Van Houten street, Broadway, Fair street and Hamilton avenue; it would open up Montgomery street; eliminate Lafayette street.

Commissioner Donges. When you say eliminate what do you mean, separate the grades?

30 Witness. Yes, separate the grades. Open up Montgomery street, a new street, it would open it up and be an undergrade crossing, not at grade.

Commissioner Donges. And separate the grades.

40 Witness. In these other streets I have enumerated, on this section it would temporarily close Keen street, permanently close Franklin street, as was suggested by the city and would raise Warren street about three feet, still leaving it a grade crossing. This is accomplished by commencing just east of Essex street and rising on

W. H. Brameld, further direct.

a one per cent. grade to the end of the platform for the Market street station and then following the profile as shown by the city's plan to Hamilton avenue and then descending on a one per cent. grade that would intersect the present grades of the tracks in the neighborhood of River street.

Section B would raise the grade from Hamilton avenue to River street at the elevation shown on the city's plan. Included in this section would be the elimination of Keen street, Warren street and River street, using the city's plan Number two, west of River street, to grade at Fifth avenue.

10

Section C would eliminate Straight street, Clay street, also as an undergrade crossing Taylor street, close Cedar street, and the widening, as proposed by the city, of Essex street. This would make the profile the same as shown on the city's plan, but it would divide the work from Straight street to River street inclusive into three sections instead of one.

20

Section D would be the Madison avenue elimination as laid out by the city.

Section E would be the elimination of Fifth avenue, the opening under grade of Sixth avenue according to the city's plan.

Q Now, Mr. Brameld, have you given sufficient study to this subject to be able to state whether or not this division of the whole work for these sections would be practicable and possible without interfering substantially with the city's plan?

30

A Yes, sir. The only change in the city's plan would be the temporary closing of Keen street, and they have sufficient access to Keen street by using Lafayette street, and the raising of Warren street temporarily three feet. It does change the elimination of Lafayette street by depressing the street prob-

40

W. H. Brameld, further direct.

ably a foot and a half more, but the railroad is on a knoll there and it means just cutting the knoll down one and a half feet.

Q It disposes of the same crossings as the city's plan proposes to eliminate?

A It is the city's plan.

10 Q With regard to the sidings, does it have substantially the same effect on the sidings as the city's plan?

A Yes, temporarily they would have to make some slight changes to meet the temporary grade, but eventually the situation is the same as proposed by the city.

Q Now, have you prepared an estimate of the cost of each of these sections?

A I have.

20 Q Let me ask you first does your total of the entire work of the five sections amount to any more than the estimate you made of doing the entire work?

A Yes, sir, due to the necessity of duplication of trestle raising track and ballasting and surfacing track.

Q About how much more would it amount to?

A Roughly about \$115,000 to \$120,000.

Q Outside of that extra cost due to this temporary construction is the cost about the same?

A Yes.

30

Mr. Hobart. I would like now to offer in evidence a paper dated July 8th, 1914, giving the summary and the details from street to street of this sectional scheme.

Commissioner Donges. It will be admitted and marked.

(Same is marked Exhibit R-103.)

Q This paper which I have just offered, R-103, does that give an estimate of Sections A, B, C, D and
40 E, each on a separate paper?

W. H. Bramfeld, further direct.

A Yes.

Q And then a summary of the entire work at the end?

A Yes; of course, in arriving at the totals of these figures they are interpolated with the other estimates where they cover the same items.

Q Then you have added that extra cost of temporary construction?

A Increased cost. —

10

Mr. Hobart. Cross examine.

Mr. Merrey. Well, I think that on this part of the work I will have to have some time so as to get my engineer to make up a criticism of the suggestions so I can cross examine intelligently.

Commissioner Donges. How much time would you want?

Mr. Merrey. A week is plenty. To-morrow we would be ready if the commission was.

20

Mr. Hobart. How about this afternoon?

Mr. Merrey. We couldn't do that very well. In fact, I think it would be better to have the testimony gotten out.

Commissioner Donges. We could give you Monday afternoon or next Thursday.

Mr. Hobart. I might say that if there is to be another hearing, we might want to put in some further suggestions or criticisms, whichever you please to call them, on the proposed plan. We have been working very busily on this, as I think the commission can see. I don't want to say now we have covered everything; our engineers might suggest something in the meantime.

30

Mr. Merrey. The amount of time I expect to take is very small. We can clean it all up, what I want to do, in an hour. We may decide not to cross examine.

(After discussion.)

40

W. H. Brameld, further direct.

10 *Mr. Hobart.* I don't think our engineering details will take much time, we may not put in anything more. I was about to say, in answer to the commissioner's question whether we will have very much more. There is one feature of the case in which we may decide to put in some testimony, that is the question of whether the company can afford to do that.

Mr. Merrey. Haven't you put in enough about that?

Mr. Hobart. We haven't put in all we are capable of putting in. We don't want to be foreclosed of the opportunity to present that consideration to the board if we should decide to do so. I only mention it so as to have that understood.

20 *Commissioner Donges.* Suppose, Mr. Gourley, you have your witnesses here on Monday; I think it very likely from present appearances you will be able to go on with them.

Mr. Hobart. Cross examination is reserved, I suppose?

Mr. Merrey. Yes.

30 *Commissioner Donges.* There was some reference to Mr. Brameld's having made certain marks on this plan. I was wondering whether it might not be well to have either the plan—I was just suggesting to Mr. Hobart that Mr. Brameld, in his testimony, referred to having marked a map indicating his suggestions as to doing this work by sections. That map is not before the commission in its marked form.

Mr. Hobart. Can't we put the same marks on the city's map?

Mr. Merrey. I was going to let you have that map and file it with the commission when it is cleared up.

40 *Commissioner Donges.* Any way, so it is not overlooked. It is agreed then that the map now

Robert Falconer, direct.

filed as an exhibit offered by you may be marked in accordance with this suggestion?

Mr. Merrey. Yes.

Commissioner Donges. Then, Mr. Brameld, when we suspend, will go in Mr. Mead's office and mark it.

ROBERT FALCONER, sworn on behalf of respondent.

10

Direct examination by Mr. Hobart.

Q Mr. Falconer, you are a civil engineer and surveyor?

A Yes, sir.

Q And have been some years?

A Yes, sir.

Q What experience have you had in grade crossing work and track changes and elimination and so on?

20

A I have had a number of years experience in railroad engineering work in general, which included considerable grade crossing elimination work; that is, the designs, the estimates, and latterly, the building of the work.

Q Have you examined these plans of the City of Paterson?

A Yes.

Commissioner Donges. Would you have him state a little more definitely his experience?

20

Q State a little more fully how many years experience you have had as an engineer?

A I graduated from the University of Wisconsin in 1895, course in civil engineering. I spent since that time—let me see—about six years all told in structural and bridge work with the firm of Hardin & Anderson, American Bridge Company, McClintic Marshall, Waldron Iron Company, Cincinnati and Cambria Steel Company, but I have had two and a

40

Robert Falconer, direct.

half years' experience with the Pennsylvania lines west of Pittsburg in charge of construction acting as resident engineer, and nine years, nearly nine years' experience with the Erie as assistant engineer in charge of surveys and construction, as division engineer on the New York division, as principal assistant engineer on the lines east and as supervising construction, with duties as chief engineer.

10 Q The last is your present position with the Erie Railroad?

 A That is my present position.

 Q Have you made an examination of the city's plan with particular reference to the bridges?

 A I have made such an examination, perhaps not as thoroughly as it should be done before detailed plans are made, but sufficiently carefully to say that if the line which is shown on this profile is the top
20 of rail, the floor depth for the bridges in general is insufficient. There should be, in general, about six inches more and on two streets at least, namely, Market and River, there should be more than six inches additional floor depth.

 Q Why the necessity or propriety of this additional floor depth?

 A Let me answer that other question first. I want to make it a little plainer. Unless the design
30 of the bridge is changed, the floor depth will have to be greater, unless the floor design is changed.

 Q Why would it be necessary to have the floor depth greater?

 A In order to secure a stiff strong floor that can be waterproofed satisfactorily. It is possible to build a bridge with a shallower floor but it is not practical to waterproof such a floor in a manner that will be satisfactory and will have continued to be so as time goes on.

40 Q You said that it would be necessary to have

Robert Falconer, direct.

even greater depth at those two streets you mentioned. Why the occasion or necessity for that?

A Mr. Brameld pointed out in his testimony a greater depth at River street was necessary on account of the spending girders for the platform.

Q You agree with him in regard to that?

A Yes, sir.

Q Is there anything further you would like to add? 10

A As I understand the plans, the same situation exists at Market street.

Q Is that due to the proposed new stations at those points?

A Yes.

Q Now referring again to Market street, have you any further suggestion or criticism to make as to the proper construction at that point?

A Why, I would like to suggest that consideration 20
be given to the plan of placing columns in about the center of the street. This would have two advantages, perhaps more; two important advantages. The first is, it would reduce the depth of the floor of the bridge so it wouldn't be necessary to depress Market street so much or raise the railroad so high. The second one, it would give a stiffer and better bridge. At Market street the span is pretty long from curb line to curb line and it would be a pretty heavy bridge. 30
The street could be widened on the west side by taking some of our property so that the resulting available width for travel would be greater than it would be as shown on the city's plan. Now, at this street there is a peculiar condition; Park avenue and Market street join, intersect about on the railroad tracks; those columns in the center of the street to my mind, would not be in any way interfere with the traffic. Traffic would separate south of the bridge instead of north of the bridge, as it does now. 40

Robert Falconer, direct.

Q Would that have any bearing on the construction cost?

A Yes, I think it would reduce the cost some. I haven't had time to figure it out, to estimate the cost, but I should judge it would slightly reduce the cost. In my opinion it would give a more satisfactory structure.

10 Q Is there anything further you have to suggest in addition to what Mr. Brameld has mentioned?

A I would like to suggest that a similar construction be considered at River street, somewhat similar. As the plans are drawn by the city Putnam street and River street intersect practically on the right of way. In my opinion a line of columns in the center of the street in line with the west curb of Putnam street north of the tracks, would in no way interfere with the traffic, would cheapen the bridge and result
20 in better construction, would require less headroom—floor depth supplied.

Q And give more headroom or at least require less change of grade?

A Yes. As the plan is drawn now if this is not done it apparently will be necessary to spread the girders farther than shown on the plan and spread the track centers and this would encroach on the available space left for River street both north and south of the tracks. This available space now is as
30 narrow as it should be and if the girders and tracks are spread farther apart, it will be a serious loss to the city.

Q You said it would be necessary to have a greater depth of the bridges at Market street and River street than at these other points; what was the reason for that?

A The reason is, as the structures are planned, the girders have to be spaced far apart to take care
40 of the platform. That is true of River street; appar-

Robert Falconer, direct.

ently it is true of Market street, although the plan doesn't show the girders at Market street. I can't say where they intend to put them.

Q When you spoke of platform, you mean passenger platform, for people to get on and off the trains?

A Yes.

Q Anything you want to explain a little more in detail, how a change such as you propose by the erection of columns would have a bearing upon the depth of the floor bridge? 10

A By putting columns in the center of the street and on the curb lines the length of the girders would be very materially reduced and the girders could then be placed so that their tops would be close to the tracks and just covered by the top of the passenger platform. The girders could then be spaced the standard distance apart, thirteen feet or fourteen feet, as the case might be. 20

Q Would that reduce the floor depth?

A That would reduce the floor depth because the girders would be shorter and of course naturally be shallower.

Mr. Hobart. Cross examine, or do you want the same right of cross examination reserved?

Mr. Hervey. Yes.

Commissioner Dougan. You desire to reserve cross examination? 30

Mr. Hervey. Yes.

Witness. There is one more thing I would like to say, if you will let me say it.

Mr. Hobart. Yes, go ahead.

Witness. I think this plan, in the neighborhood of River street, is worthy of more study than we have been able to give it. I think it is possible that a plan may be developed, a modification of the city's plan, quite an important—quite different from the city's plan, which may 40

Robert Falconer, direct.

be cheaper and may be better or equally as good. I am simply calling attention at this time because I think the commission ought to know we haven't had time to study these things and really testify on them. They are pretty big questions involved and they require a good deal of time and study.

10 *Mr. Merrey.* You had a year to get ready before this.

Mr. Hobart. This is in line with my suggestion that we might have something further.

Commissioner Donges. If there is anything further, opportunity will be afforded for the presentation of anything material.

20 Adjourned until Monday, July 13, 1914, at the Kinney building, Newark, N. J., at 1.00 o'clock P. M.

30

40

W. H. Brameld, direct.

TWELFTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Newark, N. J., Monday, July 13th, 1914.

PATERSON GRADE CROSSING ELIMINATION, }
ERIE RAILROAD COMPANY. }

10

Before Commissioner R. W. E. Donges.

F. H. Sommer, Esq., Counsel.

For petitioner appears E. F. Merrey, Esq.

For respondent appears G. S. Hobart, Esq.

For switch owners appears W. B. Gourley, Esq.

Commissioner Donges. I think Mr. Merrey was to cross examine Mr. Brameld and Mr. Falconer.

Mr. Hobart. I ask permission to submit further examination of the plan. The company's suggestions have been made a little more in detail. With your permission I will recall Mr. Brameld.

20

Commissioner Donges. You may continue your direct examination of Mr. Brameld.

W. H. BRAMELD, re-called for further direct examination.

Direct examination by Mr. Hobart.

30

Q At the last hearing there was a suggested method as to a modification of the city's plan in the neighborhood of Madison avenue?

A Yes, sir.

Q Have you been working on that further since that time and developed it more in detail?

A I have.

Q Have you prepared estimates of that plan?

A I have.

40

W. H. Brameld, direct.

Q Have you prepared any drawings of it?

A I have.

Q Will you please produce them? First, let us have the estimates.

A (Complies.)

10 *Mr. Hobart.* I would like to offer in evidence this estimate dated July 11th and headed Madison avenue.

Commissioner Donges. Is there any objection?

Mr. Merrey. No.

Commissioner Donges. It will be admitted.

(Same is marked Exhibit R-104.)

Q That estimate shows a difference in favor of the railroad company's plan, does it not, Mr. Brameld?

A Yes, sir.

20 Q Will you state whether the plan as proposed by you for the Madison avenue section of the work would accomplish the same purpose as far as the elimination of the crossing is concerned as the plan proposed by the city?

A Yes, sir.

Q And the saving to the company would be about \$192,000?

30 A The total saving would be \$151,566, and I believe the city's portion of the work would be practically the same on this scheme as the other.

Commissioner Donges. I didn't quite get what you meant by your last answer.

Witness. I believe under the law that the city pays a certain proportion of the work, such as streets and curbs and the payment of those items will be practically the same in this scheme as in the other.

W. H. Brameld, direct.

Commissioner Donges. So that the net saving of \$150,000 some odd dollars is all on the railroad's part of the work.

Witness. Practically on the railroad's part of the work.

Q Have you a sketch that shows that?

A Yes. (Produces sketch.)

Q Is this it, headed scheme for elimination of grade crossing, Madison avenue, July 10th, 1914? 10

A Yes, sir.

Mr. Hobart. I will offer that in evidence.

Commissioner Donges. It will be admitted and marked.

(Same is marked Exhibit R-105.)

Q Does that change the grade of the railroad?

A It does not.

Q It leaves the railroad tracks and sidings the same as they are now? 20

A As they are at the present time. The railroad grade at the present time will not be changed.

Commissioner Donges. By your last answer you mean to say it will leave them at the present grade?

Witness. The present elevation. The street is carried entirely over the railroad.

Q With that method of elimination of the Madison avenue section would affect to that extent the elimination of the other crossings in the city's plan? 30

A Yes.

Q Including in that, of course, that they be carried out substantially as proposed?

A Yes.

Q There was also suggested at the last hearing a modification of the city's plan of River street and vicinity. Have you developed that further?

A I have. 40

W. H. Brameld, direct.

Q Have you prepared an estimate of it and a plan of it?

A I have.

Q Will you produce the estimate first?

Commissioner Donges. Are you going to examine any further on this plan?

Mr. Hobart. No.

10 *Commissioner Donges.* The scheme proposed on this plan, Mr. Brameld, is carrying the street over the railroad?

Witness. Yes, sir.

Commissioner Donges. At Madison avenue. You say that doesn't interfere in any way with the other changes contemplated by the city's plan?

Witness. No.

20 *Commissioner Donges.* That is the elevation of the tracks—

Witness. The elevation of the tracks to the next street east—west, is Straight street crossing, and that can be eliminated on the city's plan without interfering with this scheme at Madison avenue, because they come to grade—Straight street the tracks were raised and came to the present elevation of the railroad and the Newark Branch junction and then depress the railroad tracks under Madison avenue; the railroad
30 tracks at Madison avenue were depressed about ten feet and made a level grade from Newark branch junction to Madison avenue on the railroad. Whereas now we have an upgrade and it would leave the railroad between Newark branch junction and Madison avenue just as it is at the present time.

Commissioner Donges. That provided for a five per cent. grade on the elimination of the
40 street?

W. H. Brameld, direct.

Witness. Yes.

Commissioner Donges. And then carries the street on the through girder construction?

Witness. Yes; the girders are placed on the outside of the roadway and the sidewalks are on brackets attached to the girders. The girders are on the roadline and the girders between the sidewalk and the roadway. I believe that is the same construction contemplated by the city. 10

Commissioner Donges. In this plan would it be necessary to have any support or columns in the street?

Witness. No, a span from abutment to abutment.

Q I want the estimate of the change of plan in River street and vicinity; have you that?

A The change in plan at River street involves the elimination of Keen street, Warren street, and Fifth and Sixth avenues, and I have prepared estimates for each one of them and have summarized them, including in that summary the railroad's method of eliminating Madison avenue as well. 20

Q Will you state generally what the difference is between the River street section as now proposed by you, as compared with the city's plan?

A The elimination of Keen, Warren and River streets by first eliminating the crossings to Market street to Keen street according to the city's plan, and the modification suggested by me is called Section A. If that work is done then the work will be done to River street and mean an undergrade crossing at Keen street, depressing the street more than the city contemplated; a pedestrian subway at Warren street with a twenty-foot driveway from Warren street to River street and from Warren street to Keen street, for vehicle traffic from Warren street. River street would be eliminated by diverting River street, run- 30 40

W. H. Brameld, direct.

ning parallel to the railroad on the southerly side and going across the railroad on a viaduct approximately at the west end of the River street freight house.

Q Have you prepared an estimate which shows the cost of eliminating the crossings in that matter?

A I have.

Q Have you that before you?

10 A Yes, sir.

Q Is this paper which you have dated July 11th, comprising four sheets, headed River street, Warren street, Keen and Summer, is that the estimate of this proposed change?

A Of that section, yes, sir.

Mr. Hobart. I wish to offer that in evidence.

Commissioner Donges. It will be admitted.

(Same is marked Exhibit R-106.)

20 Q Does this change accomplish the same purpose as the city's plan, as far as the elimination of the crossing?

A It would eliminate the present crossing across the railroad, yes.

Q Does it produce any saving in the cost?

A It does.

Q How much?

A It shows a saving of \$151,566.

30 *Commissioner Donges.* How much of this saving is in favor of the railroad and how much in favor of the municipality, Mr. Brameld?

Witness. I haven't figured it, but I believe it would be slightly more expensive for the municipality.

Commissioner Donges. Slightly more expensive?

40 *Witness.* Yes; on account of a little more paving of the sidewalks; but it is a small item of the total cost.

W. H. Brameld, cross.

Commissioner Donges. I understand this Exhibit, R-106, is based on a suggestion made by you at the last hearing?

Witness. A suggestion made by Mr. Falconer.

Commissioner Donges. Mr. Falconer suggested the elimination piece-meal?

Witness. Yes. I made the suggestion for the elimination piece-meal, but Mr. Falconer thought the treatment could be changed at River street.

10

Q And this plan you now suggest is a development of that scheme of Mr. Falconer's, is it not?

A It is.

Q Have you prepared a sketch which shows the outline for this modification?

A I have. (Produces sketch.)

Mr. Hobart. I offer that in evidence.

Commissioner Donges. It will be admitted.

20

(Same is marked Exhibit R-107.)

Witness. On the Madison avenue. When giving the figures for Madison avenue saving I started there were \$151,000. That was the River street item. I was wrong. The saving at Madison avenue is \$192,133.92. It is correct on the exhibit, the estimate, but I got it wrong in the testimony.

Cross examination by Mr. Merrey.

30

Q Mr. Brameld, in the plan which you propose for the elimination of the crossing at Madison avenue, how would the travel along East Railway avenue be accommodated?

A From my knowledge of the traffic, I believe the traffic along East Railway avenue is mainly into Patterson by way of Madison avenue, and I believe that the larger proportion of traffic would not be affected. The only traffic that would be affected would be the

40

W. H. Brameld, cross.

people going to the south side of the tracks. For the pedestrians I have a stairway leading to the bridge; for the team traffic they would have to go down Madison avenue to get onto the elevated structure.

Q They would have to go down how far?

A About four hundred and twenty-five feet.

Q And then return and come back on the grade
10 the same amount?

A Yes, sir, but I believe a very small proportion of the traffic would be affected by that.

Q You don't know anything about that traffic?

A I have been familiar with the Madison avenue crossing more or less for the last fifteen or sixteen years.

Q East Railway avenue is rapidly developing, isn't it?

A I haven't seen much development at East Rail-
20 way avenue in the last ten or fifteen years.

Q There are several new mills built there?

A Just east of Madison avenue, yes; two factories put up, the silk mills and Leslie Elliott Boiler Works.

Q On the scheme which you propose for the vicinity of River street, is closes Warren street and Putnam street, is that right?

A Putnam street will be closed as a thoroughfare across the tracks.

Q Warren street also, except for a pedestrian sub-
30 way?

A Except for the pedestrian subway. To enable vehicles to travel between Putnam and Warren street there is a twenty-foot driveway parallel to the railroad from Putnam street to Warren street.

Q What becomes of Franklin street?

A Franklin street is closed as proposed by the city.

Q How about Lafayette?

40 A Lafayette street is according to the city's plan.

W. H. Bramfeld, cross.

Slightly depressed, about one foot lower to conform to the grade on Section A as proposed to be divided by the railroad company, but I do not believe it would affect Lafayette street.

Q Does it close any street east of Lafayette street?

A It does not.

Commissioner Donges. It doesn't close Lafayette street then?

10

Witness. No.

Q Does it close Lyon street?

A Lyon street does not run across at this time.

Q Is there any means provided for getting out of Lyon street into Waite street?

A Yes, between Putnam street and Lyon street, Waite street is moved over onto the Public Service property and the Van Den Hendel property, providing a thirty-foot driveway and one ten-foot sidewalk.

20

Q Then River street is elevated?

A River street will be elevated. Waite street is developed providing for through traffic just as at present.

Q How do you get out of Waite street and Putnam street so as to get onto River street?

A By using Putnam street.

Q Can you get out of Putnam street into River street?

30

A Yes. The grade of the viaduct ends at the easterly side of Putnam street. There will be a slight raise, probably six or eight inches.

Q How is the railroad tracks on the Public Service which runs off the street line into this line, divided?

A Just as it is at present; working over to the center of the new location of River street.

Q It has to be raised a little and then dropped back again?

40

W. H. Brameld, cross.

A No—yes, there will be a slight raise in Waite street to accommodate that track.

Q This switch into the Public Service Corporation is changed?

A Entirely re-located, yes.

Q And you have to take Van Den Hendel's property?

10 A A portion of it.

Q And the property between your railroad and River street must be acquired?

A Yes, for the approach of the north side of the track.

Q You only allow thirty feet at that point?

A Thirty foot roadway and two ten-foot sidewalks, the same as River street now.

Q You think that sufficient with two turns?

20 A It may not, but it could be widened a slight extent. There is an alternate location provided which I think would not increase the expense very much, if any, which reduces the right angle turn.

Q That cuts diagonally through some property?

A It does.

Q Then the traffic goes down Lyon street going to River street, and have to turn to the west on River street and go up River street and across the viaduct?

30 A Turn either west or east, using the twenty-foot driveway provided between Putnam and Keen streets.

Q The twenty-foot driveway would cut into some large mills?

A It would not; no, sir; entirely on the railroad right of way.

Q And you place no pedestrian subway at Putnam street?

A No.

40 Q Would it be possible to put in such a passageway?

W. H. Brameld, cross.

A Yes, but it would use some of the sidewalk on River street to get the stairways into it.

Q Does that provide for the changing of the depot?

A The depot remains as at present. There is a pedestrian subway, passenger subway built from the westbound track to the eastbound track to enable passengers leaving a train not to have to cross the track. 10

Q The depot would be in a very inconvenient place, would it not?

A I have provided stairways down to the westbound platform from the bridge. There is also a stairway at Warren street right adjacent to the pedestrian subway so that the platform can be reached at both ends and the middle. On the eastbound platform there is a stairway provided at Warren street, adjacent to the pedestrian subway; stairs down from the viaduct and also a walk underneath the viaduct from Waite street. 20

Q How long is the platform?

A The platforms are a little over seven hundred feet long.

Q How long is the present platform.

A I don't believe it is as long as that. I couldn't say definitely just how long it is.

Q Now, Keen street: How much of a cut is there in Keen street? 30

A It will be depressed approximately seven feet below the tracks.

Q And how much below what it is at present?

A About seven feet.

Q How are you going to drain it?

A By a sewer from the subway to the river directly down Keen street, four hundred feet long.

Q How much above the river will be the bottom 40

W. H. Beardseld, further direct.

of this cut? What will be its level as compared with the river?

A I haven't taken any direct measurements, but I believe it will be above the river.

Q Will it be flooded at high water?

A That I couldn't say.

Q Do you know anything about the river level?

10 A I have no data concerning the high water, but I have seen it when there was high water.

Q You know it has been out on Keen street?

A At the lower end.

Q Comes out to River street. Not at Keen street, below Keen street?

A It came to Straight street; at River street it was about one foot over the street.

Q You don't know whether it will be possible to keep this cut dry at flood time?

20 A Not absolutely. I think it is just about safe.

Mr. Merreg. That is all.

By Mr. Gourley.

Q How do these changes suggested affect the switch owners?

A It only affects the Public Service siding. I think they can be taken care of practically as they are now. Their change will be practically the same as provided for on the city's plan. The estimated cost
30 of that is all included in this estimate.

Mr. Hobart. Anything further?

Mr. Merreg. No.

Further direct examination by Mr. Hobart.

Q Witness reminds me, in this plan there is a change in Fifth avenue and Sixth avenue.

A The change is only in the grade of the railroad and I find that not having raised the tracks at River street, that we could eliminate Fifth avenue independ-
40 ently of Sixth avenue. It would raise the grade.

W. H. Brauweld, further direct.

would raise Sixth avenue about a foot and it could be used as a grade crossing while eliminating Fifth avenue crossing; after Fifth avenue crossing, Sixth avenue could be eliminated. The street work is the same on the city's plan. I have used their elevation for the streets.

Q Both streets?

A Both streets, but changed the grade. I figured the estimate on the change of grade. I haven't a plan of that. I have prepared an estimate and total saving in the railroad company's plan is \$321,000.

10

Q For both Fifth and Sixth avenues?

A That is both Fifth and Sixth avenues included. Commissioner Dongra. Involving a saving? Witness. A saving of \$22,602.49.

Q That is accomplished how?

A Due to not having to raise the tracks of Sixth avenue all the way to Riverside.

20

Q It is involved in the other, the modification of River street?

A The modification of River street. There would be no necessity for the other expenditure.

Q If the River street modification were carried out as you suggest to-day, rather than the city's plan. Fifth and Sixth avenue modified accordingly would make a saving of \$192,000?

A Yes; without changing the city's plan of the situation.

30

Q You have no plan of Fifth and Sixth avenue?

A The plan is the same as the city's, merely the grade runs to the elimination of Sixth avenue, that would be the present grade of the tracks east of River street.

Q You have an estimate showing the details?

A I have an estimate of the details.

Mr. Hobart. I offer that.

Commissioner Dongra. It will be admitted.
(Same is marked Exhibit R-108.)

40

W. H. Brameld, further cross.

Q You have still one other summary which shows what?

A The city's plan modified according to the suggestions I have just made, giving descriptions of the way the crossings will be eliminated and giving an estimate according to the railroad's plan and railroad's estimate of the city's plan, and the total saving in favor of the railroad company's plan, \$376,302.41.

Q This summary which we now have before us is taken from the other estimates already offered in evidence?

A Yes.

Mr. Hobart. I will offer, for convenience, this summary of the modification.

Commissioner Donges. It will be admitted.

(Same is marked Exhibit R-109.)

Cross examination by Mr. Merrey.

Q Mr. Brameld, if you put in that plan at River street, that would make permanent the temporary arrangement from River street into the center of the city, Market street?

A Yes, only for that change at Lafayette street, because it is considerably higher than all the other streets.

Q That would give a pretty stiff grade into the city?

A One per cent.

Q That is pretty high, isn't it?

A It all depends on how much money you want to spend to reduce that.

Q It is a plan which would make the hauling very difficult?

A According to the traffic, the class of traffic that we handle. I am not an operating man; I believe a one per cent. grade is feasible at that point.

V. H. Brameld, further cross.

Q Do you know enough about it to say it is feasible?

A It is feasible, yes.

Q There is a very heavy curve about Agnew's coal yard?

A There is.

Q That adds to the difficulty?

A Slightly. 10

Q Considerably?

A It all depends on the kind of trains which you operate.

Q That is what I want to get at. What kind of trains do you operate?

A Operate passenger trains and freight trains.

Q But you do not send the heaviest trains over this route, do you?

A We send our heaviest passenger trains over that railroad, yes. 20

Q They are not your heavy freight trains?

A They are not heavy freight trains.

Q They can take a heavy grade?

A They can.

Q So the ruling grade is lower here—or higher than in other portions of the road?

A The ruling grade may be higher here than other portions of the road?

Q Yes.

A It all depends on what kind of traffic runs over it. This is not a low grade freight line. 30

Q It is a line which doesn't require as low a grade as other portions of the road where you send heavy freight?

A No.

Q It would permit of steeper grades than other portions of your road?

A I believe if we continue to operate the class of trains we are operating now, while I am not an operating man and have no official sanction for what I am 40

Henry Ryon, direct.

saying from the operating people of the company, it is my personal opinion that we could use heavier grades through Paterson than we can on other portions of the road while we are operating this class of traffic.

Q (By Mr. Hobart.) The heavy freight trains as a rule run over the Bergen County short cut?

Mr. Merrey. I object.

10 Commissioner Donges. The witness has already answered in regard to that.

Mr. Hobart. That is all.

Commissioner Donges. Mr. Merrey, anything further?

Mr. Merrey. Is Mr. Falconer to testify for the company?

Commissioner Donges. I think you reserved the right to cross examine Mr. Falconer.

Mr. Merrey. I waive that.

20 Commissioner Donges. Very well.

HENRY RYON, recalled on behalf of petitioner in rebuttal.

Direct examination by Mr. Merrey.

Q On last Thursday Mr. Brameld, testifying, said, concerning the sidings east of Straight street, "evidently the profile is drawn without any provision for a vertical curve, the grade being shown as started at
30 about point of frog on a change of grade of one per cent. for one track and two per cent. for another. It is absolutely necessary to provide room for a vertical curve." Will you please explain that situation for us?

A It would be better to put a vertical curve, if possible, to get it at that point. You couldn't put in a vertical curve without a high degree of change, one per cent. degree of change. One side particularly it changes two per cent. in fifteen feet, which is practically no vertical curve at all, it takes on the point of
40

Henry Ryon, direct.

frog and goes two per cent. In working this out I presume to use the same kind of grades they have at present on the Erie.

Q This is on a siding on which freight trains are not run and very few cars?

A This siding runs to the Commonwealth Warehouse Company where only a few cars go.

Q Is there one point of change from one per cent. one way to two per cent. the other way, is that a common thing? 10

A It is the support of the bridge. There is a one per cent. grade one side of the bridge and two per cent. it goes down on the other.

Q How long is that bridge?

A I don't know, about fifty feet; it is the width of the street.

Q Have you gone over the other places where criticism was made of your plan because of vertical angles? 20

A Yes, sir, I looked at them.

Q Have you figured how much the bridges would be raised or the streets lowered to provide vertical curves?

A On the main line it wouldn't vary the bridge more than two per cent., to put in a vertical curve, two-tenths of one per cent. Rather have the grade on the siding a little greater, but in those cases there is room to put them in. 30

Q What have you to say about the depth of the bridges, there was some criticism that you only provided two feet six inches whereas it should be three feet?

A I provide three feet from the top of rail to bottom of girder. The bridges in Paterson there now, three of them, the Davidson bridge has a depth of two feet nine inches, a depth from bottom of girder to top of rail. The Essex bridge is also two feet nine inches from bottom of girder to top of rail. The one 40

Henry Ryon, cross.

west of Paterson; that cannot be more than two feet nine inches between top of rail and bottom of girder.

Q Are there any other suggestions you have to make of criticisms made of your plan, or the new plans offered here to-day?

A Nothing material.

10 Q Do you know anything about the ability to properly drain Keen street under the plan proposed?

A I can't say offhand without figuring that out. I know it is pretty low. They may be able to drain it. I am not sure.

Q Did you give some consideration to a new plan at River street somewhat similar to the plan offered?

20 A A plan of that kind was suggested and I considered it. The objection was carrying the street sharply across and the change and steep grade of the main line of the Erie. A grade of one per cent. with a four degree curve, approximately a four degree curve, making about 1.4 compensated.

Q This plan at River street would be a serious injury where the street takes off, the viaduct, and where it crosses the tracks now?

A I am not competent to say as to that. I believe it would.

Q It would cut down the amount of traffic?

A Cut down the amount of traffic undoubtedly.

Q There are a number of stores there?

30 A A number of stores, yes.

Cross examination by Mr. Hobart.

Q The Madison avenue modification suggested by Mr. Brameld, you have examined the sketch which indicates that?

A Yes.

Q It is entirely practicable and feasible?

40 A Entirely. The only objection, I think, is people coming up East Railway avenue and also California avenue after going back nearly to Madison avenue and

Henry Ryon, cross.

returning parallel to Madison avenue, that is the only objection I see.

Q And it saves practically half a mile of rock excavation?

A Quite a little rock excavation.

Q That is what accounts for most of the difference in the cost?

A Undoubtedly.

10

By Mr. Merrey.

Q But the rock excavation would give the railroad a much better grade?

A Give the railroad a better grade.

Q As it is now it climbs a hill beginning at Madison avenue?

A There is an up grade.

Q And comes down at Crooks avenue?

A At Crooks avenue, the city line toward New York.

20

Mr. Merrey. That is all we have.

Commissioner Donges. Mr. Gourley has something.

Mr. Gourley. Our objections have already been put in to the elevation of the tracks. This plan which has been offered, since the switch owners have been on the stand, doesn't materially change the situation as I had in mind and as put on the record. There are one or two features that ought to be specifically heard. I will take them up in the order they come on the list. Leslie Elliott Company.

30

William Elliott, Jr., direct.

WILLIAM ELLIOTT, JR., recalled on behalf of switch owners.

Mr. Gourley. This is number one on the list.

Direct examination by Mr. Gourley.

10 **Q** You have seen the city's plan, I think, in regard to the switch supplying the Leslie Elliott Company shown on sheet number one of the proposed plan of the city. This is the situation of Leslie Elliott, with the switch running in. Will you say, shortly, to the commission what objection you have to that switch in that form?

A I am not an engineer, but from my point of view, I have one of the books and this plan, it would be impossible to get in the way it is on this plan.

Q Why?

20 **A** Coming in here with a thirty-eight degree curve, we just miss our neighbor's gutter. We are within a foot of his gutter now.

Q Have you a plan showing that?

A (Produces plan.)

Q This blue print before you now shows in red the line of the switch as it is now?

A As it is now.

Q Explain it.

A It comes in here (indicating).

30 *Commissioner Donges.* Don't say in here. In the record it doesn't indicate a point.

Witness. Comit here is the curve (indicating).

Q Is there any property line at the curve?

A The property line is at the curve; we are probably a foot or two feet away.

Commissioner Donges. From what?

Witness. If we went any further toward the curb we would be on the other man's property.

40 **Q** Mr. Van Den Hendel's?

William Elliott, Jr., direct.

A Mr. Van Den Hendel's, yes. Over here, before we come from the main line, when we come we run on the main line across the street, we own the street from Kentucky avenue to Iowa, which is twenty feet. If the track is moved further back we will be on this other side of Kentucky avenue that we don't own.

Q The city's suggestion was carrying the point of this switch how many feet? 10

A About 1,000 feet.

Q To the south. Why can't this curve be made sharp and still reach your place?

A If it was made any sharper the Erie couldn't operate their engines over any degree curve over fourteen degrees; on account of this property line running so near this man's property we have to stop the engines on the sidewalk and push the cars from the sidewalk into our works. 20

Q That is what you do now?

A That is what we do now. But a curve greater we would have to push them from the main line, which is quite expensive.

Q Do you know who owns the line south of you on this tract?

A No, I do not.

Q Have you estimated the cost of putting in the present track?

A No. I could tell you what it would cost to put in the whole switch on the other. 30

Q That is the present one?

A \$5,912.07.

Commissioner Donges. That is the cost of the present installation?

Witness. Yes, sir, \$5,912.

Q (*By Mr. Hobart.*) When was that built?

A I guess that is a little over two years ago close on to two years ago.

Q (*By Mr. Gourley.*) What kind of a business have you there, I think you stated before? 40

William Elliott, Jr., cross.

A Boiler shop.

Q Is it essential for your success that this switch privilege be maintained?

A Yes; if I didn't have it there I might as well go out of business. It is also essential that I don't have to spend a lot of money to operate.

Cross examination by Mr. Merrey.

10 Q How long have you been in business?

A Ten years.

Q How long did you do without a switch?

A I think seven or eight years.

Q You had permission for a switch six or seven years?

A Well, let us say about six years before we put it in.

20 Q Certainly it wasn't for lack of capital you didn't put it in?

A I tell you, it was lack of finding out who owned this property. We couldn't find that out. We had Mike Dunn on it for a year.

Q You didn't know anybody owned it?

A Not until we went to the Erie, then we found they owned only so many feet alongside of the track and then we couldn't find out who owned this.

30 Q When did you first get permission to put in the switch from the Board of Aldermen of the City of Paterson?

A I couldn't tell you in years. You know, don't you, about that? It was a month or two months before the Board of Aldermen were legislated out of business.

Q That was in 1907?

A Yes.

Q You had permission at that time and didn't put it in until two years ago?

A Yes.

William Elliott, Jr., cross.

Q You don't know anything about, as an engineer, how the track is coming in?

A No.

Q There isn't a plan showing it cutting into your neighbor's property? The city's plan doesn't show it cutting into the other man's property?

A No. Mr. Merrey, going back one thousand feet and moving the track anywhere, that distance at all, we would be on this man's property line. 10

Q (*By Mr. Gourley.*) Were you on the ground with an expert and myself?

A No; Mr. Leslie was.

Commissioner Donges. You offer this plan?

Mr. Gourley. Yes.

Commissioner Donges. It will be admitted.

(Same is marked Exhibit 80-3.)

Mr. Gourley. The next is McNab & Harlin, number fifteen; their objection is already on the record. I don't think it necessary to call them. 20

The next is James A. Graham Brewing Company, number six. The siding is taking care of that property.

John Agnew Company, the upper part marked 11-A; there is no change there.

Samuel Smith & Son Company, number two; no change.

James Wilson & Son, number fourteen; no change. 30

Morris & Company.

Abraham A. Beckman, direct.

ABRAHAM A. BEEKMAN, sworn on behalf of switch owners.

Direct examination by Mr. Gourley.

Q You represent Morris & Company?

A I do.

Q You have looked at these plans?

10 A I have.

Q What have you to say about the facts?

A According to the blue print, that takes us off the map entirely.

Q They put the station down there?

A They put us down in the woods. There is Green street (indicating).

20 Q Just point out here where you are. This is the southeast corner of Market street and the railroad—northwest, rather; on the present situation on the northwest corner; where on the city's plan they are using is as a public station, depot. On this suggested plan they have put you where?

A Somewhere around here (indicating).

Q Between Green and Slater streets on the side of the railroad. State your objections shortly.

A All the objections there is, we are taken off entirely.

30 *Commissioner Donges.* In other words, the property you are now occupying there is used as station property and it is contemplated to move you three, four or five blocks?

Witness. Yes. Besides we have the situation at Ellison street, moved from the switch entirely.

Q The Paterson Reef Company?

A The Paterson Reef Company.

Commissioner Donges. What happens to that?

40 *Witness.* Less than two years ago we got that at considerable expense to have a place in case the depot would ever come and take our present

Abraham A. Beckman, cross.

location. According to the plan there is no switch even there.

Q How does this affect your business?

A It is out of the world up here (indicating).

Q What do you mean by that?

A No trade coming up there. We might just as well back out entirely.

Q I think you explained before now how people
come to you? 10

A Yes, the majority of people come by train. We are right by the station, a good location. We can't have the house down the other way, locate up that way; it is going away from the trade.

Q What is your volume of business, if I may ask?

A That is a personal question. Over one million and a half dollars a year. We have over eight thousand dollars at present in the Market street building
and undoubtedly in the Paterson beef building it cost 20
at least twenty-five thousand dollars. We employ thirty men.

Cross examination by Mr. Merrey.

Q How many men do you employ in the Ellison street building?

A None.

Q What do you use it for?

A We hold it as reserved, if anything comes in
the market. 30

Q It was purchased from a competitor?

A No, sir; it was ours.

Q Weren't you competitors?

A No, sir.

Q What were they?

A Part of the National Beef Company.

Q Is that any part of Nelson Morris Company?

A The National Beef Company was dissolved by 40

Abraham A. Beckman, cross.

the government and the different houses were bought by the different people.

Q Did Nelson Morris Company have any interest in the Paterson Beef Company when you bought it?

A None whatever.

Q You bought it as a reserve?

A They bought it to have a place.

10 Q You felt that you were likely to be driven out of your present location shortly?

A We expected, some time or other. They wanted a place of their own.

Q Who did?

A Morris & Company.

Q Now it simply leases from the Erie?

A Yes.

Q The building is owned by the Erie Railroad and all its property?

20 A It is.

Q You only rent a portion of it?

A We rent practically all of it.

Q They use part of it as a signal station?

A We have a storeroom upstairs and a storeroom in the rear. We occupy 130 feet of floor space all the way back. And also a shed of the building adjacent on the west side we built ourselves.

30 Q There are a great many places in the center of Paterson where you could obtain a location for your business?

A None that I know of.

Q How about along the Susquehanna Railroad?

A It is the switching on the Susquehanna that has driven one concern to go off the road. I don't think I want to go back on that.

Q The switching?

A The switching of cars.

Q What is the matter with it?

40 A They don't have a switch engine; only once in

Abraham A. Beckman, cross.

awhile; you only get cars switched once a day, at night, something like that.

Commissioner Donges. You mean lack of switching facilities?

Witness. Yes.

Commissioner Donges. How long a lease has Morris & Company on the Erie Railroad now occupied by Morris & Company, how long to run? 10

Witness. I couldn't tell you that. It is indefinite.

Commissioner Donges. A lease from year to year.

Witness. I think in ten-year periods.

Mr. Merrey. The lease is in evidence, I understand.

Mr. Hobart. I think so.

Mr. Merrey. All the leases are in evidence. 20

Mr. Hobart. We put in all we could find. I think this is included. I am not certain.

Commissioner Donges. The switching agreement.

Mr. Merrey. They promised to put in the Nelson Morris lease.

Mr. Hobart. If it is found, I will put it in there.

Mr. Merrey. I think you said you couldn't find it. It was understood that be put in. I think I have a printed copy where it was renewed since 1901. 30

Q (By Mr. Merrey.) I just call your attention to a piece of property between Ellison and Crushy Place and ask you why that wouldn't be a suitable location for your business?

A Between—where is it?

Q Right near the back of the Daisy can place.

A I don't know there is any property there. 40

Frank Vance, direct.

Q A long vacant lot.

A I didn't know it was for sale.

Q There is a property there, a vacant property.

A A vacant property next the Susquehanna depot.

Q That is right adjoining the tracks of the Erie; right across from your present ground.

A I know the property you have reference to.

10 Q It is big enough to accommodate a dozen beef houses such as yours.

A Hardly.

Q Have you gone along the line of the railroad to see if there were any places suitable for your business?

A I have not.

20 *Mr. Gourley.* The Armour & Company. The objections, such as they are, were put in the last time. They can accommodate themselves, I think.

Mr. Merrey. What was the statement? You think they can; because when they were here before I think they made strenuous objection to the raising.

Mr. Gourley. Going on the second floor would be some convenience; whether it accommodates all the others, I cannot say.

Mr. Merrey. That is what we said before.

30 *Mr. Gourley.* That is the only instance you are right among all these people.

FRANK VANCE, called on behalf of switch owners.

Direct examination by Mr. Gourley.

Q Mr. Vance, you represent Armour & Company, Paterson?

A Armour & Company.

Q Have you looked at the plan as far as it affects you?

40 A Yes.

Frank Vance, direct.

Q Where are you in Paterson?

A 107 Hamilton avenue, Hamilton avenue and the Erie Railroad.

Q Northeast corner of Hamilton avenue and the railroad, are you?

A Yes, sir.

Q What have you to say about the switching privileges there?

10

A This switch as shown on here, if there isn't any other switches running off this, this won't affect us very much. That is, if they leave the switch at the same level. That is our unloading platform (indicating). The principal objection is cutting this street here (indicating).

Commissioner Donges. What street?

Witness. Hamilton avenue as the plan shows it. What is the cut at Hamilton avenue across the railroad?

20

Q One foot five inches.

A That is our principal objection in getting up to the loading platform.

Q Explain about the loading platform operation?

A The wagons back up to the front of the building; as it is now the ground in front of the platform is considerably higher than the street and we load out to the sidewalk.

30

Commissioner Donges. Would one foot five inches make any appreciable difference?

Witness. Make some difference, yes.

Q Have you a switch yourself, or are you on with some others?

A We have a switch by ourselves.

Q How many people are on this contemplated switch?

A Nobody on it, according to the way this plan is shown here.

40

Frank Vance, cross.

Q So you will have the same switching privileges, except the difficulty in unloading?

A The difficulty in unloading.

Q You are not put at the end of a long switch?

A This switch doesn't call for any change of grade directly in front of the depot.

Q Doesn't that switch serve a number of people?

10 A No.

Mr. Gourley. I understand there are a number, where at present they have one to themselves.

Mr. Merrey. Cars wouldn't stand on the line.

Mr. Gourley. No; they are the end of a long switch; while now they have the opportunity to take them from the track at once.

Mr. Merrey. No cars stop.

Mr. Gourley. While they are using it, of course, we can't use it.

20

Mr. Merrey. No, you can use it.

Mr. Gourley. You get that off as soon as you can, you mean?

Mr. Merrey. They don't stay there.

Cross examination by Mr. Merrey.

Q Would the drop of one foot in front of the beef house make any material difference?

A As it is at present, two feet two inches above the street now. That makes a difference of almost
30 three feet.

Q (*By Mr. Gourley.*) Would that have a serious effect, or some effect upon your handling of this material?

A It would give us some difficulty.

Q Just tell us how.

A It would be a hard place to come with a load. You couldn't pull a big load out. Now there is a two and a half or three foot drop.

40 Q (*By Mr. Merrey.*) It isn't hard to go down?

Jacob Meyer, direct.

A Not to go down.

Q You come back empty?

A Sometimes we haul stuff in and out.

Mr. Gourley. I can't hear.

Witness. We haul a great deal of goods in from the freight station.

Q You use the office for that?

A Yes, but we have some come locally from New York. 10

Mr. Gourley. The objection of John Agnew Company, they have two switches, the switch south, of which I have spoken, no objection to that. But this change, according to Mr. Agnew, and his testimony, is that it is a serious thing to them. Their coal, it makes it so high, as to make it practically unworkable, was Mr. Agnew's statement before. 20

The next one is Meyer & DeVogel, very seriously affected.

JACOB MEYER, called on behalf of switch owners.

Direct examination by Mr. Gourley.

Q Have you looked at this plan of the city?

A Yes.

Q As far as it affects your property. It is at the corner of? 30

A Franklin and Summer streets.

Q You are on the northwesterly corner of Franklin and Summer streets and facing the railroad as well?

A Yes, sir.

Q The elevation of the track there is how much?

A Fifteen feet.

Commissioner Donges. This is a grain establishment?

Mr. Gourley. Yes. 40

Jacob Meyer, direct.

Q How much is that there?

A Fifteen feet.

Q How does that affect you? Have you a photograph?

A Yes, sir. That would throw the switch—that is ten feet high (indicating)—that would bring—

10 *Commissioner Donges.* Wait a minute. When you say this and that, when it gets in the record and we are reading it over, we don't know exactly what you mean to indicate. When you say "this," read into the record what it means.

Witness. I brought this so you could see.

Commissioner Donges. Just explain from the photograph, without pointing your finger and saying "this," so many feet to the second floor.

Witness. From the main line fifteen feet they are going to raise it.

20 *Commissioner Donges.* Going to raise the switch fifteen feet?

Witness. From the main line we have a switch, which is raised two feet from the main line.

Q At the present time?

30 A At the present time. Now we have got a floor on the bottom of the first floor we don't own that comes on the back, back of the building, that is on Summer street. We had to raise our switch two feet higher than the main track to have headway on the first bottom floor where we keep our wagons and horses. That you can see in here, bottom floor on the Summer street side is not shown on here; this shows the railroad side. That is the Summer street side (indicating).

Mr. Gourley. Suppose we mark these.

Commissioner Donges. Yes.

(Photographs marked Exhibit SO-4 and Exhibit SO-5.)

40 *Witness.* If it is raised fifteen feet it would bring us in the middle of the first and second story.

Jacob Meyer, direct.

There is one floor on the bottom, I don't count that, on the railroad side. We have to raise to the middle of the second and third floor.

Commissioner Donges. Second or third floor?

Witness. Second or third floor.

Commissioner Donges. The floor of this second story is how many feet above the level of this present switch?

Witness. The first floor is ten feet and so is the next. They are all ten feet, and three floors.

Q What effect does the closing of Franklin street have on your business?

A That would bring—our loading is on Summer street and we do most of our business on Franklin street across the railroad there and go over the Straight street bridge. Now they closed that up, they take all heavy loading, it is quite something to fetch it up Lafayette street or King street.

Q To go back?

A Yes, to get over Straight street bridge. We have a traveling trade that would be cut off altogether.

Q Explain that?

A People coming after feed themselves and take the shortest cut and we make it the long cut, they go past Atchison in River street and that cuts off trade in that.

Q This elevation of which you spoke would be above your second floor?

A Above the second floor.

Mr. Gourley. I think that is the main objection.

Commissioner Donges. Anything of this witness?

Mr. Merrey. No.

Mr. Gourley. The brewing company, that is, James A. Graham, Katz Brewery, Hinchliffe Brewing & Malting Company, put in their testimony and have shown their objections to it.

Discussion.

H. M. Post is not affected if the switches are placed as they are here.

The National Silk Dyeing Company, their objection is on the record; so is the P. S. Van Kirk Company.

10 *Mr. Merrey.* The National Silk Dyeing Company's objection is to leaving it as it is. They want us to raise the tracks.

Mr. Gourley. Elevate it only for coal purposes, we would be glad to agree. You heard the testimony.

Commissioner Donges. Is there anything further to-day?

Mr. Gourley. No.

Commissioner Donges. All parties rest?

Mr. Merrey. I think so.

20 *Mr. Hobart.* I should like to have an opportunity to make an application, if I do desire, to put in evidence on the financial question. I am not at liberty to say at this time whether I will put in anything. If I do I want to let the commission know at an early time.

Commissioner Donges. We are anxious to get the matter closed.

Mr. Hobart. There are reasons why I can't take any positive action at this time.

30 *Commissioner Donges.* We don't want to embarrass you in doing it. Your present position is you don't know whether you desire to?

Mr. Hobart. That is just the trouble, we don't know either way.

Commissioner Donges. You are now simply closing your testimony and giving notice at the same time you may ask leave to submit something further?

40 *Mr. Hobart.* Yes, on that one subject, the question of the financial difficulty and whether I will

Discussion.

do that depends on circumstances which are in the future.

Commissioner Donges. Well, the point is we would like to take these grade crossing cases up and dispose of them.

Mr. Merrey. I think this case ought to be disposed of, if the commission please. I don't see how the financial question has anything to do with this case. The railroad company is in exactly the same position as any manufacturer would be, a man who didn't comply with the fire regulations, if he should have a big mortgage on the mill, the factory inspector don't say for that reason he escapes putting in fire escapes or safety machinery.

10

Commissioner Donges. That is not entirely the situation, the financial condition of the company as to the total bonded indebtedness, I think that all parties having closed we will take the matter into conference and we would be glad to have briefs of counsel. Within what time would counsel submit briefs?

20

Mr. Hobart. Might we have oral argument on the subject?

Mr. Merrey. Just as you see fit.

Commissioner Donges. We would be glad to have counsel discuss it orally if they desire.

Mr. Hobart. I think there ought to be some discussion.

30

Mr. Merrey. The trouble is the commission is going away during August.

Commissioner Donges. The commission thought of disposing of some of these matters during their vacation.

Mr. Merrey. There isn't so much to be argued as far as I can see. There is bound to be a certain amount of hardship on owners and there has to be a certain amount of expense. Fortunately in this case there is very little dispute as to the character

40

Discussion.

of the plan submitted and the amount of injury to the switch owners seems to be brought down to the minimum. There isn't much to be said.

10 This is probably one of the most important cases in this line the commission has had. A great many people are looking forward to see something done in the grade crossing line, and it is a question of what ought to be done to take care of it. I had hoped we would be in a position where the company and the city could agree. It doesn't look as if that were possible. I hoped by concessions on the part of the city, only asking a portion of the work to be done, which I was able to do by concessions, and doing a little more on the street work than called on to do by the act, that it would be greatly to the advantage of the company to meet us. I am afraid they don't want to do that.

20 *Mr. Hobart.* I will only say on that subject, I am not prepared to say anything definite one way or the other at this time. But I told Mr. Merrey, when we had a little conference before the hearing began, the situation might change in three or four months, it depends on conditions which we hope will improve; that is in the future, I am not in a position to promise.

30 *Mr. Merrey.* We have been waiting for this so long. Paterson has tried to get rid of Market street and other crossings in the vicinity near it more than any other community. It is probably the worst community in the State, used more than any other. We have been before the legislature; we started out trying to get an agreement out of the company to do it. At one time we nearly settled the question; at one time we would pay a considerable portion of the cost. The company wanted us to pay more and lend them the money, which we couldn't do under the act of the Legislature. We have been down to the Legislature when

40

Discussion.

all the communities wanted the railroad to pay everything. We have communities in this vicinity berating Paterson because Paterson would pay a portion of the cost. Not because we didn't feel it should be paid by the railroad, but we felt we would concede something to have the thing done. We were willing to give a large sum of money to have this thing changed, no matter at whose cost it should be. We have never been able to do it; the result has been public opinion throughout the State has been shifting the amount of cost the community ought to pay until they got this act. If the railroad agreed with us five years ago they would have been paid twenty-five per cent. without question. The people of Paterson are so anxious to get this thing they are willing to make concessions to get it started rather than have delay. We would be willing to take Section A; that is the main section, the one which would take out the centre of the city, take out from Market street down to River street, it doesn't take out River street; we would be glad to meet them on that. They don't have to pay quite a few things they have in that. In their expense they have about \$1,600,000; they have added the whole cost of the streets, which the city takes up; they have added those changes that are charged to the switch owners. There are a number of things in there; probably the fact that their estimate is most liberal, they add thirteen per cent. The portion of what we figure, what I figure the cost to the railroad, would be in the neighborhood of one million dollars; it might be slightly more, but their \$1,600,000 would be scaled down—

Commissioner Donges. The estimate of the railroad paying \$1,442,000?

Mr. Hervey. \$1,442,000; well, they have got \$60,000 street damages in there. They have a

Discussion.

number of things in there; they have got a \$140,000 depot. If they were going to put in a depot worth that we would be willing they do that; I would say when they built it it won't cost anything like that; more like \$40,000 than \$140,000. Counting the best time it would be \$1,000,000 or one million and a couple of hundred thousand dollars. We have worked six months preparing a plan; if they did that work they would be on it for the next couple of years. They would have three years to raise the money; there wouldn't be any great hardship in that. I want to meet them on some such line as that; reach an agreement so the commission can make a perfunctory order if it don't look as though we can do that. If we can't meet them, it is our duty to insist on the whole work being done without making any concessions at all. That is what we are asking the commission to do. There isn't so much as I can see that requires argument. As I say, the objections to the plan are practically nothing. There is really no objection to the plan that is presented by the city; that plan is practically accepted.

Commissioner Dongra. Suppose we put the matter down as closed and take it into conference and give you leave to submit oral argument here on July 24th?

Mr. Hervey. That isn't sufficient adjournment. I think all that can be said July 24th. I think it all can come before the commission; there isn't so much.

Mr. Hobart. This is the most important case of this kind, I suppose, in the whole country at this time. It does seem to me that the suggestion I have made as to the possible change in the situation, that we ought to have a little leeway in view of the somewhat unusual condition of affairs.

Discussion.

Commissioner Donges. I don't recall just when these hearings started.

Mr. Merrey. A year and a half, I think, since we filed our petition; right after the law passed last year.

Mr. Hobart. We have always been ready.

Commissioner Donges. We have probably been taking testimony covering at least twelve months. 10

Mr. Merrey. It seems a question that ought to be settled and settled promptly. I say it is the first big one of this kind attempted in the State. I would like to know whether it is possible that something can be done.

Mr. Hobart. I really feel if there is an adjournment, after the adjournment season I might be in a position to say more definitely than I can now. That is the position I am in now.

Mr. Merrey. Perhaps you can say quicker if you had an order? 20

Mr. Hobart. No, I can't say on that. There may be a contest on the validity of the law and if there is any possibility of avoiding that I want to do it. I can't state anything positively on it. That is my position at this time.

Commissioner Donges. What objection would there be to taking it into conference and in the meantime, before the announcement is made, you could make application to reopen? 30

Mr. Hobart. I am perfectly willing to do that, if there is some understanding of the time limit when I may make such application.

Commissioner Donges. Of course I don't know what circumstances may arise. It may be the commission will find it impossible to dispose of it as speedily as it hopes. It will take some time to go over this case and work it out. It is a matter at best that couldn't be disposed of in a few days. 40

Discussion.

That may take one month or two months; we can't tell how long it will take.

Mr. Herreg. Would you require any great length of time to discuss the question?

Mr. Hobart. Discuss it orally?

Mr. Herreg. Yes.

10 *Mr. Hobart.* I don't insist on that; I just made the suggestion.

Mr. Herreg. I don't think it will require any great length of time.

Commissioner Donges. Why can't we take argument on the 24th?

Mr. Hobart. I am willing to waive argument as far as that is concerned.

Mr. Herreg. I will waive it too. Let it go to conference now.

20 *Mr. Hobart.* With the understanding if we decide to apply to reopen on the one ground suggested, we may have an opportunity to do so?

Commissioner Donges. Do you desire to argue?

Mr. Gourley. No; not if the gentlemen primarily concerned do not.

Commissioner Donges. We would be very glad to have the views of counsel expressed in briefs or orally.

Mr. Gourley. I will do what is agreed.

30 *Mr. Hobart.* Let it go to conference with the understanding if the railroad desires afterward they may apply to reopen on the single question of the financial situation.

Commissioner Donges. And do that any time before the board announces its conclusion.

Mr. Gourley. I ask the indulgence of the commission to have Mr. Agnew, a switch owner, testify.

40 *Mr. Hobart.* Is any time mentioned as to that, or will the secretary send us word ten days in advance of the decision?

John Agnew, direct.

Commissioner Donges. It is pretty hard to do that. It will be a matter of several weeks.

JOHN AGNEW, recalled on behalf of switch owners.

Direct examination by Mr. Gourley.

Q You have looked at these plans as far as they affect you, as far as Ann street?

A Yes.

10

Q Will you state briefly what your objections are and how they affect you?

A Those plans carried out that way it would demoralize our entire plant, rebuild everything and reconstruct the entire plant. The cost, I don't know what it would run to, but it would be enormous.

Q You don't dump on the level? The pockets are below the level?

A Yes.

Q What is the drop now from the track?

20

A It will dump—the trestle varies from about sixteen feet, I should say, to twenty feet.

Q Sixteen or twenty foot drop now?

A Yes.

Q With this elevation what will the elevation be?

A I understand this is about sixteen or seventeen feet raise at our point.

Q With that contemplated change what effect will that have on your pockets?

A Have to tear them out, rebuild; going to the additional height so much heavier material.

30

Commissioner Donges. How much is the height of the switch increased by the city's plan?

Witness. Sixteen or seventeen feet.

Commissioner Donges. Sixteen feet?

Witness. It would leave it thirty-five or thirty-six feet all told, so it would destroy all our plant, our present plant; have to go to very great expense; concrete and iron, I guess, I don't know.

40

John Agnew, cross.

Q What would you construct that with, do it with timber or concrete or iron?

A No, you couldn't get timber heavy enough.

Mr. Merrey. The witness don't know.

Witness. It couldn't be done with timber, I know that. It would be a case of concrete and iron or steel.

10 Q I suppose you know nothing about, in general, the probable cost?

A I never had an estimate. I should say it would probably cost \$100,000 in our plant.

Q As much as that?

A I should say at least that.

Cross examination by Mr. Merrey.

Q This plant is a very large one?

A Yes, sir.

20 Q You haven't any pockets?

A No.

Q You dump on the ground and shovel into your wagons?

A Elevate it.

Q You have none of the latest apparatus for loading your wagons?

A Yes.

Q Wouldn't you save money if you had pockets for loading the coal into the wagons?

30 A No; a system of pockets under the new plan here, it would mean concrete and steel and this expanded metal, reinforced, which is very costly.

Q All the big concerns in your line of business have pockets and means of loading where they don't have to shovel?

A No; the modern method to-day of handling coal is by machinery, elevators and elevating it. The majority of the plants in the country handle it that way.

Q You have to elevate that?

40 A Conveyors and elevators.

John Agnew, cross.

Q These companies can't get a drop you have here?

A I can't say as to that.

Q What is the biggest plant for delivering coal in Paterson?

A Well, I don't know, I should say Mr. Wilson's.

Q How about the Delaware plant?

A I don't consider them to be compared with Mr. Wilson's. That plant has the same objections ours would have. With that high elevation the coal dropped from the cars to the pockets breaks a lot of it, making a lot of waste, which is a loss to any dealer. So a high fall for the coal is very objectionable. It means a large amount of waste and loss to the dealer. It isn't the same as soft coal; bituminous; this is broken to sizes, and dropping eighteen or twenty feet the waste is something awful.

10

Q There is no doubt about the capital in making the change as far as your company is concerned?

20

A Yes, there would be.

Q There will be no difficulty in getting the capital necessary?

A I don't know how many good friends we have. I think I can safely say it would mean an expenditure of \$100,000 to us. I think I am within bounds in that.

Q (*By Mr. Gourley.*) The city's objection is that you could easily stand that?

A That is what makes us poor, that impression.

Commissioner Donges. We will take this case into conference.

30

Newark, N. J., Friday, October 9th, 1914.

PATERSON GRADE CROSSING ELIMINATION—
ERIE RAILROAD.

R. W. E. Donges, Esq., T. J. Hillery, Esq., J. J. Reacy, Esq.

For Public Service Companies appears L. D. H. Gilmour.

Commissioner Donges. Let me direct your attention, Mr. Gilmour, to the correspondence that has passed between the Public Service Gas Company and the board in the matter of the proceedings for the elimination of grade crossings in the City of Paterson.

Mr. Gilmour. Yes, sir.

Commissioner Donges. And your request for the submission of an estimate of the cost to the Public Service Gas Company in connection with the proposed plan.

Mr. Gilmour. Yes.

Commissioner Donges. The situation is, as you know the proof has been closed and the matter has gone to conference. Unless notice was given to all parties and the matter opened so that the proof could be taken by the stipulation of all parties leave was given to make part of the record the estimate submitted. I don't see how—

Mr. Gilmour. Such leave was given in public in one of the hearings. I have got the transcription from the record and it shows that. I am not particular about the gas company or the electric

Discussion.

company. I don't care about that; but the railroad has got to submit its figures to show the total cost. A part of the cost may be imposed on the railroad company up to ten per cent. of the cost. I don't see how you can get out the total cost unless you know the railroad's figures.

Commissioner Donges. I confess the record does seem to give some ground to your interpretation that an opportunity would be afforded you, but the opinion of the board at the time was such opportunity would be afforded before testimony was closed. Now the testimony has been closed. 10

Mr. Gilmour. As the board will remember, these hearings were held from time to time, week after week, and there didn't seem to be anything of interest to the street railway until some plan was adopted. I made this statement before the board; the board said after we have before us for consideration some tentative plan on which the cost can be figured, then we will give you an opportunity to put in your cost figures. From time to time I made inquiries and since I found this tentative plan was in the possession of your engineer. I had our engineer go over it and examine it and make up the cost predicated on that. 20

Commissioner Donges. The thought was such testimony would be submitted before the proof was closed. The suggestion now is, if you desire an opportunity that notice be given to all the parties of application on your part to submit this proof and then we will fix a short day, because the board is anxious to dispose of the matter. If you will give notice, for example, of application next Tuesday or next Friday—next Friday perhaps would be better. 30

Discussion.

Mr. Gilmour. I will send the notices if you will give me the names of the parties.

Commissioner Donges. I imagine the situation will develop when you make your application no objection to the submission of your application will be made.

10

Mr. Gilmour. All I am particular about is the railroad's figures and the other figures don't cut so much ice as we see it; but the railroad is important because if the cost of the railroad, which is more than ten per cent. of the total cost, the railroad has got to contribute to the cost. That is the reason I expect why notice ought to be sent to the railroad company. I don't know anybody but the railroad company interested in it.

20

Commissioner Donges. I think every person in interest should be notified. That doesn't involve giving notice to each individual. I would say give notice to the counsel of the parties would be sufficient.

Mr. Gilmour. If Mr. Barber will give me the list.

Commissioner Donges. Mr. Gilmour refers to the number of switch owners and Mr. Minard and Collins & Corbin.

30

Mr. Sommer. Not only Collins & Corbin, they represent the Erie, but the railroad companies were represented singly; Mr. Lewis represented one.

Commissioner Donges. Mr. Barber will give you the list.

40

Mr. Barber. I can give a list of the parties notified of the hearing held heretofore. A great many were given notices; the property owners were not represented by counsel at any of the hearings and the question is whether those people

Discussion.

should be given notice. It can't be assumed that the counsel who represented some of the property owners will represent all the property owners.

Commissioner Donges. Certainly not. Those not represented should be given individual notice.

Mr. Barber. That is the point; to do that will require going back over our record in order to send out notices to a hundred or more names. I can't very well get over that to-morrow and he get his notices out so people will have reasonable notice. 10

Commissioner Donges. I think Friday would be the shortest day. I think it ought to be done Friday so there would be no delay in the consideration.

Mr. Gilmour. Friday the board sits in Jersey City, all right. 20

30

Discussion.

THIRTEENTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Jersey City, N. J., Friday, October 16, 1914.

PATERSON GRADE CROSSING CASE, }
ERIE RAILROAD CO. }

10

Before Commissioners: R. W. E. Donges, Esq.,
T. J. Hillery, Esq. and J. J. Treacy, Esq.

For the City of Paterson appears Randal B. Lewis,
Esq.

For the Erie Railroad Company appear G. S. Ho-
bart and D. E. Minard, Esq.

For the Public Service Railway Company appears
L. D. H. Gilmour, Esq.

20

For various switch owners appears W. B. Gourley,
Esq.

Mr. Gilmour. I am ready with the engineer
of the Public Service Railway Company to show
what the cost will be to them.

Mr. Merrey telephoned me and I told him what
we intended to do and I suppose Mr. Lewis is
here—

Mr. Lewis. Yes, we would like to have that
put in.

30

Mr. Minard. The board, I believe, has a letter
by this time that was written, that we sent out
a telegraphic notice to Mr. Merrey about that
we would ask for to-day. He has gotten it by
this time.

Commissioner Donges. Has any further no-
tice been given of your desire to submit further
testimony, other than the letter to Mr. Barber,
secretary of the board and your telegram to Mr.
Merrey?

40

L. D. H. Gilmour, direct.

Mr. Minard. No, sir. That was sent out as soon as we got a notice of this hearing to-day and we thought the board probably would want the motions heard to-day rather than later.

Commissioner Donges. First, Mr. Gilmour, your motion is?

Mr. Gilmour. For a chance to put in the cost to the Public Service Railway Company entailed by making the change in accordance with what I understand is the tentative plan now being considered by the board; those maps in the possession of Mr. Mead I had examined by engineers of the street railway company and we have figures of estimated cost predicated on the changes suggested by those plans. 10

Commissioner Donges. And you have given notice?

Mr. Gilmour. I have given notice to the people whose names appear on the list furnished me by the secretary. 20

Commissioner Donges. Suppose then you make proof of such service.

L. D. H. GILMOUR, sworn on behalf of Public Service Railway Company.

Pursuant to understanding had with the commission, I caused a notice, of which copy is here submitted, to be placed in envelope, with postage prepaid addressed to the following persons, addresses of which were received from the secretary of the commission. 30

Erie Railroad Company, David Bosman, secretary, 50 Church street, New York City; Public Service Electric Company; Public Service Gas Company; Public Service Railway Company; Western Union Telegraph Company, George H. Fearsons, general attorney, 195 Broadway, New York City; New York 40

L. D. H. Gilmour, direct.

Telephone Company, J. L. Swayze, 15 Dey street, New York City; Paterson and Hudson River Railroad, Paterson and Ramapo Railroad, William I. Lewis, Attorney, Paterson, N. J.; Paterson, Passaic & Suburban Telephone Company, 437 Chestnut street, Philadelphia, Pennsylvania; City of Paterson, E. F. Merrey, Esq., Paterson, N. J.; Hon. E. A. Stevens, State Road Commission, Trenton, N. J.; Leslie Elliott Company, John Agnew Company, Samuel Smith & Son Co., James Wilson & Son, McNab & Harlin Mfg. Co., Morris & Co., P. S. Van Kirk Company, Meyer & DeVogle, H. M. Post, National Silk Dyeing Company, Paterson Brewing & Malting Company, Herman Company, Fuller's Express, sent to W. B. Gourley, Paterson, New Jersey.

Q (*By Commissioner Douges.*) As attorney for—
 A As attorney for those addresses. D. Fullerton
 20 & Company to Hudson & Joelson, 150 Market street, Paterson, N. J.; Cooke Locomotive Works, Paterson, New Jersey; Passaic Steel Company, Paterson, New Jersey; R. H. McDonald, Paterson, New Jersey; G. A. Zabriskie, the note here was, "letter returned by postal authorities," but that letter was addressed to Paterson, New Jersey, as I had no other address given. Commercial Lumber & Mill Work Company,
 Paterson, New Jersey; C. Kelly, Paterson, New Jersey;
 30 M. Goble, Paterson, New Jersey; National Wood Company, Paterson, New Jersey; Standard Oil Company, Paterson, New Jersey; Rogers Locomotive Works, Paterson, New Jersey; James A. Graham Brewing Company, Paterson, New Jersey; National Biscuit Company, Paterson, New Jersey; Paterson Vehicle Company, Paterson, New Jersey. The following are all addressed to Paterson; Paterson Beef Company, E. M. Stiles, Laffray & Herman Company, Schwarzschild & Sulzberger Company, David G.
 40 Rodgers Company, Armour & Company, Hinchliffe

Discussion.

Brewery, Katz Brewery, A. H. Smith, Armstrong & Sons Company, Atherton Grain Company, J. A. Leydecker, J. Vanden Handel, Swift & Company, Ashley & Bailey Company, Grasselli Chemical Company, Weidman Silk Dyeing Company, L. Lapat, Sutherland & Edwards Company, Nicholson File Company, Pugila & Gramatica, Auger & Simon Silk Dye Company, Van Winkle-Bromley Lumber Company, Gulf Refining Company, Diamond Coal Company, William Dunklee, Bon Arbor Chemical Company, Centre Paper & Box Co., Waldo Silk Ribbon Company, Hamilton Lumber Company, Olive Oil Soap Company. Those were all mailed to Paterson, New Jersey.

Q Haven't come back?

A Haven't come back yet, not until this morning. I think the postal authorities hold them for five days, something like that. These were sent on Tuesday.

Q Tuesday of this week?

A Mailed on Tuesday.

Mr. Hobart. Before testimony is offered on behalf of the Public Service Railway, I would like to inquire if the board will hear our application at this time.

Commissioner Donges. I don't see how it is possible in view of the fact that the testimony was closed with the understanding that if you desired to submit anything further an application would be made.

Mr. Hobart. Yes, sir.

Commissioner Donges. And the same practice would be followed in the case of the Erie Railroad as the Public Service Railway Company; notice should be given.

Mr. Hobart. To all parties?

Commissioner Donges. To all parties in interest, of the application. You make your application now and in accordance with the under-

Discussion.

standing, which the tentative motion might be called, the board will afford you an opportunity to put in additional testimony.

10 *Mr. Hobart.* That is all we want to understand, but of course, we could not give notice to everybody because we did not hear of this until Wednesday. We at once notified Mr. Merrey, because we felt he was the one most interested. We are perfectly willing to give such further notice, if the board thinks we ought to do that.

Mr. Lewis. Would your board at this time pass upon the admissibility of this line of testimony. As I understand, the Erie wishes to put in a statement of its financial condition. I cannot see of any possible way that would be material to the issue which is before your board.

20 *Commissioner Donges.* The board at the last hearing in Newark, at the time the board announced that the testimony was closed and the matter would be taken into conference—Mr. Hobart in the hearing suggested that it was possible that he might desire to make an application to submit some testimony as to the financial condition of the Erie Railroad which would bear upon the character of order which the board should make, as to whether for example, all of
30 the work shall be ordered done at one time or whether the suggestion it might be done, piecemeal, or whether it should be done at all; anyone of those questions might be affected by the additional testimony which is submitted and in that view, the board thought that such testimony would be relevant. It might be material as to the character of order the board should make.

Mr. Hobart. Or whether any order should be made at this time or when it should be made.

40 *Commissioner Donges.* Or any order should be made and the board thought that an oppor-

Discussion.

tunity, if desired, should be afforded to submit such testimony.

Mr. Lewis. Your present ruling is, as I understand, if the railroad complies with the formalities as to notice you will give them another time—

Commissioner Donges. Such opportunity will be afforded, and the board will now fix the time, if counsel desire. Have you any suggestion, Mr. Lewis, as to any date which might not be agreeable for this purpose? 10

Mr. Lewis. I have no date in mind at all.

Mr. Sommer. May I ask Mr. Hobart whether a part of his testimony is to take the form of tabulations? 20

Mr. Hobart. A very considerable part of it will, but there is another section of it which cannot be very well tabulated.

Mr. Sommer. The reason for my question was this; if part of the testimony is going to take the form of tabulated statements, I think they ought to be furnished to counsel for the board and to Mr. Lewis in advance, in order to expedite the taking of testimony.

Mr. Hobart. Perfectly willing.

Commissioner Donges. So that counsel may know what is likely to be met. 30

Mr. Minard. There is one thing about that, Mr. Chairman, these tabulations are ready. I have gone over them, and the superintendent, in the preparation of them and if they are presented in that way, in order to make them intelligible to even the most enlightened accountant, they would have to have a good deal of explanation. They were prepared with the idea that the master mind of the company who handles these things, the comptroller himself was going to be 40

Discussion.

here and use them as a basis for his discussion and while I might give a bunch of figures, they would not mean a great deal in their present form. They would have to be very much illuminated.

10

Commissioner Dongen. That might be, but certainly some idea as to the character of the testimony and certainly of the figures themselves would be gained by having them in possession and the studying of them would assist the cross examiner in expediting the hearings—

Mr. Minard. There is no objection to furnishing them.

Commissioner Dongen. —and perhaps avoid a further continuance.

20

Mr. Minard. What I have said does not amount to an objection to furnishing them; only an explanation. One more point—

Commissioner Dongen. Then they will be furnished?

Mr. Minard. Yes, we will furnish the statement. Of course I cannot furnish all of the figures that are going to be offered at that time, but I will furnish all those tabulated.

Commissioner Dongen. All tabulations will be submitted?

30

Mr. Minard. Yes. We have a lot ready to-day.

Mr. Lewis. And the question of the admissibility is still arguable, I understand.

Commissioner Dongen. No, I understood you had made your suggestion to that.

Mr. Lewis. They are to be submitted subject—

40

Commissioner Dongen. The board has ruled that an opportunity will be afforded to the railroad company to put in such testimony as regards its financial condition as is material to the

settlement of this question. That does not of course, affect the admissibility of any particular piece of testimony but simply deals in general with the scope that the testimony is to take.

Mr. Minard. One of the things which entered into the considerations sometime back as to whether we would offer the financial conditions, was stating to the board certain prospects of the company and the delicacy about publishing financial conditions at that time. Those conditions have to some extent been removed but the board will recognize the reluctance of the company to lay its heart, so to speak, on the table, and I wondered whether some arrangement could not be made to prevent their being published. 10

Commissioner Dungen. Any matter that is submitted to counsel, I assume for Paterson, and certainly the board, will not be made the subject of advertising. 20

Mr. Minard. I know, but when the thing is in evidence, it is susceptible of being published unless the board makes a rule to the contrary. If we issue statistics to-day to counsel and something develops to-morrow that makes it—our own affairs make it impossible for that to be given in evidence, I would not want any of the statements to be published in advance of the testimony. 30

Commissioner Dungen. They would not be.

Mr. Minard. They would not be through the board, I know, but unless some mention was made counsel for some of these would not realize the necessity of not giving information, if called upon by some newspaper for the information.

Commissioner Dungen. Until the matter is submitted, the board would not be in the record.

Mr. Minard. The board would not do it or the 40

Discussion.

counsel for the board; they are in the habit of handling these figures.

Commissioner Donges. After once the figures are put into testimony—

Mr. Minard. Then of course, they are public, I understand that.

10 *Mr. Sommer.* They were to be furnished, I understood, simply to myself and to Mr. Lewis.

Mr. Minard. That is satisfactory.

Commissioners Donges. Simply to better prepare the cross examiner to complete his cross examination.

Mr. Lewis. I will give Mr. Minard a pledge of secrecy.

Commissioner Donges. After the information is put into the record, then it becomes public.

20 *Mr. Minard.* I understand that, unless some arrangement is made to the contrary.

Commissioner Donges. It is understood then that the Erie Railroad Company will be afforded an opportunity to put that in.

Mr. Minard. Was there any date to be fixed about that now?

Commissioner Donges. Yes, we can now fix a date. There is no question about the testimony being submitted on the date fixed?

30 *Mr. Minard.* I have all my witnesses on the telephone now, ready to come right here in case we were to put it in to-day. The information is ready, working nights and Sundays for a few days, in order to get it done—not Sundays exactly—but since we got this notice, we have been working constantly, men working half the night, so as to get the thing run out, so we would be ready if the board wanted it to-day.

40 *Commissioner Donges.* I see no reason why

Walter L. Bartholomew, *direct.*

we could not take this testimony one week from to-day at Newark.

Mr. Minard. I will send out the notices right off.

Commissioner Donges. You can get a list now and can get the notices out to-day, to-morrow at the latest.

Mr. Minard. I think the trouble before by using the secretary's name on the notice—I would like to know how the board would like to have that signed. I am willing to do it any way. Mr. Gilmour did the same thing I did. 10

Commissioner Donges. By permission of the board.

Mr. Minard. Then I have permission of the board?

Commissioner Donges. Yes, you may send out notices similar to this. 20

Mr. Minard. I have a list but haven't perhaps all of them.

Mr. Gilmour. He can use the list I had.

WALTER L. BARTHOLOMEW, sworn on behalf of Public Service Railway Company.

Direct examination by Mr. Gilmour.

Q Mr. Bartholomew, what is your business or profession? 30

A Engineer.

Q And with whom are you connected?

A Public Service Railway Company.

Q Have you under the direction of anyone examined the proposed plans in the office of the inspector of bridges and grade crossings of the Board of Public Utility Commissioners, relating to the change of grade of the Erie Railroad through Paterson?

A I have.

Q Have you made an estimate or caused to be 40

Walter L. Bartholomew, direct.

made an estimate of the cost of the streets to the Public Service Railway Company, involved by such changes at its crossings, of such streets on which the Public Service Railway Company have tracks?

A I have.

10 Q Will you give to the board in detail the cost to Public Service Railway Company of changing its construction at each crossing, distributable?

20 A I have a description here of each grade crossing at each location. That I will read. Park avenue and Market street; this location involves 1,895 lineal feet of single track street railway. The present plans call for elevating the railroad tracks fifteen feet and depressing the street three feet, giving approximately fourteen feet clearance under the bridge girders. The grade of the street on the easterly side of the railroad will be run out at Straight street and that on the
20 westerly side will be run out at Railroad avenue. The total estimated cost to the railway company on account of the improvement at this point is \$18,816.12, which includes excavation under our tracks. In addition, the change will result in a decrease in our capital account of \$1,858.54.

Q (*By Commissioner Donges.*) What do you mean by that, exactly?

30 A By the decrease in our capital account? We have special work installed there now at very heavy expense to us.

Q What would happen?

A That would have to be removed, discarded. The alignment of our tracks will not be affected. That is for Park avenue and Market street.

Q (*By Mr. Gilmour.*) How do you arrive at that difference in capital investment, Mr. Bartholomew?

40 A We have special work installed there now at a value of \$5,850, and that which will be replaced will be \$2,475. Then there are two sets of derail levers,

Walter L. Bartholomew, direct.

switch operating mechanism at \$4,060, which will account for—

Q Which will not be replaced at all?

A Will not be replaced.

Q So the value of the property which is there now is approximately \$9,000?

A The total value according to our detail estimate, including every item there now, is \$20,029.66. 10

Q The cost of the improvement is a total of what; \$18,816.12?

A Yes.

Q And the difference is approximately one thousand, which will be the difference in investment when this change is made?

A Yes.

Q (*By Commissioner Donges.*) Would you have to scrap this?

A Some of it, yes. We have allowed for scrap on this. 20

Q (*By Mr. Gilmour.*) In these figures of cost, have you allowed the scrap value of the material which is to be scrapped?

A You mean in the detailed cost of construction?

Q Yes?

A No, not taken from that.

Q The scrap value is not deducted?

A No, it is not.

Q Is that all as to the Park avenue crossing? 30

A That is. I have a detailed estimate for each item down there if you wish it.

Mr. Gilmour. I think the board does not care for that.

Mr. Minard. Shouldn't we have the detailed estimate? We are interested; we have to pay the difference, what they don't.

Commissioner Donges. If he has it in tabulated form I should think it would be— 40

Walter L. Bartholomew, direct.

Mr. Minard. Our engineers would want to look at it.

Mr. Gilmour. Then all right.

Witness. Will I read this?

Mr. Gilmour. Better read it into the record.

10 *Mr. Minard.* I don't want to interfere with the method which the board prefers, but if a detailed estimate like that—we have no objection to its going in as a statement and then we can get copies and consider it.

Mr. Gilmour. I would be very glad to have it done that way. I was going to read it in the record, so the copy of the record would show all the details.

20 *Witness.* The types of the rails are given and the proposed, the different types and kinds, and it might be rather confusing to get it all down; some places the same rails are used, other places they are renewed by a different type of rail.

Commissioner Donges. It is better to put it in, I should think in the form of a tabulation.

Mr. Minard. It is just as much a part of the record then.

30 *Mr. Gilmour.* With that understanding, I will have tabulation on each of these crossings furnished. I will send copies to the board and the secretary can forward them to the railroad company.

Mr. Minard. So if we get it in time our engineer can make suggestions next week.

Mr. Hobart. I would suggest you send it direct to the company.

Mr. Gilmour. All right.

Commissioner Donges. To Mr. Lewis and the railroad company.

40 *Mr. Gilmour.* Mr. Lewis is interested in this detail?

Walter, L. Bartholomew, direct.

Mr. Lewis. The city is perfectly agreeable that it go on.

Mr. Gilmour. I did not know whether the city wanted a detail or not, it is not interested in the cost.

Commissioner Donges. But in general.

Mr. Gilmour. In general, but as I see it not interested in the detail of cost. The railroad company of course is, because they will have to bear part of it. 10

Commissioner Donges. I think it would be well to submit it to the city.

Mr. Gilmour. All right. I will see that Mr. Lewis gets a copy.

Q That will do as to Park avenue and Market street. Your next crossing is Broadway?

A Broadway.

Q What is your estimate on that? 20

A I will read the description of what will take place. The proposed change at this location involves 1,379 lineal feet of single track street railway. The plans call for the same elevation of the railroad tracks and the same depression of the street grade as at Park avenue and Market street. The grade on the easterly side of the railroad will be run out at a point about one hundred feet east of Straight street, affecting also about one hundred feet on Straight street, northwardly from Broadway. The grade on the westerly side 30 of the railroad will be run out at a point in our present crossover between Paterson street and the railroad tracks. The total estimated cost to the railway company at this point is \$14,830.80, which includes excavation under our tracks. The alignment of our tracks at this location will not be affected by the improvement.

Q On those figures we will also submit the detail. Go on with the next one at River and Putnam?

A The proposed change at this point involves 940 40

Walter L. Bartholomew, *direct.*

lineal feet of double track street railway. The railroad tracks are to be elevated fourteen feet and the street depressed about three feet, giving a clearance under the bridge girders of about fourteen feet. The grade will be run out at Warren street on the westerly side of the railroad and at Lyons street on the easterly side of the railroad. The plans call for closing
10 up the present River street crossing, the reason given by engineer Harder's office being on account of the sharp incline of crossing making such an expensive type of bridge necessary to carry the railroad over the street, should River street be maintained in its present alignment. One opening under the elevated structure is to provide to accommodate traffic from Putnam and River streets, making necessary a detour in our tracks and the installation of a sharp reverse curve. This means a very bad operating condi-
20 tion, both because of the sharp curve with increased track and equipment maintenance, and because of the obstructed view and traffic congestion which is bound to result. This proposed blocking off of River street should, therefore, be strenuously opposed by our company. The estimated cost to the railway company is \$8,650, which includes excavation under the railway tracks.

Q That estimate is based on the plan with a double reverse?

30 A It is.

Q What would be your cost if River street were continued straight through and the alignment of the track were not changed?

A It would be about two thousand less.

Q Have you made any estimate of the additional maintenance cost required by the introduction of this reverse curve?

A If we had a reverse curve in there the rails would have to be renewed oftener. The maintenance
40 on the curves would be higher than what it is on a

Walter L. Bartholomew, *direct.*

straight track, due to the fact that the curves have to be greased. I haven't any figures right with me I can give right now. I could prepare figures for that.

Q You have not prepared any figures as to the additional cost of maintenance?

A Not for that reverse curve?

Q How often in your judgment would the tracks on the curve have to be renewed?

10

A The rails might have to be renewed every five or six years.

Q And how long—what would be the difference in the life of the rails on straight track?

A Some places our straight track rails last twelve or fourteen years.

Q So that the difference for maintenance in that respect would be at least one hundred per cent.?

A It would.

Q Is there any increased danger from operation involved by this proposed change in alignment?

20

A There is. You have an obstructed view there of the street, a sharp curve there, also a slight grade coming down onto this curve.

Q The view of the car coming east would be obstructed so that a car coming west could not be observed until it had reached the opening?

A It would be necessary to install signals, yes.

Q And the maintenance of signals would be an additional cost?

30

A It would.

Q They are not required at the present time and would not be required if the alignment were not changed?

A They would not.

Q Take the next crossing at Madison avenue.

A Madison avenue; our track does not cross the railroad at this point, but turns from Madison avenue into Railway avenue on which street it parallels the railroad. The plans call for depressing the railroad

40

Walter L. Bartholomew, cross.

10 tracks ten feet and raising the grade at the junction of Railway and Madison avenues twelve feet, the streets to cross the railroad above grade. The grade on Railway avenue will be run out at Iowa avenue and that on Madison avenue at a point between Railway avenue and Twenty-third avenue. This proposition involves 1,028 lineal feet of single track street railway and the estimated cost to the company is \$14,621.33, which includes the fill under the railroad tracks.

Q (By Commissioner Donges.) Includes what?

A The fill.

Q (By Mr. Gilmour.) Take the crossing at Clay street?

20 A Clay street; our track does not cross the railroad at this point but turns from Straight street into Clay street both of which streets diverge from the railroad tracks. The plans call for raising the railroad tracks nine feet and depressing the streets at their intersection about seven feet, running out the grade at Clay street at Madison street and on Straight street at Bond street, making the street cross the railroad tracks under grade. This proposition involves 614 lineal feet of street railway and the estimated cost to the company \$5,351.52, which includes the excavation under the railway tracks.

30 Q Does that complete all the crossings where the street railway has tracks in the City of Paterson?

Q It does.

Q What is the total cost as estimated by you to the railway company of the change in accordance with the plan submitted?

A That is \$62,278.77.

Cross examination by Mr. Minard.

40 Q Mr. Bartholomew, this I understand is only the estimate of the cost to you and it hasn't anything to do with the estimate with what proportion of ex-

Walter L. Bartholomew, cross.

pense of elimination of the crossing the street railway should bear?

A It has not.

Mr. Misard. That is all; subject to our reservation of the right to examine the detailed estimates when they come in.

Mr. Lewis. No questions.

Commissioner Donges. The matter will be continued, and the further cross examination of this witness to next Friday at Newark. 10

Mr. Gilmour. Mr. Mead has called my attention to an error in the statement which I filed. The first one should be Park avenue and Market street instead of Park avenue and Broadway. It is a typographical error and I would like to ask the secretary to note that.

Commissioner Donges. Why don't you send to the secretary a substitution? 20

Mr. Gilmour. With the consent of the board I will do that.

Adjourned until Friday, October 23, at Kinney building, Newark, at 10.30 A. M.

Discussion.

FOURTEENTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Newark, N. J., Friday, October 23, 1914.

PATERSON GRADE CROSSING ELIMINATION, }
ERIE RAILROAD COMPANY. }

10

Before the following commissioners:

R. W. E. Donges, Esq.

T. J. Hillery, Esq.

J. J. Treacy, Esq.

F. H. Sommer, Esq., counsel.

For petitioners, City of Paterson, appears E. F. Merrey, Esq.

20 For respondent, Erie Railroad Company, appears G. S. Hobart, Esq., and D. E. Minard, Esq.

For Public Service Railway Company appears L. D. H. Gilmour, Esq.

Mr. Hobart. In this matter there is one particular feature, which from our standpoint is of special importance; I suggest to the board whether it wouldn't be better to have the whole board sit, if that could be arranged.

30 *Commissioner Donges.* That would be impossible this afternoon. There is a case on now which was started this morning and the Paterson case was fixed subject to that, so it will be impossible to discontinue now. We could give you some other day.

Mr. Merrey. I object to that. This testimony has been going on for over a year now, I guess. It has all been typewritten. I think the commission can get it just as well from the book.

40 *Commissioner Donges.* Of course, every commissioner would take the book.

Discussion.

Mr. Mervey. I object to the opening of counsel: I haven't the record before me. My understanding was they were to have the right before the final close of the case to put this in. Has the commission allowed it?

Commissioner Donges. At the time testimony was closed Mr. Hobart suggested to the board he might ask for an opportunity. He was told before the determination of the case if he made application we would consider it. 10

Mr. Mervey. The commission has opened it, however, to put in some figures before testimony was closed, some figures they didn't have at that time. I objected to that testimony at the time it was put in with a great deal of declamation and shouting. I think it can go in better in the form of figures and tabulations simply handed in. I don't think it will do any good for the officers of the company to come here and talk to the commission and try to impress them a little stronger. I think the figures speak stronger than any other thing. 20

Commissioner Donges. If the testimony is to be taken the company is entitled to submit witnesses to support the figures if they desire that also.

Mr. Mervey. I presume so. There is no reason I can see under the circumstances, the length of the case and the necessity of the commission having to go over the entire matter to impress themselves, to take the time of the whole commission and ask them to sit here while there is so much other business the commission has to attend to. I don't want to come down here another time. 30

Mr. Hobart. I only make the suggestion; we feel from our standpoint this is perhaps the most 40

Discussion.

important testimony that can be presented; we are prepared to do it by the highest officers of the departments. True, we have prepared certain tabulated statements, but they go very far from showing the situation such as could be testified to by a witness who is familiar with the situation. We feel it is so important, it is desirable to have the board sit together.

10

Commissioner Donges. It is impossible; it would embarrass the work of the board somewhat because every day is taken up.

Mr. Hobart. I know that. It is simply because of the unusual nature.

Commissioner Treacy. Have you any witnesses to-day?

Mr. Merrey. No, we have none. We don't propose to have any.

20

Commissioner Treacy. We meet every Monday in Newark at this office to go over reports and we can probably finish up by one o'clock and maybe arrange for Monday afternoon.

Mr. Sommer. Next Monday I will have to be in Trenton.

Commissioner Donges. In addition, Mr. Hobart, I doubt very much if anything will be gained; while it is always preferable to have every commissioner sit in every case, it is impossible; the work of the board is so heavy it is physically impossible. The record, of course, would be studied by every commissioner.

30

Mr. Hobart. Of course, in a hearing of this kind, which is somewhat peculiar, there are questions likely to suggest themselves to the various commissioners, which we are only too anxious to answer and explain fully. I understand while the board, as in every case, will read the testimony and study it, it is not quite first-hand in

40

Discussion.

the matter of arriving at a conclusion. In ordinary cases it would not make the slightest difference. It is only because it is an unusual condition that I make these suggestions.

Mr. Merrey. There is another matter; how about the Public Service interest in this, Mr. Gilmour?

Mr. Gilmour. The president already knows I am somewhat embarrassed because I am interested in this case before the board now and I would like to present some testimony, if it may be done, in regard to one crossing and the proposed plan in regard to one crossing. 10

Mr. Merrey. Which one?

Mr. Gilmour. The River street crossing.

Mr. Merrey. That is the bad one.

Mr. Gilmour. The place where you propose to put a kink in the street railway grade, what we regard as a very dangerous situation. I want to examine a witness in that respect. That is all I have. 20

Mr. Merrey. Can you tell us how to do it without putting the kink in?

Mr. Gilmour. Yes; spend ten thousand dollars more.

Mr. Merrey. Is that all?

Commissioner Donges. It is apparent Mr. Gilmour cannot submit his proof to-day, so a continuance will be necessary anyway. 30

Mr. Merrey. It will not take a lot of time, it seems to me, from what they say.

Commissioner Donges. If that is true it is doubtful if we could conclude that testimony this afternoon.

Mr. Merrey. I wouldn't be surprised if we couldn't. I would like to get along toward it.

Commissioner Donges. The board will fix 40

Discussion.

next Thursday morning at ten o'clock for the hearing. It is the first and only day that seems at all possible to devote to this case.

Mr. Hobart. We can safely take a chance on that day.

Commissioner Donges. Make it half-past eleven, if you please.

10 *Mr. Merrey.* How long will you take?

Mr. Gilmour. Not half an hour.

Mr. Merrey. I understood you were to leave us your tabulations.

Mr. Gilmour. I have them.

20 *Mr. Merrey.* The only change we are interested in in the Public Service matter is to find out whether they have included in some of their sums they may have put in, our estimates. Any duplication of our own estimates. I would have to have their tabulation to find that out.

Mr. Gilmour. I was going to suggest the easiest way to have that settled is to have the city engineer and the railway engineer confer and in fifteen minutes they can tell whether there is any duplication.

Commissioner Donges. I think they are entitled to have it in the testimony.

30 *Mr. Gilmour.* I don't see how we can put it in the testimony except through conference with the city engineer.

Mr. Merrey. There should be a conference.

Mr. Gilmour. I don't know what his estimates cover.

Mr. Merrey. There should be a conference between the Public Service and our engineer.

Mr. Minard. How about ours?

40 *Commissioner Donges.* Suppose between now and next Thursday morning a conference is had

Discussion.

between the engineer of the Public Service and the Erie and the City.

Mr. Merrey. How many months does the Erie Railroad want to examine this plan?

Mr. Hobart. We can do it in fifteen minutes.

Commissioner Donges. Can you agree when these representatives are to meet? 10

Mr. Gilmour. I can.

Mr. Merrey. I think any day will suit Mr. Harder.

Commissioner Donges. Is there any suggestion as to day?

Mr. Gilmour. Any day except Monday.

Mr. Merrey. How about Tuesday?

Mr. Hobart. We will adjust ourselves to your convenience.

Mr. Merrey. Tuesday. 20

Mr. Gilmour. What time? In Mr. Harder's office?

Commissioner Donges. Tuesday in Mr. Harder's office in Paterson, eleven o'clock. This matter will go over until 10.40 until next Thursday.

Mr. Minard. I have an affidavit of how I mailed copies of the notices; will that be satisfactory to the board?

Commissioner Donges. It might be just as well to show it with the same exactness as Mr. Gilmour. 30

Mr. Minard. At a later date?

Commissioner Donges. Yes, at next Thursday's hearing.

Mr. Gilmour. For the purpose of the record I want to submit the details of the figures which we presented on behalf of the street railway last week. I have them—I have sent over to the office; the man didn't understand we wanted 40

Discussion.

three copies. I have sent over to the office for the second and third copy? I will file this copy with the board and see that the Erie Railroad and the city get a copy.

Commissioner Donges. All right.

Adjourned until Thursday, October 29, 1914, at the Kinney building, Newark, N. J., at 10.40 o'clock A. M.

FIFTEENTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Newark, N. J., Thursday, October 29, 1914.

20 PATERSON GRADE CROSSING ELIMINATION, }
ERIE RAILROAD COMPANY.

Before the following commissioners:

R. W. E. Donges, Esq.

T. J. Hillery, Esq.

J. J. Treacy, Esq.

For the City of Paterson appears E. F. Merrey, Esq.

30 For the Erie Railroad Company appears H. A. Taylor, Esq., G. S. Hobart, Esq. and D. E. Minard, Esq.

For the Public Service Railway Company appears L. D. H. Gilmour, Esq.

Mr. Minard. I might say now we have looked over the testimony, as far as Mr. Bartholomew's testimony is concerned and decided there wasn't anything we wanted to challenge or cross examine about it.

40 *Commissioner Donges.* How about the City of Paterson, the testimony of Mr. Bartholomew,

R. George, direct.

who testified for the Public Service Railway Company?

Mr. Merrey. I don't recall having a copy of the testimony.

Commissioner Donges. He testified to some physical conditions and put in a table and was to submit some further details.

Mr. Gilmour. Submit a detail, which we did submit to the city and the railroad company. 10

Commissioner Donges. The question is whether you desire any further cross examination of that witness.

Mr. Gilmour. I brought another witness here this morning who had a conference with Mr. Harder and the engineer of the Erie Railroad in regard to whether the figures put in included some figures heretofore submitted by the city and the railroad and they have arrived at a conclusion for which I was going to call him. 20

Mr. Minard. I understand they are all included, only the railroad company differs as to what figures on the costs heretofore submitted to the commission included all this railroad work, is that true, Mr. Gilmour?

Mr. Gilmour. I don't understand it included it all; it included most of it. The unit costs used by the city engineer are costs for which we could not do the standard construction. 30

R. GEORGE, sworn on behalf of Public Service Railway Company.

Direct examination by Mr. Gilmour.

Q Mr. George, what is your occupation?

A Assistant engineer, Public Service.

Q As such, have you had any connection with estimates of cost connected with the elimination of grade crossings on the Erie Railroad in Paterson? 40

R. George, direct.

A Yes, sir.

Q Did you have a conference with the engineer of the city and the engineer of the Erie Railroad Company concerning these costs?

A Yes, sir.

Q And what was that conference; what did that conference cover?

10 A The conference covered a comparison between the estimates prepared by the railroad company for the cost to them of making changes in their track and the similar estimates prepared by the city and the Erie Railroad for doing the railway company's part of the work.

Q Have you a tabulation of the results of that conference?

A Yes, sir.

Q Will you submit it to the board, please?

20 A I have my own rough notes in my hand here and Mr. Gilmour has a typewritten copy.

Mr. Gilmour. I have a typewritten report on that; I will submit that and ask it be marked for identification.

Commissioner Donges. It will be marked.

(Comparison of estimates received and marked Exhibit A for identification.)

Q Does the total on that agree?

30 A The copy was made in Mr. Harder's office from my notes and I compared that copy so it agrees with my figures.

Q In the figures submitted by the Public Service Railway Company to this board of the cost to the railway in changing its grade and tracks according to the tentative plan before the board, did you find on consultation that any of those figures were included in the costs heretofore submitted by the Erie Railroad Company and the city?

40 A Yes, sir.

R. George, direct.

Q What differences did you find between the costs, estimated costs, submitted by the Public Service Railway Company and the figures submitted by the city and the railroad company for the same work?

A The total difference between the estimated cost submitted by the city and that submitted by the Public Service Railway was \$22,273.97 and the difference between the Public Service Railway estimate and the estimate prepared by the Erie Railroad was \$17,375.26. 10

Q What was the principal items of difference in the estimates of the city and of the Public Service Railway Company?

A One of the differences was in the amount of track, lineal feet of track affected, another difference was in the unit costs of doing the work on the track, another difference was in the unit cost of grading, also in the amount allowed for paving and the type of paving. 20

Q In making up these figures which you have submitted, what basis of cost have you used?

A We took the actual quantities of the different materials going into the track construction and figured them at our present prices. The pavement, we used granite block pavement and the excavation throughout, we figured that at one dollar a yard as against some places fifty cents on the city's estimate and seventy-five cents on part of the Erie Railroad's estimate. 30

Q There were some places where granite block pavement is not now used on the streets affected?

A Yes, sir.

Q You figured granite block paving on those streets as well, did you?

A Yes, sir.

Q Had the city figured on granite block pavement or on some other kind? 40

R. George, cross.

10 A Some streets they figured granite block, some streets they had figured brick, and some streets they figured macadam. I did not put macadam back because at places where there was macadam, owing to the change in grade, the grade that would be put into our track would not permit of macadam being put back and being held on that grade very well, so we put granite block in there.

Q So, from a careful revision of the figures and from the comparison with the figures of the city and of the railroad company, and consultation with the engineers of the city and the railroad company, are you satisfied that the figures now submitted by you are the reasonable estimate of the cost that will be entailed on the street railway company for doing the work covered by the tentative plans for these grade crossings removals?

20 A Yes, sir.

Cross examination by Mr. Merrey.

Q In making this estimate, where you find work belonging to the street railway company not up to the present standard, you provide for the cost of bringing it up to your present standard, do you not?

A Yes, sir.

30 Q So far as quantities were concerned, you find them to be practically the same as was found by the city and the Erie Railroad Company?

A With the exception of the number of feet of track affected.

Q That particularly applies to the one crossing, doesn't it?

A It applies generally to all the crossings.

Q There is one crossing in which there was a turnout which was not estimated in the city's figures, Straight and Clay streets?

40 A Railway avenue, Madison street and Railway avenue.

R. George, cross.

Q Outside of that particular place the quantities generally agree, do they not?

A In every case I could give the difference in feet, at each location of track.

Q Take the Park avenue and Market street crossing; tell me where you differ there?

A Park avenue and Market street we figure there would be 1,895 feet of track affected as against 1,240 provided for in the city's estimate. 10

Q That additional amount of track is for track outside of the zone that the city says will be affected?

A Not entirely so.

Q You furnished a sketch to the commission, the company furnished a sketch to the commission last week in which you show there is considerable track to be relaid and renewed on Market street outside of the zone covered by the city?

A Yes, sir. 20

Q Doesn't that include practically all the difference?

A That includes part of the difference, but not all of it.

Q Where did the rest of the difference come in?

A I think part of the difference came in probably—I don't know on what basis the distance was figured—but probably a part of it came in by having the distance across the improvement scaled and multiplying it by two and neglecting to take in a part of that third track through the improvement. We have three tracks through a part of that improvement, if you will notice, one on one street and two tracks on the other street. 30

Q But the main difference is due to your intention to relay track outside of the zone covered by the work?

A Part of that track at one end has a crossover in it which is partly affected by this improvement and 40

R. George, cross.

It was made necessary to go back into another cross-over and reconstruct the whole thing.

Q I understand you to say there is a difference of 645 feet?

A Yes, sir, 645 feet.

Q Just tell us how much is covered by the amount outside of the zone declared by the city?

10 *Mr. Gilmour.* I don't want to interfere with this line of questioning, but I would like Mr. Merrey to specify for the record what he means by zone.

Mr. Merrey. The zone as indicated on the maps where the change of grade begins on Market street.

A Probably in the neighborhood of about 375 feet, as near as I can tell. About three times that distance that I have shown on the map outside of the improvement plan, and special work.

20 Q There is sixty feet here (indicating)?

A Sixty-six feet at this end.

Q And two hundred and forty, and that turnover would be about 260; isn't it nearer 500 feet?

A I should say about 450 feet altogether.

Q On the Madison street and Railway avenue change there is a difference of how many feet?

A We have 1,028 feet as against 700 feet, the city's estimate, a difference of 328 feet.

30 Q Most of that is in the turnout?

A Most of that is in the turnout.

Q On Straight and Clay street there is only a difference of fourteen feet; one is six hundred and the other six hundred and fourteen feet?

A That is all, fourteen feet.

Q At Broadway your estimate is 1,379 feet and—

A As against 1,100 feet.

Q Where does that difference come in?

40 A It might, part of it, come in in the crossover

R. George, cross.

which has to be taken care of at one end of the improvement and also in special track connections down at the corner of Straight street. Probably also not any track has been allowed for reconstruction on Straight street which is affected by a change in grade, in the city's estimate.

Q Your estimate as to the amount of grading compared about with the city's?

10

A We figured grading under our tracks only and the city was taking our figures for that amount. I believe Mr. Harder thought our figures and calculations for under the track were probably correct.

Q You provide for putting in your specification granite block?

A Yes, sir.

Q In every place where the change is made?

A Yes, sir.

Q Notwithstanding the fact that there are other kinds of pavement there now?

20

A Yes, sir.

Q And you provided for substituting that for wood block on Market street and Park avenue?

A Yes, sir.

Q Wood block would cost a great deal less, would it not?

A It would cost less, yes, sir.

Q Do you think that now in Madison avenue and Railway avenue there is any need of specification granite block?

30

A We have figured, as I said before, on our standard reconstruction in each one of these cases with the exception of those places where we are leaving the same rail in.

Q In making changes throughout your system, do you always put in this standard?

A No, there are some places—where we have new construction we always put in standard granite block pavement.

40

R. George, re-direct.

Q No matter where you put in new work?

A Where we are putting in new work, and frequently on reconstruction work.

Q But not always on reconstruction work?

A Not always.

Q Putting in very little new work, are you not?

A Just at the present time, we are.

10 Q The last work that you did in the vicinity of Paterson, the extension of the Hawthorne line to Ridgewood, did you put in standard specification granite block there?

A No, sir.

Q You put in macadam there?

A Put in macadam there, that is T rail.

Mr. Gilmour. That is suburban reconstruction.

20 Q Madison avenue and Railway avenue might be considered suburban construction?

A Hardly.

Q As far as the amount of traffic is concerned?

A No, sir.

Q (*By Mr. Minard.*) At your conference with the railroad and the city engineer which you referred to, there was no agreement reached as to a given set of figures, was there?

A No, sir.

30 Q Each side maintained their figures were—stood by their figures, did they not?

A Mr. Brameld agreed that probably our estimate of the costs were more nearly correct than the estimates either prepared by the Erie or the city, because of the fact that we went into them more in detail and are in a better position to figure our own cost than they were.

Re-direct examination by Mr. Gilmour.

40 Q There is one more matter I did not ask you about and that is the proposed crossing at Putnam

R. George, re-direct.

and River streets. The method of eliminating that crossing shows a proposed reverse curve in the track of Public Service Railway; what have you to say about the desirability of changing that method of eliminating that crossing?

A I should say from an engineering standpoint and from an operating standpoint of the railway company it would be very desirable to keep River street in its present alignment rather than make the detour that is shown on the plans proposed by the city.

10

Q Would the carrying out of that plan create a point of danger on the railway?

A I should consider it would.

Q Why?

A Because of the fact that a view of the approach on either side is obstructed, the cars coming through from either side of this approach.

Q Do you know whether the street railway company has paid considerable sums of money in the last few years to eliminate just such situations?

20

A I know of several places where we have eliminated sharp reverse curves.

Q And at considerable expense?

A Yes, sir.

Q And partly to remove a danger point?

A Yes, sir.

Q In your judgment, estimated roughly, what would be the increased cost of the bridge at that point, if River street, the alignment of River street were preserved?

30

Mr. Merrey. I object to this question unless the witness has prepared a plan. A rough estimate is not of any use to the commission.

Mr. Gilmour. I am not asking him now as a bridge expert. I am asking him as an engineer generally what the additional cost would be.

Q What is the length of that bridge now, Mr. George?

40

R. George, re-direct.

A The plans call for a ninety foot span at that point.

Q A ninety foot span?

A Yes, sir.

Q And what area would that give, floor area?

A The floor area figured on the city's plans called for about thirty-four foot width there including plat-
10 forms and that, by ninety feet—

Mr. Merr-y. I don't object to the ability of the witness to answer the question, but to change that means a lot of work, a lot of changes.

Mr. Gilmour. You can show that.

Commissioner Donges. That will show by examination.

Mr. Merrey. Why should we have it if we afterwards show it is not worth anything?

20 *Commissioner Donges.* Let Mr. Gilmour ascertain whether he knows.

Mr. Merrey. If the witness has prepared such a plan we would be glad to hear what he said, but I don't see it is any use if he makes a mere guess.

Q To carry River street through on its present alignment and bridge both Putnam and River streets, have you made any estimate as to what length of bridge would be necessary?

A Yes, sir.

30 Q And have you computed the additional cost, figured on the estimated cost of the present bridge per square foot, as now proposed by the railroad company?

A Yes, sir.

Q And what would be the additional cost estimated that way?

A The additional cost based on the per square foot price as provided for in the city's estimate would bring the total cost of such a bridge up to about \$55,-
40 000.

R. George, re-cross.

Q And what is the present estimated cost?

A About twenty thousand dollars.

Q So the difference would be about \$35,000?

A Yes, sir, on that basis.

Re-cross examination by Mr. Merrey.

Q What would require greater floor depth, wouldn't it, of the bridge?

A It would depend entirely how they lay out the columns to support the bridge for the space between the abutments at either end.

Q You have not gone into a plan, the cost of a plan in exchange for the one that is presented, have you?

A No, sir, not prepared any plans.

Q So you cannot tell what it would cost to change it and make a straight crossing there?

A No, sir.

By Mr. Minard.

Q Do I understand you correctly, that on the basis of the plan submitted for River street the kind of a crossing that you have described would cost thirty-five thousand dollars more?

A Based on the same per square foot price that the city used.

Q You speak of the company's willingness to spend money to eliminate this sort of what you call danger points?

Mr. Gilmour. He did not speak of the willingness to do it, he spoke of their having done it.

Q Their having done it. Do you know anything about whether the Public Service Railway Company is willing to bear this difference if the plan is changed?

A No, sir, I am not in a position to state that.

Mr. Minard. I would like to know from Mr. Gilmour.

Mr. Gilmour. I am not the Board of Directors.

R. George, re-cross.

Mr. Minard. It would make a difference whether we put in testimony to rebut this sort of testimony.

10 *Mr. Gilmour.* Under this act we have an obligation up to ten per cent. of the total cost of this work, and if in the execution of the work a burden is put on the street railway company by this kind of construction which entails an expense equal to over ten per cent., and where one accident might cost all of the benefit to the street railway by this change, I think the street railway company ought to protest, for that reason.

20 *Mr. Minard.* The only reason I said anything on that point was this; when the city has agreed on a form of crossing there which suits it and so far as the general plan is concerned, no testimony has come from the railroad company to criticise that method of crossing, if the thirty-five thousand dollars difference in cost of the crossing is to be considered solely for the benefit of the trolley company, then it ought to be considered outside of their ten per cent. cost of the whole.

30 *Mr. Gilmour.* I want to say right here that I don't know of anything in the act that will compel the street railway company to put a reverse curve in its tracks to conform to this method of undercrossing.

Mr. Minard. All I know is that the act says—

Mr. Gilmour. They have a definite location in that street.

Mr. Minard. I don't know, very few know what the act does mean. I know what it says, in one place, that the utility company such as the street railway shall make necessary changes to make its railway conform to the order of the commission. What that means I don't know.

R. George, re-cross.

Mr. Gilmour. That means change of grade and not change of street line.

Commissioner Donges. That can hardly be true, can it, Mr. Gilmour; when the act provides that the location of the street may be changed?

Mr. Gilmour. I have examined the act, not very carefully, but I was rather of the impression that the change of street lines was a matter that required agreement rather than a direction of the commission. 10

Commissioner Donges. I think not, under the language of the act.

Mr. Gilmour. I have not examined it carefully, but here is a position where the street railway company has a location in the street, it is under obligation under the act to change to conform to a change of grade on that street, it is under a franchise obligation to conform to a change of grade, but having been located in the street by the city under the authority of a State law, I have some doubt as to whether, without its consent, its location in the street can be changed to its disadvantage. I only suggest that at this time. I have not worked it out carefully. 20

Commissioner Treacy. Could it be changed to its advantage?

Mr. Gilmour. Possibly not, but it would consent to such a change. 30

Commissioner Treacy. Couldn't the street railway defeat the very object of this statute if it did not want to consent, where it would be necessary to change the street line?

Mr. Gilmour. No, I think not. I think it could defeat the closing of the street. That is my point. I think that you can close streets under this act where there is no other interest except the city and the railroad company, but where there is a vested right of a street railway to use 40

R. George, re-cross.

a street for a public use, it does not seem to me that under the act you can change that location to the detriment of the street railway or to the disadvantage of the public use.

Commissioner Treacy. Suppose the only way that a railroad crossing could be eliminated would be by a change in the street line?

10 *Mr. Gilmour.* That is a different case from any that is presented here.

Commissioner Treacy. Wouldn't this board in that case have the right?

Mr. Gilmour. I have not examined that question.

Commissioner Treacy. Would the railroad company have the right to prohibit or obstruct the elimination of the grade crossing by not consenting to that?

20 *Mr. Gilmour.* The street railway? I don't think they would take that position at all.

Commissioner Treacy. You are maintaining the board has not the right to order that.

Mr. Gilmour. I think that is true, under the act.

Commissioner Treacy. Then the statute would be of no value in this connection.

30 *Mr. Gilmour.* The statute is not as carefully drawn as it might be. I think—I have a theory which, as I said, I have not worked out to my own satisfaction, but my impression now is that the board cannot take away from the street railway a vested right which it has to the use of the street, either by closing the street or making that use dangerous.

Commissioner Donges. Your idea is the rights of the street railway are superior to those of the public.

40 *Mr. Gilmour.* No, not at all. I think the

R. George, re-cross.

rights of the street railway are the rights of the public.

Commissioner Donges. If they are no greater, if you can close a public street against the public—

Mr. Gilmour. That is provided in the act.

Commissioner Donges. Certainly provided in the act. 10

Mr. Gilmour. But it is not provided as to the railway. The power is not in the act as to the railway

Mr. Gilmour. I offer now that report in evidence and ask it be received.

I ask that the board now authorize the marking of the tables as exhibits. There was a statement of the cost submitted and verified by the testimony of the witness afterward, and a sheet showing those costs was submitted to the board and asked to be marked as an exhibit. That was in Jersey City. 20

Commissioner Donges. Let that be marked P.S.R.-1.

(Same is received and marked Ex. P.S.R.-1.)

Mr. Gilmour. Then the board said will you submit details of those figures. The details I submitted last Monday and offered them here and supposed they were marked. 30

Commissioner Donges. The detail statement may be marked P.S.R.-2.

(Detailed statement of cost to Public Service Railway received and marked Ex. P.S.R.-2.)

Commissioner Donges. And the comparative statement may be marked P.S.R.-3.

(Statement of comparison between costs as estimated by the Public Service Railway Company, City of Paterson, and the Erie Railroad Company, received and marked Ex. P.S.R.-3.) 40

W. H. Brameld, direct.

W. H. BRAMELD, recalled on behalf of respondent.

Direct examination by Mr. Minard.

Q You attended a conference at the city hall in Paterson with the engineers for the Public Service Railway Company and the city, did you not?

A I did.

10 Q You are familiar with the statement that has been brought here, P.S.R. Exhibit 3?

A Yes.

Q Did you make a comparison of your own as between the Public Service Railway and the Erie Railroad?

A Yes, I did.

Q Does it differ in any way from the statement already in evidence?

20 A As to the total amounts, no. This statement is a comparison between the estimate made by the railroad company on the city's plan and the estimate submitted by the Public Service Railway engineer, and indicates the quantities and unit prices that were used in the railroad estimate, to enable the commission to note in detail just how much the Public Service Railway estimate increased the cost of the work over the figures that have already been submitted by the railroad company on its estimate and that amounts between the Erie estimate and the street railway company's estimate, to an increase of \$17,375.26, as testified to by Mr. George.

30

Q Then the difference between your statement and the one already in is that the details are in, regarding quantities and unit prices?

A Yes.

40

Mr. Minard. I offer that simply to explain more fully what this exhibit, P.S.R.-3, is intended to do. I will read the title of it: "Erie Railroad Company, office of Assistant Engineer. Comparative statement of estimate of cost of street

W. H. Brameld, direct.

railway work taken from estimate submitted to Public Utilities Commission of New Jersey to Public Service Railway Company and estimate submitted to Public Utilities Commission of New Jersey by Erie Railroad Company, in connection with elimination of grade crossings, Erie Railroad, Paterson, N. J."

(Statement here described received and marked Exhibit R-110.)

10

Mr. Gilmour. Under this grade crossing act there is a provision that the street railway company may be required to pay a part of the cost up to ten per cent. The board makes a finding that these grade crossings shall be eliminated in a certain way, based on estimated costs. What I desire to ask is as to the present thought of the board, whether the amount which the street railway company will have to pay will be a fixed amount based on those estimated costs or whether it would be a percentage of the total cost when the work is actually completed and the actual total cost is ascertained.

20

Commissioner Donges. The fourth section of the act says, "Where the order of said board shall require changes in, or the removal of the property or constructions of any telegraph, telephone, gas, electric, lighting, power, water, oil, pipe lines, or other company or corporation, co-partnership or individual, they shall, at their own expense, move or change the grade or location of their property, or constructions in conformity with the order of said board."

30

Mr. Minard. Section Two contains the other one.

Commissioner Donges. Section Two says, "The entire expense of such alterations, changes, relocation or opening, including damages to adjacent property, shall be paid by such railroad, unless

40

W. H. Brameld, direct.

10 a street railway uses such crossing, in which event the board may order not exceeding ten per centum of such expense directly chargeable to the crossing used by the street railway company, to be paid by the company operating such street railway and the balance to be paid by the company operating such railroad." Now, just how the board would direct the street railway and what portion it should pay, the board at this time is unable to say.

20 *Mr. Gilmour.* I have no questions to ask this witness if the board in its finding is going to follow the words of the act and direct the street railway company shall pay ten per cent. of the cost connected with the particular crossing. Then I don't care whether he uses one dollar as a unit cost for excavation or whether he uses fifty cents, because when the actual cost is ascertained we pay a percentage of it, and it does not make any difference to me what unit prices he estimates on.

Commissioner Donges. Certainly, in no case could your company be required to pay more than the statute says, and that is, "not exceeding ten per centum of such expense directly chargeable to the crossing used by the street railway company."

30 *Mr. Gilmour.* If our cost of conforming to the change is more than that ten per cent., then the excess is paid by the railroad company, that is evident.

Commissioner Donges. I should say you had better, Mr. Gilmour, at this time, cross examine to cover whatever you think is necessary, because the board is not prepared now to announce as to the basis that will be adopted, so you better fully protect yourself.

W. H. Brameld, cross.

Cross examination by Mr. Gilmour.

Q Mr. Brameld, in estimating the cost of excavation I notice you use fifty cents a yard; do you think that is a reasonable estimate for excavation beneath the surface of street railway tracks where the railway has got to be kept in operation?

A I don't use fifty cents, I use one dollar the same as the Public Service. 10

Q I thought you used fifty cents?

A Except, I use fifty cents at Madison avenue, because that is filling material and I use one dollar at all streets except River street where I use seventy-five cents on account of the large quantity of excavation.

Q You say you use seventy-five cents at River street on account of the large quantity of excavation. What is the quantity of excavation at River street?

A I think it was something like sixty-eight hundred cubic yards. 20

Q How much?

A Sixty-eight hundred cubic yards.

Q You mean the total excavation?

A Yes.

Q In the Market and Park avenue excavation for the street railway is 974 cubic yards and for that you have allowed one dollar a yard as a unit price; in River street the grading by the street railway company is only 545 cubic yards and there you use a price of seventy-five cents; is that a fair difference when the work is even less than it is at Market street? 30

A On the total amount of grading at River street it is considerably less. When I figured those estimates I didn't figure the trolley company had to excavate the material under its tracks, but that the excavation would be let as a whole to one contractor.

Q Then you have not figured especially on the cost of work done by the street railway company to 40

W. H. Brameld, cross.

conform its tracks to the plan? You have only figured on general cost to do the whole work?

A Yes.

Q That is all?

A Yes.

10 Q (*By Mr. Minard.*) Mr. Brameld, on that point, having the work done by one contractor, of course, that would be the most economical way of doing it, rather than have different people doing different parts here and there?

A As a usual thing it is, yes.

20 *Mr. Minard.* I want to offer, not so much for it evidential value, but for the benefit of the commission in comprehending the Erie system as a whole, the map which is taken from our 1914 annual report entitled, Erie Railroad with branches and connections, 1914. It contains the different lines in different colors with an explanation which will indicate what the different colors mean and gives a very good picture of the system.

Commissioner Donges. You offer this?

Mr. Minard. I offer it for the information of the commission.

Commissioner Donges. Let it be marked.

30 (Map entitled Erie Railroad, with branches and connections, 1914, received and marked Exhibit R-111.)

Mr. Minard. The last time we were here I stated I would file an affidavit showing proof of the mailing and the president was of the opinion we better follow the precedent.

D. E. Minard—Charles P. Crawford, direct.

D. E. MINARD, sworn on behalf of respondent.

Can I say I did it in accordance with that affidavit and offer that as an exhibit?

Commissioner Donges. Yes.

Witness. I prepared notice to be sent to all of the parties mentioned on the list which I obtained of the parties interested in this case, and had that notice printed in post card form and deposited in the post-office letter chutes in the building, 50 Church street, which chutes are installed by the United States Postal authorities, 10

Q (*By Commissioner Donges.*) When?

A I think it was on Monday of last week, as that hearing was to be held on Friday. I sent them out on the day set forth in that affidavit and to the persons mentioned in that affidavit and in the manner stated therein, and I will offer that affidavit. 20

Q With copy of notice attached?

A Copy of notice attached.

Commissioner Donges. That will be admitted and marked as Exhibit R-112.

(Affidavit as to mailing of notice of hearing received and marked Exhibit R-112.)

Q That was then on October 19th?

A Yes, sir, that is my recollection, but that affidavit states it exactly. 30

CHARLES P. CRAWFORD, sworn on behalf of respondent.

Direct examination by Mr. Taylor.

Q Mr. Crawford, you are an officer of the Erie Railroad Company?

A Yes, sir, comptroller.

Q And of its subsidiary companies?

A Yes, sir.

Q How long have you held that position? 40

Charles P. Crawford, direct.

A Since February, 1910.

Q What was your position before that time?

A Auditor.

Q How long were you auditor?

A Four or five years.

Q How long have you been connected with the service of the Erie Railroad Company and its predecessors?

A Over thirty years.

Q Continuously?

A Almost.

Q What is the nature of your duties as comptroller?

A Chief of the accounting department.

Q You have general charge of the accounts of the Erie Railroad Company and its subsidiaries?

A Yes, sir.

Q Mr. Crawford, have you prepared an income statement of the Erie Railroad Company, including the Chicago & Erie Railroad for the year ending June 30th, 1914, as compared with 1913, showing the increases and decreases on each item?

A I have, yes, sir.

Q Is that statement prepared from the books of accounting of the company?

A It was.

Q Is it correct?

A It is.

Mr. Taylor. I will offer that in evidence.

(Statement entitled "Erie Railroad Company income statement, for years ending June 30, 1914 and 1913," received and marked Exhibit R-113.)

Q You stated, Mr. Crawford, that that included the Chicago & Erie Railroad?

A Yes, sir.

Charles P. Crawford, direct.

Q Kindly explain what the Chicago & Erie Railroad is.

A The Chicago & Erie Railroad is that portion of the lines operated as part of the Erie system which extends from Marion, Ohio, to the Indiana State line and having trackage rights over the Chicago & Western Indiana, giving entrance in Chicago.

Mr. Taylor. If the commission will refer to the exhibit offered a few moments ago, the map, they will see where that line is. 10

Q (*By Commissioner Treacy.*) That is about how far from Chicago?

A 260 miles.

Q From Chicago to Hammond?

A 19.99 miles.

Q Hammond is about the end of the Chicago & Erie?

A Yes, sir, the State line. 20

Q (*By Mr. Taylor.*) We have trackage rights over that nineteen miles?

A Yes, sir.

Q The Chicago & Erie owns and operated the line between Hammond and Marion?

A Yes, sir.

Q What is the relationship between the Chicago and Erie Railroad Company and the Erie Railroad Company?

A The Erie Railroad is the owner of the capital stock of the Chicago & Erie. 30

Q The entire capital stock?

A Yes, sir.

Q But the Chicago and Erie Railroad is a separately operated railroad, is that correct?

A It is.

Q Which reports separately to the Interstate Commerce Commission and files its own tariffs?

A Yes, sir. 40

Charles P. Crawford, direct.

Q Are the accounts from which this statement, Exhibit R-113, is made, kept in accordance with the rules and requirements of the Interstate Commerce Commission?

A Yes, sir.

10 Q What is the difference in the net income as shown for the years ending June 30th, 1914 and 1913, respectively?

A For the year ending June 30th, 1913, the company's net income was \$8,105,675. For the year ending June 30th, 1914, it was \$1,422,975, a decrease of \$339,488.

Q (*By Commissioner Donges.*) That is wrong.

A A decrease of \$6,682,700.

Q (*By Mr. Taylor.*) That is the total net income of the Erie system, is that correct; that is including the Erie Railroad and the Chicago & Erie?

20 A Yes, sir.

Q That however does not include the New York, Susquehanna & Western Railroad Company?

A No, sir.

Q Or the Wilkesbarre & Eastern?

A No, sir.

Q Or the New Jersey & New York Railroad Company?

A No, sir.

30 Q Nor the Bath & Hammondsport Railroad Company?

A No, sir.

Q Mr. Crawford, referring to this map, Exhibit R-111, how is the Bath & Hammondsport Railroad referred to, or rather, shown on that map?

A The Bath & Hammondsport is a line ten miles in length, extending from Bath, New York to Hammondsport, New York, shown in black ink.

Q Marked B. & H. R. R.?

40 A Yes, sir.

Charles P. Crawford, direct.

Q How is the Wilkesbarre & Eastern shown on that map?

A In yellow ink, extending from Stroudsburg, Pennsylvania, westward to Wilkesbarre and Minooka.

Q It is shown on this map as part of the New York, Susquehanna & Western Railroad, is it not?

A Yes, sir.

Mr. Taylor. The statement on the map with respect to the New Jersey & New York Railroad is self explanatory. 10

Commissioner Donges. You say that line runs from Stroudsburg?

Mr. Taylor. The Wilksbarre & Eastern, yes.

Q What was the difference in the surplus as shown on this income statement of the Erie Railroad system for the two years?

A The corporate surplus for the year ending June 30th, 1913, was \$6,682,568. For the year ending June 30th, 1914, it was but \$159,523, a decrease of \$6,523,045. 20

Q Were appropriations for additions and betterments in 1914 more or less than in 1913?

A They were \$154,845 less.

Q So if they had been the same in 1914 as in 1913, there would have been practically no surplus, is that correct?

A It is. 30

Q Referring to the railroad operating income of the Erie system as shown on this map, what was the difference between the railroad operating income of the two years?

A A decrease of \$3,741,031.

Q What was the total income in 1914?

A Gross income?

Q Total railway operating income for 1914?

A \$12,759,567. 40

Charles P. Crawford, direct.

Q That is net of course, net so far as operations are concerned. That is not, I want the commission to understand, that is not the gross receipts?

A That is revenues, less expenses and taxes.

Mr. Taylor. It is net revenues from operation after deductions for fixed charges.

10 *Mr. Merrey.* I understand the witness is reading figures from the tabulation.

Q Mr. Crawford, how did the operating income of the Erie system for the year ending June 30th, 1914, compare generally with operating incomes earned by the system for the last ten years?

A It was the smallest in any year since 1905, with the exception of the panic year of 1908.

Q How did the extent of railroad operated in 1914 compare with the extent of railroad operated ten years ago?

20 A One hundred miles more.

Q In 1914?

A Yes, sir.

Q How did interest charges and road rentals compare in 1914 as compared with 1905?

A They increased from 1905 to 1914, \$2,609,553.

Q So that amount, \$2,609,553, represented additional fixed charges which the road had to make?

A It did.

30 Q Out of an income which was the smallest—out of net operating income which was the smallest in ten years, is that correct?

A Yes, sir.

Q How does the surplus in 1914 compare with the surplus as shown in the last ten years?

A The smallest of any for the past ten years, with the single exception of 1908.

Q What was the smallest surplus excepting 1908 and 1914?

40 A \$2,565,717.

Charles P. Crawford, direct.

Q As compared with the surplus in 1914 of one hundred and fifty-nine thousand and some odd dollars; is that correct?

A \$159,523 in 1914; yes, sir.

Q I understand, Mr. Crawford, that the appropriations for additions and betterments are taken out of the net income of the system before you state your surplus, is that correct?

10

A They are, yes, sir.

Q So the amount of the surplus of course, would be affected by the amount appropriated for additions and betterments in any particular year?

A Yes.

Q You stated, and the statement shows, that the amount appropriated from income for additions and betterments in 1914 was approximately five hundred and two thousand dollars. How does that compare with the average for the ten years from 1905 to 1914?

20

A The average for the ten years 1905 to 1914, inclusive, was \$970,689.

Q So that it was considerably less than the average in 1914?

A Much less.

Q There is another item of appropriations of income to sinking and other reserve funds which comes out of net income before surplus is stated, according to your exhibit.

30

A Yes.

Q What does that amount include, generally speaking? Give the character of the charges.

A It is the amount we are required to pay to the trustees of one of our mortgages as a sinking fund and is based on the tonnage of coal produced on one of our subsidiary companies, one of our companies of which the capital stock is owned by the Erie Railroad.

40

Charles P. Crawford, direct.

Q So that is in the nature of a fixed charge as to amount?

A Based on tons of coal produced.

Q And does not vary greatly from year to year, is that correct?

A It does not.

Q Have you prepared an income statement for the
10 Erie Railroad system for the two months ending August 31st, 1913 and 1914?

A I have.

Q Was that prepared from the books of the company, the same as the other?

A Yes, sir.

Q And is it correct?

A It is.

20 *Commissioner Donges.* Let me ask Mr. Crawford, before you leave this other statement—by the way has it been offered and given a number?

Mr. Taylor. Yes, 113.

Q (*By Commissioner Donges.*) Item number 12, dividend income, shows that in the year 1913 \$2,611,880 and 1914 \$800,320. Of what does that item consist?

A Dividends on capital stock owned by the Erie Railroad Company.

Q And it showed a decrease of \$1,811,560?

30 A A great decrease. One company which in 1913 we had dividends amounting to \$2,450,000, in 1914 the same company only paid dividends of \$500,000.

Q (*By Mr. Merrey.*) May we ask what company that is?

A The Pennsylvania Coal Company.

Q (*By Commissioner Donges.*) Item 14, income from unfunded securities and accounts; what does that represent?

40 A That is, the funded securities according to the classification are all securities maturing more than

Charles P. Crawford, direct.

one year after date. Included in this item 14, interest on unfunded securities, is interest on any short term notes which the company owns and advances made to other companies. The principal item in which there was a large decrease, which I assume you would like to know about, is largely on account of interest received from the Hillside Coal & Iron Company.

10

Q For advances made?

A Which owes the Erie Railroad Company a very large sum for advances made in previous years.

Q (*By Mr. Taylor.*) Made in what years, Mr. Crawford, recent years?

A No, prior to 1895. They were able to pay, or rather they did pay during the year 1913, \$1,419,990.

Q Mr. Crawford, right in that connection, state what you know about any extraordinary sources of income the Hillside Coal & Iron Company had during that year?

20

A Yes, sir. While in 1914—

Q (*By Commissioner Donges.*) In 1913, did I understand you to say?

A Yes, sir, they paid \$1,419,990.

Q That was interest on the—

A On this very large indebtedness they owe to the Erie Railroad Company. They are able to pay that on account of having been successful in litigation in securing and collecting a judgment in relation to royalties on coal which had been mined for many years which gave them funds and allowed them to make this large payment.

30

Q (*By Mr. Taylor.*) You mean back royalties, Mr. Crawford?

A Yes, sir.

Q (*By Commissioner Donges.*) The Hillside company is a coal mining company?

A Entirely so, yes, sir.

40

Charles P. Crawford, direct.

Q (*By Mr. Taylor.*) Of which the Erie Railroad Company owns the capital stock?

10 A The Erie Railroad Company owns the entire capital stock of the Hillside Coal & Iron Company. Having made that large payment in 1913 it caught up with the interest to date so the interest payments in 1914 is practically only the amount which accrued during that year, with the exception of about four thousand dollars from another coal company. That would explain the decrease in the account to which you called attention.

Q (*By Commissioner Donges.*) So that the income shown in 1913 of \$2,006,119 was more than was customarily received from sources included in that item?

A Very much more, yes, sir.

20 Q Would the sum of \$424,453 be about what that fund ordinarily produces?

A I think it would.

Q What is received from these sources?

A Yes, sir.

Q (*By Mr. Taylor.*) Coming back to item 12, Mr. Crawford, as to dividend income; what would you say about whether the income in 1913 was extraordinary?

A Much above the average.

30 Q In order that we may have the whole thing, what would you say about income in 1914 on that item?

A Based on previous years, that would seem to be below the normal.

Q How much do you think?

A I haven't any figures at hand to answer that question.

40 Q (*By Commissioner Donges.*) I understood you to say though, Mr. Crawford, that the income, dividend income in 1913 was about what would be ordinarily expected?

Charles P. Crawford, direct.

A I did not intend to say that in 1913.

Mr. Merrey. Didn't you answer practically all that was owed to the company by one concern?

Commissioner Donges. No, not on that item.

Mr. Taylor. I think what Mr. Crawford said was, that the income from funded securities was about what was to be expected. He said, and I brought this out, because I want to be entirely fair and open with the commission, that the dividend income for 1914 as shown here is somewhat below the average.

10

Mr. Merrey. Yes, he said that, but he also said that one company was in default for practically the difference, as I got it.

Witness. That is in item 14, sir.

Mr. Merrey. Dividend income I spoke about. You gave the figures and mentioned one company, the Pennsylvania Coal Company.

20

Commissioner Treacy. He said there wasn't any dividend paid on the stock.

Mr. Taylor. He said they did not pay a dividend on the stock and the figures they owe made up almost the difference here.

Mr. Merrey. That is the way I got it.

Q (By *Commissioner Donges.*) Will you tell us what the fact is; what the dividend ordinarily received from the Pennsylvania Company is, if you are able to give that?

30

A I have no figures to give on the average dividends received from the Pennsylvania Coal Company. We received during the year 1913, \$2,450,000 and in the year 1914, \$500,000.

Mr. Taylor. The commission will observe that is within about \$300,000 of the entire account in both years.

40

Charles P. Crawford, direct.

Mr. Merrey. In other words, the decrease in that dividend practically is the cause of this decrease?

Mr. Taylor. The decrease in that item, yes.

Witness. The Pennsylvania Coal Company dividend practically explains that.

10 Q (*By Mr. Merrey.*) They owe you that money and haven't paid it?

A No, sir, they paid their dividends.

Mr. Taylor. Dividends are not owed until declared.

Q (*By Commissioner Donges.*) No dividend declared in excess of \$500,000?

A Not up to this time, no, sir.

Q (*By Mr. Merrey.*) It is not a fixed dividend they must declare?

20 A No, sir.

Q Not preferred stock or anything of that kind?

A Oh, no.

Q (*By Mr. Taylor.*) The fact is that the Erie Railroad Company owns all the stock of the Pennsylvania Coal Company and that all profits which the Pennsylvania Coal Company can spare from its working capital are declared as dividends and paid to the Erie Railroad Company?

A I understand that is their policy, yes, sir.

30 Q As far as that is concerned, do you know whether the Pennsylvania Coal Company has a separate management, and separate board of directors from the Erie?

A It has.

Q And its business is run separately on its own account?

A Yes, sir.

Q Are you an officer of the Pennsylvania Coal Company?

40 A No, sir.

Charles P. Crawford, direct.

Q (*By Commissioner Treacy.*) Do you know, Mr. Crawford, of your own knowledge what was the cause of the decrease of the dividend of the Pennsylvania Coal Company?

A Only in a general way. I had understood they had an immense amount of coal stocks and had not sold it, their surplus being tied up in stock of coal rather than being in cash.

10

Q (*By Commissioner Donges.*) They had mined more than usual?

A I could not say as to that, sir.

Q Or had not been able to move the usual quantity of coal?

A My understanding was the sales were decreased largely, particularly in the northwest. That is merely hearsay.

Mr. Taylor. Mr. Chairman, permit me to call your attention to the fact that their revenue in 1914 under item, coal, shows a decrease on the Erie Railroad system of \$877,934 in gross revenue.

20

Q (*By Mr. Taylor.*) Mr. Crawford, how does the movement of anthracite coal and bituminous coal compare on the Erie system?

A It is a very small portion of bituminous coal.

Q What proportion of the anthracite coal shipped, roughly speaking, is the coal mined by the Pennsylvania Coal Company?

30

Commissioner Donges. Shipped over the Erie, you mean?

Mr. Taylor. Yes.

A What proportion of that shipped over the Erie is Pennsylvania coal?

Q Yes?

Commissioner Donges. Pennsylvania Company coal.

40

Charles P. Crawford, direct.

Q The percentage of the total coal mined by the Pennsylvania Coal Company?

A More than half of it.

Q More than half of it?

A Yes, sir.

10 *Mr. Taylor.* So, Mr. Chairman, you can see the amount of coal shipped by the Pennsylvania Coal Company as indicated by these figures is very much less in one fiscal year than in the other.

Q (*By Commissioner Treacy.*) Do you know how the amount of coal now on hand, of the Pennsylvania Coal Company, compares with the amount usually on hand?

20 A I do not. It was merely stated to me by an employe that they had a very large stock of coal on hand and I assumed from his calling my attention to it, that it must have exceeded previous years, but I have no figures.

Q Do you think the amount of coal on hand would be equal in value to the difference in dividend declared by the company in 1913 over that of 1914?

A I haven't any figures that would give that, sir.

30 *Mr. Taylor.* Mr. Commissioner, we would be glad to file, if you wish, a statement of the average amounts received as dividends by the Erie Railroad Company from the Pennsylvania Coal Company for a series of years.

Commissioner Donges. That would be well to do, inasmuch as that is the chief item of decrease.

40 *Commissioner Treacy.* Mr. Taylor, the point I had in mind was this; Mr. Crawford has testified that the reason, or the principal reason why the same dividend was not paid this year by the Pennsylvania Coal Company as was paid in previous years was due mainly to the fact that it has a large stock of coal on hand.

Charles P. Crawford, direct.

Q (*By Mr. Taylor.*) Did you so testify, Mr. Crawford?

A I said I had heard so. I think my testimony will show that is hearsay.

Commissioner Tracy. If the value of that stock on hand is comparable or equal to the value of the dividends that are usually declared, it might have some bearing.

10

Mr. Taylor. I shall be very glad to endeavor to obtain a statement of the comparative amount of coal in stock by the Pennsylvania Coal Company this year and last year. You understand they always have a large amount of stock in hand.

Witness. Probably four or five million dollars worth.

Q (*By Mr. Taylor.*) At all times, at least in every year at the same time of the year.

20

A Yes.

Q But some years would be more than others?

Commissioner Douglas. Suppose you submit a statement then.

Mr. Taylor. I will endeavor to obtain that. I don't know whether I can get that or not—

Commissioner Douglas. Showing the dividends over a period of years.

Mr. Taylor. —but I think I can.

30

Witness. The dividends paid to the Erie Railroad are obtainable, of course.

Mr. Taylor. The dividend is.

Commissioner Douglas. And the other too, perhaps.

Mr. Taylor. I will endeavor to get it.

Referring to the second statement, Mr. Crawford, Erie Railroad Company, income statement for the two months ending August 31, 1914 and 1913—I will offer that in evidence.

40

Charles P. Crawford, direct.

(Statement entitled "Erie Railroad Company, income statement, for the two months ending August 31, 1914 and 1913," received and marked Exhibit R-114.)

Mr. Merrey. I had a couple of questions I wanted to ask Mr. Crawford about Exhibit 113.

10 *Commissioner Douglas.* It might be well to take that up, unless you prefer—

Mr. Taylor. If only one or two questions to get rid of the thing for good, I won't object. If you are going to develop it into a protracted examination, I think we can—

Mr. Merrey. I only have a couple of questions. The commission has covered most of the examination I intended to make.

20 *Q (By Mr. Merrey.)* I wanted to ask Mr. Crawford, under the head of rail operations—expenses, the first item is maintenance of way and structures. I want to ask if that is fixed in any permanent way, the amount of expenditures which must be made.

A Not that I am aware.

Q That is, you spend on that item as much as you can afford in consideration of what is needed?

A I could not testify as to that. I only know what was expended.

Q What was expended?

30 *A* Yes.

Mr. Taylor. I will have a witness you can ask about that.

Mr. Merrey. Then I won't ask any further questions.

Mr. Taylor. I have offered this statement.

Commissioner Douglas. Yes, it is marked Exhibit R-114.

Charles P. Crawford, direct.

Q (*By Mr. Taylor.*) I think you said, Mr. Crawford, this is prepared from the accounts of the company the same as the other statement, and is correct?

A In exactly the same manner, and is correct.

Q The fiscal year of the Erie system ends when?

A June 30th.

Q Is that the explanation of putting two statements in in this form?

10

A For the two months of the present fiscal year, yes.

Q For those two months of the two years how does the net income compare?

A There is a slight increase in net income, increasing from \$611,457, for July and August, 1913, to \$625,523 for the months of July and August, 1914.

Q Take the railway operating income, what change is shown there as compared with last year?

A There is a decrease of \$46,231.

20

Q Take the railway operating revenues, what is the difference between this year and last year?

A A decrease of \$282,406 in operating revenue.

Q That means then that the railroad company received \$282,000 less from the public for the conduct of its transportation business in the two months August 31st, 1913 and 1914?

A Yes.

Q How much did they save in expenses?

30

A The expenses were reduced by the sum of \$236,568.

Q That is operating expenses?

A Yes.

Q Mr. Crawford, have you prepared a statement showing the principal of the obligations of the Erie Railroad Company maturing during the period from October 14th, 1914, to June 30th, 1915?

A Yes, sir, the statements start with the month of November, Mr. Taylor.

40

Charles P. Crawford, direct.

Mr. Taylor. When I said principal, I meant obligations which are for principal payments as distinguished from interest.

I will offer that statement which Mr. Crawford has prepared in evidence.

Commissioner Donges. It will be marked.

10 (Statement entitled, "Erie Railroad Company, statement showing obligations [principal only] maturing during period October 14th, 1914, to June 30th, 1915," received and marked Exhibit R-115.)

Q What is the total amount of those obligations?

A The statement shows \$18,831,000 including an October payment of \$203,312.

Q Which has been made?

20 A Which has now been made, yes, sir, leaving the total commencing with November, \$18,628,627.

Q These payments are described as either equipment trust certificates, construction obligations, real estate mortgage or collateral notes?

A Yes, sir.

Q Describe the character of each one of those.

A The items shown as equipment trust certificates are the installments due on new equipment purchased.

30 Q That is, the railroad company already has the equipment in its possession?

A Oh, yes.

Q And is called upon under written obligations to pay those amounts at stated dates?

40 A Practically all our new equipment is bought under the so-called equipment trust plan. We secure it by paying, giving an initial payment of possibly fifteen or twenty per cent. in cash and the balance is deferred and the principal is paid in twenty equal installments, semi-annually, due semi-annually.

Charles P. Crawford, direct.

Q (*By Commissioner Donges.*) Does that come out of current income, operating income?

Mr. Taylor. I will come to that.

Q (*By Mr. Taylor.*) Those installments have to be paid to the holders of the obligations in cash, do they not?

A They do.

Q Those equipment obligations are not extended as they fall due, are they? 10

A Never have been, no, sir.

Q Always taken up and paid?

A Yes, sir.

Q That is the universal practice of railroads, so far as you know?

A Yes, sir.

Q Of course, they are legal obligations which would have to be paid if insisted upon, of course, the equipment trust obligations? 20

A Yes, sir.

Q Are you familiar with the terms of those agreements, Mr. Crawford, in a general way?

A I think so.

Q Do you know whether under the terms of the agreements the possession of the equipment which the company is using is dependent on those payments being made?

A Yes, sir, and title is not secured by the railroad company until final payment is made. 30

Q How can the railroad company get money to pay obligations of that sort, where from?

A Either from its general fund, that is, its income, or the sale of bonds.

Q What is the nature of the construction obligations shown on this statement?

Commissioner Donges. Before you leave that other, the equipment trust certificates—Mr. Crawford, has it been the practice of the Erie 40

Charles P. Crawford, direct.

Railroad Company to pay the equipment trust certificates falling due, maturing, out of income, so far as possible?

Witness. Not appropriated from income, but paid out of the current cash.

Mr. Merrey. What is it charged to in this other statement?

10 Q (By Commissioner Donges.) In Exhibit R-113, where does that expenditure appear?

A R-113 is a statement of the income account and it would not appear except the only entries in the income account affecting these car trust would be under interest on funded debt, which would include the interest.

Q But not any of the principal?

20 A No, sir, the principal appears on our balance sheet as an asset under the heads of additions and betterments, and the liability appears on the other side of the balance sheet as bonded debt.

Q Is any part of this eighteen millions paid out of income, permanently paid out of income?

30 A As the equipment is purchased, the Board of Directors designate at that time whether it shall be charged to capital account, additions and betterments with the intention of later being reimbursed by securing bonds from the trustees under the mortgages, or whether they will permanently appropriate it from income.

Q In the year ending June 30th, 1914, what sum of money was appropriated by the Board of Directors out of current income for the payment of maturing certificates?

A None.

Q All payments on such account were made from?

A The treasurer pays them out of his general cash.

40 Q And how then is the treasurer reimbursed, how

Charles P. Crawford, direct.

was it during that period from June 30th, 1913, to June 30th, 1914?

A We secure from the trustees either general lien bonds or convertible bonds.

Q (*By Mr. Taylor.*) Just a minute—what do you mean by general lien bonds?

A The general lien bonds are issued under the Erie Railroad first consolidated mortgage. .

10

Q Dated in 1895, December 1895?

A 1895. The mortgage provides that of this fourteen million, I think that was set aside for additions and betterments to the property, the company could procure from the trustee, bonds to the extent of one million per year by furnishing a statement they had expended the previous million for proper capital purposes. That is, real additions to the property. We are not permitted to include in those certificates, expenditures over five years old, so that there is only a very small proportion, and there may be—well, there is, none of the expenditures on these car trust certificates can be included in those certificates until the final payment is made and we get title to the property.

20

Q (*By Commissioner Donges.*) Then meantime are all payments made out of current income?

A Yes, sir.

Q And then in the expenses charged to operating expense is the aggregate of these payments on these car trust certificates?

30

A Not at all. These are capital payments. They have no relation to—

Q I understand however, there is no way of securing reimbursement for such capital expenditures until the completion of the payment and title is secured?

A That is true, yes, sir.

Q So that any semi-annual payments—

A Yes.

40

Charles P. Crawford, direct.

Q —made, must be made out of current income?

A They are, yes, sir.

Q (*By Mr. Taylor.*) But they are not charged on income account?

A The liability is set up on the books for the total amount of the car trust certificates. As the treasurer pays them off, we credit cash and charge to that capital account. It don't appear in the income.

10 Q (*By Commissioner Donges.*) Don't figure as an operating expense?

A No, sir, only the interest.

Q (*By Mr. Taylor.*) However, Mr. Crawford, I assume that the amount which the company has available as a result of its current operations is a very important factor in determining whether it is able to meet these payments as they become due, is that correct?

20 A Yes, that is the entire factor.

Q (*By Commissioner Donges.*) In other words, it cannot pay the money if it hasn't got it?

A Yes.

Q (*By Mr. Merrey.*) Before we pass that, on Exhibit R-113 under 33, there is an item marked, appropriations of income for additions and betterments.

A Yes, sir.

30 Q Do you ever pay any of those car trust, equipment trust certificates out of that item?

A No, sir. These are the items amounting to \$502,000 in the year just closed, they are the amounts selected by the board as being definitely appropriated from our income and devoted to the betterments of the property, so it would not be applicable to dividends in case we earn a sufficient amount to pay dividends.

Q You mean to say none of that money was ever used for taking up these equipment trust certificates?

40 A No.

Charles P. Crawford, direct.

Mr. Taylor. The question is, whether in any year, as I understand it, Mr. Merrey, whether in any year, the company devoted any part of its appropriation of income for additions and betterments to the payment for equipment; is that your question?

Mr. Merrey. That is it; not any one year. I am asking for that one year, 1914.

10

Witness. Yes, I recall--I cannot state the exact year--but I recall that equipment purchased I think, under two or three trusts, were appropriated from income instead of capitalizing them, but none of this.

Q The intention of the company evidently is, as far as equipment trust certificates are concerned, to fund them later and make them part of the principal debt of the company?

20

A I think it is, where we can include them in our statement to the trustee in which to procure these general lien bonds of which I speak.

Q If you cannot get them, cannot issue general lien bonds to pay for those, you have to appropriate from some other place. It can only come from your surplus.

Mr. Taylor. I will come to that, if you will let me proceed.

Mr. Merrey. I thought you were through, and I want to call attention, before we pass from this exhibit, to the fact that the bulk of the amount shown on this exhibit, 115, I think it is, this last exhibit, includes collateral notes.

30

Commissioner Donges. Mr. Taylor had not taken up anything except the equipment trust certificates.

Recess from 12.45 to 1.45 P. M.

40

Charles P. Crawford, direct.

AFTER RECESS.

CHARLES P. CRAWFORD, resumes the stand.

Direct examination by Mr. Taylor continued.

10 Q Mr. Crawford, returning for the moment to the subject of these equipment trust obligations and to the question of what the policy of the company has been with respect to paying for equipment out of income and capital; I understood you to say in response to a question I framed for Mr. Merrey, that the company has expended various amounts from time to time out of its income, appropriated for that purpose, for the purchase of equipment?

A Yes, sir.

Q Such expenditures not being capitalized, is that correct?

20 A That is right?

Q In such cases is that equipment usually covered by a car trust at all?

A Only in two or three cases which I mentioned this morning.

Q As a general proposition, when you pay for equipment out of appropriated income what is done about the issuing of any car trust; anything at all?

A None are issued, merely paid out of the general working fund of the company.

30 Q And that is the end of it?

A That is the end of it.

Q So that these cars and other equipment which are covered by the equipment trust certificates are the cars which it has been intended from the first to capitalize?

A With the exception of the three which I mentioned this morning.

Q With the exception of the three trusts which you mentioned this morning?

40 A Yes, sir.

Charles P. Crawford, direct.

Q Illustrating that, I will ask you to refer to the annual report of the Erie Railroad Company to its bond and shareholders, first, for the fiscal year ending June 30th, 1913. Do you find anything in there to indicate whether or not the company appropriated any amounts from income for additions and betterments in the form of equipment?

A Yes, sir, large sums; on page ten of this report under the heading giving the expenditures for additions and betterments appropriated from income— 10

Q Don't read all the figures, Mr. Crawford, leave out the hundreds of dollars, just read the thousands.

A — I find these items; 250 gondola cars, \$170,400; fifty refrigerator cars, \$25,000; one dynamometer car, \$5,000; track construction car, \$5,000; seventy-one cinder cars, \$35,000; six locomotive cranes, \$33,000; miscellaneous equipment, \$178,000.

Q Are there similar expenditures in other years? 20

A Yes, sir.

Q For a greater or less amount in every year?

A Yes, sir.

Q Turn to say 1911, just on a chance, I haven't looked at it, and state the approximate amount in round figures, the approximate total amount in round figures that was appropriated out of income that year and paid for equipment.

A Nearly \$800,000.

Q None of that was covered by these equipment trust certificates? 30

A No, sir.

Q That \$800,000 would be charged to the additions and betterments account on your income statement.

A Shown as a deduction from income, yes, sir.

Q The same as appears on your exhibit here?

A The same as the item of \$502,000 in the 1914 income statement; but that is included in 1911, the total item was \$1,339,000. 40

Charles P. Crawford, direct.

Q And that included the \$800,000 for equipment?

A Yes, sir.

Q So the \$500,000 which you got down for 1914 would include any corresponding items spent in that year. What did they amount to?

A Only about \$300,000.

10 Q What page of that report does that appear on, in 1914?

A Page 10.

Q So then to summarize it, these equipment trust obligations and the amounts charged to income, appropriated out of income to purchase new equipment, are two separate and distinct ways of securing new equipment?

A Yes, sir.

20 Q And the payments which you have to make out of whatever funds you have in your treasury to take up these equipment trust certificates are in addition to whatever payments you may be making in that year for the purchase of equipment out of appropriated income?

A Yes, sir.

30 Q Referring to Exhibit R-115, the second class of obligations which has to be met during the coming year was stated to be construction obligation. There are two items of that sort on the exhibit. What is the nature of those items?

40 A The first item, \$13,890, is due the City of Buffalo for elimination of grade crossings there. A number of years ago we were financially in about the condition we are now and the City of Buffalo advanced the funds to pay for the Erie Railroad's proportion of the expense of eliminating the grade crossings in the City of Buffalo, and we are paying it in installments, I think it is for a period of twenty years. The second item, \$90,000, covers a note given in payment

Charles P. Crawford, direct.

for construction work on property in Cleveland, the ore docks.

Q Those ore docks are in use, Mr. Crawford?

A They are.

Q Have been for several years?

A Yes.

Q And this is simply a part of the payment therefor?

10

A Yes, sir, there were a number of notes issued.

Q Running over a series of years?

A Yes, sir.

Q There is one small item of real estate mortgage; what is the nature of that?

A I haven't the explanation of that. We have a number of rather small items, mortgages which were on real estate at the time we acquired it and as they became due we have been paying them off as we could.

Q I presume, as a practical matter, that small amount of \$37,000 could probably stand, couldn't it; if the holder of the mortgage was willing to accept his interest and not foreclose it would stand?

20

A Yes, we frequently allow them to run after maturity.

Q That amounts to only \$37,000?

A \$37,000.

Q The remaining items on this sheet, R-115, are entitled "Erie Railroad Company collateral notes," two items aggregating six million dollars.

30

Commissioner Donges. And another of ten million.

Q And another of ten million, three items of sixteen million; what is the nature of those obligations?

A The ten million dollars of notes falling due in April, 1915, were issued to secure funds with which to double track the Chicago & Erie Railroad and a portion of the Meadville division of the Erie Railroad.

40

Charles P. Crawford, direct.

Q Just state where the Meadville division is.

A It extends from Salamanca, New York, to Meadville, Pennsylvania. The work on the Meadville division was principally between Corry and Meadville, but it included double tracking between Salamanca and the first station, Red House, also the elimination of the grade crossing at Jamestown, in the reconstruction of the passenger terminals at that point.

Mr. Taylor. That, Mr. Chairman, is something which can be described in detail by a later witness, as to the nature of the work done.

Q Has that money been expended, Mr. Crawford?

A It has practically all been expended, a few hundred thousand dollars yet remaining to be applied on the Jamestown work.

20 Q (*By Commissioner Donges.*) What?

A Two or three hundred thousand yet remaining to be applied on the Jamestown work.

Q (*By Mr. Taylor.*) Is that under way?

A That is under way?

Q Under contract?

A I believe so.

Q The company is under obligation to expend that money?

30 A Yes, it can expend it in no other way, because it is required by the order of the Public Service Commission of New York.

Mr. Merrey. I might say right at this point, it seems to me now quite evident we won't get through with this matter to-day, but these are all matters that the company had in hand and could have testified to before the hearing closed. As I understood, they were only going to be permitted to show at this hearing matters of financing and reports of the company which they have

Charles P. Crawford, direct.

come into possession of since the hearing closed.

Commissioner Douglas. I think, Mr. Merrey, the idea was to show the present financial condition of the company.

Mr. Merrey. Yes, but here they have been going over now a lot of notes which were issued long before the time of the other hearing in this matter, except, I notice, these last notes of six million were issued in October, 1914. They are undoubtedly renewals. So far as this statement is concerned there isn't anything at all new in it that they did not have at the time the examination closed. Of course, I cannot see the pertinence of all this material being offered. It seems to be along the lines of the opening of the testimony. The commission, however, has permitted it to go in and I would like to call the attention of the commission, that they are going beyond what they ought to do. So far as their August statement is concerned and so far as this statement showing the income and condition of the company at the close of June 30th, 1914, that was clearly within what the commission intended, but it doesn't seem to me it was intended they should be allowed to explain how all their present indebtedness was incurred, when it was incurred long, long ago.

Commissioner Douglas. This statement goes no further than to show what payments according to the company's view it will be required to make between October 14th, 1914, and June 30th, 1915. We will take it.

Mr. Merrey. The point I make is they have that information in their possession.

Commissioner Douglas. I dare say they have all of it—

Mr. Merrey. They could not have had all.

Charles P. Crawford, direct.

Commissioner Donges. —shown on this statement.

Mr. Merrey. Yes, but not on the other.

Commissioner Donges. We will take this.

Q Passing to the other two items of collateral notes aggregating six million; what is the nature of those obligations?

10 A Five million is a renewal of a note for a similar amount which was issued to secure funds to reimburse the treasury for moneys expended in improvements, additions and betterments.

Q (*By Commissioner Donges.*) Of what character?

A They were of the general character, construction work along the road and the funds having become depleted by using it for those purposes the company issued this five million short term note.

20 Q When were those notes first issued; do you know?

A Yes, sir, I think I have it here. Page eleven, under financial, the third paragraph, I think it is, explains the issue. "On April 1st, 1914, \$13,500,000 three-year five and one-half per cent. collateral gold notes, and on April 8th, a special note maturing October 1, 1914, for \$1,000,000, were issued, the proceeds thereof being applied toward the payment of \$12,500,000 collateral gold notes and \$2,500,000 short term notes maturing April 8, 1914, \$500,000 of the last mentioned notes being retired." The million dollar note shown on the bottom of Exhibit B-115 is a renewal of the million dollar note which I just mentioned.

30 Q How long is it since the Erie Railroad Company has sold any bonds to the public?

A We sold a few Pennsylvania collateral bonds in 1908. With that exception we have not been able to market any bonds since 1908.

40

Charles P. Crawford, direct.

Q And so these notes have been the method which the company has adopted of financing, during that period?

A That is right.

Q And these renewals have simply marked the accumulation of such notes, is that correct?

A That is right, yes, sir.

Q Of course, when you say the company has not 10
been able to sell bonds, you mean they have not been
able to sell them on terms which the directors thought
were acceptable, is that correct?

A The price too low, yes, sir.

Q What method was adopted for renewing these
notes in October, 1914, Mr. Crawford?

A The five million dollar note and the one million
dollar note were, I believe, held, each held, by one
banking institution and we were able to renew with 20
them. Of the \$4,500,000 collateral gold notes which
matured October 14th, 1914, a renewal of the notes
was offered at a rate of ninety-seven and a half—

Q You mean offered by the company, any?

A Offered by the company to the holders of the
notes. We were able to secure consent of the holders
of but \$1,300,000 of those notes.

Q And that I left how many?

A \$3,250,000 which it was necessary to take care
of. The company succeeded in getting a syndicate 30
of bankers, largely, I think wholly, made up of banks
where we had our deposit accounts. They made up
a syndicate and under-wrote the balance of them.

Q Where were those banks located?

A At various places along the line of the road
between New York and Chicago?

Q All along the line?

A Yes, sir.

Q And you say those were the banks with which
the company had been doing business as a depositor? 40

Charles P. Crawford, direct.

A Yes, sir, where we have our active deposit accounts.

Q Is that a usual way of raising money, Mr. Crawford?

A It is unusual, so far as we are concerned.

Q Why did you resort to it?

10 A We were told by our financial advisors it was up to us to get the renewal.

Q On account of the existing financial situation?

A On account of the existing financial condition in New York.

Q Have you also prepared a statement showing the obligations, principal only, as contrasted with interested, maturing during the year ending June 30th, 1916?

A I have.

20 Q Is that statement correct?

A It is.

Mr. Taylor. I will offer the statement entitled "Erie Railroad system, statement showing obligations (principal only) maturing during year ending June 30, 1916."

(Same is received and marked Exhibit R-116.)

30 Q (*By Commissioner Donges.*) Going back to Exhibit 115, this item of ten million Erie Railroad collateral notes, it is the expectation to renew those notes?

A We hope to.

Q They bear interest at what rate?

A Five per cent.

Q (*By Mr. Taylor.*) Have any arrangements as yet been made for the renewal of any of these obligations, Mr. Crawford?

40 A I believe some preliminary arrangements have been made; they are discussing a new mortgage.

Charles P. Crawford, direct.

Q But no definite and final arrangements have been made, have they?

A Nothing definite, no, sir. The meeting of stockholders to agree on the mortgage has been postponed two or three times. The next date is next Tuesday.

Q (*By Commissioner Treacy.*) The stockholders are to meet to agree upon the making of a new mortgage?

10

A To approve of the mortgage, which, I believe, has been written up, but it has not yet assumed definite shape.

Q (*By Mr. Taylor.*) Have any contracts been made for the sale of bonds to be issued under that mortgage?

A Oh, no, no, sir.

Q Referring now to Respondent's Exhibit 116; what is the total amount of obligations, principal obligations, that is, obligations for principal maturing during the year ending June 30, 1916?

20

A \$11,241,000.

Q Most of those items are equipment trust certificates?

A They are similar items to those appearing on Exhibit R-115, with the exception of the first item, I think.

Q That is a promissory note?

A A promissory note issued by the Long Dock Company, \$700,000. That is a second renewal of a note for the same amount issued by the Long Dock Company.

30

Q What is the Long Dock Company?

A The Long Dock Company is the owner of practically all of the Jersey City Terminal used by the Erie Railroad Company. The property extends from the east portal of the tunnel to the water front.

Q From the east or west portal of the tunnel; the west portal of the tunnel, isn't it, Mr. Crawford?

40

Charles P. Crawford, direct.

A Yes, the west portal of the tunnel.

Q It includes the tunnel, in other words?

A Yes, that is right.

Q What is the relationship of the Erie Railroad Company to the Long Dock Company?

10 A The Erie Railroad Company owns the entire capital stock of the Long Dock Company, and leases its property. The conditions of the lease are that the Erie Railroad Company shall pay the interest on the bonds of the Long Dock Company which, I think, is \$37,500 per month, all taxes and maintenance and other charges.

Q Then, I take it, in order to retain its Jersey City terminal, the Erie Railroad Company has to stand in back of the Long Dock Company?

A Oh, yes, indeed.

20 Q What was this note of the Long Dock Company issued for?

A For the purchase of the elevator at Jersey City. My recollection is the price of the elevator was a couple of hundred thousand—was ninety thousand more than this note.

Q That includes the wharf property on which the elevator is located?

A Yes, sir, and the Long Dock mill and elevator property.

30 Q That is the structure, the Long Dock mill is the structure on the dock out beyond the elevator?

A To the westward of it, yes, sir.

Q Eastward, you mean, Mr. Crawford?

A I really thought it was to the west. I may be mistaken. I have not been over there in years. It adjoins it.

Q (*By Commissioner Treacy.*) This promissory note, how much of this \$700,000 was issued for the Long Dock elevator?

40 A The price of the elevator, as I recall, was \$790,-

Charles P. Crawford, direct.

000. Two notes were issued, one for \$90,000, one for \$700,000, each in favor of the Erie Railroad Company. The Erie Railroad Company endorsed the \$700,000 note and sold it.

Q (*By Mr. Taylor.*) Mr. Crawford, as I understand it, the amount of this purchase price was fixed by contract years ago, was it not?

A It is stated in the contract issued many years ago. 10

Q The elevator was constructed under a contract which bound the Long Dock Company to purchase it at a fixed price at a fixed date, is that correct?

A It is.

Q Did the contract require the payment of the amount which the Long Dock Company paid at the time this note was issued?

A It did.

Q (*By Commissioner Donges.*) The contract was one of the Long Dock Company? 20

A Yes, sir, the contract was of the Long Dock Company with the owners of the elevator, that the Long Dock Company would purchase the property at a specified date.

Q The Long Dock Company is legally a separate corporation—

A A separate corporation.

Q —from the Erie Railroad?

A Yes, sir. 30

Mr. Taylor. All of the stock, of which, however, is owned by the Erie Railroad.

Q The obligation is primarily that of the Long Dock Company?

A Yes, sir, the note runs to the Erie Railroad, endorsed by the Erie Railroad Company and sold.

Q Does the Long Dock Company now own the elevator or the Long Dock Mills & Elevator Company? 40

Charles P. Crawford, direct.

A The title is in the Long Dock Company. The Long Dock Mills is an additional building.

Mr. Taylor. The Long Dock Mills is not a company in which the Erie Railroad Company has any interest. It is a lessee of the property of the Long Dock Company.

10 *Witness.* This \$700,000 appears on this statement and of course, the Erie Railroad Company has got to raise the money.

Q It advanced that money, however, to the Long Dock Company?

A Yes, sir.

Q (*By Mr. Taylor.*) Does the Long Dock Company operate anything?

A No, sir.

20 Q So it has no income to pay the interest on its bonds except what it receives from the Erie Railroad Company and from the lease of this elevator, is that correct?

A That is all.

Q And such small parcels of property as it may own in Jersey City.

A That is all.

30 *Commissioner Donges.* But the Erie Railroad Company is a creditor of the Long Dock Company for this amount?

Mr. Taylor. Yes, that is true.

Witness. Yes, sir.

Q (*By Mr. Taylor.*) These bonds of the Long Dock Company are a lien on the Jersey City terminal used by the Erie Railroad Company?

A Yes, sir.

40 Q There is another item on this Exhibit R-116, which is different, mortgage bonds, Tioga; what are those?

Charles P. Crawford, direct.

A Those are bonds of the Tioga Railroad Company which become due in November, 1915.

Q What is the Tioga Railroad Company?

A The Tioga Railroad Company is the owner of the property extending from Elmira, New York, southward to Hoyteville, and Arnot, Pennsylvania.

Q It is shown in blue and marked, Tioga division, on the map? 10

A It is a leased line of the Erie Railroad.

Q Does the Erie Railroad also own the capital stock of the Tioga Railroad Company?

A It does and it has it pledged under its mortgage.

Q Is this mortgage which is coming due in 1915 a lien on the railroad and property of the Tioga Railroad?

A Yes, a first lien.

Q There is a similar item, mortgage bonds, B. N. Y. & E. 1st, \$2,380,000 shown on Exhibit 116, explain that item. 20

A The Buffalo, New York & Erie Railroad, was merged with the Erie Railroad Company at the time of the reorganization.

Q What reorganization, 1895?

A The reorganization of December 1st, 1895.

Q (*By Commissioner Donges.*) Where is the Buffalo, New York & Erie? 30

A It has title to that portion of the main line—

Q What you call the Buffalo division?

A Not exactly, it is the portion from Painted Post around via Batavia to Attica, part of our main line at the western part of New York State.

Q (*By Mr. Taylor.*) It is part of the Rochester division on the map, isn't it?

A Yes, sir.

Q What is the nature of this mortgage which is coming due in June, 1916? 40

Charles P. Crawford, direct.

A It is the first mortgage on that section of the road and was assumed by the Erie Railroad Company in December, 1895.

Q This \$90,000 construction obligation due in June, 1916, is that another—

10 A That is another one of the notes given in settlements for reimprovements made in the ore docks at Cleveland.

Q This construction obligation, various, due July, 1915, fifty-two thousand dollars; what is that?

A I haven't the detail of that. We have only two other construction obligations beside the one in connection with the ore docks in Cleveland, and those are the matters that the City of Buffalo for construction work which I have heretofore explained and notes given the Buffalo, Rochester & Pittsburg in settlement for improvements made on the Bradford division.

20 Q That portion of the line over which they—

A The Buffalo, Rochester & Pittsburg operates its trains.

Q (*By Commissioner Donges.*) Wouldn't the items of ten million shown on Exhibit 115 and five and one million, sixteen million of collateral notes, as well as the items, the first six items on Exhibit 116 be largely chargeable to capital account, be proper capital expenditures for additions, improvements and betterments, that would be properly chargeable.

30 A With the exception of the one million, sir, I would say, yes, sir.

Q (*By Mr. Taylor.*) I suppose, Mr. Crawford, it would be the expectation of the company to capitalize those amounts in some permanent form, would it not?

A Yes, sir.

Q If its credit was sufficient to enable it to do so?

40 A Yes, sir.

Charles P. Crawford, direct.

Q Have you prepared a similar statement showing the obligations for principal as contrasted to interest maturing during the year ending June 30, 1917?

A I have.

Mr. Taylor. I will offer that statement in evidence as Respondent's Exhibit 117.

Commissioner Donges. It will be admitted.

10

(Statement entitled "Erie Railroad system, statement showing obligations maturing during year ending June 30, 1917, received and marked Exhibit R-117.)

Q What is the total amount shown on that statement, Mr. Crawford?

A \$16,079,000.

Q I observe, Mr. Crawford, two items of construction obligation, \$90,000 and \$52,000.

20

A The same explanation as in Exhibit R-116.

Q There is also an item of \$13,500,000, and the balance other than the items which I have mentioned is all for equipment trust certificates?

A Additional installments on some equipment trusts, as appeared on the other statement, yes, sir.

Q Go back to the item of \$13,500,000 Erie Railroad Company collateral notes issued April, 1914, and due April, 1917; did you explain a little ago what those notes were for?

30

A I can do so now, more particularly perhaps. On April 1st, 1914, thirteen and a half millions three-years five and a half per cent. collateral gold notes together with a special note for a million dollars were issued, and the proceeds used to take up twelve and a half millions of collateral gold notes which became due at that time, with two and a half million short term notes. We were able to retire \$500,000 at that time. The twelve and a half million of which these

40

Charles P. Crawford, direct.

notes are renewal were short term notes issued for the reason that we were unable to market our bonds, and the bonds are pledged as collateral.

Q You mean the bonds which the company was authorized to issue under the terms of its mortgages?

10 A The bonds, yes, sir, which the company had received from its trustee in reimbursement for expenditures made for reasons stated, we were not able to market them, but to procure funds, the short term notes at relatively high rates of interest were issued.

Q That is all part of the plan which the company has pursued for the last six or eight years of taking care of its capital obligations temporarily, by issuing short term notes, is that correct?

A Yes.

20 *Mr. Taylor.* Mr. Chairman, I should like to offer in evidence, although I haven't them here at present, I should like to file as an exhibit in this case copies of the open mortgages of the Erie Railroad Company.

Q What are they, Mr. Crawford?

A The first consolidated mortgage dated December, 1895, covering the issue of prior lien and general lien bonds.

30 Q I wanted you to describe the mortgages so we can identify them, that is all. You have described the first consolidated mortgage of December, 1895.

A The next in order of date would be the Pennsylvania collateral indenture, but that is not a mortgage.

Q I intended to include that.

A The Pennsylvania collateral indenture of February 1st, 1901. The Erie Railroad Company's general mortgage, popularly known as the convertible mortgage, of April 1st, 1903.

40 Q Take first the general mortgage; what was the

Charles P. Crawford, direct.

total amount of bonds which could be issued under that mortgage?

A I could not answer.

Q How many bonds are there under that mortgage which have not yet been issued and which the company can secure to reimburse it for past or future expenditures out of its income?

A Two millions. There were seventeen million reserved and we have received from the trustee fifteen millions. 10

Q So that on the basis—

A Just a minute—that refers to general lien bonds only. Of the prior lien bonds all have been received which the mortgage provided.

Q Then the company is practically limited, with the exception of this two million, the company is limited to the bonds which it may secure under the convertible mortgage? 20

A Yes, sir.

Q Now, as to the Pennsylvania collateral indenture which you referred to; what is the nature of that security?

A The bonds issued under that indenture together with, I think, five million of capital stock of the Erie Railroad, were issued for the purchase of the capital stock of the Pennsylvania Coal Company and the Erie and Wyoming Valley Railroad Company. 30

Q What is the Erie & Wyoming Valley Railroad Company?

A A railroad extending from Lackawaxen, Pennsylvania, to Plains, near Scranton.

Q What does it correspond with on the map in evidence? Look at the map and see what it is called on the map.

A Shown in red and marked Wyoming division.

Q Are the expenditures for which the company 40

Charles P. Crawford, direct.

may be reimbursed by issues of bonds under the Pennsylvania collateral indenture limited?

A They are restricted to expenditures on that railroad and it also provides that we may be reimbursed for expenditures made on the property of the coal company, but we are not expending any there.

Q The coal company is spending that itself?

10 A The coal company is providing for that itself.

Mr. Taylor. Mr. Chairman, I should like to have made a part of the record those three mortgages which Mr. Crawford has referred to and give them exhibit numbers, R-118, 119 and 120 respectively.

Commissioner Donges. Very well, that may be done.

20 (First consolidated mortgage of December, 1895, marked Exhibit R-118.)

(Pennsylvania collateral indenture, February 1, 1901, marked Exhibit R-119.)

(Erie Railroad Company general mortgage, April 1, 1903, marked Exhibit R-120.)

30 *Mr. Taylor.* I desire to call the attention of the commission particularly to the provisions of those mortgages which provide for what purposes bonds may be issued, so that they will be able to see the restrictions under which the company may obtain bonds to reimburse its treasury, under those mortgages. With the board's permission I will have those portions of the mortgages marked on the copies which are put in, for convenience of reference.

Commissioner Tracy. Did Mr. Crawford state what amount of bonds can be issued under the convertible fifty year mortgage?

40 *Mr. Taylor.* He did not. I don't know as it makes very much difference until you can sell them.

Charles P. Crawford, direct.

Commissioner Treacy. You have to issue bonds to take care of all these notes that are maturing, of which you have some thirty million.

Q (*By Mr. Taylor.*) Mr. Crawford, has there been any market for these convertible bonds in recent years?

A There have been no sales.

Q (*By Commissioner Treacy.*) How do you expect to take care of the thirty million of collateral notes? Eventually you intend to capitalize those items? 10

A Yes, sir.

Q What was your scheme for taking care of them?

A It is hoped that we will be able to have this new mortgage in operation by that time, if the conditions warrant.

Mr. Taylor. That is a general refunding mortgage, Mr. Commissioner. 20

Q What amount?

A I believe the amount is not to be stated. I understand not less than three hundred million, to be known as the refunding and improvement mortgage. The particulars have been more or less made public recently.

Q You propose under that mortgage to refund—

A To refund all of these underlying securities as they come due, including these equipment trust obligations or a percentage of them. 20

Mr. Taylor. Of course, the commission appreciates that is dependent on our ability to dispose of the bonds issued under that mortgage.

By Mr. Taylor.

Q I suppose the company has been securing the bonds issuable under these various mortgages from the trustees from time to time as it was entitled to them under the terms of the mortgage, is that correct? 40

Charles P. Crawford, direct.

A Yes, we have taken advantage of all of those and each year have secured the instalment which the mortgage provided.

Q Are those bonds, generally speaking, pledged under these notes?

A All of them.

Q All of the bonds which the company has been
10 able to secure under these mortgages are pledged under these notes?

A Yes, sir.

Q (*By Commissioner Donges.*) In other words, the practice of the company is to take down the bonds from the trustee and pledge them with these notes?

A Yes, sir.

Q (*By Mr. Taylor.*) Mr. Crawford, has there
20 been made in your department and under your direction, an estimate of the additional revenue which will be obtained by the Erie Railroad Company from the increases in rates in Central Freight Association territory and a certain few in trunk line territory which the Interstate Commerce Commission said might be made, in its opinion of last summer?

A Yes, the auditor—

Mr. Merrey. You mean which they authorized.

30 *Mr. Taylor.* They did not authorize them, but they wrote an opinion in which they indicated that certain increases might be made.

Commissioner Donges. You mean, pointed out how revenues might be increased.

Mr. Taylor. I am not talking about that, Mr. Commissioner.

Commissioner Donges. Only of increases of rates?

40 *Mr. Taylor.* Only of increases of existing rates which they set out that it might be made.

Charles P. Crawford, direct.

Mr. Mervoy. In other words, the company must file, whatever rates are actually authorized, they must file a statement of them with the commission for a certain length of time.

Mr. Taylor. We have to file—in order to increase any rate we have to file them thirty days in advance with the Interstate Commerce Commission, any interstate rate. In this advanced rate case to which I refer the commission indicated that if the rates in certain territory were increased by a certain amount, the commission would not suspend the increases. Now I am asking Mr. Crawford whether he has made an estimate of how much the Erie Railroad Company may expect to get from such increases. 10

Witness. We have made a rather rough estimate. It would have taken a long period of time and cost considerable money to work out the details, but our auditor of freight accounts has made an estimate that the increased rates granted by the decision of the Interstate Commerce Commission, which applies only to rates in Central Freight Association territory, and that only to intra-territorial rates, and excepting anthracite coal, bituminous coal and various other commodities, we have made an estimate that our—I will give such details as I have—the estimate of Erie Railroad revenue in Central Freight Association territory was— 20 30

Q (*By Mr. Taylor.*) Right there, please define Central Freight Association territory roughly, for the information of the commission.

A I don't believe I can give the boundaries of it.

Mr. Taylor. I will give it if the commission will accept my statement.

Witness. It is the territory tributary to Chicago. 40

Charles P. Crawford, direct.

Mr. Taylor. So far as the Erie territory is concerned it is practically west of Buffalo and Salamanca, includes the line marked B. & S. W. R. R.

Commissioner Donges. Really west of Buffalo and Salamanca?

10 *Witness.* Yes, so far as the Erie Railroad is concerned, yes, sir.

Commissioner Donges. Between Buffalo and Salamanca on the east and Chicago on the west?

Mr. Taylor. Yes, all our lines are in C. F. A. territory west of Buffalo and Salamanca.

Witness. Our freight revenue for the year ending June 30th, 1914, in Central Freight Association territory was \$16,256,000.

Q (By Mr. Taylor.) That is the revenue?

20 A That is the proportion of the revenue earned in that territory.

Q On intra-territorial business?

A No, sir, that is the entire Erie Railroad revenue in that territory.

Commissioner Donges. This had better be marked.

Mr. Taylor. I will offer that statement.

30 (Statement entitled "Erie Railroad Company, estimate of revenue which will be obtained from increases already granted in Central Freight Association territory. This will include the few in trunk line territory which the commission permitted to be made in order to make effective the increase in Central Freight Association territory—based on the fiscal year ended June 30th, 1914" received and marked Exhibit R-121.)

40 *Witness.* We find that the revenue in that territory on the commodities which the commission decided should not receive the increase is \$6,737,000.

Charles P. Crawford, direct.

Q (*By Commissioner Donges.*) Won't you go back. What did I understand you to say was the revenue received from all freight in that territory for the fiscal year ending June 30th, 1914?

A The revenue in that territory was \$16,256,000.

Q (*By Mr. Taylor.*) That includes all revenue on business from one point to another point in that territory as well as revenue on business running all the way through it. 10

A All the revenue, gross revenue.

Q And the revenue on business originating in the territory and passing out of it?

A Yes, sir.

Q (*By Commissioner Donges.*) That is the amount allocated to that district as its earnings on freight.

A That is it exactly.

Q Freight only? 20

A Freight only. From that amount we deduct the revenue on the commodities which the commission decided should not receive an increase, \$6,737,000. That will leave the revenue on other commodities to which the five per cent. increase may be applied, \$9,519,000. Five per cent. of that amount would be \$475,958, but the increase only applies to the traffic which both originates and terminates in that territory and our best information is that that is fifteen per cent. of the total, so the benefit which the Erie Railroad would derive from the decision seems to be very slight, according to our figures only \$71,393. Of course, as I say, the fifteen per cent. is an estimate, but it is the judgment of our freight officers. 30

Q (*By Commissioner Donges.*) That is the utmost that you have been able to estimate as the increase in revenues by reason of the opinion of the commission you may be entitled to earn?

A Yes, sir. 40

Charles P. Crawford, direct.

Q (*By Mr. Taylor.*) Have you made an estimate of the additional revenue which would accrue to the Erie Railroad Company from the extension of those increases in rates to trunk line territory, that is, territory east of Buffalo and Salamanca?

A Yes, sir.

10 *Mr. Taylor.* I will offer that statement in evidence and have it marked R-122.

Commissioner Donges. It may be so marked.

(Statement entitled "Erie Railroad Company, estimate of the revenue which will accrue to the Erie R. R. Co. from the extension to trunk line territory of the increase in rates granted to Central Freight Association territory by the commission in its report—based on the fiscal year ended June 30th, 1914," received and marked Exhibit R-122.)

20

Q (*By Commissioner Treacy.*) Do you mean Mr. Crawford, that you have estimated that the Erie Railroad Company does only fifteen per cent. of the business which originates and terminates within its territory along its line from Buffalo to Chicago?

A Our business on the Chicago & Erie for example is practically all through, very few towns or cities along that line, so that our estimate is that of the freight which both originates in this territory and terminates in the territory does not go beyond the Central Freight Association territory line in either direction, is but fifteen per cent. of the total money we earn in that territory.

30

Q That includes then, as I understand it, all revenue that may be collected from freight in this territory, whether it be shipped the whole distance of the territory along your own line or along connecting lines within that territory, of other roads?

Charles P. Crawford, direct.

Commissioner Hillery. That would include all revenue than, both local—

Mr. Taylor. Allow me to call your attention to the fact that out of this total of sixteen million revenue of C. F. A. territory nearly seven million is on commodities which take no increase at all, and as a matter of fact, I think Mr. Crawford would state—I don't want to put words in his mouth—I think he would state the very heaviest tonnage which moves exclusively from one point to another point, does not go outside of the territory, is that which is included in commodities on which there is no increase. For instance, coal, bituminous coal and ore are very much the heaviest commodities moving in C. F. A. territory. 10

Commissioner Donges. Entirely intra-territorial. 20

Mr. Taylor. Entirely intra-territorial. In fact, they are the heaviest commodities of any sort moving in that territory and happen to be intra-territorial, but not in this at all because we get no increase on them.

Commissioner Donges. Mr. Crawford says as to the nine million, that only fifteen per cent. of that is strictly intra-territorial and that eighty-five per cent. is that which originates in C. F. A. territory, whose point of destination is in trunk line territory. 30

Witness. Or vice versa.

Mr. Taylor. Either trunk line or west of Chicago; that is the way I understood him.

Q (*By Commissioner Donges.*) Is that the situation?

A Yes, sir.

Commissioner Donges. Judge Treacy's question is whether that includes not only freight 40

Charles P. Crawford, direct.

that originates on the Erie property but whether it includes also freight that comes to the Erie from connecting lines, all within C. F. A. territory.

Mr. Taylor. To put it in technical language; does it include only Erie local traffic, or does it include interline traffic in C. F. A. territory?

10 *Witness.* The statement says it is local to C. F. A. territory on Erie Railroad lines.

Q (By Commissioner Donges.) It would not include the interline traffic?

A It would include the interline traffic, but only the revenue on our own road, no, I take it from the statement this is the revenue local to Erie lines.

Mr. Taylor. It does not say so, it says traffic local to Central Freight Association territory on Erie Railroad lines.

20

Witness. I did not go into that very deeply.

Mr. Taylor. I suggest that Mr. Crawford reserve his answer on that and make inquiry of the man who made the details.

Commissioner Donges. Very well.

Witness. I will be glad to clear that up.

Q (By Mr. Taylor.) Going to Exhibit R-122, what is the total amount of the increased revenue which might accrue to the Erie Railroad Company from the extension of those increases in rates to trunk line territory?

30

A We estimate that if the decision was made to apply to both territories it would increase our revenues \$1,203,000.

Q (By Commissioner Donges.) That is on freight only, of course?

A Freight only, yes, sir.

Q If the Interstate Commerce Commission should allow the increase in the trunk line territory it would

40

Charles P. Crawford, direct.

allow the company an increase in the intra-territorial rates as well?

A That would allow that to come in as well.

Q Not only intra-territorial, but both?

A It removes the intra-territorial bars.

Q (*By Mr. Merrey.*) May I ask—this is the maximum of what the railroad is asking from the Interstate Commerce Commission?

10

A I am not just familiar with what they have asked except that I understand they asked for five per cent. flat increase on all rates.

Q It is not all then, because I notice you have included anthracite coal, bituminous coal, coke, iron ore and some others.

Witness. No, this isn't what we asked.

Mr. Taylor. Mr. Chairman, I think I might make a statement on that, inasmuch as it is a matter related to the proceeding before the Interstate Commerce Commission. With certain exceptions, we made no request of the commission at any time, by filing tariffs or otherwise, by filing any increase in revenue on anthracite coal, which is about \$12,600,000 of our revenue out of a total freight revenue of \$42,000,000 or pretty nearly one-third, just about thirty per cent. of our total freight revenue. We made no request for an increase, not because we did not want the money, but because there are other people in the anthracite business that did not need the money.

20

30

Commissioner Donges. Isn't this estimate in Exhibit R-122 made up on the basis of the allowance in trunk line territory in accordance with what the commission said might be done in C. F. A. territory?

Mr. Taylor. That is so.

Commissioner Donges. Isn't that the whole situation?

40

Charles P. Crawford, direct.

Mr. Taylor. We asked—to make it clear if it not already is—I think perhaps it is—we asked for increases on a good many of those commodities which are excluded in this statement R-122.

Commissioner Donges. And are excluded here because the commission said it would not permit in C. F. A. territory increases on those commodities.

10

Mr. Taylor. Exactly. The items are on this Exhibit R-122 and you can see how much our increased revenue would be increased if the Interstate Commerce Commission should have a change of heart on bituminous coal and coke and those other things where we asked them in the first place for a five per cent. increase.

20 Q (*By Mr. Taylor.*) Mr. Crawford, what is this reduction of \$977,000 at the bottom of Exhibit R-122?

A Transcontinental freight on which we understood the decision would not apply; I cannot state exactly why.

Q I guess it was not included in the original proposed increases.

A Probably not.

30 Q (*By Commissioner Donges.*) Are you able to say whether or not it is a fact that there have recently been some increases in passenger rates which will accord the company an increased revenue?

A I am not sufficiently familiar with the details to say that.

Q Do you know generally there have been some increases, mileage, for example?

Mr. Taylor. We admit they have.

A I don't know of the mileage case.

40 *Mr. Taylor.* We have no figures to show what those increases will amount to and, as a matter of fact, it is an extremely difficult thing to figure

Charles P. Crawford, direct.

because of the shifting of purchasers from one class of tickets to another when rates are changed.

Commissioner Donges. Wasn't it estimated, Mr. Taylor, that the companies affected, those who filed schedules providing for an increase in the mileage rate from two cents to two and a quarter, that the increase would approximate ten million dollars? 10

Mr. Taylor. For all the companies in the United States or in the territory which made it?

Commissioner Donges. Only in the territory that made it.

Mr. Taylor. I don't know, Mr. Chairman.

Commissioner Donges. The eastern roads.

Mr. Taylor. I understand this commission had a hearing. 20

Commissioner Donges. Mr. Bikle, of the Pennsylvania Railroad, who appeared for the railroads at a conference called, practically a conference, called by this board, made the statement, as I recall it, that approximately ten or eleven millions was the estimated increase anticipated from the filing of the new schedule and the sale of mileage on the new basis.

Mr. Taylor. That may be; I don't know, but doubtless your recollection is correct. However, I think in considering that in this connection it would be only fair for the board to compare the Erie passenger revenue in the territory affected by such changes so as to see what proportion of that roughly, in a very rough way, what proportion of that ten million the Erie might expect to enjoy. My expectation would be it is small, because we are not much of a passenger road, except in this immediate territory. 30 40

Charles P. Crawford, direct.

I should like to offer in evidence the annual report of the directors of the Erie Railroad Company to the stockholders of the company for the year ending June 30th, 1914.

(Annual report of Erie Railroad for 1914 received and marked Exhibit R-123.)

10 Q (By Mr. Taylor.) Mr. Crawford, have you a statement there showing generally the disposition of the profit and loss surplus shown on the balance sheet in the annual report?

A I have a general statement showing that information, yes, sir.

Mr. Taylor. I would like to offer that in evidence.

Commissioner Donges. It will be marked.

20 (Statement entitled "Erie Railroad system statement showing disposition of profit and loss surplus to June 30, 1914, received and marked Exhibit R-124.)

Q (By Commissioner Donges.) Is this shown in the annual report?

A No.

Q (By Mr. Taylor.) That statement will supplement the balance sheet in the annual report; is that correct, Mr. Crawford?

A Yes.

30 Q And explains the disposition as nearly as possible of that profit and loss surplus?

A It will explain it within about \$56,000 which we thought was near enough.

Q That shows the disposition of all surplus earned by the company since its organization in 1896?

A Yes, sir.

Q Explain that item of cash, Mr. Crawford, please, on this statement.

40 A That is the same amount as appears in our general balance sheet in the annual report and includes

Charles P. Crawford, direct.

not only cash on hand but the cash in transit, so that it really does not represent actual cash in hand.

Q Is that in excess of the ordinary working capital required by the company for the conduct of its current business?

A Not much. We have estimated that we need at least four and a quarter millions as an average amount necessary to conduct our business, as a working fund. 10

Q What do you mean by working fund?

A The amount it is necessary to have to conduct our business.

Q Practically, it represents the amount you have spent and have not collected from your customers, doesn't it? That is, the amount that you have to spend, the amount you are behind all the time in your current expenditures, as compared with collections on account of those expenditures? 20

A Yes. I arrived at the estimate of four and a quarter million by assuming that if we collected all our current assets with the exception of cash and material and supplies, and had to pay all our current liabilities, we would need that additional sum. That was made up from the average of some five years, I think.

Q In other words, as I understand it, it practically represents the amount of money which you had to have to start with? 30

A Yes, you can state it that way.

Q You had to spend that amount before you commenced to earn, practically speaking?

A Yes.

Q And always keep behind about that amount?

A Yes, sir.

Q Have you a copy of the statement, Mr. Crawford, showing the estimated increase in expenses of the Erie, New York, Susquehanna & Western, and 40

Charles P. Crawford, direct.

New Jersey & New York on account of the extra crew laws in various States, the so-called Full Crew Laws?

Mr. Merrey. I think that was put in.

Mr. Minard. We put an estimate of what it would cost. Now we have the figures.

10 A I brought along only our office copy, not expecting to be questioned about it.

Q Was that made in the accounting department?

A It was made by one of our travelling auditors who secured the information from the division offices and was very carefully prepared. The entries were made from the original time slips on which was shown the allowance to this extra man.

Q In other words, he took the time slips of the men who were employed solely on account of these laws?

20 A Yes, sir.

Q And computed the amount from those time slips?

A Yes, sir.

Q Is this the same statement, Mr. Crawford, which was prepared and put in evidence in the proceeding before the Interstate Commerce Commission in regard to anthracite rates and practices, Docket Number 4914?

A It is.

30 Q And was it subjected thereto examination and cross examination by representatives of the Interstate Commerce Commission?

A Yes, sir.

40 *Mr. Taylor.* I would like to offer this statement in evidence and would be quite willing, if Mr. Merrey or anybody else wishes to do so, that they should refer to the record of cross examination in regard to this statement in the anthracite investigation referred to.

Charles P. Crawford, direct.

Commissioner Douglas. It will be admitted and marked.

(Statement showing increased expenses to Erie R. R. Co., including the N. J. & N. Y. R. R. Co., N. Y. S. & W. R. R. Co., and Wilkes-Barre & Eastern R. R. Co., resulting from the operation of Full Crew Laws in the States of New York, New Jersey and Pennsylvania, for the months of September, 1913, to March, 1914, inclusive, for the State of New York; July, 1913, to March, 1914, inclusive, for the States of New Jersey & Pennsylvania; with estimates for the full year, received and marked Exhibit R-125.) 10

Q I will ask Mr. Crawford to state the total amount for the nine months for which this statement was made, July, 1913, to March, 1914, in the State of New Jersey.

20

A \$26,877.

Q How much did that figure out on the same proportionate basis for a full year?

A \$35,836.

Q It appears that figures were made in Pennsylvania for nine months, also, the same nine months; what was the figure in Pennsylvania?

A \$54,773.

Q And the full year, how much?

A \$73,031.

30

Q How much in New York for the seven months the law was in effect up to March, 1914?

A \$104,268.

Q And the full year?

A \$178,745.

Q For the three States how much does that make for a full year?

A \$287,614.

Q That includes, as you stated, the Erie, New

40

Charles P. Crawford, direct.

York, Susquehanna & Western, Wilkes-Barre & Eastern and New Jersey & New York?

A All of them.

Q Have you figured out the figures for the Erie alone, the Erie Railroad Company alone?

A I have.

10 Q State what they are for the full year in the three States?

A \$277,691.

Commissioner Donges. There were two sets of figures given, one for the Erie Railroad and the other, I took it, included the entire Erie system.

20 *Mr. Taylor.* Mr. Chairman, in this territory, in New Jersey, New York & Pennsylvania the Erie Railroad and the Erie system as we use it, are synonymous. There is nothing in the Erie system, as we use it in this territory, except the Erie Railroad. The first figures which Mr. Crawford gave on this exhibit included roads controlled by the Erie, separately operated, the New York, Susquehanna & Western, the Wilkes-Barre & Eastern and New Jersey & New York. In this proceeding we have not been considering them as part of the Erie system. When we say Erie system we mean Erie Railroad Company plus Chicago & Erie Railroad.

30 Q What is the situation of the company's cash balance in hand in the treasury at present?

A My inquiry was for October 15th, when we had in round figures \$1,200,000, but of that amount \$250,000 was in special time deposits and not subject to immediate check.

Q That is rather less than you usually have on hand for conducting the business, is it not?

A Much less.

40 Q I show you a statement, taxes paid in the State

Charles P. Crawford, cross.

of New Jersey, not including taxes paid on property not used for railroad purposes for the years 1900 to 1913, inclusive—I will withdraw that. Those are not prepared by Mr. Crawford.

Cross examination by Mr. Merrey.

Q Exhibit 114, Mr. Crawford, under heading deductions from gross income, I notice Item 547 under heading of deductions from gross income, interest on unfunded debt \$73,389 as against \$10,813 in 1913. 10

A I have not the details with me. I shall be very glad to furnish a statement showing the composition of each amount and explaining the increase.

Q (*By Commissioner Hillery.*) Is it due to the additional short time notes issued in the meantime, probably, that additional interest on unfunded debt? Would that make up a considerable portion of the difference between \$73,000— 20

A These renewals were in October, Mr. Commissioner. If you permit it, I would prefer not to give the information off-hand.

Commissioner Donges. You may submit a statement.

Q (*By Mr. Merrey.*) Do you spread your interest over the full year or do you charge it up at the time when it is paid?

A The interest is charged out as it accrues. 30

Q So that this happens because some payments were made to fall due in August, 1914, that did not fall due in August, 1913?

A It has no reference to payments, Mr. Merrey; it is accrued interest.

Q Accrued interest?

A Yes, it may have been paid, of course, but it is made up on the basis of accruals.

Q You don't mean to say your unfunded debt increased enough to make the August interest— 40

691

Charles P. Crawford, cross.

A We issued a number of car trusts during the year and a number of notes.

Commissioner Donges. But that payment of \$73,000 is not indicative of what the payment for the succeeding month or two or three months might be?

10 *Mr. Merrey.* It is an increase of seven times, or it is seven times more, an increase of six times.

Witness. The interest on unfunded debt is confined to notes less than one year in maturity.

Q They have not been increased seven times over, have they? You have not seven times as much—

A Won't it answer if I furnish you this detailed statement?

20 *Mr. Merrey.* I don't know whether it will or not; it may. If you know anything about it, I ask you—

Mr. Taylor. Mr. Crawford is going to explain the details in his statement.

Mr. Merrey. That is all I want to know and if he could finish it now it would be so much better.

Q Do you know whether the unfunded debt is seven times as great, was seven times as great in August, 1914, as it was in August, 1913?

30 *Mr. Taylor.* That would not be a moral conclusion.

A It might be a difference in interest rates. The classification now provides that discount on some of these short term items must be charged to this account and if you have the Interstate Commerce Commission classification you will see it includes discount and the expense of these short term obligations.

Q It might include the expense of the issues of some such notes?

40 A Very likely it does.

Charles P. Crawford, cross.

Q (*By Commissioner Donges.*) It does not represent one-sixth of what might be expected on this account for any twelve months.

A No, sir. For example, in the month of October there will be some very heavy charges on account of the renewal of the five million dollar and the one million dollar note; each being less than a year will come under that heading. That is the name of the account as given by the Interstate Commerce Commission. 10

Q (*By Mr. Merrey.*) I notice from that statement that your net income for August, 1914, has increased \$14,000?

A For the two months combined, July and August, it did.

Q This statement then covers July and August?

A Headed, if you will notice, for two months ending August 31st. 20

Q I thought August, 1913, and August, 1914.

A For the months of July and August would be more explanatory.

Q For those two months your net income has increased?

A Yes, sir, \$14,000.

Q (*By Mr. Taylor.*) On this deduction from gross income I notice there is a decrease in deductions of \$157,539 on the one item of hire of freight cars, debit balance. Of course, that change in that one item is what makes the increase in the net income of \$14,000, and in fact, if that one item had been the same for these months as the two months before, there would have been a deficit of something like— 30

A \$143,000.

Q Please explain what that item hire of freight cars—debit balance, is.

A It represents the balance of the settlement made between the carriers, our cars on their lines : 40

Charles P. Crawford, cross.

cars of other lines on our road. The per diem rate is forty-five cents per day. This represents the net difference between the amounts paid and the amount received during the two months.

Q In other words, it means you used less cars of other roads or they used more of yours during those two months?

10 A Yes, you might state it that way.

Q You did less business than you had theretofore and received less revenue and it cost that much less to do it?

A Yes, it may have been on account of additional cars put into service by the Erie, or it might have been by economic measures to reduce the movement of cars.

20 *Mr. Taylor.* When we put on the operating witness we will make some explanation of what we have done to change that car hire item from a debit to a credit item.

Q (*By Commissioner Donges.*) I notice dividend income, 513, non-operating income is the same for the months of July and August, 1913, as July and August, 1914.

A Yes, sir, that is due to certain stocks which we have that are dividend paying, as stated, a regular stated amount, one of them being the Chicago & Western Indiana Railroad stock.

30 Q When is the dividend from the coal company, the Pennsylvania, ordinarily paid?

A They, in past years have had no established dates. I think they have tried when they had a dividend, it was to be paid quarterly during the year.

Q (*By Mr. Taylor.*) In what months was it ordinarily paid?

A I am sorry I cannot tell you.

Q Do you know whether it was ever paid in August?

40

Charles P. Crawford, cross.

A I wouldn't want to say, Mr. Taylor.

Q I suppose if you left the Pennsylvania Coal Company dividend out of consideration that the item of dividend income would not vary much from year to year as far as the Erie Railroad Company is concerned, would it?

A It might. For example, we got a dividend somewhat unexpected a few months ago, but generally speaking, I think it would remain practically constant. 10

Q In other words, the great variation in that account comes from the operations of the coal companies?

A Oh, yes; yes, sir.

Mr. Taylor. The chairman will recall the great bulk of that item is coal company dividends. 20

Q (*By Commissioner Donges.*) I understand you to say, Mr. Crawford, in discussing the note \$700,000 on account of the Long Dock Company, as shown on Exhibit 116, \$700,000, that the Long Dock Company had no income.

A Or did you say no operating income? It has really no income.

Q Hasn't it a rental income?

A The Erie Railroad Company pays to the trustees of the Long Dock mortgage each month a sufficient sum to meet the interest on their bonds. We, of course, maintain the property, the Erie Railroad Company maintains the property and pays the taxes and all other items. 30

Q It operates that property under a lease?

A It is leased property, yes, sir.

Mr. Taylor. Mr. Chairman, I think that is possibly a little misleading. I think it ought to be said that the lease is not necessarily exclusive, 40

Charles P. Crawford, cross.

more in the nature of a trackage agreement, and other companies might use the terminal so far as that contract is concerned.

Commissioner Donges. The point I have in mind is that the Long Dock Company has an income from the rental or the leasing of its facilities.

10 *Mr. Taylor.* Under that agreement the rental for the use of those facilities is paid direct to the trustees for the bondholders of the Long Dock Company, so the Long Dock Company has no income.

Mr. Merrey. It has an income in a sense, the Erie pays its debts for it.

20 *Commissioner Donges.* I think in the report of the Erie on page 30 the statement is made, the first item under table seven, rentals of leased lines for the year ending June 30, 1914, Long Dock Company's railroad, \$450,000.

Witness. That is the exact amount of the interest on these bonds, if you will notice on page 29.

Q So the rental paid by the Erie Railroad Company is the amount of interest upon seven and a half millions of six per cent bonds of the Long Dock Company?

30 A Yes, sir.

Q (*By Mr. Taylor.*) And those bonds, Mr. Crawford, are outstanding in the hands of the public?

A All in the hands of the public, yes, sir.

Mr. Merrey. There is a mill you spoke about that was leased.

Q (*By Commissioner Donges.*) But the Long Dock Company has income from other sources, hasn't it?

40

Charles P. Crawford, cross.

A I should have stated that they received a rental for the elevator.

Mr. Taylor. You did so state, as a matter of fact, that is what the testimony will show.

Q From what other sources is there income to the Long Dock Company?

A I know of no other sources.

10

Mr. Taylor. Did you include the elevator in your question?

Commissioner Donges. I asked what other sources.

Mr. Taylor. If you will turn back to Mr. Crawford's original statement you will see that as I framed the question I excepted the income from the elevator and from the Long Dock mill. Those are two structures, both on the same dock.

Commissioner Donges. Doesn't the Long Dock Company own all of the property located on the dock? 20

Mr. Taylor. It owns all the property, and the rental from those properties is technically, I suppose, income of the Long Dock Company, but of course it does not pay the interest. I say, of course, as a matter of fact it does not pay the interest.

Commissioner Donges. The Erie Railroad as a rental for facilities used by it, the Erie Railroad pays the interest on seven and a half millions of bonds. 30

Mr. Taylor. Exactly, sir.

Commissioner Donges. But other income for use of property and facilities of the Long Dock Company is paid by the lessees or users to the Long Dock Company, as I understand it.

Mr. Taylor. I so understand.

Commissioner Donges. Is that right? 40

Charles P. Crawford, cross.

Witness. Yes, sir. The Long Dock elevator, the Jersey City elevator is leased by the Long Dock Company to a corporation known as the Erie Company, but it has no connection with the Erie Railroad Company, and the Long Dock Company receives a rental from the Erie Company (that is the elevator company) for the use of the elevator.

10

Q (*By Mr. Taylor.*) Do you happen to know, Mr. Crawford, whether that rental is sufficient to pay the interest on the promissory note of the Long Dock Company?

A I believe there is a loss; not sufficient.

Q (*By Commissioner Donges.*) Is there any other source from which the Long Dock Company receives any income?

20

A Not that I think of, sir. There are a few parcels of real estate that the Erie receives the rental and pays the expenses. Possibly it is a net loss, I am not sure, but those are the only items I think of.

(Adjourned until Monday, November 2, 1914, at the Kinney building, Newark, N. J., at two o'clock P. M.)

30

40

Charles P. Crawford, direct.

SIXTEENTH HEARING.

BOARD OF PUBLIC UTILITY COMMISSIONERS

Newark, N. J., Monday, November 2, 1914.

PATERSON GRADE CROSSING ELIMINATION,
ERIE RAILROAD COMPANY. }

10

Before the following commissioners:

R. W. E. Donges, Esq.

T. J. Hillery, Esq.

J. J. Treacy, Esq.

For the petitioner appears E. F. Merrey, Esq.

For the respondent appear H. A. Taylor, Esq.,
D. E. Minard, Esq., and G. S. Hobart, Esq.

Mr. Minard. We want to offer the general mortgages, the three of them. We have not very numerous copies and I have had to gather them up. I got these from the secretary's office, which he told me was all I could have. I have them in another form as offered as an exhibit in another case which we have a record of here and I thought I would loan this, if I could get it back, and those I could leave with the commission.

20

(These three mortgages were previously offered and given numbers as Exhibit R-118, R-119, and R-120.)

30

CHARLES P. CRAWFORD, re-called on behalf of respondent.

Direct examination by Mr. Minard.

Q On the question of the Pennsylvania Coal Company dividends, you were to find out for a period of years, I believe, Mr. Crawford, what the dividends have been, to show how the last few years compared.

A Yes, sir.

40

Charles P. Crawford, direct.

Q What have you got about that?

A I have a statement of the amounts received by the Erie Railroad Company from the Pennsylvania Coal Company for the ten years, 1905 to 1914, inclusive.

Q And you take that ten-year period as a representative period from which to strike an average?

10 A Oh, yes.

Q Why are there two columns instead of one?

A During the years ending June 30th, 1905, 1906, 1907 and 1908, the surplus of the coal company was paid over to the Erie Railroad Company as being the sole stockholder. Since 1909 the coal company has declared dividends by its Board of Directors.

Q (*By Commissioner Donges.*) Before, the dividends were not formally declared?

20 A Not as dividends; I think the Board of Directors merely passed a resolution that the surplus should be paid over to the owners of the stock, which was the railroad company.

Mr. Minard. I offer that statement.

(Statement entitled, "Erie Railroad Company, statement showing amounts included in Income Account of E. R. R. Co., derived from Pennsylvania Coal Co., as dividends for years ending June 30th," received and marked Exhibit R-126.)

30 Q (*By Mr. Minard.*) Mr. Crawford, you were asked to ascertain if you could anything that would explain the difference in amount of dividend, 1913 and 1914. Have you been able to find out anything about the stock of coal that was suggested here?

A Yes, sir; I have made inquiry respecting the value of the coal in stock that is mined and held for the market by the Pennsylvania Coal Company at June 30th, 1913, and June 30th, 1914, but I find no
40 explanation there for the increased dividend, for the

Charles P. Crawford, direct.

amount of stock is practically the same, being \$1,370,835 in June 30th, 1913, and \$1,323,000 in 1914.

Q Have you reached any other conclusion as to the difference in these amounts?

A I have no definite information as I have no official connection with the coal company. The statement perhaps indicates that the dividend for 1913 was very large, perhaps larger than it should have been. 10
